

Antietam Staff Ride

During a 2-day staff ride to Antietam National Battlefield, NCOA students personally witness most of the significant historical locations and the fighting that took place leading up to and including the single bloodiest day in American military history, the Battle of Antietam.

Students receive a strategic Campaign brief from the Regimental Historian at TJAGLCS. While at Antietam, tour guides will brief at each stop point to describe the overview of battle events. Students are actively engaged in the experience by studying the battle prior to the staff ride, briefing the historical figures who were involved in various battles, providing leadership lessons learned from their study, and learning more about the battle at the Antietam Visitor's Center.
