Attachment – Description of Changes Promulgated on May 31, 2016

## DEPARTMENT OF DEFENSE LAW OF WAR MANUAL

### Description of Changes Promulgated on May 31, 2016

1. Minor changes to the discussion of the principle of proportionality, principally in § 2.4.
  - a. Revised § 2.4.1.1 to be more precise and to be consistent in style with other parts of the manual.
  - b. Revised the last sentence of the first paragraph of § 2.4.1.2 to match the language used in the cross-referenced § 5.12.
  - c. Revised the title of § 2.4.2 to be more specific in describing its content.
  - d. Revised the second paragraph of § 2.4.2 to clarify that the principle of proportionality understood in its broadest sense is reflected in obligations to take feasible precautions, including when conducting attacks.
  - e. Revised the title of § 5.12 to be more specific to avoid potential confusion with the discussion of the broader principle of proportionality. Revised the corresponding cross-references to the section title in the footnotes of:
    - i. § 1.11.1.2 (footnote 194)
    - ii. § 2.4.1.2 (footnote 70), § 2.4.2 (footnote 73)
    - iii. § 3.5.1 (footnote 85)
    - iv. § 4.8.2 (footnote 198)
    - v. § 5.3.2 (footnote 18), § 5.5.1 (footnote 65), § 5.5.2 (footnote 67), § 5.7.1.2 (footnote 136), § 5.12.5 (footnote 325), § 5.18.5.1 (footnote 517)
    - vi. § 6.5.9.3 (footnote 106), § 6.7.1 (footnote 149), § 6.7.4 (footnote 160), § 6.12.5.2 (footnote 291), § 6.14.2.1 (footnote 366), § 6.14.3 (footnote 371), § 6.18 (footnote 412)
    - vii. § 13.5.2.1 (footnote 95)
    - viii. § 14.8.3.3 (footnote 128)
    - ix. § 16.5.1 (footnote 46), § 16.5.1.1 (footnote 49)
    - x. § 17.7 (footnote 113)
2. Minor revisions to the discussion of the principle of honor in § 2.6.
  - a. Added “military” before “forces” or replaced “combatants” with “military forces” to clarify that the principle of honor helps distinguish military forces from terrorist groups and other unlawful combatants. Made these revisions in:
    - i. the first line of § 2.6
    - ii. the title of § 2.6.3
    - iii. the first sentence of § 2.6.3
    - iv. the first sentence of § 2.6.3.1
    - v. the title of § 2.6.3.2,
    - vi. the first sentence of § 2.6.3.2
  - b. Revised the first paragraph of § 2.6.1 to explain that the principle of honor remains important as a core value of the U.S. military and helps strengthen implementation of the law of war.
  - c. Revised the second paragraph of § 2.6.1 to help clarify that the principle of honor as used in the manual does not refer to a particular code found in history, but instead draws from warriors’ codes from a variety of cultures and time periods.
3. Substantial revisions to the discussion of journalists in § 4.24.

- a. Added references to DoD and U.S. Government policy recognizing the importance of the role of journalists in armed conflict.
  - b. Reorganized and revised the section to emphasize the protection of journalists as civilians and to clarify that a journalist would only be considered a combatant on an exceptional basis when that person had acquired such status.
  - c. Added more sources, including relevant U.N. Security Council Resolutions, DoD policies, and examples of relevant DoD or other practice.
  - d. Added discussion of, and reference to, DoD policies relating to interactions with the press to avoid any misimpression that the manual would revise such DoD policies.
  - e. Revised the section to focus on the contexts most relevant to DoD practitioners (*e.g.*, added an example from DoD practice of ensuring that media access to military operations is consistent with law of war obligations, such as the obligation to protect detainees against public curiosity).
  - f. Revised the cross-reference from § 4.24.2 to § 4.24.1 in:
    - i. § 5.9.3.2 (footnote 241)
    - ii. § 19.20.1.4 (footnote 209)
4. Changes for stylistic consistency.
- a. Changed the citation to DoD Directive 2311.01E in the Preface to be more consistent with citations elsewhere in the manual.
  - b. Italicized “proportionality” in both instances in the last paragraph of § 2.4.2.
  - c. Changed “land mines” to “landmines” in § 6.12.13.
  - d. Changed “antipersonnel” to “anti-personnel” in §§ 6.12.13 and 6.12.14.
  - e. Capitalized “is” in the title of § 5.12.3.
5. Typographical and other administrative errors.
- a. Added the long-form citation for Rogers, Law on the Battlefield, to the list of abbreviations.
  - b. Changed “Australian Royal Air Force” to “Royal Australian Air Force” in the Preface.
  - c. Formatted footnote numbers 58 and 59 to be superscript in § 2.3.1.1.
  - d. Changed “in way” to “in a way” in § 2.4.
  - e. Added “to” after “the Party” in § 4.26.2.2.
  - f. Deleted “the” from the quote from U.N. General Assembly Resolution 2675 cited in § 5.3.3 (footnote 27) and § 5.3.3.1 (footnote 35).
  - g. Added “Part” to the title of § 5.9.3.2. Revised the corresponding cross-references to the section title in the footnotes of:
    - i. § 4.23.1 (footnote 465), § 4.24.1 (footnote 476)
    - ii. § 5.8.3.2 (footnote 204)
  - h. Changed “civilians workers” to “civilian workers” in § 5.12.3.2.
  - i. Changed “the safety of the civilian populations” to “the safety of the civilian population” in § 5.14.
  - j. Deleted “emphasis added” from the citation in footnote 85 in § 6.5.4.5 because the text does not contain modifications for emphasis.
6. Punctuation and Spacing.

- a. Removed “Widow/Orphan control” from the paragraph formatting of the entire document to ensure that footnote text would always be on the same page as the footnote reference number in the main text.
- b. Moved a comma in the first citation in footnote 25 in § 1.3.2.2 for consistency with the other citation forms for this source.
- c. Removed an extra carriage return.
  - i. § 2.3.1.1 (after section title)
  - ii. § 4.5.2.1 (footnote 102)
- d. Deleted an extra space after punctuation and before the footnote number.
  - i. § 4.20.4 (footnotes 432, 434)
  - ii. § 5.3.3.3 (footnote 44)
  - iii. § 6.5.1 (footnote 44), § 6.20.3.1 (footnote 456)
  - iv. § 9.22.1 (footnote 495)
  - v. § 11.18.5.2 (footnotes 324, 325)
  - vi. § 12.4.2.1 (footnote 42), § 12.8.5 (footnote 140)
  - vii. § 15.1.5 (footnote 19), § 15.14.1 (footnote 276)
  - viii. § 19.7.1 (footnote 78)
- e. “Hague IV Reg” was corrected to “Hague IV Reg.”.
  - i. § 5.11 (footnote 279), § 5.14.4 (footnote 353)
  - ii. § 19.8.2.1 (footnote 99)
- f. Corrected footnotes that ended in a semi-colon so that they would end in a period.
  - i. § 6.6.3.3 (footnote 139)
  - ii. § 7.12.2.7 (footnote 319)
  - iii. § 13.10.2.3 (footnote 160)

GENERAL COUNSEL

GENERAL COUNSEL OF THE DEPARTMENT OF DEFENSE

1600 DEFENSE PENTAGON  
WASHINGTON, DC 20301-1600

December 13, 2016

The changes described in the attachment are hereby promulgated pursuant to Department of Defense Directive 2311.01E, *DoD Law of War Program* (May 9, 2006), Department of Defense Directive 5145.01, *General Counsel of the Department of Defense (GC DoD)* (Dec. 2, 2013), and 10 U.S.C. § 140(b) (2012).

The Department of Defense Law of War Manual (June 2015, Updated December 2016) incorporates the changes described in the attachment. Previous versions of this Manual (June 2015) and (June 2015, Updated May 2016) should no longer be used.

A large, stylized handwritten signature in black ink, appearing to read "Jennifer M. O'Connor".

Attachment  
Description of Changes Promulgated on December 13, 2016

## DEPARTMENT OF DEFENSE LAW OF WAR MANUAL

### Description of Changes Promulgated on December 13, 2016

1. Substantial revisions to the discussion of the principle of proportionality and other changes to Chapter V.
  - a. Significant revisions to §§ 5.11 and 5.12 and a new § 5.10 that provides an overview and context for applying §§ 5.11 and 5.12.
    - i. In particular, the new § 5.10:
      1. Clarifies how the general principle of proportionality relates to the more specific rules prohibiting attacks expected to cause excessive incidental harm and requiring the taking of feasible precautions.
      2. Clarifies the scope of the principle of proportionality by:
        - a. discussing how the principle of proportionality does not create duties intended to reduce the risk of harm to military objectives; and
        - b. adding language clarifying how the principle of proportionality applies to military personnel and facilities that may not be made the object of attack, such as military medical personnel and the military wounded and sick.
      3. Discusses how the principle of proportionality is implemented through the chain of command. The discussion addresses:
        - a. the responsibility of commanders in implementing the principle of proportionality;
        - b. the need for competent authority;
        - c. the subjective aspects of the decisions and judgments required by the principle of proportionality;
        - d. understanding the authorities of subordinates when commanders provide subordinates substantial discretion in the tactics of an attack, especially in relation to canceling or suspending such an attack; and
        - e. the duty not to comply with clearly illegal orders and the principle of proportionality.
      4. Discusses how the principle of proportionality has been implemented through military procedures.
      5. Discusses how time constraints affect the implementation of the principle of proportionality.
      6. Clarifies the relationship between the prohibition on attacks expected to cause excessive harm and the obligation to take feasible precautions.
    - ii. Revisions to § 5.11.
      1. Revises the title to include precautions in “planning” as well as “conducting” attacks.
      2. Adds language to the chapeau of § 5.11 to highlight the need to consider § 5.11 in light of the information in § 5.10.
      3. Adds a bulleted list to the chapeau of § 5.11 to provide an overview of the section.

4. Reorders the examples of precautions and includes new discussion of three precautions: (1) assessing the risks to civilians, (2) canceling or suspending attacks based on new information raising concerns of expected civilian casualties, and (3) selecting military objectives.
  5. In § 5.11.1, adds discussion of the different types of assessments of risks to civilians that may be taken, including (1) general assessments, (2) pre-strike assessments, and (3) after-action assessments and investigations. In the footnotes, cites Executive Order 13732, *United States Policy on Pre- and Post-Strike Measures To Address Civilian Casualties in U.S. Operations Involving the Use of Force*, and recent DoD statements and information, to provide examples of this practice.
  6. In § 5.11.2, revises and supplements the discussion of identifying zones in which military objectives are more likely to be present or civilians are more likely to be absent. In the footnotes, cites recent DoD statements and other historical examples of this practice.
  7. In § 5.11.3, adds recent examples in the footnotes of DoD practice in adjusting the timing of an attack.
  8. In § 5.11.4, adds discussion of the precaution of deciding to cancel or suspend an attack based on new information raising concerns of expected civilian casualties or authorizing subordinates to do so, in order to reduce the risk of harm to civilians and civilian objects. In the footnotes, adds recent examples of DoD practice of cancelling or suspending an attack to reduce the risk of harm to civilians.
  9. In § 5.11.5, revises the discussion of providing warnings to make it clear that warnings to facilitate the protection of the civilian population may be given so that civilians and the authorities in control of the civilian population can take measures for their own protection. Restructures the discussion of the examples of providing warnings and, in the footnotes, supplements the examples of providing warnings, including examples of more recent DoD practice.
  10. In § 5.11.6, revises the discussion of “weaponeering” for clarity and adds an example of recent DoD practice in a footnote.
  11. In § 5.11.7, adds discussion of the precaution of choosing a particular military objective for attack when it may be expected to cause the least danger to civilian lives and to civilian objects, when a commander may have a choice among several military objectives for achieving a particular military advantage; identifies the types of circumstances when exercising this choice would be necessary. Clarifies that whether Article 57(3) of AP I is consistent with customary law would depend upon how AP I parties interpret their obligation.
- iii. Revisions to § 5.12.

1. Adds language to the chapeau of § 5.12 to highlight the need to consider § 5.12 in light of the information in § 5.10.
  2. Adds discussion of prioritizing human life over civilian objects, and prioritizing cultural property over other types of civilian objects.
  3. Elaborates upon the discussion of concrete and direct military advantage to be gained, including discussion of considering the advantage from the attack as a whole – in the operational and strategic context.
  4. Adds discussion of the need to make a holistic, “totality of the circumstances,” judgment in determining whether civilian casualties are expected to be excessive, including discussions of (1) the military concept of economy of force, (2) the relationship between the requirement to take feasible precautions and the requirement to refrain from conducting attacks when civilian casualties are expected to be excessive, (3) civilian workers who support military operations in or on military objectives, and (4) enemy use of human shields.
- b. Revisions to the discussion in § 5.1 about the implementation of law of war obligations to harmonize this discussion with the additional discussion in § 5.10 about the implementation of the principle of proportionality, including the responsibility of commanders.
- i. Adds language and cross-references in the second paragraph of § 5.1 for clarity and precision.
  - ii. In § 5.1.2, changes “law of war rules in the conduct of hostilities” to “law of war rules for the conduct of hostilities” in the first sentence for grammatical reasons. Adds a footnote to this sentence with cross-references to the Chapter I discussion of rules of engagement and the Chapter XVIII discussion of implementation of law of war obligations through domestic procedures.
  - iii. Adds subsection headings in § 5.1.2.
  - iv. In § 5.1.2.1, revises the first sentence for clarity and precision. Adds footnote to this sentence with a reference to Executive Order 13732, *United States Policy on Pre- and Post-Strike Measures To Address Civilian Casualties in U.S. Operations Involving the Use of Force*. Further in this discussion, adds a footnote referencing a speech by the State Department Legal Adviser in April 2016. Clarifies the relationship between violations of policy standards and violations of the law of war, which is a point that is similarly addressed in § 18.7.2.3.
  - v. Revises the title of what is now § 5.1.2.2 as well as the first sentence that follows to be more specific and to track the language that is used in § 18.3.1.1.
    1. Places most of this discussion in § 18.3.1.1 rather than in § 5.1.2.2 because this discussion is generally applicable to the implementation of law of war obligations.

2. Adds a sentence with another example in § 5.1.2.2 for further clarity, which draws upon the new discussion in § 5.10.2. Adds a footnote to this sentence with a cross-reference to § 5.10.2.
- c. Revisions to what is now § 5.2 (previously § 5.3).
    - i. In the chapeau of § 5.2, adds an “and” between the items in the bulleted list.
    - ii. In § 5.2.1, adds an example at the end of the section to help clarify what was meant by what was previously the last sentence in the section.
    - iii. In § 5.2.2, revises the second bullet to match more closely the language in the cross-referenced § 5.12.
    - iv. In § 5.2.3.1, clarifies how the manual addresses different terms such as “feasible,” “reasonable,” and “practical” precautions. Adds footnotes to support the discussion. Adds a paragraph to clarify how the manual interprets the obligation to take “all feasible” precautions or the requirement that “everything feasible” be done.
    - v. In § 5.2.3.2, clarifies in the bulleted list that money is merely a resource like other resources, such as time. Also, revises some of the language after the bulleted list for clarity, including clarifying the example in light of the warning requirement in relation to protected military medical facilities, and adds footnotes to support the following discussion. In the last paragraph of the section, adds a footnote to the first clause with source that supports the point and elaborates upon it.
    - vi. Adds § 5.2.3.3 to help clarify the extent to which precautions are legally required or are policy decisions.
  - d. Revisions to what is now § 5.4 (previously § 5.5).
    - i. Revises the third bullet in the list in § 5.4.2 to correspond to the updated language in § 5.11.
    - ii. In § 5.4.3, adds “against that target” to the end of the second sentence for clarity.
    - iii. In § 5.4.3.1, changes “exceed” to “impose greater restrictions than” for clarity and precision.
    - iv. In § 5.4.3.2, changes “its” to “AP I” in two places in the last paragraph for clarity.
    - v. In § 5.4.4, changes “may” to “might” in the second sentence of the first paragraph to clarify that the sentence is a statement of fact rather than a statement of what is legally permitted. Adds a sentence to the end of the paragraph and provides a footnote with two sources as support for that sentence to help clarify what is meant by the preceding sentence.
    - vi. In § 5.4.6.1, revises the last sentence to account for warning requirements with respect to other protected units, vessels, and facilities, such as protected military medical units and facilities, and adds a cross-reference in the footnote to the relevant section in § 5.11.5.1.
  - e. Revisions to what is now § 5.6 (previously § 5.7).
    - i. In § 5.6.1.2, changes “a proportionality analysis” to “applying the principle of proportionality” for precision and clarity. Changes “resulting” to “that is expected to result” in order to convey that the assessment will

- be undertaken before the attack. Changes “destruction of” to “attack on” to clarify that harm resulting from attacks that do not destroy the object would be considered.
- ii. In § 5.6.5, adds “capturing, or neutralizing” to the second part of the definition of military objective for objects, in order to improve accuracy. In the second to last sentence of the section, revises the language to clarify that the reference to the “proportionality rule” is meant as a reference to the obligation related to whether an attack is expected to cause excessive harm to civilians.
  - iii. In § 5.6.6, capitalizes several of the words in the section title.
  - iv. In § 5.6.6.2, adds to an existing footnote reference to a speech by the State Department Legal Adviser in April 2016.
  - v. In § 5.6.7.3, adds a citation to the Eritrea Ethiopia Claims Commission in a footnote. In the fifth paragraph, changes “broader than only” to “not limited to” and “the enemy’s” to “enemy forces” for precision and clarity.
- f. In § 5.13.1, changes the reference to “distinction and proportionality rules” to “principles of distinction and proportionality” for clarity.
  - g. In § 5.14, clarifies the location of the referenced discussion by changing “[a]s discussed above” to “[a]s discussed in § 5.2.3.2 (What Precautions Are Feasible)” and deletes the phrase “, including operational considerations” for simplicity. Adds a footnote and cross reference to the last sentence in the last paragraph of § 5.14.1.
  - h. Revisions to § 5.16.
    - i. In § 5.16.1, adds “otherwise” to the second to the last sentence in the section to clarify that participation in hostilities is a form of assumption of risk, and revises the last sentence in the section to make it consistent with § 5.12.3.3.
    - ii. In § 5.16.4, updates the title to be more general. Adds a new paragraph to account for revisions to § 5.12.3.4.
    - iii. Adds a new section (§ 5.16.5) to clarify that language about “responsibility” for harm to human shields is a different, but related, issue from the prohibition on attacks expected to cause excessive incidental harm. Adds footnotes with sources to support the main text.
  - i. In § 5.18.6, changes “more broadly” to “even if the property does not constitute cultural property” to make it clear that pillage of any property is prohibited.
2. Conforming edits to ensure consistent presentation and discussion of the principle of proportionality.
    - a. Changes the “rule of proportionality” to the “principle of proportionality” in the second paragraph, first sentence of § 1.11.1.2.
    - b. Chapter II discussion of the principle of proportionality.
      - i. Revises footnote 68 in the second sentence of § 2.4 to delete the existing source and instead cross-reference § 5.12.3.1, as the source that was previously cited in that footnote and other relevant sources are provided in the cross-referenced section.
      - ii. Revises language in the third sentence in the first paragraph of § 2.4.1.2 from “proportionality rule” to “principle of proportionality” and adds a

- footnote with a cross-reference to the new § 5.10. Shifts from discussing the proportionality rule in the last sentence in this paragraph to discussing the proportionality principle, including a reference to the obligation to take precautions. Omits a specific reference to combatants in the same sentence. Adjusts footnotes accordingly.
- c. Chapter III discussion of the difference between *jus ad bellum* and *jus in bello* proportionality.
    - i. Clarifies in the second paragraph of § 3.5.1 that the broader principle of proportionality in *jus in bello* is being discussed. Adds a specific reference to the obligation to take feasible precautions and revises the characterization of the prohibition against attacks expected to cause excessive incidental harm to match more closely the language in § 5.12. Adds a footnote at the end of the paragraph cross-referencing § 5.10.1.1. Adjusts footnotes accordingly.
  - d. Chapter IV discussion of classes of persons.
    - i. Adjusts the examples of obligations of combatants in the conduct of hostilities in § 4.4.1 to correspond to the discussion of the principles of distinction and proportionality in the new § 5.5 and § 5.10. Adjusts footnotes accordingly.
    - ii. Revises language in § 4.15.2 from “must accept the risk” to “accept certain risks” for clarity and accuracy.
    - iii. Adds the word “deliberate” before the word “proximity” in the first sentence of §4.15.2.3 to emphasize that the proximity of those authorized to accompany the armed forces to military operations is deliberate. Revises the example in the second sentence of that section to be more specific for clarity. Adds a cross-reference at the end of that sentence to § 14.4.2. Revises the third sentence of that section to clarify the antecedent of “they” in light of the change to the second sentence. Adjusts footnotes accordingly.
  - e. Chapter VII discussion relating to the risk of incidental harm.
    - i. Revises the discussion in § 7.3.3.1 for precision. Adds two sentences to the end of the section about the acceptance of risk by combatants who are wounded, sick, or shipwrecked on the battlefield, as well as their status under the law of war. Adjusts footnotes accordingly.
    - ii. Revises the language in § 7.8.2.1 to make the connection to assumption of the risk clearer, and in the next sentence explains how the principle of proportionality applies to the attacker in situations involving military medical and religious personnel. Adjusts footnotes accordingly.
    - iii. Adds the word “military” in § 7.10.1.1 to make clear the scope of the section. Revises the last sentence and adds an additional sentence to make the connection to assumption of the risk clearer and to explain how the principle of proportionality applies to the attacker in situations involving military medical units and facilities. Adjusts footnotes accordingly.
    - iv. Adds the word “military” in § 7.10.1.3 to make clear the scope of the section.

- v. Adds a sentence to the end of § 7.12.2.5 explaining how the principle of proportionality applies to the attacker in situations involving hospital ships and coastal rescue craft. Adjusts footnotes accordingly.
- f. Chapter XIV discussion of selection of weapons in conducting attacks from the air against ground military objectives.
  - i. Revises the third paragraph of § 14.9.2 for consistency in describing the general obligation to take feasible precautions.
- g. Chapter XVI discussion of cyber operations and *jus in bello* proportionality.
  - i. Changes the “proportionality rule” to the “principle of proportionality” in several sentences of § 16.5.1.1 for consistency with language used elsewhere. Changes “the proportionality rule” to “this prohibition” in the second sentence of § 16.5.1.1 for consistency with language used elsewhere. Changes “losses” to “disruptions” in the third paragraph of § 16.5.1.1 for consistency with language used elsewhere. Changes “applying” to “assessing whether an attack is prohibited by” in the third paragraph of § 16.5.1.1 for clarity and accuracy.
  - ii. Changes the “proportionality rule” to the “principle of proportionality in conducting attacks” in the last paragraph of § 16.5.2 for consistency with language used elsewhere.
  - iii. Changes the “proportionality rule” to the “principle of proportionality” in the last paragraph of § 16.5.3 for consistency with language used elsewhere. Adjusts footnotes accordingly.
- h. Chapter XVII discussion of the law of war in non-international armed conflicts.
  - i. Revises § 17.7 for consistency in describing the general obligation to take feasible precautions.
  - ii. Changes the “distinction and proportionality rules” to the “principles of distinction and proportionality” in § 17.7.1 for consistency with language used elsewhere.
  - iii. Revises language in § 17.14.1.2 to clarify the legal consequences of the acceptance of incidental harm in non-international armed conflicts by the wounded, sick, and shipwrecked. Adjusts footnotes accordingly.
  - iv. Revises language in § 17.15.1.2 to clarify the legal consequences of the acceptance of incidental harm in non-international armed conflicts by medical and religious personnel who are part of armed forces or groups. Adjusts footnotes accordingly.
  - v. Revises language in § 17.15.2.2 to clarify the legal consequences of the acceptance of incidental harm in non-international armed conflicts by medical units and transports that are part of armed forces or groups. Adjusts footnotes accordingly.
- i. Chapter XVIII discussion of the duties of each individual member of the armed forces to implement the law of war.
  - i. Reorganizes and elaborates slightly upon § 18.3.1 as it explains principles that are discussed in the revised sections on proportionality. Adds two subsection headings to help organize the section and allow for cross-referencing.

1. In the new § 18.3.1.1, articulates the underlying principle that is drawn upon in the revised sections on proportionality and adds an example from the revised sections on proportionality.
    - ii. Adds a sentence in the new § 18.3.2.1 connecting this section with the new discussion in § 5.10.2.3.
3. Revisions to § 18.7.2.3.
  - a. Adds an example in § 18.7.2.3 that cross-references discussion in the new § 5.1.2.1.
  - b. Adds a sentence in § 18.7.2.3 noting that failures to adhere to policy standards that are more restrictive than law of war requirements would not necessarily be violations of the law of war.
4. Updates the example used to illustrate the use of the “*For example*” signal in § 1.2.4 to reflect the revisions to that footnote.
5. Adds a new source to support the point made in § 6.13.2 (footnote 345).
6. Updates to account for recent developments in U.S. practice.
  - a. Adds a source to footnote 217 in § 6.10.3.1 from a U.S. statement to the United Nations Sixth Committee in November 2015.
  - b. Adds a sentence to the end of the first paragraph of § 6.13.4 drawn from a U.S. statement to the United Nations Conference on Disarmament in November 2015.
  - c. Adds material drawn from *Principles Related to the Protection of Medical Care Provided by Impartial Humanitarian Organizations During Armed Conflict*, which was affirmed by the Secretary of Defense in a memorandum of October 3, 2016.
    - i. Adds a paragraph to the end of § 4.26.2, before § 4.26.2.1, that includes a relevant point discussed in Chapter XVII and that also makes a point reflected in the October 2016 Principles document.
    - ii. Adds a citation in the sixth bullet in § 5.8.3.2.
    - iii. Adds a sentence at the end of § 17.8.1.
  - d. Adds a sentence in § 18.1.2.1 drawn from a speech by the State Department Legal Adviser in April 2016.
7. Changes for stylistic consistency.
  - a. Capitalizes “versus” in the title of § 1.3.1.2.
  - b. Removes italicization of “proportionality” in “the principle of proportionality” in
    - i. The last sentence of § 2.2.1.
    - ii. The first and third sentences of § 2.4.2.
  - c. Italicizes the word “parlementaires” in § 12.3.
  - d. Italicizes the word “Parlementaires” in the title of § 12.5.
  - e. Standardizes the references to the title of the Legal Adviser, Department of State.
    - i. Footnote 154, § 1.9.1.
    - ii. Footnote 218, § 1.11.4.3.
    - iii. Footnote 148, § 13.10.1.
    - iv. Footnote 218, § 17.18.2.
  - f. Standardizes the references to the title of the General Counsel, Department of Defense.
    - i. Footnote 109, § 1.6.5.
    - ii. Footnote 80, § 2.5.

- iii. Footnote 89, § 2.5.3.
  - iv. Footnote 36, § 6.4.3.
  - v. Footnote 159, § 6.7.4.
  - vi. Footnote 173, § 6.8.1.2.
8. Typographical and other administrative errors.
- a. Makes conforming changes to the section numbers and titles in the cross-references.
  - b. Adds a date to the citation in footnote 111 in § 6.5.9.4.
  - c. Refines the citation in footnote 53 in § 8.4.2.1.
  - d. Corrects the date in the citation to the U.S. Government's reply brief in *Hedges v. Obama* from Sept. 20, 2012 to Dec. 20, 2012.
    - i. § 4.18.4.1, footnote 390.
    - ii. § 4.24.1, footnote 477.
  - e. Corrects typographical errors in footnote 44 in § 11.1.3.4.
9. Punctuation and Spacing.
- a. Adds a section symbol in § 8.5.1.1 (footnote 56).
  - b. Adds a missing comma in the citation to Bothe, Partsch, and Solf in § 17.6.7 (footnote 109).
10. New Cross-References.
- a. Changes the cross-reference in § 1.11.1.2 (footnote 194) from § 5.12 to § 5.10.
  - b. Adds a cross-reference in § 2.2.3.1 (footnote 42) to § 5.12.2.1.
  - c. Adds a new cross-reference in § 6.13.2 (footnote 344) to § 5.11.6.
  - d. Deletes the cross-reference in § 12.5.3 (footnote 61) to § 5.12.3.2.
  - e. Changes the cross-reference in § 14.4.2 (footnote 78) from § 5.12.3.2 to § 5.12.3.3.

## FOREWORD

The law of war is of fundamental importance to the Armed Forces of the United States.

The law of war is part of who we are. George Washington, as Commander in Chief of the Continental Army, agreed with his British adversary that the Revolutionary War would be “carried on agreeable to the rules which humanity formed” and “to prevent or punish every breach of the rules of war within the sphere of our respective commands.” During the Civil War, President Lincoln approved a set of “Instructions for the Government of the Armies of the United States in the Field,” which inspired other countries to adopt similar codes for their armed forces, and which served as a template for international codifications of the law of war.

After World War II, U.S. military lawyers, trying thousands of defendants before military commissions did, in the words of Justice Robert Jackson, “stay the hand of vengeance and voluntarily submit their captive enemies to the judgment of law” in “one of the most significant tributes that Power has ever paid to Reason.” Reflecting on this distinctive history, one Chairman of the Joint Chiefs of Staff observed that “[t]he laws of war have a peculiarly American cast.” And it is also true that the laws of war have shaped the U.S. Armed Forces as much as they have shaped any other armed force in the world.

The law of war is a part of our military heritage, and obeying it is the right thing to do. But we also know that the law of war poses no obstacle to fighting well and prevailing. Nations have developed the law of war to be fundamentally consistent with the military doctrines that are the basis for effective combat operations. For example, the self-control needed to refrain from violations of the law of war under the stresses of combat is the same good order and discipline necessary to operate cohesively and victoriously in battle. Similarly, the law of war’s prohibitions on torture and unnecessary destruction are consistent with the practical insight that such actions ultimately frustrate rather than accomplish the mission.

This manual reflects many years of labor and expertise, on the part of civilian and military lawyers from every Military Service. It reflects the experience of this Department in applying the law of war in actual military operations, and it will help us remember the hard-learned lessons from the past. Understanding our duties imposed by the law of war and our rights under it is essential to our service in the nation’s defense.

Stephen W. Preston  
General Counsel of the Department of Defense

## PREFACE

This manual is a Department of Defense (DoD)-wide resource for DoD personnel – including commanders, legal practitioners, and other military and civilian personnel – on the law of war.

This manual has many distinguished antecedents that have provided important guidance to the U.S. Armed Forces. For example, General Order No. 100, the Instructions for the Government of Armies of the United States in the Field, commonly known as the Lieber Code, was prepared by Professor Francis Lieber and approved by President Abraham Lincoln during the Civil War in 1863.<sup>1</sup> A similar code related to naval warfare titled *The Law and Usages of War at Sea: A Naval War Code* was prepared by then-Captain Charles H. Stockton and approved by President William McKinley in 1900.<sup>2</sup> The War Department published instructions for the armed land forces of the United States in a 1914 manual titled *Rules of Land Warfare*, which was updated in 1917, 1934, and 1940.<sup>3</sup>

After World War II, in connection with U.S. ratification of the 1949 Geneva Conventions, the Department of the Navy published *Naval Warfare Information Publication 10-2, Law of Naval Warfare*, in 1955,<sup>4</sup> and the Department of the Army published *Field Manual 27-10, The Law of Land Warfare*, in 1956, which was updated in 1976.<sup>5</sup> The Department of the Army also published pamphlets on international law applicable in peace and war in the 1960s, and, in 1979, an updated version of the pamphlet on the law of peace.<sup>6</sup> The Department of the Air Force published in 1976 *Air Force Pamphlet 110-31, International Law – The Conduct of Armed Conflict and Air Operations*, which was updated in 1980.<sup>7</sup> More recently, the Judge Advocate General of the Air Force’s School has published a manual titled *Air Force Operations and the Law* in 2002, with new editions in 2009 and 2014.<sup>8</sup> The Navy, Marine Corps, and Coast

Townsend, Assistant Adjutant General, *General Orders No. 100, Instructions for the Government of Armies of the United States in the Field*, Apr. 24, 1863, reprinted in *INSTRUCTIONS FOR THE GOVERNMENT OF ARMIES OF THE UNITED STATES IN THE FIELD* (Government Printing Office, 1898).

<sup>2</sup> John D. Long, Secretary of the Navy, *General Orders No. 551, The Laws and Usages of War at Sea*, Jun. 27, 1900, reprinted as *Appendix I* in U.S. Naval War College, *International Law Discussions, 1903: The United States Naval War Code of 1900*, 101 (1904).

<sup>3</sup> War Department, Office of the Chief of Staff, *Rules of Land Warfare* (Apr. 25, 1914); War Department, Office of the Chief of Staff, *Rules of Land Warfare* (Apr. 25, 1914 with Changes Nos. 1 and 2, corrected to Apr. 15, 1917); War Department, *Basic Field Manual, Volume VII, Military Law, Part Two: Rules of Land Warfare* (Jan. 2, 1934); War Department *Field Manual 27-10, Rules of Land Warfare* (Oct. 1, 1940).

<sup>4</sup> Department of the Navy, Office of the Chief of Naval Operations, *Naval Warfare Information Publication 10-2, Law of Naval Warfare* (Sept. 1955), reprinted as *Appendix* in ROBERT W. TUCKER, *THE LAW OF WAR AND NEUTRALITY AT SEA* (U.S. Naval War College International Law Studies, Volume 50, 1955).

<sup>5</sup> Department of the Army *Field Manual 27-10, The Law of Land Warfare* (Jul. 18, 1956 with Change 1, Jul. 15, 1976).

<sup>6</sup> Department of the Army *Pamphlet 27-161-2, II International Law* (Oct. 23, 1962); Department of the Army *Pamphlet 27-161-1, I International Law: The Law of Peace* (Sept. 1, 1979).

<sup>7</sup> Department of the Air Force *Pamphlet 110-31, International Law – The Conduct of Armed Conflict and Air Operations* (Nov. 19, 1976).

Guard have published several editions of *The Commander's Handbook on the Law of Naval Operations* starting in 1987 and most recently in 2007.<sup>9</sup> Helpful annotated supplements have also been published.<sup>10</sup>

In addition to these major publications, DoD components have produced many other publications that have supported DoD lawyers in giving advice on the law of war. For example, since 1895, the Naval War College has published its *International Law Studies* journal.<sup>11</sup> The Judge Advocate General of the Army's Legal Center & School has published many editions of a *Law of Armed Conflict Deskbook*, a *Law of Armed Conflict Documentary Supplement*, and an *Operational Law Handbook*.<sup>12</sup>

The preparation of this manual also has benefited greatly from consulting foreign experts and resources – for example, the 2004 edition of the *Manual of the Law of Armed Conflict* by United Kingdom Ministry of Defence.<sup>13</sup> In this way, the preparation of this manual is no different from its predecessors. For example, the 1956 Army Field manual benefited from considering a draft of what ultimately became the 1958 United Kingdom law of war manual, and the preparation of the 1914 War Department manual benefited from the *Rules of Land Warfare* prepared by officers of the English Army and Professor Lassa Oppenheim.<sup>14</sup> The law of war manuals of Germany, Australia, and Canada were also helpful resources in the preparation of this

<sup>11</sup> See, e.g., U.S. Naval War College, *International Law Studies*, Vol. 88, *Non-International Armed Conflict in the Twenty-first Century* (2012).

<sup>12</sup> See, e.g., The Judge Advocate General's Legal Center and School, U.S. Army, International and Operational Law Department, *Law of Armed Conflict Deskbook* (2014); The Judge Advocate General's Legal Center and School, U.S. Army, International and Operational Law Department, *Law of Armed Conflict Documentary Supplement* (2014); The Judge Advocate General's Legal Center and School, U.S. Army, International and Operational Law Department, *Operational Law Handbook* (2014).

<sup>13</sup> United Kingdom Ministry of Defence, Joint Service Publication 383, *The Joint Service Manual of the Law of Armed Conflict* (2004).

<sup>14</sup> See War Department, Office of the Chief of Staff, *Rules of Land Warfare*, Preface 7 (Apr. 25, 1914) ("Especial use was made of the Rules of Land Warfare, prepared by officers of the English Army and Prof. L. Oppenheim, LL.D., and of Prof. Nagao Ariga's book, 'La Guerre Russo-Japonaise,' which deals so carefully and thoroughly with the laws and usages of war during one of the greatest wars of recent times.").

manual.<sup>15</sup>

The preparation of this manual has also benefited from the participation of officers from the United Kingdom's Royal Air Force and the Royal Australian Air Force on exchange assignments with the U.S. Air Force. In addition, military lawyers from Canada, the United Kingdom, New Zealand, and Australia reviewed and commented on a draft of the manual in 2009 as part of review that also included comments from distinguished scholars.

Promulgating a DoD-wide manual on the law of war has been a long-standing goal of DoD lawyers. Memoranda and meeting notes from the 1970s reflect that the international law offices of the Department of the Army's Office of the Judge Advocate General and the Department of the Navy's Office of the Judge Advocate General generally agreed on a concept plan for a new all-Services law of war manual that would be a resource for implementing the 1977 Additional Protocols to the 1949 Geneva Conventions.<sup>16</sup> At the time, it was anticipated that the United States would ratify the Protocols, which has not occurred.

The origin of this manual may be traced to work in the late 1980s to update Department of the Army Field Manual 27-10, *The Law of Land Warfare*.<sup>17</sup> Then, in the mid-1990s, work began on an all-Services law of war manual to reflect the views of all DoD components. It was envisioned that the manual would provide not only the black letter rules, but also discussion, examples of State practice, and references to past manuals, treatises, and other documents to provide explanation, clarification, and elaboration. The present manual has sought to realize that vision and thus it falls within the tradition of the 1914 War Department manual, as well as the 1989 and 1997 Commander's Handbook on the Law of Naval Operations, which also adopted this general approach of an annotated manual.

This manual is an institutional publication and reflects the views of the Department of Defense, rather than the views of any particular person or DoD component. An effort has been made to reflect in this manual sound legal positions based on relevant authoritative sources of the law, including as developed by the DoD or the U.S. Government under such sources, and to show in the cited sources the past practice of DoD or the United States in applying the law of war.

This manual primarily has been prepared by the DoD Law of War Working Group, which is chaired by a representative of the DoD General Counsel and includes representatives of the Judge Advocates General of the Army, Navy, and Air Force; the Staff Judge Advocate to the

<sup>18</sup> DOD DIRECTIVE 2310.01E, *DoD Law of War Program* ¶5.1.4 (May 9, 2006, Certified Current as of Feb. 22, 2011) (providing for a “DoD Law of War Working Group, consisting of representatives, at the election by each of the GC, DoD; the General Counsel of each Military Department; the Counsel to the Commandant of the Marine Corps; the Judge Advocate General of each Military Department; the Staff Judge Advocate to the Commandant of the Marine Corps; and the Legal Counsel to the Chairman of the Joint Chiefs of Staff. The DoD Law of War Working Group shall develop and coordinate law of war initiatives and issues; support the research, preparation, review, and updating of the DoD Law of War Manual; manage other law of war matters as they arise; and provide advice to the General Counsel on legal matters covered by this Directive.”).

## TABLE OF CONTENTS

<b>Foreword.....</b>	<b>ii</b>
<b>Preface.....</b>	<b>iii</b>
<b>Table of Contents .....</b>	<b>vii</b>
<b>List of Abbreviations .....</b>	<b>xviii</b>
<b>I – General Background .....</b>	<b>1</b>
1.1 Purpose and Scope of This Manual .....	1
1.2 Use of Footnotes, Sources, Cross-References, and Signals in This Manual .....	2
1.3 Definition of the Law of War .....	7
1.4 Object and Nature of War .....	16
1.5 “War” as a Legal Concept.....	18
1.6 Law of War Distinguished From Certain Topics .....	20
1.7 Treaties.....	27
1.8 Customary International Law .....	29
1.9 Subsidiary Means of Determining International Law .....	34
1.10 Legal Force of the Law of War .....	36
1.11 <i>Jus ad Bellum</i> .....	39
<b>II – Principles .....</b>	<b>50</b>
2.1 Introduction .....	50
2.2 Military Necessity.....	52
2.3 Humanity.....	58
2.4 Proportionality.....	60
2.5 Distinction.....	62
2.6 Honor .....	65
<b>III – Application of the Law of War .....</b>	<b>70</b>
3.1 Introduction .....	70
3.2 Situations to Which the Law of War Applies .....	72
3.3 Status of the Parties and the Law of War.....	73
3.4 When <i>Jus in Bello</i> Rules Apply.....	78
3.5 Relationship Between <i>Jus in Bello</i> and <i>Jus ad Bellum</i> .....	86
3.6 Reciprocity and Law of War Rules .....	89
3.7 Applying Rules by Analogy.....	92
3.8 End of Hostilities and the Application of the Law of War .....	94
3.9 Law of War Duties Also Applicable in Peace.....	96
<b>IV – Classes of Persons.....</b>	<b>97</b>
4.1 Introduction .....	97

4.2 The Armed Forces and the Civilian Population .....	99
4.3 Lawful Combatants and Unprivileged Belligerents .....	102
4.4 Rights, Duties, and Liabilities of Combatants.....	105
4.5 Armed Forces of a State.....	111
4.6 Other Militia and Volunteer Corps .....	117
4.7 <i>Levée en Masse</i> .....	124
4.8 Rights, Duties, and Liabilities of Civilians .....	126
4.9 Military Medical and Religious Personnel.....	128
4.10 Rights, Duties, and Liabilities of Military Medical and Religious Personnel.....	132
4.11 Authorized Staff of Voluntary Aid Societies .....	133
4.12 Staff of a Recognized Aid Society of a Neutral Country.....	134
4.13 Auxiliary Medical Personnel.....	135

5.10 Proportionality in Conducting Attacks .....	241
5.11 Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects.....	250
5.12 Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm .....	260
5.13 Attacks on Facilities, Works, or Installations Containing Dangerous Forces.....	270

5.14 Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack .....	271
5.15 Undefended Cities, Towns, and Villages.....	276
5.16 Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations .....	282
5.17 Seizure and Destruction of Enemy Property .....	285
5.18 Protection of Cultural Property During Hostilities.....	293
5.19 Sieges and Encircled Areas .....	312
5.20 Starvation .....	315
5.21 Overview of Good Faith, Perfidy, and Ruses.....	318
5.22 Treachery or Perfidy Used to Kill or Wound.....	319
5.23 Use of Enemy Flags, Insignia, and Military Uniforms.....	322
5.24 Improper Use of Certain Signs .....	324
5.25 Ruses of War and Other Lawful Deceptions.....	326
5.26 Non-Forcible Means and Methods of Warfare.....	331
5.27 Prohibition Against Compelling Enemy Nationals to Take Part in the Operations of War Directed Against Their Own Country .....	334
 <b>VI – Weapons .....</b>	<b>336</b>
6.1 Introduction .....	336
6.2 DoD Policy of Reviewing the Legality of Weapons .....	337
6.3 Other Practices to Help Implement Law of War Obligations With Respect to Weapons .....	340
6.4 Prohibited Weapons.....	341
6.5 Lawful Weapons.....	342
6.6 Weapons Calculated to Cause Superfluous Injury .....	357
6.7 Inherently Indiscriminate Weapons.....	364
6.8 Poison, Poisoned Weapons, Poisonous Gases, and Other Chemical Weapons .....	367
6.9 Biological Weapons.....	373
6.10 Certain Environmental Modification Techniques .....	376
6.11 Weapons Injuring by Fragments Not Detectable by X-Rays.....	379
6.12 Landmines, Booby-Traps, and Other Devices .....	380
6.13 Cluster Munitions .....	403
6.14 Incendiary Weapons .....	406
6.15 Laser Weapons .....	410
6.16 Riot Control Agents.....	413
6.17 Herbicides.....	415
6.18 Nuclear Weapons.....	416
6.19 Explosive Ordnance.....	419
6.20 Explosive Remnants of War.....	424
 <b>VII –Wounded, Sick, Shipwrecked, Dead, and the Medical Services.....</b>	<b>433</b>
7.1 Introduction .....	433
7.2 Application of the Protections of the GWS and GWS-Sea.....	436

7.3 Respect and Protection of the Wounded, Sick, and Shipwrecked.....	438
7.4 Search, Collection, and Affirmative Protection of the Wounded, Sick, Shipwrecked, and Dead.....	443
7.5 Humane Treatment and Care of Enemy Military Wounded, Sick, and Shipwrecked in the Power of a Party to the Conflict.....	447
7.6 Accountability Information From the Enemy Military Wounded, Sick, Shipwrecked, and Dead.....	450
7.7 Treatment and Handling of Enemy Military Dead.....	452
7.8 Respect and Protection of Categories of Medical and Religious Personnel.....	457
7.9 Captured Medical and Religious Personnel.....	461
7.10 Military Medical Units and Facilities.....	467
7.11 Ground Transports of the Wounded and Sick, or of Medical Equipment.....	474
7.12 Hospital Ships, Sick-Bays in Warships, and Coastal Rescue Craft.....	475
7.13 Chartered Medical Transport Ships.....	488
7.14 Military Medical Aircraft.....	488
7.15 Display of the Distinctive Emblem to Facilitate Identification.....	492
7.16 Protection of Civilians Who Are Wounded, Sick, Infirm, or Expectant Mothers.....	499
7.17 Civilian Hospitals and Their Personnel.....	500
7.18 Land and Sea Civilian Hospital Convoys.....	503
7.19 Civilian Medical Aircraft.....	504
7.20 AP I Provisions on the Wounded, Sick, and Shipwrecked.....	505
<b>VIII – Detention: Overview and Baseline Rules.....</b>	<b>508</b>
8.1 Introduction.....	508
8.2 Humane Treatment of Detainees.....	514
8.3 Security Measures.....	517
8.4 Interrogation.....	518
8.5 Adequate Food, Drinking Water, and Clothing.....	519
8.6 General Conditions of Detention Facilities.....	519
8.7 Segregation of Detainees.....	520
8.8 Medical Attention.....	521
8.9 Administration and Discipline in Detention Facilities.....	522
8.10 Contacts With the Outside World.....	522
8.11 Religious Exercise.....	523
8.12 Intellectual, Physical, and Recreational Activities.....	524
8.13 Adequate Working Conditions.....	525
8.14 Procedures for Detention.....	525
8.15 National Accountability for Detention.....	528
8.16 Criminal Procedure and Punishment.....	529
<b>IX – Prisoners of War (POWs).....</b>	<b>533</b>
9.1 Introduction.....	534
9.2 General Principles Applicable to the Treatment of POWs.....	537

9.3 POW Status .....	539
9.4 National-Level GPW Implementation Measures .....	544
9.5 Humane Treatment and Basic Protections for POWs.....	546
9.6 Security Measures With Respect to POWs.....	551
9.7 POW Effects and Articles of Personal Use.....	552
9.8 Interrogation of POWs.....	554
9.9 Evacuation From Combat Areas .....	556
9.10 Transit or Screening Facilities.....	558
9.11 General Conditions in POW Camps: Location, Safety, Hygiene, and Living Conditions .....	559
9.12 Segregation of POWs.....	565
9.13 Food, Water, Tobacco, and Clothing for POWs .....	567
9.14 Medical Attention for Interned POWs.....	569
9.15 Religious Exercise by POWs .....	571
9.16 Intellectual, Physical, and Recreational Activities .....	573
9.17 Canteens for POWs.....	575
9.18 Financial Resources of POWs .....	576
9.19 POW Labor.....	583
9.20 POW Correspondence and Relief Shipments.....	590
9.21 Private Legal Matters of POWs.....	598
9.22 Internal Discipline of POW Camps .....	600
9.23 POW Requests, Complaints, and Reports About Conditions of Captivity.....	603
9.24 POW Representatives .....	605
9.25 POW Escapes .....	612
9.26 General Principles Applicable to POW Discipline.....	616
9.27 Disciplinary Proceedings and Punishment.....	619
9.28 Judicial Proceedings and Punishment.....	624
9.29 Transfer of POWs From the POW Camp .....	631
9.30 Transfer of POWs to the Custody of Another Detaining Power .....	632
9.31 National Accounting of the Detention of POWs .....	634
9.32 Role of the Protecting Power in the GPW .....	639
9.33 Access to POWs by the Protecting Powers, ICRC, and Relief Organizations.....	642
9.34 Death of POWs.....	643
9.35 Exchanges and Other Release and Repatriation of POWs During Hostilities .....	647
9.36 Direct Repatriation and Accommodation in Neutral Countries During Hostilities.....	648
9.37 Release and Repatriation After Hostilities.....	653
9.38 Procedure on Release and Repatriation After Hostilities.....	659
9.39 Code of Conduct for U.S. Armed Forces.....	661
<b>X – Civilians in the Hands of a Party to the Conflict .....</b>	<b>665</b>
10.1 Introduction .....	666
10.2 National-Level GC Implementation Measures.....	668
10.3 Protected Person Status.....	669
10.4 Derogation for Security Reasons .....	674

10.5 Humane Treatment and Other Basic Protections for Protected Persons.....	676
10.6 Measures of Control and Security .....	679
10.7 General Treatment of Protected Persons in a Belligerent’s Home Territory .....	682
10.8 Expulsion From Areas Within a Belligerent’s Home Territory and Departure and Transfers of Protected Persons From a Belligerent’s Home Territory.....	685
10.9 Internment .....	688
10.10 Segregation of Internees.....	691
10.11 Safety, Hygiene, and Living Conditions in Places of Internment .....	693
10.12 Canteens for Internees.....	696
10.13 Food, Water, Tobacco, and Clothing for Internees.....	697
10.14 Medical Attention for Internees.....	699

19.26 AP III..... 1193

## LIST OF ABBREVIATIONS

To make the manual easier to read, the use of abbreviations has often been avoided, especially in the main text. Nonetheless, the following abbreviations of the titles of documents have been used for frequently cited documents.

Abbreviation	Long Form
1899 Hague II	Convention with Respect to the Laws and Customs of War on Land, Jul. 29, 1899, 32 Stat. 1803
1899 Hague II Reg.	Regulations Respecting the Laws and Customs of War on Land, annexed to Convention with Respect to the Laws and Customs of War on Land, Jul. 29, 1899, 32 Stat. 1803, 1811
1909 Declaration of London	Declaration Concerning the Laws of Maritime War, Feb. 26, 1909, <i>reprinted in</i> James Brown Scott, <i>The Declaration of London, February 26, 1909: A Collection of Official Papers and Documents Relating to the International Naval Conference Held in London, December, 1908—February, 1909</i> (1919)
1914 Rules of Land Warfare	War Department, Office of the Chief of Staff, <i>Rules of Land Warfare</i> (Apr. 25, 1914)
1925 Geneva Gas and Bacteriological Protocol	Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous, or Other Gases, and of Bacteriological Methods of Warfare, Jun. 17, 1925, 94 LNTS 65
1928 Pan American Maritime Neutrality Convention	Pan American Maritime Neutrality Convention, Feb. 20, 1928, 47 Stat. 1989
1929 GPW	Geneva Convention Relative to the Treatment of Prisoners of War, Jul. 27, 1929, 47 Stat. 2021
1929 GWS	Geneva Convention for the Amelioration of the Condition of the Wounded and Sick of Armies in the Field, Jul. 27, 1929, 47 Stat. 2074
1940 Rules of Land Warfare	War Department, Field Manual 27-10, <i>Rules of Land Warfare</i> (1940)
1944 Chicago Convention	Convention on International Civil Aviation, Dec. 7, 1944, 61 Stat. 1180
1954 Hague Cultural Property Convention	Convention for the Protection of Cultural Property in the Event of Armed Conflict, 249 UNTS 240
1955 NWIP 10-2	Department of the Navy, Office of the Chief of Naval Operations, Naval Warfare Information Publication 10-2, <i>Law of Naval Warfare</i> (Sept. 1955), <i>reprinted as Appendix in</i> Robert W. Tucker, <i>The Law of War and Neutrality at Sea</i> (U.S. Naval War College International Law Studies, Volume 50, 1955)
1956 FM 27-10 (Change No. 1 1976)	Department of the Army Field Manual 27-10, <i>The Law of Land Warfare</i> (Jul. 18, 1956 with Change 1, Jul. 15, 1976)

<b>Abbreviation</b>	<b>Long Form</b>
1958 UK Manual	United Kingdom War Office, <i>Manual of Military Law, Part III: The Law of War on Land</i> (1958)
1976 Air Force Pamphlet 110-31	Department of the Air Force Pamphlet 110-31, <i>International Law – The Conduct of Armed Conflict and Air Operations</i> (Nov. 19, 1976)
1989 NWP 9	Department of the Navy, Office of the Judge Advocate General, <i>Annotated Supplement to the Commander’s Handbook on the Law of Naval Operations, NWP (Rev.A)/FMFM 1-10</i> (1989)
1997 Multi-Service Detention Regulation	Army Regulation 190-8 / Office of the Chief of Naval Operations Instruction 3461.6 / Air Force Joint Instruction 31-304 / Marine Corps Order 3461.1, <i>Enemy Prisoners of War, Retained Personnel, Civilian Internees and Other Detainees</i> (Oct. 1, 1997)
1997 NWP 9	U.S. Naval War College, Center for Naval Warfare Studies, Oceans Law and Policy Department, <i>Annotated Supplement to the Commander’s Handbook on the Law of Naval Operations</i> (1997)
2001 Canadian Manual	Canada, Department of National Defence, Joint Doctrine Manual B-GJ-005-104/FP-021, <i>Law of Armed Conflict at the Operational and Tactical Levels</i> (Aug. 13, 2001)
2004 UK Manual	United Kingdom Ministry of Defence, Joint Service Publication 383, <i>The Joint Service Manual of the Law of Armed Conflict</i> (2004)
2006 Australian Manual	Australian Defence Force, Australian Defence Doctrine Publication 06.4, <i>Law of Armed Conflict</i> (May 11, 2006)
2007 NWP 1-14M	Department of the Navy, Naval Warfare Publication 1-14M / Marine Corps Warfighting Publication 5-12.1 / Commandant Publication P5800.7A, <i>The Commander’s Handbook on the Law of Naval Operations</i> (Jul. 2007)
2013 German Manual	Germany, Federal Ministry of Defence, Joint Service Regulation (ZDv) 15/2, <i>Law of Armed Conflict Manual</i> (May 1, 2013)
AJIL	American Journal of International Law
AP I	Protocol (I) Additional to the Geneva Conventions of August 12, 1949, and Relating to the Protection of Victims of International Armed Conflicts, Jun. 8, 1977, 1125 UNTS 3
AP II	Protocol (II) Additional to the Geneva Conventions of 12 August 1949, and Relating to the Protection of Victims of Non-International Armed Conflicts, Jun. 8, 1977, 1125 UNTS 609

Abbreviation	Long Form
AP III	Protocol (III) Additional to the Geneva Conventions of 12 August 1949, and Relating to the Adoption of an Additional Distinctive Emblem, Dec. 8, 2005, 2404 UNTS 1
Appendix to 1985 CJCS Memo on API	Appendix to John W. Vessey, Jr., Chairman, Joint Chiefs of Staff, <i>Review of the 1977 First Additional Protocol to the Geneva Conventions of 1949</i> , May 3, 1985.

- 1.8 Customary International Law
- 1.9 Subsidiary Means of Determining International Law
- 1.10 Legal Force of the Law of War
- 1.11 *Jus ad Bellum*

### 1.1 PURPOSE AND SCOPE OF THIS MANUAL

1.1.1 Purpose. The purpose of this manual is to provide information on the law of war to DoD personnel responsible for implementing the law of war and executing military operations.<sup>1</sup>

This manual represents the legal views of the Department of Defense. This manual does not, however, preclude the Department from subsequently changing its interpretation of the law. Although the preparation of this manual has benefited from the participation of lawyers from the Department of State and the Department of Justice, this manual does not necessarily reflect the views of any other department or agency of the U.S. Government or the views of the U.S. Government as a whole.

This manual is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity against the United States, its departments, agencies, or other entities, its officers or employees, or any other person.

1.1.2 Scope. This manual is not a definitive explanation of all law of war issues. This manual focuses on *jus in bello* – law relating to the conduct of hostilities and the protection of war victims.

This manual seeks to address the law of war that is applicable to the United States, including treaties to which the United States is a Party, and applicable customary international law. It provides legal rules, principles, and discussion, particularly with respect to DoD practice. Although the views of other States may be referenced in this manual, it is not a purpose of this manual to describe the views of other States, which may differ from views expressed in this manual.

This manual is not a substitute for the careful practice of law. As specific legal issues

---

<sup>1</sup> Refer to § 1.3 (Definition of the Law of War).

arise, legal advisers should consider relevant legal and policy materials (*e.g.*, treaty provisions, judicial decisions, past U.S. practice, regulations, and doctrine), and should apply the law to the specific factual circumstances.

This manual is intended to be a description of the law as of the date of the manual's promulgation. In this vein, much of this manual has been written in the past tense to help ensure that the text remains accurate, even after subsequent developments have occurred. Every effort has been made to ensure the accuracy of the manual, but it must be read in the light of later developments in the law.

## 1.2 USE OF FOOTNOTES, SOURCES, CROSS-REFERENCES, AND SIGNALS IN THIS MANUAL

1.2.1 Use of Footnotes in This Manual. This manual uses footnotes to provide sources or cross-references to other sections of the manual in order to clarify, elaborate on, or support the main text.

An effort has been made to avoid introducing discussion in the footnotes that addresses different propositions than those discussed in the main text. Although providing tangential information in footnotes is common in academic legal writing, this practice has been avoided to the extent possible for principally two reasons. First, it was desirable that this manual's main text convey as much information as possible without the reader needing to read the footnotes. For example, it was desirable to avoid the possibility that a reader might misunderstand a legal rule addressed in the main text because a notable exception to that rule was addressed only in a footnote accompanying the text. Second, tangential discussion on a given issue in footnotes would have made it much more difficult to keep the manual's treatment of that issue consistent from section to section and to allow the reader to find all the relevant information about a single topic. Thus, tangential discussion in footnotes has been avoided, to the extent possible, in favor of cross-references to the appropriate section of the manual that addresses that topic in more detail.

1.2.2 Use of Sources in This Manual. This manual cites sources in the footnotes to support or elaborate upon propositions in the main text. These sources are cited in the footnotes to help practitioners research particular topics discussed in the main text. Reviewing the cited sources in their entirety may provide additional contextual information, especially where sources are only partially quoted in the footnotes.

1.2.2.1 Selection of Sources. The sources cited in the footnotes have been chosen for a variety of reasons. For example, a source may contain a particularly helpful explanation or illustration. A source may have been chosen to illustrate U.S. practice or legal interpretation. A source may have been selected because its author was a particularly influential and respected international lawyer. For example, the 1956 Department of Army Field Manual 27-10, *The Law of Land Warfare*, has been a source of legal guidance for the U.S. armed forces for more than 50 years, and was published in connection with the U.S. ratification of the 1949 Geneva Conventions. One of the persons who helped prepare the 1956 manual was Richard Baxter, a highly respected DoD lawyer, who later became a judge on the International Court of Justice.

Citation to a particular source should not be interpreted to mean that the cited source

represents an official DoD position, or to be an endorsement of the source in its entirety. For example, parts of a source, such as an opinion by the International Court of Justice or a commentary published by the International Committee of the Red Cross, may reflect the DoD legal interpretation, while other parts of the source may not. Similarly, the citation of the jurisprudence of the Inter-American Commission on Human Rights should not be understood to indicate that the United States has accepted the competence of the Inter-American Commission on Human Rights to apply the law of war.<sup>2</sup>

1.2.2.2 *Use of Older Sources.* Older sources are sometimes cited: (1) because that source is particularly influential; (2) to demonstrate the origin of a legal proposition; or (3) to illustrate that a particular rule or formulation has a long history.

The citation of an older source should not necessarily be interpreted as an endorsement that every aspect of that source remains current law. For example, the Lieber Code is a canonical law of war document for the United States, but parts of it no longer reflect current law.<sup>3</sup> Moreover, an older document produced by a State does not necessarily reflect its current legal views. For example, the 1958 UK Manual, although a particularly influential law of war manual prepared by distinguished experts Hersch Lauterpacht and Gerald Draper, has been superseded by subsequent UK Manuals, which reflect more recent developments in the law for the United Kingdom (*e.g.*, its ratification of AP I).

1.2.2.3 *Quotes Provided From Sources.* Quotes from sources are sometimes given in parentheticals within footnotes. These parentheticals are provided to help practitioners, such as by facilitating comparison between the main text of the manual and the language used in the sources. Every effort has been made to quote sources accurately. Practitioners, however, should verify quotations using the original source.

Certain formatting rules have been followed for quoted material. Two spaces have been placed after each period ending a sentence. Footnote numbers and carriage returns have been omitted from quoted text. Otherwise, quotes have not been changed unless noted through the use of ellipses, brackets, or parentheticals after the quotes indicating the changes made.

1.2.2.4 *Citation of Policies and Regulations.* Policies and regulations of the U.S. Government or particular DoD components are sometimes cited as examples of past practice.

This manual, however, seeks primarily to address the law and not to address applicable U.S. Government or DoD policies or regulations. Many policies and regulations are not addressed in this manual, and the discussion of some policies, where relevant, should not be understood to indicate that other pertinent policies or regulations do not exist. Moreover, policies and regulations are constantly updated, so practitioners are advised to ascertain whether

---

<sup>2</sup> See, *e.g.*, *U.S. Additional Response to the Request for Precautionary Measures—Detention of Enemy Combatants at Guantanamo Bay, Cuba*, Inter-American Commission on Human Rights, Jul. 15, 2002, 2002 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1008, 1009 (“Put simply, the Commission’s jurisdiction does not include the application of the law of armed conflict, the *lex specialis* governing the status and treatment of persons detained during armed conflict.”).

<sup>3</sup> Refer to § 19.3 (Lieber Code).

more recent versions of cited policies and regulations have been issued.

In some cases, cancelled issuances or superseded policies or regulations are cited to show the past practice, and, at times, a series of issuances are cited to illustrate a continuity in practice.

Policies and regulations often exceed the requirements of applicable law, and the mere citation of a policy or regulation in this manual should not be understood to reflect the view that the policy or regulation's requirements have been promulgated out of a sense of legal obligation for the purposes of assessing customary international law or otherwise intending to reflect legal requirements.

1.2.2.5 *Citation Forms*. An effort has been made to make citations forms consistent throughout the manual, and to provide enough information about each cited source to reflect its significance and to enable readers to find it.<sup>4</sup> This manual has not strictly adhered to an established system of citation. Although certain citation systems were consulted, modifications were made as deemed appropriate for this type of resource, to make the citation forms straightforward and simple and relatively easy for readers to understand. In regard to abbreviations, for example, this manual generally does not abbreviate the names of academic journals. Moreover, it is hoped that the quotations from the cited sources that have been included in footnotes will help readers find the cited sources electronically.

1.2.3 Use of Cross-References in This Manual. This manual uses cross-references in the footnotes to point the reader to other sections of the manual containing relevant discussion of a particular topic. In particular, an effort has been made to use cross-references rather than to repeat discussion of a recurring issue or duplicate citation of legal sources. In sections in which a law of war rule is only mentioned tangentially or as an example, a cross-reference is used to direct the reader to the section of the manual in which a more in-depth discussion of that rule and supporting sources are provided.<sup>5</sup>

Cross-references are linked to enable the reader to access the referenced section quickly.

---

<sup>4</sup> Cf. Richard A. Posner, *The Bluebook Blues* (reviewing Harvard Law Review Association, *The Bluebook: A Uniform System of Citation* (19th ed., 2010)), THE YALE LAW JOURNAL 850, 852 (2011) ("A system of citation forms has basically two functions: to provide enough information about a reference to give the reader a general idea of its significance and whether it's worth looking up, and to enable the reader to find the reference if he decides that he does want to look it up. In *Goodbye to the Bluebook* I suggested four principles to guide the design of such a system: 'to spare the writer or editor from having to think about citation form,' 'to economize on space and the reader's time,' 'to provide information to the reader,' and 'to minimize distraction.'").

<sup>5</sup> Refer to § 1.2.1 (Use of Footnotes in This Manual).

1.2.4 Use of Signals in This Manual. This manual uses signals to introduce the sources and cross-references in the footnotes. The table below identifies the signals used in this manual, describes their function, and provides examples of their use.

Signal	Function and Examples of Use
[no signal]	<p><u>Directly states the proposition</u></p> <p>If a person joins a <i>levée en masse</i>, he or she may be held as a POW even if he or she actually took no part in fighting.<sup>1</sup></p> <p><sup>1</sup> 1958 UK MANUAL ¶100 (“If it is shown that they joined the <i>levée en masse</i>, but took no part in the defence, they may be held as prisoners of war.”).</p> <p><u>Identifies the source of a quotation</u></p> <p>As the Supreme Court has explained: “Lawful combatants are subject to capture and detention as prisoners of war by opposing military forces.”<sup>2</sup></p> <p><sup>2</sup> Ex parte Quirin, 317 U.S. 1, 31 (1942).</p> <p><u>Identifies an authority referred to in the text</u></p> <p>There are additional provisions of the CCW Amended Mines Protocol addressing international exchanges of information and cooperation in this respect.<sup>3</sup></p> <p><sup>3</sup> CCW AMENDED MINES PROTOCOL art. 11.</p>
See	<p><u>Clearly supports the proposition but does not directly state it</u></p> <p>In addition, observers on military reconnaissance aircraft have not been regarded as acting clandestinely or under false pretenses.<sup>4</sup></p> <p><sup>4</sup> See HAGUE IV REG. art. 29 (“Persons sent in balloons for the purpose of carrying despatches and, generally, of maintaining communications between the different parts of an army or a territory” are not considered spies.).</p>
See also	<p><u>Elaborates on the proposition</u></p> <p>This means that a combatant’s “killing, wounding, or other warlike acts are not individual crimes or offenses.”<sup>5</sup></p> <p><sup>5</sup> LIEBER CODE art. 57. See also WINTHROP, MILITARY LAW &amp; PRECEDENTS 778 (“The State is represented in active war by its contending army, and the laws of war justify the killing or disabling of members of the one army by those of the other in battle or hostile operations.”).</p>

Signal	Function and Examples of Use
<i>Cf.</i>	<p><u>Supports the proposition by analogy, i.e., discusses a different proposition that is sufficiently similar to support the original proposition</u></p> <p>A person must engage in acts of espionage in the zone of operations of a belligerent to be considered a spy. “Zone of operations” has been construed broadly to include areas supporting the war effort.<sup>6</sup></p> <p><sup>6</sup> <i>Cf.</i> Ex parte Quirin, 317 U.S. 1, 37 (1942) (“The law of war cannot rightly treat those agents of enemy armies who enter our territory, armed with explosives intended for the destruction of war industries and supplies, as any the less belligerent enemies than are agents similarly entering for the purpose of destroying fortified places or our Armed Forces.”).</p>
<i>Refer to</i>	<p><u>Refers to another manual section that supports or elaborates on the proposition</u></p> <p>Certain categories of persons are not members of the armed forces, but are nonetheless authorized to support the armed forces in the fighting:</p> <ul style="list-style-type: none"> <li>• persons authorized to accompany the armed forces, but who are not members thereof;<sup>7</sup></li> </ul> <p><sup>7</sup> <i>Refer to</i> § 4.15 (Persons Authorized to Accompany the Armed Forces).</p>
<i>Compare</i>	<p><u>Refers to another manual section that is analogous to the proposition</u></p> <p>Persons authorized to accompany the armed forces who provide security against criminal elements generally would not be viewed as taking a direct part in hostilities (and do not forfeit their protection from being made the object of attack).<sup>269</sup></p> <p><sup>269</sup> <i>Compare</i> § 4.23.1 (Police as Civilians).</p>
<i>Consider</i>	<p><u>Identifies a treaty that relates to the proposition but to which the United States is not a Party (e.g., API)</u></p> <p>Under international law, every treaty in force is binding upon the Parties to it and must be performed by them in good faith.<sup>10</sup></p> <p><sup>10</sup> <i>Consider</i> VCLT art. 26 (“Every treaty in force is binding upon the parties to it and must be performed by them in good faith.”).</p>

Signal	Function and Examples of Use
For example,	<p><u>Illustrates the proposition with an example drawn from historical practice</u></p> <p>Adjusting the timing of an attack may reduce the risk of incidental harm. For example, attacking a military objective when civilians are less likely to be present may be appropriate.<sup>11</sup></p> <p><sup>11</sup> For example, Jennifer O’Connor, General Counsel, Department of Defense, <i>Remarks at New York University School of Law: Applying the Law of Targeting to the Modern Battlefield</i>, Nov. 28, 2016 (“Given the facts of this specific situation, including the intelligence that the cash was being used to pay ISIL fighters and conduct terrorist operations, the targeting authority determined that the bulk cash was a legitimate military objective. The next step then for the targeting authority before approving the strike was to conduct a proportionality analysis. This bulk cash storage site happened to be in an area where civilians were often present—as you might expect from a building that used to be a civilian bank before ISIL turned it into a cash storage site. As a result of the high number of civilians in the area, the targeting authority took specific steps to minimize potential harm to civilians by ordering the attack to occur at a time when the potential for any civilian casualties was deemed to be the lowest.”); FINAL REPORT ON THE PERSIAN GULF WAR 100 (noting that during Operation DESERT STORM “attacks on known dual (i.e., military and civilian) use facilities normally were scheduled at night, because fewer people would be inside or on the streets outside.”).</p>
e.g.,	<p><u>Added to any of the other signals when the cited authority is one of several authorities (some of which remain uncited) that stand for the same proposition</u></p> <p>International humanitarian law is an alternative term for the law of war that may be understood to have the same substantive meaning as the law of war.<sup>12</sup></p> <p><sup>12</sup> See, e.g., <i>Overview of the Amendment to the Convention on the Physical Protection of Nuclear Material</i>, 6, Enclosure to Condoleezza Rice, Letter of Submittal, Jun. 11, 2007, MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING AMENDMENT TO THE CONVENTION ON THE PHYSICAL PROTECTION OF NUCLEAR MATERIAL (THE “AMENDMENT”). A CONFERENCE OF STATES PARTIES TO THE CONVENTION ON THE PHYSICAL PROTECTION OF NUCLEAR MATERIAL, ADOPTED ON OCTOBER 28, 1979, ADOPTED THE AMENDMENT ON JULY 8, 2005, AT THE INTERNATIONAL ATOMIC ENERGY AGENCY IN VIENNA, TREATY DOC. 110-6, 6 (2007) (“(2) The United States of America understands that the term ‘international humanitarian law’ in Paragraph 5 of the Amendment (Article 2 of the Convention on the Physical Protection of Nuclear Material, as amended) has the same substantive meaning as the law of war.”).</p>

### 1.3 DEFINITION OF THE LAW OF WAR

For the purposes of this manual, the *law of war* is that part of international law that regulates the resort to armed force; the conduct of hostilities and the protection of war victims in both international and non-international armed conflict; belligerent occupation; and the

relationships between belligerent, neutral, and non-belligerent States.<sup>6</sup>

For the purposes of this manual, the law of war comprises treaties and customary international law applicable to the United States.<sup>7</sup>

### 1.3.1 Law of War – Notes on Terminology.

1.3.1.1 Different Definitions of the Law of War. The law of war may be defined slightly differently in other publications. For example, DoD issuances have defined the law of war more narrowly than the definition discussed in this section (*e.g.*, by omitting reference to that part of international law that regulates the resort to armed force).<sup>8</sup>

1.3.1.2 Law of War Versus International Humanitarian Law and Law of Armed Conflict. The *law of war* is often called the *law of armed conflict*. Both terms can be found in DoD directives and training materials. *International humanitarian law* is an alternative term for the law of war that may be understood to have the same substantive meaning as the law of war.<sup>9</sup> In other cases, international humanitarian law is understood more narrowly than the law of war (*e.g.*, by understanding international humanitarian law not to include the law of neutrality).<sup>10</sup>

---

<sup>6</sup> Refer to § 3.2 (Situations to Which the Law of War Applies).

<sup>7</sup> Refer to § 1.7 (Treaties); § 1.8 (Customary International Law).

<sup>8</sup> For example, DoD DIRECTIVE 2310.01E, *DoD Detainee Program*, 14 (Aug. 19, 2014) (“law of war. The part of international law that regulates the conduct of hostilities and the protection of victims of armed conflict in both international and non-international armed conflict and occupation, and that prescribes the rights and duties of neutral, non-belligerent, and belligerent states. It is often called the ‘law of armed conflict’ or ‘international humanitarian law,’ and is specifically intended to address the circumstances of armed conflict. It encompasses all international law applicable to the conduct of military operations in armed conflicts that is binding on the United States or its individual citizens, including treaties and international agreements to which the United States is a party (*e.g.*, the Geneva Conventions of 1949), and applicable customary international law.”); DOD DIRECTIVE 2311.01E, *DoD Law of War Program*, ¶3.1 (May 9, 2006, Certified Current as of Feb. 22, 2011) (“Law of War. That part of international law that regulates the conduct of armed hostilities. It is often called the ‘law of armed conflict.’ The law of war encompasses all international law for the conduct of hostilities binding on the United States or its individual citizens, including treaties and international agreements to which the United States is a party, and applicable customary international law.”).

<sup>9</sup> See, *e.g.*, *Overview of the Amendment to the Convention on the Physical Protection of Nuclear Material*, 6, Enclosure to Condoleezza Rice, *Letter of Submittal*, Jun. 11, 2007, MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING AMENDMENT TO THE CONVENTION ON THE PHYSICAL PROTECTION OF NUCLEAR MATERIAL (THE “AMENDMENT”). A CONFERENCE OF STATES PARTIES TO THE CONVENTION ON THE PHYSICAL PROTECTION OF NUCLEAR MATERIAL, ADOPTED ON OCTOBER 28, 1979, ADOPTED THE AMENDMENT ON JULY 8, 2005, AT THE INTERNATIONAL ATOMIC ENERGY AGENCY IN VIENNA, TREATY DOC. 110-6, 6 (2007) (“(2) The United States of America understands that the term ‘international humanitarian law’ in Paragraph 5 of the Amendment (Article 2 of the Convention on the Physical Protection of Nuclear Material, as amended) has the same substantive meaning as the law of war.”); FRITS KALSHOVEN & LIESBETH ZEGVELD, *CONSTRAINTS ON THE WAGING OF WAR: AN INTRODUCTION TO INTERNATIONAL HUMANITARIAN LAW* 11 (International Committee of the Red Cross, 3rd ed., 2001) (“The law of war nowadays is often referred to by a phrase better suited to express its object and purpose, such as ‘international humanitarian law applicable in armed conflict’ or ‘humanitarian law’ – we shall be using these terms interchangeably, as we do with ‘war’ and ‘armed conflict’.”).

<sup>10</sup> Christopher Greenwood, *Historical Development and Legal Basis*, in DIETER FLECK, *THE HANDBOOK OF HUMANITARIAN LAW IN ARMED CONFLICTS* 9 (¶102) (1999) (“The term ‘international humanitarian law’ is of relatively recent origin and does not appear in the Geneva Conventions of 1949. ... International humanitarian law

1.3.2 The Law of War's Relationship to Other Bodies of Law. An issue that often confronts law of war practitioners is the relationship of the law of war to other bodies of law, especially when rules in those bodies of law may appear to conflict with rules reflected in the law of war. These apparent conflicts are often resolved by considering the principle that the law of war is the *lex specialis* governing armed conflict.<sup>11</sup> How a law of war rule relates to a particular rule that is not grounded in the law of war may depend on the specific legal rule in question.

In general, the law of war may relate to other bodies of law through: (1) law of war rules superseding rules in other bodies of law with respect to armed conflict; (2) construing the rules in other bodies of law to avoid conflict with law of war rules; (3) law of war rules informing the content of general standards in other bodies of law, should such standards be construed to apply to armed conflict; and (4) law of war treaties explicitly incorporating concepts from other bodies of law.

In some cases, it may be difficult to distinguish between these approaches, and different entities may apply different approaches to achieve the same result.<sup>12</sup> Although there are different approaches and although the ultimate resolution may depend on the specific rules and context, the law of war, as the *lex specialis* of armed conflict, is the controlling body of law with regard to the conduct of hostilities and the protection of war victims.<sup>13</sup>

1.3.2.1 The Law of War as the Lex Specialis Governing Armed Conflict. The maxim *lex specialis derogat legi generali* means that “[a]s a rule the special rule overrides the

---

thus includes most of what used to be known as the laws of war, although strictly speaking some parts of those laws, such as the law of neutrality, are not included since their primary purpose is not humanitarian.”).

<sup>11</sup> See, e.g., Mary McLeod, Acting Legal Adviser, Department of State, *Opening Statement at 53rd Session of the U.N. Committee Against Torture, Nov. 3 – 28, 2014*, Nov. 12, 2014 (noting that “the law of armed conflict is the controlling body of law with respect to the conduct of hostilities and the protection of war victims,”); U.S. Delegation to U.N. General Assembly Third Committee, *Statement Clarifying Legal Points of Importance*, 2004 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 331 (“Third, with respect to [preambular paragraph (‘PP’)] 4 and PP6, references to human rights law during armed conflict by necessity refer only to those provisions, if any, that may be applicable. As may be well known, it is the position of the United States Government that the Law of War is the *lex specialis* governing armed conflict.”) (amendment in original).

<sup>12</sup> *Report of the International Law Commission, Fifty-sixth session (3 May-4 June and 5 July-6 August 2004)*, U.N. Doc. A/59/10 ¶304 (2004) (“In introducing the part of the study concerning the function and scope of the *lex specialis* rule, the Chairman stressed several points. First, he emphasized that recourse to the *lex specialis* rule was an aspect of legal reasoning that was closely linked to the idea of international law as a legal system. The *lex specialis* maxim sought to harmonize conflicting standards through interpretation or establishment of definite relationships of priority between them. In fact, he said, it was often difficult to distinguish between these two aspects of the functioning of the technique: the interpretation of a special law in the light of general law, and the setting aside of the general law in view of the existence of a conflicting specific rule. ... The adoption of a systemic view was important precisely in order to avoid thinking of *lex specialis* in an overly formal or rigid manner. Its operation was always conditioned by its legal-systemic environment.”).

<sup>13</sup> *Observations of the United States of America on the Human Rights Committee's Draft General Comment 35: Article 9*, June 10, 2014, ¶20 (“While the United States acknowledges that difficult questions arise regarding the applicability of international human rights law in situations of armed conflict, the draft does not accord sufficient weight to the well-established principle that international humanitarian law, as the *lex specialis* of armed conflict, is the controlling body of law with regard to the conduct of hostilities and the protection of war victims.”).

general law.”<sup>14</sup> The rule that is more specifically directed towards the action receives priority because it takes better account of the particular features of the context in which the law is to be applied, thus creating a more equitable result and better reflecting the intent of the authorities that have made the law.<sup>15</sup>

The law of war has been developed with special consideration of the circumstances of war and the challenges inherent in its regulation by law. Thus, for example, the exigencies of armed conflict cannot justify violating the law of war.<sup>16</sup> Moreover, lawmakers sometimes have considered peacetime rules appropriate to apply during armed conflict, and in certain of these cases, they have explicitly incorporated such concepts into the law of war.<sup>17</sup>

Thus, traditionally, the law of war has been described as the only “authoritative rules of action between hostile armies,” or as superseding ordinary law in the actual theater of military operations.<sup>18</sup> Similarly, law of war treaties have been viewed as a clear example of a *lex specialis* in relation to treaties providing peacetime norms concerning the same subjects.<sup>19</sup>

### 1.3.2.2 Construing Other Laws to Avoid Conflict With the Law of War. Potential

---

<sup>14</sup> Colleanu v. German State, German-Rumanian Mixed Arbitral Tribunal, Jan. 12, 1929, *reprinted in* H. LAUTERPACHT, V INTERNATIONAL LAW REPORTS 438 (1929). *See also* GROTIUS, LAW OF WAR & PEACE 428 (2.16.29.1) (“[A]mong agreements which are equal in respect to the qualities mentioned, that should be given preference which is most specific and approaches most nearly to the subject at hand; for special provisions are ordinarily more effective than those that are general”).

<sup>15</sup> U.N. International Law Commission, *Conclusions of the work of the Study Group on the Fragmentation of International Law: Difficulties arising from the Diversification and Expansion of International Law* 2(7) (2006) (“*Rationale of the principle.* That special law has priority over general law is justified by the fact that such special law, being more concrete, often takes better account of the particular features of the context in which it is to be applied than any applicable general law. Its application may also often create a more equitable result and it may often better reflect the intent of the legal subjects.”).

<sup>16</sup> *Refer to* § 2.2.2 (Military Necessity and Law of War Rules).

<sup>17</sup> *Refer to* § 1.3.2.4 (Explicit Incorporation of Concepts From Other Bodies of Law Into the Law of War).

<sup>18</sup> *See* LIEBER CODE art. 40 (“There exists no law or body of authoritative rules of action between hostile armies, except that branch of the law of nature and nations which is called the law and usages of war on land.”). *See also* WINTHROP, MILITARY LAW & PRECEDENTS 773-74 (“By the term LAW OF WAR is intended that branch of International Law which prescribes the rights and obligations of belligerents, or—more broadly—those principles and usages which, in time of war, define the status and relations not only of enemies—whether or not in arms—but also of persons under military government or martial law and persons simply resident or being upon the theatre of war, and which authorizes their trial and punishment when offenders. Unlike Military Law Proper, the Law of War *in this country* is not a formal written code, but consists mainly of general rules derived from International Law, supplemented by acts and orders of the military power and a few legislative provisions. In general it is quite independent of the ordinary law. ‘On the actual theatre of military operations,’ as is remarked by a learned judge, ‘the ordinary laws of the land are superseded by the laws of war. The jurisdiction of the civil magistrate is there suspended, and military authority and force are substituted.’ Finding indeed its original authority in the war powers of Congress and the Executive, and thus constitutional in its source, the Law of War may, in its exercise, substantially supersede for the time even the Constitution itself—as will be hereinafter indicated.”).

<sup>19</sup> C. Wilfred Jenks, *The Conflict of Law-Making Treaties*, 30 BRITISH YEARBOOK OF INTERNATIONAL LAW 401, 446 (1953) (“A clear illustration of [the *lex specialis* principle’s] applicability is afforded by instruments relating to the laws of war which, in the absence of evidence of a contrary intention or other special circumstances, must clearly be regarded as a *leges speciales* in relation to instruments laying down peace-time norms concerning the same subjects.”).

conflicts between the law of war and other law may be resolved by construing such other law to avoid conflict with law of war rules.

Underlying this approach is the fact that the law of war is firmly established in customary international law as a well-developed body of law that is separate from the principles of law generally applicable in peace.<sup>20</sup> Lawmakers have been understood not to amend that well-developed body of law, absent affirmative evidence of an intention to do so.<sup>21</sup> In a similar fashion, for comparison, the GC deliberately excludes from its application the nationals of certain States in order to avoid creating complications or inconsistencies in procedures should both the GC and the law applicable to normal diplomatic representation apply.<sup>22</sup>

In some cases, treaties explicitly clarify that they do not affect States' rights under the law of war.<sup>23</sup> For example, the 1944 Chicago Convention on civil aviation explicitly provides that it does not affect the freedom of action of States during armed conflict.<sup>24</sup> However, even when not explicitly stated, infringements on the law of war through international agreements that primarily address situations other than armed conflict are not to be presumed.<sup>25</sup> For example, the

<sup>20</sup> Edwin D. Williamson, Agent of the United States of America, *Preliminary Objections Submitted by the United States of America*, Case Concerning the Aerial Incident of 3 July 1988, I.C.J. (Iran v. United States), 200-01 (Mar. 4, 1991) (“The laws of armed conflict are firmly established in customary international law as a well-developed body of law separate from the principles of law generally applicable in times of peace.”).

<sup>21</sup> *See, e.g.*, Case Concerning Oil Platforms (Iran v. United States), Preliminary Objection, Judgment, 1996 I.C.J. 874, 876 (Dissenting Opinion of Vice-President Schwebel) (“It is plain that this is a Treaty which is essentially concerned with encouraging mutually beneficial trade and investments and closer economic intercourse on the basis of reciprocal equality of treatment. There is no suggestion of regulating the use of armed force by one party against the other. . . . None of these core provisions of the Treaty suggests that attacks by armed forces of one party against what it treats as military objectives within the jurisdiction of the other party are within the reach of the Treaty. It is significant as well that the Treaty contains none of the treaty provisions which typically do bear on the international use of force.”); *Written Statement of the Government of the United States of America*, 34, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“No international environmental instrument is expressly applicable in armed conflict. No such instrument expressly prohibits or regulates the use of nuclear weapons. Consequently, such an international environmental instrument could be applicable only by inference. Such an inference is not warranted because none of these instruments was negotiated with the intention that it would be applicable in armed conflict or to any use of nuclear weapons. Further, such an implication is not warranted by the textual interpretation of these instruments.”); Edwin D. Williamson, Agent of the United States of America, *Preliminary Objections Submitted by the United States of America*, Case Concerning the Aerial Incident of 3 July 1988, I.C.J. (Iran v. United States), 207 (Mar. 4, 1991) (“When, 14 years later, the ICAO Assembly drafted Article 3 bis of the Chicago Convention, discussed above, it was careful to include in the Article a statement that it ‘should not be interpreted as modifying in any way the rights and obligations of States set forth in the Charter of the United Nations;’ which included the inherent right of self-defense. The participants at the Montreal conference would have included a similar provision if they had intended the Montreal Convention to modify the laws of armed conflict, and particularly if they had intended to address actions by military forces in armed conflict. There is no such provision in the Montreal Convention.”).

<sup>22</sup> *Refer to* § 10.3.3.3 (Nationals of a Neutral State or Co-Belligerent State While Normal Diplomatic Representation Exists).

<sup>23</sup> *See, e.g.*, Convention on the Protection of Submarine Cables, art. 15, Mar. 14, 1884, 24 STAT. 989, 997 (“It is understood that the stipulations of this Convention shall in no wise affect the liberty of action of belligerents.”).

<sup>24</sup> *Refer to* § 14.1.1.1 (1944 Chicago Convention and Freedom of Action of States During Armed Conflict).

<sup>25</sup> Edwin D. Williamson, Agent of the United States of America, *Preliminary Objections Submitted by the United States of America*, Case Concerning the Aerial Incident of 3 July 1988, I.C.J. (Iran v. United States), 203 (Mar. 4,

LOS Convention has been interpreted not to impair a State's rights during armed conflict, even though this principle is not explicitly stated in the treaty.<sup>26</sup> In addition, the International Convention for the Suppression of the Financing of Terrorism has been understood not to preclude any State Party to the Convention from conducting any legitimate activity against any lawful target in accordance with the law of armed conflict.<sup>27</sup>

In addition to treaties, domestic statutes have also been construed not to violate international law, including the law of war, if any other construction remains possible.<sup>28</sup> Certain domestic statutes have been interpreted not to apply to situations addressed by the law of war because such intention was not made clear and unequivocal.<sup>29</sup>

---

1991) ("Infringements on the laws of armed conflict through international agreements primarily addressing situations other than armed conflict are not to be presumed. There is no indication that the drafters of the Montreal Convention intended it to apply to military forces acting in armed conflict. If they had so intended, they would have had to address a myriad of issues relating to acts by military forces."); *The S.S. Wimbledon*, (United Kingdom, France, Japan v. Germany), Judgment (MM. Anzilotti and Huber, dissenting), 1923 P.C.I.J. (series A) 1, 35, 36 (¶3) ("In this respect, it must be remembered that international conventions and more particularly those relating to commerce and communications are generally concluded having regard to normal peace conditions. If, as the result of a war, a neutral or belligerent State is faced with the necessity of taking extraordinary measures temporarily affecting the application of such conventions in order to protect its neutrality or for the purposes of national defence, it is entitled to do so even if no express reservations are made in the convention. This right possessed by all nations, which is based on generally accepted usage, cannot lose its *raison d'être* simply because it may in some cases have been abused;").

<sup>26</sup> Refer to § 13.1.1 (The Law of the Sea During Armed Conflict).

<sup>27</sup> United States, *Statement on Ratification of International Convention for the Suppression of the Financing of Terrorism*, Jun. 26, 2002, 2185 UNTS 611, 612 ("(1) Exclusion of legitimate activities against lawful targets. The United States of America understands that nothing in the Convention precludes any State Party to the Convention from conducting any legitimate activity against any lawful target in accordance with the law of armed conflict.").

<sup>28</sup> *The Charming Betsy*, 6 U.S. 64, 118 (1804) (Marshall, C.J.) ("It has also been observed that an act of Congress ought never to be construed to violate the law of nations if any other possible construction remains, and consequently can never be construed to violate neutral rights or to affect neutral commerce further than is warranted by the law of nations as understood in this country. These principles are believed to be correct, and they ought to be kept in view in construing the act now under consideration.").

<sup>29</sup> See, e.g., Walter Dellinger, Assistant Attorney General, *United States Assistance to Countries that Shoot Down Civil Aircraft Involved in Drug Trafficking*, Jul. 14, 1994, 18 OPINIONS OF THE OFFICE OF LEGAL COUNSEL 148, 163-64 ("Specifically, we believe that the section would not apply to the actions of United States military forces acting on behalf of the United States during a state of hostilities. As discussed above, § 32(b)(2) was intended to implement the United States's obligations under the Montreal Convention. That Convention does not appear to apply to acts of armed forces that are otherwise governed by the laws of armed conflict. ... We do not think that § 32(b)(2) should be construed to have the surprising and almost certainly unintended effect of criminalizing actions by military personnel that are lawful under international law and the laws of armed conflict. We note specifically that the application of § 32(b)(2) to acts of United States military personnel in a state of hostilities could readily lead to absurdities: for example, it could mean in some circumstances that military personnel would not be able to engage in reasonable self-defense without subjecting themselves to the risk of criminal prosecution. Unless Congress by a clear and unequivocal statement declares otherwise, § 32(b)(2) should be construed to avoid such outcomes. Thus, we do not think the statute, as written, should apply to such incidents as the downing on July 3, 1988 of Iran Air Flight 655 by the United States Navy cruiser *Vincennes*"); France Biddle, Attorney General, *Procurements by Commanding Generals in Foreign Theaters of Operations*, Nov. 12, 1942, 40 OPINIONS OF THE ATTORNEY GENERAL 250, 253 (1949) ("The statutes in question do not expressly declare that their provisions are inapplicable to foreign theaters of operations. But there are conclusive reasons for inferring that the Congress did not intend them to apply to such theaters. The Supreme Court has long recognized that the power to conduct

1.3.2.3 *Using the Law of War to Determine the Content of General Standards if Applied to Armed Conflict.* Another way in which the law of war has been applied as *lex specialis* is to determine the content of a more general standard with respect to the situation of armed conflict. For example, the law of war has been used to inform the content of general authorizations to conduct military operations.<sup>30</sup>

As another example, to the extent that the concept of “due regard” for the safety of civil aircraft may be deemed to apply during armed conflict, what regard is due would be understood in terms of the requirements of the law of war.<sup>31</sup> Similarly, to the extent that the concept of “due regard” for the rights of other States under the law of the sea may be deemed to apply during armed conflict, what regard is due would be understood in terms of the requirements of the law of war.<sup>32</sup>

Lastly, even where international courts or commissions have characterized human rights obligations as applicable during armed conflict, they generally have characterized the content of those obligations as determined by standards and tests drawn from the law of war.<sup>33</sup>

1.3.2.4 *Explicit Incorporation of Concepts From Other Bodies of Law Into the Law of War.* In some cases, law of war treaties explicitly incorporate concepts from other bodies of law. For example, the peacetime property law concept of usufruct is made applicable to the duties of the Occupying States.<sup>34</sup> Similarly, the GC explicitly applies a peacetime rule with respect to the nationals of the Occupying Power who, before the outbreak of hostilities, have sought refuge in the occupied territory.<sup>35</sup> And as another example, Common Article 3 of the 1949 Geneva Conventions incorporates by reference those judicial guarantees that are

---

military campaigns includes power to procure needed supplies in theaters of operations by whatever methods are dictated by military necessity. Property may be taken summarily, even from a citizen, if military exigencies make its seizure reasonably appear to be necessary. It is unthinkable that the Congress attempted, by statutory restrictions, to abrogate this rule of military necessity, to handicap commanding generals waging war on foreign soil, to limit or encroach upon the power of the President as Commander in Chief to conduct, through his subordinates, military campaigns abroad.”) (internal citations omitted).

<sup>30</sup> *Hamdi v. Rumsfeld*, 542 U.S. 507, 519 (2004) (plurality) (“In light of these principles, it is of no moment that the AUMF does not use specific language of detention. Because detention to prevent a combatant’s return to the battlefield is a fundamental incident of waging war, in permitting the use of ‘necessary and appropriate force,’ Congress has clearly and unmistakably authorized detention in the narrow circumstances considered here.”). See also *In re Guantanamo Bay Litigation, Respondents’ Memorandum Regarding the Government’s Detention Authority Relative to Detainees Held at Guantanamo Bay*, Misc. No. 08-442, 4 (D.D.C., Mar. 13, 2009) (“The United States bases its detention authority as to such persons on the Authorization for the Use of Military Force (‘AUMF’), Pub. L. 107-40, 115 Stat. 224 (2001). The detention authority conferred by the AUMF is necessarily informed by principles of the laws of war.”).

<sup>31</sup> Refer to § 14.1.1.4 (Due Regard for the Safety of Navigation of Civil Aircraft).

<sup>32</sup> Refer to § 13.1.1 (The Law of the Sea During Armed Conflict).

<sup>33</sup> Refer to § 1.6.3.1 (Relationship Between Human Rights Treaties and the Law of War).

<sup>34</sup> Refer to § 11.18.5.2 (Public Real (Immovable) Property That Is Essentially of a Non-Military Nature).

<sup>35</sup> Refer to § 11.11.7.2 (Protection of Nationals of the Occupying Power Who, Before the Outbreak of Hostilities, Have Sought Refuge in the Territory of the Occupied State).

recognized as indispensable by civilized peoples.<sup>36</sup>

1.3.3 Restrictive and Permissive Character of the Law of War. In certain respects, the law of war may be viewed as prohibitive; in other respects, the law of war may be viewed as permissive.<sup>37</sup>

1.3.3.1 Law of War as Prohibitive Law. The law of war that relates to the conduct of hostilities has generally been viewed as “prohibitive law,” in the sense that it forbids rather than authorizes certain uses of force.<sup>38</sup> For example, the lawfulness of the use of a type of weapon does not depend on an absence of authorization, but, on the contrary, on whether the weapon is prohibited.<sup>39</sup>

One rationale for this view is that the rules binding upon States in treaties and customary law reflect restrictions that they have accepted, and that States are otherwise independent entities with freedom to act.<sup>40</sup> Thus, the authority to take actions under the law of war would be viewed as emanating from the State’s rights as a sovereign entity rather than from any particular instrument of international law.

The prohibitive character of the law of war that relates to the conduct of hostilities is also consistent with the view that *jus in bello* applies to aggressors and defenders alike. The fact that an aggressor complies with *jus in bello* does not justify the legality of its military operations under *jus ad bellum*.<sup>41</sup>

The lack of an express prohibition in treaty law, however, does not necessarily mean that

---

<sup>36</sup> Refer to § 8.16 (Criminal Procedure and Punishment).

<sup>37</sup> VON GLAHN, THE OCCUPATION OF ENEMY TERRITORY 5 (“Throughout the pages of this study a basic fact will appear repeatedly: the laws of war, including the rules applicable to belligerent occupation, are in part permissive and in part prohibitive—a fact that has been overlooked frequently in treatments of the subject.”).

<sup>38</sup> See Richard R. Baxter, *So-Called ‘Unprivileged Belligerency’: Spies, Guerillas, and Saboteurs*, 28 BRITISH YEAR BOOK OF INTERNATIONAL LAW 323, 324 (1951) (“The law of war is, in the descriptive words of a war crimes tribunal, ‘prohibitive law’ in the sense that it forbids rather than authorizes certain manifestations of force.”) (quoting *United States v. List, et al. (The Hostage Case)*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1252); *Gherebi v. Obama*, 609 F. Supp. 2d 43, 65 (D.D.C. 2009) (rejecting as “exactly backwards” the “notion that the Geneva Conventions must specifically enable its signatories to act in a specific manner for a signatory to have the authority necessary to take such action.”); JOHN WESTLAKE, II INTERNATIONAL LAW 52 (1907) (“These rules are always restrictive, never permissive in any other sense than that of the absence of prohibition, for law can give no positive sanction to any act of force of which it cannot secure the employment on the side of justice alone, even if the particular act be not one which the law would prohibit both to the just and to the unjust if it could. Whenever therefore in speaking of the laws of war it is said that a belligerent may do this or that, it is always only the absence of prohibition that must be understood.”).

<sup>39</sup> Refer to § 6.2.1 (Review of New Types of Weapons).

<sup>40</sup> *The S.S. Lotus, (France v. Turkey) (Judgment)*, 1927 P.C.I.J. (series A) No. 10, at 18 (“International law governs relations between independent States. The rules of law binding upon States therefore emanate from their own free will as expressed in conventions or by usages generally accepted as expressing principles of law and established in order to regulate the relations between these co-existing independent communities or with a view to the achievement of common aims. Restrictions upon the independence of States cannot therefore be presumed.”).

<sup>41</sup> Refer to § 3.5.2 (*Jus in Bello* and *Jus ad Bellum* Generally Operate Independently of One Another).

an action is lawful under *jus in bello*. When no specific rule applies, the principles of the law of war form the general guide for conduct during war.<sup>42</sup>

1.3.3.2 *Law of War as Permissive Law*. Although the law of war is generally viewed as “prohibitive law,” in some respects, especially in the context of domestic law, the law of war may be viewed as permissive or even as a source of authority.<sup>43</sup>

For example, the principle of military necessity in the customary law of war may be viewed as justifying or permitting certain acts.<sup>44</sup> Similarly, under the law of belligerent occupation, the fact of occupation is the basis for the Occupying Power to exercise authority over the occupied territory.<sup>45</sup> In addition, law of war treaties also sometimes recognize States’ authorities in war.<sup>46</sup>

1.3.4 *Purposes of the Law of War*. The main purposes of the law of war are:

- protecting combatants, noncombatants, and civilians from unnecessary suffering;<sup>47</sup>
- providing certain fundamental protections for persons who fall into the hands of the enemy, particularly prisoners of war, civilians, and military wounded, sick, and shipwrecked;<sup>48</sup>
- facilitating the restoration of peace;<sup>49</sup>
- assisting military commanders in ensuring the disciplined and efficient use of military

force;<sup>50</sup> and

- preserving the professionalism and humanity of combatants.<sup>51</sup>

#### 1.4 OBJECT AND NATURE OF WAR

Understanding the object and nature of war is important in understanding and applying the law of war.<sup>52</sup>

1.4.1 Object of War. The object of war has been understood to be the submission of the enemy as quickly and efficiently as possible.<sup>53</sup> The military defeat of the enemy in war is intended to advance political objectives.<sup>54</sup> Even where those political objectives are limited, the object of war is nonetheless to ensure the submission of the enemy as quickly and efficiently as possible.<sup>55</sup>

---

<sup>50</sup> Refer to § 18.2.1 (Reinforcing Military Effectiveness).

<sup>51</sup> Refer to § 2.6 (Honor).

<sup>52</sup> DEPARTMENT OF THE ARMY PAMPHLET 27-161-2, *II International Law*, 1 (Oct. 23, 1962) (“An understanding of the laws of war necessitates an understanding of ‘war’ itself. It is the phenomenon of war which these laws are attempting in some manner to control.”). See also Adam Roberts, *Land Warfare: From Hague to Nuremberg*, in MICHAEL HOWARD, GEORGE J. ANDREOPOULOUS, & MARK A. SHULMAN, *THE LAWS OF WAR: CONSTRAINTS ON WARFARE IN THE WESTERN WORLD* 117 (1994) (“The laws of war are strange not only in their subject matter, which to many people seems a contradiction in terms, but also in their methodology. There is little tradition of disciplined and reasoned assessment of how the laws of war have operated in practice. Lawyers, academics, and diplomats have often been better at interpreting the precise legal meaning of existing accords, or at devising new law, than they have been at assessing the performance of existing accords or at generalizing about the circumstances in which they can or cannot work. In short, the study of law needs to be integrated with the study of history; if not, it is inadequate.”).

<sup>53</sup> See 1940 RULES OF LAND WARFARE ¶22 (“The object of war is to bring about the complete submission of the enemy as soon as possible by means of regulated violence.”); 1914 RULES OF LAND WARFARE ¶10 (same).

<sup>54</sup> George H. Aldrich, Deputy Legal Adviser, Department of State, *Human Rights in Armed Conflict: Development of the Law*, Apr. 13, 1973, 68 DEPARTMENT OF STATE BULLETIN, 876, 880 (Jun. 18, 1973) (“What we have seen is all too clearly a general acceptance of the view that modern war is aimed not merely at the enemy’s military forces but at the enemy’s willingness and ability to pursue its war aims. Thus, in the Second World War the enemy’s will to fight and his capacity to produce weapons were primary targets; and saturation bombing, blockade of food supplies, and indiscriminate terror weapons such as the German V bombs, were all brought to bear on those targets. In Viet-Nam political, rather than military, objectives were even more dominant. Both sides had as their goal not the destruction of the other’s military forces but the destruction of the will to continue the struggle.”); *United States v. von Leeb, et al. (The High Command Case)*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 485 (“War is the exerting of violence by one state or politically organized body against another. In other words, it is the implementation of a political policy by means of violence.”); CARL VON CLAUSEWITZ, *ON WAR* 87 (1989) (“We see, therefore, that war is not merely an act of policy but a true political instrument, a continuation of political intercourse, carried on with other means. What remains peculiar to war is simply the peculiar nature of its means. War in general, and the commander in any specific instance, is entitled to require that the trend and designs of policy shall not be inconsistent with these means. That, of course, is no small demand; but however much it may affect political aims in a given case, it will never do more than modify them. The political object is the goal, war is the means of reaching it, and means can never be considered in isolation from their purpose.”).

<sup>55</sup> For example, General Colin L. Powell, Chairman of the Joint Chiefs of Staff, *U.S. Forces: Challenges Ahead*, 71 FOREIGN AFFAIRS 32, 37 (1992) (explaining that despite the limited political objectives of the 1991 Gulf War, the United States “did use overwhelming force quickly and decisively.”).

The object of war informs the principle of *military necessity* and what uses of force may be justified in war.<sup>56</sup> Nevertheless, the law of war limits what uses of force the object of war may justify.<sup>57</sup>

#### 1.4.2 Nature of War.

1.4.2.1 Nature of War – Violence and Suffering. War has been described as a violent clash of interests characterized by the use of force.<sup>58</sup> The fact that violence is an essential element of war has been viewed as important in understanding the nature of war.<sup>59</sup> The violent nature of war has also meant that suffering has been an unfortunate and tragic, but unavoidable consequence of war.<sup>60</sup>

Law of war treaties such as the Hague and Geneva Conventions have been negotiated with the understanding that suffering and destruction are unavoidably part of war.<sup>61</sup> But these

---

<sup>56</sup> Refer to § 2.2.1 (*Military Necessity* as a Justification); § 2.2.3.1 (Consideration of the Broader Imperatives of Winning the War).

<sup>57</sup> Refer to § 2.2.2 (*Military Necessity* and Law of War Rules).

<sup>58</sup> DEPARTMENT OF THE ARMY FIELD MANUAL 3-24, *Counterinsurgency*, 1-1 (¶1-1) (Dec. 2006) (“Insurgency and counterinsurgency (COIN) are complex subsets of warfare. Globalization, technological advancement, urbanization, and extremists who conduct suicide attacks for their cause have certainly influenced contemporary conflict; however, warfare in the 21st century retains many of the characteristics it has exhibited since ancient times. Warfare remains a violent clash of interests between organized groups characterized by the use of force. Achieving victory still depends on a group’s ability to mobilize support for its political interests (often religiously or ethnically based) and to generate enough violence to achieve political consequences. Means to achieve these goals are not limited to conventional forces employed by nation-states.”); MARINE CORPS DOCTRINAL PUBLICATION 1, *Warfighting*, 3 (Jun. 20, 1997) (explaining that war is “a violent clash of interests between or among organized groups characterized by the use of military force.”).

<sup>59</sup> MARINE CORPS DOCTRINAL PUBLICATION 1, *Warfighting*, 14 (Jun. 20, 1997) (“War is among the greatest horrors known to humanity; it should never be romanticized. The means of war is force, applied in the form of organized violence. It is through the use of violence, or a credible threat of violence, that we compel our enemy to do our will. Violence is an essential element of war, and its immediate result is bloodshed, destruction, and suffering. While the magnitude of violence may vary with the object and means of war, the violent essence of war will never change. Any study of war that neglects this basic truth is misleading and incomplete.”).

<sup>60</sup> For example, Friedrich II, Letter to Lord Marischal, Nov. 23, 1758 reprinted in THOMAS CARLYLE, V HISTORY OF FRIEDERICH II OF PRUSSIA: CALLED FREDERICK THE GREAT 386 (1865) (“Our Campaign is over; and there has nothing come of it on one side or the other, but the loss of a great many worthy people, the misery of a great many poor soldiers crippled forever, the ruin of some Provinces, the ravage, pillage and conflagration of some flourishing Towns. Exploits these, which make humanity shudder: ...”).

<sup>61</sup> Edward R. Cummings, Acting Assistant Legal Adviser for Politico-Military Affairs, *Remarks at Symposium at Brooklyn Law School*, Sept. 25, 1982, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-88 3421, 3422 (“The Conventions referred to today, such as the Hague and Geneva Conventions, are important ones and are strongly supported by the United States. They have helped reduce the suffering caused by wars. But one should not ask the impossible of these agreements. They were not intended to make war ‘humane’ or to ban war, or to make wars more difficult to fight. They were modestly intended to reduce the inhumanity and barbarity of war when militarily possible. Anyone who has read the negotiating records of these old agreements will note that they were largely negotiated by the military. In fact, the first agreement of this kind, the St. Petersburg Declaration, was agreed to by a military commission. Unrealistic provisions which just would not be accepted or respected in battle were not favored.”).

treaties and the principle of humanity seek to reduce unnecessary suffering and destruction.<sup>62</sup>

1.4.2.2 Nature of War – Limited and Unreliable Information – “Fog of War”. During war, information is often limited and unreliable.<sup>63</sup> The uncertainty of information in war results from the chaotic nature of combat and from the opposing sides’ efforts to deceive one another, which generally is not prohibited by the law of war.<sup>64</sup>

The limited and unreliable nature of information available during war has influenced the development of the law of war. For example, it affects how the principle of military necessity is applied.<sup>65</sup> The limited and unreliable nature of information available during war also is recognized in the law of war’s standards for how persons are to assess information.<sup>66</sup>

## 1.5 “WAR” AS A LEGAL CONCEPT

“War” is sometimes used as a legal concept, *i.e.*, the application or operation of a legal rule may depend on the existence of a “war,” “armed conflict,” or “hostilities.” As a legal concept, “war” has traditionally been viewed as a condition in which a State is prosecuting its rights by military force, usually against another State. However, the precise definition of “war” often depends on the specific legal context in which it is used.

1.5.1 Traditional Conception of War Under International Law. As international law began to regulate “war,” “hostilities,” and “armed conflict,” it became necessary to determine what “war” is for the purpose of triggering those legal obligations.<sup>67</sup>

As a legal concept, war has usually been described as a condition or state that applies more broadly than only the mere employment of force or the mere commission of acts of

---

<sup>62</sup> Refer to § 2.3 (Humanity).

<sup>63</sup> See, e.g., United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1297 (“The course of a military operation by the enemy is loaded with uncertainties, such as the numerical strength of the enemy, the quality of his equipment, his fighting spirit, the efficiency and daring of his commanders, and the uncertainty of his intentions.”); CARL VON CLAUSEWITZ, ON WAR 140 (1989) (“the general unreliability of all information presents a special problem in war: all action takes place so to speak, in a kind of twilight, which like fog or moonlight, often tends to make things grotesque and larger than they really are.”).

<sup>64</sup> Refer to § 5.25 (Ruses of War and Other Lawful Deceptions).

<sup>65</sup> Refer to § 2.2.3 (Applying Military Necessity).

<sup>66</sup> Refer to § 5.3 (Assessing Information Under the Law of War).

<sup>67</sup> See, e.g., Arnold D. McNair, *The Legal Meaning of War, and the Relation of War to Reprisals*, 11 TRANSACTIONS OF THE GROTIUS SOCIETY 29, 30 (1925) (“There exist many treaties and other international conventions under which important obligations arise upon the occurrence of a state of ‘war,’ and as regards which, therefore, either because the term ‘war’ or some other term connoting war, such as ‘neutrality,’ is used, it becomes essential to know whether or not a state of war exists at a given point of time. Thus most of the Hague Conventions only come into operation once a state of war has arisen—for instance, those relating to the Laws and Customs of War on Land, to the Rights and Duties of Neutrals in Land and Maritime War respectively, to the Bombardment of Ports, Towns and Villages by Naval Forces, and to the Status of Enemy Merchant Ships at the Outbreak of Hostilities.”).

violence.<sup>68</sup>

When treated as a legal concept, “war” has been associated with a State’s use of force to vindicate its rights (principally, its inherent right of self-defense) under international law.<sup>69</sup>

Traditionally, war has often been described as a legal condition between two or more States.<sup>70</sup> However, certain law of war rules apply to non-international armed conflicts (such as intrastate conflicts or conflicts between a State and a non-State armed group).<sup>71</sup>

1.5.2 Different Definitions of “War” for Different Legal Purposes. There is no single legal definition of “war,” “hostilities,” or “armed conflict,” and the definition of these terms has varied in both domestic and international law.

In domestic law, “war,” “hostilities,” and “armed conflict” have been interpreted differently depending on the specific legal context at issue.<sup>72</sup> For example, under the

---

<sup>68</sup> 1956 FM 27-10 (Change No. 1 1976) ¶8 (“While it is usually accompanied by the commission of acts of violence, a state of war may exist prior to or subsequent to the use of force.”); VII MOORE’S DIGEST 153 (“Much confusion may be avoided by bearing in mind the fact that by the term war is meant not the mere employment of force, but the existence of the legal condition of things in which rights are or may be prosecuted by force.”); GROTIUS, LAW OF WAR & PEACE 33 (1.1.2.1) (“war is the condition of those contending by force”).

<sup>69</sup> SPAIGHT, AIR POWER AND WAR RIGHTS 2 (“War, after all, is only a means to an end. It is a way of settling an international difference which diplomacy has failed to adjust and which is not susceptible of treatment by the other means of pacific settlement, such as inquiry commissions, arbitration, or submission to the Permanent Court of The Hague. When all else fails, there is no way in which a nation can assert its rights save by going to war. War is the means by which it vindicates a vital right threatened or infringed by the claim or act of another State. Its object is to cause the other State to desist from the action or abandon the claim which is the cause of offence. In other words, a war is fought in order to bring about a change of mind in another State.”); The Prize Cases, 67 U.S. 635, 666 (1863) (“War has been well defined to be, ‘That state in which a nation prosecutes its right by force.’”) (quoting EMERICH DE VATTEL, DROIT DE GENS (LAW OF NATIONS) (1760)); LIEBER CODE art. 30 (“Ever since the formation and coexistence of modern nations, and ever since wars have become great national wars, war has come to be acknowledged not to be its own end, but the means to obtain great ends of state, or to consist in defense against wrong; and no conventional restriction of the modes adopted to injure the enemy is any longer admitted; but the law of war imposes many limitations and restrictions on principles of justice, faith, and honor.”).

<sup>70</sup> 1956 FM 27-10 (Change No. 1 1976) ¶8a (“War may be defined as a legal condition of armed hostility between States. While it is usually accompanied by the commission of acts of violence, a state of war may exist prior to or subsequent to the use of force. The outbreak of war is usually accompanied by a declaration of war (see par. 20). Instances of armed conflict without declaration of war may include, but are not necessarily limited to, the exercise of armed force pursuant to a recommendation, decision, or call by the United Nations, in the exercise of the inherent right of individual or collective self-defense against armed attack, or in the performance of enforcement measures through a regional arrangement, or otherwise, in conformity with appropriate provisions of the United Nations Charter.”); LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 202 (§54) (“War is a contention between two or more States through their armed forces, for the purpose of overpowering each other and imposing such conditions of peace as the victor pleases.”); LIEBER CODE art. 20 (“Public war is a state of armed hostility between sovereign nations or governments. It is a law and requisite of civilized existence that men live in political, continuous societies, forming organized units, called states or nations, whose constituents bear, enjoy, and suffer, advance and retrograde together, in peace and in war.”).

<sup>71</sup> Refer to § 3.3.1 (International Armed Conflict and Non-International Armed Conflict).

<sup>72</sup> See, e.g., Fred K. Green, *The Concept of “War” and the Concept of “Combatant” in Modern Conflicts*, 10 MILITARY LAW AND LAW OF WAR REVIEW 267, 269 (1971) (“[I]n US municipal law, the existence of “war” and its beginning and termination is a question of objective fact determined for different purposes by different agencies of

Constitution, Congress has the power to “declare war.”<sup>73</sup> Thus, “war” might be interpreted to determine whether a military operation constitutes “war” in this sense.<sup>74</sup> Similarly, the War Powers Resolution states certain requirements that are triggered when U.S. forces are introduced into “hostilities.”<sup>75</sup> Other statutes may require a determination that conduct has occurred “[w]hen the United States is at war” or during “time of war.”<sup>76</sup>

Under international law, “war,” “hostilities,” and “armed conflict” may also be interpreted with different purposes in mind.<sup>77</sup> A state of “war” can affect what duties States that are not participating in the conflict have under the law of neutrality.<sup>78</sup> A state of “war” can affect whether peacetime treaties between two States continue to apply. Most importantly for the purposes of this manual, the terms “war” and “armed conflict” are used to describe when *jus in bello* rules apply.<sup>79</sup>

## 1.6 LAW OF WAR DISTINGUISHED FROM CERTAIN TOPICS

The law of war may be distinguished from the following topics: (1) operational law; (2) arms control; (3) human rights treaties; (4) the Just War Tradition; (5) rules of engagement; and (6) the Code of Conduct for U.S. Armed Forces.

---

the sovereign. There has been no apparent effort to coordinate federal law so as to permit establishment of fixed criteria that would be identified and applicable for all purposes. The tremendous variations in result that this situation produces renders meaningless any attempt to generalize with respect to established criteria.”).

<sup>73</sup> U.S. CONSTITUTION art. I, § 8.

<sup>74</sup> Caroline D. Krass, Principal Deputy Assistant Attorney General, *Authority to use Military Force in Libya*, 8 (Apr. 1, 2011) (“[T]he historical practice of presidential military action without congressional approval precludes any suggestion that Congress’s authority to declare war covers every military engagement, however limited, that the President initiates. In our view, determining whether a particular planned engagement constitutes a ‘war’ for constitutional purposes instead requires a fact-specific assessment of the ‘anticipated nature, scope, and duration’ of the planned military operations. *Haiti Deployment*, 18 Op. O.L.C. at 179.”).

<sup>75</sup> See 50 U.S.C. § 1543(a)(1) (“In the absence of a declaration of war, in any case in which United States Armed Forces are introduced— (1) into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances; ... the President shall submit within 48 hours to the Speaker of the House of Representatives and to the President pro tempore of the Senate a report, in writing, setting forth ...”).

<sup>76</sup> See, e.g., 10 U.S.C. § 843(f) (“When the United States is at war, the running of any statute of limitations applicable to [certain offenses]... is suspended until three years after the termination of hostilities as proclaimed by the President or by a joint resolution of Congress.”); 10 U.S.C. § 906 (“Any person who in time of war is found lurking as a spy or acting as a spy in or about any place, vessel, or aircraft, within the control or jurisdiction of any of the armed forces, or in or about any shipyard, any manufacturing or industrial plant, or any other place or institution engaged in work in aid of the prosecution of the war by the United States, or elsewhere, shall be tried by a general court-martial or by a military commission and on conviction shall be punished by death. This section does not apply to a military commission established under chapter 47A of this title.”).

<sup>77</sup> JULIUS STONE, *LEGAL CONTROLS OF INTERNATIONAL CONFLICT* 312 (1954) (“[T]he question ‘War or No War?’ may have to be answered differently according to the purposes for which an answer is sought. One answer, for example, may be indicated for the purposes of the rules for the mitigation of suffering; another for those governing war supplies to belligerents from neutral governments, or governing blockade or contraband.”).

<sup>78</sup> Refer to § 15.2.1 (Armed Conflict and the Application of the Law of Neutrality).

<sup>79</sup> Refer to § 3.4 (When *Jus in Bello* Rules Apply).

1.6.1 Operational Law. The law of war is an important part of, but not the entirety of, operational law. Operational law consists of that body of domestic, foreign, and international law that specifically pertains to the activities of military forces across the entire conflict spectrum. Operational law includes diverse legal disciplines, such as military justice, administrative and civil law, legal assistance, claims, procurement law, national security law, fiscal law, and the law of war.<sup>80</sup>

1.6.2 Arms Control. Arms control is a broad term that includes a variety of efforts to reduce the numbers, types, performance characteristics, proliferation, testing, or other aspects of certain categories of weapons. Arms control usually proceeds through bilateral or multilateral treaties. Arms control can also include non-binding political commitments, as well as reciprocal unilateral statements of intention or policy. The overall goals of arms control are to reduce: (1) the likelihood of war; (2) the consequences of war, should it occur; and (3) the costs of preparing for war.

Arms control is closely related to other concepts. For example, “non-proliferation” refers specifically to efforts to restrict the spread of weapons (in particular, weapons of mass destruction). “Disarmament” refers to efforts to eliminate entirely, rather than to restrict, a particular category of weapon. And sometimes States accept “confidence-building measures” (or confidence, security, and transparency-building measures) that do not directly reduce the quantity or quality of armaments, but rather increase States’ certainty that ambiguous activities by other States are not secret actions in violation of arms control obligations.

Arms control and the law of war frequently overlap in treaties. For example, the CCW Protocol IV on Blinding Laser Weapons has both arms control and law of war provisions.<sup>81</sup> Similarly, the Chemical Weapons Convention prohibits, *inter alia*, the development and stockpiling of chemical weapons, but it is also directly relevant to the law of war because it prohibits the use of chemical weapons in all circumstances.<sup>82</sup>

1.6.3 Human Rights Treaties.<sup>83</sup> Human rights treaties address primarily the obligations

---

<sup>80</sup> THE JUDGE ADVOCATE GENERAL’S SCHOOL, U.S. ARMY, OPERATIONAL LAW HANDBOOK JA 422 1-1 (1997) (“[Operational law is] [t]hat body of domestic, foreign, and international law that impacts specifically upon the activities of U.S. Forces across the entire operational spectrum. Operational law is the essence of the military legal practice. It is a collection of diverse legal and military skills, focused on military operations. It includes military justice, administrative and civil law, legal assistance, claims, procurement law, environmental law, national security law, fiscal law, international law, host nations law, and the law of war. In short, operational law is a unique blend of every source of law that has application within the operational context. ... Because the definition of operational law is so broad, ample statutory and regulatory references serve to establish the substance of the practice.”).

<sup>81</sup> Refer to § 19.21.5 (CCW Protocol IV on Blinding Laser Weapons).

<sup>82</sup> Refer to § 6.8.3.2 (Prohibitions With Respect to Chemical Weapons).

<sup>83</sup> This section focuses on human rights treaties and not other sources of international human rights law. See, e.g., Catherine Amirfar, Counselor for International Law, Department of State, *Statement at 53rd Session of the U.N. Committee Against Torture, Nov. 3 – 28, 2014*, Nov. 12, 2014 (“For example, the prohibition against torture is customary international law binding on all nations everywhere, at all times.”); U.N. International Law Commission, *State responsibility: Comments and observations received from Governments*, U.N. Doc. A/CN.4/488, 133 (Mar. 25, 1998) (“**United States of America** Subparagraph (e) [which would reflect a prohibition against conduct by way of countermeasures in contravention of a peremptory norm of general international law] similarly does not provide useful guidance in determining whether a countermeasure would be permissible. Just as there is little agreement

of governments with respect to the rights of individuals, including their own nationals.<sup>84</sup> For example, governments must refrain from subjecting individuals to arbitrary detention, to arbitrary deprivation of life, or to cruel, inhuman, or degrading treatment or punishment.<sup>85</sup>

As a general matter, human rights treaties have been described as primarily applicable to the relationship between a State and individuals in peacetime.<sup>86</sup> Some human rights treaties also provide for derogation from certain provisions in emergency situations.<sup>87</sup>

Law of war treaties have been described as chiefly concerned with the conditions particular to armed conflict and the relationship between a State and nationals of the enemy State.<sup>88</sup> Law of war treaties generally do not provide for derogation because necessity is not a

---

with respect to ‘basic’ human rights and political and economic ‘coercion’, the content of peremptory norms is difficult to determine outside the areas of genocide, slavery and torture.”).

<sup>84</sup> See, e.g., Jimmy Carter, *United Nations Remarks on Signing International Covenants on Human Rights*, 1977-II PUBLIC PAPERS OF THE PRESIDENTS 1734 (“The Covenant on Civil and Political Rights concerns what governments must not do to their people, and the Covenant on Economic, Social and Cultural Rights concerns what governments must do for their people. By ratifying the Covenant on Civil and Political Rights, a government pledges, as a matter of law, to refrain from subjecting its own people to arbitrary imprisonment or execution or to cruel or degrading treatment. It recognizes the right of every person to freedom of thought, freedom of conscience, freedom of religion, freedom of opinion, freedom of expression, freedom of association, and the rights of peaceful assembly, and the right to emigrate from that country.”).

<sup>85</sup> International Covenant on Civil and Political Rights, art. 9(1), Dec. 19, 1966, 999 UNTS 171, 175 (“Everyone has the right to liberty and security of person. No one shall be subjected to arbitrary arrest or detention. No one shall be deprived of his liberty except on such grounds and in accordance with such procedure as are established by law.”); International Covenant on Civil and Political Rights, art. 6(1), Dec. 19, 1966, 999 UNTS 171, 174 (“Every human being has the inherent right to life. This right shall be protected by law. No one shall be arbitrarily deprived of his life.”); International Covenant on Civil and Political Rights, art. 7, Dec. 19, 1966, 999 UNTS 171, 175 (“No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment. In particular, no one shall be subjected without his free consent to medical or scientific experimentation.”).

<sup>86</sup> See, e.g., JEAN PICTET, *HUMANITARIAN LAW AND THE PROTECTION OF WAR VICTIMS* 15 (1975) (“Admittedly, human rights embody more general principles while the law of armed conflicts is of a specific and exceptional nature, coming as it does into operation at the very time when the exercise of human rights is prevented or restricted by war. But the two legal systems are fundamentally different, for humanitarian law is valid only in the case of an armed conflict while human rights are essentially applicable in peacetime, and contain derogation clauses in case of conflict. Moreover, human rights govern relations between the State and its own nationals, the law of war those between the State and enemy nationals.”).

<sup>87</sup> See, e.g., International Covenant on Civil and Political Rights, art. 4(1), Dec. 19, 1966, 999 UNTS 171, 174 (“In time of public emergency which threatens the life of the nation and the existence of which is officially proclaimed, the States Parties to the present Covenant may take measures derogating from their obligations under the present Covenant to the extent strictly required by the exigencies of the situation, provided that such measures are not inconsistent with their other obligations under international law and do not involve discrimination solely on the ground of race, colour, sex, language, religion or social origin.”).

<sup>88</sup> Christopher Greenwood, *Historical Development and Legal Basis*, in DIETER FLECK, *THE HANDBOOK OF HUMANITARIAN LAW IN ARMED CONFLICTS* 9 (¶102) (1999) (“Human rights law is designed to operate primarily in normal peacetime conditions, and within the framework of the legal relationship between a state and its citizens. International humanitarian law, by contrast, is chiefly concerned with the abnormal conditions of armed conflict and the relationship between a state and the citizens of its adversary, a relationship otherwise based upon power rather than law.”).

basis for derogating from law of war rules.<sup>89</sup>

1.6.3.1 *Relationship Between Human Rights Treaties and the Law of War.* In some circumstances, the rules in the law of war and the rules in human rights treaties may appear to conflict; these apparent conflicts may be resolved by the principle that the law of war is the *lex specialis* during situations of armed conflict, and, as such, is the controlling body of law with regard to the conduct of hostilities and the protection of war victims.<sup>90</sup>

For example, the right to challenge the lawfulness of an arrest before a court provided in Article 9 of the International Covenant on Civil and Political Rights (ICCPR) would appear to conflict with the authority under the law of war to detain certain persons without judicial process or criminal charge.<sup>91</sup> However, the United States has understood Article 9 of the ICCPR not to affect a State's authorities under the law of war, including a State's authority in both international and non-international armed conflicts to detain enemy combatants until the end of hostilities.<sup>92</sup> Some international courts or commissions have interpreted the rights conveyed by human rights treaties in light of the rules of the law of war, as the applicable *lex specialis*, when assessing situations in armed conflict.<sup>93</sup>

---

<sup>89</sup> Refer to § 2.2.2 (*Military Necessity and Law of War Rules*).

<sup>90</sup> Refer to § 1.3.2 (*The Law of War's Relationship to Other Bodies of Law*).

<sup>91</sup> International Covenant on Civil and Political Rights, art. 9(4), Dec. 19, 1966, 999 UNTS 171, 176 ("Anyone who is deprived of his liberty by arrest or detention shall be entitled to take proceedings before a court, in order that that court may decide without delay on the lawfulness of his detention and order his release if the detention is not lawful.").

<sup>92</sup> *Observations of the United States of America on the Human Rights Committee's Draft General Comment 35: Article 9*, ¶22, Jun. 10, 2014 ("Given that international humanitarian law is the controlling body of law in armed conflict with regard to the conduct of hostilities and the protection of war victims, the United States does not interpret references to 'detainees' and 'detention' in several paragraphs to refer to government action in the context of and associated with an armed conflict. For example, paragraph 15 incorrectly implies that the detention of enemy combatants in the context of a non-international armed conflict 'would normally amount to arbitrary detention as other effective measures addressing the threat, including the criminal justice system, would be available.' On the contrary, in both international and non-international armed conflicts, a State may detain enemy combatants consistent with the law of armed conflict until the end of hostilities. Similarly, to the extent paragraphs 15 and 66 are intended to address law-of-war detention in situations of armed conflict, it would be incorrect to state that there is a 'right to take proceedings before a court to enable the court to decide without delay on the lawfulness of detention' in all cases. In addition, to the extent the discussion of an individual right to compensation under Article 9 in paragraphs 49-52 is intended to extend to individuals detained in the context of an armed conflict, as a matter of international law, the rules governing available remedies for unlawful detention in the context of an armed conflict would be drawn from international humanitarian law.").

<sup>93</sup> *Coard, et al. v. United States*, Inter-American Commission on Human Rights, Organization of American States, Case 10.951, Report 109/99, ¶42 (Sept. 29, 1999) ("[I]n a situation of armed conflict, the test for assessing the observance of a particular right, such as the right to liberty, may, under given circumstances, be distinct from that applicable in a time of peace. For that reason, the standard to be applied must be deduced by reference to the applicable *lex specialis*."); *Juan Carlos Abella v. Argentina*, Inter-American Commission on Human Rights, Organization of American States, Case 11.137, OEA/Ser.L/V/II.98, ¶161 (Nov. 18, 1997) ("[T]he Commission must necessarily look to and apply definitional standards and relevant rules of humanitarian law as sources of authoritative guidance in its resolution of this and other kinds of claims alleging violations of the American Convention in combat situations."); *Legality of the Threat or Use of Nuclear Weapons*, Advisory Opinion, 1996 I.C.J. 226, 240 (¶25) ("In principle, the right not arbitrarily to be deprived of one's life applies also in hostilities.

On the other hand, during armed conflict, human rights treaties would clearly be controlling with respect to matters that are within their scope of application and that are not addressed by the law of war. For example, a time of war does not suspend the operation of the ICCPR with respect to matters within its scope of application. Therefore, as an illustration, participation in a war would in no way excuse a State Party to the ICCPR from respecting and ensuring the right and opportunity of every citizen to vote and to be elected at genuine periodic elections.<sup>94</sup>

1.6.3.2 *Different Views on the Applicability of Human Rights Treaties.* In conducting operations with coalition partners, it may be important to consider that some States may have different perspectives on the applicability of human rights treaties. Such differences may result from different legal interpretations or from the fact that the other State is a Party to different human rights treaties than the United States. For example, the European Court of Human Rights – as well as some European States – have construed certain obligations under the European Convention on Human Rights (ECHR) as applicable to their military forces abroad during occupation.<sup>95</sup>

1.6.3.3 *International Covenant on Civil and Political Rights (ICCPR).* The United States is a Party to the International Covenant on Civil and Political Rights (ICCPR).

The ICCPR creates obligations for a State with respect to persons within its territory and subject to its jurisdiction.<sup>96</sup> The United States has long interpreted the ICCPR not to apply abroad.<sup>97</sup> The inclusion of the reference to “within its territory” in Article 2(1) of the ICCPR

---

The test of what is an arbitrary deprivation of life, however, then falls to be determined by the applicable *lex specialis*, namely, the law applicable to armed conflict which is designed to regulate the conduct of hostilities.”).

<sup>94</sup> *Fourth Periodic Report of the United States of America to the United Nations Committee on Human Rights Concerning the International Covenant on Civil and Political Rights*, Dec. 30, 2011, ¶506 (“With respect to the application of the Covenant and the international law of armed conflict (also referred to as international humanitarian law or ‘IHL’), the United States has not taken the position that the Covenant does not apply ‘in time of war.’ Indeed, a time of war does not suspend the operation of the Covenant to matters within its scope of application. To cite but two obvious examples from among many, a State Party’s participation in a war would in no way excuse it from respecting and ensuring rights to have or adopt a religion or belief of one’s choice or the right and opportunity of every citizen to vote and to be elected at genuine periodic elections.”).

<sup>95</sup> *Case of Al-Skeini and Others v. The United Kingdom*, ECtHR, 55721/07, ¶149 (Jul. 7, 2011) (“It can be seen, therefore, that following the removal from power of the Ba’ath regime and until the accession of the Interim Government, the United Kingdom (together with the United States) assumed in Iraq the exercise of some of the public powers normally to be exercised by a sovereign government. In particular the United Kingdom assumed authority and responsibility for the maintenance of security in South East Iraq. In these exceptional circumstances the Court considers that the United Kingdom, through its soldiers engaged in security operations in Basrah during the period in question, exercised authority and control over individuals killed in the course of such security operations so as to establish a jurisdictional link between the deceased and the United Kingdom for the purposes of Article 1 of the (ECHR).”).

<sup>96</sup> *International Covenant on Civil and Political Rights*, art. 2(1), Dec. 19, 1966, 999 UNTS 171, 173 (“Each State Party to the present Covenant undertakes to respect and to ensure to all individuals within its territory and subject to its jurisdiction the rights recognized in the present Covenant, without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.”).

<sup>97</sup> *See, e.g.*, U.N. Human Rights Committee, Summary Record of the 1405th Meeting, U.N. Doc. CCPR/C/SR.1405 6-7 (¶20) (Apr. 24, 1995) (“Klein had asked whether the United States took the view that the Covenant did not apply

was adopted as a result of a proposal made by U.S. delegate Eleanor Roosevelt – specifically to ensure that a State Party’s obligations would not apply to persons outside its territories, such as in occupied territory and leased territory.<sup>98</sup>

1.6.3.4 *Convention Against Torture*. The United States is a Party to the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.<sup>99</sup>

The Convention against Torture was not intended to supersede the prohibitions against torture already contained in customary international law and the 1949 Geneva Conventions or its Additional Protocols.<sup>100</sup> The law of war is the controlling body of law with respect to the conduct of hostilities and the protection of war victims. Nevertheless, a time of war does not suspend operation of the Convention Against Torture. The Convention Against Torture continues to apply even when a State is engaged in armed conflict.<sup>101</sup> For example, a state of war could not justify a State’s torture of individuals during armed conflict.<sup>102</sup>

In addition, where the text of the Convention Against Torture provides that obligations apply to a State Party in “any territory under its jurisdiction,” such obligations, including the obligations in Articles 2 and 16 to prevent torture and cruel, inhuman, or degrading treatment or punishment, extend to certain areas beyond the sovereign territory of the State Party, and more specifically to “all places that the State Party controls as a governmental authority.”<sup>103</sup>

---

to government actions outside the United States. The Covenant was not regarded as having extraterritorial application. In general, where the scope of application of a treaty was not specified, it was presumed to apply only within a party’s territory. Article 2 of the Covenant expressly stated that each State party undertook to respect and ensure the rights recognized ‘to all individuals within its territory and subject to its jurisdiction’. That dual requirement restricted the scope of the Covenant to persons under United States jurisdiction and within United States territory. During the negotiating history, the words ‘within its territory’ had been debated and were added by vote, with the clear understanding that such wording would limit the obligations to within a Party’s territory.”)

<sup>98</sup> Refer to § 11.1.2.6 (Occupation and the ICCPR and Other Human Rights Treaties).

<sup>99</sup> Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, Dec. 10, 1984, 1465 UNTS 85.

<sup>100</sup> Refer to § 8.2.1 (Protection Against Violence, Torture, and Cruel Treatment).

<sup>101</sup> Mary McLeod, Acting Legal Adviser, Department of State, *Opening Statement at 53rd Session of the U.N. Committee Against Torture*, Nov. 3 – 28, 2014, Nov. 12, 2014 (“Although the law of armed conflict is the controlling body of law with respect to the conduct of hostilities and the protection of war victims, a time of war does not suspend operation of the Convention Against Torture, which continues to apply even when a State is engaged in armed conflict. The obligations to prevent torture and cruel, inhuman, and degrading treatment and punishment in the Convention remain applicable in times of armed conflict and are reinforced by complementary prohibitions in the law of armed conflict.”).

<sup>102</sup> Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, art. 2(2), Dec. 10, 1984, 1465 UNTS 85, 114 (“No exceptional circumstances whatsoever, whether a state of war or a threat of war, internal political instability or any other public emergency, may be invoked as a justification of torture.”).

<sup>103</sup> Mary McLeod, Acting Legal Adviser, Department of State, *Opening Statement at 53rd Session of the U.N. Committee Against Torture*, Nov. 3 – 28, 2014, Nov. 12, 2014 (“In brief, we understand that where the text of the Convention provides that obligations apply to a State Party in ‘any territory under its jurisdiction,’ such obligations, including the obligations in Articles 2 and 16 to prevent torture and cruel, inhuman or degrading treatment or punishment, extend to certain areas beyond the sovereign territory of the State Party, and more specifically to ‘all places that the State Party controls as a governmental authority.’ We have determined that the United States

1.6.4 Just War Tradition. The Just War Tradition describes customs, ethical codes, and moral teachings associated with warfare that military thinkers and philosophers have developed over centuries to seek the moral justification of and the limitations to war.<sup>104</sup>

The Just War Tradition provides part of the philosophical foundation for the modern law of war and has considered both *jus ad bellum* and *jus in bello*. The Just War Tradition developed criteria or principles that have provided the foundation for modern *jus ad bellum* rules.<sup>105</sup> Similarly, law of war treaties that provide *jus in bello* rules, such as the 1949 Geneva Conventions, are also rooted in the Just War Tradition. The Just War Tradition remains relevant for decisions to employ U.S. military forces and in warfighting.<sup>106</sup>

1.6.5 Rules of Engagement (ROE). *Rules of engagement* (ROE) have been defined as “[d]irectives issued by competent military authority that delineate the circumstances and limitations under which United States forces will initiate and/or continue combat engagement with other forces encountered.”<sup>107</sup> ROE are used by States to tailor the rules for the use of force to the circumstances of a particular operation.<sup>108</sup>

---

currently exercises such control at the U.S. Naval Station at Guantanamo Bay, Cuba, and with respect to U.S. registered ships and aircraft.”).

<sup>104</sup> WILLIAM O’BRIEN, *THE CONDUCT OF JUST AND LIMITED WAR* 4 (1981) (“The just-war tradition begins with the efforts of St. Augustine to justify Christian participation in Roman wars. From this foundation, St. Thomas Aquinas and other Scholastic thinkers developed the Scholastic just-war doctrine. This doctrine reached its mature form by the time of the writings of Vitoria and Suarez in the sixteenth and seventeenth centuries. Various Protestant moralists and secular writers dealt with just-war issues during the Reformation, but by the eighteenth century just-war doctrine was becoming a curiosity that was not taken seriously. It remained for the twentieth century reaction against total war to spark renewed studies in the just-war tradition.”).

<sup>105</sup> Refer to § 1.11.1 (*Jus ad Bellum* Criteria).

<sup>106</sup> See, e.g., Barack Obama, *Remarks on Accepting the Nobel Peace Prize in Oslo*, Dec. 10, 2009, 2009-II PUBLIC PAPERS OF THE PRESIDENTS 1799 (“And over time, as codes of law sought to control violence within groups, so did philosophers and clerics and statesmen seek to regulate the destructive power of war. The concept of a just war emerged, suggesting that war is justified only when certain conditions were met: if it is waged as a last resort or in self-defense; if the force used is proportional; and if, whenever possible, civilians are spared from violence.”); George H. W. Bush, *Remarks at the Annual Convention of the National Religious Broadcasters*, Jan. 28, 1991, 1991-I PUBLIC PAPERS OF THE PRESIDENTS 70 (“Nowhere is this more true than in the Persian Gulf where -- despite protestations of Saddam Hussein -- it is not Iraq against the United States, it’s the regime of Saddam Hussein against the rest of the world. Saddam tried to cast this conflict as a religious war, but it has nothing to do with religion per se. It has, on the other hand, everything to do with what religion embodies: good versus evil, right versus wrong, human dignity and freedom versus tyranny and oppression. The war in the Gulf is not a Christian war, a Jewish war, or a Moslem war; it is a just war. And it is a war with which good will prevail.”).

<sup>107</sup> JOINT PUBLICATION 1-04, *Legal Support to Military Operations*, GL-3 (Aug. 17, 2011) (“**rules of engagement**. Directives issued by competent military authority that delineate the circumstances and limitations under which United States forces will initiate and/or continue combat engagement with other forces encountered. Also called **ROE**.”).

<sup>108</sup> For example, Juan Carlos Gomez, *Twenty-First-Century Challenges: The Use of Military Forces to Combat Criminal Threats*, 88 INTERNATIONAL LAW STUDIES 279, 285-86 (2012) (“There must be clear, understandable rules provided to military forces on the circumstances under which force may be used and the type and degree of that force. This is dependent on the mission assigned to the forces. In Colombia, two differently colored cards are used. A blue card is used when the military unit is engaged in a law enforcement mission. The rules on the blue card are based on HRL. They provide for the use of force only when no other option is available to accomplish the mission

ROE reflect legal, policy, and operational considerations, and are consistent with the international law obligations of the United States, including the law of war.<sup>109</sup> ROE may restrict actions that would be lawful under the law of war, but may not permit actions prohibited by the law of war. States have used ROE as part of the implementation of their law of war obligations during military operations.<sup>110</sup>

1.6.6 Code of Conduct for U.S. Armed Forces. The Code of Conduct is a moral guide for U.S. forces to govern their conduct in resisting capture and their actions in the event they fall into hostile hands.<sup>111</sup> The Code of Conduct was developed after the Korean War and was promulgated by Executive Order.<sup>112</sup> The Code of Conduct is consistent with the law of war obligations of the United States, including obligations in the GPW.<sup>113</sup>

## 1.7 TREATIES

Treaties are generally defined as international agreements concluded between States in written form and governed by international law.<sup>114</sup> Under international law, a treaty is binding upon States that are Parties to it.<sup>115</sup>

The United States is a Party to a number of law of war treaties.<sup>116</sup> For many years, the Department of State has published annually a listing of treaties and other international agreements in force for the United States. This publication has provided helpful information about such treaties, including the date of U.S. ratification and a listing of other Parties to each treaty.

---

and in self-defense of the person and others. The red card is used in operations against military objectives. These cards are based on IHL and permit the offensive use of force, including lethal force if demanded by military necessity.”).

<sup>109</sup> J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Senator Edward Kennedy, Sept. 22, 1972, *reprinted in* 67 AJIL 124 (1973) (“With reference to your inquiry concerning the rules of engagement governing American military activity in Indochina, you are advised that rules of engagement are directives issued by competent military authority which delineate the circumstances and limitations under which United States Forces will initiate and/or continue combat engagement with the enemy. These rules are the subject of constant review and command emphasis. They are changed from time to time to conform to changing situations and the demands of military necessity. One critical and unchanging factor is their conformity to existing international law as reflected in the Hague Conventions of 1907 and the Geneva Conventions of 1949, as well as with the principles of customary international law of which UNGA Resolution 2444 (XXIII) is deemed to be a correct restatement.”).

<sup>110</sup> *Refer to* § 5.1.2 (Implementation of Law of War Obligations in the Conduct of Hostilities During Military Operations).

<sup>111</sup> *Refer to* § 9.39 (Code of Conduct for U.S. Armed Forces).

<sup>112</sup> *Refer to* § 9.39.2 (Background on the U.S. Code of Conduct).

<sup>113</sup> *Refer to* § 9.39.1 (Text of the Code of Conduct and Discussion).

<sup>114</sup> *Consider, e.g.,* VCLT art. 1(a) (“‘[T]reaty’ means an international agreement concluded between States in written form and governed by international law, whether embodied in a single instrument or in two or more related instruments and whatever its particular designation;”).

<sup>115</sup> *Refer to* § 1.10.1.1 (Legal Force of Treaties Among States).

<sup>116</sup> *Refer to* § 19.2.1 (Law of War Treaties to Which the United States Is a Party).

1.7.1 Treaties – Notes on Terminology. Treaties may be titled or referred to by several other terms in addition to “treaty” – including convention, protocol, or agreement. In the context of the law of war, “protocol” often refers to an agreement that supplements or updates an existing agreement.

1.7.1.1 “Treaties” Under U.S. Constitutional Law. Under the Constitution, a “treaty” must receive the advice and consent of the Senate before U.S. ratification or accession. Certain international agreements, such as Executive agreements, are not classified as “treaties” for the purposes of this requirement, although they may be characterized as “treaties” for the purposes of international law and impose obligations upon the United States.<sup>117</sup>

1.7.2 Reservations to Treaties. A State may limit the application of provisions of a treaty by reservation upon ratification of the treaty as long as the treaty does not prohibit such reservations and the reservation is compatible with the object and purpose of the treaty.<sup>118</sup> For example, the United States has taken a reservation to certain provisions of CCW Protocol III on Incendiary Weapons.<sup>119</sup> On the other hand, for example, the Chemical Weapons Convention expressly prohibits reservations to the Convention and prohibits reservations to the Convention’s Annexes that are incompatible with its object and purpose.<sup>120</sup>

1.7.3 Withdrawal From Treaties. Under certain circumstances, States may withdraw from treaties.<sup>121</sup> Some law of war and arms control treaties specify the conditions under which Parties may withdraw from them.<sup>122</sup> Even upon denunciation of a treaty, States remain bound by

---

<sup>117</sup> See, e.g., *Weinberger v. Rossi*, 456 U.S. 25, 29-30 (1982) (“The word ‘treaty’ has more than one meaning. Under principles of international law, the word ordinarily refers to an international agreement concluded between sovereigns, regardless of the manner in which the agreement is brought into force. Under the United States Constitution, of course, the word ‘treaty’ has a far more restrictive meaning. Article II, §2, cl. 2, of that instrument provides that the President ‘shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur.’”) (internal citation omitted).

<sup>118</sup> Consider VCLT art. 19 (“A State may, when signing, ratifying, accepting, approving or acceding to a treaty, formulate a reservation unless: (a) the reservation is prohibited by the treaty; (b) the treaty provides that only specified reservations, which do not include the reservation in question, may be made; or (c) in cases not failing under subparagraphs (a) and (b), the reservation is incompatible with the object and purpose of the treaty.”). See also William P. Rogers, *Letter of Submittal*, Oct. 18, 1971, MESSAGE FROM THE PRESIDENT TRANSMITTING THE VCLT 2 (“Part 2 of Section II sets forth the rules on reservations to treaties (Articles 19-23). The articles reflect flexible current treaty practice with regard to multilateral treaties as generally followed since World War II. The earlier traditional rule on reservations had been that in order for a State to become party to a multilateral treaty with a reservation the unanimous consent of the other parties was required. That rule has given way in practice to a more flexible approach particularly after the International Court of Justice in 1951 handed down its Advisory Opinion on Reservations to the Genocide Convention.”).

<sup>119</sup> Refer to § 6.14.3.2 (U.S. Reservation to CCW Protocol III on Incendiary Weapons).

<sup>120</sup> Refer to § 19.22 (Chemical Weapons Convention).

<sup>121</sup> Consider VCLT art. 54 (“The termination of a treaty or the withdrawal of a party may take place: (a) in conformity with the provisions of the treaty; or (b) at any time by consent of all the parties after consultation with the other contracting States.”).

<sup>122</sup> See, e.g., CCW art. 9(1) (“Any High Contracting Party may denounce this Convention or any of its annexed Protocols by so notifying the Depository.”); GWS art. 63 (“Each of the High Contracting Parties shall be at liberty to denounce the present Convention.”).

customary international law, including law of war principles.<sup>123</sup>

1.7.4 Use of Certain Subsequent Practice in Treaty Interpretation. Certain subsequent State practice in the application of a treaty provision may be taken into account when interpreting that provision.<sup>124</sup> Subsequent State practice is important as an element of interpretation when it constitutes objective evidence of the understanding of the Parties as to the meaning of the treaty.<sup>125</sup> For example, the subsequent practice of States in the application of the GWS-Sea's requirements for hospital ships has clarified that States may use hospital ships with the capability to conduct encrypted communications.<sup>126</sup>

1.7.5 Treaties and Domestic Implementing Legislation. States may enact domestic legislation to implement treaty provisions. Although such implementing legislation is not international law, it may reflect a State's interpretation of those provisions.<sup>127</sup>

A State's domestic implementing legislation, or lack of such legislation, however, does not justify that State's noncompliance with an international obligation as a matter of international law.<sup>128</sup>

## 1.8 CUSTOMARY INTERNATIONAL LAW

*Customary international law* results from a general and consistent practice of States that

---

<sup>123</sup> Refer to § 19.8.3 (Martens Clause).

<sup>124</sup> Consider VCLT art. 31(3) ("There shall be taken into account, together with the context: (b) Any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation;"). See also I RESTATEMENT (THIRD) OF FOREIGN RELATIONS LAW OF THE UNITED STATES 199 (§325(2)) (1987) ("Any subsequent agreement between the parties regarding the interpretation of the agreement, and subsequent practice between the parties in the application of the agreement, are to be taken into account in its interpretation."); I RESTATEMENT (THIRD) OF FOREIGN RELATIONS LAW OF THE UNITED STATES 203 (§325, comment c) (1987) (This "conforms to United States modes of interpretation, affirming that subsequent practice of the parties can be taken into account in interpreting international agreements.").

<sup>125</sup> See II YEARBOOK OF THE INTERNATIONAL LAW COMMISSION 221 (¶15) (1966) ("The importance of such subsequent practice in the application of the treaty, as an element of interpretation, is obvious; for it constitutes objective evidence of the understanding of the parties as to the meaning of the treaty. Recourse to it as a means of interpretation is well-established in the jurisprudence of international tribunals."). See also Case Concerning Kasikili/Sedudu Island (Botswana v. Namibia), Judgment, 1999 I.C.J. 1045, 1075-76 (¶49) (same); Russian Claim for Interest on Indemnities (The Russian Indemnity Case), Russia/Turkey, 11 R.I.A.A. 421, 433 (1912) Permanent Court of Arbitration Unofficial English Translation, 3 ("Whereas the fulfilment of obligations is, between States as between individuals, the surest commentary on the meaning of these obligations;"); Case Concerning The Temple of Preah Vihear (Cambodia v. Thailand), Merits, Judgment, 1962 I.C.J. 6, 34 (The map "was accepted by the Parties in 1908 and thereafter as constituting the result of the interpretation given by the two Governments to the delimitation which the Treaty itself required. In other words, the Parties at that time adopted an interpretation of the treaty settlement which caused the map line, in so far as it may have departed from the line of the watershed, to prevail over the relevant clause of the treaty.").

<sup>126</sup> Refer to § 7.12.2.7 (Use of Secret Codes for Communication).

<sup>127</sup> See United States v. Navarre, 173 U.S. 77, 79 (1899) (noting that "[i]f the meaning of the treaty was doubtful, it was competent for Congress to resolve the doubt" in its enactment of legislation).

<sup>128</sup> Refer to § 1.10.1.4 (Force of International Law Notwithstanding a State's Domestic Law).

is followed by them from a sense of legal obligation (*opinio juris*).<sup>129</sup> Customary international law is an unwritten form of law in the sense that it is not created through a written agreement by States.

Customary international law is generally binding on all States, but States that have been persistent objectors to a customary international law rule during its development are not bound by that rule.<sup>130</sup>

Assessing whether State practice and *opinio juris* have resulted in a rule of customary international law may be a difficult inquiry.<sup>131</sup>

1.8.1 Relationship Between Treaties and Customary International Law. Treaty provisions may, *inter alia*: (1) not reflect customary international law; (2) reflect customary international law; or (3) be based on customary law, but not precisely reflect it.

In most cases, treaty provisions do not reflect customary international law. For example, AP I's provisions changing which persons would be entitled to the privileges of combatant status were viewed as novel at the time of the adoption of AP I and as not reflecting customary international law.<sup>132</sup>

In some cases, a treaty provision may reflect customary international law. The rule reflected in the treaty would thus be understood to be binding, even if the treaty provision was not applicable, because the rule maintains a separate existence as a customary norm.<sup>133</sup> For example, provisions of Hague IV and the Hague IV Regulations have been found to reflect customary international law.<sup>134</sup> Law of war treaties have specified that customary law and

---

<sup>129</sup> See I RESTATEMENT (THIRD) OF FOREIGN RELATIONS LAW OF THE UNITED STATES 24 (§102(2)) (1987) (“Customary international law results from a general and consistent practice of states followed by them from a sense of legal obligation.”).

<sup>130</sup> Refer to § 1.10.1.2 (Legal Force of Customary International Law Among States).

<sup>131</sup> Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 421-22 (1987) (“Having described the reasons why I believe that the topic of this Workshop is important and very relevant to decisions currently being taken with respect to Protocol I in the United States and other governments, it is of course much more difficult to say exactly which of the rules contained in the Protocol currently are in fact a part of customary law. As I am sure you all appreciate quite well, there is no clear line drawn in the dust for all to see between those principles that are now customary law and those which have not yet attained the degree of acceptance and observance that might make them customary law. Instead, there are degrees of acceptance and degrees of observance, and the judgment as to what degree of each is sufficient for establishment as customary law is inherently subjective and hard to define precisely.”).

<sup>132</sup> Refer to, e.g., § 4.6.1.2 (AP I and the GPW 4A(2) Conditions).

<sup>133</sup> Military and Paramilitary Activities in and Against Nicaragua (Nicaragua v. United States), Merits, Judgment, 1986 I.C.J. 14, 95 (¶178) (“[E]ven if two norms belonging to two sources of international law appear identical in content, and even if the States in question are bound by these rules both on the level of treaty-law and on that of customary international law, these norms retain a separate existence.”).

<sup>134</sup> Refer to § 19.8.2.1 (Hague IV and Customary International Law).

principles continue to apply even if the treaty is not applicable.<sup>135</sup>

A treaty provision may be based on an underlying principle that is an accepted part of customary law, but the precise language of the treaty provision may not reflect customary international law because there may be considerable disagreement as to the precise statement of that underlying principle.<sup>136</sup> For example, the United States has expressed support for the customary principle on which Article 51(3) of AP I is based, but has noted that Article 51(3) of AP I, as drafted, does not reflect customary international law.<sup>137</sup>

1.8.2 State Practice. One part of determining whether a purported rule is customary international law is to analyze whether there is a general and consistent practice of States that supports the purported rule.

An analysis of State practice to determine whether a purported rule reflects the customary international law of war should include consideration of, *inter alia*: (1) whether the State practice is extensive and virtually uniform; (2) actual operational practice; (3) the practice of specially affected States; and (4) contrary practice.

1.8.2.1 Extensive and Virtually Uniform. State practice should be sufficiently dense and consistent to meet the “extensive and virtually uniform” standard generally required for existence of a customary rule.<sup>138</sup>

1.8.2.2 Actual Operational Practice. An analysis of State practice should include an analysis of actual operational practice by States during armed conflict. Although manuals or other official statements may provide important indications of State behavior, they cannot

---

<sup>135</sup> Refer to § 19.8.3 (Martens Clause).

<sup>136</sup> Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 422 (1987) (“In addition, it may be possible in many cases to say that a general principle is an accepted part of customary law, but to have considerable disagreement as to the precise statement of that general principle.”).

<sup>137</sup> Refer to § 5.8.1.2 (AP I, Article 51(3) Provision on Direct Participation in Hostilities).

<sup>138</sup> See, e.g., Harold Koh, Legal Adviser, Department of State, *Responses to Questions Submitted by Senator Richard G. Lugar, in Libya and War Powers: Hearing Before the Committee on Foreign Relations, U.S. Senate*, 112th Congress, First Session, 53, 57 (Jun. 28, 2011) (“Determining that a principle has become customary international law requires a rigorous legal analysis to determine whether such principle is supported by a general and consistent practice of states followed by them from a sense of legal obligation. Although there is no precise formula to indicate how widespread a practice must be, one frequently used standard is that state practice must be extensive and virtually uniform, including among States particularly involved in the relevant activity (i.e., specially affected States.”); *North Sea Continental Shelf Cases* (Federal Republic of Germany v. Denmark; Federal Republic of Germany v. Netherlands), 1969 I.C.J. 3, 43 (¶74) (“Although the passage of only a short period of time is not necessarily, or of itself, a bar to the formation of a new rule of customary international law on the basis of what was originally a purely conventional rule, an indispensable requirement would be that within the period in question, short though it might be, State practice, including that of States whose interests are specially affected, should have been both extensive and virtually uniform in the sense of the provision invoked; and should moreover have occurred in such a way as to show a general recognition that a rule of law or legal obligation is involved.”).

replace a meaningful assessment of operational State practice.<sup>139</sup>

1.8.2.3 *Specially Affected States*. The practice of “States whose interests are specially affected,” *e.g.*, States with a distinctive history of participation in the relevant matter, must support the purported rule.<sup>140</sup> States that have had a wealth of experience, or that have otherwise had significant opportunities to develop a carefully considered military doctrine, may be expected to have contributed a greater quantity and quality of State practice relevant to the law of war than States that have not.

For example, “specially affected States” could include, depending upon the relevant matter, the nuclear powers, other major military powers, and occupying or occupied States.<sup>141</sup> As a case in point, the United Kingdom has been viewed as a specially affected State with respect to the law of the sea.<sup>142</sup>

1.8.2.4 *Contrary Practice*. Evidence of contrary practice, *i.e.*, the practice of States that does not support the purported rule, must be considered in assessing whether that rule

---

<sup>139</sup> U.S. RESPONSE TO ICRC CIHL STUDY 515 (“Second, we are troubled by the type of practice on which the Study has, in too many places, relied. Our initial review of the State practice volumes suggests that the Study places too much emphasis on written materials, such as military manuals and other guidelines published by States, as opposed to actual operational practice by States during armed conflict. Although manuals may provide important indications of State behavior and *opinio juris*, they cannot be a replacement for a meaningful assessment of operational State practice in connection with actual military operations. We also are troubled by the extent to which the Study relies on non-binding resolutions of the General Assembly, given that States may lend their support to a particular resolution, or determine not to break consensus in regard to such a resolution, for reasons having nothing to do with a belief that the propositions in it reflect customary international law.”).

<sup>140</sup> See U.S. RESPONSE TO ICRC CIHL STUDY 517 endnote 3 (“Not every State that has participated in an armed conflict is ‘specially affected;’ such States do generate salient practice, but it is those States that have a distinctive history of participation that merit being regarded as ‘specially affected.’”); *Written Statement of the Government of the United States of America*, 28-29, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“Evidence of a customary norm requires indication of ‘extensive and virtually uniform’ State practice, including States whose interests are ‘specially affected.’ ... With respect to the use of nuclear weapons, customary law could not be created over the objection of the nuclear-weapon States, which are the States whose interests are most specially affected.”).

<sup>141</sup> Theodor Meron, *The Continuing Role of Custom in the Formation of International Humanitarian Law*, 90 AJIL 238, 249 (1996) (“A broader question, however, concerns the degree of weight to be assigned to the practice of various states in the formation of the international customary law of war. I find it difficult to accept the view, sometimes advanced, that all states, whatever their geographical situation, military power and interests, *inter alia*, have an equal role in this regard. Belligerency is only one factor here. The practice and opinion of Switzerland, for example, as a neutral state, surely have more to teach us about assessment of customary neutrality law than the practice of states that are not committed to the policy of neutrality and have not engaged in pertinent national practice. The practice of ‘specially affected states’ -such as nuclear powers, other major military powers, and occupying and occupied states-which have a track record of statements, practice and policy, remains particularly telling. I do not mean to denigrate state equality, but simply to recognize the greater involvement of some states in the development of the law of war, not only through operational practice but through policies expressed, for example, in military manuals.”).

<sup>142</sup> See, *e.g.*, *The Paquete Habana*, 175 U.S. 677, 719 (1900) (Fuller, J., dissenting) (noting that “[i]t is difficult to conceive of a law of the sea of universal obligation to which Great Britain has not acceded.”).

exists as a rule of customary international law.<sup>143</sup>

In addition, the persistent objection of States may be relevant after the formation of that rule by preventing the application of that rule to States that have objected to that rule during its development.<sup>144</sup>

1.8.3 *Opinio Juris*. In addition to analyzing State practice, one must determine whether the State practice results from a sense of legal obligation (*opinio juris*) or merely reflects States' policy or practical interests. *Opinio juris* cannot simply be inferred from consistent State practice, which may exist for reasons other than *opinio juris*.<sup>145</sup> For example, the fact that nuclear weapons have not been used to conduct attacks during armed conflict since 1945 does not reflect a prohibition in customary international law against their use because such lack of use has not resulted from *opinio juris*.<sup>146</sup>

1.8.3.1 *Potential Sources of Opinio Juris*. It may be difficult to find evidence of *opinio juris*, and care should be exercised in assessing whether a source reflects *opinio juris* on the part of a State. For example, treaty provisions do not necessarily reflect *opinio juris*.<sup>147</sup> Similarly, rather than indicating a position expressed out of a sense of a customary legal

---

<sup>143</sup> For example, Legality of the Threat or Use of Nuclear Weapons, Advisory Opinion, 1996 I.C.J. 311, 311-12 (Dissenting Opinion of Vice-President Schwebel) (“One way of surmounting the antinomy between practice and principle would be to put aside practice. That is what those who maintain that the threat or use of nuclear weapons is unlawful in all circumstances do. ... State practice demonstrates that nuclear weapons have been manufactured and deployed by States for some 50 years; that in that deployment inheres a threat of possible use; and that the international community, by treaty and through action of the United Nations Security Council, has, far from proscribing the threat or use of nuclear weapons in all circumstances, recognized in effect or in terms that in certain circumstances nuclear weapons may be used or their use threatened.”).

<sup>144</sup> Refer to § 1.8.4 (Objection During Development).

<sup>145</sup> U.S. RESPONSE TO ICRC CIHL STUDY 515 (“Although the same action may serve as evidence both of State practice and *opinio juris*, we do not agree that *opinio juris* simply can be inferred from practice. Both elements instead must be assessed separately in order to determine the presence of a norm of customary international law.”).

<sup>146</sup> See Legality of the Threat or Use of Nuclear Weapons, Advisory Opinion, 1996 I.C.J. 226, 253-54 (¶¶65-67) (“States which hold the view that the use of nuclear weapons is illegal have endeavoured to demonstrate the existence of a customary rule prohibiting this use. They refer to a consistent practice of non-utilization of nuclear weapons by States since 1945 and they would see in that practice the expression of an *opinio juris* on the part of those who possess such weapons. Some other States, which assert the legality of the threat and use of nuclear weapons in certain circumstances, invoked the doctrine and practice of deterrence in support of their argument. They recall that they have always, in concert with certain other States, reserved the right to use those weapons in the exercise of the right to self-defence against an armed attack threatening their vital security interests. In their view, if nuclear weapons have not been used since 1945, it is not on account of an existing or nascent custom but merely because circumstances that might justify their use have fortunately not arisen. The Court does not intend to pronounce here upon the practice known as the ‘policy of deterrence.’ It notes that it is a fact that a number of States adhered to that practice during the greater part of the Cold War and continue to adhere to it. Furthermore, the members of the international community are profoundly divided on the matter of whether non-recourse to nuclear weapons over the past 50 years constitutes the expression of an *opinio juris*. Under these circumstances the Court does not consider itself able to find that there is such an *opinio juris*.”).

<sup>147</sup> U.S. RESPONSE TO ICRC CIHL STUDY 515 (“One therefore must be cautious in drawing conclusions as to *opinio juris* from the practice of States that are parties to conventions, since their actions often are taken pursuant to their treaty obligations, particularly *inter se*, and not in contemplation of independently binding customary international law norms.”).

obligation, a State's military manual often recites requirements applicable to that State under treaties to which it is a Party, or provides guidance to its military forces for reasons of national policy.<sup>148</sup>

1.8.4 Objection During Development. Even if a rule otherwise reflects customary international law, the rule is not binding upon a State that has persistently objected to that rule during its development.<sup>149</sup> This principle is an accepted application of the traditional principle that international law essentially depends on the consent of States.<sup>150</sup>

## 1.9 SUBSIDIARY MEANS OF DETERMINING INTERNATIONAL LAW

As a subsidiary means, it may be helpful to consult judicial decisions and the teachings of the most highly qualified publicists of various nations in determining the applicable rules of international law. These means are subsidiary in the sense that they do not, in themselves, constitute sources of treaty or customary international law.

Discretion must be exercised in weighing sources, however, because sources vary significantly in their probative value. For example, the United States has said that it is not in a position to accept without further analysis the conclusions in a study on customary international humanitarian law published by the ICRC.<sup>151</sup>

### 1.9.1 Judicial Decisions. Judicial decisions have sometimes been used as a subsidiary

---

<sup>148</sup> U.S. RESPONSE TO ICRC CIHL STUDY 516 (“We are troubled by the Study’s heavy reliance on military manuals. We do not agree that *opinio juris* has been established when the evidence of a State’s sense of legal obligation consists predominately of military manuals. Rather than indicating a position expressed out of a sense of a customary legal obligation, in the sense pertinent to customary international law, a State’s military manual often (properly) will recite requirements applicable to that State under treaties to which it is a party. Reliance on provisions of military manuals designed to implement treaty rules provides only weak evidence that those treaty rules apply as a matter of customary international law in non-treaty contexts.”).

<sup>149</sup> See *Fisheries Case*, (United Kingdom v. Norway), Judgment, 1951 I.C.J. 116, 131 (“In these circumstances the Court deems it necessary to point out that although the ten-mile rule has been adopted by certain States both in their national law and in their treaties and conventions, and although certain arbitral decisions have applied it as between these States, other States have adopted a different limit. Consequently, the ten-mile rule has not acquired the authority of a general rule of international law. In any event the ten-mile rule would appear to be inapplicable as against Norway inasmuch as she has always opposed any attempt to apply it to the Norwegian coast.”); *Asylum Case* (Colombia v. Peru), 1950 I.C.J. 266, 277-78 (“The Court cannot therefore find that the Colombian Government has proved the existence of such a custom. But even if it could be supposed that such a custom existed between certain Latin-American States only, it could not be invoked against Peru which, far from having by its attitude adhered to it, has, on the contrary, repudiated it by refraining from ratifying the Montevideo Conventions of 1933 and 1939, which were the first to include a rule concerning the qualification of the offence in matters of diplomatic asylum.”). See also U.S. RESPONSE TO ICRC CIHL STUDY 529 endnote 38 (“We note that the Study raises doubts about the continued validity of the ‘persistent objector’ doctrine. Study, Vol. I, p. xxxix. The U.S. Government believes that the doctrine remains valid.”).

<sup>150</sup> I RESTATEMENT (THIRD) OF THE FOREIGN RELATIONS LAW OF THE UNITED STATES 32 (§102, Reporters’ Note 2) (1987) (“That a rule of customary law is not binding on any state indicating its dissent during the development of the rule (Comment *d*) is an accepted application of the traditional principle that international law essentially depends on the consent of states.”).

<sup>151</sup> Refer to § 19.25 (2005 ICRC Study on Customary International Humanitarian Law).

means of determining the rules of international law.<sup>152</sup>

Judicial decisions are generally consulted as only persuasive authority because a judgment rendered by an international court generally binds only the parties to the case in respect of that particular case.<sup>153</sup> The legal reasoning underlying the decisions of the International Court of Justice is not binding on States.<sup>154</sup> Similarly, the decisions of the International Criminal Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda cannot, as a strictly legal matter, “bind” other courts.<sup>155</sup>

The legal principle of *stare decisis* does not generally apply between international tribunals, *i.e.*, customary international law does not require that one international tribunal follow the judicial precedent of another tribunal in dealing with questions of international law.<sup>156</sup> Moreover, depending on the international tribunal, a tribunal may not be bound by its prior decisions. Some international courts, however, may adhere to their own prior decisions in

---

<sup>152</sup> ICJ STATUTE art. 38(1) (“The Court, whose function is to decide in accordance with international law such disputes as are submitted to it, shall apply: ... d. subject to the provisions of Article 59, judicial decisions ... as subsidiary means for the determination of rules of law.”).

<sup>153</sup> *See, e.g.*, ICJ STATUTE art. 59 (“The decision of the Court has no binding force except between the parties and in respect of that particular case.”).

<sup>154</sup> John B. Bellinger, III, Legal Adviser, Department of State, 2006 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1024 (“We believe that these concerns were largely borne out in the advisory opinion rendered by the Court. In practice, the opinion has made little meaningful contribution to efforts to resolve issues between the Israelis and Palestinians. Also, the Court’s opinion is open to criticism on its treatment of both factual and legal issues, in some cases due more to process than to any fault on the part of the Court. For example, the fact that the General Assembly had already declared itself on many of the issues, risks creating the impression that the Court was being used to advance a particular set of political claims. Also of concern are efforts in some quarters to suggest that aspects of the Court’s advisory opinion, such as that relating to the extraterritorial application of the International Covenant on Civil and Political Rights, have binding force on member states in contexts that go beyond those addressed in the advisory opinion. This of course, is not the case. Under the ICJ statute, states are bound only by the decisions—and not by the Court’s reasoning underlying those decisions—in contentious cases to which they are parties, and advisory opinions have no binding force at all, but rather serve to provide guidance on legal questions to the UN organ or specialized agency requesting them.”).

<sup>155</sup> Harold Hongju Koh, Legal Adviser, Department of State, *Remarks on international criminal justice at the Vera Institute of Justice in New York and at Leiden University, Campus The Hague*, 2012 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 61, 67 (“The ICTY and ICTR began developing a modern jurisprudence of criminal liability that was based on existing law as applied to a modern ethnic conflict. One of the ICTY’s early accomplishments was the Dusko Tadic case, which involved a relatively low-level offender who -- had he been caught only a few years later -- would have been referred to Bosnia for domestic prosecution. The Tadic decision provided a reasoned basis for the seminal conclusions that (1) the UN Security Council had the authority to set up a criminal court under Chapter VII of the UN Charter; (2) the tribunal’s jurisdiction extended to war crimes committed in the course of a non-international armed conflict; and (3) Tadic could be convicted for his association with a small group of offenders, articulating the concept of joint criminal enterprise (“JCE”) that later became a central feature of the ICTY’s work. ... The post-WWII tribunals had largely ignored sexual violence, but the ICTY and ICTR situated the issue within the existing law of war crimes, crimes against humanity, and genocide. Although these decisions cannot, as a strictly legal matter ‘bind’ other courts, there is no doubt that the jurisprudence of the ICTY and ICTR has been influential in the broader development of international criminal law.”).

<sup>156</sup> I RESTATEMENT (THIRD) OF FOREIGN RELATIONS LAW OF THE UNITED STATES 36-37 (§103, comment b) (1987) (“That provision [Article 59 of the Statute of the ICJ] reflects the traditional view that there is no *stare decisis* in international law.”).

resolving a case absent a sufficiently persuasive reason to reconsider the point of law.<sup>157</sup>

1.9.2 Legal Writings of Highly Qualified Publicists. The writings “of the most highly qualified publicists” have sometimes been used as a subsidiary means of determining the rules of international law.<sup>158</sup> For example, classical publicists, such as Hugo Grotius and Emmerich de Vattel, and recognized scholars, such as Francis Lieber and Hersch Lauterpacht, have been widely cited and relied upon as practitioners have sought to interpret and apply the law of war.

The standard for whose writings should be relied upon is high, and writings are only as authoritative as the evidence upon which they are based. The writings should only be relied upon to the degree they accurately reflect existing law, rather than the author’s views about what the law should be.<sup>159</sup>

## 1.10 LEGAL FORCE OF THE LAW OF WAR

This section addresses the technical legal force of the law of war under international and U.S. domestic law. As a matter of policy, DoD personnel may be required to adhere to law of war rules, even where the rules do not technically apply as a matter of law.<sup>160</sup>

1.10.1 Legal Force of the Law of War Under International Law. The technical force of a law of war rule depends on whether it takes the form of a treaty or customary international law.

1.10.1.1 Legal Force of Treaties Among States. Under international law, every treaty in force is binding upon the Parties to it and must be performed by them in good faith.<sup>161</sup> A treaty enters into force for a State after, *inter alia*, it has provided its consent to be bound by the treaty.<sup>162</sup> In some cases, the terms of a treaty may cause it to expire, and in other cases,

---

<sup>157</sup> See, e.g., Prosecutor v. Aleksovski, ICTY Appeals Chamber, IT-95-14/1-A, *Judgment*, ¶¶107-109 (Mar. 24, 2000) (“[I]n the interests of certainty and predictability, the Appeals Chamber should follow its previous decisions, but should be free to depart from them for cogent reasons in the interests of justice. ... It is necessary to stress that the normal rule is that previous decisions are to be followed, and departure from them is the exception. The Appeals Chamber will only depart from a previous decision after the most careful consideration has been given to it, both as to the law, including the authorities cited, and the facts.”).

<sup>158</sup> ICJ STATUTE art. 38(1) (“The Court, whose function is to decide in accordance with international law such disputes as are submitted to it, shall apply: ... d. subject to the provisions of Article 59, ... the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.”).

<sup>159</sup> See *The Paquete Habana*, 175 U.S. 677, 700 (1900) (“For this purpose, where there is no treaty, and no controlling executive or legislative act or judicial decision, resort must be had to the customs and usages of civilized nations; and, as evidence of these, to the works of jurists and commentators, who by years of labor, research and experience, have made themselves peculiarly well acquainted with the subjects of which they treat. Such works are resorted to by judicial tribunals, not for the speculations of their authors concerning what the law ought to be, but for trustworthy evidence of what the law really is.”).

<sup>160</sup> Refer to § 3.1.1 (DoD Practice of Applying Law of War Rules Even When Not Technically Applicable).

<sup>161</sup> Consider VCLT art. 26 (“Every treaty in force is binding upon the parties to it and must be performed by them in good faith.”).

<sup>162</sup> Consider VCLT art. 24 (“1. A treaty enters into force in such manner and upon such date as it may provide or as the negotiating States may agree. 2. Failing any such provision or agreement, a treaty enters into force as soon as consent to be bound by the treaty has been established for all the negotiating States. 3. When the consent of a State to be bound by a treaty is established on a date after the treaty has come into force, the treaty enters into force for

States may withdraw from a treaty.<sup>163</sup> In some cases, a reservation may also modify the obligations imposed by a treaty on that State.<sup>164</sup>

A treaty does not create either obligations or rights for a third State without its consent.<sup>165</sup> Thus, a treaty generally would not be binding on non-Parties to the treaty or create rights or obligations for a non-Party to the treaty with respect to a Party to the treaty. Instead, a treaty only creates law (*i.e.*, rights that may be invoked) as between the States that are Parties to it.<sup>166</sup>

1.10.1.2 *Legal Force of Customary International Law Among States.* The customary law of war generally binds all States. However, States that have objected to a customary international law rule during its development are not bound by that rule.<sup>167</sup>

1.10.1.3 *Predominately Inter-State Nature of International Obligations.* International obligations are generally viewed as running to other States, although individuals may have responsibility under international law.

Traditionally, international law has governed relations between States, although over time it has increasingly regulated the relationships between States and persons. Under the traditional view, a State's international law obligations run to other States, even when the obligations relate to an individual (*e.g.*, by protecting that individual), such that individuals' "place in international life depends largely on their status as nationals of states."<sup>168</sup> For example, the 1949 Geneva Conventions and the customary law of war do not provide a private right for individuals to claim compensation directly from a State for violations of the law of war; rather, such claims are made

---

that State on that date, unless the treaty otherwise provides. 4. The provisions of a treaty regulating the authentication of its text, the establishment of the consent of States to be bound by the treaty, the manner or date of its entry into force, reservations, the functions of the depositary and other matters arising necessarily before the entry into force of the treaty apply from the time of the adoption of its text."). *See also* DEPARTMENT OF THE ARMY PAMPHLET 27-161-1, *I International Law: Law of Peace*, ¶8-12 (Sept. 1, 1979) ("An international agreement is basically a contract between states, and elements of obligation akin to those found in municipal contract law are present. However, as discussed in Part I, a treaty is not a contract in the common law sense of an agreement requiring consideration. It is the *assent to be bound* and not reciprocity or *quid pro quo* that obligates the parties.").

<sup>163</sup> Refer to § 1.7.3 (Withdrawal From Treaties).

<sup>164</sup> Refer to § 1.7.2 (Reservations to Treaties).

<sup>165</sup> Consider VCLT art. 34 ("A treaty does not create either obligations or rights for a third State without its consent.").

<sup>166</sup> Case Concerning Certain German Interests in Polish Upper Silesia (Merits) (Germany v. Poland) 1925 P.C.I.J. (series A) No. 7, at 29 ("A treaty only creates law as between the States which are parties to it; in case of doubt, no rights can be deduced from it in favour of third States.").

<sup>167</sup> Refer to § 1.8.4 (Objection During Development).

<sup>168</sup> I RESTATEMENT (THIRD) OF FOREIGN RELATIONS LAW OF THE UNITED STATES 71 (1987). *See also* II RESTATEMENT (THIRD) OF FOREIGN RELATIONS LAW OF THE UNITED STATES 217 (§713, comment a) (1987) (explaining that in principle, state responsibility for injury to the nationals of other states "is to the state of the alien's nationality and gives that state a claim against the offending state. The claim derives from injury to an individual, but once espoused it is the state's claim, and can be waived by the state.").

by other States.<sup>169</sup>

International law has long prescribed certain rules regulating the conduct of individuals.<sup>170</sup> Under international law, there may be responsibility for individuals, apart from State responsibility.<sup>171</sup>

1.10.1.4 Force of International Law Notwithstanding a State's Domestic Law. A State's domestic law does not justify that State's noncompliance with an international obligation as a matter of international law.<sup>172</sup> Similarly, the fact that a State's domestic law does not provide for a penalty with respect to a violation of international law does not relieve a person from responsibility for that act under international law.<sup>173</sup>

1.10.2 Force of the Law of War Under U.S. Domestic Law. The specific legal force of a law of war rule under U.S. domestic law may depend on whether that rule takes the form of a self-executing treaty, non-self-executing treaty, or customary international law.

Longstanding DoD policy has been to require DoD personnel to comply with the law of war obligations of the United States.<sup>174</sup>

Even if a violation of a rule is not directly punishable under U.S. law, a variety of tools in U.S. domestic law may be used to enforce a law of war obligation of the United States. For example, a violation of a law of war obligation may be made punishable through implementation of the obligation in military instructions, regulations, and procedures.<sup>175</sup>

1.10.2.1 Force of Self-Executing and Non-Self-Executing Treaties Under U.S. Domestic Law. Under domestic law, treaties to which the United States is a Party are part of U.S. law.<sup>176</sup>

---

<sup>169</sup> Refer to § 18.16.4 (No Private Right to Compensation Under Customary International Law or the 1949 Geneva Conventions).

<sup>170</sup> See *Sosa v. Alvarez-Machain*, 542 U.S. 692, 715 (2004) (noting that international law has included “a body of judge-made law regulating the conduct of individuals situated outside domestic boundaries” and “rules binding individuals for the benefit of other individuals [that] overlapped with the norms of state relationships”).

<sup>171</sup> Refer to § 18.22.1 (Individual Criminal Responsibility for Acts Constituting Crimes Under International Law).

<sup>172</sup> Secretary of State Bayard, Instruction to Mr. Connery, charge to Mexico, Nov. 1, 1887, II MOORE'S DIGEST 235 (“[A] government can not appeal to its municipal regulations as an answer to demands for the fulfillment of international duties. Such regulations may either exceed or fall short of the requirements of international law, and in either case that law furnishes the test of the nation's liability and not its own municipal rules.”). Consider VCLT art. 27 (“A party may not invoke the provisions of its internal law as justification for its failure to perform a treaty. This rule is without prejudice to article 46.”).

<sup>173</sup> Refer to § 18.22.2 (Absence of Penalty Under Domestic Law Does Not Relieve a Person of Responsibility).

<sup>174</sup> Refer to § 18.1.1 (DoD Policy on Implementing and Enforcing the Law of War).

<sup>175</sup> Refer to § 18.7 (Instructions, Regulations, and Procedures to Implement and Enforce the Law of War).

<sup>176</sup> See U.S. CONSTITUTION art. VI (“This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be

The terms “self-executing” and “non-self-executing” may be used to explain how a treaty is to take effect in U.S. domestic law. A treaty may be classified as a self-executing treaty that “operates of itself, without the aid of any legislative provision,” or as a non-self-executing treaty that would require “that the Legislature must execute the contract before it can become a rule for the Court.”<sup>177</sup>

1.10.2.2 *Force of Customary International Law Under U.S. Domestic Law*. The customary law of war is part of U.S. law insofar as it is not inconsistent with any treaty to which the United States is a Party, or a controlling executive or legislative act.<sup>178</sup>

## 1.11 *JUS AD BELLUM*

The law of war has been categorized into *jus ad bellum* (law concerning the resort to force) and *jus in bello* (law concerning conduct during war).<sup>179</sup> Although *jus ad bellum* is an essential part of the law of war to consider in the political process of whether to resort to military force, this manual focuses on *jus in bello*.<sup>180</sup> Although *jus in bello* rules generally operate independently of whether a side has comported with *jus ad bellum* in the resort to force, parts of *jus ad bellum* are relevant to *jus in bello*.<sup>181</sup>

This section provides a brief overview of some basic aspects of *jus ad bellum*. *Jus ad bellum* issues might raise questions of national policy that, in the Executive Branch, would be

---

the supreme law of the land; and the judges in every state shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.”).

<sup>177</sup> Foster & Elam v. Neilson 27 U.S. 253, 314 (1829) (Marshall, C.J.). See also Whitney v. Robertson, 124 U.S. 190, 194 (1888) (“A treaty is primarily a contract between two or more independent nations, and is so regarded by writers on public law. For the infraction of its provisions a remedy must be sought by the injured party through reclamations upon the other. When the stipulations are not self-executing, they can only be enforced pursuant to legislation to carry them into effect, and such legislation is as much subject to modification and repeal by Congress as legislation upon any other subject. If the treaty contains stipulations which are self-executing, that is, require no legislation to make them operative, to that extent they have the force and effect of a legislative enactment.”); Medellin v. Texas, 552 U.S. 491, 525-26 (2008) (“The responsibility for transforming an international obligation arising from a non-self-executing treaty into domestic law falls to Congress.”).

<sup>178</sup> The Paquete Habana, 175 U.S. 677, 700 (1900) (“International law is part of our law, ... where there is no treaty and no controlling executive or legislative act or judicial decision, resort must be had to the customs and usages of civilized nations.”).

<sup>179</sup> See, e.g., WILLIAM O'BRIEN, THE CONDUCT OF JUST AND LIMITED WAR 9 (1981) (defining *jus ad bellum* as the “doctrines concerning permissible recourse to war” and *jus in bello* as “the just conduct of war”); MICHAEL WALZER, JUST AND UNJUST WARS 21 (1977) (“War is always judged twice, first with reference to the reasons states have for fighting, secondly with reference to the means they adopt. The first kind of judgment is adjectival in character: we say that a particular war is just or unjust. The second is adverbial: we say that a war is being fought justly or unjustly. Medieval writers made the difference a matter of prepositions, distinguishing *jus ad bellum*, the justice of war, from *jus in bello*, justice in war.”). But see Robert Kolb, *Origin of the twin terms jus ad bellum/jus in bello*, 37 INTERNATIONAL REVIEW OF THE RED CROSS 553 (Sept.-Oct. 1997) (“The august solemnity of Latin confers on the terms *jus ad bellum* and *jus in bello* the misleading appearance of being centuries old. In fact, these expressions were only coined at the time of the League of Nations and were rarely used in doctrine or practice until after the Second World War, in the late 1940s to be precise.”).

<sup>180</sup> Refer to § 1.1.2 (Scope).

<sup>181</sup> Refer to § 3.5 (Relationship Between *Jus in Bello* and *Jus ad Bellum*).

decided by the President. In U.S. practice, legal advice provided to national-level principal officials on such issues generally would need to be addressed through interagency discussions coordinated by the legal adviser to the National Security Council, including consultation and coordination among senior counsel of relevant U.S. departments and agencies.

1.11.1 *Jus ad Bellum* Criteria. Certain *jus ad bellum* criteria have, at their philosophical roots, drawn from principles that have been developed as part of the Just War Tradition.<sup>182</sup> These principles have included:

- a competent authority to order the war for a public purpose;
- a just cause (such as self-defense);
- the means must be proportionate to the just cause;
- all peaceful alternatives must have been exhausted; and
- a right intention on the part of the just belligerent.<sup>183</sup>

These principles may be reflected in modern law of war rules. For example, the Charter of the United Nations recognizes the inherent right of States to use force in individual or collective self-defense—a just cause for military action.<sup>184</sup>

These principles have also been incorporated into military doctrine.<sup>185</sup>

1.11.1.1 *Competent Authority (Right Authority) to Wage War for a Public Purpose*. One longstanding criterion for a just war is that war must be ordered by a competent authority for a public purpose. This *jus ad bellum* principle (sometimes called *right authority*) acknowledges that the resort to military force is a prerogative of the State.<sup>186</sup>

---

<sup>182</sup> Refer to § 1.6.4 (Just War Tradition).

<sup>183</sup> WILLIAM O'BRIEN, *THE CONDUCT OF JUST AND LIMITED WAR* 16 (1981) (“The decision to invoke the exceptional rights of war must be based on the following criteria: there must be competent authority to order the war for a public purpose; there must be a just cause (it may be self-defense or the protection of rights by offensive war) and the means must be proportionate to the just cause and all peaceful alternatives must have been exhausted; and there must be right intention on the part of the just belligerent.”).

<sup>184</sup> Refer to § 1.11.4.1 (Use of Force in Self-Defense).

<sup>185</sup> MARINE CORPS DOCTRINAL PUBLICATION 1-1, *Strategy*, 93, 95 (1997) (“[T]he just war criteria provide objective measures from which to judge our motives. The effective strategist must be prepared to demonstrate to all sides why the defended cause meets the criteria of just war theory and why the enemy’s cause does not. If a legitimate and effective argument on this basis cannot be assembled, then it is likely that both the cause and the strategy are fatally flawed.”).

<sup>186</sup> See *Talbot v. Janson*, 3 U.S. 133, 160-61 (1795) (Iredell, J., concurring) (“[N]o hostilities of any kind, except in necessary self-defence, can lawfully be practised by one individual of a nation, against an individual of any other nation at enmity with it, but in virtue of some public authority. War can alone be entered into by national authority; it is instituted for national purposes, and directed to national objects; and each individual on both sides is engaged in it as a member of the society to which he belongs, not from motives of personal malignity and ill will.”); Vattel, *THE LAW OF NATIONS* 235 (3.1.4) (“It is the sovereign power alone, therefore, which has the right to make war.”);

The criterion that war must be ordered by a competent authority for a public purpose is reflected in the requirement that armed groups must belong to a State to receive the privileges of combatant status.<sup>187</sup> This criterion is also reflected in the general denial to private persons of the entitlement to the privileges of combatant status.<sup>188</sup> This criterion is also reflected in the condemnation under international law of certain types of private acts of hostility (such as piracy or terrorism) outside the context of patriotic resistance against an enemy State during international armed conflict.<sup>189</sup>

1.11.1.2 *The Means Must Be Proportionate to the Just Cause (Proportionality – Jus ad Bellum)*. *Proportionality* involves a weighing of the contemplated actions with the justification for taking action.<sup>190</sup> For example, the proportionality of the measures taken in self-defense is to be judged according to the nature of the threat being addressed.<sup>191</sup> Force may be used in self-defense, but only to the extent that it is required to repel the armed attack and to restore the security of the party attacked.<sup>192</sup> As an illustration, assessing the proportionality of measures taken in self-defense may involve considerations of whether an actual or imminent attack is part of an ongoing pattern of attacks or what force is reasonably necessary to discourage future armed attacks or threats thereof.<sup>193</sup>

---

GROTIUS, LAW OF WAR & PEACE 97 (1.3.4.2) (“But because the whole state is endangered by war, provision has been made by the laws of almost every state that war may be waged only under the authority of him who holds the sovereign power in the state.”).

<sup>187</sup> Refer to § 4.6.2 (Belonging to a Party to the Conflict).

<sup>188</sup> Refer to § 4.18.3 (Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status).

<sup>189</sup> Refer to § 4.18.5 (Private Persons Who Engage in Hostilities and the Law of War).

<sup>190</sup> Refer to § 2.4 (Proportionality).

<sup>191</sup> William H. Taft IV, Legal Adviser, Department of State, *Self-Defense and the Oil Platforms Decision*, 29 YALE JOURNAL OF INTERNATIONAL LAW 295, 305-06 (2004) (“There is no requirement in international law that a State exercising its right of self-defense must use the same degree or type of force used by the attacking State in its most recent attack. Rather, the proportionality of the measures taken in self-defense is to be judged according to the nature of the threat being addressed. . . . A proper assessment of the proportionality of a defensive use of force would require looking not only at the immediately preceding armed attack, but also at whether it was part of an ongoing series of attacks, what steps were already taken to deter future attacks, and what force could reasonably be judged to be needed to successfully deter future attacks.”).

<sup>192</sup> Counter-memorial and Counter-claim Submitted by the United States of America, International Court of Justice, Case Concerning Oil Platforms (Iran v. United States) 141 (¶4.31) (Jun. 23, 1997) (“Actions in self-defense must be proportionate. Force can be used in self-defense, but only to the extent that it is required to repel the armed attack and to restore the security of the party attacked.”).

<sup>193</sup> Herbert S. Okun, *Letter Dated 14 April 1986 from the Acting Permanent Representative of the United States of America to the United Nations Addressed to the President of the Security Council*, U.N. Doc. S/17990 (Apr. 14, 1986) (“The United States objective was to destroy facilities used to carry out Libya’s hostile policy of international terrorism and to discourage Libyan terrorist attacks in the future. These facilities constituted essential elements which have enabled Libyan agents to carry out deadly missions against U.S. installations and innocent individuals.”); Madeleine Albright, *Letter Dated 26 June 1993 from the Permanent Representative of the United States of America to the United Nations Addressed to the President of the Security Council*, U.N. Doc. S/26003 (Jun. 26, 1993) (“Accordingly, as a last resort, the United States has decided that it is necessary to respond to the attempted attack and the threat of further attacks by striking at an Iraqi military and intelligence target that is involved in such attacks. . . . It is the sincere hope of the United States Government that such limited and

The *jus ad bellum* criterion of proportionality is different from the *jus in bello* principle of proportionality in conducting attacks.<sup>194</sup> These concepts should not be confused with one another.<sup>195</sup>

1.11.1.3 All Peaceful Alternatives Must Have Been Exhausted (Necessity – Jus ad Bellum). The *jus ad bellum* condition of necessity requires that no reasonable alternative means of redress are available.<sup>196</sup> For example, in exercising the right of self-defense, diplomatic means must be exhausted or provide no reasonable prospect of stopping the armed attack or threat thereof.<sup>197</sup>

The *jus ad bellum* criterion of *necessity* is different from the *jus in bello* concept of *military necessity*.<sup>198</sup>

1.11.2 U.N. Charter Framework and the U.N. Security Council. The Charter of the United Nations provides the modern treaty framework for *jus ad bellum*. Under the Charter of the United Nations, the U.N. Security Council has primary responsibility for the maintenance of international peace and security.<sup>199</sup> The U.N. Security Council may determine the existence of any threat to the peace, breach of the peace, or act of aggression, and may decide what measures shall be taken under the Charter to maintain or restore international peace and security.<sup>200</sup> For

---

proportionate action may frustrate future unlawful actions on the part of the Government of Iraq and discourage or preempt such activities.”).

<sup>194</sup> Refer to § 5.10 (Proportionality in Conducting Attacks).

<sup>195</sup> Refer to § 3.5.1 (General Distinction Between *Jus in Bello* and *Jus ad Bellum*).

<sup>196</sup> William H. Taft IV, Legal Adviser, Department of State, *Self-Defense and the Oil Platforms Decision*, 29 YALE JOURNAL OF INTERNATIONAL LAW 295, 304 (2004) (“The condition of ‘necessity,’ rather, requires that no reasonable alternative means of redress are available.”).

<sup>197</sup> For example, Madeleine Albright, *Letter Dated 26 June 1993 from the Permanent Representative of the United States of America to the United Nations Addressed to the President of the Security Council*, U.N. Doc. S/26003 (Jun. 26, 1993) (“Based on the pattern of the Government of Iraq’s behavior, including the disregard for international law and Security Council resolutions, the United States has concluded that there is no reasonable prospect that new diplomatic initiatives or economic measures can influence the current Government of Iraq to cease planning future attacks against the United States. Accordingly, as a last resort, the United States has decided that it is necessary to respond to the attempted attack and the threat of further attacks by striking at an Iraqi military and intelligence target that is involved in such attacks.”); Thomas R. Pickering, *Letter Dated 20 December 1989 from the Permanent Representative of the United States of America to the United Nations Addressed to the President of the Security Council*, U.N. Doc. S/21035 (Dec. 20, 1989) (“The United States has exhausted every available diplomatic means to resolve peacefully disputes with Mr. Noriega, who has rejected all such efforts. Action by the United States was taken after Mr. Noriega declared on 15 December that a state of war existed with the United States, and following brutal attacks by forces of Mr. Noriega on lawfully present American personnel, murdering one American and injuring and threatening others.”).

<sup>198</sup> Refer to § 2.2 (Military Necessity).

<sup>199</sup> U.N. CHARTER art. 24(1) (“In order to ensure prompt and effective action by the United Nations, its Members confer on the Security Council primary responsibility for the maintenance of international peace and security, and agree that in carrying out its duties under this responsibility the Security Council acts on their behalf.”).

<sup>200</sup> U.N. CHARTER art. 39 (“The Security Council shall determine the existence of any threat to the peace, breach of the peace, or act of aggression and shall make recommendations, or decide what measures shall be taken in accordance with Articles 41 and 42, to maintain or restore international peace and security.”).

example, the U.N. Security Council may recognize that a State is acting lawfully in self-defense or that another State is the aggressor in an armed conflict.<sup>201</sup> In addition, the U.N. Security Council may authorize the use of military force.<sup>202</sup>

1.11.2.1 *U.N. Member State Obligations With Respect to U.N. Security Council Decisions.* Members of the United Nations have agreed to give the United Nations every assistance in any action it takes in accordance with the Charter and to refrain from giving assistance to any State against which the United Nations is taking preventive or enforcement action.<sup>203</sup>

Members of the United Nations have agreed to accept and carry out the decisions of the U.N. Security Council in accordance with the Charter.<sup>204</sup> They have also agreed to join in affording mutual assistance in carrying out the measures decided upon by the U.N. Security Council.<sup>205</sup>

Moreover, in the event of a conflict between the obligations of the Members of the United Nations under the Charter and their obligations under any other international agreement, their obligations under the Charter prevail.<sup>206</sup>

1.11.3 *Prohibition on Certain Uses of Force.* Under Article 2(4) of the Charter of the United Nations, “[a]ll Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any State, or in any other manner inconsistent with the Purposes of the United Nations.”<sup>207</sup> Numerous other treaties also

---

<sup>201</sup> For example, U.N. SECURITY COUNCIL RESOLUTION 661, U.N. Doc. S/RES/661 (1990) (“Affirming the inherent right of individual or collective self-defence, in response to the armed attack of Iraq against Kuwait, in accordance with Article 51 of the Charter,”); U.N. SECURITY COUNCIL RESOLUTION 1368, U.N. Doc. S/RES/1368 (2001) (“Determined to combat by all means threats to international peace and security caused by terrorist acts, Recognizing the inherent right of individual or collective self-defence in accordance with the Charter, 1. *Unequivocally condemns* in the strongest terms the horrifying terrorist attacks which took place on 11 September 2001 in New York, Washington, D.C. and Pennsylvania and regards such acts, like any act of international terrorism, as a threat to international peace and security;”).

<sup>202</sup> Refer to § 1.11.4.2 (Use of Force Authorized by the U.N. Security Council Acting Under Chapter VII of the Charter of the United Nations).

<sup>203</sup> U.N. CHARTER art. 2(5) (“All Members shall give the United Nations every assistance in any action it takes in accordance with the present Charter, and shall refrain from giving assistance to any state against which the United Nations is taking preventive or enforcement action.”).

<sup>204</sup> U.N. CHARTER art. 25 (“The Members of the United Nations agree to accept and carry out the decisions of the Security Council in accordance with the present Charter.”).

<sup>205</sup> U.N. CHARTER art. 49 (“The Members of the United Nations shall join in affording mutual assistance in carrying out the measures decided upon by the Security Council.”).

<sup>206</sup> U.N. CHARTER art. 103 (“In the event of a conflict between the obligations of the Members of the United Nations under the present Charter and their obligations under any other international agreement, their obligations under the present Charter shall prevail.”).

<sup>207</sup> U.N. CHARTER art. 2(4).

reflect these prohibitions on the threat or use of force.<sup>208</sup>

The resort to force must have a legal basis in order not to violate these prohibitions. The legality of the use of force must be assessed in light of the particular facts and circumstances at issue.<sup>209</sup>

1.11.3.1 Aggression. Aggression is the most serious and dangerous form of the illegal use of force.<sup>210</sup> Not every act of illegal use of force prohibited by Article 2(4) of the Charter constitutes aggression.<sup>211</sup> Initiating a war of aggression is a serious international crime.<sup>212</sup>

U.N. General Assembly Resolution 3314 suggested considerations that the Security Council should bear in mind in determining whether an act of aggression had occurred.<sup>213</sup>

---

<sup>208</sup> See, e.g., Inter-American Treaty of Reciprocal Assistance, art. 1, Sept. 2, 1947, 62 STAT. 1681, 1700 (“The High Contracting Parties formally condemn war and undertake in their international relations not to resort to the threat or the use of force in any manner inconsistent with the provisions of the Charter of the United Nations or of this Treaty.”); Treaty Providing for the Renunciation of War as an Instrument of National Policy, art. 1, Aug. 27, 1928, 46 STAT. 2343, 2345-46 (“The High Contracting Parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.”).

<sup>209</sup> See, e.g., William H. Taft IV, Legal Adviser, Department of State, & Todd F. Buchwald, Assistant Legal Adviser for Political-Military Affairs, Department of State, *Preemption, Iraq, and International Law*, 97 AJIL 557 (2003) (“In the end, each use of force must find legitimacy in the facts and circumstances that the state believes have made it necessary. Each should be judged not on abstract concepts, but on the particular events that gave rise to it.”); Daniel Webster, *Letter to Mr. Fox*, Apr. 24, 1841, reprinted in DANIEL WEBSTER, THE DIPLOMATIC AND OFFICIAL PAPERS OF DANIEL WEBSTER, WHILE SECRETARY OF STATE 105 (1848) (“It is admitted that a just right of self-defense attaches always to nations as well as to individuals, and is equally necessary for the preservation of both. But the extent of this right is a question to be judged of by the circumstances of each particular case.”).

<sup>210</sup> *Definition of Aggression*, preamble ¶5, Annex to U.N. GENERAL ASSEMBLY RESOLUTION 3314 (XXIX), *Definition of Aggression*, U.N. Doc. A/RES/3314 (XXIX) (Dec. 14, 1974) (“Considering also that, since aggression is the most serious and dangerous form of the illegal use of force, being fraught, in the conditions created by the existence of all types of weapons of mass destruction, with the possible threat of a world conflict and all its catastrophic consequences, aggression should be defined at the present stage.”).

<sup>211</sup> Joseph Sanders, Rapporteur, The Special Committee on the Question of Defining Aggression, *Report of the Special Committee on the Question of Defining Aggression, Annex 1: Views expressed by members of the Special Committee at the concluding stage of the Special Committee’s session*, U.N. General Assembly Official Records: Twenty-Ninth Session Supplement No. 19, U.N. Doc. A/9619, 22-23 (Mar. 11-Apr. 12, 1974) (“Mr. ROSENSTOCK (United States of America) ... The fifth preambular paragraph, while recognizing the dangers which would flow from an illegal use of force amounting to aggression, correctly stated the view that not every act of force in violation of the Charter constituted aggression.”).

<sup>212</sup> United States, *et al.* v. Göring, *et al.*, *Judgment*, TRIAL OF THE MAJOR WAR CRIMINALS BEFORE THE IMT 421 (“To initiate a war of aggression, therefore, is not only an international crime; it is the supreme international crime differing only from other war crimes in that it contains within itself the accumulated evil of the whole.”).

<sup>213</sup> Joseph Sanders, Rapporteur, The Special Committee on the Question of Defining Aggression, *Report of the Special Committee on the Question of Defining Aggression, Annex 1: Views expressed by members of the Special Committee at the concluding stage of the Special Committee’s session*, U.N. General Assembly Official Records: Twenty-Ninth Session Supplement No. 19, U.N. Doc. A/9619, 22-23 (Mar. 11-Apr. 12, 1974) (“Mr. ROSENSTOCK (United States of America) ... The text that had been produced was a recommendation of the General Assembly for use by the Security Council. ... In article 2, the definition suggested the considerations which the Security Council should bear in mind in determining whether an act of aggression had occurred.”).

Although this resolution states basic principles as guidance for such determinations, it recognizes that whether an act of aggression has been committed must be considered in light of all the circumstances of each particular case.<sup>214</sup>

The United States has expressed the view that the definition of the act of aggression in the Kampala amendments to the Rome Statute does not reflect customary international law.<sup>215</sup>

#### 1.11.4 Rationales for the Resort to Force.

1.11.4.1 Use of Force in Self-Defense. The right to use force in self-defense is an inherent right of States.<sup>216</sup>

1.11.4.2 Use of Force Authorized by the U.N. Security Council Acting Under Chapter VII of the Charter of the United Nations. Chapter VII of the Charter of the United Nations provides that the U.N. Security Council may take such action by air, sea, or land forces as may be necessary to maintain or restore international peace or security, including demonstrations, blockade, and other military operations.<sup>217</sup>

1.11.4.3 Use of Force With the Consent of the Territorial State. Military action in the territory of another State is not a violation of Article 2(4)'s prohibition against the use of force against that State where it consents to such military action.<sup>218</sup>

1.11.4.4 Humanitarian Intervention. Violations of law of war treaties applicable to non-international armed conflict generally have not been understood to provide an

---

<sup>214</sup> *Definition of Aggression*, preamble ¶10, Annex to U.N. GENERAL ASSEMBLY RESOLUTION 3314 (XXIX), *Definition of Aggression*, U.N. Doc. A/RES/3314 (XXIX) (Dec. 14, 1974) (“Believing that, although the question whether an act of aggression has been committed must be considered in the light of all the circumstances of each particular case, it is nevertheless desirable to formulate basic principles as guidance for such determination.”).

<sup>215</sup> Refer to § 18.20.3.4 (ICC and the Crime of Aggression).

<sup>216</sup> Refer to § 1.11.5 (Use of Force in Self-Defense).

<sup>217</sup> U.N. CHARTER art. 42 (“Should the Security Council consider that measures provided for in Article 41 would be inadequate or have proved to be inadequate, it may take such action by air, sea, or land forces as may be necessary to maintain or restore international peace and security. Such action may include demonstrations, blockade, and other operations by air, sea, or land forces of Members of the United Nations.”).

<sup>218</sup> For example, Davis R. Robinson, Legal Adviser, Department of State, *Letter to Professor Edward Gordon, Chairman of the Committee on Grenada Section on International Law and Practice American Bar Association on The Legal Position of the United States on the Action taken in Grenada* (Feb. 10, 1984), reprinted in 18 INTERNATIONAL LAWYERS 381 (1984) (“In the case of the action taken in Grenada, the legal position of the United States was based upon the application of a combination of three well established principles of international law... (1) the lawful governmental authorities of a State may invite the assistance in its territory of military forces of other states or collective organizations in dealing with internal disorder as well as external threats.”); Statement of the U.S. Government, attached to Adlai E. Stevenson, *Letter Dated 24 November 1964 From the Permanent Representative of the United States of America Addressed to the President of the Security Council*, U.N. Doc. S/6062, Nov. 24, 1964 (“The United States Government has just received confirmation that a short time ago - early morning of 24 November in the Congo - a unit of Belgian paratroopers, carried by United States military transport planes, landed at Stanleyville in the Congo. This landing has been made (1) with the authorization of the Government of the Congo, (2) in conformity with our adherence to the Geneva Conventions, and (3) in exercise of our clear responsibility to protect United States citizens under the circumstances existing in the Stanleyville area.”).

independent basis for intervening in a State.<sup>219</sup>

Although the United Kingdom and certain other States have argued that intervention for humanitarian reasons may be a legal basis for the resort to force, the United States has not adopted this legal rationale.<sup>220</sup> Consistent with this view, the United States did not adopt this theory as a legal rationale for NATO's military action to address the humanitarian catastrophe in Kosovo in 1999, but rather expressed the view that such action was justified on the basis of a number of factors.<sup>221</sup>

Military action for humanitarian reasons may, however, be authorized by the U.N. Security Council.<sup>222</sup>

1.11.5 Use of Force in Self-Defense. Article 51 of the Charter of the United Nations provides that “[n]othing in the present Charter shall impair the inherent right of individual or collective self-defence if an armed attack occurs against a Member of the United Nations, until the Security Council has taken measures necessary to maintain international peace and

---

<sup>219</sup> Refer to § 17.18.1 (Duty of Non-Belligerent States to Refrain From Supporting Hostilities by Non-State Armed Groups Against Other States).

<sup>220</sup> William H. Taft IV, Legal Adviser, Department of State, *Role and Significance of International Law Governing the Use of Force in the New Global Context Confronting the United States After 9/11: remarks regarding the use of force under international law* (Oct. 27, 2004) (“Of particular note, the idea that humanitarian catastrophes must be avoided has been asserted as a reason for rethinking what actions international law permits in a number of situations. NATO’s intervention in Kosovo in 1999 is a case to consider in this connection. In defending the legality of NATO’s actions, the United Kingdom and several other allies asserted a doctrine of humanitarian intervention, under which states have a right to use force if it is necessary to prevent genocide, a major loss of civilian life, or a large scale forced movement of a population, which would destabilize other states and threaten international peace and security. In this view, the humanitarian intervention doctrine is often presented as a necessary extension of humanitarian law as it has evolved since 1945. Significantly, the doctrine was invoked in the absence of authorization by the UN Security Council. The United States did not, however, adopt this theory as a basis for the NATO intervention in Kosovo, and instead pointed to a range of other factors to justify its participation in the Kosovo campaign.”).

<sup>221</sup> David Andrews, Legal Adviser, Department of State, Oral Proceedings, May 11, 1999, *Legality of Use of Force (Yugoslavia v. United States)* I.C.J. 10 (¶1.7) (“As you have already heard, the actions of the Members of the NATO Alliance find their justification in a number of factors. These include: - The humanitarian catastrophe that has engulfed the people of Kosovo as a brutal and unlawful campaign of ethnic cleansing has forced many hundreds of thousands to flee their homes and has severely endangered their lives and well-being; - The acute threat of the actions of the Federal Republic of Yugoslavia to the security of neighbouring States, including threat posed by extremely heavy flows of refugees and armed incursions into their territories; - The serious violation of international humanitarian law and human rights obligations by forces under the control of the Federal Republic of Yugoslavia, including widespread murder, disappearances, rape, theft and destruction of property; and, finally - The resolutions of the Security Council, which have determined that the actions of the Federal Republic of Yugoslavia constitute a threat to peace and security in the region and, pursuant to Chapter VII of the Charter, demanded a halt to such actions.”).

<sup>222</sup> For example, U.N. SECURITY COUNCIL RESOLUTION 1973, U.N. Doc. S/RES/1973, ¶4 (Mar. 17, 2011) (“[This Resolution] [a]uthorizes Member States that have notified the Secretary-General, acting nationally or through regional organizations or arrangements, and acting in cooperation with the Secretary-General, to take all necessary measures, notwithstanding paragraph 9 of resolution 1970 (2011), to protect civilians and civilian populated areas under threat of attack in the Libyan Arab Jamahiriya, including Benghazi, while excluding a foreign occupation force of any form on any part of Libyan territory ...”).

security.”<sup>223</sup>

The Charter of the United Nations was not intended to supersede a State’s inherent right of individual or collective self-defense in customary international law.<sup>224</sup>

To constitute legitimate self-defense under customary international law, it is generally understood that the defending State’s actions must be necessary.<sup>225</sup> For example, reasonably available peaceful alternatives must be exhausted.<sup>226</sup> In addition, the measures taken in self-defense must be proportionate to the nature of the threat being addressed.<sup>227</sup>

1.11.5.1 *Responding to an Imminent Threat of an Attack.* The text of Article 51 of the Charter of the United Nations refers to the right of self-defense “if an armed attack occurs against a Member of the United Nations.”<sup>228</sup> Under customary international law, States had, and continue to have, the right to take measures in response to imminent attacks.<sup>229</sup>

1.11.5.2 *Use of Force Versus Armed Attack.* The United States has long taken the position that the inherent right of self-defense potentially applies against any illegal use of force.<sup>230</sup> Others, however, would be inclined to draw more of a distinction between “armed

---

<sup>223</sup> U.N. CHARTER art. 51.

<sup>224</sup> Abraham D. Sofaer, *Terrorism, the Law, and the National Defense*, 126 MILITARY LAW REVIEW 89, 94 (1989) (“The United States rejects the notion that the U.N. Charter supersedes customary international law on the right of self-defense. Article 51 characterizes that right as ‘inherent’ in order to prevent its limitation based on any provision in the Charter. We have always construed the phrase ‘armed attack’ in a reasonable manner, consistent with a customary practice that enables any State effectively to protect itself and its citizens from every illegal use of force aimed at the State.”).

<sup>225</sup> William H. Taft IV, Legal Adviser, Department of State, *Self-Defense and the Oil Platforms Decision*, 29 YALE JOURNAL OF INTERNATIONAL LAW 295, 304 (2004) (“To constitute legitimate self-defense under customary international law, it is generally understood that the defending State’s actions must be both ‘necessary’ and ‘proportional.’”).

<sup>226</sup> Refer to § 1.11.1.3 (All Peaceful Alternatives Must Have Been Exhausted (Necessity – Jus ad Bellum)).

<sup>227</sup> Refer to § 1.11.1.2 (The Means Must Be Proportionate to the Just Cause (Proportionality – Jus ad Bellum)).

<sup>228</sup> U.N. CHARTER art. 51.

<sup>229</sup> Lord Peter Henry Goldsmith, Attorney General, United Kingdom, *Oral Answers to Questions*, Apr. 21, 2004, HANSARD 660 HOUSE OF COMMONS DEBATES §§ 370-71 (“It is argued by some that the language of Article 51 provides for a right of self-defence only in response to an actual armed attack. However, it has been the consistent position of successive United Kingdom Governments over many years that the right of self-defence under international law includes the right to use force where an armed attack is imminent. It is clear that the language of Article 51 was not intended to create a new right of self-defence. Article 51 recognises the inherent right of self-defence that states enjoy under international law. ... It is not a new invention. The charter did not therefore affect the scope of the right of self-defence existing at that time in customary international law, which included the right to use force in anticipation of an imminent armed attack.”).

<sup>230</sup> See Abraham D. Sofaer, *Terrorism, the Law, and the National Defense*, 126 MILITARY LAW REVIEW 89, 92-93 (1989) (“The United States has long assumed that the inherent right of self defense potentially applies against any illegal use of force, and that it extends to any group or State that can properly be regarded as responsible for such activities. These assumptions are supported in customary practice.”). See also William H. Taft IV, Legal Adviser, Department of State, *Self-Defense and the Oil Platforms Decision*, 29 YALE JOURNAL OF INTERNATIONAL LAW 295, 300-01 (2004) (“A requirement that an attack reach a certain level of gravity before triggering a right of self-defense would make the use of force more rather than less likely, because it would encourage States to engage in a series of

attacks” and uses of force that do not give rise to the right to use force in self-defense.<sup>231</sup>

1.11.5.3 *Use of Force to Protect Nationals Abroad.* A State’s right to use force in self-defense may be understood to include the right to use force to protect its nationals abroad.<sup>232</sup> The United States has taken action to protect U.S. nationals abroad when the government of the territory in which they are located was unwilling or unable to protect them.<sup>233</sup> A State need not await actual violence against its nationals before taking such action if an attack against them is imminent.<sup>234</sup>

1.11.5.4 *Right of Self-Defense Against Non-State Actors.* The inherent right of self-defense, recognized in Article 51 of the Charter of the United Nations, applies in response to any “armed attack,” not just attacks that originate with States.<sup>235</sup> As with any other exercise of

---

small-scale military attacks, in the hope that they could do so without being subject to defensive responses. Moreover, if States were required to wait until attacks reached a high level of gravity before responding with force, their eventual response would likely be much greater, making it more difficult to prevent disputes from escalating into full-scale military conflicts.”).

<sup>231</sup> See, e.g., *Military and Paramilitary Activities in and Against Nicaragua (Nicaragua v. United States)*, Merits, Judgment, 1986 I.C.J. 14, 101 (¶191) (“As regards certain particular aspects of the principle in question, it will be necessary to distinguish the most grave forms of the use of force (those constituting an armed attack) from other less grave forms.”); *id.* at 126-27 (¶247) (“So far as regards the allegations of supply of arms by Nicaragua to the armed opposition in El Salvador, the Court has indicated that while the concept of an armed attack includes the despatch by one State of armed bands into the territory of another State, the supply of arms and other support to such bands cannot be equated with armed attack. Nevertheless, such activities may well constitute a breach of the principle of the non-use of force and an intervention in the internal affairs of a State, that is, a form of conduct which is certainly wrongful, but is of lesser gravity than an armed attack.”).

<sup>232</sup> Ambassador William Scranton, U.S. Representative to the United Nations, *Statement in the U.N. Security Council* regarding Israeli action at Entebbe, Jul. 12, 1976, 1976 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 150 (“[T]here is a well-established right to use limited force for the protection of one’s own nationals from an imminent threat of injury or death in a situation where the State in whose territory they are located either is unwilling or unable to protect them. The right, flowing from the right of self defense, is limited to such use of force as is necessary and appropriate to protect threatened nationals from injury.”).

<sup>233</sup> For example, Jimmy Carter, *Letter to Thomas P. O’Neal, Jr., Speaker of the House of Representatives, and Warren G. Magnuson, President pro tempore of the Senate regarding the rescue attempt for American hostages in Iran*, Apr. 26, 1980, 1980-I PUBLIC PAPERS OF THE PRESIDENTS 779 (“In carrying out this operation [to rescue the American hostages in the U.S. embassy in Tehran] the United States was acting wholly within its right, in accordance with Article 51 of the United Nations Charter, to protect and rescue its citizens where the government of the territory in which they are located is unwilling or unable to protect them.”).

<sup>234</sup> Kenneth W. Dam, Deputy Secretary of State, *Statement before the House Committee on Foreign Affairs*, Nov. 2, 1983, *reprinted in* 78 AJIL 200, 203-04 (1984) (“U.S. actions have been based on three legal grounds: ... Third, U.S. action to secure and evacuate endangered U.S. citizens on the island was undertaken in accordance with well-established principles of international law regarding the protection of one’s nationals. That the circumstances warranted this action has been amply documented by the returning students themselves. There is absolutely no requirement of international law that compelled the United States to await further deterioration of the situation that would have jeopardized a successful operation. Nor was the United States required to await actual violence against U.S. citizens before rescuing them from the anarchic and threatening conditions the students have described.”).

<sup>235</sup> See, e.g., *In re Guantanamo Bay Litigation, Respondents’ Memorandum Regarding the Government’s Detention Authority Relative to Detainees Held at Guantanamo Bay*, Misc. No. 08-442, 4 (D.D.C., Mar. 13, 2009) (“Under international law, nations lawfully can use military force in an armed conflict against irregular terrorist groups such as al-Qaida. The United Nations Charter, for example, recognizes the inherent right of states to use force in self defense in response to any ‘armed attack,’ not just attacks that originate with states. United Nations Charter, art.

the right of self-defense, actions taken in self-defense against non-State actors must comply with applicable international law.<sup>236</sup>

1.11.5.5 *Right of Collective Self-Defense*. Article 51 of the Charter of the United Nations also recognizes a right of States to engage in collective self-defense with a State that can legitimately invoke its own right of national self-defense. Collective self-defense of a State must proceed with that State's consent, although this consent need not necessarily be expressed in the form of an explicit request.<sup>237</sup>

Some treaties include commitments by States to assist one another in collective self-defense.<sup>238</sup>

1.11.5.6 *Reporting to the U.N. Security Council*. Measures taken in the exercise of national self-defense shall be immediately reported to the U.N. Security Council.<sup>239</sup>

---

51.”); *U.S. Additional Response to the Request for Precautionary Measures—Detention of Enemy Combatants at Guantanamo Bay, Cuba*, Inter-American Commission on Human Rights, Jul. 15, 2002, 2002 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1008, 1011-12 (“The terrorist attacks of September 11 were not ordinary criminal acts. ... The international community has clearly recognized the right of the United States and allied forces to resort to armed force in self-defense in response to these attacks. For instance, the United Nations explicitly recognized the ‘inherent right of individual and collective self-defence’ immediately following September 11. It is in this context that NATO and others recognized that the September 11 attacks constituted an ‘armed attack,’ a conclusion inherent in the UN Security Council’s recognition of the right of self-defense.”).

<sup>236</sup> Refer to § 17.18.2 (Duty of Belligerent States to Respect the Sovereignty of Other States).

<sup>237</sup> See also BRUNO SIMMA, *THE CHARTER OF THE UNITED NATIONS: A COMMENTARY* 675 (1994) (“Art. 51 of the Charter allows not only individual, but also collective self-defence. The latter is not, as the wording might suggest, restricted to a common, co-ordinated exercise of the right to individual self-defence by a number of states. ... It is not required for the exercise of the right of collective self-defence that the state invoking the right be under an obligation resulting from a treaty of assistance. Rather, it is sufficient, but also necessary, that the support be given with the consent of the attacked state. But this consent does not, as the ICJ states for the right of self-defence under customary law, need to be declared in the form of an explicit ‘request.’”).

<sup>238</sup> For example, *The North Atlantic Treaty*, Washington, D.C., Apr. 4, 1949, art. 5 (“The Parties agree that an armed attack against one or more of them in Europe or North America shall be considered an attack against them all and consequently they agree that, if such an armed attack occurs, each of them, in exercise of the right of individual or collective self-defense recognized by Article 51 of the Charter of the United Nations, will assist the Party or Parties so attacked by taking forthwith, individually and in concert with the other Parties, such action as it deems necessary, including the use of armed force, to restore and maintain the security of the North Atlantic area.”).

<sup>239</sup> U.N. CHARTER art. 51 (“Measures taken by Members in the exercise of this right of self-defence shall be immediately reported to the Security Council and shall not in any way affect the authority and responsibility of the Security Council under the present Charter to take at any time such action as it deems necessary in order to maintain or restore international peace and security.”).

## II – Principles

### Chapter Contents

- 2.1 Introduction
- 2.2 Military Necessity
- 2.3 Humanity
- 2.4 Proportionality
- 2.5 Distinction
- 2.6 Honor

#### 2.1 INTRODUCTION

Three interdependent principles – *military necessity*, *humanity*, and *honor* – provide the foundation for other law of war principles, such as *proportionality* and *distinction*, and most of the treaty and customary rules of the law of war.

This Chapter briefly addresses certain specific rules to illustrate these foundational principles. For more information about a specific rule, practitioners should refer to the cross-referenced section that addresses that rule.<sup>1</sup>

2.1.1 Legal Principles as Part of International Law. General principles of law common to the major legal systems of the world are a recognized part of international law.<sup>2</sup> Law of war principles have been understood to be included in this category of international law.<sup>3</sup>

---

<sup>1</sup> Refer to § 1.2.3 (Use of Cross-References in This Manual).

<sup>2</sup> See ICJ STATUTE art. 38(1)(c) (providing that “the general principles of law recognized by civilized nations” are a source of applicable law for the court); I RESTATEMENT (THIRD) OF FOREIGN RELATIONS LAW OF THE UNITED STATES 24 (§102(1)(c)(4)) (1987) (including “general principles common to the major legal systems of the world,” among sources of international law); *Thirty Hogsheads of Sugar v. Boyle*, 13 U.S. 191, 198 (1815) (Marshall, C.J.) (ascertaining international law includes “resort to the great principles of reason and justice”).

<sup>3</sup> See BOTHE, PARTSCH, & SOLF, NEW RULES 44 (AP I art. 1, ¶2.10) (“Following the original clause in the preamble of the 1899 IV. Hague Convention on Land Warfare (para. 9) and para. 4 of the denunciation clause in the Conventions (63/62/142/158) these principles are stated in the present text to be *part of* international law. They are ‘general principles of law’ in the sense of Art. 38 of the Statute of the ICJ.”); *Speech by Baron Descamps on the Rules of Law to be applied*, Annex No. 1 to 14th Meeting (Private), held at the Peace Palace, the Hague, on July 2nd, 1920, PERMANENT COURT OF INTERNATIONAL JUSTICE, ADVISORY COMMITTEE OF JURISTS, PROCÈS-VERBAUX OF THE PROCEEDINGS OF THE COMMITTEE: JUNE 16TH – JULY 24TH 1920 WITH ANNEXES 322, 323-24 (1920) (“The only question is, -- how to make unerring rules for the judge’s guidance. ... I allow him to take into consideration the legal conscience of civilised nations, which is illustrated so strikingly on certain occasions. ... [L]isten to this solemn declaration of the Powers, placed at the beginning of the Convention dealing with laws and customs of war on land: ‘Until a more complete code of the laws of war has been issued, the high contracting Parties deem it expedient to declare that, in cases not included in the Regulations adopted by them, populations and belligerents remain under the protection and the rule of the principles of the law of nations, as they result from the usages established among civilised peoples, from the laws of humanity, and the dictates of the public conscience.’ ... I am convinced that the assembly of all the States does not and cannot intend, in dealing with the state of peace, to abjure principles which are clearly intended to be applied in war.”).

2.1.2 Uses of Law of War Principles. Law of war principles provide the foundation for the specific law of war rules. Legal principles, however, are not as specific as rules, and thus interpretations of how principles apply to a given situation may vary.

Law of war principles: (1) help practitioners interpret and apply specific treaty or customary rules; (2) provide a general guide for conduct during war when no specific rule applies; and (3) work as interdependent and reinforcing parts of a coherent system.

2.1.2.1 Law of War Principles as an Aid in Interpreting and Applying Law of War Rules. Understanding law of war principles helps practitioners interpret and apply specific law of war rules. For example, the principle of *military necessity* has been incorporated into specific law of war rules.<sup>4</sup> Similarly, the principle of *humanity* can assist in the proper interpretation and application of law of war rules that are based on humanitarian considerations.<sup>5</sup>

2.1.2.2 Law of War Principles as a General Guide. When no specific rule applies, the principles of the law of war form the general guide for conduct during war.

States have reflected this idea in certain treaty provisions, including the “Martens Clause,” which make clear that situations not covered by the treaty remain governed by principles of international law.<sup>6</sup>

The considerable progress States have made in developing specific law of war rules, however, has lessened the need to rely solely on these principles to guide conduct during war.<sup>7</sup>

2.1.2.3 Law of War Principles as a Coherent System. Law of war principles work as interdependent and reinforcing parts of a coherent system.

*Military necessity* justifies certain actions necessary to defeat the enemy as quickly and efficiently as possible.<sup>8</sup> Conversely, *humanity* forbids actions unnecessary to achieve that object.<sup>9</sup> *Proportionality* requires that even when actions may be justified by *military necessity*, such actions not be unreasonable or excessive.<sup>10</sup> *Distinction* underpins the parties’ responsibility to comport their behavior with *military necessity*, *humanity*, and *proportionality* by requiring parties to a conflict to apply certain legal categories, principally the distinction between the

---

<sup>4</sup> Refer to § 2.2.2.2 (Incorporation of Military Necessity Into Law of War Rules).

<sup>5</sup> Refer to § 2.3.2 (Humanity and Law of War Rules).

<sup>6</sup> Refer to § 19.8.3 (Martens Clause).

<sup>7</sup> TUCKER, THE LAW OF WAR AND NEUTRALITY AT SEA 46-47 (“Where the general principles of the law of war have received—through the agreement of states—detailed application in the form of specific rules, the question of the proper interpretation of these general principles can only be answered by an examination of the former. Hence, to the extent that the conduct of war is increasingly subjected to such regulation resort to the general principles of the law of war must become, in turn, correspondingly less frequent. The reason for this is simply that the essential function of these general principles is to provide a guide for determining the legal status of weapons and methods of warfare where no more specific rule is applicable.”).

<sup>8</sup> Refer to § 2.2 (Military Necessity).

<sup>9</sup> Refer to § 2.3 (Humanity).

<sup>10</sup> Refer to § 2.4 (Proportionality).

armed forces and the civilian population.<sup>11</sup> Lastly, *honor* supports the entire system and gives parties confidence in it.<sup>12</sup>

## 2.2 MILITARY NECESSITY

*Military necessity* may be defined as the principle that justifies the use of all measures needed to defeat the enemy as quickly and efficiently as possible that are not prohibited by the law of war. *Military necessity* has been defined in military publications,<sup>13</sup> judicial decisions,<sup>14</sup> and scholarly works.<sup>15</sup>

**2.2.1 Military Necessity as a Justification.** *Military necessity* justifies actions, such as destroying and seizing persons and property.<sup>16</sup> Thus, *military necessity* underlies law of war

---

<sup>11</sup> Refer to § 2.5 (Distinction).

<sup>12</sup> Refer to § 2.6 (Honor).

<sup>13</sup> See LIEBER CODE art. 14 (“Military necessity, as understood by modern civilized nations, consists in the necessity of those measures which are indispensable for securing the ends of the war, and which are lawful according to the modern law and usages of war.”); 1914 RULES OF LAND WARFARE ¶¶9-11 (“a belligerent is justified in applying any amount and any kind of force which is necessary for the purpose of the war; that is, the complete submission of the enemy at the earliest possible moment with the least expenditure of men and money. ... Military necessity justifies a resort to all measures which are indispensable for securing this object and which are not forbidden by the modern laws and customs of war.”); 1940 RULES OF LAND WARFARE ¶4a (“a belligerent is justified in applying any amount and any kind of force to compel the complete submission of the enemy with the least possible expenditure of time, life, and money.”); 1956 FM 27-10 (Change No. 1 1976) ¶3 (“that principle which justifies those measures not forbidden by international law which are indispensable for securing the complete submission of the enemy as soon as possible.”); 1958 UK MANUAL ¶3 (“a belligerent is justified in applying compulsion and force of any kind, to the extent necessary for the realization of the purpose of war, that is, the complete submission of the enemy at the earliest possible moment with the least possible expenditure of men, resources, and money.”); 2004 UK MANUAL ¶2.2 (“Military necessity is now defined as ‘the principle whereby a belligerent has the right to apply any measures which are required to bring about the successful conclusion of a military operation and which are not forbidden by the laws of war.’ Put another way, a state engaged in an armed conflict may use that degree and kind of force, not otherwise prohibited by the law of armed conflict, that is required in order to achieve the legitimate purpose of the conflict, namely the complete or partial submission of the enemy at the earliest possible moment with the minimum expenditure of life and resources.”); NATO, Glossary of Terms and Definitions, AAP-6 at 2-M-6 (2009) (defining military necessity as “the principle whereby a belligerent has the right to apply any measures which are required to bring about the successful conclusion of a military operation and which are not forbidden by the laws of war.”).

<sup>14</sup> See *United States v. List, et al. (The Hostage Case)*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1253 (“Military necessity permits a belligerent, subject to the laws of war, to apply any amount and kind of force to compel the complete submission of the enemy with the least possible expenditure of time, life, and money.”).

<sup>15</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 313-14 (military necessity is “the right to apply that amount and kind of force which is necessary to compel the submission of the enemy with the least possible expenditure of time, life, and money”); CHARLES HENRY HYDE, II INTERNATIONAL LAW: CHIEFLY AS INTERPRETED AND APPLIED BY THE UNITED STATES 299-300 (1922) (“Military necessity, as understood by the United States, justifies a resort to all measures which are indispensable to bring about the complete submission of the enemy by means of regulated violence and which are not forbidden by the modern laws and customs of war.”); WILLIAM EDWARD HALL, A TREATISE ON INTERNATIONAL LAW 63 (§17) (A. Pearce Higgins, ed., 7th ed., 1917) (“When violence is permitted at all, the amount which is permissible is that which is necessary to attain the object proposed. The measure of the violence which is permitted in war is therefore that which is required to reduce the enemy to terms.”).

<sup>16</sup> See LIEBER CODE art. 15 (“Military necessity admits of all destruction of life or limb of armed enemies, ... it allows of the capturing of every armed enemy, and every enemy of importance to the hostile government, or of peculiar danger to the captor; it allows of all destruction of property, and obstruction of the ways and channels of

concepts that explain when persons and property may be the object of attack, *e.g.*, the concepts of “taking a direct part in hostilities”<sup>17</sup> and “military objective.”<sup>18</sup>

*Military necessity* may justify not only violence and destruction, but also alternative means of subduing the enemy.<sup>19</sup> For example, military necessity may justify the capture of enemy persons,<sup>20</sup> or non-forcible measures, such as propaganda and intelligence-gathering.<sup>21</sup>

*Military necessity* also justifies certain incidental harms that inevitably result from the actions it justifies.<sup>22</sup> The extent to which *military necessity* justifies such harms is addressed by the principle of proportionality.<sup>23</sup>

## 2.2.2 Military Necessity and Law of War Rules.

2.2.2.1 *Military Necessity Does Not Justify Actions Prohibited by the Law of War.* *Military necessity* does not justify actions that are prohibited by the law of war.

From the late 19th Century through World War II, Germany asserted that *military necessity* could override specific law of war rules (*Kriegsraeson geht vor Kriegsmanier* – “necessity in war overrules the manner of warfare”).<sup>24</sup> This view was strongly criticized.<sup>25</sup> Post-

---

traffic, travel, or communication, and of all withholding of sustenance or means of life from the enemy; of the appropriation of whatever an enemy’s country affords necessary for the subsistence and safety of the army, and of such deception as does not involve the breaking of good faith either positively pledged, regarding agreements entered into during the war, or supposed by the modern law of war to exist.”); United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1253-54 (“In general, [military necessity] sanctions measures by an occupant necessary to protect the safety of his forces and to facilitate the success of his operations. It permits the destruction of life of armed enemies and other persons whose destruction is incidentally unavoidable by the armed conflicts of the war; it allows the capturing of armed enemies and others of peculiar danger . . . . It is lawful to destroy railways, lines of communication, or any other property that might be utilized by the enemy. Private homes and churches even may be destroyed if necessary for military operations.”).

<sup>17</sup> Refer to § 5.8 (Civilians Taking a Direct Part in Hostilities).

<sup>18</sup> Refer to § 5.6 (Military Objective).

<sup>19</sup> For example, Abraham Lincoln, The Emancipation Proclamation, Jan. 1, 1863, *reprinted in* 12 STAT. 1268 (justifying emancipation of slaves held in rebellious states as “warranted by the Constitution, upon military necessity”).

<sup>20</sup> Refer to § 8.1.3.1 (Detention Authority).

<sup>21</sup> Refer to § 5.26 (Non-Forcible Means and Methods of Warfare).

<sup>22</sup> See LIEBER CODE art. 15 (“Military necessity admits of all destruction of life or limb of . . . persons whose destruction is incidentally unavoidable in the armed contests of the war;”); United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1253-54 (military necessity “permits the destruction of life of . . . persons whose destruction is incidentally unavoidable by the armed conflicts of the war;”).

<sup>23</sup> Refer to § 2.4 (Proportionality).

<sup>24</sup> See LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 231-32 (§69) (“In accordance with the German proverb, *Kriegsraeson geht vor Kriegsmanier* (*necessity in war overrules the manner of warfare*), many German authors before the First World War were maintaining that the laws of war lose their binding force in case of extreme necessity.”); United States, *et al.* v. Göring, *et al.*, *Judgment*, I TRIAL OF THE MAJOR WAR CRIMINALS BEFORE THE IMT 227 (“The truth remains that War Crimes were committed on a vast scale, never before seen in the history of war. . . . There can be no doubt that the majority of them arose from the Nazi conception of ‘total war’, with which

World War II war crimes tribunals rejected it as well.<sup>26</sup>

*Military necessity* cannot justify departures from the law of war because States have crafted the law of war specifically with war's exigencies in mind.<sup>27</sup> In devising law of war rules, States considered military requirements.<sup>28</sup> Thus, prohibitions on conduct in the law of war may be understood to reflect States' determinations that such conduct is militarily unnecessary *per se*.

The fact that law of war rules are formulated specifically with military requirements in

---

the aggressive wars were waged. For in this conception of 'total war', the moral ideas underlying the conventions which seek to make war more humane are no longer regarded as having force or validity. Everything is made subordinate to the overmastering dictates of war. Rules, regulations, assurances, and treaties all alike are of no moment; and so, freed from the restraining influence of international law, the aggressive war is conducted by the Nazi leaders in the most barbaric way. Accordingly, War Crimes were committed when and wherever the Führer and his close associates thought them to be advantageous.”).

<sup>25</sup> See, e.g., Elihu Root, *Opening Address*, 15 PROCEEDINGS OF THE AMERICAN SOCIETY OF INTERNATIONAL LAW 1, 2 (1921) (“More important still is a fact which threatens the foundation of all international law. The doctrine of *kriegsraison* has not been destroyed. It was asserted by Bethman Hollweg at the beginning of the war when he sought to justify the plain and acknowledged violation of international law in the invasion of Belgium upon the ground of military necessity. The doctrine practically is that if a belligerent deems it necessary for the success of its military operations to violate a rule of international law, the violation is permissible. As the belligerent is to be the sole judge of the necessity, the doctrine really is that a belligerent may violate the law or repudiate it or ignore it whenever that is deemed to be for its military advantage. The alleged necessity in the case of the German invasion of Belgium was simply that Belgium was deemed to be the most advantageous avenue through which to attack France. Of course, if that doctrine is to be maintained, there is no more international law, for the doctrine cannot be confined to the laws specifically relating to war on land and sea. With a nation at liberty to declare war, there are few rules of peaceful intercourse, the violation of which may not be alleged to have some possible bearing upon a military advantage, and a law which may rightfully be set aside by those whom it is intended to restrain is no law at all.”).

<sup>26</sup> See, e.g., *United States v. List, et al. (The Hostage Case)*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1255-56 (“It is apparent from the evidence of these defendants that they considered military necessity, a matter to be determined by them, a complete justification of their acts. We do not concur in the view that the rules of warfare are anything less than they purport to be. Military necessity or expediency do not justify a violation of positive rules.”); *United States v. Krupp, et al.*, IX TRIALS OF WAR CRIMINALS BEFORE THE NMT 1340 (rejecting defense counsel argument that Hague IV and Hague IV Reg. rules did not apply in cases of “total war”). See also *Trial of Gunther Thiele and Georg Steinert*, III U.N. LAW REPORTS 58-59 (U.S. Military Commission, Augsburg, Germany, Jun. 13, 1945) (rejecting military necessity as a defense to the murder of a prisoner of war); *United States v. Milch*, II TRIALS OF WAR CRIMINALS BEFORE THE NMT 849-50 (Musmanno, J., concurring) (rejecting defense counsel argument that “total warfare” allowed suspension or abrogation of law of war rules).

<sup>27</sup> 1956 FM 27-10 (Change No. 1 1976) ¶3a (“Military necessity has been generally rejected as a defense for acts forbidden by the customary and conventional laws of war inasmuch as the latter have been developed and framed with consideration for the concept of military necessity.”); *United States v. Krupp, et al.*, IX TRIALS OF WAR CRIMINALS BEFORE THE NMT 1347 (“In short these rules and customs of warfare are designed specifically for all phases of war. They comprise the law for such emergency.”); Treaty of Amity and Commerce between His Majesty the King of Prussia and the United States of America, art. 24, Sept. 10, 1785, 18 STAT. 641, 647 (declaring that “neither the pretence that war dissolves all treaties, nor any other whatever, shall be considered as annulling or suspending this and next preceding article; but on the contrary, that the state of war is precisely that for which they are provided, and during which they are to be as sacredly observed as the most acknowledged articles in the law of nature or nations.”).

<sup>28</sup> See, e.g., HAGUE IV preamble ¶5 (“these provisions, the wording of which has been inspired by the desire to diminish the evils of war, as far as military requirements permit, are intended to serve as a general rule of conduct for the belligerents in their mutual relations and in their relations with the inhabitants.”) (emphasis added).

mind has played an important part in the doctrine that the law of war is the *lex specialis* governing armed conflict.<sup>29</sup>

2.2.2.2 *Incorporation of Military Necessity Into Law of War Rules.* Although *military necessity* cannot justify actions that have been prohibited by the law of war, some law of war rules expressly incorporate *military necessity*.

For example, certain law of war rules specify that departures from what would otherwise be the rule are permissible when *absolutely* or *imperatively* necessary. In these cases, *military necessity* must not be conflated with mere convenience.<sup>30</sup> Examples of rules incorporating the concept of *absolute* or *imperative* necessity include the following:

- The activities of the representatives or delegates of the Protecting Powers shall only be restricted as an exceptional and temporary measure when this is rendered necessary by imperative military necessities.<sup>31</sup>
- The internment or placing in assigned residence of protected persons may be ordered only if the security of the Detaining Power makes it absolutely necessary.<sup>32</sup>
- If the Occupying Power considers it necessary, for imperative reasons of security, to take safety measures concerning protected persons, it may, at the most, subject them to assigned residence or to internment.<sup>33</sup>
- The seizure or destruction of enemy property must be imperatively demanded by the necessities of war.<sup>34</sup>

Certain law of war rules may direct that persons comply with an obligation, but only to the extent feasible or consistent with *military necessity*. Examples of rules incorporating the concept of *feasibility* or *necessity* include the following:

- Certain affirmative duties to take feasible precautions to reduce the risk of harm to the

---

<sup>29</sup> Refer to § 1.3.2.1 (The Law of War as the Lex Specialis Governing Armed Conflict).

<sup>30</sup> See United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1252 (rejecting defendants' "plea of military necessity, a term which they confuse with convenience and strategical interests."); General Dwight D. Eisenhower, Commander-in-Chief, U.S. Army, *Memorandum Regarding the Protection of Historical Monuments in Italy*, Dec. 29, 1943, X WHITEMAN'S DIGEST 438 (§13) (explaining that although "the phrase 'military necessity' is sometimes used where it would be more truthful to speak of military convenience or even personal convenience," *military necessity* should not "cloak slackness or indifference" to discerning whether law of war obligations, such as the protection of cultural property, may be fulfilled without any detriment to operational needs).

<sup>31</sup> Refer to § 4.25.3 (Restrictions on Representatives of the Protecting Powers).

<sup>32</sup> Refer to § 10.9.2.1 (Internment or Assigned Residence Only if Absolutely Necessary).

<sup>33</sup> Refer to § 10.9.3.1 (Internment or Assigned Residence for Imperative Reasons of Security).

<sup>34</sup> Refer to § 5.17.2 (Enemy Property – Military Necessity Standard); § 11.18.2 (Seizure or Destruction of Property During Occupation – Application of the Military Necessity Standard).

civilian population and other protected persons and objects.<sup>35</sup>

- Military medical and religious personnel, if their retention is not indispensable, are to be returned to the party to the conflict to which they belong as soon as a road is open for their return and military requirements permit.<sup>36</sup>
- Whenever military considerations permit, POW camps shall be indicated in the day time by the letters PW or PG, placed so as to be clearly visible from the air.<sup>37</sup>
- Should military necessity require the quantity of relief shipments to civilian internees to be limited, due notice thereof shall be given to the Protecting Power and to the International Committee of the Red Cross, or to any other organization giving assistance to the internees and responsible for the forwarding of such shipments.<sup>38</sup>

2.2.3 Applying Military Necessity. *Military necessity* is a difficult concept to define and apply.<sup>39</sup> What is necessary in war may depend closely on the specific facts and circumstances of a given situation, and different people often assess *military necessity* differently. The limited and unreliable nature of information available during war compounds this difficulty in evaluating what is necessary.<sup>40</sup> This difficulty runs throughout the law of war, since *military necessity* is itself important and is an element of many other principles and rules.

The law of war seeks to ameliorate these difficulties in applying *military necessity* by: (1) permitting consideration of the broader imperatives of winning the war as quickly and efficiently as possible; (2) recognizing that certain types of actions are, as a general matter, inherently militarily necessary; and (3) recognizing that persons must assess the *military necessity* of an action in good faith based on the information available to them at the relevant time and that they cannot be judged based on information that subsequently comes to light.

2.2.3.1 Consideration of the Broader Imperatives of Winning the War. In evaluating *military necessity*, one may consider the broader imperatives of winning the war as quickly and efficiently as possible and is not restricted to considering only the demands of the specific situation.

This is the case because *military necessity* justifies those measures necessary to achieve the object of war, and the object of war is not simply to prevail, but to prevail as quickly and efficiently as possible.<sup>41</sup> Thus, *military necessity* may consider the broader imperatives of

---

<sup>35</sup> Refer to § 5.2.3 (Affirmative Duties to Take Feasible Precautions for the Protection of Civilians and Other Protected Persons and Objects).

<sup>36</sup> Refer to § 7.9.4 (Return of Personnel Whose Retention Is Not Indispensable).

<sup>37</sup> Refer to § 9.11.4.3 (Marking of POW Camps).

<sup>38</sup> Refer to § 10.23.3 (Receipt of Individual and Collective Relief Shipments for Internees).

<sup>39</sup> See SPAIGHT, WAR RIGHTS ON LAND 113 (“There is no conception in International Law more elusive, protean, wholly unsatisfactory, than that of war necessity.”).

<sup>40</sup> Refer to § 1.4.2.2 (Nature of War – Limited and Unreliable Information – “Fog of War”).

<sup>41</sup> Refer to § 1.4.1 (Object of War).

winning the war and not only the demands of the immediate situation. For example, in assessing the military advantage of attacking an object, one may consider the entire war strategy rather than only the potential tactical gains from attacking that object.<sup>42</sup> An interpretation of *military necessity* that only permitted consideration of the immediate situation could prolong the fighting and increase the overall suffering caused by the war.<sup>43</sup>

Some commentators have argued that *military necessity* should be interpreted so as to permit only what is actually necessary in the prevailing circumstances, such as by requiring commanders, if possible, to seek to capture or wound enemy combatants rather than to make them the object of attack.<sup>44</sup> This interpretation, however, does not reflect customary international law or treaty law applicable to DoD personnel.<sup>45</sup> For example, the law of war does not require that enemy combatants be warned before being made the object of attack, nor does the law of war require that enemy combatants be given an opportunity to surrender before being made the object of attack.<sup>46</sup> Moreover, the law of war may justify the use of overwhelming force against enemy military objectives.<sup>47</sup>

### 2.2.3.2 Recognizing Certain Types of Actions as Generally Inherently Militarily

---

<sup>42</sup> Refer to § 5.6.7.3 (Definite Military Advantage); § 5.12.2.1 (Considering the Advantage From the Attack as a Whole – In the Operational and Strategic Context).

<sup>43</sup> See, e.g., Department of Defense, *National Military Strategy of the United States*, 10 (Jan. 1992) (“Once a decision for military action has been made, half-measures and confused objectives extract a severe price in the form of a protracted conflict which can cause needless waste of human lives and material resources, a divided nation at home, and defeat. Therefore, one of the essential elements of our national military strategy is the ability to rapidly assemble the forces needed to win -- the concept of applying decisive force to overwhelm our adversaries and thereby terminate conflicts swiftly with a minimum loss of life.”); LIEBER CODE art. 29 (“The more vigorously wars are pursued, the better it is for humanity. Sharp wars are brief.”); Count von Moltke, letter to Professor Bluntschli, Dec. 11, 1880, *reprinted in* G. SHERSTON BAKER, II HALLECK’S INTERNATIONAL LAW 19 footnote 1 (1908) (“The greatest kindness in war is to bring it to a speedy conclusion.”).

<sup>44</sup> See, e.g., Nils Melzer, Legal Adviser, International Committee of the Red Cross, *Interpretive Guidance on the Notion of Direct Participation in Hostilities Under International Humanitarian Law*, 79 (May 2009) (“In conjunction, the principles of military necessity and of humanity reduce the sum total of permissible military action from that which IHL does not expressly prohibit to that which is actually necessary for the accomplishment of a legitimate military purpose in the prevailing circumstances.”) (emphasis added); JEAN PICTET, DEVELOPMENT AND PRINCIPLES OF INTERNATIONAL HUMANITARIAN LAW 75-76 (1985) (“If we can put a soldier out of action by capturing him, we should not wound him; if we can obtain the same result by wounding him, we must not kill him.”).

<sup>45</sup> See, e.g., W. Hays Parks, Chief, International Law Branch, Office of the Judge Advocate General, Department of the Army, *Executive Order 12333 and Assassination*, Nov. 2, 1989, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3411, 3419 (“In the employment of military forces, the phrase ‘capture or kill’ carries the same meaning or connotation in peacetime as it does in wartime. There is no obligation to attempt capture rather than attack of an enemy. In some cases, it may be preferable to utilize ground forces in order to capture, e.g., a known terrorist. However, where the risk to U.S. forces is deemed too great, if the President has determined that the individual[s] in question pose such a threat to U.S. citizens or the national security interests of the United States as to require the use of military force, it would be legally permissible to employ, e.g., an airstrike against that individual or group rather than attempt his, her, or their capture, and would not violate the prohibition on assassination.”).

<sup>46</sup> Refer to § 5.4.6.1 (Surprise Attacks); § 5.4.6.2 (Attacks on Retreating Forces).

<sup>47</sup> Refer to § 5.4.6 (Force That May Be Applied Against Military Objectives).

*Necessary*. The law of war recognizes that certain types of actions are, as a general matter, inherently militarily necessary.<sup>48</sup> For example, attacking enemy combatants is generally lawful.<sup>49</sup> Similarly, the internment of enemy POWs is generally lawful.<sup>50</sup> Such rules may be viewed as an example of how, when specific rules are applicable, there is less need to resort to fundamental law of war principles as a general guide for conduct during war.<sup>51</sup>

2.2.3.3 *Good Faith Evaluation of Military Necessity Based on the Available Information*. In what is sometimes called the “Rendulic Rule,” the law of war recognizes that persons must assess the *military necessity* of an action based on the information available to them at that time; they cannot be judged based on information that subsequently comes to light.<sup>52</sup>

## 2.3 HUMANITY

*Humanity* may be defined as the principle that forbids the infliction of suffering, injury, or destruction unnecessary to accomplish a legitimate military purpose.<sup>53</sup>

2.3.1 *Humanity as a Prohibition*. Although *military necessity* justifies certain actions necessary to defeat the enemy as quickly and efficiently as possible, *military necessity* cannot justify actions not necessary to achieve this purpose, such as cruelty or wanton violence.<sup>54</sup> Moreover, once a military purpose has been achieved, inflicting more suffering is unnecessary

---

<sup>48</sup> See VATTEL, THE LAW OF NATIONS 295 (3.9.173) (explaining that the law of war seeks to avoid contentious disputes between belligerents about whether actions are militarily necessary by establishing “general rules independent of circumstances and of certain and easy application” and thus “permits or tolerates every act which in its essential nature is adapted to attaining the end of war; and it does not stop to consider whether the act was unnecessary, useless, or superfluous in a given case unless there is the clearest evidence that an exception should be made in that instance”).

<sup>49</sup> Refer to § 5.5.1 (Persons, Objects, and Locations That Are Not Protected From Being Made the Object of Attack).

<sup>50</sup> Refer to § 9.11.1 (Internment in POW Camps).

<sup>51</sup> Refer to § 2.1.2.2 (Law of War Principles as a General Guide).

<sup>52</sup> Refer to § 5.3 (Assessing Information Under the Law of War).

<sup>53</sup> See, e.g., 2001 CANADIAN MANUAL ¶202(6) (humanity “forbids the infliction of suffering, injury or destruction not actually necessary for the accomplishment of legitimate military purposes.”); 2004 UK MANUAL ¶2.4 (“Humanity forbids the infliction of suffering, injury, or destruction not actually necessary for the accomplishment of legitimate military purposes.”); GREENSPAN, MODERN LAW OF LAND WARFARE 315 (humanity “forbids the employment of all such kinds and degrees of violence as are not necessary for the purpose of the war”); 1958 UK MANUAL ¶3 (humanity is the principle “according to which kinds and degrees of violence which are not necessary for the purpose of war are not permitted to a belligerent.”); LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 227 (§67) (Humanity “postulates that all such kinds and degrees of violence as are not necessary for the overpowering of the opponent should not be permitted to a belligerent.”); 1940 RULES OF LAND WARFARE ¶4b (defining the principle of humanity as “prohibiting employment of any such kind or degree of violence as is not actually necessary for the purpose of the war”); 1914 RULES OF LAND WARFARE ¶9 (The principle of humanity “says that all such kinds and degrees of violence as are not necessary for the purpose of war are not permitted to a belligerent.”).

<sup>54</sup> United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1253-54 (“[Military necessity] does not permit the killing of innocent inhabitants for purposes of revenge or the satisfaction of a lust to kill. ... It does not admit the wanton devastation of a district or the willful infliction of suffering upon its inhabitants for the sake of suffering alone.”); LIEBER CODE art. 16 (“Military necessity does not admit to cruelty -- that is, the infliction of suffering for the sake of suffering or for revenge, ...”).

and should be avoided. For example, if an enemy combatant has been placed *hors de combat* (e.g., incapacitated by being severely wounded or captured), no military purpose is served by continuing to attack him or her.<sup>55</sup> Thus, the principle of *humanity* forbids making enemy combatants who have been placed *hors de combat* the object of attack.<sup>56</sup> Similarly, the principle of *humanity* has been viewed as the source of the civilian population's immunity from being made the object of attack because their inoffensive and harmless character means that there is no military purpose served by attacking them.<sup>57</sup>

#### 2.3.1.1 Relationship Between the Principles of Humanity and Military Necessity.

Humanity is related to military necessity, and these principles logically complement one another.

Humanity may be viewed as the logical inverse of the principle of military necessity. If certain necessary actions are justified, then certain unnecessary actions are prohibited. The principle of humanity is an example of how the concept of necessity can function as a limitation as well as a justification.<sup>58</sup>

Because humanity forbids those actions that are unnecessary, the principle of humanity is not in tension with military effectiveness, but instead reinforces military effectiveness.<sup>59</sup>

2.3.2 Humanity and Law of War Rules. *Humanity* animates certain law of war rules, including:

- fundamental safeguards for persons who fall into the hands of the enemy;<sup>60</sup>
- protections for the civilian population and civilian objects;<sup>61</sup>
- protections for military medical personnel, units, and transports;<sup>62</sup>

---

<sup>55</sup> See 2004 UK MANUAL ¶2.4.1 (“The principle of humanity is based on the notion that once a military purpose has been achieved, the further infliction of suffering is unnecessary. Thus, if an enemy combatant has been put out of action by being wounded or captured, there is no military purpose to be achieved by continuing to attack him. For the same reason, the principle of humanity confirms the basic immunity of civilian populations and civilian objects from attack because civilians and civilian objects make no contribution to military action.”).

<sup>56</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

<sup>57</sup> Refer to § 4.2.1 (Development of the Distinction Between the Armed Forces and the Civilian Population).

<sup>58</sup> Cf. *Ex parte Milligan*, 71 U.S. 2, 127 (1866) (“If, in foreign invasion or civil war, the courts are actually closed, and it is impossible to administer criminal justice according to law, then, on the theatre of active military operations, where war really prevails, there is a necessity to furnish a substitute for the civil authority, thus overthrown, to preserve the safety of the army and society, and as no power is left but the military, it is allowed to govern by martial rule until the laws can have their free course. As necessity creates the rule, so it limits its duration, for, if this government is continued after the courts are reinstated, it is a gross usurpation of power.”) (emphasis added).

<sup>59</sup> Refer to § 18.2.1 (Reinforcing Military Effectiveness).

<sup>60</sup> Refer to § 8.2 (Humane Treatment of Detainees); § 9.5 (Humane Treatment and Basic Protections for POWs); § 10.5 (Humane Treatment and Other Basic Protections for Protected Persons).

<sup>61</sup> Refer to § 5.2 (Overview of Rules for the Protection of Civilians).

- prohibitions on weapons that are calculated to cause superfluous injury;<sup>63</sup> and
- prohibitions on weapons that are inherently indiscriminate.<sup>64</sup>

The principle of *humanity* may help interpret or apply these and other law of war rules. For example, the requirement that POWs be interned only in premises located on land has been understood not to prohibit POW detention aboard ships pending the establishment of suitable facilities on land, if detention aboard ships provides the most appropriate living conditions for POWs.<sup>65</sup> Similarly, the U.S. reservation to CCW Protocol III on Incendiary Weapons makes clear that U.S. forces may use incendiary weapons against military objectives located in concentrations of civilians where it is judged that such use would cause fewer casualties and/or less collateral damage than alternative weapons.<sup>66</sup>

## 2.4 PROPORTIONALITY

*Proportionality* may be defined as the principle that even where one is justified in acting, one must not act in a way that is unreasonable or excessive.<sup>67</sup>

*Proportionality* has also been viewed as a legal restatement of the military concept of economy of force.<sup>68</sup>

### 2.4.1 Proportionality as a Limit on the Exercise of a Right.

2.4.1.1 *Justification in Acting.* *Proportionality* is implicated in cases in which one is justified in acting. In *jus in bello*, for example, *military necessity* justifies making military objectives, such as enemy combatants, the object of attack. So, an attack on enemy combatants that incidentally damages civilian property would raise *proportionality* considerations. On the other hand, where there is no justification for acting, such as unlawful attacks directed against

---

<sup>62</sup> Refer to § 7.8 (Respect and Protection of Categories of Medical and Religious Personnel); § 7.10 (Military Medical Units and Facilities); § 7.11 (Ground Transport); § 7.12 (Hospital Ships, Sick-Bays in Warships, and Coastal Rescue Craft); § 7.14 (Military Medical Aircraft).

<sup>63</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>64</sup> Refer to § 6.7 (Inherently Indiscriminate Weapons).

<sup>65</sup> Refer to § 9.11.3.1 (Location on Land).

<sup>66</sup> Refer to § 6.14.3.2 (U.S. Reservation to CCW Protocol III on Incendiary Weapons).

<sup>67</sup> See Daniel Webster, *Letter to Mr. Fox*, Apr. 24, 1841, reprinted in DANIEL WEBSTER, THE DIPLOMATIC AND OFFICIAL PAPERS OF DANIEL WEBSTER, WHILE SECRETARY OF STATE 110 (1848) (explaining that even actions taken in self-defense should not be “unreasonable or excessive” since such actions “justified by the necessity of self-defense, must be limited by that necessity and kept clearly within it”). See also GROTIUS, LAW OF WAR & PEACE 601 (3.1.4.2) (“we must also beware of what happens, and what we foresee may happen, beyond our purpose, unless the good which our action has in view is much greater than the evil which is feared, or, greater than the fear of the evil.”); VATTEL, THE LAW OF NATIONS 279 (3.8.137) (explaining that a Sovereign has “the right to make war upon his fellow-men as a matter of necessity, and as a remedy,” but the Sovereign should not “push the remedy beyond its just limits,” and should “be careful not to make it more severe or more disastrous to mankind than the care of his own safety and the defense of his rights require.”).

<sup>68</sup> Refer to § 5.12.3.1 (The Military Concept of Economy of Force).

the civilian population, a *proportionality* analysis would not be necessary to reach the conclusion that the attack would be unlawful.

2.4.1.2 *Unreasonable or Excessive*. *Proportionality* generally weighs the justification for acting against the expected harms to determine whether the latter are disproportionate in comparison to the former. In war, incidental damage to the civilian population and civilian objects is unfortunate and tragic, but inevitable.<sup>69</sup> Thus, applying the principle of proportionality in conducting attacks does not require that no incidental damage result from attacks.<sup>70</sup> Rather, this principle creates obligations to refrain from attacks in which the expected harm incidental to such attacks would be excessive in relation to the concrete and direct military advantage anticipated to be gained and to take feasible precautions in planning and conducting attacks to reduce the risk of harm to civilians and other persons and objects protected from being made the object of attack.<sup>71</sup>

Under the law of war, judgments of *proportionality* often involve difficult and subjective comparisons.<sup>72</sup> Recognizing these difficulties, States have declined to use the term “proportionality” in law of war treaties because it could incorrectly imply an equilibrium between considerations or suggest that a precise comparison between them is possible.<sup>73</sup>

2.4.2 Examples Where Proportionality Is Reflected in Law of War Rules. The principle of proportionality is reflected in many areas in the law of war.

*Proportionality* is often used to refer to the *jus in bello* prohibition on attacks expected to cause excessive incidental harm.<sup>74</sup> However, the principle of proportionality described in a more general sense in this section also underlies the affirmative duties to take feasible precautions for the protection of civilians and other protected persons and objects.<sup>75</sup> These obligations apply both in conducting attacks and to the party subject to attack.<sup>76</sup> *Proportionality* also plays a role in assessing whether weapons are prohibited because they are calculated to cause unnecessary

---

<sup>69</sup> Refer to § 1.4.2 (Nature of War).

<sup>70</sup> Refer to § 5.10 (Proportionality in Conducting Attacks).

<sup>71</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm); § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>72</sup> Refer to § 5.10.2.2 (Subjective Aspects of the Decisions and Judgments Required by the Principle of Proportionality). Compare § 2.2.3 (Applying *Military Necessity*).

<sup>73</sup> See, e.g., BOTHE, PARTSCH, & SOLF, NEW RULES 309-10 (AP I art. 51, ¶2.6.2) (describing how some government delegations in the 1974-1977 Diplomatic Conference opposed incorporation of the term “proportionality” or acknowledgement of a law of war “rule” of proportionality in AP I and AP II).

<sup>74</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>75</sup> Refer to § 5.2.3 (Affirmative Duties to Take Feasible Precautions for the Protection of Civilians and Other Protected Persons and Objects).

<sup>76</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects); § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

suffering.<sup>77</sup>

In *jus ad bellum*, *proportionality* requires that the State's means in resorting to force be proportionate to its just cause in using force, such as the threat that the State seeks to address.<sup>78</sup> *Proportionality* is also a requirement for reprisals, which must respond in a proportionate manner to the preceding illegal act by the party against which they are taken.<sup>79</sup>

## 2.5 DISTINCTION

*Distinction*, sometimes called *discrimination*, obliges parties to a conflict to distinguish principally between the armed forces and the civilian population, and between unprotected and protected objects.<sup>80</sup>

*Distinction* may be understood as encompassing two sets of reinforcing duties. Parties to a conflict must apply a framework of legal classes for persons and objects by: (1) discriminating in conducting attacks against the enemy; and (2) distinguishing a party's own persons and objects.

2.5.1 Distinction as a Framework of Legal Classes. *Distinction* requires parties to a conflict to apply a framework of legal classes for persons and objects, each class characterized by different rights, duties, and liabilities.

Principally, *distinction* seeks to separate the armed forces and the civilian population.<sup>81</sup> There are, however, certain special cases, such as military medical and religious personnel, who may be treated like a combatant for one purpose (*e.g.*, detention) but like a civilian for another purpose (*e.g.*, not being made the object of attack).<sup>82</sup> However, for any particular legal purpose, a person may not claim the distinct rights afforded to both combatants and civilians at the same

---

<sup>77</sup> Refer to § 6.6.3.3 (Clearly Disproportionate).

<sup>78</sup> Refer to § 1.11.1.2 (The Means Must Be Proportionate to the Just Cause (Proportionality – Jus ad Bellum)).

<sup>79</sup> Refer to § 18.18.2.4 (Proportionality in Reprisal).

<sup>80</sup> See, *e.g.*, J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Senator Edward Kennedy, Sept. 22, 1972, reprinted in 67 AJIL 122 (1973) (“A summary of the laws of armed conflict, in the broadest terms, reveals certain general principles including the following: ... (c). That a distinction must be made at all times between persons taking part in the hostilities and members of the civilian population to the effect that the civilians be spared as much as possible. These general principles were recognized in a resolution unanimously adopted by the United Nations General Assembly in its Resolution dated 13 January 1969 (Resolution 2444 (XXIII)). We regard them as declaratory of existing customary international law.”); Ex parte Quirin, 317 U.S. 1, 30 (1942) (“By universal agreement and practice, the law of war draws a distinction between the armed forces and the peaceful populations of belligerent nations.”); 2004 UK MANUAL ¶2.5 (“Since military operations are to be conducted only against the enemy’s armed forces and military objectives, there must be a clear distinction between the armed forces and civilians, or between combatants and non-combatants, and between objects that might legitimately be attacked and those that are protected from attack.”). Consider AP I art. 48 (“In order to ensure respect for and protection of the civilian population and civilian objects, the Parties to the conflict shall at all times distinguish between the civilian population and combatants and between civilian objects and military objectives and accordingly shall direct their operations only against military objectives.”).

<sup>81</sup> Refer to § 4.2 (The Armed Forces and the Civilian Population).

<sup>82</sup> Refer to § 4.2.3 (Mixed Cases).

time.<sup>83</sup>

2.5.2 Discriminating in Conducting Attacks Against the Enemy. *Distinction* requires parties to a conflict to discriminate in conducting attacks against the enemy.<sup>84</sup> On the one hand, consistent with *military necessity*, parties may make enemy combatants and other military objectives the object of attack.<sup>85</sup> On the other hand, consistent with *humanity*, parties may not make the civilian population and other protected persons and objects the object of attack.<sup>86</sup> Moreover, persons using force must discriminate between legitimate and illegitimate objects of attack in good faith based on the information available to them at the time.<sup>87</sup>

2.5.3 Distinguishing a Party's Own Persons and Objects. *Distinction* enjoins the party controlling the population<sup>88</sup> to use its best efforts to distinguish or separate its military forces and war-making activities from members of the civilian population to the maximum extent feasible so that civilian casualties and damage to civilian objects incidental to attacks on military objectives will be minimized as much as possible.<sup>89</sup>

Parties to a conflict must: (1) take certain measures to help ensure that military forces and civilians can be visually distinguished from one another; (2) physically separate, as feasible, their military objectives from the civilian population and other protected persons and objects; and (3) refrain from the misuse of protected persons and objects to shield military objectives.

2.5.3.1 Measures to Help Ensure That Military Forces and Civilians Are Visually Distinguishable From One Another. Parties to a conflict must take certain measures, in offense or defense, to help ensure that military forces and civilians can be visually distinguished from one another.

First, parties to a conflict must not disguise their armed forces as civilians or as other protected categories of persons in order to kill or wound opposing forces.<sup>90</sup> Second, other rules

---

<sup>83</sup> Refer to § 4.2.2 (No Person May Claim the Distinct Rights Afforded to Both Combatants and Civilians at the Same Time).

<sup>84</sup> Refer to § 5.5 (Discrimination in Conducting Attacks).

<sup>85</sup> Refer to § 5.5.1 (Persons, Objects, and Locations That Are Not Protected From Being Made the Object of Attack).

<sup>86</sup> Refer to § 5.5.2 (Persons, Objects, and Locations That Are Protected From Being Made the Object of Attack).

<sup>87</sup> Refer to § 5.3 (Assessing Information Under the Law of War).

<sup>88</sup> Refer to § 5.2.1 (Responsibility of the Party Controlling Civilian Persons and Objects).

<sup>89</sup> See J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Senator Edward Kennedy, Sept. 22, 1972, reprinted in 67 AJIL 122 (1973) ("A summary of the laws of armed conflict, in the broadest terms, reveals certain general principles including the following: ... (c). That a distinction must be made at all times between persons taking part in the hostilities and members of the civilian population to the effect that the civilians be spared as much as possible. ... The principle in (c) addresses primarily the Party exercising control over members of the civilian population. This principle recognizes the interdependence of the civilian community with the overall war effort of a modern society. But its application enjoins the party controlling the population to use its best efforts to distinguish or separate its military forces and war making activities from members of the civilian population to the maximum extent feasible so that civilian casualties and damage to civilian objects incidental to attacks on military objectives, will be minimized as much as possible.").

<sup>90</sup> Refer to § 5.2.2 (Treachery or Perfidy Used to Kill or Wound).

obligate parties to mark protected persons and objects to help ensure they receive the protections of that status.<sup>91</sup> Third, certain rules encourage parties to a conflict to identify certain persons and objects as unprotected. For example, during international armed conflict, members of organized resistance movements must, *inter alia*, wear fixed distinctive signs visible at a distance and carry arms openly to distinguish themselves from the civilian population in order for members of their group to receive POW status.<sup>92</sup>

2.5.3.2 Feasible Measures to Separate Physically a Party's Own Military Objectives From the Civilian Population and Other Protected Persons and Objects. *Distinction* also creates obligations for parties to a conflict to take feasible measures to separate physically their own military objectives from the civilian population and other protected persons and objects.<sup>93</sup>

For example, it may be appropriate to evacuate civilians from danger areas.<sup>94</sup> Similarly, if feasible, military commanders should avoid placing military objectives in densely populated areas.<sup>95</sup> In addition, it may be appropriate to establish zones where civilians and other protected persons may seek refuge.<sup>96</sup>

2.5.3.3 Refrain From the Misuse of Protected Persons and Objects to Shield Military Objectives. Parties to a conflict must refrain from the misuse of civilians and other protected persons and objects to shield their own military objectives.<sup>97</sup> For example, it is prohibited to take hostages or otherwise to endanger deliberately protected persons or objects for the purpose of deterring enemy military operations.

Misusing protected persons and objects to shield military objectives also offends *honor* because it constitutes a breach of trust with the enemy and thus undermines respect for the law of war.<sup>98</sup>

2.5.4 Misconceptions About Distinction. *Distinction* seeks to ensure that protected and unprotected categories are distinct from one another, not distinct in the abstract. For example, using camouflage is consistent with *distinction* because foliage is not a protected category and because civilians generally do not wear camouflage.<sup>99</sup> Similarly, U.S. forces have worn non-standard uniforms to blend with local forces while remaining distinct from the civilian

---

<sup>91</sup> Refer to § 5.14.4 (Using Distinctive and Visible Signs to Identify Protected Persons and Objects as Such).

<sup>92</sup> Refer to § 4.6.4 (Having a Fixed Distinctive Sign Recognizable at a Distance); § 4.6.5 (Carrying Arms Openly).

<sup>93</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>94</sup> Refer to § 5.14.2 (Removing Civilians and Civilian Objects From the Vicinity of Military Objectives).

<sup>95</sup> Refer to § 5.14.1 (Refraining From Placing Military Objectives in Densely Populated Areas).

<sup>96</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>97</sup> Refer to § 5.16 (Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations).

<sup>98</sup> Refer to § 2.6.2 (Certain Amount of Fairness in Offense and Defense).

<sup>99</sup> Refer to § 5.25.2 (Examples of Ruses), footnote 799 and accompanying text.

population.<sup>100</sup>

*Distinction* addresses the different rights, duties, and liabilities of the categories; it does not require that a particular person or object fall within a particular category. For example, the principle of *distinction* does not prohibit an otherwise civilian object from being used for military purposes, thereby turning it into a military objective.<sup>101</sup> However, if such an object were seized from the enemy, such seizure would have to have been imperatively demanded by the necessities of war.<sup>102</sup> Similarly, persons with medical training or who provide medical care on the battlefield are not necessarily military medical personnel and need not be identified as such.<sup>103</sup> Rather, a State may reserve the ability to use these persons as combatants by refraining from designating them as exclusively engaged in medical activities.

2.5.5 Reinforcing Duties – Discriminating in Conducting Attacks and Distinguishing a Party’s Own Persons and Objects. Discriminating in conducting attacks against the enemy and distinguishing a party’s own persons and objects reinforce one another.

A party is not relieved of its obligations to discriminate in conducting attacks by the failures of its adversary to distinguish its military objectives from protected persons and objects.<sup>104</sup> Nonetheless, the practical ability of a party to a conflict to discriminate in conducting attacks often depends on the degree to which its enemy has distinguished its military objectives from its protected persons and objects. For example, if enemy forces intermingle with civilians, then a party may be less able to avoid incidentally harming the civilian population.

In addition, the degree to which an enemy force in fact discriminates in conducting attacks may affect whether a party distinguishes its protected persons and objects from its military objectives. For example, if enemy forces do not respect the red cross emblem, but instead specifically attack persons wearing it, then the party receiving these attacks is less likely to distinguish its medical personnel and transports.<sup>105</sup> Similarly, if insurgents seek to attack civilians in a non-international armed conflict, positioning military forces near the civilian population may be essential to protecting the civilian population.<sup>106</sup>

## 2.6 HONOR

*Honor* demands a certain amount of fairness in offense and defense and a certain mutual

---

<sup>100</sup> Refer to § 5.25.2.1 (Mimicking Other Friendly Forces).

<sup>101</sup> Refer to § 5.16.1 (Protected Persons and Objects).

<sup>102</sup> Refer to § 5.17.2.2 (Seizure or Destruction of Enemy Property to Support Military Operations).

<sup>103</sup> Refer to § 4.9.2 (Requirements for Military Medical and Religious Status).

<sup>104</sup> Refer to § 5.4.4 (Failure by the Defender to Separate or Distinguish Does Not Relieve the Attacker of the Duty to Discriminate in Conducting Attacks).

<sup>105</sup> Refer to § 7.15.2.1 (Removal or Obscuration of the Distinctive Emblem).

<sup>106</sup> Refer to § 17.5.2.1 (Positioning Military Forces Near the Civilian Population to Win Their Support and to Protect Them).

respect between opposing military forces.<sup>107</sup>

2.6.1 Honor – Background and Notes on Terminology. *Honor* has been vital to the development of the law of war, which was preceded by warriors’ codes of ethical behavior.<sup>108</sup> U.S. military canons of personal conduct continue to emphasize the importance of honor as a core value. Honor as a core value and other ethical norms continue to be vital as a medium for the implementation of the law of war.<sup>109</sup>

*Honor* has also been called *chivalry*. *Chivalry* is often associated with a specific historical context—a code of behavior for knights in Europe during the Middle Ages. Rather than refer to this specific context, the term *honor* is used in this manual to indicate more clearly that the law of war principle of *honor* draws from warriors’ codes from a variety of cultures and time periods.

2.6.2 Certain Amount of Fairness in Offense and Defense. *Honor* requires a certain amount of fairness in offense and defense. *Honor* forbids resort to means, expedients, or conduct

---

<sup>107</sup> See, e.g., LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 227 (§67) (chivalry “arose in the Middle Ages and introduced a certain amount of fairness in offence and defence, and a certain mutual respect”); 1958 UK MANUAL ¶3 (“The development of the law of war has been determined by three principles: ... and thirdly, the principle of chivalry, which demands a certain amount of fairness in offence and defence, and a certain mutual respect between the opposing forces.”); 1914 RULES OF LAND WARFARE ¶9 (“The development of the laws and usages of war is determined by three principles. ... *Third*, the principle of chivalry, which demands a certain amount of fairness in offense and defense and a certain mutual respect between opposing forces.”); UNITED KINGDOM WAR OFFICE, MANUAL OF MILITARY LAW, *Chapter XIV, The Laws and Usages of War on Land*, 234 (¶3) (1914) (“The development of the laws and usages of war is determined by three principles. ... And there is, thirdly, the principle of chivalry, which demands a certain amount of fairness in offence and defence, and a certain mutual respect between the opposing forces.”).

<sup>108</sup> See, e.g., LESLIE C. GREEN, THE CONTEMPORARY LAW OF ARMED CONFLICT 20-23 (2000) (describing references to warrior codes from ancient Israel, China, India, Greece, Rome, and Islam).

<sup>109</sup> John Keegan, *If you won’t, we won’t: Honour and the decencies of battle*, THE TIMES LITERARY SUPPLEMENT, Issue 4834, 11 (Nov. 24, 1995; London, England) (“In the most perceptive sentence in *The Laws of War*, Adam Roberts observes, during his survey of the effect of the Hague Conventions of 1895 and 1907, that ‘the experience of land war in two world wars must raise a question as to whether formal legal codification is necessarily superior to notions of custom, honour, professional standards, and natural law’ in making for battlefield decencies. He might have made his point more emphatically. There is no substitute for honour as a medium of enforcing decency on the battlefield, never has been and never will be. There are no judges, more to the point, no policemen at the place where death is done in combat; that may be, in fact, the intended and all too often true, meaning of ‘*silent leges inter arma*’. All turns on the values of the junior leader present at the moment when the opponent’s capacity or will to resist fails, he ceases to be a combatant and he must hope for the mercy of the suddenly stronger.”); for example, MORAL COURAGE IN COMBAT: THE MY LAI STORY, *Lecture by Hugh Thompson*, 26 (U.S. Naval Academy Center for Professional Military Ethics 2003) (“**Question** Do you attribute your ability to see through the moral fog that day, better than those who made the massacre at My Lai happen, to any prior military training or experience? **Mr. Thompson** No, I don’t believe it was any military training, because I had been through the training that everybody else had been. We had a 50-minute class of instruction on the Geneva Convention, a 50-minute class of instruction on the Code of Conduct, and a 50-minute class of instruction on the rules of engagement. ... But [my parents] always taught me to help the underdog. Don’t be a bully and live by the golden rule. That golden rule says so much, and it’s so simple and so basic. You know, I can’t say it was a leadership 405 or whatever. I just think it was my parents, and they taught me right from wrong.”).

that would constitute a breach of trust with the enemy.<sup>110</sup>

2.6.2.1 *Acceptance That Belligerent Rights Are Not Unlimited.* In requiring a certain amount of fairness in offense and defense, *honor* reflects the principle that parties to a conflict must accept that certain limits exist on their ability to conduct hostilities. For example, parties to the conflict must accept that the right of belligerents to adopt means of injuring the enemy is not unlimited.<sup>111</sup> Here, *honor* does not address what those limits are so much as requires that parties accept that there are legal limits that govern their conduct of hostilities.<sup>112</sup> This acceptance is a prerequisite for the existence and operation of the law of war in the way that the principle of *pacta sunt servanda* (treaties are binding on parties and must be performed by them in good faith) provides a necessary foundation for treaties to exist and operate as instruments that are legally binding on States.<sup>113</sup>

Thus, *honor* may be understood to provide a foundation for obligations that help enforce and implement the law of war or special agreements between belligerents during armed conflict.<sup>114</sup> For example, *honor* may be understood to provide the foundation for the requirement for persons to comply with the law of war in good faith.<sup>115</sup> Similarly, POWs are bound to adhere to paroles on their personal honor.<sup>116</sup>

2.6.2.2 *Prohibition on Conduct That Breaches Trust With the Enemy.* In requiring a certain amount of fairness in offense and defense, *honor* also forbids resort to means, expedients, or conduct that would constitute a breach of trust with the enemy. In particular, *honor* requires a party to a conflict to refrain from taking advantage of its opponent's adherence to the law by falsely claiming the law's protections.

*Honor* forbids such conduct because it may: (1) undermine the protections afforded by the law of war; (2) impair non-hostile relations between opposing belligerents; and (3) damage the basis for the restoration of peace short of complete annihilation of one belligerent by

---

<sup>110</sup> 1940 RULES OF LAND WARFARE ¶4(c) (chivalry “denounces and forbids resort to dishonorable means, expedients, or conduct”); 2001 CANADIAN MANUAL ¶202(7) (“An armed conflict is rarely a polite contest. Nevertheless, the concept of chivalry is reflected in specific prohibitions such as those against dishonourable or treacherous conduct and against misuse of enemy flags or flags of truce.”).

<sup>111</sup> See, e.g., 1899 HAGUE II REG. art. 22 (“The right of belligerents to adopt means of injuring the enemy is not unlimited.”); HAGUE IV REG. art. 22 (same); CCW preamble (noting “the principle of international law that the right of the parties to an armed conflict to choose methods or means of warfare is not unlimited”). Consider AP I art. 35(1) (“In any armed conflict, the right of the Parties to the conflict to choose methods or means of warfare is not unlimited.”).

<sup>112</sup> Legality of the Threat or Use of Nuclear Weapons, Advisory Opinion, 1996 I.C.J. 583, 585 (¶11) (Dissenting Opinion of Judge Higgins) (“The legal principle by which parties to an armed conflict do not have an unlimited choice of weapons or of methods of warfare... [is intended] to ensure that weapons, both in the context of their use, and in the methods of warfare, must comply with the other substantive rules.”).

<sup>113</sup> Refer to § 1.10.1.1 (Legal Force of Treaties Among States).

<sup>114</sup> Refer to § 18.1.2 (National Obligations to Implement and Enforce the Law of War).

<sup>115</sup> Refer to § 18.3 (Duties of Individual Members of the Armed Forces).

<sup>116</sup> Refer to § 9.11.2 (Parole of POWs).

another.<sup>117</sup>

For example, enemies must deal with one another in good faith in their non-hostile relations.<sup>118</sup> And even in the conduct of hostilities, good faith prohibits: (1) killing or wounding enemy persons by resort to perfidy; (2) misusing certain signs; (3) fighting in the enemy's uniform; (4) feigning non-hostile relations in order to seek a military advantage; and (5) compelling nationals of a hostile party to take part in the operations of war directed against their own country.<sup>119</sup> *Honor*, however, does not forbid parties from using ruses and other lawful deceptions against which the enemy ought to take measures to protect itself.<sup>120</sup>

2.6.3 Certain Mutual Respect Between Opposing Military Forces. *Honor* demands a certain mutual respect between opposing military forces.

Opposing military forces should respect one another outside of the fighting because they share a profession and they fight one another on behalf of their respective States and not out of personal hostility.<sup>121</sup> For example, this principle is reflected in the rule that POWs are legally in the hands of the enemy State and not the individuals or military units who have captured them.<sup>122</sup>

2.6.3.1 *Honor and Rules for POW Captivity.* In demanding a certain mutual respect between opposing military forces, *honor* animates rules that relate to the treatment of POWs. For example, *honor* is one of the foundations for the humane treatment of POWs.<sup>123</sup> The principle of *honor* is also reflected in rules that require POWs and their captors to treat one another with respect. For example, POWs must be treated with respect for their honor and person.<sup>124</sup> As another example, POWs, with the exception of officers, must salute and show to all officers of the Detaining Power the external marks of respect provided for by the regulations

<sup>117</sup> Refer to § 5.21.1 (Harms From Breaches of Good Faith).

<sup>118</sup> Refer to § 12.2 (Principle of Good Faith in Non-Hostile Relations).

<sup>119</sup> Refer to § 5.21 (Overview of Good Faith, Perfidy, and Ruses).

<sup>120</sup> Refer to § 5.25 (Ruses of War and Other Lawful Deceptions).

<sup>121</sup> See JEAN-JACQUES ROUSSEAU, *THE SOCIAL CONTRACT & DISCOURSES* 12 (1920) (“The object of war being the destruction of the hostile State, the other side has a right to kill its defenders, while they are bearing arms; but as soon as they lay them down and surrender, they cease to be enemies or instruments of the enemy, and become once more merely men, whose life no one has any right to take.”).

<sup>122</sup> Refer to § 9.2.2 (Responsibility of the Detaining Power).

<sup>123</sup> See, e.g., Samuel Falle, *Chivalry*, 113 *Proceedings Magazine*, Jan. 1987 (“During World War II, the Japanese were portrayed as brutal, subhuman savages—the hordes of Attila or Genghis Khan. Certainly they did terrible things, but I was fortunate enough to see something different. It is called ‘chivalry,’ which the Oxford Dictionary defines as a ‘medieval knightly system, with its religious, moral, and social code; ideal knight’s characteristics.’ I see it as compassion and magnanimity toward a beaten enemy.”); United States, *et al. v. Göring, et al., Judgment, I TRIAL OF THE MAJOR WAR CRIMINALS BEFORE THE IMT* 289 (“When, on 8 September 1941, OKW issued its ruthless regulations for Soviet POW’s, Canaris wrote to [the defendant] Keitel that under international law the SD should have nothing to do with this matter. On this memorandum, in Keitel’s handwriting, dated 23 September and initialed by him, is the statement: ‘The objections arise from the military concept of chivalrous warfare. This is the destruction of an ideology. Therefore I approve and back the measures.’”).

<sup>124</sup> Refer to § 9.5.1 (Respect for Their Persons and Honor).

applying in their own forces.<sup>125</sup> In addition, capitulations agreed upon between belligerents must take into account the rules of military honor.<sup>126</sup>

2.6.3.2 *Honor and the Class of Military Forces.* In demanding a certain mutual respect between opposing military forces, *honor* also reflects the premise that military forces are a common class of professionals who have undertaken to comport themselves honorably.<sup>127</sup>

*Honor* thus animates the rules that determine who qualifies for privileges of combatant status. For example, an armed group must, *inter alia*, be organized under a responsible command and conduct its operations in accordance with the law of war in order for its members to be entitled to POW status during international armed conflict.<sup>128</sup> On the other hand, private persons are generally denied the privileges of combatant status because they do not belong to this class of combatants.<sup>129</sup>

The principle that combatants share a common class has also been a foundation for the trial of enemy combatants by military tribunals.<sup>130</sup> For example, the GPW expresses a preference for POWs to be tried by military courts rather than civilian courts.<sup>131</sup>

---

<sup>125</sup> Refer to § 9.22.3 (Saluting Between POWs and Officers of the Detaining Power).

<sup>126</sup> Refer to § 12.8.3 (Rules of Military Honor).

<sup>127</sup> SPAIGHT, AIR POWER AND WAR RIGHTS 109-10 (“Chivalry is difficult to define but it means broadly, the waging of war in accordance with certain well-recognised formalities and courtesies. It is an influence quite distinct from the humanitarian one; indeed, it prevailed in its full vigour at a time in which humanitarian interests were otherwise entirely disregarded: witness the cruelty of the Black Prince to the people of Limoges. It is again free from any necessary connection with Christianity; Saladin was as chivalrous as Coeur-de-Lion. It is, indeed, the spirit pure and simple, of knighthood. It expresses in effect the feeling of the combatants that they belong to a caste, that their encounter in arms is a high ceremonial, that an opponent is entitled to all honour and respect, that your enemy, though he is your enemy, is at the same time a brother in the same noble family of knights-at-arms. Until gunpowder came to democratise war, chivalry and chivalry alone was an influence making for moderation in war. It was the first motive power for the creation of a restrictive law of war.”).

<sup>128</sup> Refer to § 4.6.1 (GPW 4A(2) Conditions in General).

<sup>129</sup> Refer to § 4.18.3 (Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status).

<sup>130</sup> General Douglas MacArthur, *Action of the Confirming Authority*, Feb. 7, 1946, United States v. Yamashita (U.S. Military Commission, Manila, Dec. 7, 1945), LEVIE, DOCUMENTS ON POWS 298 (“It is not easy for me to pass penal judgment upon a defeated adversary in a major military campaign. I have reviewed the proceedings in vain search for some mitigating circumstance on his behalf. I can find none. Rarely has so cruel and wanton a record been spread to public gaze. Revolting as this may be in itself, it pales before the sinister and far reaching implication thereby attached to the profession of arms. The soldier, be he friend or foe, is charged with the protection of the weak and unarmed. It is the very essence and reason for his being. When he violates this sacred trust, he not only profanes his entire cult but threatens the very fabric of international society. The traditions of fighting men are long and honorable. They are based upon the noblest of human traits, - sacrifice. This officer, of proven field merit, entrusted with high command involving authority adequate to responsibility, has failed this irrevocable standard; has failed his duty to his troops, to his country, to his enemy, to mankind; has failed utterly his soldier faith. The transgressions resulting therefrom as revealed by the trial are a blot upon the military profession, a stain upon civilization and constitute a memory of shame and dishonor that can never be forgotten. Peculiarly callous and purposeless was the sack of the ancient city of Manila, with its Christian population and its countless historic shrines and monuments of culture and civilization, which with campaign conditions reversed had previously been spared.”).

<sup>131</sup> Refer to § 9.26.3 (Trial by Military Courts).

## III – Application of the Law of War

### Chapter Contents

- 3.1 Introduction
- 3.2 Situations to Which the Law of War Applies
- 3.3 Status of the Parties and the Law of War
- 3.4 When *Jus in Bello* Rules Apply
- 3.5 Relationship Between *Jus in Bello* and *Jus ad Bellum*
- 3.6 Reciprocity and Law of War Rules
- 3.7 Applying Rules by Analogy
- 3.8 End of Hostilities and the Application of the Law of War
- 3.9 Law of War Duties Also Applicable in Peace

### 3.1 INTRODUCTION

Whether a particular law of war rule applies to a situation may depend on a variety of issues, such as (1) whether a state of “war,” “hostilities,” or “armed conflict” exists;<sup>1</sup> (2) whether a party is recognized as a belligerent or as a State;<sup>2</sup> or (3) whether an enemy State has accepted that law of war rule.<sup>3</sup> This Chapter addresses these and other broad issues underlying the application of law of war rules. Later chapters address issues in applying specific rules, including considerations specific to those rules. For example, whether a specific provision of the GPW applies to a particular person may depend on whether that person is entitled to POW status under the GPW.<sup>4</sup>

Many of the legal issues underlying the application of law of war rules may be confusing because they are complex and may appear to result in contradictory legal positions. For example, a State may be at “war” for some purposes, but not for other purposes.<sup>5</sup> The legal character of U.S. military operations may change rapidly. For example, some operations may begin as military operations other than war and later evolve into war, or an international armed conflict may change into a non-international armed conflict.

Although this Chapter addresses how rules apply as a matter of law, DoD practice has often been to act consistently with law of war rules, even in certain cases where these rules might not technically be applicable as a matter of law.

3.1.1 DoD Practice of Applying Law of War Rules Even When Not Technically Applicable. DoD policy and doctrine make clear the importance of compliance with,

---

<sup>1</sup> Refer to § 3.4 (When *Jus in Bello* Rules Apply).

<sup>2</sup> Refer to § 3.3 (Status of the Parties and the Law of War).

<sup>3</sup> Refer to § 3.6.1 (Treaty Provisions That Provide for Reciprocity in the Scope of Application of the Treaty).

<sup>4</sup> Refer to § 9.3 (POW Status).

<sup>5</sup> Refer to § 1.5 (“War” as a Legal Concept).

implementation of, and enforcement of the law of war.<sup>6</sup>

In addition, DoD practice has often been to act consistently with law of war rules, even in certain cases where these rules might not technically be applicable as a matter of law. This means, for example, that DoD practice has often been to act consistently with a particular law of war treaty rule, even if that rule might not apply as a matter of treaty law. Moreover, DoD practice has sometimes been to adhere to the standards in the law of war, even in situations that do not constitute “war” or “armed conflict,” because these standards in the law of war reflect legal standards that must be adhered to in all circumstances (*i.e.*, whether there is a state of armed conflict or not).

3.1.1.1 Reasons for Acting Consistent With a Treaty Rule, Even Though the Treaty Does Not Apply. DoD practice has often been to act consistently with a treaty rule, even if that rule might not apply as a matter of treaty law. First, it may be appropriate to act consistently with the terms of a treaty (even as applied in dealings with a non-Party to a treaty) because the general principles of the treaty have been determined to be declaratory of customary international law.<sup>7</sup> In such cases, practice that is consistent with the treaty’s terms with regard to a particular matter likewise would be in compliance with applicable customary international law.

In addition, it may be important to act consistently with the terms of the treaty because the treaty represents “modern international public opinion” as to how military operations should be conducted.<sup>8</sup> Other policy considerations, including efficacious training standards or close relations with coalition partners, may lead to a policy decision that DoD practice should be consistent with a particular law of war treaty rule, even if that rule does not apply to U.S. forces as a matter of law.

3.1.1.2 Applying Law of War Standards as Reflecting Minimum Legal Standards. DoD practice also has been to adhere to certain standards in the law of war, even in situations that do not constitute “war” or “armed conflict,” because these law of war rules reflect standards that must be adhered to in all circumstances. Applying these standards provides assurance that the standards adhered to equal or exceed those required. This practice has been reflected in DoD policies to comply with the law of war, or to comply with the spirit and principles of the law of

---

<sup>6</sup> Refer to § 18.1.1 (DoD Policy on Implementing and Enforcing the Law of War).

<sup>7</sup> 1956 FM 27-10 (Change No. 1 1976) Foreword (“Moreover, even though States may not be parties to, or strictly bound by, the 1907 Hague Conventions and the 1929 Geneva Convention relative to the Treatment of Prisoners of War, the general principles of these conventions have been held declaratory of the customary law of war to which all States are subject. For this reason, the United States has adopted the policy of observing and enforcing the terms of these conventions in so far as they have not been superseded by the 1949 Geneva Conventions which necessarily govern the relations between the parties to the latter (see pars. 6 and 7 of the text).”).

<sup>8</sup> 1956 FM 27-10 (Change No. 1 1976) ¶7a (“These treaty provisions are in large part but formal and specific applications of general principles of the unwritten law. While solemnly obligatory only as between the parties thereto, they may be said also to represent modern international public opinion as to how belligerents and neutrals should conduct themselves in the particulars indicated. For these reasons, the treaty provisions quoted herein will be strictly observed and enforced by United States forces without regard to whether they are legally binding upon this country. Military commanders will be instructed which, if any, of the written rules herein quoted are not legally binding as between the United States and each of the States immediately concerned, and which, if any, for that reason are not for the time being to be observed or enforced.”).

war, during military operations outside the context of armed conflict.<sup>9</sup>

Certain prohibitions and certain other rules in the law of war that reflect customary international law have been described as reflecting “elementary considerations of humanity.”<sup>10</sup> These “elementary considerations of humanity” have been understood to be “even more exacting in peace than in war.”<sup>11</sup> Thus, these legal standards, at a minimum, must be adhered to in all circumstances.

In particular, Common Article 3 of the 1949 Geneva Conventions reflects a minimum yardstick of humane treatment protections for all persons taking no active part in hostilities, including members of armed forces who have laid down their arms and those placed *hors de combat* by sickness, wounds, detention, or any other cause.<sup>12</sup> The standards in Common Article 3 of the 1949 Geneva Conventions may be understood to reflect minimum humane treatment standards for detainees in any military operation, including those during international or non-international armed conflict or occupation, and those military operations that are not addressed by the law of war. Additional rules will apply depending on the particular context. For example, the United States has supported adherence to the guarantees in Article 75 of AP I during international armed conflict.<sup>13</sup>

### 3.2 SITUATIONS TO WHICH THE LAW OF WAR APPLIES

Although the law of war is commonly understood as applying to the conduct of hostilities and the protection of war victims, the law of war addresses other situations as well. The law of war establishes:

---

<sup>9</sup> See DOD DIRECTIVE 2311.01E, *DoD Law of War Program*, ¶4.1 (May 9, 2006, Certified Current as of Feb. 22, 2011) (“Members of the DoD Components comply with the law of war during all armed conflicts, however such conflicts are characterized, and in all other military operations.”); DOD DIRECTIVE 5100.77, *DoD Law of War Program*, ¶5.3 (Dec. 9, 1998) (“The Heads of the DoD Components shall: 5.3.1. Ensure that the members of their DoD Components comply with the law of war during all armed conflicts, however such conflicts are characterized, and with the principles and spirit of the law of war during all other operations.”). Refer to § 18.1.1 (DoD Policy on Implementing and Enforcing the Law of War).

<sup>10</sup> *Legality of the Threat or Use of Nuclear Weapons*, Advisory Opinion, 1996 I.C.J. 226, 257 (¶79) (“It is undoubtedly because a great many rules of humanitarian law applicable in armed conflict are so fundamental to the respect of the human person and ‘elementary considerations of humanity’ as the Court put it in its Judgment of 9 April 1949 in the Corfu Channel case (I.C.J. Reports 1949, p. 22), that the Hague and Geneva Conventions have enjoyed a broad accession. Further these fundamental rules are to be observed by all States whether or not they have ratified the conventions that contain them, because they constitute intransgressible principles of international customary law.”).

<sup>11</sup> *Corfu Channel Case (United Kingdom v. Albania)*, Merits, Judgment, 1949 I.C.J. 4, 22 (“The obligations incumbent upon the Albanian authorities consisted in notifying, for the benefit of shipping in general, the existence of a minefield in Albanian territorial waters and in warning the approaching British warships of the imminent danger to which the minefield exposed them. Such obligations are based, not on the Hague Convention of 1907, No. VIII, which is applicable in time of war, but on certain general and well-recognized principles, namely: elementary considerations of humanity, even more exacting in peace than in war; the principle of the freedom of maritime communication; and every State’s obligation not to allow knowingly its territory to be used for acts contrary to the rights of other States.”).

<sup>12</sup> Refer to § 8.1.4.1 (Common Article 3 of the 1949 Geneva Conventions).

<sup>13</sup> Refer to § 8.1.4.2 (Article 75 of AP I and Relevant AP II Provisions).

- rules governing the resort to force (*jus ad bellum*);<sup>14</sup>
- rules between enemies for the conduct of hostilities and the protection of war victims in international and non-international armed conflict;<sup>15</sup>
- rules between belligerents and neutrals;<sup>16</sup>
- rules for military occupation;<sup>17</sup> and
- duties during peacetime that help implement the above rules.<sup>18</sup>

In addition, these rules in the law of war can sometimes be applied by analogy to other contexts.<sup>19</sup>

### 3.3 STATUS OF THE PARTIES AND THE LAW OF WAR

The law of war distinguishes between: (1) international armed conflicts, *i.e.*, conflicts between States; and (2) other armed conflicts, typically called non-international armed conflicts.

Three situations—unrecognized governments, recognition of belligerency, and national liberation movements—merit further discussion because they may affect whether law of war rules relating to international armed conflict apply.

**3.3.1 International Armed Conflict and Non-International Armed Conflict.** The law of war treats situations of “war,” “hostilities,” or “armed conflict” differently based on the legal status of parties to the conflict. If two or more States oppose one another, then this type of armed conflict is known as an “international armed conflict” because it takes place between States. However, a state of war can exist when States are not on opposite sides of the conflict.<sup>20</sup> These other types of conflict are described as “not of an international character” or “non-international armed conflict.”<sup>21</sup> For example, two non-State armed groups warring against one

<sup>14</sup> Refer to § 1.11 (*Jus ad Bellum*).

<sup>15</sup> Chapter V addresses the conduct of hostilities.

<sup>16</sup> Chapter XV addresses the law of neutrality.

<sup>17</sup> Refer to § 11.2 (When Military Occupation Law Applies).

<sup>18</sup> Refer to § 3.9 (Law of War Duties Also Applicable in Peace).

<sup>19</sup> Refer to § 3.7 (Applying Rules by Analogy).

<sup>20</sup> See, e.g., *Hamdan v. Rumsfeld*, 548 U.S. 557, 630 (2006) (noting that an armed conflict described in Common Article 3 of the 1949 Geneva Conventions “does not involve a clash between nations.”); *The Prize Cases*, 67 U.S. 635, 666 (1863) (“it is not necessary to constitute war, that both parties should be acknowledged as independent nations or sovereign States. A war may exist where one of the belligerents, claims sovereign rights as against the other.”).

<sup>21</sup> See, e.g., *Hamdan v. Rumsfeld*, 415 F.3d 33, 44 (D.C. Cir. 2005) (Williams, J., concurring) (“Non-state actors cannot sign an international treaty. Nor is such an actor even a ‘Power’ that would be eligible under Article 2 (P3) to secure protection by complying with the Convention’s requirements. Common Article 3 fills the gap, providing some minimal protection for such non-eligibles in an ‘armed conflict not of an international character occurring in the territory of one of the High Contracting Parties.’ The gap being filled is the non-eligible party’s failure to be a

another or States warring against non-State armed groups may be described as “non-international armed conflict,” even if international borders are crossed in the fighting.<sup>22</sup>

The law of war rules applicable to non-international armed conflict are addressed in Chapter XVII.<sup>23</sup> There are a number of important differences between the law applicable to international armed conflict and the law applicable to non-international armed conflict.<sup>24</sup>

3.3.1.1 *Application of Jus in Bello Rules Does Not Necessarily Affect the Legal Status of Parties.* Although the legal status of an opponent affects the character of the conflict and what rules apply as a matter of law, the application of *jus in bello* rules does not necessarily affect the legal status of parties to a conflict. For example, a belligerent may, as a policy matter, afford a person POW protections and treatment without affording that person legal status as a POW.<sup>25</sup> Similarly, the application of humanitarian rules, such as those reflected in Common Article 3 of the 1949 Geneva Conventions, towards enemy non-State armed groups does not affect their legal status (*e.g.*, such application does not amount to recognizing the group as lawful belligerents or as the legitimate government of a State).<sup>26</sup>

3.3.1.2 *Mixed Conflicts Between Opposing States and Non-State Armed Groups.* Rather than viewing a situation as either an international armed conflict or a non-international armed conflict, it may be possible to characterize parts of a conflict as international in character, while other parts of that armed conflict may be regarded as non-international in character.<sup>27</sup> For example, under this view, during a situation involving conflict between a variety of States and non-State armed groups, as between the States, the rules of international armed conflict would apply, while as between the States and non-State armed groups, the rules of non-international armed conflicts would apply.<sup>28</sup>

---

nation. Thus the words ‘not of an international character’ are sensibly understood to refer to a conflict between a signatory nation and a non-state actor. The most obvious form of such a conflict is a civil war. But given the Convention’s structure, the logical reading of ‘international character’ is one that matches the basic derivation of the word ‘international,’ i.e., between nations. Thus, I think the context compels the view that a conflict between a signatory and a non-state actor is a conflict ‘not of an international character.’”).

<sup>22</sup> Refer to § 17.1.1.2 (NIAC and Internal Armed Conflict).

<sup>23</sup> Refer to § 17.1 (Introduction).

<sup>24</sup> Refer to § 17.1.3 (Important Differences Between the Law Applicable to International Armed Conflict and the Law Applicable to Non-International Armed Conflict).

<sup>25</sup> Refer to § 9.3.1 (POW Status Versus POW Protections).

<sup>26</sup> Refer to § 17.2.3 (Application of Humanitarian Rules and the Legal Status of the Parties to the Conflict).

<sup>27</sup> Christopher Greenwood, *International Humanitarian Law and the Tadic Case*, 7 EUROPEAN JOURNAL OF INTERNATIONAL LAW 265, 271 (1996) (“[T]here is nothing intrinsically illogical or novel in characterizing some aspects of a particular set of hostilities as an international armed conflict while others possess an internal character. Conflicts have been treated as having such a dual aspect where a Government is simultaneously engaged in hostilities with a rebel movement and with another State which backs that movement.”).

<sup>28</sup> See, *e.g.*, *Military and Paramilitary Activities in and Against Nicaragua (Nicaragua v. United States)*, Merits, Judgment, 1986 I.C.J. 14, 114 (¶219) (“The conflict between the *contras*’ forces and those of the Government of Nicaragua is an armed conflict which is ‘not of an international character’. The acts of the *contras* towards the Nicaraguan Government are therefore governed by the law applicable to conflicts of that character; whereas the

3.3.2 Unrecognized Governments. Even if a State does not recognize an opponent as the legitimate government of a State, under certain circumstances, rules of international armed conflict may apply to a conflict between a State and a government that it does not recognize. For example, members of the regular armed forces who profess allegiance to a government or authority not recognized by the Detaining Power nonetheless would be entitled to POW status if they fall into the power of the enemy during international armed conflict.<sup>29</sup>

3.3.3 State Recognition of Armed Groups as Belligerents. In certain cases, States have recognized armed groups as belligerents for certain legal purposes.

For the purpose of applying humanitarian rules, recognition of the armed group as having belligerent rights is neither a prerequisite for nor a result of applying humanitarian rules.<sup>30</sup>

3.3.3.1 Recognition by Outside States of a Rebel Faction as a Belligerent in a Civil War. In the past, in cases of a major civil war in a State, other States have recognized the rebel faction as a belligerent with the effect of treating the rebels as though they were a State with belligerent rights under the law of neutrality.<sup>31</sup>

Historically, certain conditions had to be satisfied before outside States could recognize a non-State armed group as a belligerent:

---

actions of the United States in and against Nicaragua fall under the legal rules relating to international conflicts. Because the minimum rules applicable to international and to non-international conflicts are identical, there is no need to address the question whether those actions must be looked at in the context of the rules which operate for the one or for the other category of conflict.”); Prosecutor v. Thomas Lubanga Dyilo, ICC Trial Chamber I, ICC-01/04-01/06, Judgment 258 (¶563) (Mar. 14, 2012) (“Similarly, although there is evidence of direct intervention on the part of Uganda, this intervention would only have internationalised the conflict between the two states concerned (viz. the DRC and Uganda). Since the conflict to which the UPC/FPLC [Lubanga’s militia] was a party was not ‘a difference arising between two states’ but rather protracted violence carried out by multiple non-state armed groups, it remained a non-international conflict notwithstanding any concurrent international armed conflict between Uganda and the DRC.”).

<sup>29</sup> Refer to § 4.5.3 (Regular Armed Forces Who Profess Allegiance to a Government or an Authority Not Recognized by the Detaining Power).

<sup>30</sup> Refer to § 17.2.3 (Application of Humanitarian Rules and the Legal Status of the Parties to the Conflict).

<sup>31</sup> For example, STEFAN TALMON, RECOGNITION OF GOVERNMENTS IN INTERNATIONAL LAW 309 (1998) (“Prior to its installation in Nicaraguan territory the PJNR [Provisional Junta of National Reconstruction] was recognized as the Government of Nicaragua by the following States: Panama (22 June 1979), Grenada (23 June 1979), Costa Rica (18 July 1969). In a rare case of recognition of belligerency in modern history, the members of the Andean Group (Bolivia, Colombia, Ecuador, Peru, and Venezuela) declared on 17 June 1979 that they had recognized both sides in the Nicaraguan conflict as ‘belligerents.’”); B.F. Butler, Attorney General, *Piracy Upon the High Seas*, May 17, 1836, 3 OPINIONS OF THE ATTORNEY GENERAL 120, 122 (1852) (“The existence of a civil war between the people of Texas and the authorities and people of the other Mexican States, was recognised by the President of the United States at an early day in the month of November last. Official notice of this fact, and of the President’s intention to preserve the neutrality of the United States, was soon after given to the Mexican government.”); The Santissima Trinidad, 20 U.S. 283, 337 (1822) (“The government of the United States has recognized the existence of a civil war between Spain and her colonies, and has avowed a determination to remain neutral between the parties, and to allow to each the same rights of asylum and hospitality and intercourse. Each party is, therefore, deemed by us a belligerent nation, having, so far as concerns us, the sovereign rights of war, and entitled to be respected in the exercise of those rights.”).

- a general state of armed conflict within a territory;
- the armed group occupies and administers a significant portion of national territory;
- the armed group acts under responsible chain of command and respects the laws of war; and
- circumstances exist that make it necessary for outside States to define their attitude toward the conflict.<sup>32</sup>

This doctrine has not been invoked often, especially after the adoption of the Charter of the United Nations, and the unwarranted recognition of an insurgent group likely would, at least, be considered an unfriendly act against a State engaged in hostilities against that group.<sup>33</sup>

3.3.3.2 *Assertion of War Powers by a State Engaged in Hostilities Against a Non-State Armed Group.* Occasionally, a State that has been engaged in hostilities against a non-State armed group has taken actions that have recognized the belligerency of the non-State armed group, at least for certain purposes. For example, President Lincoln’s proclamation of a blockade during the U.S. Civil War was viewed as recognizing the existence of a state of war, at least for the purposes of imposing the blockade on foreign vessels seeking to trade with the Confederacy.<sup>34</sup>

3.3.3.3 *Recognition of Friendly Armed Groups as Lawful Belligerents.* In some cases, a State has recognized an armed group that fights alongside it as a belligerent.<sup>35</sup> One

---

<sup>32</sup> HERSCH LAUTERPACHT, RECOGNITION IN INTERNATIONAL LAW 175-76 (1947) (“There is general agreement as to the nature of the conditions which impose the duty of recognition of belligerency—or which, according to others, justify recognition of belligerency. These conditions are as follows: first, there must exist within the State an armed conflict of a general (as distinguished from a purely local) character; secondly, the insurgents must occupy and administer a substantial portion of national territory; thirdly, they must conduct the hostilities in accordance with the rules of war and through organized armed forces acting under a responsible authority; fourthly, there must exist circumstances which make it necessary for outside States to define their attitude by means of recognition of belligerency.”).

<sup>33</sup> See, e.g., HERSCH LAUTERPACHT, RECOGNITION IN INTERNATIONAL LAW 239 (1947) (“If a distant continental State in no way directly concerned with the hostilities at sea were to recognize the insurgents as belligerents, it would lay itself open to the charge of a gratuitous gesture unfriendly to the lawful government and merely calculated to encourage the rebellion.”).

<sup>34</sup> The Prize Cases, 67 U.S. 635, 670 (1862) (“Whether the President, in fulfilling his duties as Commander-in-chief in suppressing an insurrection, has met with such armed hostile resistance and a civil war of such alarming proportions as will compel him to accord to them the character of belligerents is a question to be decided by him, and this Court must be governed by the decisions and acts of the political department of the Government to which this power was entrusted. ‘He must determine what degree of force the crisis demands.’ The proclamation of blockade is itself official and conclusive evidence to the Court that a state of war existed which demanded and authorized a recourse to such a measure under the circumstances peculiar to the case.”).

<sup>35</sup> For example, Case Concerning Certain German Interests in Polish Upper Silesia (Merits) (Germany v. Poland) P.C.I.J. (series A) No. 7, at 28 (“At the time of the conclusion of those two Conventions, Poland was not recognized as a belligerent by Germany; it is, however, only on the basis of such recognition that an armistice could have been concluded between those two Powers. The Principal Allied Powers had, it is true, recognized the Polish armed forces as an autonomous, allied and co-belligerent (or belligerent) army. This army was placed under the supreme political authority of the Polish National Committee with headquarters in Paris.”); Statement of the Secretary of

reason for such recognition might be to seek to persuade other States that have not recognized the armed group as a belligerent, such as an enemy State, to grant the privileges of combatant status to members of those armed groups.<sup>36</sup> An armed group that has been recognized in this way by a friendly State may be viewed as analogous to an organized resistance movement that belongs to a State that is a party to a conflict.<sup>37</sup>

3.3.4 AP I Provision on National Liberation Movements. AP I treats as international armed conflicts “armed conflicts in which peoples are fighting against colonial domination and alien occupation and against racist regimes in the exercise of their right of self-determination.”<sup>38</sup>

The United States has strongly objected to this provision as making the applicability of the rules of international armed conflict turn on subjective and politicized criteria that would eliminate the distinction between international and non-international conflicts.<sup>39</sup> The United States has understood these types of conflicts to be non-international armed conflicts.<sup>40</sup> Moreover, the United States has not accepted this provision in the context of the CCW.<sup>41</sup> The

---

State, September 1918, *reprinted in* Charles Henry Hyde, *The Recognition of the Czecho-Slovaks as Belligerents*, 13 AJIL 93-95 (1919) (“The Government of the United States recognizes that a state of belligerency exists between the Czecho-Slovaks thus organized and the German and Austro-Hungarian Empires. It also recognizes the Czecho-Slovak National Council as a *de facto* belligerent government, clothed with proper authority to direct the military and political affairs of the Czecho-Slovaks.”).

<sup>36</sup> *For example, Declaration Concerning Czechoslovak Army*, Sept. 7, 1944, 11 DEPARTMENT OF STATE BULLETIN 263 (Sept. 10, 1944) (“The United States Government therefore declares: ... (3) In these circumstances reprisals by the German military authorities against the soldiers of the Czechoslovak Army violate the rules of war by which Germany is bound. The United States Government, therefore, solemnly warns all Germans who take part in or are in any way responsible for such violations that they do so at their peril and will be held answerable for their crimes.”).

<sup>37</sup> Compare § 4.6.2 (Belonging to a Party to the Conflict).

<sup>38</sup> AP I art. 1(4) (“The situations referred to in the preceding paragraph [*i.e.*, the situations referred to in Article 2 common to those Conventions] include armed conflicts in which peoples are fighting against colonial domination and alien occupation and against racist regimes in the exercise of their right of self-determination, as enshrined in the Charter of the United Nations and the Declaration on Principles of International Law concerning Friendly Relations and Co-operation among States in accordance with the Charter of the United Nations.”).

<sup>39</sup> See Ronald Reagan, *Letter of Transmittal*, Jan. 29, 1987, MESSAGE FROM THE PRESIDENT TRANSMITTING AP II III-IV (“But Protocol I is fundamentally and irreconcilably flawed. It contains provisions that would undermine humanitarian law and endanger civilians in war. One of its provisions, for example, would automatically treat as an international conflict any so-called ‘war of national liberation.’ Whether such wars are international or non-international should turn exclusively on objective reality, not on one’s view of the moral qualities of each conflict. To rest on such subjective distinctions based on a war’s alleged purposes would politicize humanitarian law and eliminate the distinction between international and non-international conflicts. It would give special status to ‘wars of national liberation,’ an ill-defined concept expressed in vague, subjective, politicized terminology.”).

<sup>40</sup> *Detailed Analysis of Provisions*, Attachment 1 to George P. Shultz, *Letter of Submittal*, Dec. 13, 1986, MESSAGE FROM THE PRESIDENT TRANSMITTING AP II 1-2 (“This Article technically excludes four types of situations from the scope of the Protocol: ... (2) the so-called wars of ‘national liberation’ defined as international armed conflicts by Article 1(4) of Protocol I Additional to the 1949 Geneva Conventions; ... However, the exclusion of the second and third categories is inappropriate. The second category--so-called ‘liberation wars’ defined in Protocol I--are often in fact non-international conflicts, and are distinguished by Protocol I from other non-international conflicts only on the basis of highly politicized and undesirable criteria which detract from the integrity of international humanitarian law; the United States should therefore reject this distinction.”).

<sup>41</sup> Refer to § 19.21.1.2 (U.S. Reservation to Article 7(4)(b) of the CCW).

United States has expressed the view that it would not be appropriate to treat this provision of AP I as customary international law.<sup>42</sup>

### 3.4 WHEN *JUS IN BELLO* RULES APPLY

*Jus in bello* treaties often provide that they apply in cases of “declared war or of any other armed conflict,” even if the state of war is not recognized by them.<sup>43</sup> This standard has also been understood to result in the application of the customary law of war.<sup>44</sup>

A case of “declared war or any other armed conflict” for the purpose of determining whether parties must comply with *jus in bello* rules may be understood as arising in two ways: (1) when a party intends to conduct hostilities; or (2) when parties are actually conducting hostilities.

“War,” “hostilities,” and “armed conflict” may be defined differently for other legal purposes.<sup>45</sup> It must be emphasized that the discussion in this section is for the purpose of assessing whether *jus in bello* restrictions apply and not necessarily for other purposes. For example, the fact that *jus in bello* restrictions apply is not determinative of whether a State’s actions are lawful under *jus ad bellum*.<sup>46</sup> Similarly, the fact that *jus in bello* restrictions apply is not determinative of whether the permissions that are sometimes viewed as inherent in *jus in bello* rules may be relied upon by a State or non-State actor.<sup>47</sup>

3.4.1 Intent-Based Test for Applying *Jus in Bello* Rules. *Jus in bello* rules apply when a party intends to conduct hostilities.

If a State chooses to go to war, then it is bound by *jus in bello* rules for the conduct of

---

<sup>42</sup> Memorandum submitted in *United States v. Shakur*, 690 F. Supp. 1291 (S.D.N.Y. 1988), III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-88 3436, 3441 (“The new provisions on wars of national liberation and prisoners of war in Protocol I clearly do not reflect the practice of states. Indeed, they were adopted precisely because states did not accord prisoner-of-war status in such conflicts. It is most unlikely that states will in the future choose to accord prisoner-of-war status in conflicts described as wars of national liberation. Accordingly, it is the view of the United States that it would be inappropriate to treat these provisions as part of customary international law under any circumstances.”).

<sup>43</sup> See, e.g., GWS art. 2 (The convention applies “to all cases of declared war or of any other armed conflict which may arise between two or more of the High Contracting Parties, even if the state of war is not recognized by them.”); GWS-SEA art. 2 (same); GPW art. 2 (same); GC art. 2 (same); 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 18 (“the present Convention shall apply in the event of declared war or of any other armed conflict which may arise between two or more of the High Contracting Parties, even if the state of war is not recognized by one or more of them.”); CCW art. 1 (“This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims.”).

<sup>44</sup> 1956 FM 27-10 (Change No. 1 1976) ¶8b (“The customary law of war applies to all cases of declared war or any other armed conflict which may arise between the United States and other nations, even if the state of war is not recognized by one of them. The customary law is also applicable to all cases of occupation of foreign territory by the exercise of armed force, even if the occupation meets with no armed resistance.”).

<sup>45</sup> Refer to § 1.5.2 (Different Definitions of “War” for Different Legal Purposes).

<sup>46</sup> Refer to § 3.5.2 (*Jus in Bello* and *Jus ad Bellum* Generally Operate Independently of One Another).

<sup>47</sup> Refer to § 1.3.3.2 (Law of War as Permissive Law).

those hostilities.<sup>48</sup> For example, if a State considers it necessary to respond to attacks with military force, then those military operations must comply with *jus in bello* rules.<sup>49</sup>

The fact that the intention to conduct hostilities gives rise to obligations to comply with the law of war is important because law of war obligations must be taken into account even before the fighting actually begins, such as in the planning of military operations.<sup>50</sup> Similarly, certain obligations under the GPW and the GC are triggered by the onset of hostilities, and it may be necessary to implement these obligations even before the fighting actually begins.<sup>51</sup> As another example, the party that is subject to attack is often in a position to take feasible precautions for the protection of the civilian population even before the fighting begins.<sup>52</sup>

3.4.1.1 *Declarations of War or Other Official Recognition by States of a State of Hostilities.* The application of the 1949 Geneva Conventions and other law of war treaties to cases of “declared war” is an example of how *jus in bello* restrictions apply when a party intends to conduct hostilities.<sup>53</sup> Traditionally, a State could create a state of hostilities with another State simply by providing objective evidence of its decision to resort to force through formal declarations that hostilities exist between them.<sup>54</sup>

---

<sup>48</sup> L. OPPENHEIM, II INTERNATIONAL LAW 66 (2nd ed., 1912) (“But if [States] choose to go to war they have to comply with the rules laid down by International Law regarding the conduct of war and the relations between belligerents and neutral States.”).

<sup>49</sup> For example, Patrick F. Philbin, Deputy Assistant Attorney General, *Legality of the Use of Military Commissions to Try Terrorists*, Nov. 6, 2001, 25 OPINIONS OF THE OFFICE OF LEGAL COUNSEL 238, 276 (“In addition, the United States has determined that it is necessary to respond to the attacks with military force. That decision is significant because one element often cited for determining whether a situation involving a non-state actor rises to the level of an “armed conflict” (for example, for purposes of common Article 3 of the Geneva Conventions) is whether a state responds with its regular military forces. The United States has urged this position. See 3 U.S. Practice § 2, at 3443; see also G.I.A.D. Draper, *The Red Cross Conventions 15-16* (1958) (under common Article 3, “armed conflict” exists when the government is “obliged to have recourse to its regular military forces”). Here, this criterion is overwhelmingly satisfied. As outlined above, the United States has found it necessary to respond with a massive use of military force. The current operations in Afghanistan and continuing preparations for a sustained campaign easily establish that the situation here involves an armed conflict for purposes of international law.”).

<sup>50</sup> Refer to § 18.8 (Considering Law of War Obligations in the Planning of Military Operations).

<sup>51</sup> Refer to § 9.4 (National-Level GPW Implementation Measures); § 10.2 (National-Level GC Implementation Measures).

<sup>52</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>53</sup> See, e.g., GWS art. 2 (The convention applies “to all cases of declared war ... between two or more of the High Contracting Parties”); GWS-SEA art. 2 (same); GPW art. 2 (same); GC art. 2 (same); 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 18 (“the present Convention shall apply in the event of declared war ... between two or more of the High Contracting Parties”); CCW art. 1 (“This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims.”).

<sup>54</sup> See, e.g., Convention (III) Relative to the Opening of Hostilities, art. 1, Oct. 18, 1907, 36 STAT. 2259, 2271 (“The Contracting Powers recognize that hostilities between themselves must not commence without previous and explicit warning, in the form either of a reasoned declaration of war or of an ultimatum with conditional declaration of war.”); Eliza Ann and others, 1 DODSON 244, 247 (Mar. 9, 1813) (a declaration of war “proves the existence of

Although States generally no longer file formal declarations of war with one another, officials may make public statements that are like declarations of war in that they provide notice of a state of hostilities.<sup>55</sup> For example, States may make statements that indicate their view that they are engaged in armed conflict in the context of reporting measures taken in the exercise of their inherent right of self-defense to the U.N. Security Council.<sup>56</sup> Similarly, the authorization by Congress of the use of military force has been interpreted as triggering the application of certain parts of the law of war.<sup>57</sup>

These types of statements concerning *jus ad bellum* may be probative of the applicability of *jus in bello* restrictions. For example, a statement by a State indicating that it had suffered a wrongful attack under *jus ad bellum* would also indicate that the State viewed *jus in bello* restrictions as applicable to its adversary's operations against it and its own military operations against its adversary.<sup>58</sup>

Similarly, statements by States that justify the legality of their actions or assert authority under *jus in bello* rules may also provide evidence that States have the intention of conducting hostilities and that *jus in bello* restrictions apply to the activities that will effectuate those intentions.<sup>59</sup>

---

actual hostilities on one side at least, and puts the other party also into a state of war, though he may, perhaps, think proper to act on the defensive only.”).

<sup>55</sup> See, e.g., *Navios Corp. v. The Ulysses II*, 161 F. Supp. 932, 943 (D. Md. 1958) (concluding that a speech by President Nasser of Egypt “of November 1, confirmed by the statement of November 3, constituted a declaration of war even under the technical requirements of international law.”), *affirmed*, 260 F.2d 959 (4th Cir. 1958).

<sup>56</sup> Refer to § 1.11.5.6 (Reporting to the U.N. Security Council).

<sup>57</sup> *Talbot v. Seeman*, 5 U.S. 1, 28 (1801) (Marshall, C.J.) (“It is not denied, nor in the course of the argument has it been denied, that congress may authorize general hostilities, in which case the general laws of war apply to our situation; or partial hostilities, in which case the laws of war, so far as they actually apply to our situation, must be noticed.”).

<sup>58</sup> For example, John O. Brennan, Assistant to the President for Homeland Security and Counterterrorism, *Remarks at Harvard Law School: Strengthening Our Security by Adhering to Our Values and Laws*, Sept. 16, 2011 (“First, our definition of the conflict. As the President has said many times, we are at war with al-Qa’ida. In an indisputable act of aggression, al-Qa’ida attacked our nation and killed nearly 3,000 innocent people. And as we were reminded just last weekend, al-Qa’ida seeks to attack us again. Our ongoing armed conflict with al-Qa’ida stems from our right—recognized under international law—to self defense. An area in which there is some disagreement is the geographic scope of the conflict. The United States does not view our authority to use military force against al-Qa’ida as being restricted solely to ‘hot’ battlefields like Afghanistan. Because we are engaged in an armed conflict with al-Qa’ida, the United States takes the legal position that—in accordance with international law—we have the authority to take action against al-Qa’ida and its associated forces without doing a separate self-defense analysis each time. And as President Obama has stated on numerous occasions, we reserve the right to take unilateral action if or when other governments are unwilling or unable to take the necessary actions themselves. That does not mean we can use military force whenever we want, wherever we want. International legal principles, including respect for a state’s sovereignty and the laws of war, impose important constraints on our ability to act unilaterally—and on the way in which we can use force—in foreign territories.”).

<sup>59</sup> *Legal and Practical Consequences of a Blockade of Cuba*, Oct. 19, 1962, 1 SUPPLEMENTAL OPINIONS OF THE OFFICE OF LEGAL COUNSEL 486, 488-89 (2013) (“The declaration of a state of war was helpful in ascertaining the rights and obligations of neutrals in a given situation. Apart from this, however, it served little function. War itself, whatever its reason, was legal self-help, and so were lesser measures if such could be said to exist. Whether or not a nation declared a state of war it would be found by others to exist if that state were claiming rights, such as

3.4.1.2 *Non-State Armed Groups With the Intention of Conducting Hostilities.* A non-State armed group, such as a rebel group, might also intend to conduct hostilities.<sup>60</sup> Non-State armed groups are similarly bound by the restrictions in the law of war for the conduct of hostilities when they intend to conduct hostilities.<sup>61</sup> However, in contrast to States, non-State armed groups lack *competent authority*.<sup>62</sup> Thus, there would not be a basis for non-State armed groups to claim the permissions that may be viewed as inherent in parts of the law of war.<sup>63</sup> For example, members of a non-State group may be subject to prosecution under a State's domestic law for their participation in hostilities against it.<sup>64</sup>

3.4.2 *Act-Based Test for Applying Jus in Bello Rules.* *Jus in bello* rules apply when parties are actually conducting hostilities, even if the war is not declared or if the state of war is not recognized by them.<sup>65</sup> The *de facto* existence of an armed conflict is sufficient to trigger

---

blockade, normally associated with war.”). For example, National Defense Authorization Act for Fiscal Year 2012 § 1021 (“Congress affirms that the authority of the President to use all necessary and appropriate force pursuant to the Authorization for Use of Military Force (Public Law 107–40; 50 U.S.C. 1541 note) includes the authority for the Armed Forces of the United States to detain covered persons (as defined in subsection (b)) pending disposition under the law of war.”); Hugh J. Clausen & W. Hays Parks, *Geneva Conventions Status of Enemy Personnel Captured During URGENT FURY*, DAJA-IA 1983/7031 (Nov. 4, 1983), III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3452, 3454 (considering, *inter alia*, the fact that “[t]he Department of State, in a press release on 4 November 9 [1984], cited the GPW as authority for U.S. detention of Cuban Grenadan military personnel” in concluding that “*de facto* hostilities existed on Grenada and that the Geneva Conventions do apply.”) (insertion reflect in the Digest).

<sup>60</sup> For example, Hamdan v. Rumsfeld, 548 U.S. 557, 687 (2006) (Thomas, J., dissenting) (“According to the State Department, al Qaeda *declared war* on the United States as early as August 1996. In February 1998, al Qaeda leadership issued another statement ordering the indiscriminate—and, even under the laws of war as applied to legitimate nation-states, plainly illegal—killing of American civilians and military personnel alike. This was not mere rhetoric; even before September 11, 2001, al Qaeda was involved in the bombing of the World Trade Center in New York City in 1993, the bombing of the Khobar Towers in Saudi Arabia in 1996, the bombing of the U. S. Embassies in Kenya and Tanzania in 1998, and the attack on the U. S. S. Cole in Yemen in 2000.”) (internal citations omitted). See also United States v. Burr, 25 F. Cas. 201, 203 (C.C.D. Va. 1807) (Marshall, C.J.) (explaining in the context of a prosecution of rebels for treason that “war might be levied without a battle, or the actual application of force to the object on which it was designed to act; that a body of men assembled for the purpose of war, and being in a posture of war, do levy war; and from that opinion I have certainly felt no disposition to recede. But the intention is an indispensable ingredient in the composition of the fact; and if war may be levied without striking the blow, the intention to strike must be plainly proved.”).

<sup>61</sup> Refer to § 17.2.4 (Binding Force of the Law of War on Insurgents and Other Non-State Armed Groups).

<sup>62</sup> Refer to § 1.11.1.1 (Competent Authority (Right Authority) to Wage War for a Public Purpose).

<sup>63</sup> Refer to § 1.3.3.2 (Law of War as Permissive Law).

<sup>64</sup> Refer to § 17.4.1 (Ability of a State to Use Its Domestic Law Against Non-State Armed Groups).

<sup>65</sup> See, e.g., GWS art. 2 (The convention applies “to all cases of declared war or of any other armed conflict which may arise between two or more of the High Contracting Parties, even if the state of war is not recognized by them.”) (emphasis added); GWS-SEA art. 2 (same); GPW art. 2 (same); GC art. 2 (same); 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 18 (“the present Convention shall apply in the event of declared war or of any other armed conflict which may arise between two or more of the High Contracting Parties, even if the state of war is not recognized by one or more of them.”) (emphasis added); CCW art. 1 (“This Convention and its annexed Protocols shall apply in the situations referred to in Article 2 common to the Geneva Conventions of 12 August 1949 for the Protection of War Victims.”).

obligations for the conduct of hostilities.<sup>66</sup>

The United States has interpreted “armed conflict” in Common Article 2 of the 1949 Geneva Conventions to include “any situation in which there is hostile action between the armed forces of two parties, regardless of the duration, intensity or scope of the fighting.”<sup>67</sup>

3.4.2.1 *Reasons for States to Seek to Deny the Existence of Hostilities.* States have specified that *jus in bello* rules apply even if a state of hostilities is not recognized by them because States have frequently denied that they are at “war.” And, in some cases, this denial has resulted in a refusal to comply with *jus in bello* obligations.<sup>68</sup>

There are a variety of reasons why States might deny that they are at “war.” For example, government officials may deny that an armed conflict exists: (1) to avoid an escalation in fighting and to facilitate a diplomatic resolution; (2) for reasons of domestic law; (3) to avoid economic costs (such as discouraging commerce and foreign investment); or (4) to avoid appearing to acknowledge the military effectiveness of an opposing force.

In particular, States have often been reluctant to acknowledge that operations by non-State armed groups have triggered the application of Common Article 3 of the 1949 Geneva

---

<sup>66</sup> GPW COMMENTARY 22-23 (“There is no need for a formal declaration of war, or for the recognition of the existence of a state of war, as preliminaries to the application of the Convention. The occurrence of *de facto* hostilities is sufficient.”). For example, Hugh J. Clausen & W. Hays Parks, *Geneva Conventions Status of Enemy Personnel Captured During URGENT FURY*, DAJA-IA 1983/7031 (Nov. 4, 1983), III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3452, 3454 (concluding “that *de facto* hostilities existed on Grenada and that the Geneva Conventions do apply” despite the fact that “[n]o party to the hostilities in Grenada has suggested that a state of war exists; officials of Cuba and the United States publicly have announced they are not at war.”); George Aldrich, Assistant Legal Adviser for Far Eastern Affairs, Department of State, *Entitlement of American Military Personnel Held by North Viet-Nam to Treatment as Prisoners of War Under the Geneva Convention of 1949 Relative to the Treatment of Prisoners of War*, Jul. 13, 1966, X WHITEMAN’S DIGEST 231-32 (§7) (“Although there have been no declarations of war, the present conflict in Vietnam is indisputably an ‘armed conflict’ between parties to the Geneva Conventions of 1949. In one aspect of the war, American aircraft are operating against military targets in North Vietnam, and North Vietnamese forces have engaged these aircraft. Under these circumstances, the Convention applies in its entirety to this conflict. ... In this case, the state of war (under international law) is not disputed; it is merely undeclared.”).

<sup>67</sup> Department of State, Telegram 348126 to American Embassy at Damascus, Dec. 8, 1983, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3456, 3457 (“The Third Geneva Convention accords ‘prisoner-of-war’ status to members of the armed forces who are captured during ‘armed conflict’ between two or more parties to the Convention. ‘Armed conflict’ includes any situation in which there is hostile action between the armed forces of two parties, regardless of the duration, intensity or scope of the fighting and irrespective of whether a state of war exists between the two parties.”). Cf. *Bas v. Tingy*, 4 U.S. 37, 40 (1800) (Washington, J., concurring) (“every contention by force between two nations, in external matters, under the authority of their respective governments, is not only war, but public war.”).

<sup>68</sup> For example, United States, *et al.* v. Araki, *et al.*, *Majority Judgment*, International Military Tribunal for the Far East, 49,602, reprinted in NEIL BOISTER & ROBERT CRYER, DOCUMENTS ON THE TOKYO INTERNATIONAL MILITARY TRIBUNAL: CHARTER, INDICTMENT AND JUDGMENTS 535 (2008) (“Since the Government of Japan officially classified the China War as an ‘Incident’ and considered Chinese soldiers in Manchuria as ‘bandits’ the Army refused to accord to captives taken in the fighting the status and the rights of prisoners of war. MUTO says that it was officially decided in 1938 to continue to call the war in China an ‘Incident’ and to continue for that reason to refuse to apply the rules of war to the conflict. TOJO told us the same.”).

Conventions.<sup>69</sup> This reluctance often stems from an unwillingness to take any action that could enhance the perceived status of rebels or give any appearance of legitimacy to their actions.<sup>70</sup> Nonetheless, the application of the humanitarian rules does not affect the legal status of parties to a conflict.<sup>71</sup>

#### 3.4.2.2 *Distinguishing Armed Conflict From Internal Disturbances and Tensions.*

In assessing whether *de facto* hostilities exist for the purpose of applying *jus in bello* restrictions, situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature do not amount to armed conflict.<sup>72</sup>

Any hostile action between the armed forces of different States (*i.e.*, international armed conflict) may readily be distinguished from an “internal disturbance or tension.” However, it has been more difficult to distinguish “armed conflict not of an international character” from “internal disturbances or tensions.”

“Armed conflict not of an international character” for the purpose of applying the obligations in Common Article 3 of the 1949 Geneva Conventions was not specifically defined

---

<sup>69</sup> See, e.g., George H. Aldrich, Deputy Legal Adviser, Department of State, *Human Rights in Armed Conflict: Development of the Law*, Apr. 13, 1973, 68 DEPARTMENT OF STATE BULLETIN, 876, 878 (Jun. 18, 1973) (“I would note that Pakistan in Bangladesh and the United Kingdom in Northern Ireland have refused to acknowledge the applicability of article 3 common to the four Geneva Conventions concerning noninternational armed conflicts.”).

<sup>70</sup> See, e.g., George H. Aldrich, Deputy Legal Adviser, Department of State, *Human Rights in Armed Conflict: Development of the Law*, Apr. 13, 1973, 68 DEPARTMENT OF STATE BULLETIN, 876, 879 (Jun. 18, 1973) (“In the first place there is a general concern of governments that the acceptance of international standards for a civil war connotes international recognition of the insurgents. This concern results from the historical development of the law; in customary law the international laws of war become applicable to a civil war upon international recognition of the rebels as belligerents. This concern persists despite an explicit provision in common article 3 that its application shall not affect the legal status of the parties to the conflict. Personally, I deplore the fact that this concern so often effectively prevents official admission that an internal armed conflict is one to which article 3 applies, but we cannot ignore that political reality. Governments will predictably remain unwilling to do anything that could enhance the perceived status of rebels or give any appearance of legitimacy to their actions.”).

<sup>71</sup> Refer to § 17.2.3 (Application of Humanitarian Rules and the Legal Status of the Parties to the Conflict).

<sup>72</sup> See, e.g., CCW AMENDED art. 1 (2) (“This Convention and its annexed Protocols shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of similar nature, as not being armed conflicts.”); CCW AMENDED MINES PROTOCOL art. 1(2) (“This Protocol shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence and other acts of a similar nature, as not being armed conflicts.”); United States, *Statement on Ratification of the International Convention for the Suppression of the Financing of Terrorism*, Jun. 26, 2002, 2185 UNTS 611, 612 (“(2) Meaning of the term armed conflict. The United States of America understands that the term ‘armed conflict’ in Article 2 (1) (b) of the Convention does not include internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature.”). Consider AP II art. 1(2) (“This Protocol shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence and other acts of a similar nature, as not being armed conflicts.”); ROME STATUTE art. 8(2)(d) (“Paragraph 2(c) applies to armed conflicts not of an international character and thus does not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence or other acts of a similar nature.”); ROME STATUTE art. 8(2)(f) (“Paragraph 2(e) applies to armed conflicts not of an international character and thus does not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence or other acts of a similar nature.”).

in those conventions.<sup>73</sup> There has been a range of views on what constitutes an “armed conflict not of an international character” for this purpose.<sup>74</sup> The intensity of the conflict and the organization of the parties are criteria that have been assessed to distinguish between non-international armed conflict and “internal disturbances and tensions.”<sup>75</sup> A variety of factors have been considered in assessing these criteria and in seeking to distinguish between armed conflict and internal disturbances and tensions.<sup>76</sup>

---

<sup>73</sup> GWS COMMENTARY 49 (“What is meant by ‘armed conflict not of an international character’? That was the burning question which arose again and again at the Diplomatic Conference. The expression was so general, so vague, that many of the delegations feared that it might be taken to cover any act committed by force of arms—any form of anarchy, rebellion, or even plain banditry. For example, if a handful of individuals were to rise in rebellion against the State and attack a police station, would that suffice to bring into being an armed conflict within the meaning of the Article? In order to reply to questions of this sort, it was suggested that the term ‘conflict’ should be defined or, which would come to the same thing, that a certain number of conditions for the application of the Convention should be enumerated. The idea was finally abandoned—wisely, we think.”).

<sup>74</sup> See, e.g., Prosecutor v. Tadić, ICTY Appeals Chamber, IT-94-1-A, *Decision on the Defence Motion for Interlocutory Appeal on Jurisdiction*, ¶170 (Oct. 2, 1995) (“On the basis of the foregoing, we find that an armed conflict exists whenever there is a resort to armed force between States or protracted armed violence between governmental authorities and organized armed groups or between such groups within a State.”); Juan Carlos Abella v. Argentina, Inter-American Commission on Human Rights, Organization of American States, Case 11.137, OEA/Ser.L/V/II.98, ¶152 (Nov. 18, 1997) (“Common Article 3 is generally understood to apply to low intensity and open armed confrontations between relatively organized armed forces or groups that take place within the territory of a particular State.”).

<sup>75</sup> See, e.g., Prosecutor v. Tadić, ICTY Trial Chamber, IT-94-1-A, *Judgment*, ¶562 (May 7, 1997) (“In an armed conflict of an internal or mixed character, these closely related criteria are used solely for the purpose, as a minimum, of distinguishing an armed conflict from banditry, unorganized and short-lived insurrections, or terrorist activities, which are not subject to international humanitarian law.”); Prosecutor v. Akayesu, ICTR Trial Chamber, ICTR-96-4-T, *Judgment*, ¶625 (Sept. 2, 1998) (“The concept of armed conflict has already been discussed in the previous section pertaining to Common Article 3. It suffices to recall that an armed conflict is distinguished from internal disturbances by the level of intensity of the conflict and the degree of organization of the parties to the conflict.”).

<sup>76</sup> See, e.g., GPW COMMENTARY 35-36 (collecting conditions that States negotiating the 1949 Geneva Conventions viewed as indicative factors); Prosecutor v. Boskoski, ICTY Trial Chamber II, IT-04-82-T, *Judgment*, ¶177 (Jul. 10, 2008) (“Various indicative factors have been taken into account by Trial Chambers to assess the ‘intensity’ of the conflict. These include the seriousness of attacks and whether there has been an increase in armed clashes, the spread of clashes over territory and over a period of time, any increase in the number of government forces and mobilisation and the distribution of weapons among both parties to the conflict, as well as whether the conflict has attracted the attention of the United Nations Security Council, and whether any resolutions on the matter have been passed. Trial Chambers have also taken into account in this respect the number of civilians forced to flee from the combat zones; the type of weapons used, in particular the use of heavy weapons, and other military equipment, such as tanks and other heavy vehicles; the blocking or besieging of towns and the heavy shelling of these towns; the extent of destruction and the number of casualties caused by shelling or fighting; the quantity of troops and units deployed; existence and change of front lines between the parties; the occupation of territory, and towns and villages; the deployment of government forces to the crisis area; the closure of roads; cease fire orders and agreements, and the attempt of representatives from international organisations to broker and enforce cease fire agreements.”); Prosecutor v. Dordevic, ICTY Trial Chamber II, IT-04-82-T, *Judgment*, ¶1526 (Feb. 23, 2011) (“Trial Chambers have taken into account a number of factors when assessing the organization of an armed group. These fall into five broad groups. First, are the factors signalling the presence of a command structure. Secondly, are factors indicating that an armed group could carry out operations in an organised manner. Thirdly, are factors indicating a level of logistics have been taken into account. Fourthly, are factors relevant to determining whether an armed group possessed a level of discipline and the ability to implement the basic obligations of Common Article 3. A fifth group includes factors indicating that the armed group was able to speak with one voice.”).

A helpful rule of thumb may be that where parties are, in fact, engaged in activities that the law of war contemplates (*e.g.*, detention of enemy military personnel without criminal charge, bombardment of military objectives), those activities are subject to the law of war.<sup>77</sup>

3.4.2.3 *Responding to Ordinary Crimes, Including Acts of Terrorism.* States are not required to apply law of war rules when using domestic law enforcement tools to respond to ordinary crimes, including acts of terrorism.<sup>78</sup> For example, States may apply their domestic law and prosecute acts of terrorism by non-State armed groups.<sup>79</sup> States, however, have at times decided to resort to military force to counter a terrorist or similar threat that is beyond the capabilities of ordinary law enforcement to address.<sup>80</sup> If States intend to conduct hostilities, then they are also bound by the applicable *jus in bello* restrictions in the law of war.<sup>81</sup>

Acts of terrorism during armed conflict are prohibited by the law of war.<sup>82</sup>

---

<sup>77</sup> Juan Carlos Abella v. Argentina, Inter-American Commission on Human Rights, Organization of American States, Case 11.137, OEA/Ser.L/V/II.98, ¶155 (Nov. 18, 1997) (“What differentiates the events at the La Tablada base from these situations [of internal disturbances] are the concerted nature of the hostile acts undertaken by the attackers, the direct involvement of governmental armed forces, and the nature and level of the violence attending the events in question. More particularly, the attackers involved carefully planned, coordinated and executed an armed attack, *i.e.*, a military operation, against a quintessential military objective - a military base.”); GPW COMMENTARY 23 (“It makes no difference how long the conflict lasts, how much slaughter takes place, or how numerous are the participating forces; it suffices for the armed forces of one Power to have captured adversaries falling within the scope of Article 4. Even if there has been no fighting, the fact that persons covered by the Convention are detained is sufficient for its application. The number of persons captured in such circumstances is, of course, immaterial.”).

<sup>78</sup> United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 76 (“It is the understanding of the United Kingdom that the term ‘armed conflict’ of itself and in its context denotes a situation of a kind which is not constituted by the commission of ordinary crimes including acts of terrorism whether concerted or in isolation.”).

<sup>79</sup> *Refer to* § 17.4.1 (Ability of a State to Use Its Domestic Law Against Non-State Armed Groups).

<sup>80</sup> *For example*, William J. Clinton, *Address to the Nation on Military Action Against Terrorist Sites in Afghanistan and Sudan*, Aug. 20, 1998, 1998-II PUBLIC PAPERS OF THE PRESIDENTS 1460, 1461 (“America has battled terrorism for many years. Where possible, we’ve used law enforcement and diplomatic tools to wage the fight. ... But there have been and will be times when law enforcement and diplomatic tools are simply not enough, when our very national security is challenged, and when we must take extraordinary steps to protect the safety of our citizens. With compelling evidence that the bin Ladin network of terrorist groups was planning to mount further attacks against Americans and other freedom-loving people, I decided America must act. And so this morning, based on the unanimous recommendation of my national security team, I ordered our armed forces to take action to counter an immediate threat from the bin Ladin network. Earlier today, the United States carried out simultaneous strikes against terrorist facilities and infrastructure in Afghanistan.”); Public Committee against Torture in Israel, *et al.* v. Government of Israel, *et al.*, HCJ 769/02, Israel Supreme Court Sitting as the High Court of Justice, ¶21 (Dec. 11, 2005) (“Indeed, in today’s reality, a terrorist organization is likely to have considerable military capabilities. At times they have military capabilities that exceed those of states. Confrontation with those dangers cannot be restricted within the state and its penal law.”).

<sup>81</sup> *Refer to* § 3.4.1 (Intent-Based Test for Applying *Jus in Bello* Rules).

<sup>82</sup> *Refer to* § 10.5.3.2 (Collective Penalties and Measures of Intimidation or Terrorism); § 17.6.5 (Prohibition on Acts of Terrorism).

### 3.5 RELATIONSHIP BETWEEN *JUS IN BELLO* AND *JUS AD BELLUM*

3.5.1 General Distinction Between *Jus in Bello* and *Jus ad Bellum*. As a general matter, *jus in bello* and *jus ad bellum* address different legal issues and should not be conflated.<sup>83</sup>

Conflating *jus in bello* and *jus ad bellum* risks misunderstanding and misapplying these concepts. For example, in *jus ad bellum*, proportionality refers to the principle that the overall goal of the State in resorting to war should not be outweighed by the harm that the war is expected to produce.<sup>84</sup> However, the principle of proportionality in *jus in bello* generally refers to the obligations to take feasible precautions in planning and conducting attacks and to refrain from attacks in which the expected loss of civilian life, injury to civilians, and damage to civilian objects incidental to the attack would be excessive.<sup>85</sup> Therefore, although a *jus ad bellum* proportionality analysis might consider the harm suffered by enemy military forces in the fighting, a *jus in bello* proportionality analysis would not.<sup>86</sup>

3.5.2 *Jus in Bello* and *Jus ad Bellum* Generally Operate Independently of One Another. One important attribute of rules for conduct during war (*jus in bello*) is that, in general, they operate independently from rules regarding the resort to force (*jus ad bellum*).

3.5.2.1 *Compliance With Jus in Bello Is Required Regardless of Compliance With Jus ad Bellum.* States fighting against one another must adhere to rules relating to the conduct of hostilities (*jus in bello*), regardless of whether a State may be considered the aggressor or whether the initial resort to force was lawful under *jus ad bellum*. For example, the 1949 Geneva Conventions require States to undertake to respect and to ensure respect for the conventions in all circumstances.<sup>87</sup> The phrase “in all circumstances” has been interpreted to mean that a Party’s obligations to respect and to ensure respect for the 1949 Geneva Conventions applies regardless of whether a Party to the Convention is the aggressor or lawfully using force in self-defense.<sup>88</sup> Similarly, once an occupation exists in fact, the law of occupation applies, regardless of whether the invasion was lawful under *jus ad bellum*.<sup>89</sup>

#### 3.5.2.2 *Compliance With Jus ad Bellum Is Required Regardless of Compliance*

---

<sup>83</sup> Refer to § 1.11 (*Jus ad Bellum*).

<sup>84</sup> Refer to § 1.11.1.2 (The Means Must Be Proportionate to the Just Cause (Proportionality – *Jus ad Bellum*)).

<sup>85</sup> Refer to § 5.10 (Proportionality in Conducting Attacks).

<sup>86</sup> Refer to § 5.10.1.1 (Proportionality in Conducting Attacks and Military Objectives).

<sup>87</sup> GWS art. 1 (“The High Contracting Parties undertake to respect and to ensure respect for the present Convention in all circumstances.”).

<sup>88</sup> GWS COMMENTARY 27 (“The words ‘in all circumstances’ mean in short that the application of the Convention does not depend on the character of the conflict. Whether a war is ‘just’ or ‘unjust’, whether it is a war of aggression or of resistance to aggression, the protection and care due to the wounded and sick are in no way affected.”). Consider AP I preamble (“the provisions of the Geneva Conventions of 12 August 1949 and of this Protocol must be fully applied in all circumstances to all persons who are protected by those instruments, without any adverse distinction based on the nature or origin of the armed conflict or on the causes espoused by or attributed to the Parties to the conflict.”).

<sup>89</sup> Refer to § 11.2.1 (Military Occupation as a Fact).

With Jus in Bello. Compliance with *jus ad bellum* is required regardless of compliance with *jus in bello*.<sup>90</sup> For example, a State that complies with *jus in bello* rules may nonetheless commit aggression under *jus ad bellum*.<sup>91</sup> In addition, violations of law of war treaties applicable to non-international armed conflict generally have not been understood to provide a basis in international law for a non-belligerent State to intervene against the State in that conflict.<sup>92</sup>

3.5.2.3 Rationales for the Independent Operation of Jus in Bello and Jus ad Bellum. The principle that *jus in bello* rules operate independently of *jus ad bellum* rules is based on principles of sovereignty and humanity, as well as practical considerations.

If the law of war only protected parties justly resorting to force, then both sides, believing their opponent's cause to be unjust, could consider themselves free to depart from *jus in bello* rules.<sup>93</sup> As a consequence, both sides could deny protections to their opponent, and no one would benefit from the law of war's humanitarian protections.<sup>94</sup> Moreover, there might not be a competent procedure for deciding which, if any, State has unlawfully resorted to force.<sup>95</sup>

The principle that *jus in bello* rules operate independently of *jus ad bellum* rules is also influenced by the fact that it would be unjust to punish individual military members based on *jus ad bellum* considerations when they have no influence on whether their State has resorted to

---

<sup>90</sup> Consider AP I preamble ("nothing in this Protocol or in the Geneva Conventions of 12 August 1949 can be construed as legitimizing or authorizing any act of aggression or any other use of force inconsistent with the Charter of the United Nations;").

<sup>91</sup> Refer to § 1.11.3.1 (Aggression).

<sup>92</sup> Refer to § 17.18.1 (Duty of Non-Belligerent States to Refrain From Supporting Hostilities by Non-State Armed Groups Against Other States).

<sup>93</sup> VATTEL, THE LAW OF NATIONS 305 (3.12.190) ("Moreover, since each Nation claims to have justice on its side, it will arrogate to itself all the rights of war and claim that its enemy has none, that his hostilities are but deeds of robbery, acts in violation of the Law of Nations, and deserving of punishment by all Nations. The decision of the rights at issue will not be advanced thereby, and the context will become more cruel, more disastrous in its effects, and more difficult of termination.").

<sup>94</sup> VATTEL, THE LAW OF NATIONS 305 (3.12.190) ("The first rule of that law [of nations], with respect to the subject under consideration, is that *regular war, as regards its effects, must be accounted just on both sides*. This principle, as we have just shown, is absolutely necessary if any law or order is to be introduced into a method of redress as violent as that of war, if any bounds are to be set to the disasters it occasions, and if a door is to be left at all times open for the return of peace. Moreover, any other rule would be impractical as between Nation and Nation, since they recognize no common judge.").

<sup>95</sup> LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 218 (§61) ("Unless war is to degenerate into a savage contest of physical forces freed from all restraints of compassion, chivalry and respect for human life and dignity, it is essential that the accepted rules of war should continue to be observed. This is so in particular in view of the fact that in the present state of international judicial and political organisation there may be no means by which an authoritative judgment can be arrived at on the question as to which State is the aggressor. (It will be noted, for instance, that nothing short of an unanimous vote of the permanent members of the Security Council is sufficient for the determination that a particular State has resorted to war in violation of its obligations under the Charter.) Accordingly it must be held that during the war all belligerents are bound to respect and are entitled to insist as among themselves on the observance of rules of war as generally recognised.").

force lawfully under applicable international law.<sup>96</sup>

3.5.3 *Jus in Bello* and *Jus ad Bellum* Are Sometimes Related. Although as a general matter parties must comport with *jus in bello* rules, regardless of *jus ad bellum* considerations, sometimes *jus ad bellum* issues can affect how *jus in bello* rules operate.

For example, the *jus ad bellum* principle of *competent authority* (also called *right authority*) acknowledges that the resort to military force is a prerogative of the State.<sup>97</sup> *Competent authority* is reflected in the distinction between international armed conflict and non-international armed conflict; military operations against another State are fundamentally different as a matter of law than military operations against a non-State armed group.<sup>98</sup> *Competent authority* also is reflected in *jus in bello* rules relating to who is entitled to receive the privileges of combatant status. Private persons captured after engaging in hostilities generally are not entitled to receive the privileges of POW status under the law of war because they lack *competent authority*.<sup>99</sup>

As another example, the *jus ad bellum* issue of whether a disputed territory belongs to a State affects whether the law of belligerent occupation applies to that territory because the law of belligerent occupation only applies to territory that belongs to an enemy State.<sup>100</sup>

3.5.4 *U.N. Security Council Decisions and Jus in Bello*. The Charter of the United Nations provides the modern treaty framework for *jus ad bellum*, and assigns important responsibilities to the U.N. Security Council.<sup>101</sup>

In theory, decisions by the Security Council, acting under Chapter VII of the Charter of the United Nations, could create obligations that conflict with, and prevail over, obligations in law of war treaties or customary international law.<sup>102</sup> In practice, however, the U.N. Security Council frequently has affirmed the obligations of States and parties to conflicts to comply with the law of war, including military forces operating pursuant to U.N. Security Council decisions.<sup>103</sup>

---

<sup>96</sup> United States v. Josef Altstoetter, *et al.* (Justice Case), III TRIALS OF WAR CRIMINALS BEFORE THE NMT 1027 (“If we should adopt the view that by reason of the fact that the war was a criminal war of aggression every act which would have been legal in a defensive war was illegal in this one, we would be forced to the conclusion that every soldier who marched under orders into occupied territory or who fought in the homeland was a criminal and a murderer. The rules of land warfare upon which the prosecution has relied would not be the measure of conduct and the pronouncement of guilt in any case would become a mere formality.”).

<sup>97</sup> Refer to § 1.11.1.1 (Competent Authority (Right Authority) to Wage War for a Public Purpose).

<sup>98</sup> Refer to § 3.3.1 (International Armed Conflict and Non-International Armed Conflict).

<sup>99</sup> Refer to § 4.18.3 (Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status).

<sup>100</sup> Refer to § 11.2.2.3 (“Of the Hostile Army” – Belligerent Occupation Applies to Enemy Territory).

<sup>101</sup> Refer to § 1.11.2 (U.N. Charter Framework and the U.N. Security Council).

<sup>102</sup> Refer to § 1.11.2.1 (U.N. Member State Obligations With Respect to U.N. Security Council Decisions).

<sup>103</sup> For example, U.N. SECURITY COUNCIL RESOLUTION 2011(2011), U.N. Doc. S/RES/2011 (2011) (Oct. 12, 2011) (“Expressing its serious concern with the increased high number of civilian casualties in Afghanistan, in particular women and children casualties, the increasingly large majority of which are caused by Taliban, Al-Qaida and other

The U.N. Security Council also has certain authorities to respond to situations involving violations of the law of war, including establishing commissions of inquiry or authorizing the use of force.<sup>104</sup>

Decisions of the Security Council, however, may alter the obligations of member States of the United Nations under the law of neutrality.<sup>105</sup> In addition, a U.N. Security Council authorization may provide additional authority for an Occupying Power to govern occupied territory.<sup>106</sup>

### 3.6 RECIPROCITY AND LAW OF WAR RULES

“Reciprocity” sometimes refers to the idea that whether a law of war rule applies to a party to a conflict depends on whether its opponent has accepted and complies with that same rule or a corresponding rule. The requirement to comply with many law of war rules (such as the obligation to treat detainees humanely) does not depend on whether the enemy complies with that rule. Nonetheless, in the law of war, reciprocity may play a role in: (1) whether a rule applies; (2) enforcing a rule; or (3) how a rule operates.

3.6.1 Treaty Provisions That Provide for Reciprocity in the Scope of Application of the Treaty. Considerations of reciprocity – *i.e.*, the degree of confidence as to whether an adversary will, in fact, abide by a certain rule – may be a critical factor in the willingness of States to enter into treaty obligations.

Similarly, various treaty provisions also reflect, to varying degrees, the principle that whether a rule is legally binding on a party depends on whether its opponent has accepted and applied that same rule. For example, some law of war treaties have a “general participation clause” – *i.e.*, a clause specifying that the treaty only applies to an armed conflict if all the parties to the armed conflict are also Parties to the treaty.<sup>107</sup> A number of treaties on the law of

---

violent and extremist groups, *reaffirming* that all parties to armed conflict must take all feasible steps to ensure the protection of affected civilians, especially women, children and displaced persons, *calling* for all parties to comply with their obligations under international humanitarian and human rights law and for all appropriate measures to be taken to ensure the protection of civilians, and *recognizing* the importance of the ongoing monitoring and reporting to the United Nations Security Council, including by ISAF, of the situation of civilians and in particular civilian casualties, and noting in this regard the work of the ISAF Civilian Casualties Tracking Cell.”)

<sup>104</sup> Refer to § 18.12 (U.N. Security Council and Enforcement of the Law of War).

<sup>105</sup> Refer to § 15.2.3 (The Law of Neutrality Under the Charter of the United Nations).

<sup>106</sup> Refer to § 11.1.2.5 (Occupation and U.N. Security Council Resolutions).

<sup>107</sup> For example, HAGUE IV art. 2 (“The provisions contained in the Regulations referred to in Article 1, as well as in the present Convention, do not apply except between Contracting Powers, and then only if all the belligerents are parties to the Convention.”); HAGUE V art. 20 (“The provisions of the present Convention do not apply except between Contracting Powers, and then only if all the belligerents are parties to the Convention.”); HAGUE IX art. 8 (“The provisions of the present Convention do not apply except between Contracting Powers, and then only if all the belligerents are parties to the Convention.”); HAGUE XIII art. 28 (“The provisions of the present Convention do not apply except to the Contracting Powers, and then only if all the belligerents are parties to the Convention.”); 1929 GPW art. 82 (“The provisions of the present Convention must be respected by the High Contracting Parties under all circumstances. In case, in time of war, one of the belligerents is not a party to the Convention, its provisions shall nevertheless remain in force as between the belligerents who are parties thereto.”); 1929 GWS art. 25 (“The provisions of the present Convention shall be respected by the High Contracting Parties under all circumstances. If,

neutrality have such a clause.<sup>108</sup> Other treaties specify that if both Parties and non-Parties to a treaty are in an armed conflict, then Parties to the treaty remain bound by the treaty in their mutual relations, but not in relation to States that are not Parties to the treaty.<sup>109</sup> Treaties have also provided that if a State in an armed conflict is not a Party to the treaty, but it accepts and applies the treaty's provisions, then the Parties to the treaty are bound by the treaty in relation to that State.<sup>110</sup>

These provisions, however, only determine the application of the treaty as matter of treaty law and not as customary international law. For example, although not all parties to World War II were Parties to Hague IV (thus failing to satisfy the requirements of Hague IV's general participation clause), Hague IV's humanitarian protections were deemed applicable as a matter of customary international law.<sup>111</sup>

3.6.2 Reciprocity in the Enforcement of the Law of War. Reciprocity may be reflected in the enforcement of the law of war. For example, the principle of reciprocity is reflected in the concept of reprisal, which under very limited circumstances permits a belligerent to take action that would otherwise be unlawful in order to remedy an enemy's breach of the law.<sup>112</sup> However, the prohibitions on reprisal in the law of war also may be understood to reflect important limitations on the principle of reciprocity in enforcing the law of war.<sup>113</sup>

Reciprocity is also reflected in the principle of *tu quoque*, which may limit a State's ability to deem unlawful and punish certain conduct by its adversary when that State has chosen to allow its forces to engage in that same conduct.<sup>114</sup>

Even if the application of a law of war rule does not depend on reciprocity as a matter of

---

in time of war, a belligerent is not a party to the Convention, its provisions shall nevertheless remain in force as between all the belligerents who are parties to the Convention.”).

<sup>108</sup> Refer to § 15.1.4 (Application of Treaties on Neutrality and Customary International Law).

<sup>109</sup> See, e.g., GPW art. 2 (“Although one of the Powers in conflict may not be a party to the present Convention, the Powers who are parties thereto shall remain bound by it in their mutual relations.”); GWS-SEA art. 2 (same); GPW art. 2 (same); GC art. 2 (same); CCW art. 7(1) (“When one of the parties to a conflict is not bound by an annexed Protocol, the parties bound by this Convention and that annexed Protocol shall remain bound by them in their mutual relations.”).

<sup>110</sup> See CCW art. 7(2) (“Any High Contracting Party shall be bound by this Convention and any Protocol annexed thereto which is in force for it, in any situation contemplated by Article 1, in relation to any State which is not a party to this Convention or bound by the relevant annexed Protocol, if the latter accepts and applies this Convention or the relevant Protocol, and so notifies the Depositary.”); GWS art. 2 (“Although one of the Powers in conflict may not be a party to the present Convention, the Powers who are parties thereto ... shall furthermore be bound by the Convention in relation to the said Power, if the latter accepts and applies the provisions thereof.”); GWS-SEA art. 2 (same); GPW art. 2 (same); GC art. 2 (same).

<sup>111</sup> Refer to § 19.8.2.1 (Hague IV and Customary International Law).

<sup>112</sup> Refer to § 18.18 (Reprisals).

<sup>113</sup> Refer to § 18.18.3 (Treaty Prohibitions on Reprisals). Consider also VCLT art. 60(5) (“Paragraphs 1 to 3 do not apply to provisions relating to the protection of the human person contained in treaties of a humanitarian character, in particular to provisions prohibiting any form of reprisals against persons protected by such treaties.”).

<sup>114</sup> Refer to § 18.21.2 (Tu Quoque).

law, reciprocity may be important as a practical way of encouraging compliance by the adversary with the law of war.<sup>115</sup>

3.6.3 Law of War Rules May Incorporate Reciprocity. Apart from affecting whether rules apply, reciprocity may be incorporated into the operation of particular law of war rules. In other words, a law of war rule may operate differently depending upon an opponent's behavior.

3.6.3.1 Reciprocity – “Golden Rule”. A principle of reciprocity may be understood to be reflected in law of war rules that reflect the golden rule.<sup>116</sup> For example, the treatment of POWs has been based on the principle that POWs should be treated as the Detaining Power would want its forces held by the enemy to be treated.<sup>117</sup> Similarly, during the process of releasing and repatriating POWs, it is proper to expect that each Party's conduct with respect to the repatriation of POWs will be reasonable and broadly commensurate with the conduct of the other.<sup>118</sup>

3.6.3.2 Benefits-Burdens Principle in Law of War Rules. In some cases, the law of war requires that those seeking to obtain certain benefits under the law of war also accept certain burdens as a condition for receiving those benefits.<sup>119</sup> For example, militia and volunteer corps that seek the privileges of combatant status during international armed conflict must meet certain conditions (*e.g.*, conducting their operations in accordance with the laws and customs of war) before receiving such privileges.<sup>120</sup> In addition, hospital ships and coastal rescue craft must not be used for military purposes in order to receive their protection from capture and from being made the object of attack.<sup>121</sup> Similarly, cultural property must not be used for military purposes in order to receive special protection.<sup>122</sup>

---

<sup>115</sup> Refer to § 18.2.2 (Encouraging Reciprocal Adherence by the Adversary).

<sup>116</sup> See J. Pictet, *The Principles of International Humanitarian Law*, 6 INTERNATIONAL REVIEW OF THE RED CROSS 455, 462 (Sept. 1966) (“Humanitarian law receives its impulse from moral science all of which can be summed up in one sentence, ‘do to others what you would have done to yourself’. This crystallizes the wisdom of nations and is the secret of happiness, or at least, of the best order of society. This fundamental precept can be found, in an almost identical form, in all the great religions, Brahmin, Buddhist, Christian, Confucian, Islamic, Jewish and Taoist. It is also the main prop of the positivists who do not base themselves on precepts of any given religion, but on social facts, considered objectively, through their own reasoning alone.”).

<sup>117</sup> Refer to § 9.2.5 (Reciprocity in the Treatment of POWs).

<sup>118</sup> Refer to § 9.37.1 (Agreements on POW Release and Repatriation).

<sup>119</sup> See, *e.g.*, *Al Warafi v. Obama*, 716 F.3d 627, 631-32 (D.C. Cir. 2013) (“The Geneva Conventions and their commentary provide a roadmap for the establishment of protected status. As the district court found, Al Warafi was serving as part of the Taliban. The Taliban has not followed the roadmap set forth in the Conventions, and it has not carried Al Warafi to the destination. ... Without compliance with the requirements of the Geneva Conventions, the Taliban's personnel are not entitled to the protection of the Convention.”); Jack L. Goldsmith III, Assistant Attorney General, “*Protected Person*” Status in Occupied Iraq Under the Fourth Geneva Convention, Mar. 18, 2004, 28 OPINIONS OF THE OFFICE OF LEGAL COUNSEL 35, 53-57 (explaining “the Geneva Conventions’ fundamental principle that warring entities must accept the Conventions’ burdens in order to claim their benefits.”).

<sup>120</sup> Refer to § 4.6 (Other Militia and Volunteer Corps).

<sup>121</sup> Refer to § 5.18.8.2 (Conditions for the Granting of Special Protection – No Use for Military Purposes).

<sup>122</sup> Refer to § 7.12.2.2 (No Use for Military Purposes).

As another example, the rights and duties of belligerents and neutrals under the law of neutrality may be understood as correlative or reciprocal. For example, a neutral's valid assertion of its rights may depend on whether it has fulfilled its corresponding neutral duties.<sup>123</sup>

3.6.3.3 Law of War Duties That Are Reinforced by Corresponding Duties for the Enemy. Similarly, the ability of a party to comply with a particular duty may be affected by whether its opponent has complied with a corresponding duty. For example, the ability of a party to discriminate in conducting attacks may be affected by whether its adversary has properly distinguished its military objectives from the civilian population and other protected persons and objects.<sup>124</sup>

### 3.7 APPLYING RULES BY ANALOGY

In some cases, a rule developed specifically for one situation may be a useful and appropriate standard to apply in a different situation. This is sometimes called an application of a rule by analogy.

In some cases, there is a treaty requirement to apply rules by analogy; in other cases, it may be appropriate to apply law of war rules by analogy without a treaty-based requirement to do so.

3.7.1 Treaty Requirement to Apply Rules by Analogy. The application of law of war rules by analogy is sometimes required by a treaty provision.

For example, under the 1949 Geneva Conventions, neutral or non-belligerent States must apply by analogy the rules relating to the treatment of the wounded and sick and of POWs when interning such persons under their duties of neutrality.<sup>125</sup> Similarly, the GC rules for penal procedures for protected persons in occupied territory apply by analogy to proceedings against internees who are in the national territory of the Detaining Power.<sup>126</sup>

3.7.2 Examples of Law of War Rules and Areas in Which Such Rules Have Been Applied by Analogy. There are other situations in which it may be appropriate to apply law of war rules by analogy, even though there is no treaty requirement to do so. For example, it may be appropriate to apply the GWS and GWS-Sea rules for the respectful treatment and handling of enemy military dead to all persons.<sup>127</sup> Other examples of law of war rules and situations in which it may be appropriate to apply those rules by analogy include: (1) applying *jus in bello* rules in certain situations involving neutral or non-belligerent States; (2) applying law of war rules with a humanitarian purpose in situations outside the context of armed conflict; (3)

---

<sup>123</sup> Refer to § 15.3.3 (Correlative or Reciprocal Nature of Rights and Duties Under the Law of Neutrality).

<sup>124</sup> Refer to § 2.5.5 (Reinforcing Duties – Discriminating in Conducting Attacks and Distinguishing a Party's Own Persons and Objects).

<sup>125</sup> Refer to § 15.16.3.1 (Provision of POW Treatment and Application of the GWS and GWS-Sea by Analogy).

<sup>126</sup> Refer to § 10.29 (Judicial Proceedings Regarding Protected Persons in Occupied Territory or Internees in a Belligerent's Home Territory).

<sup>127</sup> Refer to § 7.7 (Treatment and Handling of Enemy Military Dead).

applying occupation law provisions for the protection of the civilian population in situations not constituting belligerent occupation; and (4) applying certain international armed conflict rules in situations of non-international armed conflict.

3.7.2.1 Jus in Bello Rules and Situations Involving Neutral or Non-Belligerent States. Although States developed *jus in bello* rules to address relations between enemies, some *jus in bello* rules may be applied by analogy to other situations, such as relations between a belligerent and a neutral or between co-belligerents. For example, a belligerent might take feasible precautions to protect the civilian population of a neutral or co-belligerent State from its military operations, even though such actions might not be required by the law of war.<sup>128</sup> In addition, although the GC excludes certain persons from the definition of protected person based on their nationality, it may be appropriate to afford such persons the standards of treatment for protected persons.<sup>129</sup>

3.7.2.2 Law of War Rules and Military Operations Outside the Context of Armed Conflict. Because law of war rules often reflect elementary considerations of humanity, it may be appropriate to apply such standards to military operations occurring outside the context of armed conflict.<sup>130</sup>

3.7.2.3 Occupation Law and Situations Not Constituting Belligerent Occupation. Occupation law may also provide a useful framework for certain situations to which it may not be strictly applicable.<sup>131</sup> For example, it may be appropriate for a State that liberates its ally's territory from enemy control to apply by analogy rules from the law of belligerent occupation to the administration of such territory, pending an agreement with the allied government.<sup>132</sup>

3.7.2.4 International Armed Conflict Rules and Situations of Non-International Armed Conflict. Legal rules applicable to international armed conflict may sometimes be applied

---

<sup>128</sup> For example, DEPARTMENT OF THE AIR FORCE, HEADQUARTERS PACIFIC AIR FORCES, DIRECTORATE OF OPERATIONS ANALYSIS, *Project CHECO [Contemporary Historical Examination of Current Operations] Report, Rules of engagement, November 1969-September 1972* (Mar. 1, 1973), reprinted in CONGRESSIONAL RECORD S3011, S3014 (Mar. 18, 1985) (“The Cambodian incursion plan was a closely held secret timed to coincide with the President’s announcement. It was not until 27 April [1970] that 7AF was told to start definitive planning. Thus, there was no time to coordinate a new set of ROE for [neutral] Cambodia. Instead 7AF instructed its pilots to follow the normal rules for South Vietnam and to exercise extreme vigilance to avoid dropping ordnance on the noncombatant populace.”); Franklin Roosevelt, message to Winston Churchill, reprinted in WINSTON CHURCHILL, *CLOSING THE RING* 467-68 (1985) (“I share fully with you your distress at the loss of life among the French population incident to our air preparations for ‘Overlord’. I share also with you a satisfaction that every possible care is being and will be taken to minimise civilian casualties. No possibility of alleviating adverse French opinion should be overlooked, always provided that there is no reduction of our effectiveness against the enemy at this crucial time. However regrettable the attendant loss of civilian lives is, I am not prepared to impose from this distance any restriction on military action by the responsible commanders that in their opinion might militate against the success of ‘Overlord’ or cause additional loss of life to our Allied forces of invasion.”).

<sup>129</sup> Refer to § 10.3.3 (Categories of Nationals Specifically Excluded From the Definition of Protected Person Under the GC).

<sup>130</sup> Refer to § 3.1.1.2 (Applying Law of War Standards as Reflecting Minimum Legal Standards).

<sup>131</sup> Refer to § 11.1.3 (Application of Occupation Law to Situations Not Constituting Belligerent Occupation).

<sup>132</sup> Refer to § 11.1.3.2 (Liberation of Friendly Territory).

by analogy to non-international armed conflict.<sup>133</sup>

### 3.8 END OF HOSTILITIES AND THE APPLICATION OF THE LAW OF WAR

In general, law of war rules for the conduct of hostilities cease to apply when hostilities have ended. However, certain duties that have arisen during hostilities may continue after hostilities have ended, and certain new duties arise at the end of hostilities.

3.8.1 General Cessation of the Application of the Law of War at the End of Hostilities. Hostilities end when opposing parties decide to end hostilities and actually do so, *i.e.*, when neither the intent-based nor act-based tests for when hostilities exist are met.<sup>134</sup> Of course, if the test for the existence of hostilities continues to be met, then hostilities cannot be deemed to have ceased.<sup>135</sup> For example, hostilities may be terminated by:

- an agreement to end hostilities, normally in the form of a treaty of peace;
- unilateral declaration of one of the parties to end the war, provided the other party does not continue hostilities or otherwise decline to recognize the act of its enemy;
- the complete subjugation of an enemy State and its allies; or
- a simple cessation of hostilities.<sup>136</sup>

3.8.1.1 Agreements to End Hostilities. Parties to a conflict often have negotiated peace treaties to end hostilities.<sup>137</sup> Armistice agreements, *i.e.*, temporary cease-fires, are negotiated to suspend hostilities.<sup>138</sup> In addition, the U.N. Security Council may require certain

---

<sup>133</sup> Refer to § 17.2.2.3 (Application of IAC Rules by Analogy).

<sup>134</sup> Refer to § 3.4 (When *Jus in Bello* Rules Apply).

<sup>135</sup> David Kris, Assistant Attorney General, *Response to Questions Submitted by Members Post Hearing, Questions Submitted by Mr. Skelton, Reforming the Military Commissions Act of 2006 and Detainee Policy: Hearing Before the Committee on Armed Services, U.S. House of Representatives, 111th Congress, 1st Session, 77 (Jul. 24, 2009)* (“At a minimum, we believe active hostilities will continue--and detention of enemy forces will be authorized--as long as the United States is involved in active combat operations against such forces. In reaching the determination that active hostilities have ceased, we would likely consider factors that have been recognized in international law as relevant to the existence of an armed conflict, including the frequency and level of intensity of any continuing violence generated by enemy forces; the degree to which they maintain an organizational structure and operate according to a plan; the enemy’s capacity to procure, transport and distribute arms; and the enemy’s intent to inflict violence.”).

<sup>136</sup> 1956 FM 27-10 (Change No. 1 1976) ¶10 (“The law of land warfare generally ceases to be applicable upon: *a.* The termination of a war by agreement, normally in the form of a treaty of peace; or *b.* The termination of a war by unilateral declaration of one of the parties, provided the other party does not continue hostilities or otherwise decline to recognize the act of its enemy; or *c.* The complete subjugation of an enemy State and its allies, if prior to *a* or *b*; or *d.* The termination of a declared war or armed conflict by simple cessation of hostilities.”).

<sup>137</sup> For example, Agreement on Ending the War and Restoring Peace in Viet Nam signed between the Government of the Democratic Republic of Viet Nam and the Government of the United States, and the Protocols to this Agreement, Jan. 27, 1973, T.I.A.S. 7542, 935 UNTS 2, 6; General Agreement for Peace in Bosnia and Herzegovina, Bosn. & Herz.-Croat.-F.R.Y., December 14, 1995, 35 I.L.M. 75 (also known as the Dayton Accords).

<sup>138</sup> Refer to § 12.11.1.2 (Armistice as a Suspension of Hostilities and Not a Peace Treaty).

steps leading to the end of hostilities.<sup>139</sup>

In drafting and interpreting agreements for the cessation of hostilities, it is important to understand the rules normally applicable to the cessation of hostilities. These agreements may refer to provisions in the Geneva Conventions or other law of war instruments. These agreements may modify or supplement the rules normally applicable to the cessation of hostilities, *e.g.*, by specifying precisely when a legal obligation is triggered or satisfied.

3.8.1.2 *End of Hostilities Absent Written Agreement.* Although States often have concluded agreements to end hostilities, it is possible for hostilities to cease absent a written or formal agreement. For example, an armed conflict may end when a party is fully subjugated.

It may be difficult to determine when an armed conflict has ceased, as opposed, for example, to a lull in hostilities during which opposing forces may simply be reconstituting themselves.<sup>140</sup> Hostilities generally would not be deemed to have ceased without an agreement, unless the conditions clearly indicate that they are not to be resumed or there has been a lapse of time indicating the improbability of resumption.<sup>141</sup>

3.8.2 *Duties Continuing After Hostilities.* Under the law of war, certain duties that have arisen during hostilities may continue after hostilities have ended. For example, POWs are protected by the GPW from the moment they fall into the power of the enemy until their final release and repatriation.<sup>142</sup> Similarly, protected persons whose release, repatriation, or re-establishment may take place after the general close of military operations continue to benefit from the protection of the GC.<sup>143</sup> In addition, duties under occupation law may continue after hostilities have ended.<sup>144</sup>

3.8.3 *Duties Arising at the End of Hostilities.* Certain obligations are triggered by the end of hostilities. For example, the end of hostilities triggers obligations regarding the marking of minefields, demining, and clearance of unexploded ordnance.<sup>145</sup> In addition, POWs and

---

<sup>139</sup> Refer to § 12.14 (U.N. Security Council Cease-Fires).

<sup>140</sup> Mr. Seward, Secretary of State, to Mr. Goni, Spanish Minister, Jul. 22, 1868, VII MOORE'S DIGEST 336 ("It is certain that a condition of war can be raised without an authoritative declaration of war, and, on the other hand, the situation of peace may be restored by the long suspension of hostilities without a treaty of peace being made. History is full of such occurrences. What period of suspension of war is necessary to justify the presumption of the restoration of peace has never yet been settled, and must in every case be determined with reference to collateral facts and circumstances.").

<sup>141</sup> Manley O. Hudson, *The Duration of the War Between the United States and Germany*, 39 HARVARD LAW REVIEW 1020, 1029-30 (1926) ("If a war may be ended by a mere cessation of hostilities, the cessation of hostilities must either be under such conditions that it is clear that they are not to be resumed or there must be a lapse of time indicating the improbability of resumption.").

<sup>142</sup> Refer to § 9.3.6 (Commencement and Duration of POW Status and Treatment).

<sup>143</sup> Refer to § 10.3.4 (Commencement and Duration of Protected Person Status).

<sup>144</sup> Refer to § 11.3.2 (Duration of GC Obligations in the Case of Occupied Territory).

<sup>145</sup> Refer to § 6.12.12.2 (Clearance of Minefields, Mined Areas, Mines, Booby-Traps, and Other Devices After Hostilities); § 6.20.5 (Obligations Under the CCW Protocol V on Explosive Remnants of War That Are Triggered by the Cessation of Active Hostilities).

protected persons, in general, must be released and returned to the party to the conflict to which they belong.<sup>146</sup>

### 3.9 LAW OF WAR DUTIES ALSO APPLICABLE IN PEACE

Some law of war obligations also apply in peace, *i.e.*, even when a State is not engaged in an armed conflict. For example, States must:

- disseminate information regarding the law of war;<sup>147</sup>
- train their armed forces in accordance with the law of war;<sup>148</sup>
- issue instructions and regulations for their armed forces in conformity with the law of war;<sup>149</sup>
- review the legality of new weapons;<sup>150</sup>
- take appropriate measures to prepare for the safeguarding of cultural property;<sup>151</sup> and
- take other appropriate measures to ensure the implementation and enforcement of law of war treaties.<sup>152</sup>

States that are at peace have obligations under the law of neutrality in relation to States that are at war.<sup>153</sup>

---

<sup>146</sup> Refer to § 9.37 (Release and Repatriation After Hostilities); § 10.35 (Release, Return, Repatriation of Internees After the Close of Hostilities); § 11.11.8 (Disposition of Accused and Convicted Protected Persons Upon the Close of Occupation).

<sup>147</sup> Refer to § 18.6.1 (General Dissemination and Study of Treaties).

<sup>148</sup> Refer to § 18.6.2 (Special Instruction or Training).

<sup>149</sup> Refer to § 18.7 (Instructions, Regulations, and Procedures to Implement and Enforce the Law of War).

<sup>150</sup> Refer to § 6.2 (DoD Policy of Reviewing the Legality of Weapons).

<sup>151</sup> Refer to § 5.18.2.1 (Peacetime Obligations to Prepare for the Safeguarding of Cultural Property).

<sup>152</sup> Refer to § 18.1.2 (National Obligations to Implement and Enforce the Law of War).

<sup>153</sup> Refer to § 15.1.1 (Matters Addressed by the Law of Neutrality).

- 4.27 Determining the Status of Detainees in Cases of Doubt

#### 4.1 INTRODUCTION

This Chapter addresses different classes of persons under the law of war. The law of war has created a framework of classes of persons to help confine the fighting between opposing military forces and thereby to help protect the civilian population from the effects of war.<sup>1</sup>

This Chapter addresses issues relating to various classes of people under the law of war including: (1) who is included in the various classes, such as “combatant” and “civilian”; (2) the rights, duties, and liabilities of the persons in each class; and (3) how certain factual categories of persons, such as journalists, police officers, or child soldiers, fall within various classes and are treated under the law of war.

---

<sup>1</sup> Refer to § 2.5.1 (Distinction as a Framework of Legal Classes).

This Chapter briefly addresses specific rules that relate to the rights, duties, and liabilities of persons in the various classes to illustrate and provide an overview of that class. For more information about specific rules, practitioners should refer to the cross-referenced sections that addresses those specific rules.<sup>2</sup>

4.1.1 General Notes on Terminology for Persons in the Law of War. The terms in the law of war that describe different classes of people are often used in confusing and contradictory ways. Although striving to use terms consistently within DoD reduces confusion, understanding the substantive standards that apply to a person in the applicable circumstances is more important than using a particular label or a particular system of classification.

4.1.1.1 *The Same Term Used With Different Meanings.* Sometimes different meanings are given to the same term. For example, someone might be considered a “combatant” in the sense that the person may be made the object of attack, but the person would not necessarily be a “combatant” in the sense that the person is privileged to engage in hostilities.<sup>3</sup>

Similarly, one source might use the term “noncombatant” to mean all persons who are not combatants, including persons placed *hors de combat* and civilians.<sup>4</sup> Alternatively, another source might use the term “noncombatant” to refer specifically to persons who are members of the armed forces, but who are not combatants.<sup>5</sup> In the past, some commentators have used “noncombatants” of the armed forces to refer to all members of the armed forces serving in combat service support or sustainment roles.<sup>6</sup> In contemporary parlance, however, the term “noncombatant” should generally be used to mean military medical and religious personnel,<sup>7</sup> but also can include those combatants placed *hors de combat*.<sup>8</sup>

---

<sup>2</sup> Refer to § 1.2.3 (Use of Cross-References in This Manual).

<sup>3</sup> Refer to § 4.3.2 (Combatant – Notes on Terminology).

<sup>4</sup> See, e.g., L.C. GREEN, *THE CONTEMPORARY LAW OF ARMED CONFLICT* 88 (2nd ed., 2000) (“Nationals of the adverse party are normally classified as combatants and non-combatants, with the latter including some members of the armed forces – chaplains, medical personnel and those *hors de combat*.”); LIEBER CODE art. 19 (“Commanders, whenever admissible, inform the enemy of their intention to bombard a place, so that the noncombatants, and especially the women and children, may be removed before the bombardment commences.”).

<sup>5</sup> See, e.g., HAGUE IV REG. art. 3 (“The armed forces of the belligerent parties may consist of combatants and noncombatants. In the case of capture by the enemy, both have the right to be treated as prisoners of war.”).

<sup>6</sup> See, e.g., GREENSPAN, *MODERN LAW OF LAND WARFARE* 56 (“The distinction between combatants and noncombatants within the armed forces must be taken to correspond to the distinction between fighting troops and troops in service units. The fighting troops of an army carry out the actual military operations, whereas the service troops minister to the needs of the former and supply their various requirements. The Hague Regulations do not define the elements in the two classes, but combatants would include infantry, cavalry, armored troops, and the like, whose function it is to engage with the enemy; as well as artillery, engineers, signals, and others, whose duty it is to support such action. Noncombatants would include personnel of the various ‘services’ comprising (*inter alia*) medical, chaplains, veterinary, graves, pay, postal, labor, supply, transport, ordnance, provost, legal, and military-government units.”); GWS COMMENTARY 223 footnote 4 (“In correct terminology, however, ‘armed forces’ include ‘combatants’ (*i.e.* soldiers bearing arms) and ‘non-combatants’ (who comprise not only medical personnel but also various other army services not called upon to carry arms).”).

<sup>7</sup> Refer to § 4.9 (Military Medical and Religious Personnel).

<sup>8</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

4.1.1.2 Different Terms Used to Describe the Same Concept. Different legal sources may use different terms to refer to the same class of people under the law of war. For example, one source might use “belligerent,” whereas another source might use “combatant” to refer to the same class of people under the law of war.<sup>9</sup>

4.1.2 Classes and Categories Are Only the Starting Point for Legal Analysis. When analyzing a person’s rights, duties, and liabilities under the law of war, it is important to analyze the specific question in light of the applicable facts. Determining what class a person falls into, such as “combatant,” “civilian,” or “unprivileged belligerent,” may be only the first step in a legal analysis. For example, whether a person may be the object of attack, may be detained, is entitled to POW status, or may be punished for their actions are all different questions. Although these questions are often related to one another and associated with the general classes of “combatant” and “civilian,” each question requires its own specific analysis. This specific analysis should be done in each case, applying the legal rules to the facts, rather than deriving an answer based on a conclusory labeling of a person as, for example, an “enemy combatant.”<sup>10</sup> Indeed, some persons might, for some purposes, be treated like “combatants,” but for other purposes be treated like “civilians.”<sup>11</sup>

## 4.2 THE ARMED FORCES AND THE CIVILIAN POPULATION

The law of war has recognized that the population of an enemy State is generally divided into two classes: the armed forces and the civilian population, also sometimes called, respectively, “combatants” and “civilians.” This division results from the principle of distinction.<sup>12</sup>

4.2.1 Development of the Distinction Between the Armed Forces and the Civilian Population. A citizen or national of a State that is a party to a conflict, as one of the constituents of a State that is engaged in hostilities, may be subjected to the hardships of war by an enemy State.<sup>13</sup> However, because the ordinary members of the civilian population make no resistance, it has long been recognized that there is no right to make them the object of attack.<sup>14</sup> Thus,

---

<sup>9</sup> Refer to § 4.3.2 (Combatant – Notes on Terminology).

<sup>10</sup> Refer to § 4.18.1 (Private Persons Who Engage in Hostilities – Notes on Terminology).

<sup>11</sup> Refer to § 4.2.3 (Mixed Cases).

<sup>12</sup> Refer to § 2.5 (Distinction).

<sup>13</sup> See, e.g., *Johnson v. Eisentrager*, 339 U.S. 763, 772-73 (1950) (“The alien enemy is bound by an allegiance which commits him to lose no opportunity to forward the cause of our enemy; hence the United States, assuming him to be faithful to his allegiance, regards him as part of the enemy resources. It therefore takes measures to disable him from commission of hostile acts imputed as his intention because they are a duty to his sovereign.”); LIEBER CODE art. 21 (“The citizen or native of a hostile country is thus an enemy, as one of the constituents of the hostile state or nation, and as such is subjected to the hardships of the war.”).

<sup>14</sup> See LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 204 (§57) (“Those private subjects of the belligerents who do not directly or indirectly belong to the armed forces do not take part in it; they do not attack and defend; and no attack ought therefore to be made upon them.”); G. SHERSTON BAKER, II HALLECK’S INTERNATIONAL LAW 15-16 (20.3) (1908) (“Feeble old men, women, and children, and sick persons, come under the general description of enemies, and we have certain rights over them as members of the community with which we are at war; but, as they are enemies who make no resistance, we have no right to maltreat their persons, or to use any violence toward them, much less to take their lives.”); LIEBER CODE arts. 22, 23, 25 (explaining that protection of the “unarmed citizen,”

States have departed from ancient and medieval practices of war between entire peoples, and instead, as much as possible, have treated war as a contention between the professional military forces of warring States.<sup>15</sup> This separation of the armed forces and the civilian population has greatly mitigated the evils of war.<sup>16</sup>

4.2.2 No Person May Claim the Distinct Rights Afforded to Both Combatants and Civilians at the Same Time. The classes of combatants and civilians have distinct rights, duties, and liabilities; no person may claim the distinct rights afforded both classes at the same time.<sup>17</sup> For example, a person may not claim the combatant's right to attack enemy forces while also claiming the civilian's right not to be made the object of attack.<sup>18</sup>

4.2.3 Mixed Cases. Certain classes of persons do not fit neatly within the dichotomy of the armed forces and the civilian population, *i.e.*, combatants and civilians. Each of these

---

the “inoffensive individual,” or the “inoffensive citizen of the hostile country” is the rule) (emphasis added); VATTEL, THE LAW OF NATIONS 282 (3.8.145) (“Women, children, feeble old men, and the sick ... these are enemies who make no resistance, and consequently the belligerent has no right to maltreat or otherwise offer violence to them, much less to put them to death.”).

<sup>15</sup> See, *e.g.*, LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 204 (§57) (“During antiquity, and the greater part of the Middle Ages, war was a contention between the whole populations of the belligerent States. In time of war every subject of one belligerent, whether an armed and fighting individual or not, whether man or woman, adult or infant, could be killed or enslaved by the other belligerent at will. But gradually a milder and more discriminating practice grew up, and nowadays the life and liberty of such private subjects of belligerents as do not directly or indirectly belong to their armed forces, and, with certain exceptions, their private property, are protected by International Law.”); LIEBER CODE art. 22 (“Nevertheless, as civilization has advanced during the last centuries, so has likewise steadily advanced, especially in war on land, the distinction between the private individual belonging to a hostile country and the hostile country itself, with its men in arms. The principle has been more and more acknowledged that the unarmed citizen is to be spared in person, property, and honor as much as the exigencies of war will admit.”).

<sup>16</sup> See SPAIGHT, WAR RIGHTS ON LAND 37 (“The separation of armies and peaceful inhabitants into two distinct classes is perhaps the greatest triumph of International Law. Its effect in mitigating the evils of war has been incalculable.”); G. SHERSTON BAKER, II HALLECK'S INTERNATIONAL LAW 20-22 (20.3) (1908) (“But afterwards in Italy, and more particularly during the lawless confusion of the feudal ages, hostilities were carried on by all classes of persons, and everyone capable of being a soldier was regarded as such, and all the rights of war attached to his person. But as wars are now carried on by regular troops, or, at least, by forces regularly organised, the peasants, merchants, manufacturers, agriculturists, and, generally, all public and private persons, who are engaged in the ordinary pursuits of life, and take no part in military operations, have nothing to fear from the sword of the enemy. So long as they refrain from all hostilities, pay the military contributions which may be imposed on them and quietly submit to the authority of the belligerent who may happen to be in the military possession of their country, they are allowed to continue in the enjoyment of their property, and in the pursuit of their ordinary avocations. This system has greatly mitigated the evils of war, ...”).

<sup>17</sup> See, *e.g.*, 1956 FM 27-10 (Change No. 1 1976) ¶60 (dividing into “prisoners of war” and “the civilian population,” and noting that “[p]ersons in each of the foregoing categories have distinct rights, duties, and disabilities.”); 1940 RULES OF LAND WARFARE ¶8 (“The enemy population is divided in war into two general classes, known as, the armed forces and the peaceful population. Both classes have distinct rights, duties, and disabilities, and no person can belong to both classes at one and the same time.”); 1934 RULES OF LAND WARFARE ¶8 (same); 1914 RULES OF LAND WARFARE ¶29 (same).

<sup>18</sup> See 1958 UK MANUAL ¶86 (“It is one of the purposes of the law of war to ensure that an individual who belongs to one class or the other shall not be permitted to enjoy the privileges of both. Thus he must not be allowed to kill or wound members of the army of the opposing belligerent and subsequently, if captured, to claim that he is a peaceful citizen.”).

particular classes has some attributes of combatant status and some attributes of civilian status; in certain respects persons in these classes are treated like combatants, but in other respects they are treated like civilians. These classes may be classified into three groups: (1) certain personnel engaged in humanitarian duties; (2) certain authorized supporters of the armed forces; and (3) unprivileged belligerents.

4.2.3.1 *Certain Personnel Engaged Humanitarian Duties.* Certain categories of personnel have humanitarian duties that involve them in hostilities but also entitle them to special protections:

- military medical and religious personnel;<sup>19</sup>
- authorized staff of voluntary aid societies;<sup>20</sup>
- staff of a recognized aid society of a neutral country;<sup>21</sup>
- auxiliary medical personnel;<sup>22</sup> and
- personnel engaged in the protection of cultural property.<sup>23</sup>

4.2.3.2 *Certain Authorized Supporters of the Armed Forces.* Certain categories of persons are not members of the armed forces, but are nonetheless authorized to support the armed forces in the fighting:

- persons authorized to accompany the armed forces, but who are not members thereof;<sup>24</sup> and
- members of the crews of merchant marine vessels or civil aircraft of a belligerent.<sup>25</sup>

4.2.3.3 *Unprivileged Belligerents.* Unprivileged belligerents generally are subject to the liabilities of both combatant and civilian status, and include:<sup>26</sup>

- persons engaging in spying, sabotage, and similar acts behind enemy lines;<sup>27</sup> and
- private persons engaging in hostilities.<sup>28</sup>

---

<sup>19</sup> Refer to § 4.9 (Military Medical and Religious Personnel).

<sup>20</sup> Refer to § 4.11 (Authorized Staff of Voluntary Aid Societies).

<sup>21</sup> Refer to § 4.12 (Staff of a Recognized Aid Society of a Neutral Country).

<sup>22</sup> Refer to § 4.13 (Auxiliary Medical Personnel).

<sup>23</sup> Refer to § 4.14.1 (Personnel Engaged in the Protection of Cultural Property).

<sup>24</sup> Refer to § 4.15 (Persons Authorized to Accompany the Armed Forces).

<sup>25</sup> Refer to § 4.16 (Crews of Merchant Marine Vessels or Civil Aircraft).

<sup>26</sup> Refer to § 4.3.4 (Types of Unprivileged Belligerents).

<sup>27</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

#### 4.3 LAWFUL COMBATANTS AND UNPRIVILEGED BELLIGERENTS

In addition to distinguishing between the armed forces and the civilian population, the law of war also distinguishes between “privileged” and “unprivileged,” or “lawful” and “unlawful” combatants. As the Supreme Court has explained:

Lawful combatants are subject to capture and detention as prisoners of war by opposing military forces. Unlawful combatants are likewise subject to capture and detention, but in addition they are subject to trial and punishment by military tribunals for acts which render their belligerency unlawful.<sup>29</sup>

“Unlawful combatants” or “unprivileged belligerents” are persons who, by engaging in hostilities, have incurred one or more of the corresponding liabilities of combatant status (*e.g.*, being made the object of attack and subject to detention), but who are not entitled to any of the distinct privileges of combatant status (*e.g.*, combatant immunity and POW status).<sup>30</sup>

4.3.1 “Unprivileged Belligerents” as a Category in Treaty Law. States have, in a few cases, explicitly recognized in treaties certain categories of unprivileged belligerents, such as spies and saboteurs.<sup>31</sup> However, States have generally refrained from explicitly recognizing unprivileged belligerents as a class in treaties in the way that classes of lawful combatants have been defined.<sup>32</sup>

Law of war treaties have been understood to reflect restrictions on the conduct of hostilities by States,<sup>33</sup> and States have been reluctant to conclude treaties to afford unprivileged enemy belligerents the distinct privileges of POW status or the full protections afforded civilians.<sup>34</sup>

---

<sup>28</sup> Refer to § 4.18 (Private Persons Who Engage in Hostilities).

<sup>29</sup> Ex parte Quirin, 317 U.S. 1, 31 (1942). See also Hamdi v. Rumsfeld, 542 U.S. 507, 518 (2004) (plurality) (“The capture and detention of lawful combatants and the capture, detention, and trial of unlawful combatants, by ‘universal agreement and practice,’ are ‘important incident[s] of war.’”) (quoting Ex parte Quirin at 28, 30).

<sup>30</sup> Refer to § 4.19 (Rights, Duties, and Liabilities of Unprivileged Belligerents).

<sup>31</sup> See, *e.g.*, HAGUE IV REG. arts. 29-31 (defining the category of spy and regulating the treatment of captured spies); GC art. 5 (regulating the treatment of certain protected persons “detained as a spy or saboteur, or as a person under definite suspicion of activity hostile to the security of the Occupying Power”). See also GC COMMENTARY 5 (“It may, nevertheless, seem rather surprising that a humanitarian Convention should tend to protect spies, saboteurs or irregular combatants. Those who take part in the struggle while not belonging to the armed forces are acting deliberately outside the laws of warfare. Surely they know the dangers to which they are exposing themselves. It might therefore have been simpler to exclude them from the benefits of the Convention, if such a course had been possible, but the terms espionage, sabotage, terrorism, banditry and intelligence with the enemy, have so often been used lightly, and applied to such trivial offences, that it was not advisable to leave the accused at the mercy of those detaining them.”).

<sup>32</sup> See, *e.g.*, GWS art. 13; GWS-SEA art. 13; GPW art. 4.

<sup>33</sup> Refer to § 1.3.3.1 (Law of War as Prohibitive Law).

<sup>34</sup> See, *e.g.*, IIA FINAL REPORT OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 433 (ICRC representative explaining that “[t]he present Conference was engaged in framing a Convention to protect members of armed forces and similar categories of persons, such as members of organized resistance movements, and another convention to

Although seldom explicitly recognized as a class in law of war treaties, the category of unprivileged belligerent may be understood as an implicit consequence of creating the classes of lawful combatants and peaceful civilians.<sup>35</sup> The concept of unprivileged belligerency, *i.e.*, the set of legal liabilities associated with unprivileged belligerents, may be understood in opposition to the rights, duties, and liabilities of lawful combatants and peaceful civilians. Unprivileged belligerents include lawful combatants who have forfeited the privileges of combatant status by engaging in spying or sabotage, and private persons who have forfeited one or more of the protections of civilian status by engaging in hostilities.<sup>36</sup>

#### 4.3.2 Combatant – Notes on Terminology.

4.3.2.1 “Combatant” and “Belligerent”. “Combatant” and “belligerent” have sometimes been used interchangeably and, in this usage, they generally describe individuals who are not “civilians.”

“Belligerent,” however, has also sometimes used to describe States and to contrast such States with “neutral” or “non-belligerent” States.<sup>37</sup> “Belligerent” has also been used to contrast armed groups that have “belligerent rights” with armed groups that lack such rights, such as “insurgents.”<sup>38</sup>

4.3.2.2 “Lawful,” “Privileged,” and “Qualified”. The distinction between “lawful” and “unlawful” combatants has sometimes been called a distinction between

---

protect civilians. Although the two Conventions might appear to cover all the categories concerned, irregular belligerents were not actually protected.”); *id.* at 612 (Swiss representative taking the view that “[i]n regard to the legal status of those who violated the laws of war, the [Civilians] Convention could not of course cover criminals or saboteurs.”); *id.* at 621 (UK representative rejecting a draft which “would mean that persons who were not entitled to protection under the Prisoners of War Convention would receive exactly the same protection by virtue of the Civilians Convention, so that all persons participating in hostilities would be protected, whether they conformed to the laws of war or not. ... The whole conception of the Civilians Convention was the protection of civilian victims of war and not the protection of illegitimate bearers of arms, who could not expect full protection under rules of war to which they did not conform. Such persons should no doubt be accorded certain standards of treatment, but should not be entitled to all the benefits of the Convention.”).

<sup>35</sup> See, e.g., 10 U.S.C. § 948a (“The term ‘unprivileged enemy belligerent’ means an individual (other than a privileged belligerent) who” engages in certain conduct); *Ex parte Quirin*, 317 U.S. 1, 35 (1942) (“Our Government, by thus defining lawful belligerents entitled to be treated as prisoners of war, has recognized that there is a class of unlawful belligerents not entitled to that privilege, including those who, though combatants, do not wear ‘fixed and distinctive emblems.’”).

<sup>36</sup> Refer to § 4.3.4 (Types of Unprivileged Belligerents).

<sup>37</sup> Refer to § 15.1.2 (Classification of States as Belligerent, Neutral, or Non-Belligerent).

<sup>38</sup> See, e.g., Memorandum submitted in *United States v. Shakur*, 690 F. Supp. 1291 (S.D.N.Y. 1988), III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-88 3436, 3448 (“The concept of ‘insurgency’ was traditionally used to describe a conflict that did not meet the rigid standards of customary international law for recognition of belligerency.”); Anthony Eden, Secretary of State for Foreign Affairs, United Kingdom, *Oral Answers to Questions*, Dec. 8, 1937, HANSARD 330 HOUSE OF COMMONS DEBATES § 357 (“His Majesty’s Ambassador at Hendaye has been instructed to inform the Salamanca authorities that as belligerent rights have not been recognised to either party in the Spanish conflict. His Majesty’s Government are not prepared to admit their right to declare any such blockade.”). Refer to § 3.3.3 (State Recognition of Armed Groups as Belligerents).

“privileged” and “unprivileged” belligerents, *i.e.*, distinguishing between persons who are entitled to the privileges of combatant or belligerent status, and those who are not.<sup>39</sup> This distinction has also sometimes been called a distinction between “qualified” and “unqualified” belligerents, *i.e.*, distinguishing between persons who have met the qualifications to receive the privileges of combatant status and those who have not.<sup>40</sup>

4.3.2.3 “Combatant” Used Without Modification. “Combatant” and “belligerent,” when used without modification (such as “lawful” or “unlawful,” or “privileged” or “unprivileged”), have often referred implicitly to lawful or privileged combatants.<sup>41</sup> However, in some cases, “combatant” or “belligerent” has been used to refer to all persons who engage in hostilities, without taking a position as to whether they are entitled to receive the privileges of combatant status.

4.3.2.4 General Usage of “Combatant” in This Manual. This manual generally uses “combatant” to refer implicitly to lawful or privileged combatants.

This manual generally uses the term “unprivileged belligerent” (instead of, *e.g.*, “unlawful combatant,” “unlawful belligerent,” “unprivileged combatant,” etc.) to refer to persons who are subject to one or more of the liabilities of combatant status, but are not entitled to receive its distinct privileges.

4.3.3 Types of Lawful Combatants. Three classes of persons qualify as “lawful” or “privileged” combatants:

- members of the armed forces of a State that is a party to a conflict, aside from certain categories of medical and religious personnel;<sup>42</sup>
- under certain conditions, members of militia or volunteer corps that are not part of the armed forces of a State, but belong to a State;<sup>43</sup> and
- inhabitants of an area who participate in a kind of popular uprising to defend against foreign invaders, known as a *levée en masse*.<sup>44</sup>

4.3.4 Types of Unprivileged Belligerents. Unprivileged belligerents may generally be

---

<sup>39</sup> See, *e.g.*, 1958 UK MANUAL ¶96 (“Should *regular* combatants fail to comply with these four conditions, they may in certain cases become unprivileged belligerents. This would mean that they would not be entitled to the status of prisoners of war upon their capture.”); Richard R. Baxter, *So-Called ‘Unprivileged Belligerency’: Spies, Guerillas, and Saboteurs*, 28 BRITISH YEAR BOOK OF INTERNATIONAL LAW 323 (1951); LIEBER CODE art. 49 (describing who is “exposed to the inconveniences as well as entitled to the privileges of a prisoner of war”).

<sup>40</sup> See, *e.g.*, JAMES M. SPAIGHT, AIRCRAFT IN WAR 51 (1914) (referring to “that outlaw of war law—the unqualified belligerent”); HAGUE IV REG. arts. 1-3 (describing who meets “[t]he Qualifications of Belligerents”).

<sup>41</sup> See, *e.g.*, API art. 43(2) (describing “combatants” as those who “have the right to participate directly in hostilities.”).

<sup>42</sup> Refer to § 4.5 (Armed Forces of a State).

<sup>43</sup> Refer to § 4.6 (Other Militia and Volunteer Corps).

<sup>44</sup> Refer to § 4.7 (*Levée en Masse*).

classified into two categories that may be distinguished from one another by the presence or absence of State authorization:

- persons who have initially qualified as combatants (*i.e.*, by falling into one of the three categories mentioned above), but who have acted so as to forfeit the privileges of combatant status by engaging in spying or sabotage;<sup>45</sup> and
- persons who never meet the qualifications to be entitled to the privileges of combatant status, but who have, by engaging in hostilities, incurred the corresponding liabilities of combatant status (*i.e.*, forfeited one or more of the protections of civilian status).<sup>46</sup>

These two categories of unprivileged belligerents generally receive the same treatment.<sup>47</sup> However, the distinction that the first category has State authorization, while the second category does not, may be important and create different legal results. For example, the combatant who spies regains the entitlement to the privileges of combatant status upon returning to friendly lines, but the private person who spies cannot regain a status to which the person was never entitled.<sup>48</sup> Similarly, acts of unprivileged belligerency on the high seas may constitute piracy, a crime under international law, although similar acts by persons acting under State authority, even if they were not members of the armed forces, could not constitute piracy.<sup>49</sup>

#### 4.4 RIGHTS, DUTIES, AND LIABILITIES OF COMBATANTS

Combatants have a special legal status, *i.e.*, certain rights, duties, and liabilities. As discussed below, combatants may engage in hostilities and are liable to being made the object of attack by enemy combatants. Combatants must conduct their operations in accordance with the law of war. They have the right to POW status if they fall into the power of the enemy during international armed conflict. Combatants have legal immunity from domestic law for acts done under military authority and in accordance with the law of war.

4.4.1 Combatants – Conduct of Hostilities. In general, combatants may engage in hostilities and may be made the object of attack by enemy combatants.<sup>50</sup> However, combatants placed *hors de combat* must not be made the object of attack.<sup>51</sup>

Combatants must conduct their operations in accordance with the law of war. For example, combatants must take certain measures to distinguish themselves from the civilian population.<sup>52</sup> Combatants also may not kill or wound the enemy by resort to perfidy.<sup>53</sup>

---

<sup>45</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>46</sup> Refer to § 4.18 (Private Persons Who Engage in Hostilities).

<sup>47</sup> Refer to § 4.19 (Rights, Duties, and Liabilities of Unprivileged Belligerents).

<sup>48</sup> Refer to § 4.17.5 (Spying and Sabotage – Forfeiture of the Privileges of Combatant Status).

<sup>49</sup> Refer to § 4.18.5 (Private Persons Who Engage in Hostilities and the Law of War).

<sup>50</sup> Refer to § 5.7 (Combatants).

<sup>51</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

<sup>52</sup> Refer to § 5.4.8 (Obligation of Combatants to Distinguish Themselves When Conducting Attacks).

Combatants may make enemy combatants and other military objectives the object of attack, but may not make the civilian population and other protected persons and objects the object of attack.<sup>54</sup> Combatants must exercise due regard to reduce the risk of incidental harm to the civilian population and other persons and objects that may not be made the object of attack.<sup>55</sup> Chapter V addresses in detail the rules that combatants must follow in the conduct of hostilities.

4.4.2 Combatants – POW Status During Detention. Combatants are liable to capture and detention by enemy combatants, but are entitled to POW status when they fall into the power of the enemy during international armed conflict. POWs, like all detained individuals, must be treated humanely.<sup>56</sup> In addition, POWs are afforded a variety of privileges in detention in accordance with the GPW, such as camp canteens, advances of pay, and permission to wear their badges of rank, nationality, or decorations.<sup>57</sup> POWs also have duties in detention, such as identifying themselves to their captors,<sup>58</sup> and they are subject to the laws, regulations, and orders of the Detaining Power.<sup>59</sup> Chapter IX addresses in detail the treatment of POWs and their duties.

In general, POWs shall be released and repatriated without delay after the cessation of active hostilities.<sup>60</sup> However, seriously wounded, injured, or sick POWs should be returned before the end of hostilities.<sup>61</sup> In addition, after the hostilities have ended, certain POWs may be held in connection with criminal proceedings.<sup>62</sup>

In general, combatants retain their right to POW status and treatment, even if they are alleged to have committed crimes before capture.<sup>63</sup> For example, POWs are entitled to a variety of rights in relation to judicial proceedings against them.<sup>64</sup> In addition, POWs serving disciplinary punishment shall continue to receive the benefits of the GPW, except insofar as these benefits are necessarily rendered inapplicable by the mere fact that the POW is confined.<sup>65</sup>

Combatants captured while engaged in spying or sabotage forfeit their entitlement to POW status.<sup>66</sup> In cases of doubt as to whether a detainee is entitled to POW status, that person

---

<sup>53</sup> Refer to § 5.22 (Treachery or Perfidy Used to Kill or Wound).

<sup>54</sup> Refer to § 5.5 (Discrimination in Conducting Attacks).

<sup>55</sup> Refer to § 5.10 (Proportionality in Conducting Attacks).

<sup>56</sup> Refer to § 9.5 (Humane Treatment and Basic Protections for POWs).

<sup>57</sup> Refer to § 9.17 (Canteens for POWs); § 9.18.3 (Advance of Pay); § 9.22.4 (Rank and Age of POWs).

<sup>58</sup> Refer to § 9.8 (Interrogation of POWs).

<sup>59</sup> Refer to § 9.26.1 (POWs Subject to the Laws, Regulations, and Orders in Force in the Armed Forces of the Detaining Power).

<sup>60</sup> Refer to § 9.37 (Release and Repatriation After Hostilities).

<sup>61</sup> Refer to § 9.36.1 (Direct Repatriation of Seriously Wounded, Injured, or Sick POWs).

<sup>62</sup> Refer to § 9.37.4.3 (POWs Undergoing Criminal Proceedings for an Indictable Offense).

<sup>63</sup> Refer to § 9.26.4 (Retention of Benefits of the GPW Even if Prosecuted for Pre-Capture Acts).

<sup>64</sup> Refer to § 9.28 (Judicial Proceedings and Punishment).

<sup>65</sup> Refer to § 9.27.6.2 (Retention of the Benefits of the GPW While Undergoing Disciplinary Punishment).

<sup>66</sup> Refer to § 4.17.5 (Spying and Sabotage – Forfeiture of the Privileges of Combatant Status).

should be afforded the protections of POW status until their status has been determined by a competent tribunal.<sup>67</sup>

4.4.3 Combatants - Legal Immunity From a Foreign State's Domestic Law. International law affords combatants a special legal immunity from the domestic law of the enemy State for their actions done in accordance with the law of war.<sup>68</sup> This legal immunity is sometimes called the “combatant’s privilege” or “combatant immunity.” This means that a combatant’s “killing, wounding, or other warlike acts are not individual crimes or offenses,”<sup>69</sup> if they are done under military authority and are not prohibited by the law of war.<sup>70</sup> Similarly, a combatant’s warlike acts done under military authority and in accordance with the law of war also do not create civil liability.<sup>71</sup>

Combatants lack legal immunity from an enemy State’s domestic law for acts that are prohibited by the law of war.<sup>72</sup> Also, combatants lack legal immunity from an enemy State’s domestic law while engaging in spying or sabotage.<sup>73</sup> Combatants, however, must receive a fair and regular trial before any punishment.<sup>74</sup>

---

<sup>67</sup> Refer to § 4.27.2 (POW Protections for Certain Persons Until Status Has Been Determined).

<sup>68</sup> This legal immunity would also be applicable with respect to neutral States to the extent they sought to exercise jurisdiction over the conduct of belligerents. Traditionally, however, neutral States generally did not assert jurisdiction over conduct committed between belligerents. Refer to § 18.21.1 (Jurisdiction Over War Crimes).

<sup>69</sup> LIEBER CODE art. 57. See also *Johnson v. Eisentrager*, 339 U.S. 763, 793 (1950) (Black, J., dissenting) (explaining that “legitimate ‘acts of warfare,’ however murderous, do not justify criminal conviction” and that “it is no ‘crime’ to be a soldier.”); WINTHROP, *MILITARY LAW & PRECEDENTS* 778 (“The State is represented in active war by its contending army, and the laws of war justify the killing or disabling of members of the one army by those of the other in battle or hostile operations.”); *Arce v. State*, 202 S.W. 951 (Texas Court of Criminal Appeals 1918) (reversing homicide conviction of Mexican soldiers prosecuted in connection with hostilities between the United States and Mexico). Consider AP I art. 43(2) (“combatants ... have the right to participate directly in hostilities.”).

<sup>70</sup> See *United States v. List, et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1236 (“acts done in time of war under the military authority of an enemy cannot involve criminal liability on the part of officers or soldiers if the acts are not prohibited by the conventional or customary rules of war.”); Daniel Webster, Department of State, *Letter to John G. Crittenden, Attorney General*, Mar. 15, 1841, reprinted in THE DIPLOMATIC AND OFFICIAL PAPERS OF DANIEL WEBSTER, WHILE SECRETARY OF STATE 134-35 (1848) (explaining “[t]hat an individual forming part of a public force, and acting under the authority of his Government, is not to be held answerable, as a private trespasser or malefactor, is a principle of public law sanctioned by the usages of all civilized nations”).

<sup>71</sup> See *Freeland v. Williams*, 131 U.S. 405, 416 (1889) (“Ever since the case of *Dow v. Johnson*, 100 U.S. 158, the doctrine has been settled in the courts that in our late civil war, each party was entitled to the benefit of belligerent rights, as in the case of public war, and that, for an act done in accordance with the usages of civilized warfare, under and by military authority of either party, no civil liability attached to the officers or soldiers who acted under such authority.”); *Dow v. Johnson*, 100 U.S. 158, 165 (1879) (“There would be something singularly absurd in permitting an officer or soldier of an invading army to be tried by his enemy, whose country it had invaded. The same reasons for his exemption from criminal prosecution apply to civil proceedings.”).

<sup>72</sup> See *United States, et al. v. Göring, et al., Judgment*, I TRIAL OF THE MAJOR WAR CRIMINALS BEFORE THE IMT 223 (“He who violates the laws of war cannot obtain immunity while acting in pursuance of the authority of the state if the state in authorizing action moves outside its competence under international law.”).

<sup>73</sup> Refer to § 4.17.3 (Spying and Sabotage – Forfeiture of the Privileges of Combatant Status).

<sup>74</sup> Refer to § 9.28.4 (Rights of Defense and Trial Procedure).

4.4.3.1 *Combatants - Legal Immunity and POW Status.* The “combatant’s privilege” from liability under domestic law has been associated with POW status.<sup>75</sup> In that vein, U.S. courts have inferred from provisions of the GPW the combatant’s privilege against being prosecuted by capturing States.<sup>76</sup> However, the legal immunity that combatants may be afforded is not the same as POW status. For example, a combatant’s conduct may be protected by legal immunities even when that person is not in the power of the enemy and thus is not a POW. As another example of how POW status and legal immunity may differ, the GPW generally affords the same treatment to all classes of POWs identified in Article 4. However, not all the categories of POWs identified in Article 4 of the GPW, such as persons authorized to accompany the armed forces, receive the general license to commit belligerent acts that is afforded members of the armed forces.<sup>77</sup>

4.4.3.2 *Combatants – Legal Immunity and Sovereignty.* In addition to being associated with humanitarian principles governing the treatment of POWs, the combatant’s privilege has also been viewed as an application of the immunity that international law affords States from each other’s jurisdiction.<sup>78</sup> In this view, “the act of the soldier who conforms to the law of war and does not engage in private acts of warfare is an act of state depriving the enemy

---

<sup>75</sup> See, e.g., Memorandum submitted in *United States v. Shakur*, 690 F. Supp. 1291 (S.D.N.Y. 1988), III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-88 3436, 3451 (“It is well-accepted that individuals who enjoy the status of prisoner of war are generally immune from prosecution for legitimate acts of war in international armed conflicts.”); ALLAN ROSAS, *THE LEGAL STATUS OF PRISONERS OF WAR: A STUDY IN INTERNATIONAL HUMANITARIAN LAW APPLICABLE IN ARMED CONFLICTS* 305 (1976) (“there has traditionally been a close relationship between the concept of prisoners of war and that of lawful combatants.”); LIEBER CODE art. 56 (“A prisoner of war is subject to no punishment for being a public enemy, nor is any revenge wreaked upon him by the intentional infliction of any suffering, or disgrace, by cruel imprisonment, want of food, by mutilation, death, or any other barbarity.”).

<sup>76</sup> See *United States v. Lindh*, 212 F. Supp. 2d 541, 553 (E.D. Va. 2002) (memorandum opinion) (interpreting articles 87 and 99 of GPW to “make clear that a belligerent in a war cannot prosecute the soldiers of its foes for the soldiers’ lawful acts of war”); *United States v. Khadr*, 717 F.Supp.2d. 1215, 1222 footnote 7 (USCMCR 2007) (same); *United States v. Pineda*, 2006 U.S. Dist. LEXIS 17509, 6-8 (D.D.C. Mar. 23, 2006) (D.D.C. 2006) (same). See also *United States v. Noriega*, 746 F. Supp. 1506, 1529 (S.D. Fla. 1990) (“As is evident from its text and construed as a whole, the essential purpose of the Geneva Convention Relative to the Treatment of Prisoners of War is to protect prisoners of war from prosecution for conduct which is customary in armed conflict.”).

<sup>77</sup> ALLAN ROSAS, *THE LEGAL STATUS OF PRISONERS OF WAR: A STUDY IN INTERNATIONAL HUMANITARIAN LAW APPLICABLE IN ARMED CONFLICTS* 305 (1976) (“The relationship between the concepts of lawful combatants and prisoners of war has been said to arise from the fact that lawful combatants are always entitled to prisoner-of-war status, while the reverse is not necessarily true, as there are categories of persons entitled to the status of prisoners of war who as civilians enjoy no general license to commit belligerent acts.”).

<sup>78</sup> Cf. *United States v. Thierichens*, 243 F. 419, 420 (E.D. Pa. 1917) (“The well-settled rule that, under the comity existing between nations, the public armed ship of a friendly nation, acting under the immediate and direct command of the sovereign power, is not to be interfered with by the courts of a foreign state, is based upon the principle that, if the courts did attempt to assume jurisdiction over such vessel, it would require the sovereign of the nation to which the vessel belongs to be impleaded in the court from which the process issued, and, by common consent of nations, such situations could not arise without interference with the power and dignity of the foreign sovereign. Therefore the courts will not assume jurisdiction over such vessel or its officers, while acting as such, but leave controversies arising out of the acts of the vessel, and its officers, while acting in their official character, for settlement through diplomatic channels.”).

state of jurisdiction.”<sup>79</sup> This view of the combatant’s privilege requires that combatants act under the commission of a belligerent State.<sup>80</sup> This view also reflects the principle that only States may authorize the resort to force.<sup>81</sup>

#### 4.4.4 Nationality and Combatant Status.

4.4.4.1 Nationals of Neutral States in Enemy Forces. Members of enemy armed forces may include nationals of neutral or non-belligerent States. For example, the U.S. armed forces include many foreign nationals, and the United States could be engaged in hostilities when those foreign nationals’ home States are not. Nationals of a neutral or non-belligerent State who are members of the armed forces of a belligerent State should be treated like other members of that State’s armed forces.<sup>82</sup> For example, such nationals are entitled to POW status if they fall into the power of the enemy during international armed conflict.<sup>83</sup>

4.4.4.2 Nationals of a State Who Join Enemy Forces. The special privileges that international law affords combatants generally do not apply between a national and his or her State of nationality.<sup>84</sup> For example, provisions of the GPW assume that POWs are not nationals of the Detaining Power.<sup>85</sup> Thus, international law does not prevent a State from punishing its

---

<sup>79</sup> Richard Baxter, *The Municipal and International Law Basis of Jurisdiction over War Crimes*, 28 BRITISH YEAR BOOK OF INTERNATIONAL LAW 382, 385 (1951). See also Hans Kelsen, *Collective and Individual Responsibility in International Law with Particular Regard to the Punishment of War Criminals*, 31 CALIFORNIA LAW REVIEW 530, 549 (1943) (“That a State violates international law if it punishes as a criminal, according to its national law, a member of the armed forces of the enemy for an act of legitimate warfare, can be explained only by the fact that the State by so doing makes an individual responsible for an act of another State. According to international law, the act in question must be imputed to the enemy State and not to the individual who in the service of his State has performed the act. It cannot be considered as a crime of the individual because it must not be considered as his act at all.”); LIEBER CODE art. 41 (“All municipal law of the ground on which the armies stand, or of the countries to which they belong, is silent and of no effect between armies in the field.”).

<sup>80</sup> See Wharton, *Com. Am. Law*, § 221, VII MOORE’S DIGEST 175 (“It is necessary in order to place the members of an army under the protection of the law of nations, that it should be commissioned by a state. . . . Hence, all civilized nations have agreed in the position that war to be a defence to an indictment for homicide or other wrong, must be conducted by a belligerent state, and that it can not avail voluntary combatants not acting under the commission of a belligerent.”).

<sup>81</sup> Refer to § 1.11.1.1 (Competent Authority (Right Authority) to Wage War for a Public Purpose).

<sup>82</sup> Refer to § 15.6.2.1 (No More Severe Treatment Than Nationals of an Opposing Belligerent State).

<sup>83</sup> LEVIE, POWS 74-75 (“Normally, the nationality of the individual falling within one of the categories enumerated in Article 4 is that of the belligerent Power for which he is fighting. However, he may have the nationality of a neutral, or of an ally of the belligerent in whose armed forces he is serving at the time that he falls into the power of the enemy--or even of the adverse Party, or one of its allies. Does this affect his entitlement to prisoner-of-war status? Apparently there is no dispute with respect to the entitlement to prisoner-of-war status of an individual who is a national of a neutral State or of a State which is an ally of the belligerent in whose armed forces he is serving.”).

<sup>84</sup> Compare § 10.3.3.1 (A State’s Own Nationals).

<sup>85</sup> See, e.g., GPW art. 87 (“When fixing the penalty, the courts or authorities of the Detaining Power shall take into consideration, to the widest extent possible, the fact that the accused, not being a national of the Detaining Power, is not bound to it by any duty of allegiance, and that he is in its power as the result of circumstances independent of his own will.”). Refer to § 9.26.6 (Prohibited Penalties); § 9.28.6 (Death Sentences).

nationals whom it may capture among the ranks of enemy forces.<sup>86</sup> This rule is significant in non-international armed conflicts in which a State is fighting a rebel group composed of its own citizens.<sup>87</sup>

Although, as a matter of international law, nationals may not assert the privileges of combatant status against their own State, they may be subject to the liabilities of combatant status in relation to their own State under that State's domestic law. For example, under U.S. law, U.S. nationals who join enemy forces have been subject to the liabilities of combatant status, such as potentially being made the object of attack or detained.<sup>88</sup>

4.4.4.3 *Nationals of Allied or Co-Belligerent States.* Nationals of an allied or co-belligerent State who are serving with enemy forces are in a position that is similar to the position of nationals of a State who are serving with enemy forces. If the nationals of an allied or co-belligerent State who are serving with enemy forces are captured by a State, they may be transferred to their State of nationality (*i.e.*, the co-belligerent or allied State), which is not required to afford them POW status.<sup>89</sup> However, U.S. practice as the Detaining Power in this situation has been to afford POW treatment to such individuals if they claim such protection.<sup>90</sup>

---

<sup>86</sup> See *Public Prosecutor v. Oie Hee Koi and Associated Appeals* (UK Privy Council, Dec. 4 1967), LEVIE, DOCUMENTS ON POWS 737, 741 (quoting LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW) ("The privileges of members of armed forces cannot be claimed by members of the armed forces of a belligerent who go over to the forces of the enemy and are afterwards captured by the former. They may be, and always are, treated as criminals. The same applies to traitorous subjects of a belligerent who, without having been members of his armed forces, fight in the armed forces of the enemy. Even if they appear under the protection of a flag of truce, deserters and traitors may be seized and punished." This edition was published in 1951 after Aug. 12, 1949, the date of the Geneva Conventions, and in their lordships' opinion correctly states the relevant law.").

<sup>87</sup> Refer to § 17.12 (Use of Captured or Surrendered Enemy Personnel in NIAC).

<sup>88</sup> See, e.g., *Hamdi v. Rumsfeld* 542 U.S. 507, 519 (2004) (plurality) ("There is no bar to this Nation's holding one of its own citizens as an enemy combatant."); *Ex parte Quirin*, 317 U.S. 1, 37 (1942) ("Citizenship in the United States of an enemy belligerent does not relieve him from the consequences of a belligerency which is unlawful because in violation of the law of war."); *In re Territo*, 156 F. 2d 142, 145 (9th Cir. 1946) (rejecting the argument of petitioner, an Italian army draftee, that he could not be subject to the liabilities of combatant status and detained because he was a U.S. citizen).

<sup>89</sup> For example, DEPARTMENT OF THE ARMY PAMPHLET 20-213, *History of Prisoner Of War Utilization By The United States Army, 1776-1945*, 198 (Jun. 24, 1955) ("During the [Second World] war many soldiers of a state of origin other than Germany were found in German uniform among German prisoners of war. Therefore when Allied forces captured these prisoners they segregated them by nationalities. The individual PW was then interrogated by representatives of his country's government in exile. If acceptable to that government and if he was willing, the PW was sent to Great Britain for service in an army unit of his national government. If the PW was rejected, he was treated in all respects as a German prisoner of war.").

<sup>90</sup> For example, *Announcement Concerning Soviet Allegations on Allied Prisoners of War*, May 3, 1945, 12 DEPARTMENT OF STATE BULLETIN 864 (May 6, 1945) ("In as much as the American Government has always insisted that all wearers of the American uniform, whether American citizens or not, are, as American soldiers, entitled to full protection of the [1929] Geneva convention and has so informed the enemy, these German prisoners of war of apparent Soviet nationality claiming such protection are being held as German prisoners of war in order to protect American soldiers in enemy hands.").

## 4.5 ARMED FORCES OF A STATE

Members of the armed forces of a State, including members of all groups that are part of the armed forces of a State, but excluding certain medical and religious personnel,<sup>91</sup> receive combatant status (*i.e.*, its rights, duties, and liabilities) by virtue of that membership.<sup>92</sup> This section addresses various classes of persons within the armed forces of a State.

**4.5.1 Components of Armed Forces.** The armed forces of a State may include a variety of components, such as militia or volunteer corps that form part of those armed forces.<sup>93</sup>

The U.S. armed forces include members of the active duty military, the reserve forces, and the National Guard. U.S. armed forces also include the Coast Guard, which normally operates under the Department of Homeland Security.<sup>94</sup>

The U.S. armed forces may also include the Commissioned Corps of the U.S. Public Health Service, which normally operates under the Department of Health and Human Services.<sup>95</sup> Similarly, members of the Commissioned Corps of the National Oceanic and Atmospheric Administration, which normally operates under the Department of Commerce, may also become part of the U.S. armed forces.<sup>96</sup> Members of these and other organizations assigned to, and serving with, the U.S. armed forces may be subject to the Uniform Code of Military Justice.<sup>97</sup>

---

<sup>91</sup> Refer to § 4.9 (Military Medical and Religious Personnel).

<sup>92</sup> See GPW art. 4A(1) (defining “prisoners of war, in the sense of the present Convention,” to include “(1) [m]embers of the armed forces of a Party to the conflict” who have fallen into the power of the enemy); HAGUE IV REG. art. 1 (“The laws, rights, and duties of war apply ... to armies”); LIEBER CODE art. 57 (“So soon as a man is armed by a sovereign government and takes the soldier’s oath of fidelity, he is a belligerent;”). Cf. sources cited in footnote 150 in § 4.6.1.3 (Application of GPW 4A(2) Conditions to the Armed Forces of a State).

<sup>93</sup> See GPW art. 4A(1) (defining “prisoners of war, in the sense of the present Convention,” to include “members of militias or volunteer corps forming part of such armed forces” who have fallen into the power of the enemy); HAGUE IV REG. art. 1 (“In countries where militia or volunteer corps constitute the army, or form part of it, they are included under the denomination ‘army.’”).

<sup>94</sup> See 10 U.S.C. § 101(a)(4) (explaining that, for the purposes of U.S. domestic law, “the term ‘armed forces’ means the Army, Navy, Air Force, Marine Corps, and Coast Guard.”); 14 U.S.C. § 1 (“The Coast Guard as established January 28, 1915, shall be a military service and a branch of the armed forces of the United States at all times. The Coast Guard shall be a service in the Department of Homeland Security, except when operating as a service in the Navy.”).

<sup>95</sup> 42 U.S.C. § 217 (“In time of war, or of emergency involving the national defense proclaimed by the President, he may by Executive order declare the commissioned corps of the [Public Health] Service to be a military service.”).

<sup>96</sup> 33 U.S.C. § 3061 (“The President may, whenever in the judgment of the President a sufficient national emergency exists, transfer to the service and jurisdiction of a military department such vessels, equipment, stations, and officers of the Administration as the President considers to be in the best interest of the country. ... An officer of the Administration transferred under this section, shall, while under the jurisdiction of a military department, have proper military status and shall be subject to the laws, regulations, and orders for the government of the Army, Navy, or Air Force, as the case may be, insofar as the same may be applicable to persons whose retention permanently in the military service of the United States is not contemplated by law.”).

<sup>97</sup> 10 U.S.C. § 802(a)(8) (“Members of the National Oceanic and Atmospheric Administration, Public Health Service, and other organizations, when assigned to and serving with the armed forces,” are subject to the Uniform Code of Military Justice).

The U.S. armed forces may also include the volunteer auxiliary of the Air Force when the services of the Civil Air Patrol are used in certain missions.<sup>98</sup>

4.5.1.1 *Reserve Armed Forces.* Although domestic law sometimes differentiates between the reserve and active components of the armed forces for the purpose of entitlement to benefits and other matters, international law treats members of the reserve forces that are part of the armed forces of a State the same as other members of the armed forces.

In the United States, reserve armed forces include the reserve components of the Army, Navy, Air Force, Marine Corps, and Coast Guard, as well as the Army National Guard of the United States and the Air National Guard of the United States.<sup>99</sup>

#### 4.5.2 Classes of Persons Within the Armed Forces.

4.5.2.1 *Special Operations Forces.* Special operations forces may be described as military forces specially organized, trained, and equipped to achieve military, political, economic, and psychological objectives by unconventional military means in hostile, denied, or politically sensitive areas.<sup>100</sup> As members of the armed forces, special operations forces have the same rights, duties, and liabilities as other members of the armed forces.<sup>101</sup>

Nonetheless, in the past, some States have illegitimately questioned whether special operations forces are entitled to the privileges of combatant status. For example, during World War II, Hitler directed that German forces summarily execute captured Allied special operations forces.<sup>102</sup> Post-World War II war crimes tribunals found that this order was not a legitimate reprisal, violated the prohibition against executions without a fair trial, and improperly denied POW status to soldiers wearing a uniform behind enemy lines.<sup>103</sup>

---

<sup>98</sup> See 10 U.S.C. § 9442(b)(1) (“The Secretary of the Air Force may use the services of the Civil Air Patrol to fulfill the noncombat programs and missions of the Department of the Air Force.”).

<sup>99</sup> 10 U.S.C. § 10101 (“The reserve components of the armed forces are: (1) The Army National Guard of the United States. (2) The Army Reserve. (3) The Navy Reserve. (4) The Marine Corps Reserve. (5) The Air National Guard of the United States. (6) The Air Force Reserve. (7) The Coast Guard Reserve.”).

<sup>100</sup> JOINT PUBLICATION 3-05, *Special Operations*, ix (Jul. 16, 2014) (“Special operations require unique modes of employment, tactics, techniques, procedures, and equipment. They are often conducted in hostile, denied, or politically and/or diplomatically sensitive environments, and are characterized by one or more of the following: time-sensitivity, clandestine or covert nature, low visibility, work with or through indigenous forces, greater requirements for regional orientation and cultural expertise, and a higher degree of risk. Special operations provide joint force commanders (JFCs) and chiefs of mission with discrete, precise, and scalable options that can be synchronized with activities of other interagency partners to achieve United States Government (USG) objectives.”).

<sup>101</sup> Refer to § 4.4 (Rights, Duties, and Liabilities of Combatants).

<sup>102</sup> Adolf Hitler, *Commando Order*, reprinted in *Trial of Generaloberst Nikolaus von Falkenhorst*, XI U.N. LAW REPORTS 18, 20-21 (British Military Court, Brunswick, Jul. 29-Aug. 2, 1946); also reprinted in *United States v. von Leeb, et al. (The High Command Case)*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 525-27; also reprinted in *The Dostler Case, Trial of General Anton Dostler*, I U.N. LAW REPORTS 22, 33-34 (U.S. Military Commission, Rome, Oct. 8-12, 1945).

<sup>103</sup> See *Trial of Generaloberst Nikolaus von Falkenhorst*, XI U.N. LAW REPORTS 18, 28 (British Military Court, Brunswick, Jul. 29-Aug. 2, 1946) (reporter noting that Hitler’s commando order was clearly illegal because it provided “that there should be no military courts, for even a war traitor is entitled to a trial,” and because the

Special operations forces personnel, like other members of the armed forces, remain entitled to the privileges of combatant status, unless they temporarily forfeit such privileges by engaging in spying or sabotage.<sup>104</sup> In some cases, military personnel who do not wear the standard uniform of their armed forces may nonetheless remain entitled to the privileges of combatant status because the wearing of such uniforms does not constitute the element of “acting clandestinely or under false pretenses.”<sup>105</sup> For example, special operations forces have sometimes dressed like friendly forces.<sup>106</sup> Special operations forces personnel remain entitled to the privileges of combatant status even when operating detached from the main body of forces behind enemy lines.<sup>107</sup>

*4.5.2.2 Members Trained as Medical Personnel, but Not Attached to the Medical Service.* Members of the armed forces might have medical training but not be designated as military medical personnel. For example, before joining the armed forces, a person might have been trained as a nurse or physician, and after joining the armed forces might not be designated as part of the medical corps.

Because such personnel have not been designated as military medical personnel, they are combatants, like other members of the armed forces.<sup>108</sup> However, if they fall into the power of the enemy during international armed conflict, such personnel may be required to tend to fellow POWs, in light of their previous training. In particular, POWs who, though not attached to the medical service of their armed forces, are physicians, surgeons, dentists, nurses, or medical orderlies may be required by the Detaining Power to exercise their medical functions in the interests of POWs dependent on the same Power.<sup>109</sup> In that case, they shall continue to be POWs, but shall receive the same treatment as corresponding medical personnel retained by the

---

“commando order was to apply to troops engaged on commando operations whether in uniform or not”); The Dostler Case, Trial of General Anton Dostler, I U.N. LAW REPORTS 22, 27-33 (U.S. Military Commission, Rome, Oct. 8-12, 1945) (conviction of a German General for the murder of 15 U.S. Army personnel and rejection of his defense that the commando order was a valid and applicable superior order); Trial of Karl Adam Golkel and Thirteen Others, V U.N. LAW REPORTS 45-53 (British Military Court, Wuppertal, Germany, May 15-21, 1946) (trial of German soldiers for killing eight members of the British Special Air Service); United States v. von Leeb, *et al.* (The High Command Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 527 (“This order was criminal on its face. It simply directed the slaughter of these ‘sabotage’ troops.”).

<sup>104</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>105</sup> Refer to § 4.17.2.1 (Acting Clandestinely or Under False Pretenses).

<sup>106</sup> Refer to § 5.25.2.1 (Mimicking Other Friendly Forces).

<sup>107</sup> See Trial of Generaloberst Nikolaus von Falkenhorst, XI U.N. LAW REPORTS 18, 28 (British Military Court, Brunswick, Jul. 29-Aug. 2, 1946) (reporter noting that “[i]t is not possible to say that troops who engage in acts of sabotage behind the enemy lines are bandits, as Hitler declared them. They carry out a legitimate act of war, provided the objective relates directly to the war effort and provided they carry it out in uniform.”); LIEBER CODE art. 81 (“Partisans are soldiers armed and wearing the uniform of their army, but belonging to a corps which acts detached from the main body for the purpose of making inroads into the territory occupied by the enemy. If captured, they are entitled to all the privileges of the prisoner of war.”).

<sup>108</sup> Refer to § 4.9.2.2 (Designated by Their Armed Forces).

<sup>109</sup> GPW art. 32 (“Prisoners of war who, though not attached to the medical service of their armed forces, are physicians, surgeons, dentists, nurses or medical orderlies, may be required by the Detaining Power to exercise their medical functions in the interests of prisoners of war dependent on the same Power.”).

Detaining Power.<sup>110</sup> They shall be exempted from any other work under Article 49 of the GPW.<sup>111</sup>

4.5.2.3 *Members Who Are Ministers of Religion Without Having Officiated as Chaplains to Their Own Forces.* Members of the armed forces might be ministers of religion, but might not be designated as military religious personnel.<sup>112</sup> Because such personnel have not been designated as military religious personnel, they are combatants, like other members of the armed forces.<sup>113</sup> However, if they fall into the power of the enemy during international armed conflict, such personnel may minister to fellow POWs. In particular, POWs who are ministers of religion, without having officiated as chaplains to their own forces, shall be at liberty, whatever their denomination, to minister freely to the members of their community.<sup>114</sup> For this purpose, they shall receive the same treatment as chaplains retained by the Detaining Power.<sup>115</sup> They shall not be obliged to do any other work.<sup>116</sup>

4.5.2.4 *Draftees.* Some States require military service for categories of their nationals. The United States employs all-volunteer armed forces, although it has drafted its nationals into military service in prior conflicts.

Under international law, a draftee, *i.e.*, a person who has been compelled to join a State's armed forces, is to be treated the same as other members of the armed forces.<sup>117</sup>

4.5.2.5 *Deserters.* A deserter from the armed forces of a belligerent who falls into the power of the enemy in international armed conflict is a POW.<sup>118</sup> Similarly, a deserter who is interned by a neutral State would also be treated as a POW.<sup>119</sup> The deserter's relationship with his or her armed forces is a question of that State's domestic law and not international law. States generally forbid members of their armed forces from desertion and generally regard members of the armed forces who desert as continuing to be members of their armed forces.

---

<sup>110</sup> GPW art. 32 ("In that case they shall continue to be prisoners of war, but shall receive the same treatment as corresponding medical personnel retained by the Detaining Power.").

<sup>111</sup> GPW art. 32 ("They shall be exempted from any other work under Article 49.").

<sup>112</sup> Refer to § 4.9.2 (Requirements for Military Medical and Religious Status).

<sup>113</sup> Refer to § 4.9.2.2 (Designated by Their Armed Forces).

<sup>114</sup> GPW art. 36 ("Prisoners of war who are ministers of religion, without having officiated as chaplains to their own forces, shall be at liberty, whatever their denomination, to minister freely to the members of their community.").

<sup>115</sup> GPW art. 36 ("For this purpose, they shall receive the same treatment as the chaplains retained by the Detaining Power.").

<sup>116</sup> GPW art. 36 ("They shall not be obliged to do any other work.").

<sup>117</sup> See 1958 UK MANUAL ¶ 89(i) (noting that "[t]he members, male and female, of the land, sea and air forces are entitled to recognition as belligerent forces whether they have joined voluntarily or have been compelled to do so by their own law").

<sup>118</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 99 ("Deserters from the enemy do not thereby lose their right to be treated as prisoners of war if they fall into the hands of the opposing side.").

<sup>119</sup> Refer to § 15.16 (Belligerent Forces Taking Refuge in Neutral Territory).

Deserters who are subsequently captured by their own armed forces are not POWs because they are not in the power of the enemy and because the privileges of combatant status are generally understood not to apply, as a matter of international law, between nationals and their State of nationality.<sup>120</sup>

4.5.2.6 Defectors. Defectors are persons from one side's armed forces who voluntarily join the armed forces of the opposing side. They are generally not regarded as POWs while serving in their new armed force.<sup>121</sup>

Defectors serving in the forces of the enemy who are captured by the State to which they originally owed an allegiance generally would not be entitled to POW status because the privileges of combatant status are generally understood not to apply, as a matter of international law, between nationals and their State of nationality.<sup>122</sup>

States may not compel POWs, retained personnel, or protected persons in their power to defect and serve in their armed forces.<sup>123</sup>

4.5.3 Regular Armed Forces Who Profess Allegiance to a Government or an Authority Not Recognized by the Detaining Power. During international armed conflict, members of regular armed forces who profess allegiance to a Government or an authority not recognized by the Detaining Power are treated as members of the armed forces of a State.<sup>124</sup> Under Article 4A(3) of the GPW, they receive POW status, and they should also receive the rights, duties, and liabilities of combatants.<sup>125</sup>

Article 4A(3) of the GPW was developed to address situations like those that had occurred during World War II, when members of a military force continued fighting after their State had been occupied.<sup>126</sup> For example, military forces might continue to fight for a

---

<sup>120</sup> Refer to § 4.4.4 (Nationality and Combatant Status).

<sup>121</sup> Refer to § 9.3.4.1 (Having Fallen).

<sup>122</sup> Refer to § 4.4.4.2 (Nationals of a State Who Join Enemy Forces).

<sup>123</sup> Refer to § 9.19.2.3 (Labor Assignments That May Be Compelled); § 10.7.3 (Compulsory Work for Protected Persons in a Belligerent's Home Territory); § 11.20.1.1 (Prohibition on Compulsory Service in an Occupying Power's Armed Forces).

<sup>124</sup> GPW art. 4A(3) (defining "prisoners of war, in the sense of the present Convention," to include "[m]embers of regular armed forces who profess allegiance to a government or an authority not recognized by the Detaining Power" who have fallen into the power of the enemy).

<sup>125</sup> Refer to § 4.4 (Rights, Duties, and Liabilities of Combatants).

<sup>126</sup> See INTERNATIONAL COMMITTEE OF THE RED CROSS, *Report on the Work of the Conference of Government Experts for the Study of the Convention for the Protection of War Victims*, 106 (Geneva, Apr. 14-26, 1947) ("In its report, the ICRC stressed that certain States [during World War II] had denied the status of belligerents to combatant units subject to a Government or authority which these States did not recognise; this despite the fact that these units (e.g. the French forces constituted under General de Gaulle) fulfilled all the conditions required for the granting of PW status. The Commission approved the ICRC's proposal that these armed forces should enjoy PW status, irrespective of the Government or authority under whose orders they might claim to be.").

government-in-exile or for a government that had ceased to exist.<sup>127</sup> Such a government would provide the *right authority* for its regular armed forces to participate in the ongoing war and to receive POW status upon capture by the enemy.<sup>128</sup> Members of those forces were sometimes denied POW status by an enemy State, even though other States recognized the group to which they belonged as a co-belligerent force.<sup>129</sup>

4.5.4 Persons Belonging, or Having Belonged, to the Armed Forces of an Occupied State. Under Article 4B(1) of the GPW, persons belonging, or having belonged, to the armed forces of an occupied State should be treated as POWs if, while hostilities are continuing outside occupied territory, the Occupying Power considers it necessary, by reason of their allegiance to the armed forces, to intern them.<sup>130</sup>

Article 4B(1) of the GPW seeks to address the proper status of an army demobilized by the Occupying Power while a portion of those same armed forces continue the struggle. When the forces are demobilized, they are treated as civilians, but when recalled for internment based on their prior service, they are treated as POWs.<sup>131</sup> In particular, States developed this provision to address Germany's practice during World War II of arresting demobilized military personnel from occupied States.<sup>132</sup> These personnel were often interned and sought to escape to join the ongoing fighting. This provision was promulgated to ensure that individuals in similar circumstances would receive POW treatment if they were interned. For example, the rules for the parole of POWs would apply to them.<sup>133</sup> Similarly, the rules relating to POW escape would

---

<sup>127</sup> II-A FINAL RECORD OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 415 ("Mr. Lamarle (France) realized that cases might arise where combatants claiming allegiance to an authority which was not recognized by the Detaining Power might be deprived of the benefit of the Convention; but he thought the word 'authority' afforded sufficient safeguards to such combatants. After an exchange of views on the subject, the Committee agreed that the word 'authority' afforded sufficient safeguards to combatants claiming allegiance to Governments which had ceased to exist.").

<sup>128</sup> Refer to § 1.11.1.1 (Competent Authority (Right Authority) to Wage War for a Public Purpose).

<sup>129</sup> Refer to § 3.3.3.3 (Recognition of Friendly Armed Groups as Lawful Belligerents).

<sup>130</sup> GPW art. 4B(1) ("(1) Persons belonging, or having belonged, to the armed forces of the occupied country, if the occupying Power considers it necessary by reason of such allegiance to intern them, even though it has originally liberated them while hostilities were going on outside the territory it occupies, in particular where such persons have made an unsuccessful attempt to rejoin the armed forces to which they belong and which are engaged in combat, or where they fail to comply with a summons made to them with a view to internment.").

<sup>131</sup> GPW COMMENTARY 69 ("In fact, as one delegate to the Conference pointed out, the question relates to the proper status of an army demobilized by the Occupying Power, while a portion of those same armed forces continue the struggle. It is logical to treat its members as civilians until such time as they are recalled in order to be interned; but from that moment, it is equally logical to treat them as prisoners of war.").

<sup>132</sup> See GPW COMMENTARY 68 ("During the Second World War, the Occupying Power, for security reasons, frequently arrested demobilized military personnel in occupied territory, especially officers. These men were granted prisoner-of-war status but usually only after repeated representations by the International Committee of the Red Cross and the Governments concerned. In the report which the International Committee prepared for the Government Experts, it therefore proposed that the entitlement of such persons to prisoner-of-war status should be explicitly mentioned and the Conference supported this suggestion."). For further historical background see LEVIE, POWS 66-67, II-A FINAL RECORD OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 431-32, and the note appended to *In re Siebers*, Special Court of Cassation, Feb. 20, 1950, The Hague, in 1950 INTERNATIONAL LAW REPORTS, 399-400.

<sup>133</sup> Refer to § 9.11.2 (Parole of POWs).

also apply to them.<sup>134</sup> So, a demobilized person who disobeyed an internment order and attempted to escape to rejoin his or her armed force would, like a POW, be subject, at most, to disciplinary punishment in respect of the act of escape.<sup>135</sup>

Persons belonging, or having belonged, to the armed forces of an occupied State would only be entitled to receive POW treatment while an international armed conflict continues.<sup>136</sup> For example, this provision would not apply to a situation like the occupation of Japan after World War II because all hostilities had ended.<sup>137</sup>

#### 4.6 OTHER MILITIA AND VOLUNTEER CORPS

Under certain conditions, members of militia and volunteer corps that are not part of the armed forces of a State qualify as combatants and receive the rights, duties, and liabilities of combatant status.<sup>138</sup> More specifically, Article 4(A)(2) of the GPW defines prisoners of war to include:

Members of other militias and members of other volunteer corps, including those of organized resistance movements, belonging to a Party to the conflict and operating in or outside their own territory, even if this territory is occupied, provided that such militias or volunteer corps, including such organized resistance movements, fulfil the following conditions:

- (a) that of being commanded by a person responsible for his subordinates;
- (b) that of having a fixed distinctive sign recognizable at a distance;
- (c) that of carrying arms openly;
- (d) that of conducting their operations in accordance with the laws and customs of war.<sup>139</sup>

---

<sup>134</sup> Refer to § 9.25 (POW Escapes).

<sup>135</sup> Refer to § 9.25.2.2 (Only Disciplinary Punishments in Respect of an Act of Escape).

<sup>136</sup> See LEVIE, POWS 67-68 (“It is important to bear in mind that the foregoing provisions explicitly contemplate that the government of the unoccupied part of the territory of the State the members of whose armed forces are in question, or that State’s allies if it has been completely occupied, are continuing the hostilities. The mere existence of a government-in-exile after the complete cessation of hostilities would not suffice to make the provision applicable. In other words, this provision was not intended to apply to the situation which arises when the capitulation of a State is followed by the complete termination of armed hostilities.”).

<sup>137</sup> See LEVIE, POWS 68 and footnote 261 (“[T]his provision was not intended to apply to the situation which arises when the capitulation of a State is followed by the complete termination of armed hostilities” and “would, therefore, not apply in a situation such as that which existed upon the capitulation of Japan in 1945.”).

<sup>138</sup> Refer to § 4.4 (Rights, Duties, and Liabilities of Combatants).

<sup>139</sup> GPW art. 4(A)(2). See also HAGUE IV REG. art. 1 (“The laws, rights, and duties of war apply not only to armies, but also to militia and volunteer corps fulfilling the following conditions: -- 1. To be commanded by a person responsible for his subordinates; 2. To have a fixed distinctive emblem recognizable at a distance; 3. To carry arms openly; and 4. To conduct their operations in accordance with the laws and customs of war.”); 1899 HAGUE II REG.

Under these conditions, which are discussed below, members of these armed groups may operate as combatants in or outside their own territory, even if this territory is occupied. By contrast, a *levée en masse* may only be formed on the approach of the enemy to non-occupied territory.<sup>140</sup>

4.6.1 GPW 4A(2) Conditions in General. The conditions set forth in Article 4A(2) of the GPW were derived from conditions found in the Regulations annexed to the 1899 Hague II and the 1907 Hague IV.<sup>141</sup> These conditions reflect the attributes common to regular armed forces of a State.<sup>142</sup> By seeking to ensure that participants in hostilities are sufficiently disciplined, law-abiding, and distinguishable from the civilian population, these conditions help protect the civilian population from the hardships of war. In addition, these conditions contribute to the military effectiveness of the force that satisfies the conditions.<sup>143</sup>

These conditions may be understood to reflect a burdens-benefits principle, *i.e.*, the receipt of certain benefits in the law of war (*e.g.*, privileges of combatant status) requires the assumption of certain obligations.<sup>144</sup>

4.6.1.1 GPW 4A(2) Conditions Required on a Group Basis. The armed group, as a whole, must fulfill these conditions for its members to be entitled to the privileges of combatant status. For example, if a member of an armed group met these requirements, but the armed group did not, that member would not be entitled to the privileges of combatant status because the armed group failed to satisfy the conditions.<sup>145</sup> Similarly, isolated departures from a

---

art. 1 (“The laws, rights, and duties of war apply not only to armies, but also to militia and volunteer corps, fulfilling the following conditions: 1. To be commanded by a person responsible for his subordinates; 2. To have a fixed distinctive emblem recognizable at a distance; 3. To carry arms openly; and 4. To conduct their operations in accordance with the laws and customs of war.”).

<sup>140</sup> Refer to § 4.7.1.3 (Approach of the Enemy to Non-Occupied Territory).

<sup>141</sup> See GPW COMMENTARY 49 (“[T]here was unanimous agreement [at the 1949 Diplomatic Conference] that the categories of persons to whom the Convention is applicable must be defined, in harmony with the Hague Regulations.”).

<sup>142</sup> See GPW COMMENTARY 58 (explaining that an organization satisfying the conditions of GPW art. 4A(2) “must have the principal characteristics generally found in armed forces throughout the world, particularly in regard to discipline, hierarchy, responsibility and honour.”).

<sup>143</sup> JAMES BROWN SCOTT, THE PROCEEDINGS OF THE HAGUE PEACE CONFERENCES: THE CONFERENCE OF 1899 549 (“General **den Beer Poortugaal**, while fully endorsing the considerations set forth by the PRESIDENT and his Excellency Mr. BEERNAERT, wishes to add a few words. ... But from a military standpoint also it must be recognized that it is to the benefit of the populations to impose on them the conditions contained in Articles 9 and 10 [predecessors to GPW art. 4A(2) and 4A(6) and], which they must satisfy if they wish to take up arms. For it is an undeniable fact that to lead undisciplined and unorganized troops into the fire is to lead them to butchery.”).

<sup>144</sup> Refer to § 3.6.3.2 (Benefits-Burdens Principle in Law of War Rules).

<sup>145</sup> See G.I.A.D. Draper, *The Status of Combatants and the Question of Guerrilla Warfare*, 45 BRITISH YEAR BOOK OF INTERNATIONAL LAW 173, 197 (1971) (“the fate of the individual irregular is essentially linked with that of the group in which he operates. If the group’s members, as a majority, always meet the legal conditions, the individual will answer only for his own misdoings, and then as a prisoner of war who had the right to participate in the combat. If, however, the individual were punctilious in a group in which the majority did not observe the conditions on any one occasion, he would not acquire combatant status or prisoner-of-war status upon capture, and will answer in law as an individual who participated in combat with no legal right to do so, *i.e.* answerable in municipal law or occupation law, or the law of war.”).

condition by a member of the armed group (*e.g.*, a failure to comply with the conditions by a member of the armed group that was not directed by the armed group's leader) would not prevent the armed group from satisfying these conditions.

4.6.1.2 *AP I and the GPW 4A(2) Conditions.* AP I changed, for its Parties, the conditions under which armed groups that are not part of a State's armed forces may qualify for combatant status.<sup>146</sup> The United States has objected to the way these changes relaxed the requirements for obtaining the privileges of combatant status, and did not ratify AP I, in large part, because of them.<sup>147</sup> A chief concern has been the extent to which these changes would undermine the protection of the civilian population.<sup>148</sup> The United States has expressed the view that it would not be appropriate to treat this provision of AP I as customary international law.<sup>149</sup>

4.6.1.3 *Application of GPW 4A(2) Conditions to the Armed Forces of a State.* The text of the GPW does not expressly apply the conditions in Article 4A(2) of the GPW to the armed forces of a State.<sup>150</sup> Thus, under the GPW, members of the armed forces of a State

---

<sup>146</sup> See AP I, arts. 1(4), 43, 44.

<sup>147</sup> See Ronald Reagan, *Letter of Transmittal*, Jan. 29, 1987, MESSAGE FROM THE PRESIDENT TRANSMITTING AP II IV ("Another provision [of AP I] would grant combatant status to irregular forces even if they do not satisfy the traditional requirements to distinguish themselves from the civilian population and otherwise comply with the laws of war. This would endanger civilians among whom terrorists and other irregulars attempt to conceal themselves.").

<sup>148</sup> See, *e.g.*, John B. Bellinger, III, *Lawyers and Wars: A Symposium in Honor of Edward R. Cummings*, Sept. 30, 2005, 2005 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 953, 955 ("More problematic from the lawyer's perspective—or at least this lawyer's perspective—is how law deals with the kind of situation where a would-be terrorist seeks to cloak his actions in the garb of legitimate combatant. This second factor working against civilian protection is fueled in part by Article 44 of Additional Protocol I, which suggests that combatants do not need to distinguish themselves from the civilian population except prior to and during an attack. To be fair, there is no doubt that a terrorist would not meet the combatancy definition of any instrument of international humanitarian law. But the very fact that Additional Protocol I allows greater flexibility in distinction undermines this fundamental protection. The principle of distinction, among the foundational principles of humanitarian law, exists for the purposes of civilian protection, to ensure that fighters can identify the combatant from the bystander. Article 44, pressed so strongly for largely political reasons in the 1970s, undermines it. And as a result, one has to lament that the process of negotiating international humanitarian law instruments has not always inured to the civilian population's benefit.").

<sup>149</sup> Memorandum submitted in *United States v. Shakur*, 690 F. Supp. 1291 (S.D.N.Y. 1988), III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-88 3436, 3441 ("Article 44 grants combatant status to irregular forces in certain circumstances even if they do not satisfy the traditional requirements to distinguish themselves from the civilian population and otherwise comply with the existing laws of war. This was not acceptable as a new norm of international law. It clearly does not reflect customary law. ... While the U.S. is of the view that certain provisions in Protocol I reflect customary international law (see, *e.g.*, Treaty Doc. 100-2, *supra*, at X), the provisions on wars of national liberation and combatant and prisoner-of-war status are definitely not in this category. ... Accordingly, it is the view of the United States that it would be inappropriate to treat these provisions as part of customary international law under any circumstances.").

<sup>150</sup> II-A FINAL RECORD OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 465-66 ("General SLAVIN (Union of Soviet Socialist Republics) said that according to the first paragraph, sub-paragraph I, of the working text it would appear that members of the Armed forces would have to fulfil the four traditional requirements mentioned in (a), (b), (c) and (d) in order to obtain prisoner of war status, which was contrary to the Hague Regulations (Article I of the Regulations concerning the Laws and Customs of War, 18 October 1907). General DEVIIVER (Belgium) pointed out that the above reproduced working text had been drafted with due regard to the Hague Regulations, and the first paragraph, sub-paragraph (I), of the working text carefully specified that only members of militia or volunteer corps should fulfil all four conditions."). *Cf.* *In re Lewinski (called von Manstein) Case*, reprinted in ANNUAL DIGEST

receive combatant status (including its privileges and liabilities) by virtue of their membership in the armed forces of a State.<sup>151</sup> Nonetheless, the GPW 4A(2) conditions were intended to reflect attributes of States' armed forces.<sup>152</sup> If an armed force of a State systematically failed to distinguish itself from the civilian population and to conduct its operations in accordance with the law of war, its members should not expect to receive the privileges afforded lawful combatants.<sup>153</sup> Similarly, members of the armed forces engaged in spying or sabotage forfeit their entitlement to the privileges of combatant status if captured while engaged in those activities.<sup>154</sup>

**4.6.2 Belonging to a Party to the Conflict.** The armed group must belong to a party to the conflict.<sup>155</sup> The requirement of "belonging" to a party establishes that the armed group fulfills a *jus ad bellum* requirement of *right authority*, *i.e.*, it is acting on the authority of a State.<sup>156</sup> This requirement recognizes that members of a non-State armed group are not entitled to the privileges of combatant status even if that armed group satisfies the other conditions.<sup>157</sup>

The State's authority may be granted by its representatives orally; it need not be granted in writing, such as through a commission or warrant. In all cases, however, opposing parties to

AND REPORTS OF PUBLIC INTERNATIONAL LAW CASES 509, 515-16 (H. Lauterpacht, ed., 1949) ("Regular soldiers are so entitled without any of the four requirements set out in Article 1 [of the Hague IV Reg.]: they are requisite in order to give the Militia and Volunteer Corps the same privileges as the Army.").

<sup>151</sup> Refer to § 4.5 (Armed Forces of a State).

<sup>152</sup> Refer to footnote 142 in § 4.6.1 (GPW 4A(2) Conditions in General).

<sup>153</sup> See Jay S. Bybee, Assistant Attorney General, *Status of Taliban Forces Under Article 4 of the Third Geneva Convention of 1949*, Feb. 7, 2002, 26 OPINIONS OF THE OFFICE OF LEGAL COUNSEL 1, 4 ("We conclude, however, that the four basic conditions that apply to militias must also apply, at a minimum, to members of armed forces who would be legally entitled to POW status. In other words, an individual cannot be a POW, even if a member of an armed force, unless forces also are: (a) 'commanded by a person responsible for his subordinates'; (b) 'hav[e] a fixed distinctive sign recognizable at a distance'; (c) 'carry[] arms openly'; and (d) 'conduct[] their operations in accordance with the laws and customs of war.' Thus, if the President has the factual basis to determine that Taliban prisoners are not entitled to POW status under Article 4(A)(2) as members of a militia, he therefore has the grounds to also find that they are not entitled to POW status as members of an armed force under either Article 4(A)(1) or Article 4(A)(3).") (brackets in original); BOTHE, PARTSCH, & SOLF, NEW RULES 234-35 (AP I art. 43, ¶2.1.2) ("It is generally assumed that these conditions were deemed, by the 1874 Brussels Conference and the 1899 and 1907 Hague Peace Conferences, to be inherent in the regular armed forces of States. Accordingly, it was considered to be unnecessary and redundant to spell them out in the Conventions.").

<sup>154</sup> Refer to § 4.17.5 (Spying and Sabotage – Forfeiture of the Privileges of Combatant Status).

<sup>155</sup> GPW art. 4A(2). Cf. LIEBER CODE art. 81 ("Partisans are soldiers armed and wearing the uniform of their army, but belonging to a corps which acts detached from the main body for the purpose of making inroads into the territory occupied by the enemy. If captured, they are entitled to all the privileges of the prisoner of war.").

<sup>156</sup> Refer to § 1.11.1.1 (Competent Authority (Right Authority) to Wage War for a Public Purpose).

<sup>157</sup> See *The Military Prosecutor v. Omar Mahmud Kassem and Others* (Israeli Military Court, Ramallah, Apr. 13, 1969), LEVIE, DOCUMENTS ON POWS 776 (explaining that "the most basic condition of the right of combatants to be considered upon capture as prisoners of war" is belonging to a belligerent State and that if persons "do not belong to the Government or State for which they fight, ... they do not possess the right to enjoy the status of prisoners of war upon capture."). Cf. BOTHE, PARTSCH, & SOLF, NEW RULES 237 (AP I art. 43, ¶2.3.1) ("gangs of terrorists acting on their own behalf and not linked to an entity subject to international law are excluded" from the definition of "armed forces of a Party to the Conflict" in AP I similar to how they would be excluded under Article 4A(2) of the GPW).

the conflict must be able to discern that the armed group enjoys such authority. A State's formal acknowledgement that an armed group "belongs" to it is sufficient. On the other hand, the bare claim by the armed group that it acts on behalf of a State would be insufficient. In some cases, State support and direction to the armed group may establish that it belongs to the State.<sup>158</sup>

4.6.3 Being Commanded by a Person Responsible for His or Her Subordinates. The armed group must be commanded by a person responsible for his or her subordinates; the armed group must have a commander with effective authority over the armed group.<sup>159</sup> This requirement helps ensure that the armed group has sufficient discipline and organization to conduct its operations in accordance with the law of war.<sup>160</sup>

The commander may derive his or her authority over the armed group by a regular or temporary commission from a State. However, a commander may derive his or her command from another position or authority. For example, the armed group may be formed informally and may have elected the commander as its leader. In practice, a State may provide members of the armed group with certificates or distinctive badges to show that they are officers, or military personnel responsible to higher authority, and not private persons acting on individual initiative.<sup>161</sup>

The authority of the commander over his or her subordinates gives rise to a corresponding duty to ensure that the armed group's members conduct their operations in accordance with the law of war.<sup>162</sup>

4.6.4 Having a Fixed Distinctive Sign Recognizable at a Distance. Members of the

---

<sup>158</sup> See *The Military Prosecutor v. Omar Mahmud Kassem and Others* (Israeli Military Court, Ramallah, Apr. 13, 1969), LEVIE, DOCUMENTS ON POWS 776-77 ("It is natural that, in international armed conflicts, the Government which previously possessed an occupied area should encourage and take under its wing the irregular forces which continue fighting within the borders of the country, give them protection and material assistance, and that therefore a 'command relationship' should exist between such Government and the fighting forces, with the result that a continuing responsibility exists of the Government and the commanders of its army for those who fight in its name and on its behalf.").

<sup>159</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 59 ("The commander must be a person responsible for his subordinates, that is, his authority over those in his command must be effective.").

<sup>160</sup> See G.I.A.D. Draper, *The Status of Combatants and the Question of Guerrilla Warfare*, 45 BRITISH YEAR BOOK OF INTERNATIONAL LAW 173, 201 (1971) (explaining that this condition "does probably mean that the commander must have sufficient authority to ensure that the conditions applicable to the members of the group, necessary for lawful combatancy, are observed."); 1958 UK MANUAL ¶91 note 1 (explaining that "Field Marshall Rundstedt, C.-in-C. of the German armed forces in the West, disclaimed all responsibilities for the atrocities by Waffen S.S. units on the ground that neither their commanders nor members were subject to military law" and that "he could take no disciplinary action against them," and thus German "Waffen S.S." paramilitary units used during World War II failed to meet this condition and were not lawful combatants).

<sup>161</sup> 1958 UK MANUAL ¶91 ("The first condition, 'to be commanded by a person responsible for his subordinates,' is fulfilled if the commander of the corps is regularly or temporarily commissioned as an officer or is a person of position and authority, or if the members are provided with certificates or badges granted by the government of the State to show that they are officers, or soldiers, so that there may be no doubt that they are not partisans acting on their own responsibility. State recognition, however, is not essential, and an organisation may be formed spontaneously and elect its own officers.").

<sup>162</sup> Refer to § 18.23.3 (Command Responsibility).

armed group should display a fixed distinctive sign or other device recognizable at a distance. The essence of this requirement is that members of the armed group are distinguishable from the civilian population.<sup>163</sup> By helping to ensure that members of the armed group can be visually distinguished from civilians, this requirement helps protect the civilian population from being erroneously made the object of attack.<sup>164</sup>

4.6.4.1 *Distinctive Sign*. The requirement does not specify a particular sign or emblem that persons must wear.<sup>165</sup> Wearing a military uniform satisfies this condition. However, a full uniform is not required.<sup>166</sup> The sign suffices if it enables the person to be distinguished from the civilian population. For example, a helmet or headdress that makes the silhouette of the individual readily distinguishable from that of a civilian can meet this requirement. Similarly, a partial uniform (such as a uniform jacket or trousers), load bearing vest, armband, or other device could suffice, so long as it served to distinguish the members from the civilian population. Formally notifying enemy forces of the distinctive sign is not required, and the proposal to add such a requirement was not accepted by States.<sup>167</sup> Such notification, however, may avoid misunderstanding and facilitate claims of POW status for captured members of the armed group.

---

<sup>163</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 59 (“Soldiers must be dressed in such a fashion that they are clearly distinguishable from the general population as members of the armed forces.”).

<sup>164</sup> See Abraham Sofaer, Legal Adviser, Department of State, *The Rationale for the United States Decision*, 82 AJIL 784, 786 (1988) (“Inevitably, regular forces would treat civilians more harshly and with less restraint if they believed that their opponents were free to pose as civilians while retaining their right to act as combatants and their POW status if captured.”). For example, LEVIE, POWS 50 footnote 187 (“In Vietnam individuals who were apparently civilian noncombatants (women, children, working farmers, etc.) would approach American servicemen in seeming innocence and then suddenly toss a hand grenade at them. After a very few such incidents the soldiers understandably came to distrust all civilians while they were in the field and frequently took definitive action upon suspicion and without waiting to ascertain the facts. Thus, the original illegal actions taken by the guerrillas subsequently endangered the members of the civilian population who, as noncombatants, were entitled to be protected in their status.”) (internal citations omitted).

<sup>165</sup> See GPW COMMENTARY 52 (“The drafters of the 1949 Convention, like those of the Hague Conventions, considered it unnecessary to specify the sign which members of the armed forces should have for the purposes of recognition. It is the duty of each State to take steps so that members of its armed forces can be immediately recognized as such and to see to it that they are easily distinguishable from ... civilians.”).

<sup>166</sup> See, e.g., 1958 UK MANUAL ¶92 (“The second condition, relating to a fixed distinctive sign recognisable at a distance, would be satisfied by the wearing of a military uniform, but something less than a complete uniform will suffice.”); 1914 RULES OF LAND WARFARE ¶33 (“*The distinctive sign*. – This requirement will be satisfied by the wearing of a uniform or even less than a complete uniform.”); SPAIGHT, WAR RIGHTS ON LAND 57 (“The ‘distinctive emblem’ does not mean a uniform.”). Cf. ICRC AP COMMENTARY 468 (¶1577) (“What constitutes a uniform, and how can emblems or nationality be distinguished from each other? The Conference in no way intended to define what constitutes a uniform ... . [A]ny customary uniform which clearly distinguished the member wearing it from a non-member should suffice.’ Thus a cap or an armband, etc. worn in a standard way is actually equivalent to a uniform.”).

<sup>167</sup> See JAMES BROWN SCOTT, THE PROCEEDINGS OF THE HAGUE PEACE CONFERENCES: III THE CONFERENCE OF 1907 6 (1921) (“The PRESIDENT first takes up the German amendment relating to Article 1, tending to require *previous notice* to the hostile party of *fixed distinctive emblems recognizable at a distance*. He recalls that this amendment was rejected by 23 votes to 11, and asks whether it is again advanced by the German delegation. On the negative answer of Major General VON GUNDELL, he considers it useless to put the question to discussion and passes to Article 2.”).

4.6.4.2 *Fixed*. The text of the GPW indicates that the sign should be “fixed.” This requirement has been interpreted to mean that the sign must be such that it cannot be easily removed and disposed of at the first sign of danger.<sup>168</sup> In practice, however, it would be important to assess whether members of the armed group are functionally distinguishable from the civilian population, even if the distinctive sign that they wear is not permanent and could be removed.<sup>169</sup>

4.6.4.3 *Visible at a Distance*. “Distance” has not been defined, but may be interpreted as requiring that the sign be easily distinguishable by the naked eye of ordinary people at a distance at which the form of the individual can be determined.<sup>170</sup>

4.6.5 *Carrying Arms Openly*. Members of the armed group must carry their arms openly.<sup>171</sup> This requirement is not satisfied if the armed group makes a practice of carrying only concealed weapons or of hiding weapons on the approach of enemy forces to avoid identification

---

<sup>168</sup> See LEVIE, POWS 48 (a resistance fighter “must wear some item which will identify him as a combatant, thereby distinguishing him from the general population, and that item must be such that he cannot remove and dispose of it at the first sign of danger. A handkerchief, or rag, or armband slipped onto or loosely pinned to the sleeve does not meet this definition. An armband sewed to the sleeve, a logotype of sufficient size displayed on the clothing, a unique type of jacket-these will constitute a fixed and distinctive identifying insignia, effectively separating the combatant of the moment from the rest of the population.”); GREENSPAN, MODERN LAW OF LAND WARFARE 59 (“Where a complete uniform is not worn, and this is sometimes not possible because of the poverty of the country, sudden emergency or other reasons, the fixed distinctive sign should be something which cannot be instantly taken off or assumed at will, thus enabling a combatant to appear a peaceful citizen one moment and a soldier the next. The sign should be part of the clothing or sewn to it.”); 1958 UK MANUAL ¶92 (“Something in the nature of a badge sewn on the clothing should therefore be worn in addition [to a distinctive helmet]” in order to meet the condition that the sign must be fixed.).

<sup>169</sup> See FRANCIS LIEBER, GUERRILLA PARTIES CONSIDERED WITH REFERENCE TO THE LAWS AND USAGES OF WAR 16-17 (1862) (“The Southern prisoners made at Fort Donelson, whom I have seen at the West, had no uniform. They were indeed dressed very much alike, but it was the uniform dress of the countryman in that region. Yet they were treated by us as prisoner of war, and well treated too. Nor would it be difficult to adopt something of a badge, easily put on and off, and to call it a uniform. It makes a great difference, however, whether the absence of the uniform is used for the purpose of concealment or disguise, in order to get by stealth within the lines of the invader, for destruction or life or property, or for pillage, and whether the parties have no organization at all, and are so small that they cannot act otherwise than by stealth.”).

<sup>170</sup> See 1958 UK MANUAL ¶92 (“The distance at which the sign should be visible is necessarily vague, but it is reasonable to expect that the silhouette of an irregular combatant in the position of standing against the skyline should at once be distinguishable from the outline of a peaceful inhabitant, and this by the naked eye of an ordinary individual at a distance at which the form of the individual can be determined.”); 1914 RULES OF LAND WARFARE ¶33 (“The distance that the sign must be visible is left vague and undetermined and the practice is not uniform. This requirement will be satisfied certainly if the sign is ‘easily distinguishable by the naked eye of ordinary people’ at a distance at which the form of the individual can be determined.”); CHARLES HENRY HYDE, II INTERNATIONAL LAW: CHIEFLY AS INTERPRETED AND APPLIED BY THE UNITED STATES 291 footnote 3 (1922) (quoting the same provision in the 1917 U.S. Rules of Land Warfare); SPAIGHT, WAR RIGHTS ON LAND 57 (explaining that “[i]f the sign is recognizable at a distance at which the naked eye can distinguish the form and color of a person’s dress, all reasonable requirements appear to be met” and noting the Japanese view during the Russo-Japanese War that a Russian free corps that “would wear no uniform but only a distinctive sign on the cap and sleeve” would only be considered belligerents “if they can be *distinguishable by the naked eye from the ordinary people* or fulfill the conditions for militias or volunteers by the Hague *Réglement*.”).

<sup>171</sup> See GPW art. 4A(2)(c); HAGUE IV REG. art. 1(3).

as fighters.<sup>172</sup>

4.6.6 Conducting Their Operations in Accordance With the Laws and Customs of War. The armed group, as a whole, must conduct its operations in accordance with the law of war. Evidence that an armed group enforced the law of war (such as by promulgating instructions regarding law of war requirements and punishing violations by its members) would help establish that an armed group meets this condition.

#### 4.7 *LEVÉE EN MASSE*

A *levée en masse* is a spontaneous uprising of the inhabitants of non-occupied territory who, on the approach of the enemy in an international armed conflict, take up arms to resist the invading forces, without having time to form themselves into regular armed units.<sup>173</sup> Participants in a *levée en masse* are entitled to the privileges of combatant status, provided that they carry their arms openly and respect the laws and customs of war.<sup>174</sup>

4.7.1 Conditions for a *Levée en Masse*. The following discussion elaborates upon some of the conditions for a *levée en masse*.

4.7.1.1 *Spontaneous.* A *levée en masse* is a spontaneous uprising in which members have not had time to form into regular armed units.<sup>175</sup> Thus, unlike other categories of lawful combatants, persons who join a *levée en masse* need not wear a distinctive sign nor be organized under a responsible command. The spontaneity of their response generally precludes their being able to take such measures.

4.7.1.2 *Inhabitants.* A *levée en masse* is understood to reflect the right of inhabitants to resist approaching enemy forces. Non-inhabitants who travel to a territory to resist invading forces would not be entitled to participate in a *levée en masse*.<sup>176</sup>

---

<sup>172</sup> 1958 UK MANUAL ¶94 (“The third condition is that irregular combatants shall carry arms openly. They may therefore be refused the rights of the armed forces if it is found that their sole arm is a pistol, hand-grenade, or dagger concealed about the person, or a sword-stick or similar weapon, or if it is found that they have hidden their arms on the approach of the enemy.”).

<sup>173</sup> GPW art. 4A(6) (defining “prisoners of war, in the sense of the present Convention,” to include “[i]nhabitants of a non-occupied territory, who on the approach of the enemy spontaneously take up arms to resist the invading forces, without having had time to form themselves into regular armed units, provided they carry arms openly and respect the laws and customs of war” who have fallen into the power of the enemy); HAGUE IV REG. art. 2 (“The inhabitants of a territory which has not been occupied, who, on the approach of the enemy, spontaneously take up arms to resist the invading troops without having had time to organize themselves in accordance with Article 1, shall be regarded as belligerents if they carry arms openly and if they respect the laws and customs of war.”); LIEBER CODE art. 51 (“If the people of that portion of an invaded country which is not yet occupied by the enemy, or of the whole country, at the approach of a hostile army, rise, under a duly authorized levy, *en masse* to resist the invader, they are now treated as public enemies, and, if captured, are prisoners of war.”).

<sup>174</sup> For more background, see LEVIE, POWS 64-66.

<sup>175</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 63 (“the essence of a *levée en masse* is that it is unorganized.”).

<sup>176</sup> Compare § 10.3.2.1 (“Find Themselves”).

4.7.1.3 *Approach of the Enemy to Non-Occupied Territory.* A *levée en masse* may only be formed on the approach of the enemy to non-occupied territory. Once the belligerent has established an occupation, the local population should comply with the orders of the occupation force, and a *levée en masse* may not be formed.<sup>177</sup> Similarly, even before the establishment of an occupation, inhabitants of areas that have already been invaded may not form a *levée en masse*.<sup>178</sup>

By contrast, members of an organized resistance movement under Article 4A(2) of the GPW may operate as combatants in or outside their own territory, even if this territory is occupied.<sup>179</sup>

4.7.2 *Levée en Masse – Discerning Participants.* Should some inhabitants form a *levée en masse* to defend an area, it may be justifiable for the invading force to detain all persons of military age in that area and treat them as POWs.<sup>180</sup> Even if an inhabitant who joined or participated in the *levée en masse* lays down arms, if he or she is later captured, he or she may be detained as a POW.<sup>181</sup> If a person joins a *levée en masse*, he or she may be held as a POW even if he or she actually took no part in fighting.<sup>182</sup>

If detained, a person believed to have participated in a *levée en masse* should be treated as a POW until a determination is otherwise made by a competent tribunal.<sup>183</sup> If a competent tribunal determines that a person did not join the *levée en masse* but instead committed private acts of hostility against enemy military forces,<sup>184</sup> the person may be treated as an unprivileged belligerent.<sup>185</sup>

---

<sup>177</sup> Refer to § 11.7.1 (Inhabitants' Obedience to the Occupying Power).

<sup>178</sup> See LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 258 (§81) ("Article 2 [of the HAGUE IV REG.] distinctly speaks of the *approach* of the enemy, and thereby sanctions only such a *levy en masse* as takes place in territory not yet *invaded* by the enemy. Once the territory is invaded, although the invasion has not yet ripened into occupation, a *levy en masse* is no longer legitimate. But, of course, the term *territory*, as used by Article 2, is not intended to mean the whole extent of the State of a belligerent, but only such parts of it as are not yet invaded. For this reason, if a town is already invaded, but not a neighbouring town, the inhabitants of the latter may, on the approach of the enemy, legitimately rise *en masse*.").

<sup>179</sup> Refer to § 4.6 (Other Militia and Volunteer Corps).

<sup>180</sup> 1956 FM 27-10 (Change No. 1 1976) ¶65 ("Should some inhabitants of a locality thus take part in its defense, it might be justifiable to treat all the males of military age as prisoners of war."); 1958 UK MANUAL ¶100 ("Where the majority of inhabitants of a locality have taken part in its defence in circumstances amounting to a *levée en masse*, it is justifiable and probably advisable to treat all the male inhabitants of military age as prisoners of war, leaving it to the individual concerned to claim that they took no part in the *levée en masse* or defence of the locality.").

<sup>181</sup> 1956 FM 27-10 (Change No. 1 1976) ¶65 ("Even if inhabitants who formed the *levée en masse* lay down their arms and return to their normal activities, they may be made prisoners of war.").

<sup>182</sup> 1958 UK MANUAL ¶100 ("If it is shown that they joined the *levée en masse*, but took no part in the defence, they may be held as prisoners of war.").

<sup>183</sup> Refer to § 4.27.3 (Competent Tribunal to Assess Entitlement to POW Status or Treatment).

<sup>184</sup> Refer to § 4.18 (Private Persons Who Engage in Hostilities).

<sup>185</sup> Refer to § 4.19 (Rights, Duties, and Liabilities of Unprivileged Belligerents).

## 4.8 RIGHTS, DUTIES, AND LIABILITIES OF CIVILIANS

Like combatants, members of the civilian population also have certain rights, duties, and liabilities under the law of war. Civilians may not be made the object of attack. If detained, civilians are entitled to humane treatment and a variety of additional protections. Civilians lack the combatant's privilege, and may be punished, after a fair trial, by an enemy State for engaging in hostilities against it.

4.8.1 Civilians – Notes on Terminology. Like other terms, “civilian” is used in a variety of different ways in the law of war.<sup>186</sup>

4.8.1.1 “Civilian” Versus “Military”. Sometimes, “civilian” is used to describe persons who are not military personnel. For example, persons authorized to accompany the armed forces are often called “civilians” in this sense, even though they are POWs if they fall into the power of the enemy during international armed conflict.<sup>187</sup>

4.8.1.2 “Civilian” Versus “Combatant”. “Civilian” is also often used to refer to persons who are not “combatants.” Since “combatant” is often used in different ways, “civilian,” correspondingly, is also used in different ways. For example, sometimes “civilians” is used to refer to persons who lack the right to participate in hostilities. Other times “civilian” is used to refer to persons who neither have the right to participate in hostilities nor have in fact participated in hostilities.<sup>188</sup> For example, “civilian” casualty reports generally exclude insurgents or terrorists, even though some might call such persons “civilians” because they are not entitled to participate in hostilities.

4.8.1.3 “Civilian” in the GC. The GC does not define “civilian,” although it uses the word.<sup>189</sup> The GC uses the term “protected person” to refer to persons protected by the Convention.<sup>190</sup> The GC excludes from the definition of “protected person” those persons who are protected under the other 1949 Geneva Conventions, *e.g.*, POWs and retained personnel.<sup>191</sup> In some cases, “protected persons” can include a person “detained as a spy or saboteur, or as a person under definite suspicion of activity hostile to the security of the Occupying Power,” although such persons are not entitled to all the protections applicable to protected persons.<sup>192</sup>

---

<sup>186</sup> Refer to § 4.3.2 (Combatant – Notes on Terminology).

<sup>187</sup> Refer to § 4.15.3 (Persons Authorized to Accompany the Armed Forces – Detention).

<sup>188</sup> See, *e.g.*, GC COMMENTARY 134 (“These rules [for the protection of the wounded and sick] are even more essential when the wounded or sick person is a civilian, *i.e.* a person who, by definition, takes no part in the hostilities.”).

<sup>189</sup> See, *e.g.*, GC art. 10 (“The provisions of the present Convention constitute no obstacle to the humanitarian activities which the International Committee of the Red Cross or any other impartial humanitarian organization may, subject to the consent of the Parties to the conflict concerned, undertake for the protection of civilian persons and for their relief.”).

<sup>190</sup> Refer to § 10.3 (Protected Person Status).

<sup>191</sup> Refer to § 10.3.2.3 (Not Protected by the GWS, GWS-Sea, or the GPW).

<sup>192</sup> GC art. 5. Refer to § 10.3.2.4 (Unprivileged Belligerents Not Per Se Excluded From Protected Person Status).

4.8.1.4 “Civilian” in AP I and AP II. AP I defines “civilian” in opposition to “combatant”; under AP I, anyone who is not a “combatant” is, by definition, a “civilian.”<sup>193</sup> The United States has objected to AP I’s definition of combatant.<sup>194</sup> AP II uses the term “civilian” without providing a definition.<sup>195</sup>

4.8.1.5 General Usage of “Civilian” in This Manual. This manual generally uses “civilian” to mean a member of the civilian population, *i.e.*, a person who is neither part of nor associated with an armed force or group, nor otherwise engaging in hostilities.

4.8.2 Civilians – Conduct of Hostilities. Civilians may not be made the object of attack, unless they take direct part in hostilities.<sup>196</sup> The wounded and sick, as well as the infirm, and expectant mothers, shall be the object of particular protection and respect.<sup>197</sup> Civilians may be killed incidentally in military operations; however, the expected incidental harm to civilians may not be excessive in relation to the anticipated military advantage from an attack,<sup>198</sup> and feasible precautions must be taken to reduce the risk of harm to civilians during military operations.<sup>199</sup>

Civilians who engage in hostilities thereby forfeit the corresponding protections of civilian status and may be liable to treatment in one or more respects as unprivileged belligerents.<sup>200</sup>

4.8.3 Civilians – Detention. In general, civilians may be subject to non-violent measures that are justified by military necessity, such as searches, or temporary detention.<sup>201</sup> Belligerents or Occupying Powers may take necessary security measures in relation to civilians, including internment or assigned residence for imperative reasons of security.<sup>202</sup>

Enemy civilians who are interned during international armed conflict or occupation generally are classified as “protected persons” under the GC and receive a variety of protections.<sup>203</sup> Chapter X addresses in detail the required treatment of enemy civilian internees

---

<sup>193</sup> See AP I art. 50(1) (“A civilian is any person who does not belong to one of the categories of persons referred to in Article 4 A (1), (2), (3) and (6) of the Third Convention and in Article 43 of this Protocol. In case of doubt whether a person is a civilian, that person shall be considered to be a civilian.”).

<sup>194</sup> Refer to § 4.6.1.2 (AP I and the GPW 4A(2) Conditions).

<sup>195</sup> See, *e.g.*, AP II art. 13 (“1. The civilian population and individual civilians shall enjoy general protection against the dangers arising from military operations.”).

<sup>196</sup> Refer to § 5.8 (Civilians Taking a Direct Part in Hostilities).

<sup>197</sup> GC art. 16 (“The wounded and sick, as well as the infirm, and expectant mothers, shall be the object of particular protection and respect.”).

<sup>198</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>199</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects); § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>200</sup> Refer to § 4.18 (Private Persons Who Engage in Hostilities).

<sup>201</sup> Refer to § 5.2.2.1 (Non-Violent Measures That Are Militarily Necessary).

<sup>202</sup> Refer to § 10.6 (Measures of Control and Security).

<sup>203</sup> Refer to § 10.3 (Protected Person Status).

during international armed conflict and occupation. In all circumstances, detained civilians must be treated humanely.<sup>204</sup> Special categories of civilians, such as children, may require additional consideration during detention.<sup>205</sup>

4.8.4 Civilians – Legal Liability Under an Enemy State’s Domestic Law. Unlike combatants, civilians lack the combatant’s privilege excepting them from the domestic law of the enemy State. Civilians who engage in hostilities may, after a fair trial, be punished by an opposing State.<sup>206</sup>

A State that is an Occupying Power has additional authorities over enemy civilians that extend beyond the ability to punish their unauthorized participation in hostilities.<sup>207</sup>

Note, however, the special cases of persons authorized to accompany the armed forces,<sup>208</sup> members of the merchant marine and civil aircraft,<sup>209</sup> and participants in a *levée en masse*.<sup>210</sup>

#### 4.9 MILITARY MEDICAL AND RELIGIOUS PERSONNEL

“Medical personnel exclusively engaged in the search for, or the collection, transport or treatment of the wounded or sick, or in the prevention of disease, staff exclusively engaged in the administration of medical units and establishments, as well as chaplains attached to the armed forces” are treated as a special category under the law of war.<sup>211</sup> This manual generally refers to them as military medical and religious personnel.

Under certain circumstances, (1) the authorized staff of voluntary aid societies and (2) the staff of a recognized aid society of a neutral country are treated like military medical and religious personnel.<sup>212</sup>

4.9.1 Types of Military Medical and Religious Personnel. Military medical and religious personnel include: (1) medical personnel exclusively engaged in the search for, or the collection, transport, or treatment of the wounded or sick, or in the prevention of disease; (2) staff exclusively engaged in the administration of medical units and establishments; and (3) chaplains

---

<sup>204</sup> Refer to § 10.5 (Humane Treatment and Other Basic Protections for Protected Persons).

<sup>205</sup> Refer to § 4.20 (Children).

<sup>206</sup> Refer to § 4.18.3 (Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status).

<sup>207</sup> Refer to § 11.7 (Authority of the Occupying Power Over Inhabitants).

<sup>208</sup> Refer to § 4.15.4 (Persons Authorized to Accompany the Armed Forces – Liability Under Domestic Law for Participation in Hostilities).

<sup>209</sup> Refer to § 4.16 (Crews of Merchant Marine Vessels or Civil Aircraft).

<sup>210</sup> Refer to § 4.7 (*Levée en Masse*).

<sup>211</sup> GWS art. 24.

<sup>212</sup> Refer to § 4.11 (Authorized Staff of Voluntary Aid Societies); § 4.12 (Staff of a Recognized Aid Society of a Neutral Country).

attached to the armed forces.<sup>213</sup>

4.9.1.1 *Medical Personnel Exclusively Engaged in Medical Duties.* Medical personnel exclusively engaged in the search for, or the collection, transport, or treatment of the wounded or sick, or in the prevention of disease include military physicians, dentists, nurses, orderlies, stretcher-bearers, and other persons belonging to the armed forces who give direct care to the wounded and sick.<sup>214</sup>

Persons who are exclusively engaged in the prevention of disease also qualify as military medical personnel. For example, veterinary personnel qualify for military medical status, if they are exclusively engaged in providing health services for military personnel (*e.g.*, performing food safety inspections and ensuring that animal illnesses do not spread to humans). However, as a general matter, veterinary personnel would not qualify for military medical status based on being part of the veterinary service.<sup>215</sup>

4.9.1.2 *Staff Exclusively Engaged in Support to Medical Units and Establishments.* In addition to persons directly engaged in medical duties, medical personnel also include staff exclusively engaged in the administration of medical units and establishments. These persons also receive status as medical personnel provided that they are exclusively assigned to the Medical Service.<sup>216</sup> For example, Medical Service Corps personnel, and individuals with a non-medical Military Occupation Specialty permanently assigned to a medical unit or facility (such as its cooks, clerks and supply personnel, or crews operating permanent medical aircraft), would qualify for military medical status.

4.9.1.3 *Chaplains Attached to the Armed Forces.* Chaplains attached to the armed forces include any cleric, regardless of faith, who is attached to the armed forces of a belligerent and assigned duties exclusively of a religious or spiritual nature.<sup>217</sup>

---

<sup>213</sup> GWS art. 24 (“Medical personnel exclusively engaged in the search for, or the collection, transport or treatment of the wounded or sick, or in the prevention of disease, staff exclusively engaged in the administration of medical units and establishments, as well as chaplains attached to the armed forces, shall be respected and protected at all times.”).

<sup>214</sup> GWS COMMENTARY 218 (“Medical personnel proper. – These are the doctors, surgeons, dentists, chemists, orderlies, nurses, stretcher-bearers, etc., who give direct care to the wounded and sick.”).

<sup>215</sup> See GWS COMMENTARY 205 (“[GWS Article 22(4) of the GWS], which dates from 1929, was introduced at the suggestion of the United States Delegation, which pointed out that veterinary personnel were attached to medical units in the American Army. A proposal, made by another delegation in 1929, to place the Veterinary Service on the same footing as the Medical Service was, on the other hand, rejected.”).

<sup>216</sup> GWS COMMENTARY 219 (“These are persons who look after the administration of medical units and establishments, without being directly concerned in the treatment of the wounded and sick. They include office staff, ambulance drivers, cooks (male or female), cleaners, etc. Like the previous category, they form part of the Medical Service of the armed forces, and accordingly had to be accorded the same immunity as medical personnel proper. They form an integral part of medical units and establishments, which could not function properly without their help. They too must be exclusively assigned to the Medical Service.”).

<sup>217</sup> GWS art. 24. Cf. BOTHE, PARTSCH, & SOLF, NEW RULES 99 (AP I art. 8, ¶2.6) (“In the new definition [of ‘religious personnel’ in AP I], the Christian notion of “chaplain” is only used by way of an example. Religious personnel are ministers of any religion. What is a ‘minister’ will not always be easy to determine, because that concept varies from religion to religion. Again the word ‘exclusively’ adds some precision. A lay preacher, being,

4.9.2 Requirements for Military Medical and Religious Status. To acquire and retain military medical and religious status, members of the armed forces must (1) belong to a force whose members qualify for POW status; (2) be designated as exclusive medical or religious personnel by their armed forces; and (3) serve exclusively in a medical or religious capacity.

Underlying military medical and religious status is the principle that the armed forces have committed to use these personnel exclusively in a humanitarian role; thus, these personnel have a “supra-national” and “quasi-neutral character” because their humanitarian duties place them “above the conflict.”<sup>218</sup>

4.9.2.1 Belong to a Force Whose Members Qualify for POW Status. To acquire military medical and religious status, a person must belong to an armed force whose members qualify for POW status, *i.e.*, the armed forces of a State, regular armed forces who profess allegiance to a government or an authority not recognized by the Detaining Power, or other militia and volunteer corps meeting the conditions in the GPW.<sup>219</sup> For example, medical personnel belonging to non-State armed groups would not be entitled to retained personnel status under the GWS, GWS-Sea, and GPW because their members do not qualify for POW status.

4.9.2.2 Designated by Their Armed Forces. To acquire military medical and religious status, members of the armed forces must be designated as such by their armed forces, usually by being part of the official medical or religious service.<sup>220</sup> A member of the armed forces cannot designate himself or herself as military medical or religious personnel.

Thus, members of the armed forces do not acquire military medical and religious status merely by performing medical or religious functions or by having medical or religious training. For example, a member of a special operations unit might be trained as a medical specialist, but not be designated as military medical personnel, because that person is expected to perform both

---

if a ‘minister’, a part-time minister, is not protected as religious personnel. Furthermore, the protection does not extend to every individual minister. The protection granted by the First and Second Conventions only applies to those attached to the armed forces or to a hospital ship.”).

<sup>218</sup> GWS COMMENTARY 244 (“On the one hand, the Conference thought it necessary to affirm the supra-national and quasi-neutral character of personnel whose duties placed them above the conflict.”). *See also* Vowinckel v. First Federal Trust Co., 10 F.2d 19, 21 (9th Cir. 1926) (“Red Cross surgeons and nurses, who are engaged exclusively in ameliorating the condition of the wounded of the armies in the field, and in alleviating the sufferings of mankind in general, are not enemies of the United States in any proper sense of that term.”); WINTHROP, MILITARY LAW & PRECEDENTS 779 (“Another class who are to be exempt from violence, or seizure as prisoners, are the surgeons, assistants and employees charged with the care and transport of the wounded on the field and the attendance upon them in field ambulance or hospital. Persons of this class ‘enjoy the rights of neutrality, provided they take no active part in the operations of war.’”).

<sup>219</sup> *Refer to* § 4.5 (Armed Forces of a State); § 4.5.3 (Regular Armed Forces Who Profess Allegiance to a Government or an Authority Not Recognized by the Detaining Power); § 4.6 (Other Militia and Volunteer Corps).

<sup>220</sup> *See* GWS COMMENTARY 218 (“Article 24 refers to the official medical personnel and chaplains of the armed forces.”); *id.* at 220 (“On the other hand, chaplains, to be accorded immunity, must be attached to the armed forces. They do not attach themselves. The decision will rest with the competent military authorities and the relationship must be an official one. Accordingly, ministers of religion who wish to serve in a non-official capacity, are not covered by the Convention, and, until such time as they have been regularly appointed, act at their own risk and peril.”). *Cf.* GPW art. 32 (referring to POWs “who, though not attached to the medical service of their armed forces, are physicians, surgeons, dentists, nurses or medical orderlies,” as not being entitled to retained personnel status).

combatant and medical duties. That person, therefore, would not receive the rights, duties, and liabilities related to military medical status. He or she, however, may be treated like military medical personnel while detained by the enemy by being required to perform medical duties.<sup>221</sup>

4.9.2.3 *Exclusively Engaged in Humanitarian Duties.* In order to establish and maintain their status as military medical or religious personnel, these personnel must serve exclusively in a humanitarian capacity. This assignment must generally be permanent.<sup>222</sup>

Military physicians or other medical specialist personnel who are not exclusively engaged in humanitarian duties, such as duties that involve committing acts harmful to the enemy, would not be entitled to military medical status.<sup>223</sup> For example, an Army Medical Corps or Medical Service Corps officer serving as the commander of a tactical convoy would not be entitled to military medical status.<sup>224</sup> Similarly, in general, persons who engage in combat search and rescue missions would not be exclusively engaged in humanitarian duties, since preventing the capture of combatants by the adversary constitutes an act harmful to the enemy.<sup>225</sup> However, these individuals may be treated like auxiliary medical personnel or members of the armed forces who are trained in medical care, but who are not attached to the medical service.<sup>226</sup>

The requirement that military medical and religious personnel serve exclusively in a humanitarian capacity not only requires that they refrain from acts harmful to the enemy, but also has been interpreted as an affirmative obligation to serve in a humanitarian capacity. For example, captured military medical personnel who refuse to perform their medical duties to care for fellow prisoners would not be entitled to retained personnel status.<sup>227</sup>

---

<sup>221</sup> Refer to § 4.5.2.2 (Members Trained as Medical Personnel, but Not Attached to the Medical Service); § 4.5.2.3 (Members Who Are Ministers of Religion Without Having Officiated as Chaplains to Their Own Forces).

<sup>222</sup> See GWS COMMENTARY 219 (“The words ‘exclusively engaged’ indicate that the assignment must be permanent, which is not the case in Article 25 dealing with auxiliary personnel.”).

<sup>223</sup> Refer to § 7.8.3 (Loss of Protection for Medical and Religious Personnel From Being Made the Object of Attack).

<sup>224</sup> See W. Hays Parks, *Status of Certain Medical Corps and Medical Service Corps Officers under the Geneva Conventions*, reprinted in THE ARMY LAWYER 5 (¶8) (Apr. 1989) (“U.S. Army MSC officers, AMEDD noncommissioned officers, or other Medical Corps personnel serving in positions that do not meet the ‘exclusively engaged’ criteria of article 24 are not entitled to its protections but, under article 25, are entitled to protection from intentional attack during those times in which they are performing medical support functions. This would include physicians who, while serving as medical company commanders, might be detailed to perform the duties specified in paragraph 2b. [¶2b. The medical company commander, a physician, and the executive officer, an MSC officer, by nature of their positions and grade, may be detailed as convoy march unit commanders. In this position they would be responsible for medical and nonmedical unit routes of march, convoy control, defense, and repulsing attacks.]”).

<sup>225</sup> Refer to § 7.10.3.1 (Acts Harmful to the Enemy).

<sup>226</sup> Refer to § 4.13 (Auxiliary Medical Personnel); § 4.5.2.2 (Members Trained as Medical Personnel, but Not Attached to the Medical Service).

<sup>227</sup> See LEVIE, POWS 74 (“But what of the physician in the power of the enemy who, perhaps for some ideological reason, refuses to perform any professional duties and will not provide medical treatment for the sick and wounded members of the armed forces of his own Power of Origin? This was the procedure followed by most of the North Vietnamese medical personnel captured in Vietnam. The South Vietnamese responded by treating them as ordinary prisoners of war. Once again, there was probably no specific legal basis for such action; but certainly, if a member

#### 4.10 RIGHTS, DUTIES, AND LIABILITIES OF MILITARY MEDICAL AND RELIGIOUS PERSONNEL

Although military medical and religious personnel are members of, or attached to, the armed forces and are in many respects treated like combatants, they are afforded special privileges so that they may fulfill their humanitarian duties. They must be respected and protected in all circumstances. In turn, they generally may not commit acts harmful to the enemy. If they fall into the power of the enemy during international armed conflict, they may be retained to care for, or minister to, POWs.

**4.10.1 Military Medical and Religious Personnel - Conduct of Hostilities.** Military medical and religious personnel may not be made the object of attack.<sup>228</sup> However, military medical and religious personnel must accept the risks of incidental harm from military operations.<sup>229</sup>

Military medical and religious personnel generally may not commit acts harmful to the enemy (*e.g.*, resisting lawful capture by the enemy military forces).<sup>230</sup> Military medical and religious personnel, however, may employ arms in self-defense or in defense of their patients against unlawful attacks.<sup>231</sup>

Military medical and religious personnel who take actions outside their role as military medical and religious personnel forfeit the corresponding protections of their special status and may be treated as combatants or auxiliary medical personnel, as appropriate.<sup>232</sup>

**4.10.2 Military Medical and Religious Personnel - Detention.** If military medical and religious personnel fall into the power of the enemy during international armed conflict, they are not held as POWs, but instead are held as retained personnel.<sup>233</sup> They should present their identity cards to demonstrate their status as retained personnel.<sup>234</sup> They are retained so that they may fulfill their humanitarian duties to care for, or minister to, POWs.<sup>235</sup>

Although they are not held as POWs, military medical and religious personnel receive, at a minimum, the protections of POW status.<sup>236</sup> In addition, retained personnel shall be granted all

---

of the medical profession refuses to employ his professional abilities, even for the benefit of his own countrymen, he is denying his professional status and, under those circumstances, there is little that a Detaining Power can do except to remove him from the category of a retained person and to place him in a general prisoner-of-war status (unless his recalcitrance is to be rewarded by repatriation).”).

<sup>228</sup> Refer to § 7.8.2 (Meaning of “Respect and Protection” of Medical and Religious Personnel).

<sup>229</sup> Refer to § 7.8.2.1 (Incidental Harm Not Prohibited).

<sup>230</sup> Refer to § 7.8.3 (Loss of Protection for Medical and Religious Personnel From Being Made the Object of Attack).

<sup>231</sup> Refer to § 7.10.3.5 (Use of Weapons in Self-Defense or Defense of the Wounded and Sick).

<sup>232</sup> Refer to § 4.9.2.3 (Exclusively Engaged in Humanitarian Duties).

<sup>233</sup> Refer to § 7.9.1.2 (Medical and Religious Personnel Who May Be Retained).

<sup>234</sup> Refer to § 7.9.2 (Use of Identification Card to Help Establish Retained Personnel Status).

<sup>235</sup> Refer to § 7.9.3 (Duties of Retained Personnel).

<sup>236</sup> Refer to § 7.9.5.1 (POW Treatment as a Minimum).

facilities necessary to provide for the medical care of, and religious ministrations to, POWs.<sup>237</sup> For example, retained personnel may not be compelled to carry out any work other than that concerned with their medical or religious duties.<sup>238</sup> Retained personnel shall be authorized to visit periodically POWs situated in working detachments or in hospitals outside the camp.<sup>239</sup> Retained personnel, through their senior officer in each camp, have the right to deal with the competent authorities of the camp on all questions relating to their duties.<sup>240</sup>

If they are not needed to care for, or minister to, POWs, and if military requirements permit, retained personnel should be returned to the forces to which they belong so that they may continue to care for, or minister to, members of their armed forces.<sup>241</sup> The parties to the conflict would establish special agreements to establish the procedures for repatriation.<sup>242</sup>

#### 4.11 AUTHORIZED STAFF OF VOLUNTARY AID SOCIETIES

States may choose to employ the staff of National Red Cross Societies and that of other Voluntary Aid Societies, like military medical and religious personnel. If States subject such staff to military laws and regulations, then such personnel are to be treated like military medical and religious personnel.<sup>243</sup> States must notify other Parties to the 1949 Geneva Conventions before actually employing such personnel.<sup>244</sup>

4.11.1 American National Red Cross. Under U.S. law, the American National Red Cross is a voluntary aid society authorized to support the U.S. armed forces in time of war.<sup>245</sup> American National Red Cross personnel who support the U.S. armed forces in military operations in this way are subject to the Uniform Code of Military Justice.<sup>246</sup>

---

<sup>237</sup> Refer to § 7.9.5.2 (All Facilities Necessary to Provide for the Medical Care of, and Religious Ministrations to, POWs).

<sup>238</sup> Refer to § 7.9.5.6 (No Other Compulsory Duties).

<sup>239</sup> Refer to § 7.9.5.3 (Visits of POWs Outside the Camp).

<sup>240</sup> Refer to § 7.9.5.7 (Senior Medical Officer in the Camp).

<sup>241</sup> Refer to § 7.9.4 (Return of Personnel Whose Retention Is Not Indispensable).

<sup>242</sup> Refer to § 7.9.4.3 (Special Agreements on the Percentage of Personnel to Be Retained); § 7.9.5.8 (Agreements on Possible Relief of Retained Personnel).

<sup>243</sup> See GWS art. 26 (“The staff of National Red Cross Societies and that of other Voluntary Aid Societies, duly recognized and authorized by their Governments, who may be employed on the same duties as the personnel named in Article 24, are placed on the same footing as the personnel named in the said Article, provided that the staff of such societies are subject to military laws and regulations.”).

<sup>244</sup> See GWS art. 26 (“Each High Contracting Party shall notify to the other, either in time of peace or at the commencement of or during hostilities, but in any case before actually employing them, the names of the societies which it has authorized, under its responsibility, to render assistance to the regular medical service of its armed forces.”).

<sup>245</sup> See 36 U.S.C. § 300102 (the purposes of the American National Red Cross include “to provide volunteer aid in time of war to the sick and wounded of the Armed Forces, in accordance with the spirit and conditions of ... the treaties of Geneva, August 22, 1864, July 27, 1929, and August 12, 1949” and “to perform all the duties devolved on a national society by each nation that has acceded to any of those treaties, conventions, or protocols”).

<sup>246</sup> Refer to § 18.19.3.1 (Uniform Code of Military Justice Offenses).

#### 4.12 STAFF OF A RECOGNIZED AID SOCIETY OF A NEUTRAL COUNTRY

The 1949 Geneva Conventions recognize that neutral States may lend their recognized aid societies to a party to the conflict by placing those personnel and units under the control of that party to the conflict.<sup>247</sup> The neutral Government shall notify this consent to the adversary of the State that accepts such assistance, and the party to a conflict that accepts such assistance must notify enemy States before using it.<sup>248</sup> This assistance is not considered as interference in the conflict by the neutral State.<sup>249</sup>

The staff of a recognized aid society of a neutral country who have been lent to a party to the conflict must be furnished with an identity card similar to that provided to retained personnel before leaving their neutral State.<sup>250</sup> Such personnel who have fallen into the hands of the adverse party may not be detained.<sup>251</sup> Unless otherwise agreed, such personnel shall have permission to return to their country, or if this is not possible, to the territory of the party to the conflict in whose service they were, as soon as a route for their return is open and military considerations permit.<sup>252</sup> Pending their release, such personnel shall continue their work under the direction of the adverse party; they shall preferably be engaged in the care of the wounded and sick of the party to the conflict in whose service they were.<sup>253</sup> On their departure, they shall take with them their effects, personal articles and valuables and the instruments, arms, and if possible, the means of transport belonging to them.<sup>254</sup>

Such personnel, while in the power of a party to the conflict, should be treated on the same basis as corresponding personnel of the armed forces of that party to the conflict; food in particular must be sufficient as regards quantity, quality, and variety to keep them in a normal

---

<sup>247</sup> GWS art. 27 (“A recognized Society of a neutral country can only lend the assistance of its medical personnel and units to a Party to the conflict with the previous consent of its own Government and the authorization of the Party to the conflict concerned. That personnel and those units shall be placed under the control of that Party to the conflict.”).

<sup>248</sup> GWS art. 27 (“The neutral Government shall notify this consent to the adversary of the State which accepts such assistance. The Party to the conflict who accepts such assistance is bound to notify the adverse Party thereof before making any use of it.”).

<sup>249</sup> GWS art. 27 (“In no circumstances shall this assistance be considered as interference in the conflict.”).

<sup>250</sup> GWS art. 27 (“The members of the personnel named in the first paragraph shall be duly furnished with the identity cards provided for in Article 40 before leaving the neutral country to which they belong.”); GWS art. 40 (giving requirements with regard to the identification of “[t]he personnel designated in Article 24 and in Articles 26 and 27”).

<sup>251</sup> GWS art. 32 (“Persons designated in Article 27 who have fallen into the hands of the adverse Party may not be detained.”).

<sup>252</sup> GWS art. 32 (“Unless otherwise agreed, they shall have permission to return to their country, or if this is not possible, to the territory of the Party to the conflict in whose service they were, as soon as a route for their return is open and military considerations permit.”).

<sup>253</sup> GWS art. 32 (“Pending their release, they shall continue their work under the direction of the adverse Party; they shall preferably be engaged in the care of the wounded and sick of the Party to the conflict in whose service they were.”).

<sup>254</sup> GWS art. 32 (“On their departure, they shall take with them their effects, personal articles and valuables and the instruments, arms and if possible the means of transport belonging to them.”).

state of health.<sup>255</sup> They may also fly their national flag.<sup>256</sup>

#### 4.13 AUXILIARY MEDICAL PERSONNEL

Auxiliary medical personnel are members of the armed forces specially trained for employment, should the need arise, as hospital orderlies, nurses, or auxiliary stretcher-bearers, in the search for or the collection, transport, or treatment of the wounded and sick in international armed conflict.<sup>257</sup> In general, auxiliary medical personnel are treated like combatants; however, while carrying out medical duties, they must distinguish themselves by wearing a white armlet bearing the distinctive sign (*e.g.*, the red cross), and they may not be made the object of attack.

4.13.1 Auxiliary Medical Personnel – U.S. Armed Forces. The recent practice of the United States has not been to employ persons as auxiliary medical personnel. Rather, the U.S. armed forces have employed military medical and religious personnel.<sup>258</sup> In addition, the U.S. armed forces have given members of the armed forces additional training in combat medicine but have not designated them as military medical personnel or as auxiliary medical personnel.<sup>259</sup> Thus, such personnel have not worn the distinctive emblem while engaging in medical duties, and they may be made the object of attack by the enemy.

Although the recent practice of the United States has not been to employ persons as auxiliary medical personnel, the United States may later decide to employ auxiliary medical personnel, and enemy military forces may employ such personnel. Moreover, certain members of the medical corps, who do not qualify as military medical personnel because they perform duties inconsistent with exclusive medical status, may be treated like auxiliary medical personnel.<sup>260</sup>

#### 4.13.2 Acquiring Auxiliary Medical Status. As with military medical and religious

---

<sup>255</sup> GWS art. 32 (“The Parties to the conflict shall secure to this personnel, while in their power, the same food, lodging, allowances and pay as are granted to the corresponding personnel of their armed forces. The food shall in any case be sufficient as regards quantity, quality and variety to keep the said personnel in a normal state of health.”).

<sup>256</sup> GWS art. 43 (“The medical units belonging to neutral countries, which may have been authorized to lend their services to a belligerent under the conditions laid down in Article 27, shall fly, along with the flag of the Convention, the national flag of that belligerent, wherever the latter makes use of the faculty conferred on him by Article 42. Subject to orders to the contrary by the responsible military authorities, they may on all occasions fly their national flag, even if they fall into the hands of the adverse Party.”).

<sup>257</sup> GWS art. 25 (“Members of the armed forces specially trained for employment, should the need arise, as hospital orderlies, nurses or auxiliary stretcher-bearers, in the search for or the collection, transport or treatment of the wounded and sick shall likewise be respected and protected if they are carrying out these duties at the time when they come into contact with the enemy or fall into his hands.”).

<sup>258</sup> Refer to § 4.9 (Military Medical and Religious Personnel).

<sup>259</sup> Refer to § 4.5.2.2 (Members Trained as Medical Personnel, but Not Attached to the Medical Service).

<sup>260</sup> See, *e.g.*, W. Hays Parks, *Status of Certain Medical Corps and Medical Service Corps Officers under the Geneva Conventions*, reprinted in THE ARMY LAWYER 5 (¶8) (Apr. 1989) (“U.S. Army MSC officers, AMEDD noncommissioned officers, or other Medical Corps personnel serving in positions that do not meet the ‘exclusively engaged’ criteria of article 24 are not entitled to its protection but, under article 25 are entitled to protection from intentional attack during those times in which they are performing medical support functions.”).

status, members of the armed forces do not acquire auxiliary medical status simply by performing medical duties.<sup>261</sup> For example, a combatant who treats fellow combatants on the battlefield does not automatically acquire auxiliary medical status. Similarly, persons do not acquire auxiliary medical status only because they happen to have medical training.

In order to acquire auxiliary medical status, a person must receive appropriate training and be designated as such by his or her armed forces.<sup>262</sup> Those armed forces must provide proper identification to such persons, including an armband and a special identity document.<sup>263</sup>

4.13.3 Auxiliary Medical Personnel – Conduct of Hostilities. Auxiliary medical personnel may not be made the object of attack when carrying out their medical duties.<sup>264</sup> Auxiliary medical personnel shall wear, but only while carrying out medical duties, a white armband bearing in its center the distinctive sign in miniature; the armband shall be issued and stamped by the military authority.<sup>265</sup> In addition, auxiliary medical personnel must abstain from acts harmful to the enemy while carrying out their medical duties.<sup>266</sup>

When the above conditions are not present, auxiliary medical personnel may be made the object of attack on the same basis as other combatants.

4.13.4 Auxiliary Medical Personnel – Detention. Auxiliary medical personnel are POWs when detained by the enemy during international armed conflict, but may be required to perform their medical duties, as needed.<sup>267</sup> Auxiliary medical personnel are not subject to the repatriation provisions that apply specifically to retained personnel.<sup>268</sup>

#### 4.14 PERSONNEL ENGAGED IN DUTIES RELATED TO THE PROTECTION OF CULTURAL PROPERTY

During armed conflict, different classes of persons may be engaged in duties related to

---

<sup>261</sup> Refer to § 4.9.2 (Requirements for Military Medical and Religious Status).

<sup>262</sup> GWS COMMENTARY 222 (“To be accorded immunity, auxiliary personnel must, as we have said, have received special medical training beforehand, the nature and duration of which are wisely not defined. If it is necessary to make good a deficiency in permanent personnel, such training may even take place in wartime; but personnel filling this temporary role must in any case have had a real training.”).

<sup>263</sup> GWS COMMENTARY 223-24 (“To have immunity even on the battlefield, military personnel caring for the wounded had to form a distinct category—that of medical personnel—and enjoy a separate status, recognizable by a distinctive emblem and an identity card. If recourse was had to such safeguards, it was because military considerations demanded them. Otherwise the risk of abuse would have been too great. It is not straining the imagination to picture combatants approaching an enemy position, ostensibly to assist the wounded, and then opening fire in order to seize it: similarly, a fighting unit might suddenly transform itself into a medical unit, in order to avoid enemy fire.”).

<sup>264</sup> Refer to § 7.8.1 (Categories of Persons Who Are Entitled to Respect and Protection as Medical and Religious Personnel on the Battlefield).

<sup>265</sup> Refer to § 7.8.4.2 (Wearing of Armband With Miniature Distinctive Emblem).

<sup>266</sup> Refer to § 7.8.3 (Loss of Protection for Medical and Religious Personnel From Being Made the Object of Attack).

<sup>267</sup> See GWS art. 29 (“Members of the personnel designated in Article 25 who have fallen into the hands of the enemy, shall be prisoners of war, but shall be employed on their medical duties in so far as the need arises.”).

<sup>268</sup> Refer to § 4.10.2 (Military Medical and Religious Personnel - Detention).

the protection of cultural property. These classes of persons may include: specialist personnel in the armed forces, armed custodians specially empowered to guard cultural property, as well as persons who are engaged in duties of control in accordance with the Regulations for the Execution of the 1954 Hague Cultural Property Convention. So far as consistent with the interests of security, such personnel should be respected and permitted to carry out their duties for the protection of cultural property.

4.14.1 Personnel Engaged in the Protection of Cultural Property. As far as is consistent with the interests of security, personnel engaged in the protection of cultural property shall, in the interests of such property, be respected and, if they fall into the hands of the opposing party, shall be allowed to continue to carry out duties whenever the cultural property for which they are responsible has also fallen into the hands of the opposing party.<sup>269</sup> Such personnel are analogous to military medical and religious personnel who also shall continue to carry out their medical and spiritual duties when they have fallen into the hands of the enemy.<sup>270</sup>

No special agreement may be concluded that would diminish the protection afforded by the 1954 Hague Cultural Property Convention to the personnel engaged in the protection of cultural property.<sup>271</sup>

4.14.1.1 Specialist Personnel in the Armed Forces. States, especially Parties to the 1954 Hague Cultural Property Convention, may have within their armed forces, services or specialist personnel whose purpose is to secure respect for cultural property and to cooperate with the civilian authorities responsible for safeguarding it.<sup>272</sup> The United States has long had such personnel in its armed forces.<sup>273</sup>

For example, during World War II, Allied forces dedicated a specific group of personnel who were tasked to save as much of the culture of Europe as they could during combat.<sup>274</sup> These

---

<sup>269</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 15 (“As far as is consistent with the interests of security, personnel engaged in the protection of cultural property shall, in the interests of such property, be respected and, if they fall into the hands of the opposing Party, shall be allowed to continue to carry out duties whenever the cultural property for which they are responsible has also fallen into the hands of the opposing Party.”); ROERICH PACT art. 1 (requiring respect and protection for personnel of “[t]he historic monuments, museums, scientific, artistic, educational and cultural institutions”).

<sup>270</sup> Refer to § 7.9.3 (Duties of Retained Personnel).

<sup>271</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 24(2) (“No special agreement may be concluded which would diminish the protection afforded by the present Convention to cultural property and to the personnel engaged in its protection.”).

<sup>272</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 7(2) (“The High Contracting Parties undertake to plan or establish in peacetime, within their armed forces, services or specialist personnel whose purpose will be to secure respect for cultural property and to co-operate with the civilian authorities responsible for safeguarding it.”).

<sup>273</sup> *Section-by-Section Analysis of Provisions*, 4, Tab 1 to Strobe Talbot, *Letter of Submittal*, May 12, 1998, MESSAGE FROM THE PRESIDENT TRANSMITTING THE 1954 HAGUE CULTURAL PROPERTY CONVENTION 5 (“It is longstanding U.S. Army practice to maintain such personnel in their civil affairs reserve force. Marine Corps reserve civil affairs personnel receive training to perform similar functions if necessary.”).

<sup>274</sup> R. M. EDSSEL, *THE MONUMENTS MEN 2* (2009) (“The Monuments Men were a group of men and women from thirteen nations, most of whom volunteered for service in the newly created Monuments, Fine Arts, and Archives section [of the Western Allied military effort], or MFAA. Most of the early volunteers had expertise as museum

personnel worked to mitigate combat damage to churches and museums and to locate moveable works of art that were stolen or missing.<sup>275</sup>

4.14.1.2 *Armed Custodians Specially Empowered to Protect Cultural Property.*

States may use armed custodians who are specially empowered to protect cultural property. The guarding of cultural property under special protection by armed custodians specially empowered to do so, however, shall not be deemed to be a use for military purposes that would deprive cultural property of special protection.<sup>276</sup>

4.14.2 Persons Responsible for the Duties of Control in Accordance With the Regulations for the Execution of the 1954 Hague Cultural Property Convention. A number of persons are responsible for the duties of control in accordance with the Regulations for the Execution of the 1954 Hague Cultural Property Convention. These individuals may include: (1) the Director-General of the United Nations Educational, Scientific and Cultural Organization (UNESCO); (2) a State-appointed representative for cultural property; (3) delegates of the Protecting Powers; (4) a Commissioner-General for Cultural Property; and (5) inspectors and experts proposed by the Commissioner-General for Cultural Property.

The Commissioners-General for Cultural Property, delegates of the Protecting Powers, inspectors, and experts shall in no case exceed their mandates. In particular, they shall take account of the security needs of the Party to the 1954 Hague Cultural Property Convention to which they are accredited and shall in all circumstances act in accordance with the requirements of the military situation as communicated to them by that State.<sup>277</sup>

4.14.2.1 *Director-General of UNESCO.* Under the 1954 Hague Cultural Property Convention, the Director-General of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) plays an important role. For example, among other duties, the Director-General compiles and periodically revises an international list consisting of all persons nominated by participating States as qualified to carry out the functions of Commissioner-

---

directors, curators, art scholars and educators, artists, architects, and archivists. Their job was simple: to save as much of the culture of Europe as they could during combat. The creation of the MFAA section was a remarkable experiment. It marked the first time an army fought a war while comprehensively attempting to mitigate cultural damage, and was performed without adequate transportation, supplies, personnel, or historical precedent. The men tasked with this mission were, on the surface, the most unlikely of heroes.”).

<sup>275</sup> R. M. EDSEL, *THE MONUMENTS MEN* xiv (2009) (“Their initial responsibility was to mitigate combat damage, primarily to structures – churches, museums, and other important monuments. As the war progressed and the German border was breached, their focus shifted to locating moveable works of art and other cultural items stolen or otherwise missing.”).

<sup>276</sup> Refer to § 5.18.8.2 (Conditions for the Granting of Special Protection – No Use for Military Purposes).

<sup>277</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8 (“The Commissioners-General for Cultural Property, delegates of the Protecting Powers, inspectors and experts shall in no case exceed their mandates. In particular, they shall take account of the security needs of the High Contracting Party to which they are accredited and shall in all circumstances act in accordance with the requirements of the military situation as communicated to them by that High Contracting Party.”).

General for Cultural Property.<sup>278</sup>

4.14.2.2 *State-Appointed Representative for Cultural Property.* As soon as any Party to the 1954 Hague Cultural Property Convention is engaged in an international armed conflict, that Party shall appoint a representative for cultural property situated in its territory; if that Party is in occupation of another territory, it shall appoint a special representative for cultural property situated in that territory.<sup>279</sup>

4.14.2.3 *Delegates of the Protecting Powers.* A Protecting Power shall appoint delegates to perform certain functions in the protection of cultural property.<sup>280</sup> The delegates of the Protecting Powers shall take note of violations of the 1954 Hague Cultural Property Convention, investigate, with the approval of the Party to which they are accredited, the circumstances in which they have occurred, make representations locally to secure their cessation, and, if necessary, notify the Commissioner-General of such violations. They shall keep the Commissioner-General informed of their activities.<sup>281</sup>

4.14.2.4 *Commissioner-General for Cultural Property.* The Regulations for the Execution of the 1954 Hague Cultural Property Convention provide for the appointment of a Commissioner-General for cultural property, but always with the approval of the Party to which he or she will be accredited.<sup>282</sup>

---

<sup>278</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 1 (“On the entry into force of the Convention, the Director-General of the United Nations Educational, Scientific and Cultural Organization shall compile an international list consisting of all persons nominated by the High Contracting Parties as qualified to carry out the functions of Commissioner-General for Cultural Property. On the initiative of the Director-General of the United Nations Educational, Scientific and Cultural Organization, this list shall be periodically revised on the basis of requests formulated by the High Contracting Parties.”).

<sup>279</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 2 (“As soon as any High Contracting Party is engaged in an armed conflict to which Article 18 of the Convention applies: (a) It shall appoint a representative for cultural property situated in its territory; if it is in occupation of another territory, it shall appoint a special representative for cultural property situated in that territory;”).

<sup>280</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 2 (“As soon as any High Contracting Party is engaged in an armed conflict to which Article 18 of the Convention applies: (b) The Protecting Power acting for each of the Parties in conflict with such High Contracting Party shall appoint delegates accredited to the latter in conformity with Article 3 below;”); REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 3 (“The Protecting Power shall appoint its delegates from among the members of its diplomatic or consular staff or, with the approval of the Party to which they will be accredited, from among other persons.”).

<sup>281</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 5 (“The delegates of the Protecting Powers shall take note of violations of the Convention, investigate, with the approval of the Party to which they are accredited, the circumstances in which they have occurred, make representations locally to secure their cessation and, if necessary, notify the Commissioner-General of such violations. They shall keep him informed of their activities.”).

<sup>282</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4 (“1. The Commissioner-General for Cultural Property shall be chosen from the international list of persons by joint agreement between the Party to which he will be accredited and the Protecting Powers acting on behalf of the opposing Parties. 2. Should the Parties fail to reach agreement within three weeks from the beginning of their discussions on this point, they shall request the President of the International Court of Justice to appoint the

The Commissioner-General exercises a number of functions, including proposing the appointment of inspectors and experts, ordering an investigation with the agreement of the Party to which he or she is accredited, and drawing up reports on the application of the Convention.<sup>283</sup>

4.14.2.5 *Inspectors and Experts Proposed by the Commissioner-General for Cultural Property.* The Commissioner-General for Cultural Property may propose, for the approval of the Party to which the Commissioner-General is accredited, inspectors of cultural property to be charged with specific missions.<sup>284</sup> The Commissioner-General, delegates, and inspectors may have recourse to the services of experts, who will also be proposed for the approval of the Party to which the Commissioner-General is accredited.<sup>285</sup>

In some cases, inspectors may be entrusted with the functions of delegates of the Protecting Powers.<sup>286</sup>

4.14.3 *Identifying Personnel Engaged in Duties for the Protection of Cultural Property.* Persons responsible for duties of control in accordance with the Regulations for the Execution of the 1954 Hague Cultural Property Convention, and persons engaged in duties for the protection of cultural property, are to carry a special identity card bearing the distinctive emblem.<sup>287</sup> In

Commissioner-General, who shall not take up his duties until the Party to which he is accredited has approved his appointment.”).

<sup>283</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 6 (“1. The Commissioner-General for Cultural Property shall deal with all matters referred to him in connexion with the application of the Convention, in conjunction with the representative of the Party to which he is accredited and with the delegates concerned. 2. He shall have powers of decision and appointment in the cases specified in the present Regulations. 3. With the agreement of the Party to which he is accredited, he shall have the right to order an investigation or to, conduct it himself. 4. He shall make any representations to the Parties to the conflict or to their Protecting Powers which he deems useful for the application of the Convention. 5. He shall draw up such reports as may be necessary on the application of the Convention and communicate them to the Parties concerned and to their Protecting Powers. He shall send copies to the Director-General of the United Nations Educational, Scientific and Cultural Organization, who may make use only of their technical contents. 6. If there is no Protecting Power, the Commissioner-General shall exercise the functions of the Protecting Power as laid down in Articles 21 and 22 of the Convention.”).

<sup>284</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 7(1) (“Whenever the Commissioner-General for Cultural Property considers it necessary, either at the request of the delegates concerned or after consultation with them, he shall propose, for the approval of the Party to which he is accredited, an inspector of cultural property to be charged with a specific mission. An inspector shall be responsible only to the Commissioner-General.”).

<sup>285</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 7(2) (“The Commissioner-General, delegates and inspectors may have recourse to the services of experts, who will also be proposed for the approval of the Party mentioned in the preceding paragraph.”).

<sup>286</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 9 (“If a Party to the conflict does not benefit or ceases to benefit from the activities of a Protecting Power, a neutral State may be asked to undertake those functions of a Protecting Power which concern the appointment of a Commissioner-General for Cultural Property in accordance with the procedure laid down in Article 4 above. The Commissioner-General thus appointed shall, if need be, entrust to inspectors the functions of delegates of Protecting Powers as specified in the present Regulations.”).

<sup>287</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 21(2) (“[The persons mentioned in Article 17, paragraph 2 (b) and (c) of the Convention] shall carry a special identity card bearing the distinctive emblem. This card shall mention at least the surname and first names, the date of birth, the

addition, such persons may wear an armband bearing the distinctive emblem issued and stamped by the competent authorities.<sup>288</sup>

Such persons may not, without legitimate reason, be deprived of their identity card or of the right to wear the armband.<sup>289</sup> The distinctive emblem displayed on an armband or special identity card is to be displayed once (as opposed to repeated three times).<sup>290</sup>

#### 4.15 PERSONS AUTHORIZED TO ACCOMPANY THE ARMED FORCES

Under the law of war, persons who are not members of the armed forces, but are authorized to accompany them, fall into a special category. Although they are often referred to as “civilians” because they are not military personnel, they differ materially from the civilian population because these persons are authorized – and in some cases, are ordered – to accompany military forces into a theater of operations to support the force.<sup>291</sup>

DoD policies have often addressed the use of non-military personnel to support military operations.<sup>292</sup>

---

title or rank, and the function of the holder. The card shall bear the photograph of the holder as well as his signature or his fingerprints, or both. It shall bear the embossed stamp of the competent authorities.”).

<sup>288</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 21(1) (“The persons mentioned in Article 17, paragraph 2 (b) and (c) of the Convention may wear an armband bearing the distinctive emblem, issued and stamped by the competent authorities.”).

<sup>289</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 21(4) (“The said persons may not, without legitimate reason, be deprived of their identity card or of the right to wear the armband.”).

<sup>290</sup> Refer to § 5.18.7.2 (Display of the Distinctive Emblem for Cultural Property – Once Versus Three Times).

<sup>291</sup> Christian Damson (United States) v. Germany, 7 REPORTS OF THE INTERNATIONAL ARBITRAL AWARDS 184, 198 (1925) (concluding that a non-military employee of the U.S. Government whose activities were “directly in furtherance of a military operation” was not a “civilian” for the purposes of the Treaty of Berlin and thus was not entitled to assert a claim under the provisions of the Treaty of Berlin that provided for Germany to compensate for damages to the civilian population that it caused during World War I); Arthur Elt Hungerford (United States) v. Germany, 7 REPORTS OF THE INTERNATIONAL ARBITRAL AWARDS 368, 371 (1926) (“From the foregoing it is apparent that the members of the Y.M.C.A. who served on the western front were, in the language of the Commander-in-Chief of the A.E.F., ‘militarized and \*\*\* under the control and supervision of the American military authorities’. Or, to use the language of their own spokesman, they were ‘a part of the military machine’. They rendered military service of a high order. The mere fact that they were not formally inducted into the Army or were not in the pay of the Government of the United States is immaterial so far as concerns the question here presented. They had voluntarily segregated themselves from ‘the civilian population’ as that term is used in the Treaty of Berlin. They had deliberately exposed themselves and their personal belongings to the risks of war which began at the port of embarkation. The provisions of the Treaty of Berlin obligating Germany to make compensation for damages to ‘civilians’ or to ‘civilian victims’ or to the ‘civilian population’ were manifestly intended to apply to the passive victims of warfare, not to those who entered the war zone, subjected themselves to risks to which members of the civilian population generally were immune, and participated in military activities, whether as combatants or noncombatants.”).

<sup>292</sup> For example, DoD INSTRUCTION 3020.41, *Operational Contract Support (OCS)* (Dec. 20, 2011); DoD INSTRUCTION 1100.22, *Policies and Procedures for Determining Workforce Mix* (Apr. 12, 2010); DoD DIRECTIVE 1404.10, *DoD Civilian Expeditionary Workforce* (Jan. 23, 2009); DoD INSTRUCTION 1400.32, *DoD Civilian Work Force Contingency and Emergency Planning Guidelines and Procedures* (Apr. 24, 1995); DoD DIRECTIVE 1404.10,

Persons authorized to accompany the armed forces may not be made the object of attack unless they take direct part in hostilities. They may, however, be detained by enemy military forces, and are entitled to POW status if they fall into the power of the enemy during international armed conflict. They have legal immunity from the enemy's domestic law for providing authorized support services to the armed forces.

4.15.1 Persons Authorized to Accompany the Armed Forces – Notes on Terminology. In the past, the category of persons who “accompany” or “follow” the armed forces has referred to journalists, private clergy, and sutlers,<sup>293</sup> who traditionally were subject to the jurisdiction of the army that they accompanied.<sup>294</sup> These persons, to the extent that they were simply following the armed forces for their own purposes and not to provide support to military operations, were subject to detention, not as POWs, but like civilians, only if specifically necessary.<sup>295</sup> On the other hand, non-military persons who were serving the armed forces, such as civilian employees of the war department, were detained as POWs.<sup>296</sup>

Article 4A(4) of the GPW reflects the modern practice and rule.<sup>297</sup> Persons authorized to accompany the armed forces under Article 4A(4) include employees of the Department of

---

*Emergency-Essential DoD U.S. Civilian Employees* (Apr. 10, 1992); DoD INSTRUCTION 3020.37, *Continuation of Essential DoD Contractor Services During Crises* (Nov. 6, 1990 Incorporating Change 1, Jan. 26, 1996).

<sup>293</sup> “Sutler” is an old term for a civilian provisioner to the army, whether in garrison or in the field.

<sup>294</sup> *For example, Articles of War*, art. 2(d), Jun. 4, 1920, 41 STAT. 759, 787 (“All retainers to the camp and all persons accompanying or servicing with the armies of the United States without the territorial jurisdiction of the United States, and in time of war all such retainers and persons accompanying or serving with the armies of the United States in the field, both within and without the territorial jurisdiction of the United States, though not otherwise subject to these articles”); *American Articles of War of 1775*, art. 32, Jun. 30, 1775, *reprinted in* WINTHROP, MILITARY LAW & PRECEDENTS 953 (“All sutlers and retailers to a camp, and all persons whatsoever, serving with the continental army in the field, though not in-listed soldiers, are to be subject to the articles, rules, and regulations of the continental army.”).

<sup>295</sup> WINTHROP, MILITARY LAW & PRECEDENTS 789 (“Camp-followers, including members of soldiers’ families, sutlers, contractors, newspaper correspondents, and others allowed with the army but not in the public employment, should, when taken, be treated similarly as prisoners of war, but should be held only so long as may be necessary.”) (emphasis added).

<sup>296</sup> *See, e.g.,* SPAIGHT, WAR RIGHTS ON LAND 304 (“[W]hat persons may be made prisoner of war” includes “persons not commissioned or enlisted, but employed permanently by an army as pay-clerks, telegraph-operators, engine drivers, or, generally, in any civilian capacity with an army in the field.”); WINTHROP, MILITARY LAW & PRECEDENTS 789 (“The class of persons entitled upon capture to the privileges of prisoners of war comprises members of the enemy’s armies, embracing both combatants and non-combatants, and the wounded and sick taken on the field and in hospital. It should comprise also civil persons engaged in military duty or in immediate connection with an army, such as clerks, telegraphists, aeronauts, teamsters, laborers, messengers, guides, scouts, and men employed on transports and military railways—the class indeed of civilians in the employment and service of the government such as are specified in our 63d Article of War as ‘Persons serving with the armies in the field.’”).

<sup>297</sup> *See* GPW COMMENTARY 64 (“The Conference of Government Experts considered that the text of Article 81 of the 1929 Convention had become obsolete (in particular the word ‘sutlers’ is no longer appropriate) and should include a reference to certain other classes of persons who were more or less part of the armed forces and whose position when captured had given rise to difficulties during the Second World War. The list given is only by way of indication, however, and the text could therefore cover other categories of persons or services who might be called upon, in similar conditions, to follow the armed forces during any future conflict.”).

Defense, employees of other government agencies sent to support the armed forces, and other authorized persons working on government contracts to support the armed forces. DoD practice has been to permit a broad range of civilians to be authorized to accompany U.S. forces.<sup>298</sup>

Persons authorized to accompany the armed forces are often referred to, and treated as, “civilians,” since they are not members of the armed forces. However, as discussed below, persons authorized to accompany the armed forces are also treated like “combatants” in some respects.

4.15.2 Persons Authorized to Accompany the Armed Forces – Conduct of Hostilities. The rules relating to the conduct of hostilities for persons authorized to accompany the armed forces are similar in some respects to the rules relating to military medical and religious personnel. For example, persons in both classes: (1) generally may not be made the object of attack; (2) accept certain risks of incidental harm from enemy military operations; and (3) have the right of self-defense against unlawful attacks.<sup>299</sup>

4.15.2.1 Liability to Being Made the Object of Attack. For the purposes of determining whether they may be made the object of attack, persons authorized to accompany the armed forces are treated as civilians. They may not be made the object of attack unless they take direct part in hostilities.<sup>300</sup>

4.15.2.2 Employment in Hostilities. The law of war does not prohibit persons authorized to accompany the armed forces from providing authorized support that constitutes taking direct part in hostilities. Even if the authorized support that they provide constitutes taking a direct part in hostilities, such persons retain their entitlement to POW status under Article 4A(4) of the GPW.<sup>301</sup> Although international law does not prohibit States from using persons authorized to accompany the armed forces to provide support that constitutes direct participation in hostilities, commanders should exercise care in placing such personnel in situations in which an attacking enemy may consider their activities to constitute taking a direct part in hostilities, as there may be legal and policy considerations against such use.

Commanders may not employ persons authorized to accompany the armed forces to perform duties and functions traditionally performed by a military person if such action is taken

---

<sup>298</sup> For example, FINAL REPORT ON THE PERSIAN GULF WAR 599 (“In Operations Desert Shield and Desert Storm, the United States employed civilians both as career civil service employees and indirectly as contractor employees. Civilians performed as part of the transportation system, at the forward depot level repair and intermediate level maintenance activities and as weapon systems technical representatives. Civilians worked aboard Navy ships, at Air Force (USAF) bases, and with virtually every Army unit. Only the Marine Corps (USMC) did not employ significant numbers of civilians in theater. This civilian expertise was invaluable and contributed directly to the success achieved.”).

<sup>299</sup> Refer to § 4.10.1 (Military Medical and Religious Personnel - Conduct of Hostilities).

<sup>300</sup> Refer to § 5.8 (Civilians Taking a Direct Part in Hostilities).

<sup>301</sup> Refer to § 4.15.4 (Persons Authorized to Accompany the Armed Forces – Liability Under Domestic Law for Participation in Hostilities).

for the purpose of shielding a military objective from attack.<sup>302</sup>

4.15.2.3 *Increased Risk of Incidental Harm.* Persons authorized to accompany the armed forces should expect that they have an increased risk of death or injury incidental to an enemy attack because of their deliberate proximity to military operations and military objectives.<sup>303</sup> For example, civilian members of military aircrews should expect that they might be incidentally injured in an attack against the military aircraft in which they are working.<sup>304</sup> Similarly, in some cases, the location at which persons authorized to accompany the armed forces are serving may itself be a military objective.<sup>305</sup> Furthermore, in some cases, an enemy could reasonably conclude that the mere presence of a person at a location (*e.g.*, a remote military base) indicates that they are a combatant or are directly participating in hostilities, and therefore could lawfully be made the object of attack.

4.15.2.4 *Self-Defense and Arming.* Persons authorized to accompany the armed forces have a right of self-defense against unlawful attacks, such as attacks by bandits. Persons authorized to accompany the armed forces should not resist capture by enemy military forces whom they expect to respect their status under the law of war. If persons authorized to accompany the armed forces make any resistance to enemy military forces, then they may be regarded as taking a direct part in hostilities, and may be made the object of attack.<sup>306</sup> Their resistance to capture by enemy military forces whom they expect to respect their status under the law of war would be incompatible with the principle that a person may not claim the distinct rights of both combatants and civilians at the same time.<sup>307</sup>

The arming of persons authorized to accompany the armed forces is analogous to the arming of military medical and religious personnel.<sup>308</sup> DoD practice has been to permit commanders to authorize persons authorized to accompany the armed forces to carry defensive weapons if necessary.<sup>309</sup>

A State may decide to arm persons authorized to accompany the armed forces for

---

<sup>302</sup> Refer to § 5.1.16 (Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations).

<sup>303</sup> Refer to § 5.12.3.3 (Civilian Workers Who Support Military Operations In or On Military Objectives).

<sup>304</sup> Refer to § 14.4.2 (Civilian Members of Military Aircrew and Other Persons Authorized to Accompany the Armed Forces).

<sup>305</sup> Refer to § 5.6.8.4 (Examples of Military Objectives – Places of Military Significance).

<sup>306</sup> Refer to § 5.8.3.1 (Examples of Taking a Direct Part in Hostilities).

<sup>307</sup> Refer to § 4.2.2 (No Person May Claim the Distinct Rights Afforded to Both Combatants and Civilians at the Same Time).

<sup>308</sup> Refer to § 7.10.3.4 (Arming of Military Medical Units or Facilities).

<sup>309</sup> See DOD INSTRUCTION 1100.22, *Policy and Procedures for Determining Workforce Mix*, E-5 ¶2.d.(5)(a) (Apr. 12, 2010) (“It is not a violation of the law of war for DoD civilians and Defense contractor employees who are authorized to accompany the armed forces in the field during hostilities to be issued a weapon on the authority of the Combatant Commander for individual self-defense as addressed in References (n), (o), and (t).”); DOD INSTRUCTION 3020.41, *Operational Contract Support (OCS)*, E-2 ¶4.e (Dec. 20, 2011) (describing policy procedures for issuing weapons to contingency contractor personnel).

personal security and self-defense purposes without incorporating them into the armed forces or otherwise authorizing them to act as a combatant.

4.15.2.5 *Wearing of Uniform.* The law of war does not prohibit persons authorized to accompany the armed forces from wearing a uniform, including the uniform of armed forces that they accompany. Recent U.S. practice, however, has been to ensure that persons accompanying U.S. forces wear clothing that distinguishes them from members of the armed forces in order to prevent confusion about their status.<sup>310</sup>

Persons who wear a military uniform accept the risk of being made the object of attack by enemy forces, as the enemy would reasonably believe them to be lawful objects of attack. However, the mere wearing of a uniform or being authorized by a State to wear a uniform does not necessarily authorize that person to act as a combatant.

4.15.2.6 *Provision of Security Services.* Persons authorized to accompany the armed forces who provide security against criminal elements generally would not be viewed as taking a direct part in hostilities (and do not forfeit their protection from being made the object of attack).<sup>311</sup> However, providing such services to defend against enemy armed forces of a State would be regarded as taking a direct part in hostilities (and would forfeit their protection from being made the object of attack).<sup>312</sup>

DoD policies have addressed the use of non-military personnel to provide security services for DoD components.<sup>313</sup> Where there has been a significant risk of attack by enemy armed forces of a State, DoD practice generally has been to use military personnel to provide security.

4.15.3 Persons Authorized to Accompany the Armed Forces – Detention. For the purposes of detention, persons authorized to accompany the armed forces are treated like combatants. These persons may be detained by the enemy and are entitled to POW status during

---

<sup>310</sup> DoD INSTRUCTION 3020.41, *Operational Contract Support (OCS)*, E-2 ¶3.j (Dec. 20, 2011) (“Defense contractors or their personnel are responsible for providing their own personal clothing, including casual and working clothing required by the assignment. Generally, commanders shall not issue military clothing to contractor personnel or allow the wearing of military or military look-alike uniforms. However, a CCDR [Combatant Commander] or subordinate JFC [Joint Force Commander] deployed forward may authorize contractor personnel to wear standard uniform items for operational reasons. Contracts shall require that this authorization be in writing and maintained in the possession of authorized contractor personnel at all times. When commanders issue any type of standard uniform item to contractor personnel, care must be taken to ensure, consistent with force protection measures, that contractor personnel are distinguishable from military personnel through the use of distinctive patches, arm bands, nametags, or headgear.”).

<sup>311</sup> Compare § 4.23.1 (Police as Civilians).

<sup>312</sup> Refer to § 5.8.3.1 (Examples of Taking a Direct Part in Hostilities).

<sup>313</sup> For example, DoD INSTRUCTION 3020.50, *Private Security Contractors Operating in Contingency Operations, Humanitarian or Peace Operations, or Other Military Operations or Exercises* (Jul. 22, 2009, Incorporating Change 1, Aug. 1, 2011).

international armed conflict.<sup>314</sup>

When held as POWs, persons authorized to accompany the armed forces are to receive advance of pay from the Detaining Power, and they should be assigned equivalent ranks to those of members of the armed forces for this purpose.<sup>315</sup>

Persons who are authorized to accompany the armed forces must be issued an identity card to confirm their status.<sup>316</sup> Presenting the identification card is not a prerequisite for POW status, but it helps captured persons establish to enemy forces that they are entitled to POW status.<sup>317</sup>

4.15.4 Persons Authorized to Accompany the Armed Forces – Liability Under Domestic Law for Participation in Hostilities. Unlike combatants, persons authorized to accompany the armed forces receive no general license to participate in hostilities. However, international law contemplates that persons authorized to accompany the armed forces may lawfully support armed forces in the conduct of hostilities. Such persons should not be liable under an enemy State’s domestic law for providing authorized support services.<sup>318</sup> For example, they should not be prosecuted for offenses of aiding the enemy. Persons authorized to accompany the armed forces may not be punished by an enemy State for authorized support activities or for defending themselves against unlawful attacks. This protection would not apply with respect to acts by persons authorized to accompany the armed forces that are prohibited by the law of war.

---

<sup>314</sup> See GPW art. 4(A)(4) (defining “prisoners of war, in the sense of the present Convention,” to include persons who have fallen into the power of the enemy and “who accompany the armed forces without actually being members thereof, such as civilian members of military aircraft crews, war correspondents, supply contractors, members of labour units or of services responsible for the welfare of the armed forces, provided that they have received authorization from the armed forces which they accompany.”); 1929 GPW art. 81 (“Persons who follow the armed forces without directly belonging thereto, such as correspondents, newspaper reporters, sutlers, or contractors, who fall into the hands of the enemy, and whom the latter think fit to detain, shall be entitled to be treated as prisoners of war, provided they are in possession of an authorization from the military authorities of the armed forces which they were following.”); HAGUE IV REG. art. 13 (“Individuals who follow an army without directly belonging to it, such as newspaper correspondents and reporters, sutlers and contractors, who fall into the enemy’s hands and whom the latter thinks expedient to detain, are entitled to be treated as prisoners of war, provided they are in possession of a certificate from the military authorities of the army which they were accompanying.”); LIEBER CODE art. 50 (“Moreover, citizens who accompany an army for whatever purpose, such as sutlers, editors, or reporters of journals, or contractors, if captured, may be made prisoners of war, and be detained as such.”).

<sup>315</sup> Refer to § 9.18.3 (Advance of Pay).

<sup>316</sup> Refer to § 9.4.3 (Issue of Identification Cards to Persons Liable to Become POWs).

<sup>317</sup> Refer to § 4.27.1 (Identification Cards Used to Help Clarify Status).

<sup>318</sup> See BOTHE, PARTSCH, & SOLF, NEW RULES 304 (AP I art. 51, ¶2.4.2.2) (“As civilians, they have no general right to take part in hostilities, but some activities of these persons could amount to direct participation if done in the midst of an ongoing engagement. For example, it is common practice to have civilian technical advisers assist and advise in the installation and maintenance of sophisticated command and control or target acquisition equipment. Repair of a target acquisition or missile guidance equipment in the midst of battle would probably be regarded as direct participation in hostilities. As in the case of a sick bay on a warship, the immunity from attack is academic, except with respect to individualized attack against the protected person within a military objective. The issue becomes practically significant only if an attempt is made to subject such a civilian to penal sanction for his unauthorized participation in hostilities. Under US practice support activities behind the lines of battle is not subject to penal sanction, although the support activity may be the legitimate object of attack.”).

Persons authorized to accompany the armed forces should not engage in unauthorized participation in hostilities. Such activity would be treated like engagement in private acts of hostility,<sup>319</sup> and such persons would be in the position of unprivileged belligerents in relation to those activities.<sup>320</sup>

There may be additional considerations in determining which prosecution forum is appropriate because persons authorized to accompany the armed forces are not themselves members of the armed forces.<sup>321</sup>

Commanders who use persons authorized to accompany the armed forces could, under certain circumstances, be prosecuted for war crimes committed by such personnel under theories of command responsibility or other theories of individual liability.<sup>322</sup>

#### 4.16 CREWS OF MERCHANT MARINE VESSELS OR CIVIL AIRCRAFT

Crews of merchant marine vessels or civil aircraft of a belligerent fall into a special category, and are in many respects treated like persons authorized to accompany the armed forces.<sup>323</sup> Under certain circumstances, crews of merchant marine vessels or civil aircraft of a neutral that engage in hostilities may be treated like the crews of belligerent vessels or aircraft.<sup>324</sup>

4.16.1 Merchant or Civil Crews - Conduct of Hostilities. Merchant vessels or civil aircraft of a belligerent may be used to support military operations, such as by conveying goods and military personnel to theaters of active military operations.

Enemy merchant vessels or civil aircraft may be captured.<sup>325</sup> Belligerent merchant vessels or civil aircraft may resist attacks by enemy forces, including by eventually seizing the attacking vessels or aircraft.<sup>326</sup> However, merchant vessels or civil aircraft should not commit hostile acts in offensive combat operations.<sup>327</sup>

---

<sup>319</sup> Refer to § 4.18 (Private Persons Who Engage in Hostilities).

<sup>320</sup> Refer to § 4.19 (Rights, Duties, and Liabilities of Unprivileged Belligerents).

<sup>321</sup> Refer to § 18.19.4.1 (Limits on Military Jurisdiction Over U.S. Citizens Who Are Not Members of the Armed Forces).

<sup>322</sup> Refer to § 18.23.3 (Command Responsibility); § 18.23 (Theories of Individual Criminal Liability).

<sup>323</sup> Refer to § 4.15 (Persons Authorized to Accompany the Armed Forces).

<sup>324</sup> Refer to § 15.14 (Acquisition of Enemy Character by Neutral-Flagged Merchant Vessels and Neutral-Marked Civil Aircraft).

<sup>325</sup> Refer to § 13.5 (Enemy Merchant Vessels).

<sup>326</sup> LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 266 (§85) ("In a sense, the crews of merchantmen owned by subjects of a belligerent belong to its armed forces. For those vessels are liable to be seized by enemy men-of-war, and, if attacked for that purpose, they may defend themselves, may return the attack, and eventually seize the attacking men-of-war. The crews of merchant men become in such cases combatants, and enjoy all the privileges of the members of the armed forces.").

<sup>327</sup> LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 266 (§85) ("But, unless attacked, they must not commit hostilities, and if they do so they are liable to be treated as criminals, just as are private individuals who commit hostilities in land warfare.").

4.16.2 Merchant or Civil Crews – Detention. Members of the crews of merchant marine vessels or civil aircraft of a belligerent are entitled to POW status, if they fall into the power of the enemy during international armed conflict.<sup>328</sup>

The GPW contemplates that certain members of the crews of merchant marine vessels or civil aircraft of a belligerent may benefit from more favorable treatment under international law; *i.e.*, they would not be detained as POWs. During wartime, enemy merchant seamen have customarily been subject to capture and detention.<sup>329</sup> However, the 1907 Hague XI provides that the crews of enemy merchant ships that did not take part in hostilities were not to be held as POWs provided “that they make a formal promise in writing, not to undertake, while hostilities last, any service connected with the operations of the war.”<sup>330</sup> Although these provisions proved ineffective during World War I and World War II,<sup>331</sup> the GPW allows for the possibility that they might apply.<sup>332</sup>

#### 4.17 SPIES, SABOTEURS, AND OTHER PERSONS ENGAGING IN SIMILAR ACTS BEHIND ENEMY LINES

Spying, sabotage, and similar acts behind enemy lines have a dual character under the law of war; States are permitted to employ persons who engage in these activities, but these activities are punishable by the enemy State.

Belligerents may employ spies and saboteurs consistent with the law of war. However, any person (including individuals who would otherwise receive the privileges of lawful combatants) engaging in spying, sabotage, or similar acts behind enemy lines, is regarded as an unprivileged belligerent while doing so. These persons forfeit entitlement to the privileges of combatant status and may be punished after a fair trial if captured.

---

<sup>328</sup> GPW art. 4A(5) (defining “prisoners of war, in the sense of the present Convention,” to include “[m]embers of crews, including masters, pilots and apprentices, of the merchant marine and the crews of civil aircraft of the Parties to the conflict, who do not benefit by more favourable treatment under any other provisions of international law” who have fallen into the power of the enemy).

<sup>329</sup> GPW COMMENTARY 65 (“In the past, it was generally recognized that in time of war merchant seamen were liable to capture.”).

<sup>330</sup> *See* HAGUE XI art. 6 (“The captain, officers, and members of the crew, when nationals of the enemy State, are not made prisoners of war, on condition that they make a formal promise in writing, not to undertake, while hostilities last, any service connected with the operations of the war.”); HAGUE XI art. 8 (“The provisions of the three preceding articles do not apply to ships taking part in the hostilities.”).

<sup>331</sup> *See* LEVIE, POWS 63 (explaining that Articles 5-8 of Hague XI “proved ineffective during World War I” and “[d]uring World War II the provisions of the Eleventh Hague Convention of 1907 were again completely disregarded, with the result that there was no assurance as to exactly what the status of a captured merchant seaman would be.”). Hague XI had fewer than 30 Parties at that time, and only technically applied when all the belligerents to a conflict were also parties to Hague XI. *See* HAGUE XI art. 9 (“The provisions of the present Convention do not apply except between Contracting Powers, and then only if all the belligerents are parties to the Convention.”). Hague XI did not apply during World War II for this reason. *See* II-A FINAL RECORD OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 419 (UK representative noting that “[t]he provisions of the Eleventh Hague Convention were not applied during the last War, owing to the fact that all the belligerent States were not parties to it.”).

<sup>332</sup> For further background *see* II-A FINAL RECORD OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 238-39, 418-19.

4.17.1 Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines – Notes on Terminology. Spying has been given a technical definition in the Hague IV Regulations.<sup>333</sup> However, as discussed below, certain conduct, most notably sabotage, has been treated as having the same legal consequences as spying and has even been called spying, even though such acts do not meet the definition of spying in the Hague IV Regulations.<sup>334</sup>

In some cases, “saboteurs” has been used in a purely factual way to refer to those persons engaged in damaging or destroying enemy materiel.<sup>335</sup> In other cases, “saboteurs” has been used as a legal term of art to refer to those persons who are engaged in damaging or destroying enemy material and who, by definition, would not be entitled to receive the privileges of combatant status.<sup>336</sup>

4.17.1.1 General Usage of “Spies and Saboteurs” in This Manual. This manual generally uses the term “spying and sabotage” to refer to that general category of secretive, hostile activities that, when performed behind enemy lines, deprives that person of entitlement to the privileges of combatant status. In some places, the phrase “spying, sabotage, and similar acts behind enemy lines” is used to make more clear that this general category of acts is broader than only spying and sabotage.

4.17.2 Spies. A person may only be considered a spy when, (1) acting clandestinely or under false pretenses, (2) in the zone of operations of a belligerent, (3) he or she obtains, or endeavors to obtain, information, (4) with the intention of communicating it to the hostile party.<sup>337</sup> During war, any person—military or civilian—whose actions meet all of these elements may be considered a spy under the law of war.

---

<sup>333</sup> Refer to § 4.17.2 (Spies).

<sup>334</sup> Refer to § 4.17.3 (Saboteurs and Other Persons Engaging in Secretive, Hostile Acts Behind Enemy Lines).

<sup>335</sup> 1958 UK MANUAL ¶331 (“Whether saboteurs, *i.e.*, persons dropped or landed behind the lines of the belligerent in order to commit acts of destruction and terrorism, are to be treated as spies depends on whether they are caught in disguise or not. If they are disguised in civilian clothing or in the uniform of the army by which they are caught or that of an ally of that army, they are in the same position as spies. If caught in their own uniform, they are entitled to be treated as prisoners of war.”).

<sup>336</sup> II-A FINAL REPORT OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 621 (Norwegian representative explaining that “[s]aboteurs could not of course claim protection under the Prisoners of War Convention; they should nevertheless be protected against criminal treatment and torture.”).

<sup>337</sup> HAGUE IV REG. art. 29 (“A person can only be considered a spy when, acting clandestinely or on false pretences, he obtains or endeavours to obtain information in the zone of operations of a belligerent, with the intention of communicating it to the hostile party.”); LIEBER CODE art. 88 (“A spy is a person who secretly, in disguise or under false pretense, seeks information with the intention of communicating it to the enemy.”); *id.* at art. 83 (“Scouts, or single soldiers, if disguised in the dress of the country or in the uniform of the army hostile to their own, employed in obtaining information, if found within or lurking about the lines of the captor, are treated as spies, and suffer death.”); WINTHROP, MILITARY LAW & PRECEDENTS 766-67 (“A spy is a person who, without authority and secretly, or under a false pretext, contrives to enter within the lines of an army for the purpose of obtaining material information and communicating it to the enemy; or one who, being by authority within the lines, attempts secretly to accomplish such purpose.”). Consider AP I art. 46(3) (“A member of the armed forces of a Party to the conflict who is a resident of territory occupied by an adverse Party and who, on behalf of the Party on which he depends, gathers or attempts to gather information of military value within that territory shall not be considered as engaging in espionage unless he does so through an act of false pretences or deliberately in a clandestine manner.”).

The following discussion elaborates upon the elements of spying.

4.17.2.1 *Acting Clandestinely or Under False Pretenses.* Acting “clandestinely or under false pretenses” means deliberately concealing or misrepresenting one’s identity and conduct.<sup>338</sup> For example, a member of the armed forces fulfills this element when the person wears a disguise, such as civilian clothes or the uniform of the enemy, so that the enemy will fail to identify the person as a member of the opposing armed force.

Persons who act openly, such as by wearing the uniform of the armed forces to which they belong, do not meet this element.<sup>339</sup> For example, members of a ground reconnaissance team or couriers who wear their normal uniforms would not meet this element.<sup>340</sup> In addition, observers on military reconnaissance aircraft have not been regarded as acting clandestinely or under false pretenses.<sup>341</sup>

4.17.2.2 *In the Zone of Operations of a Belligerent.* A person must engage in acts of espionage in the zone of operations of a belligerent to be considered a spy.<sup>342</sup> “Zone of operations” has been construed broadly to include areas supporting the war effort.<sup>343</sup> However, a person who engages in surveillance or information gathering from outside territory controlled by

---

<sup>338</sup> See WINTHROP, MILITARY LAW & PRECEDENTS 767 (“The clandestine character of [the spy’s] proceedings and the deception thus practised constitute the gist or rather aggravation of the offence of the spy.”); 1958 UK MANUAL ¶330 (“The principal characteristic of the offence of espionage is disguise and secrecy in action.”). Consider AP I art. 46(3) (“A member of the armed forces of a Party to the conflict who is a resident of territory occupied by an adverse Party and who, on behalf of the Party on which he depends, gathers or attempts to gather information of military value within that territory shall not be considered as engaging in espionage unless he does so through an act of false pretences or deliberately in a clandestine manner.”).

<sup>339</sup> See HAGUE IV REG. art. 29 (“[S]oldiers not wearing a disguise who have penetrated into the zone of operations of the hostile army, for the purpose of obtaining information, are not considered spies.”). Consider AP I art. 46(2) (“A member of the armed forces of a Party to the conflict who, on behalf of that Party and in territory controlled by an adverse Party, gathers or attempts to gather information shall not be considered as engaging in espionage if, while so acting, he is in the uniform of his armed forces.”).

<sup>340</sup> See HAGUE IV REG. art. 29 (“Soldiers and civilians, carrying out their mission openly, intrusted with the delivery of despatches intended either for their own army or for the enemy’s army” are not considered spies).

<sup>341</sup> See HAGUE IV REG. art. 29 (“Persons sent in balloons for the purpose of carrying despatches and, generally, of maintaining communications between the different parts of an army or a territory” are not considered spies.); WINTHROP, MILITARY LAW & PRECEDENTS 768-69 (“[T]he mere observing of the enemy, with a view to gain intelligence of his movements, does not constitute [spying], for this may be done, and in active service is constantly done, as a legitimate act of war . . . . Observing the enemy from a balloon is no more criminal than any other form of reconnaissance.”).

<sup>342</sup> See, e.g., *Ex Parte Quirin*, 317 U.S. 1, 31 (1942) (characterizing a spy as one “who secretly and without uniform passes the military lines of a belligerent in time of war, seeking to gather military information and communicate it to the enemy”) (emphasis added).

<sup>343</sup> See *United States ex rel. Wessels v. McDonald*, 265 F. 754, 763-64 (E.D.N.Y. 1920) (“In this great World War through which we have just passed, the field of operations which existed after the United States entered the war, and, especially in regard to naval operations, brought the port of New York within the field of active operations.”). Cf. *Ex parte Quirin*, 317 U.S. 1, 37 (1942) (“The law of war cannot rightly treat those agents of enemy armies who enter our territory, armed with explosives intended for the destruction of war industries and supplies, as any the less belligerent enemies than are agents similarly entering for the purpose of destroying fortified places or our Armed Forces.”).

a hostile party would not meet this element, and would not be considered a spy.

4.17.2.3 Obtains, or Endeavors to Obtain, Information. A person may be punished as a spy regardless of whether that person succeeds in obtaining information or in transmitting it to the enemy.<sup>344</sup> A person, however, must obtain or attempt to obtain information to be considered a spy.

4.17.2.4 With the Intention of Communicating It to the Hostile Party. A person must act with the intention of communicating the sought-after information to a hostile party to the conflict to be considered a spy within the meaning of this rule.

However, a person who seeks to send information to a State not involved in the conflict may still commit acts punishable by the offended State, and that person's conduct may fall within the broader category of secretive, hostile acts behind enemy lines.<sup>345</sup>

4.17.3 Saboteurs and Other Persons Engaging in Secretive, Hostile Acts Behind Enemy Lines. In addition to spies, other persons acting clandestinely or under false pretenses with a hostile purpose behind enemy lines have also been treated like spies under the law of war.

Like spies, persons engaged in these secretive, hostile activities behind enemy lines have also been deprived of the privileges of combatant status and often been punished. For example, saboteurs<sup>346</sup> acting clandestinely or under false pretenses in the zone of operations of a belligerent are treated as spies.<sup>347</sup> However, activities besides sabotage that are helpful to one side's war effort that are done behind the other side's lines have been punishable as well, often under the rubric of "war treason,"<sup>348</sup> "secretly entering the lines,"<sup>349</sup> or "activities hostile to the

---

<sup>344</sup> See LIEBER CODE art. 88 ("The spy is punishable ... whether or not he succeed in obtaining the information or in conveying it to the enemy."); WINTHROP, MILITARY LAW & PRECEDENTS 768 ("The fact that [one] was 'lurking' or 'acting' with intent to obtain material information, to be communicated by himself or another to the enemy, is all that is required to complete the offence.").

<sup>345</sup> Refer to § 4.17.3 (Saboteurs and Other Persons Engaging in Secretive, Hostile Acts Behind Enemy Lines).

<sup>346</sup> 2001 CANADIAN MANUAL ¶610(1) ("Saboteurs are persons operating behind the lines of an adverse party to commit acts of destruction."); GC COMMENTARY 57 ("Sabotage is harder to define, as no definition of it is given in any text in international law. The term 'sabotage' [in article 5 of the GC] should be understood to mean acts whose object or effect is to damage or destroy material belonging to the army of occupation or utilized by it.").

<sup>347</sup> 2001 CANADIAN MANUAL ¶610(3) ("Civilian saboteurs or saboteurs not in uniform are not so protected [i.e., entitled to POW status] and are liable to be treated as spies. Such civilian saboteurs and saboteurs not in uniform may be tried in accordance with the law of the captor and may face the death penalty. They must not, however, be punished without a fair trial."); 1958 UK MANUAL ¶331 ("Whether saboteurs, *i.e.*, persons dropped or landed behind the lines of the belligerent in order to commit acts of destruction and terrorism, are to be treated as spies depends on whether they are caught in disguise or not. If they are disguised in civilian clothing or in the uniform of the army by which they are caught or that of an ally of that army, they are in the same position as spies. If caught in their own uniform, they are entitled to be treated as prisoners of war.").

<sup>348</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 330 ("The characteristic which unites all acts of war treason is that they are hostile acts committed inside the area controlled by the belligerent against whom the acts are directed by persons who do not possess the status of combatants."); LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 575 (§255) ("So-called 'war treason' consists of all such acts (except hostilities in arms on the part of the civilian population, spreading of seditious propaganda by aircraft, and espionage) committed within the lines of a belligerent as are harmful to him and are intended to favour the enemy."); LIEBER CODE art. 90 ("A traitor under the law of war,

security of the State.”<sup>350</sup>

These kinds of activities almost necessarily take on the character of spying.<sup>351</sup> In many cases, these actions have been reported as spying.<sup>352</sup> However, the actual purpose of these activities may not be to gain or transmit intelligence information, but to take other sorts of actions that would further the war effort.

Thus, a belligerent’s presence on the territory controlled by an opposing State with a hostile purpose while clandestinely or under false pretenses, suffices to make that person liable to treatment as a spy under the law of war.<sup>353</sup>

#### 4.17.4 Spying and Sabotage Permissible Under the Law of War. Under the law of war,

---

or a war-traitor, is a person in a place or district under Martial Law who, unauthorized by the military commander, gives information of any kind to the enemy, or holds intercourse with him.”).

<sup>349</sup> Ex parte Quirin, 317 U.S. 1, 31 (1942) (giving as an example of an unprivileged belligerent “an enemy combatant who without uniform comes secretly through the lines for the purpose of waging war by destruction of life or property”); WINTHROP, *MILITARY LAW & PRECEDENTS* 786 (“A similar though less aggravated offence against the laws of war is that of officers, soldiers, or agents, of one belligerent who come secretly within the lines of the other, or within the territory held by his forces, for any unauthorized purpose other than that of the spy, as, for example, for the purpose of recruiting for their army, obtaining horses or supplies for the same, holding unlawful communication, &c.,--a class of offences of which instances were not unfrequent in the border States during our late civil war.”).

<sup>350</sup> GC art. 5 (“Where in the territory of a Party to the conflict, the latter is satisfied that an individual protected person is definitely suspected of or engaged in activities hostile to the security of the State, such individual person shall not be entitled to claim such rights and privileges under the present Convention as would, if exercised in the favour of such individual person, be prejudicial to the security of such State.”).

<sup>351</sup> 1958 UK MANUAL ¶331 note 1 (“A question may arise if a saboteur, being a member of the armed forces, is caught in civilian clothes worn over or under his military uniform. It may be difficult to accept the defence that the intention was to shed the civilian clothing before the commission of the offence. Sabotage operations behind the enemy lines are frequently carried out by members of the armed forces in uniform who, upon completion of their mission, make their way to the nearest neutral territory with a view to returning to their own country. If when engaged in sabotage or subsequent evading action they are discovered in civilian clothing worn over their uniform or underneath it they run the risk of being treated as spies and not merely as members of the armed forces engaged in a sabotage mission. ... It may well be that a sabotage mission behind the enemy lines inevitably takes on the added character of espionage, unless uniform is worn throughout the stay in enemy territory.”).

<sup>352</sup> L. Oppenheim, *On War Treason*, 33 *LAW QUARTERLY REVIEW* 266 (1917) (“Thus, in 1780, during the American War of Independence, Major André was convicted and hanged as a spy, although he was not seeking information but was returning after having negotiated treason with General Arnold; it was a case of war treason. And the Japanese Major Shozo Jakoga and Captain Teisuki Oki, who in the summer of 1904, during the Russo-Japanese War, were caught, disguised in Chinese clothes, in the attempt to destroy, with the aid of dynamite, a railway bridge in Manchuria in the rear of the Russian forces—a clear case of war treason—would previous to the Hague Regulations surely have been executed as spies; in fact the case was reported in the newspapers as one of espionage.”).

<sup>353</sup> Ex parte Quirin, 317 U.S. 1, 38 (1942) (“[E]ach petitioner, in circumstances which gave him the status of an enemy belligerent, passed our military and naval lines and defenses or went behind those lines, in civilian dress and with hostile purpose. The offense was complete when with that purpose they entered — or, having so entered, they remained upon — our territory in time of war without uniform or other appropriate means of identification.”).

belligerents may employ spies and saboteurs.<sup>354</sup>

Spying and sabotage are not prohibited by any law of war treaty to which the United States is a Party. For example, spying and sabotage are not prohibited by the 1949 Geneva Conventions, nor defined as a “grave breach” of those conventions.<sup>355</sup> Similarly, spying and sabotage also have not been listed as war crimes punishable under the statutes of international criminal tribunals.<sup>356</sup> In addition, law of war treaties that regulate, but do not prohibit, spying, recognize implicitly that belligerents may use this method of warfare.<sup>357</sup>

Although spying and sabotage are not prohibited by the law of war, acting clandestinely or under false pretenses could, in some circumstances, constitute “feigning a protected status,” one of the elements of perfidy.<sup>358</sup> Persons engaged in these activities and commanders who employ them should take special care not to kill or wound by resort to perfidy.

4.17.5 Spying and Sabotage – Forfeiture of the Privileges of Combatant Status. Although the law of war allows belligerents to employ spies, saboteurs, and other persons engaged in secretive hostile activities behind enemy lines, the law of war also permits belligerents to take additional measures to defend against these persons.

These individuals, by acting clandestinely or under false pretenses, fail to distinguish themselves as combatants generally must do.<sup>359</sup> Thus, persons otherwise entitled to privileges of combatant status, including POW status, forfeit their entitlement to those privileges while engaged in spying, sabotage, or other hostile, secretive activities behind enemy lines.<sup>360</sup> Although not explicitly reflected in the GPW, this understanding was the general understanding at the 1949 Diplomatic Conference<sup>361</sup> and is reflected in other treaties,<sup>362</sup> judicial decisions,<sup>363</sup>

4.17.5.1 *Liability of Persons Not Captured While Spying for Previous Acts of Espionage*. Persons who qualify for the privileges of combatant status who engage in spying, and then return to friendly lines, incur no responsibility or liability for previous acts of espionage.<sup>366</sup> Persons who have never qualified for the privileges of combatant status would not

---

<sup>362</sup> See HAGUE IV REG. art. 31 (impliedly contrasting the position of a spy captured while spying with a “spy who, after rejoining the army to which he belongs, is subsequently captured by the enemy, is treated as a prisoner of war, and incurs no responsibility for his previous acts of espionage.”). Consider AP I art. 46 (1) (“Notwithstanding any other provision of the Conventions or of this Protocol, any member of the armed forces of a Party to the conflict who falls into the power of an adverse Party while engaging in espionage shall not have the right to the status of prisoner of war and may be treated as a spy.”); AP I art. 44(4) (“A combatant who falls into the power of an adverse Party while failing to meet the requirements set forth in the second sentence of paragraph 3 [certain obligations to distinguish himself during military engagements] shall forfeit his right to be a prisoner of war, but he shall, nevertheless, be given protections equivalent in all respects to those accorded to prisoners of war by the Third Convention and by this Protocol. This protection includes protections equivalent to those accorded to prisoners of war by the Third Convention in the case where such a person is tried and punished for any offences he has committed.”).

<sup>363</sup> See, e.g., *Ex parte Quirin*, 317 U.S. 1, 31 (1942) (describing spies as “familiar examples of belligerents who are generally deemed not to be entitled to the status of prisoners of war”); *Mohamad Ali and Another v. Public Prosecutor* [1969] A.C. 430 (P.C.) (appeal taken from U.K.), LEVIE, DOCUMENTS ON POWS 766 (“[A]ppellants, if they were members of the Indonesian armed forces, were not entitled to be treated on capture as prisoners of war under the Geneva Convention when they had landed to commit sabotage and had been dressed in civilian clothes both when they had placed the explosives and lit them and when they were arrested.”).

<sup>364</sup> 2001 CANADIAN MANUAL ¶320(1) (“Generally speaking, persons engaging in espionage may be attacked and if captured while doing so shall NOT have the right to the status of prisoner of war.”); 1992 GERMAN MANUAL ¶321 (“Even if they are members of their armed forces, they do not have the right to the status of prisoner of war.”); 1958 UK MANUAL ¶96 (noting that “regular members of the armed forces who are caught as spies are not entitled to be treated as prisoners of war”); 1956 FM 27-10 (Change No. 1 1976) ¶74 (“Members of the armed forces of a party to the conflict and members of militias or volunteer corps forming part of such armed forces lose their right to be treated as prisoners of war whenever they deliberately conceal their status in order to pass behind the military lines of the enemy for the purpose of gathering military information or for the purpose of waging war by destruction of life or property.”).

<sup>365</sup> LEVIE, POWS 82-83 (noting that “[e]ven individuals who fall within the categories specifically enumerated in Article 4 are not entitled to prisoner-of-war status if, at the time of capture by the enemy, they were dressed in civilian clothes and were engaged in an espionage or sabotage mission behind enemy lines”); WINTHROP, MILITARY LAW & PRECEDENTS 769 (“A spy, under capture, is not treated as a prisoner of war but as an outlaw, and is to be tried and punished as such.”).

<sup>366</sup> See HAGUE IV REG. art. 31 (“A spy who, after rejoining the army to which he belongs, is subsequently captured by the enemy, is treated as a prisoner of war, and incurs no responsibility for his previous acts of espionage.”); LIEBER CODE art. 104 (explaining that “[a] successful spy or war-traitor, safely returned to his own army, and afterwards captured as an enemy, is not subject to punishment for his acts as a spy or war-traitor”); Rieger, *Dalloz Hebdomadaire* (France, Cour de Cassation, Jul. 29, 1948), summarized in 44 AJIL 422 (1950) (“The court sustained the acquittal of a German national who, after mobilization as a German army officer, had been in France a spy and a recruiter of spies, but had not been apprehended until after he had rejoined the German Army and been demobilized in Germany.”); *In re Martin*, 45 BARB. 142, 148 (New York County Supreme Court, Dec. 4, 1865) (Court directed the release of a prisoner who “was not taken in the act of committing the offense charged against him, of being a spy. He had returned within the lines of the confederate forces, or had otherwise escaped, so that he was not arrested till after the confederate armies had surrendered, been disbanded and sent to their homes, with the promise that they should not be further disturbed if they remained there and engaged in peaceful pursuits.”). Consider AP I arts. 46(3), 46(4) (referring to persons who “engage in espionage in [the] territory” of a hostile party, and noting that a person “may not be treated as a spy unless he is captured while engaging in espionage”).

benefit from this rule because they cannot regain a status that they did not receive in the first place.<sup>367</sup>

4.17.5.2 *Cases of Doubt*. During international armed conflict, should there be any doubt as to whether persons suspected of committing a belligerent act and having fallen into the hands of the enemy are entitled to POW status, such persons are entitled to have their status determined by a competent tribunal and should be treated as POWs pending that determination.<sup>368</sup>

#### 4.18 PRIVATE PERSONS WHO ENGAGE IN HOSTILITIES

In general, private persons who engage in hostilities forfeit many of the protections to which members of the civilian population are entitled, and are liable to treatment in one or more respects as unprivileged belligerents.<sup>369</sup>

4.18.1 Private Persons Who Engage in Hostilities – Notes on Terminology. This section refers to “private persons” who engage in hostilities rather than “civilians” who engage in hostilities for three reasons. First, an emphasis on “private” persons is consistent with longstanding explanations of the principle of distinction.<sup>370</sup> Second, it may be analytically unhelpful to focus on “civilians” because private persons who engage in hostilities are liable to treatment in one or more respects as combatants. Third, non-military personnel belonging to a State (e.g., persons authorized to accompany the armed forces), who are often called “civilians,” raise a different set of issues that merit special consideration as opposed to the general case of a private person who decides to engage in hostilities.

For the purpose of applying different law of war rules, different formulations have been used to describe when a person has engaged in hostilities. Although these phrases often refer to the same conduct, the context in which each term is applied is important; whether a phrase includes a particular type of conduct may depend on the particular legal rule in question. Whether a particular person is liable as a consequence of his or her conduct to treatment as a combatant (e.g., being made the object of attack, internment, or prosecution for acts of unprivileged belligerency) must be assessed with reference to the specific legal rule at issue rather than based on the use of a conclusory label, such as “enemy combatant.”<sup>371</sup>

---

<sup>367</sup> See LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 424-25 (§161) (“But Article 31 applies only to spies who belong to the armed forces of the enemy; civilians who act as spies, and are captured later, may be punished.”). Cf. HAGUE IV REG. art. 31 (referring only to a spy who rejoins “the army to which he belongs” in connection with protection against subsequent prosecution).

<sup>368</sup> Refer to § 4.27.2 (POW Protections for Certain Persons Until Status Has Been Determined).

<sup>369</sup> Refer to § 4.19 (Rights, Duties, and Liabilities of Unprivileged Belligerents).

<sup>370</sup> See, e.g., LIEBER CODE arts. 22 and 23 (“Nevertheless, as civilization has advanced during the last centuries, so has likewise steadily advanced, especially in war on land, the distinction between the private individual belonging to a hostile country and the hostile country itself, with its men in arms. . . . Private citizens are no longer murdered, enslaved, or carried off to distant parts, and the inoffensive individual is as little disturbed in his private relations as the commander of the hostile troops can afford to grant In the overruling demands of a vigorous war.”).

<sup>371</sup> See Harold Hongju Koh, Legal Adviser, Department of State, *Address at the Annual Meeting of the American Society of International Law: The Obama Administration and International Law*, Mar. 25, 2010, 2010 DIGEST OF

This manual generally uses the phrase “engaging in hostilities” in a broad sense to refer to any of those actions that could cause a person to forfeit one or more protections under the law of war. When discussing specific legal rules, on the other hand, this manual uses the particular language of the rule at issue, rather than the phrase “engaging in hostilities.” For example, this manual generally reserves the use of the phrase “taking a direct part in hostilities” to address the rule applicable when a civilian forfeits his or her protection from being made the object of attack.<sup>372</sup>

4.18.2 Private Persons Who Engage in Hostilities – Denial of the Distinct Protections Afforded Peaceful Civilians. Private persons who engage in hostilities forfeit many of the protections afforded civilians under the law of war.<sup>373</sup> The principle of military necessity can justify taking military action (such as detention) to address the threat posed by such persons.<sup>374</sup> The forfeiture of many of the protections of civilian status is also reflected in the principle that a person may not claim the distinct rights of both combatants and civilians at the same time.<sup>375</sup>

4.18.3 Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status. Private persons who engage in hostilities are not entitled to the privileges of combatant status and may be punished, after a fair trial.<sup>376</sup> The law of war does not condone the “farmer by

---

UNITED STATES PRACTICE IN INTERNATIONAL LAW 749 (“Some commentators have criticized our decision to detain certain individuals based on their membership in a non-state armed group. But as those of you who follow the Guantánamo habeas litigation know, we have defended this position based on the AUMF, as informed by the text, structure, and history of the Geneva Conventions and other sources of the laws of war. Moreover, while the various judges who have considered these arguments have taken issue with certain points, they have accepted the overall proposition that individuals who are part of an organized armed group like Al Qaeda can be subject to law-of-war detention for the duration of the current conflict. In sum, we have based our authority to detain not on conclusory labels, like ‘enemy combatant,’ but on whether the factual record in the particular case meets the legal standard.”).

<sup>372</sup> Refer to § 5.8 (Civilians Taking a Direct Part in Hostilities).

<sup>373</sup> See Joint Chiefs of Staff, Joint Pub. 3-60, *Joint Doctrine for Targeting*, A-2 (Jan. 17, 2002) (“The protection offered civilians carries a strict obligation on the part of civilians not to participate directly in armed combat, become combatants, or engage in acts of war. Civilians engaging in fighting or otherwise participating in combat operations, singularly or as a group, become unlawful combatants and lose their protected civilian status.”); 1992 GERMAN MANUAL ¶517 (“Persons taking a direct part in hostilities are not entitled to claim the rights accorded to civilians by international humanitarian law (Art. 51 para 3 AP I; Art. 13 para 3 AP II). The same applies if they are definitely suspected of activities hostile to the security of the State (Art. 5 para 1 GC IV.”); 1956 FM 27-10 (Change No. 1 1976) ¶60 (“Persons who are not members of the armed forces, as defined in Article 4, *GPW*, who bear arms or engage in other conduct hostile to the enemy thereby deprive themselves of many of the privileges attaching to the members of the civilian population (see sec. II of this chapter).”).

<sup>374</sup> Refer to § 2.2.1 (Military Necessity as a Justification).

<sup>375</sup> Refer to § 4.2.2 (No Person May Claim the Distinct Rights Afforded to Both Combatants and Civilians at the Same Time).

<sup>376</sup> See 1958 UK MANUAL ¶88 (If civilian inhabitants “commit or attempt to commit hostile acts, they are liable to punishment, after a proper trial.”); LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 206 (§57) (“According to a generally recognised customary rule of International Law, hostile acts on the part of private individuals, not organised as compact movements operating under responsible authority, are not acts of legitimate warfare, and the offenders may be punished in accordance with International Law.”); United States v. List, *et al.*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1246 (“[T]he rule is established that a civilian who aids, abets, or participates in the fighting is liable to punishment as a war criminal under the laws of war.”); LIEBER CODE art. 82 (“Men, or squads of men, who commit hostilities, whether by fighting, or inroads for destruction or plunder, or by raids of any kind, without commission, without being part and portion of the organized hostile army, and without sharing continuously

day and guerilla by night.”<sup>377</sup>

The denial of the privileges of combatant status to private persons engaging in hostilities may be justified on the basis that such persons act inconsistently with the *jus ad bellum* principle of competent authority, under which the resort to armed force is a prerogative of the State.<sup>378</sup> These individuals lack the principal qualification for entitlement to the privileges of combatant status—State authorization.<sup>379</sup> This requirement for State authorization has been traced to medieval law of arms.<sup>380</sup>

Denying private persons who engage in hostilities the privileges of combatant status has also been viewed as justified on humanitarian grounds. Private persons who engage in hostilities risk undermining the protections afforded the civilian population.<sup>381</sup> And, private persons who

---

in the war, but who do so with intermitting returns to their homes and avocations, or with the occasional assumption of the semblance of peaceful pursuits, divesting themselves of the character or appearance of soldiers -- such men, or squads of men, are not public enemies, and, therefore, if captured, are not entitled to the privileges of prisoners of war”).

<sup>377</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 252 (AP I art. 44, ¶2.7.1) (“[T]he pre-existing rule [*i.e.*, prior to AP I] precluded combatant status and PW status for the persons who engaged in civilian pursuits during the day but fought as a guerilla by night.”); SENATE EXECUTIVE REPORT 84-9, *Geneva Conventions for the Protection of War Victims: Report of the Committee on Foreign Relations on Executives D, E, F, and G*, 82nd Congress, First Session, 5 (Jun. 27, 1955) (“In sum, extension of protection to “partisans” [in the GPW] does not embrace that type of partisan who performs the role of farmer by day, guerilla by night. Such individuals remain subject to trial and punishment as unlawful belligerents.”); THEODORE WOOLSEY, INTRODUCTION TO THE STUDY OF INTERNATIONAL LAW 216 (§134) (1897) (explaining that “[g]uerilla parties [*i.e.*, armed groups not called out by public authority], however, do not enjoy the full benefit of the laws of war” and instead “are apt to fare worse than either regular troops or an unarmed peasantry” because, *inter alia*, “they put on and off with ease the character of a soldier”).

<sup>378</sup> Refer to § 1.11.1.1 (Competent Authority (Right Authority) to Wage War for a Public Purpose).

<sup>379</sup> Refer to § 4.6.2 (Belonging to a Party to the Conflict).

<sup>380</sup> G.I.A.D. Draper, *The Status of Combatants and the Question of Guerrilla Warfare*, 45 BRITISH YEAR BOOK OF INTERNATIONAL LAW 173, 175 (1971) (“With the break-up of Christendom the medieval law of arms took shape as the embryonic international law of war. The older idea of knights, men-at-arms and mercenaries ‘avowed’ by a prince changed to that of armed forces in the service of a territorial, secular state. However, many of the ideas and technical rules of the *jus militare* came through into the new international law of war, including the idea of a right or privilege to fight reserved for military classes and the requirement of a certain ‘openness’ in the manner of fighting. This ‘openness’ spells out the older idea of a ‘public’ war and the rejection of perfidy as abhorrent to the knightly classes. Conversely, those who had not the right to fight met short shrift at the hands of those who had. The marauder and the freebooter acted against, and were outside, ‘faith and the law of nations’ and were early forms of war criminals.”). See also M. H. KEEN, *THE LAWS OF WAR IN THE LATE MIDDLE AGES* 246 (1965) (The medieval law of arms “was a formal and generally accepted law, and its currency helped to establish” the principle that “war, in its proper sense could only be waged by sovereigns.”).

<sup>381</sup> GREENSPAN, *MODERN LAW OF LAND WARFARE* 55 (“If any and every citizen capable of bearing arms is entitled to use them then the distinction between the soldier and the remainder of the population disappears. The result could only expose the civilian element, regardless of sex, to massacre. The enemy soldier, unable to distinguish his foe, aware that any man, woman, boy, or girl in civilian clothes might produce at any moment a concealed weapon to be used against him, would inevitably be disposed to treat soldier and civilian alike, indiscriminately.”); Raymond T. Yingling and Robert W. Ginnane, *The Geneva Conventions of 1949*, 46 AJIL 393, 402 (1953) (“While the conditions imposed by the convention for treatment as prisoners of war of members of resistance movements would not have covered many persons acting as ‘partisans’ during World War II, nevertheless, it is believed that such conditions are the minimum necessary if regular forces are to have any protection against attacks by the civilian population and if any distinction is to be made between combatants and noncombatants. The farmer by day,

engage in hostilities generally have not been trained in the law of war and are not subject to the same disciplinary regime as members of the armed forces.<sup>382</sup> Thus, their participation in hostilities has been associated with the commission of war crimes.<sup>383</sup>

4.18.4 Activities That Constitute “Engaging in Hostilities” by Private Persons. Certain activities constitute “engaging in hostilities,” *i.e.*, when done by private persons, make them liable to treatment in one or more respects by the enemy State as unprivileged belligerents.

4.18.4.1 Being Part of a Hostile, Non-State Armed Group. Being part of a non-State armed group that is engaged in hostilities against a State is a form of engaging in hostilities that makes private persons liable to treatment in one or more respects as unprivileged belligerents by that State.<sup>384</sup> Being part of a non-State armed group may involve formally joining the group or simply participating sufficiently in its activities to be deemed part of it.

Whether a person has joined a non-State armed group may be a difficult factual question. Non-State armed groups may not use formal indicia of membership (*e.g.*, uniforms or identity cards), or members of these groups may seek to conceal their association with the group.<sup>385</sup> It may be appropriate to use circumstantial or functional information to assess whether a person is part of a non-State armed group.<sup>386</sup>

---

assassin by night, type of ‘partisan’ cannot be condoned by international law, whatever other justification circumstances may give him.”). *Refer to* § 4.6.4 (Having a Fixed Distinctive Sign Recognizable at a Distance), footnote 164 and accompanying text.

<sup>382</sup> *Refer to* § 4.6.3 (Being Commanded by a Person Responsible for His or Her Subordinates).

<sup>383</sup> *See, e.g.*, CHARLES HENRY HYDE, II INTERNATIONAL LAW: CHIEFLY AS INTERPRETED AND APPLIED BY THE UNITED STATES 296 (1922) (“The law of nations, apart from the Hague Regulations above noted, denies belligerent qualifications to guerrilla bands. Such forces wage a warfare which is irregular in point of origin and authority, of discipline, of purpose and of procedure. They may be constituted at the beck of a single individual; they lack uniforms; they are given to pillage and destruction; they take few prisoners and are hence disposed to show slight quarter.”); Wharton, *Com. Am. Law*, § 221, VII MOORE’S DIGEST 175 (“If war were to be waged by private parties, operating according to the whims of individual leaders, every place that was seized would be sacked and outraged; and war would be the pretence to satiate private greed and spite.”).

<sup>384</sup> *See, e.g.*, In re Guantanamo Bay Litigation, *Respondents’ Memorandum Regarding the Government’s Detention Authority Relative to Detainees Held at Guantanamo Bay*, Misc. No. 08-442, 5-6 (D.D.C., Mar. 13, 2009) (“Because the use of force includes the power of detention, the United States has the authority to detain those who were part of al-Qaida and Taliban forces. Indeed, long-standing U.S. jurisprudence, as well as law-of-war principles, recognize that members of enemy forces can be detained even if ‘they have not actually committed or attempted to commit any act of depredation or entered the theatre or zone of active military operations.’ Accordingly, under the AUMF as informed by law-of-war principles, it is enough that an individual was part of al-Qaida or Taliban forces, the principal organizations that fall within the AUMF’s authorization of force.”) (internal citations omitted); *Hamdan v. Rumsfeld*, 548 U.S. 557, 693 (2006) (Thomas, J., dissenting) (“For well over a century it has been established that to unite with banditti, jayhawkers, guerillas, or any other unauthorized marauders is a high offence against the laws of war; the offence is complete when the band is organized or joined.”) (internal emphasis and quotations omitted).

<sup>385</sup> *Refer to* § 17.5.1.1 (Increased Difficulty in Identifying Enemy Forces and Other Military Objectives).

<sup>386</sup> *See, e.g.*, *Bensayah v. Obama*, 610 F.3d 718, 725 (D.C. Cir. 2010) (“Although it is clear al Qaeda has, or at least at one time had, a particular organizational structure, . . . , the details of its structure are generally unknown, . . . , but it is thought to be somewhat amorphous, . . . . As a result, it is impossible to provide an exhaustive list of criteria for determining whether an individual is ‘part of’ al Qaeda. That determination must be made on a case-by-case basis

In addition, non-State armed groups may also rely on individuals who are not members of the groups, but who are functionally part of those organizations. Their support might be particularly important to enable the non-State armed group to conduct and sustain its operations.<sup>387</sup> For example, these individuals might participate sufficiently in the activities of the group or support its operations substantially in a way that is analogous to the support that persons authorized to accompany the armed forces provide to the armed forces.<sup>388</sup> These individuals may be regarded as constructively part of the group, even if they are, in fact, not formal members of the group.<sup>389</sup>

4.18.4.2 *Other Hostile Acts*. In addition to being part of or substantially supporting a hostile, non-State armed group, other hostile acts can make a person liable to treatment in one or more respects as an unprivileged belligerent under the law of war. For example, private persons who bear arms against enemy personnel or who attempt to kill or injure enemy personnel would become liable to being made the object of attack.<sup>390</sup> Performing spying, sabotage, and other hostile activities behind enemy lines would render a person liable to prosecution for such conduct.<sup>391</sup>

4.18.5 *Private Persons Who Engage in Hostilities and the Law of War*. As in the cases of spying and sabotage, under international law private enemy nationals are not generally regarded as being prohibited from engaging in hostilities during international armed conflict. International law does recognize, however, that opposing States may punish such persons.<sup>392</sup>

---

by using a functional rather than a formal approach and by focusing upon the actions of the individual in relation to the organization.”) (internal citations omitted).

<sup>387</sup> Refer to § 17.5.1.2 (Different Support Structures for Non-State Armed Groups).

<sup>388</sup> Refer to § 4.15 (Persons Authorized to Accompany the Armed Forces).

<sup>389</sup> Hedges v. Obama, No. 12-3644, *Reply Brief for Defendant-Appellant*, 11-12 (2d Cir. Dec. 20, 2012) (“More generally, ‘substantial support’ encompasses individuals who, even if not considered part of the irregular enemy forces at issue in the current conflict, bear sufficiently close ties to those forces and provide them support that warrants their detention consistent with the law of war. The substantial support concept, as properly informed by the law of war, would include people whose support for al-Qaeda or the Taliban makes them analogous to those who ‘accompany the armed forces without actually being members thereof, such as civilian members of military aircraft crews, war correspondents, supply contractors, members of labour units or of services responsible for the welfare of the armed forces.’ Such substantial supporters are, in short, ‘more or less part of the armed force’ and subject to law-of-war detention for the duration of the conflict.”) (internal citations omitted).

<sup>390</sup> Refer to § 5.8 (Civilians Taking a Direct Part in Hostilities).

<sup>391</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>392</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 61 (“Guerillas who do not comply with the provisions laid down [of GPW art. 4(A)(2)] may perform patriotic service for their country (just as espionage agents often do), yet such illegitimate hostilities come within the technical heading of war crimes, and their perpetrators must be prepared to take their punishment if captured.”); United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1245 (“Just as the spy may act lawfully for his country and at the same time be a war criminal to the enemy, so guerrillas may render great service to their country and, in the event of success, become heroes even, still they remain war criminals in the eyes of the enemy and may be treated as such.”); HERBERT C. FOOKS, PRISONERS OF WAR 40 (1924) (“Individuals who undertake to wage a war in their private capacity are not entitled to the treatment of prisoners of war. The enemy may punish them when captured as war criminals. The safety of the troops compels the enemy to punish such hostilities as acts of illegitimate warfare, and international law gives the right to do so. Nations do not prohibit its citizens from such acts, however, for they may be most helpful to it just as spying is helpful.”).

Nonetheless, like other forms of unprivileged belligerency, private engagement in hostilities has been described in some contexts as a “war crime” or as a violation of international law or the law of war.<sup>393</sup>

In discussions of the status of private acts of hostility under international law, the point is often made that international law does not require States to prevent what they may regard as acts of patriotism and heroism.<sup>394</sup>

However, outside the context of patriotic acts of resistance by persons in international armed conflict, private acts of hostility often carry additional sanction under international law. For example, persons who set off in private military expeditions against a foreign State from a State that has peaceful relations with the foreign State, have been subject to punishment under the law of nations.<sup>395</sup> Similarly, private acts of hostility, under certain conditions, may be regarded as piracy.<sup>396</sup> In contemporary parlance, private acts of hostility are often punished as “terrorism.”<sup>397</sup> The unauthorized use of violence by private persons to achieve political ends has been viewed as contrary to the principles of democratic States.<sup>398</sup> Moreover, States have obligations under international law to repress terrorism, especially when conducted on their territory against other States.<sup>399</sup>

#### 4.19 RIGHTS, DUTIES, AND LIABILITIES OF UNPRIVILEGED BELLIGERENTS

Unprivileged belligerents have certain rights, duties, and liabilities. In general,

---

<sup>393</sup> See, e.g., James Speed, Attorney General, *Military Commissions*, July 1865, 11 OPINIONS OF THE ATTORNEY GENERAL 297, 314 (1869) (“A bushwhacker, a jayhawker, a bandit, a war rebel, an assassin, being public enemies, may be tried, condemned, and executed as offenders against the laws of war.”).

<sup>394</sup> Richard R. Baxter, *So-Called ‘Unprivileged Belligerency’: Spies, Guerillas, and Saboteurs*, 28 BRITISH YEAR BOOK OF INTERNATIONAL LAW 323, 342 (1951) (“In both occupied and unoccupied areas, resistance activities, guerrilla warfare, and sabotage by private persons may be expected to continue on at least as widespread a basis in future warfare as they have in the past. More often than not, patriotism or some sort of political allegiance lies at the root of such activities. Consequently the law of nations has not ventured to require of states that they prevent the belligerent activities of their citizenry or that they refrain from the use of secret agents or that these activities upon the part of their military forces or civilian population be punished.”).

<sup>395</sup> Refer to § 15.1.5 (Domestic Neutrality Laws).

<sup>396</sup> Refer to § 13.3.3.1 (Entitlement of Vessels to Conduct Attacks During Non-International Armed Conflict).

<sup>397</sup> See, e.g., *R. v. Khawaja*, (Supreme Court of Canada, Dec. 14, 2012) (upholding the terrorism conviction of a defendant who provided support to terrorist groups in Afghanistan and rejecting his argument that his support for terrorist groups could not be punished because they were part of an armed conflict governed by international law).

<sup>398</sup> *Public Prosecutor v. Folkerts*, (The Netherlands, District Court of Utrecht, Dec. 20, 1977), reprinted in 74 INTERNATIONAL LAW REPORTS 695, 698 (1987) (“It is totally unacceptable in democratic countries such as those just mentioned [the United States and the Federal Republic of Germany], and also in the Netherlands, for individuals who disagree with their country’s policy, for that reason to resort to acts of violence such as those which took place here. Such acts attack the most fundamental principles of the constitutional State.”).

<sup>399</sup> See, e.g., U.N. SECURITY COUNCIL RESOLUTION 1373, U.N. Doc. S/RES/1373 (2001) (deciding that all States shall, *inter alia*, “[e]nsure that any person who participates in the financing, planning, preparation or perpetration of terrorist acts or in supporting terrorist acts is brought to justice and ensure that, in addition to any other measures against them, such terrorist acts are established as serious criminal offences in domestic laws and regulations and that the punishment duly reflects the seriousness of such terrorist acts;”).

unprivileged belligerents lack the distinct privileges afforded to combatants and civilians, and are subject to the liabilities of both classes. Unprivileged belligerents generally may be made the object of attack by enemy combatants. They, however, must be afforded fundamental guarantees of humane treatment if *hors de combat*. Unprivileged belligerents may be punished by enemy States for their engagement in hostilities if they are convicted after a fair trial.

4.19.1 Rules Applicable to the Treatment of Unprivileged Belligerents. Although unprivileged belligerents have not been recognized and protected in treaty law to the same extent as peaceful civilians and lawful combatants,<sup>400</sup> basic guarantees of humane treatment in customary international law (*i.e.*, elementary considerations of humanity) protect unprivileged belligerents.<sup>401</sup> Moreover, some treaty protections apply to certain unprivileged belligerents.<sup>402</sup>

In some cases, U.S. practice has, as a matter of domestic law or policy, afforded unprivileged belligerents more favorable treatment than they would be entitled to receive under international law.<sup>403</sup> Nonetheless, U.S. practice has also recognized that unprivileged belligerents should not be afforded the distinct privileges afforded lawful combatants and the protections afforded peaceful civilians under the law of war.<sup>404</sup>

4.19.2 Unprivileged Belligerents – Conduct of Hostilities. Although unprivileged belligerents lack the right to engage in hostilities, international law nevertheless requires that they observe the same duties as lawful combatants during their conduct of hostilities.<sup>405</sup>

In addition, unprivileged belligerents are generally subject to the same liabilities to which combatants are subject in the conduct of hostilities; *i.e.*, they may be made the object of attack by enemy combatants. Unprivileged belligerents placed *hors de combat*, however, may not be made the object of attack, and must be treated humanely.

4.19.3 Unprivileged Belligerents – Detention. Unprivileged belligerents are liable to capture and detention, like lawful combatants.

4.19.3.1 Humane Treatment. Although unprivileged belligerents are not entitled to the privileges of POW status, unprivileged belligerents, like all other detained persons, must be treated humanely. In particular, they, like all other detainees, must receive, at a minimum, the

---

<sup>400</sup> Refer to § 4.3.1 (“Unprivileged Belligerents” as a Category in Treaty Law).

<sup>401</sup> Refer to § 3.1.1.2 (Applying Law of War Standards as Reflecting Minimum Legal Standards).

<sup>402</sup> See, e.g., GPW art. 3; GC art. 5.

<sup>403</sup> See, e.g., *Boumediene v. Bush*, 553 U.S. 723 (2008) (affording the constitutional privilege of habeas corpus to aliens detained as unprivileged belligerents at Guantanamo); U.S. MILITARY ASSISTANCE COMMAND VIETNAM DIRECTIVE 381-46, *Military Intelligence: Combined Screening of Detainees Annex A ¶4.a.(2)-(3)* (Dec. 27, 1967), reprinted in 62 AJIL 766-67 (classifying as POWs members of certain categories of guerilla or insurgent units provided that they were not engaged in acts of terrorism, sabotage, or spying while captured).

<sup>404</sup> Refer to, e.g., § 4.6.1.2 (AP I and the GPW 4A(2) Conditions); FRANCIS LIEBER, *GUERRILLA PARTIES CONSIDERED WITH REFERENCE TO THE LAWS AND USAGES OF WAR* 22 (1862) (“no army, no society, engaged in war, any more than a society at peace, can allow unpunished assassination, robbery, and devastation, without the deepest injury to itself and disastrous consequences, which might change the very issue of the war.”).

<sup>405</sup> Refer to § 4.4.1 (Combatants – Conduct of Hostilities).

fundamental guarantees of humane treatment described in Common Article 3 of the 1949 Geneva Conventions.<sup>406</sup> In addition, the United States has explicitly supported, out of a sense of legal obligation, the fundamental guarantees reflected in Article 75 of AP I as minimum standards for the humane treatment of all persons detained during international armed conflict.<sup>407</sup>

4.19.3.2 *Cases of Doubt.* During international armed conflict, in cases of doubt as to whether a person held as an unprivileged belligerent is, in fact, a POW or entitled to POW treatment, that person should enjoy POW protections until their status is assessed by a competent tribunal.<sup>408</sup>

4.19.3.3 *Necessary Security Measures.* A State may take necessary security measures with regard to unprivileged belligerents.

Since they have engaged in hostilities, unprivileged belligerents, or persons suspected of being unprivileged belligerents, may be denied certain privileges to which they might otherwise be entitled under the law of war. For example, the rights of unprivileged belligerents who are entitled to “protected person” status under the GC would be subject to derogation for security reasons.<sup>409</sup> However, unprivileged belligerents who are protected by the GC should be afforded its full protections when feasible.<sup>410</sup>

4.19.3.4 *Duration of Detention.* Unprivileged belligerents who are detained in order to prevent their further participation in hostilities generally must be released when hostilities have ended, unless there is another legal basis for their detention.<sup>411</sup> DoD practice has been to review periodically the detention of all persons not afforded POW status or treatment.<sup>412</sup>

4.19.4 *Unprivileged Belligerents – Liability for Participation in Hostilities.* Although international law affords lawful combatants a privilege or immunity from prosecution,<sup>413</sup> unprivileged belligerents lack such protection.<sup>414</sup> A State may punish unprivileged enemy belligerents,<sup>415</sup> subject to applicable requirements, such as a fair trial.<sup>416</sup>

---

<sup>406</sup> Refer to § 8.1.4.1 (Common Article 3 of the 1949 Geneva Conventions).

<sup>407</sup> Refer to § 8.1.4.2 (Article 75 of AP I and Relevant AP II Provisions).

<sup>408</sup> Refer to § 4.27.2 (POW Protections for Certain Persons Until Status Has Been Determined).

<sup>409</sup> Refer to § 10.4 (Derogation for Security Reasons).

<sup>410</sup> Refer to § 10.4.4 (Limits on Derogation).

<sup>411</sup> Refer to § 8.14.3.1 (Participants in Hostilities or Persons Belonging to Armed Groups That Are Engaged in Hostilities).

<sup>412</sup> Refer to § 8.14.2 (Review of Continued Detention for Security Reasons).

<sup>413</sup> Refer to § 4.4.3 (Combatants - Legal Immunity From a Foreign State’s Domestic Law).

<sup>414</sup> Refer to § 4.17.5 (Spying and Sabotage – Forfeiture of the Privileges of Combatant Status); § 4.18.3 (Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status).

<sup>415</sup> See, e.g., 1956 FM 27-10 (Change No. 1 1976) ¶73 (“The foregoing provisions [of article 5 of the GC] impliedly recognize the power of a Party to the conflict to impose the death penalty and lesser punishments on spies, saboteurs, and other persons not entitled to be treated as prisoners of war, except to the extent that that power has

#### 4.19.4.1 *Unprivileged Belligerency and the Law of War – Notes on Terminology.*

In contemporary parlance, spying and other forms of unprivileged belligerency generally have not been referred to as “violations of the law of war” or “war crimes.”<sup>417</sup> For example, spying is permissible under the law of war in the sense that belligerents are not prohibited from employing spies; these activities are punishable but not prohibited under international law.<sup>418</sup>

However, in some cases, offenses related to unprivileged belligerency have been characterized as violations of the law of war.<sup>419</sup> For example, spying has been called a violation of the law of war or “war crime.”<sup>420</sup> Spying and other acts of unprivileged belligerency have been called offenses against the law of nations or law of war – the punishment of these offenders has been viewed as a recognized incident or exercise of a belligerent’s war powers under the law of war.<sup>421</sup>

The difference in these characterizations may be traced to different definitions of “war crime” that have been used over time. The difference in these characterizations may also be traced to different definitions of the “law of war.” If one views the law of war as only containing

---

been limited or taken away by Article 68, GC (par. 438).”); LIEBER CODE art. 88 (“The spy is punishable with death by hanging by the neck, whether or not he succeed in obtaining the information or in conveying it to the enemy.”).

<sup>416</sup> See HAGUE IV REG. art. 30 (“A spy taken in the act shall not be punished without previous trial.”).

<sup>417</sup> Richard R. Baxter, *So-Called ‘Unprivileged Belligerency’: Spies, Guerillas, and Saboteurs*, 28 BRITISH YEAR BOOK OF INTERNATIONAL LAW 323, 324 (1951) (“The correct legal formulation is, it is submitted, that armed and unarmed hostilities, wherever occurring, committed by persons other than those entitled to be treated as prisoners of war or peaceful civilians merely deprive such individuals of a protection they might otherwise enjoy under international law and place them virtually at the power of the enemy. ‘Unlawful belligerency’ is actually ‘unprivileged belligerency’.”).

<sup>418</sup> Refer to § 4.17.4 (Spying and Sabotage Permissible Under the Law of War).

<sup>419</sup> See, e.g., 10 U.S.C. § 950t (27) (defining the offense of spying as “in violation of the law of war”); G.I.A.D. Draper, *The Status of Combatants and the Question of Guerrilla Warfare*, 45 BRITISH YEAR BOOK OF INTERNATIONAL LAW 173, 173, 176 (1971) (“On balance, the theory that illicit combatants may be killed after capture, as an act of warfare, subject to any restraint imposed by the law of war, is somewhat artificial. There may be some substance in the contention, and it may be more consonant with the war practices of belligerents, the official manuals on the law of war issued by States, and the decisions of national tribunals applying the law of war, that illegal participation in combat is a violation of the law of war exposing the offender to loss of immunity from attack, and, upon capture, to trial and punishment upon conviction. However, the matter is controversial, and there are certain passages in the classical writers on the law of war, such as Grotius, which lend support to the theory of ‘unprivileged belligerency’.”).

<sup>420</sup> See, e.g., U.N. SECRETARY-GENERAL, *Historical Survey of the Question of International Criminal Jurisdiction*, U.N. Doc. A/CN.4/7/Rev.1, 1 (1949) (“During the greater part of modern history customary law has also recognized so-called war crimes of various description. Perfidy, particularly that type of perfidy which is described as espionage, is the oldest example of such a war crime.”); Ex parte Quirin, 317 U.S. 1, 31 (1942) (describing spies as “offenders against the law of war subject to trial and punishment by military tribunals.”); WINTHROP, *MILITARY LAW & PRECEDENTS* 770 (“Under the law of nations and of war, [a spy’s] offence is an exclusively military one, cognizable only by military tribunals.”); G. SHERSTON BAKER, *I HALLECK’S INTERNATIONAL LAW* 628-29 (18.20) (1908) (“the act of spying is an offence against the laws of war alone”); James Speed, Attorney General, *Military Commissions*, July 1865, 11 *OPINIONS OF THE ATTORNEY GENERAL* 297, 312-13 (1869) (“to act as spy is an offence against the laws of war, ... every lawyer knows that a spy was a well-known offender under the laws of war.”).

<sup>421</sup> Ex parte Quirin, 317 U.S. 1, 28 (1942) (holding that the trial and punishment of enemy saboteurs by military commission was an “important incident to the conduct of war”).

prohibitions, the punishment of unprivileged belligerents, like all exercises of the war powers, emanates from the domestic law of the belligerent State.<sup>422</sup> On the other hand, if one views the law of war as also including sources of authority, the punishment of unprivileged belligerents is also grounded in the international law of war.<sup>423</sup>

Although the relationship between unprivileged belligerency and the law of war has been characterized in different ways, it is well-accepted that States may punish unprivileged enemy belligerents after a fair trial.

#### 4.20 CHILDREN

The GC provides special protection for children in order to protect them against the dangers of war. In addition, certain provisions of treaties and U.S. law seek to restrict the use or recruitment of children in armed conflict.

##### 4.20.1 Specific Protections for All Children During International Armed Conflict.

4.20.1.1 *Children Under Fifteen Who Are Orphaned or Separated.* The parties to the conflict shall take the necessary measures to ensure that children under fifteen, who are orphaned or are separated from their families as a result of the war, are not left to their own resources, and that their maintenance, the exercise of their religion, and their education are facilitated in all circumstances.<sup>424</sup> The maintenance of the children concerned means their feeding, clothing, and accommodation, care for their health, and, where necessary, medical and hospital treatment.<sup>425</sup>

Their education shall, as far as possible, be entrusted to persons of a similar cultural tradition.<sup>426</sup> This provision is intended to exclude inappropriate religious or political propaganda designed to influence them.<sup>427</sup>

The parties to the conflict shall facilitate the reception of such children in a neutral country for the duration of the conflict with the consent of the Protecting Power, if any, and under due safeguards for the observance of the principles stated in the first paragraph of Article

---

<sup>422</sup> Refer to § 1.3.3.1 (Law of War as Prohibitive Law).

<sup>423</sup> Refer to § 1.3.3.2 (Law of War as Permissive Law).

<sup>424</sup> GC art. 24 (“The Parties to the conflict shall take the necessary measures to ensure that children under fifteen, who are orphaned or are separated from their families as a result of the war, are not left to their own resources, and that their maintenance, the exercise of their religion and their education are facilitated in all circumstances.”).

<sup>425</sup> GC COMMENTARY 187 (“The maintenance of the children concerned means their feeding, clothing, and accommodation, care for their health and, where necessary medical and hospital treatment.”).

<sup>426</sup> GC art. 24 (“Their education shall, as far as possible, be entrusted to persons of a similar cultural tradition.”).

<sup>427</sup> GC COMMENTARY 187 (“That provision is most important. It is intended to exclude any religious or political propaganda designed to wean children from their natural milieu; for that would cause additional suffering to human beings already grievously stricken by the loss of their parents.”).

24 of the GC.<sup>428</sup>

4.20.1.2 Identification for Children Under Twelve. The parties to the conflict shall endeavor to arrange for all children under twelve to be identified by the wearing of identity discs, or by some other means.<sup>429</sup> The age of twelve was chosen because it was considered that children over twelve are generally capable of stating their own identity.<sup>430</sup>

4.20.2 Protection for Alien Children in a Belligerent's Home Territory. In a belligerent's home territory, the GC provides that certain aliens (*i.e.*, those qualifying for protected person status under the GC) who are children under fifteen years, pregnant women, and mothers of children under seven years shall benefit from any preferential treatment to the same extent as the nationals of the State concerned.<sup>431</sup>

4.20.3 Protection for Children in Occupied Territory. Provisions of the GC address the protection of children in occupied territory.<sup>432</sup>

4.20.4 Protection for Children in the Context of Internment Under the GC. The GC provides certain protections for children in the context of internment. Provisions of the GC address:

- the internment of children with their parents;<sup>433</sup>
- special treatment for children during internment, including
  - ensuring the education of children and young people, including school attendance,<sup>434</sup>
  - additional food for children under fifteen in proportion to their physiological needs,<sup>435</sup> and

---

<sup>428</sup> GC art. 24 (“The Parties to the conflict shall facilitate the reception of such children in a neutral country for the duration of the conflict with the consent of the Protecting Power, if any, and under due safeguards for the observance of the principles stated in the first paragraph.”).

<sup>429</sup> GC art. 24 (“They shall, furthermore, endeavour to arrange for all children under twelve to be identified by the wearing of identity discs, or by some other means.”).

<sup>430</sup> GC COMMENTARY 189 (“It will be noticed that the age limit here is twelve, whereas in the first two paragraphs it was fifteen years of age: this is in accordance with a recommendation made at the XVIIth International Red Cross Conference in Stockholm, where it was considered that children over twelve were generally capable of stating their own identity.”).

<sup>431</sup> Refer to § 10.7.1 (Regulation of the Situation of Protected Persons, in Principle, by Provisions Applicable to Aliens in Time of Peace).

<sup>432</sup> Refer to § 11.13 (Protection of Children in Occupied Territory).

<sup>433</sup> Refer to § 10.10.3 (Families Kept Together).

<sup>434</sup> Refer to § 10.16.2 (Education).

<sup>435</sup> Refer to § 10.13.1.2 (Additional Food for Certain Groups).

- special playgrounds reserved for children and young people;<sup>436</sup> and
- special agreements for the release, the repatriation, the return to places of residence, or the accommodation in a neutral country of, among others, children, pregnant women, and mothers with infants and young children.<sup>437</sup>

4.20.5 Child Soldiers. Certain provisions of treaties and U.S. law seek to restrict the use or recruitment of children in armed conflict. If children are nonetheless employed in armed conflict, they generally are treated on the same basis as adults, although children may be subject to special treatment in detention because of their age.

Prohibitions on the use or recruitment of children also apply in non-international armed conflict.<sup>438</sup>

4.20.5.1 U.S. Offense of Recruiting or Using Child Soldiers. U.S. law makes it a crime, under certain circumstances, to recruit, enlist, or conscript a person to serve in an armed force or group, while such person is under 15 years of age.<sup>439</sup> U.S. law also makes it a crime to use a person under 15 years of age to participate actively in hostilities.<sup>440</sup> These restrictions in U.S. law are similar to provisions in treaties to which the United States is not a Party.<sup>441</sup>

4.20.5.2 Child Soldiers Protocol. As a Party to the Optional Protocol to the Convention on the Rights of the Child on the involvement of children in armed conflict,<sup>442</sup> the United States must “take all feasible measures to ensure that members of [its] armed forces who

---

<sup>436</sup> Refer to § 10.16.3 (Opportunities for Physical Exercise, Sports, and Outdoor Games).

<sup>437</sup> Refer to § 10.9.6 (Agreements for the Release, Return, or Accommodation in a Neutral Country of Certain Classes of Internees).

<sup>438</sup> Refer to § 17.10.2 (Children and Participation in Non-International Armed Conflict).

<sup>439</sup> 18 U.S.C. § 2442(a) (making punishable, under certain circumstances, “[w]hoever knowingly— (1) recruits, enlists, or conscripts a person to serve while such person is under 15 years of age in an armed force or group; ... knowing such person is under 15 years of age”).

<sup>440</sup> 18 U.S.C. § 2442(a) (making punishable, under certain circumstances, “[w]hoever knowingly ... (2) uses a person under 15 years of age to participate actively in hostilities; knowing such person is under 15 years of age”).

<sup>441</sup> Consider AP I art. 77(2) (“The Parties to the conflict shall take all feasible measures in order that children who have not attained the age of fifteen years do not take a direct part in hostilities and, in particular, they shall refrain from recruiting them into their armed forces. In recruiting among those persons who have attained the age of fifteen years but who have not attained the age of eighteen years the Parties to the conflict shall endeavour to give priority to those who are oldest.”); Convention on the Rights of the Child, art. 38(2)-(3), Feb. 16, 1995, 1577 UNTS 3, 56 (providing that “States Parties shall take all feasible measures to ensure that persons who have not attained the age of fifteen years do not take a direct part in hostilities” and that “States Parties shall refrain from recruiting any person who has not attained the age of fifteen years into their armed forces”); ROME STATUTE art. 8(2)(b)(xxvi) (defining ‘war crime’ to include “[c]onscripting or enlisting children under the age of fifteen years into the national armed forces or using them to participate actively in hostilities” in international armed conflict).

<sup>442</sup> 2201 UNTS 311 (“*RATIFICATION (WITH DECLARATION AND UNDERSTANDINGS) United States of America Deposit of instrument with the Secretary-General of the United Nations: 23 December 2002*”).

have not attained the age of 18 years do not take a direct part in hostilities.”<sup>443</sup> The United States made a statement of understanding regarding the meaning of the phrase “direct part in hostilities” in the Child Soldiers Protocol.<sup>444</sup>

As a Party to the Child Soldiers Protocol, the United States also has an obligation to ensure that persons who have not attained the age of 18 years are not compulsorily recruited into its armed forces.<sup>445</sup> In a declaration deposited pursuant to Article 3(2) of the Child Soldiers Protocol,<sup>446</sup> the United States described its measures in place to comply with this obligation and stated that the minimum age at which it permitted persons to be voluntarily recruited in the U.S. Armed Forces is 17 years of age.<sup>447</sup>

4.20.5.3 *Treatment of Child Soldiers.* In general, children receive the rights, duties, and liabilities of combatant status on the same basis as other persons. For example, there is no age requirement for someone to receive POW status. Similarly, whether a civilian is considered to be taking a direct part in hostilities does not depend on that person’s age.

Children who have participated in hostilities or been associated with an armed force who are detained might require additional consideration because of their age. For example, rules for

<sup>443</sup> Optional Protocol to the Convention on the Rights of the Child on the Involvement of Children in Armed Conflict, art. 1, May 25, 2000, 2173 UNTS 222, 237 (“States Parties shall take all feasible measures to ensure that members of their armed forces who have not attained the age of 18 years do not take a direct part in hostilities.”).

<sup>444</sup> See United States, *Statement on Ratification of the Child Soldiers Protocol*, Dec. 23, 2002, 2201 UNTS 311, 312 (“(2) The United States understands that, with respect to Article 1 of the Protocol - ... (B) the phrase ‘direct part in hostilities’ - (i) means immediate and actual action on the battlefield likely to cause harm to the enemy because there is a direct causal relationship between the activity engaged in and the harm done to the enemy; and (ii) does not mean indirect participation in hostilities, such as gathering and transmitting military information, transporting weapons, munitions, or other supplies, or forward deployment;”). This statement of understanding was intended to address the usage of the phrase “direct part in hostilities” in the context of these treaty obligations relating to limiting the participation of children in armed conflict, and the phrase “direct part in hostilities” may be interpreted differently in other contexts, such as the circumstances in which civilians forfeit their protection from being made the object of attack. *Refer to* § 5.8 (Civilians Taking a Direct Part in Hostilities).

<sup>445</sup> Optional Protocol to the Convention on the Rights of the Child on the Involvement of Children in Armed Conflict, art. 2, May 25, 2000, 2173 UNTS 222, 237 (“States Parties shall ensure that persons who have not attained the age of 18 years are not compulsorily recruited into their armed forces.”).

<sup>446</sup> Optional Protocol to the Convention on the Rights of the Child on the Involvement of Children in Armed Conflict, art. 3(2), May 25, 2000, 2173 UNTS 222, 237 (“Each State Party shall deposit a binding declaration upon ratification of or accession to this Protocol that sets forth the minimum age at which it will permit voluntary recruitment into its national armed forces and a description of the safeguards that it has adopted to ensure that such recruitment is not forced or coerced.”).

<sup>447</sup> United States, *Statement on Ratification of the Child Soldiers Protocol*, Dec. 23, 2002, 2201 UNTS 311 (“(A) the minimum age at which the United States permits voluntary recruitment into the Armed Forces of the United States is 17 years of age; (B) The United States has established safeguards to ensure that such recruitment is not forced or coerced, including a requirement in section 505 (a) of title 10, United States Code, that no person under 18 years of age may be originally enlisted in the Armed Forces of the United States without the written consent of the person’s parent or guardian, if the parent or guardian is entitled to the person’s custody and control; (C) each person recruited into the Armed Forces of the United States receives a comprehensive briefing and must sign an enlistment contract that, taken together, specify the duties involved in military service; and (D) all persons recruited into the Armed Forces of the United States must provide reliable proof of age before their entry into military service.”).

the additional provision for their education might be applicable.<sup>448</sup> Similarly, it might be appropriate to take into account the age of a defendant in determining liability or punishment for violations of the law of war.

#### 4.21 MERCENARIES

The act of being a mercenary is not a crime in customary international law nor in any treaty to which the United States is a Party.<sup>449</sup> Under the customary law of war and the GPW, “mercenaries” receive the rights, duties, and liabilities of combatant status on the same basis as other persons. For example, being a “mercenary” or paid for participating in hostilities does not deprive a person of POW status, if that person otherwise meets the requirements for POW status, such as by being a member of a militia that is part of the armed forces of a State.<sup>450</sup> Mercenaries must comply with the law of war and may be tried and punished for violations of the law of war on the same basis as other persons. States that employ mercenaries are responsible for their conduct, including their compliance with the law of war.

Mercenaries are often nationals of States that are not parties to a conflict. In general, a national of a neutral State who, during an international armed conflict, commits hostile acts against a State or who voluntarily enlists in the armed forces of one of the parties should not be more severely treated by the State against whom he or she has abandoned his or her neutrality than a national of the other belligerent State could be for the same act.<sup>451</sup>

4.21.1 Treaties on Mercenaries. A number of treaty provisions are intended to repress mercenary activities. The United States has not accepted any such provision because these efforts are not consistent with fundamental principles of the law of war.<sup>452</sup>

---

<sup>448</sup> Refer to § 9.16.2 (Education); § 10.16.2 (Education).

<sup>449</sup> See Edward R. Cummings, Attorney-Adviser, Department of State, *International Legal Rights of Captured Mercenaries*, Oct. 17, 1980, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3457 (“The act of being a mercenary is not a crime under international law. An individual who is accused of being a mercenary and who is captured during an armed conflict is entitled to the basic humanitarian protections of the international law applicable in armed conflict, including those specified in the Geneva Convention Relative to the Protection of Civilian Persons in Time of War (Aug. 12, 1949; TIAS No. 3365; 6 UST 3516). The specific rights which such an individual would be entitled to vary depending on whether the conflict is an international conflict or an internal one and, in the case of international armed conflicts, on whether the person is entitled to prisoner-of-war status.”).

<sup>450</sup> Refer to § 4.5 (Armed Forces of a State).

<sup>451</sup> Refer to § 15.6.2.1 (No More Severe Treatment Than Nationals of an Opposing Belligerent State).

<sup>452</sup> See, e.g., *The Position of the United States on Current Law of War Agreements: Remarks of Judge Abraham D. Sofaer, Legal Adviser, United States Department of State, January 22, 1987*, 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 460, 469 (1987) (“[Article 47 of AP I] was included in the Protocol not for humanitarian reasons, but purely to make the political point that mercenary activity in the Third World is unwelcome. In doing so, this article disregards one of the fundamental principles of international humanitarian law by defining the right to combatant status, at least in part, on the basis of the personal or political motivations of the individual in question. This politicizing of the rules of warfare is contrary to Western interests and the interests of humanitarian law itself.”).

AP I denies “mercenaries” the right to be lawful combatants or POWs.<sup>453</sup> This provision in AP I was adopted because certain States wanted to condemn mercenary groups that had played a role in armed conflicts that had taken place in Sub-saharan Africa since 1960.<sup>454</sup> However, AP I defines “mercenary” very narrowly.<sup>455</sup> For example, any member of the armed forces of a party to the conflict, or any member of the armed forces of any other State, who is sent on official duty as a member of its armed forces, is not a mercenary as defined by AP I.<sup>456</sup> In addition, although, under AP I, mercenaries lack the right to be a combatant or a POW, Parties to AP I may nonetheless decide as a matter of policy to treat enemy mercenaries as lawful combatants or POWs.

Shortly after the adoption of AP I, the Convention for the Elimination of Mercenarism in Africa was adopted, which uses the same definition of mercenary as AP I,<sup>457</sup> but creates greater obligations for Parties to punish and repress mercenarism.<sup>458</sup> The United States is not a Party to

---

<sup>453</sup> See AP I art. 47(1) (“A mercenary shall not have the right to be a combatant or a prisoner of war.”).

<sup>454</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 269 (AP I art. 47, ¶2.2) (“The condemnation and outlawing of mercenary groups and individual mercenaries who had played a substantial (and often unsavoury) role in the armed conflicts which took place in Sub-saharan Africa since 1960 was a high priority goal of African delegations, which was supported by other Third World delegations and by the Eastern European group.”).

<sup>455</sup> See AP I art. 47(2) (“A mercenary is any person who: (a) Is specially recruited locally or abroad in order to fight in an armed conflict; (b) Does, in fact, take a direct part in the hostilities; (c) Is motivated to take part in the hostilities essentially by the desire for private gain and, in fact, is promised, by or on behalf of a Party to the conflict, material compensation substantially in excess of that promised or paid to combatants of similar ranks and functions in the armed forces of that Party; (d) Is neither a national of a Party to the conflict nor a resident of territory controlled by a Party to the conflict; (e) Is not a member of the armed forces of a Party to the conflict; and (f) Has not been sent by a State which is not a Party to the conflict on official duty as a member of its armed forces.”).

<sup>456</sup> Edward R. Cummings, Attorney-Adviser, Department of State, *International Legal Rights of Captured Mercenaries*, Oct. 17, 1980, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3457, 3461 (“This narrow definition of mercenaries in effect denies prisoner-of-war status to individuals who fight strictly for private gain. It does not affect any individual who is a member of the state’s regular forces and other legitimate combatants.”).

<sup>457</sup> See Organisation of African Unity Convention for the Elimination of Mercenarism in Africa, art. 1(1), Jul. 3, 1977, 1490 UNTS 89, 96 (“A mercenary is any person who: a) Is specially recruited locally or abroad in order to fight in an armed conflict; b) Does in fact take a direct part in the hostilities; c) Is motivated to take part in the hostilities essentially by the desire for private gain and in fact is promised by or on behalf of a party to the conflict material compensation; d) Is neither a national of a party to the conflict nor a resident of territory controlled by a party to the conflict; e) Is not a member of the armed forces of a party to the conflict; and f) Is not sent by a State other than a party to the conflict on official mission as a member of the armed forces of the said State.”).

<sup>458</sup> See Organisation of African Unity Convention for the Elimination of Mercenarism in Africa, art. 6, Jul. 3, 1977, 1490 UNTS 89, 97-98 (“The contracting parties shall take all necessary measures to eradicate all mercenary activities in Africa. To this end, each contracting State shall undertake to: a) Prevent its nationals or foreigners on its territory from engaging in any of the acts mentioned in Article 1 of this Convention; b) Prevent entry into or passage through its territory of any mercenary or any equipment destined for mercenary use; c) Prohibit on its territory any activities by persons or organisations who use mercenaries against any African State member of the Organization of African Unity or the people of Africa in their struggle for liberation; d) Communicate to the other Member States of the Organization of African Unity either directly or through the Secretariat of the OAU any information related to the activities of mercenaries as soon as it comes to its knowledge; e) Forbid on its territory the recruitment, training, financing and equipment of mercenaries and any other form of activities likely to promote mercenarism; f) Take all the necessary legislative and other measures to ensure the immediate entry into force of this Convention.”).

this treaty.

The International Convention against the Recruitment, Use, Financing and Training of Mercenaries of December 4, 1989, defines “mercenary” slightly more broadly than AP I, applies to both international and non-international armed conflicts, and defines various offenses related to the recruiting, use, financing, or training of mercenaries.<sup>459</sup> The United States is not a Party to this treaty.

#### 4.22 AP I PROVISIONS ON CIVIL DEFENSE PERSONNEL

Articles 61-67 of AP I address “civil defence”, *i.e.*, the performance of certain humanitarian tasks intended to benefit the civilian population.<sup>460</sup>

The United States has supported the principle that civilian civil defense organizations and their personnel be respected and protected as civilians and be permitted to perform their civil defense tasks except in cases of imperative military necessity.<sup>461</sup> However, a number of military operational problems have been identified with respect to the system of protection for civil defense established by AP I, and these provisions of AP I may be understood not to preclude an attack on an otherwise lawful military objective.<sup>462</sup>

#### 4.23 LAW ENFORCEMENT OFFICERS

In general, police officers receive the rights, duties, and liabilities of civilian status.<sup>463</sup> However, law enforcement agencies are in many respects similar to military forces. They are authorized to use necessary force on behalf of the State, are generally distinguishable from

---

<sup>459</sup> See International Convention against the Recruitment, Use, Financing and Training of Mercenaries, Dec. 4, 1989, Annex to U.N. GENERAL ASSEMBLY RESOLUTION 44/34, U.N. Doc. A/RES/44/34 (Dec. 4, 1989).

<sup>460</sup> AP I art. 61 (“For the purposes of this Protocol: (a) ‘Civil defence’ means the performance of some or all of the undermentioned humanitarian tasks intended to protect the civilian population against the dangers, and to help it to recover from the immediate effects, of hostilities or disasters and also to provide the conditions necessary for its survival. These tasks are: (i) Warning; (ii) Evacuation; (iii) Management of shelters; (iv) Management of blackout measures; (v) Rescue; (vi) Medical services, including first aid, and religious assistance; (vii) Fire-fighting; ...”).

<sup>461</sup> Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 427 (1987) (“Turning now to the field of civil defense, we support the principle that civilian civil defense organizations and their personnel be respected and protected as civilians and be permitted to perform their civil defense tasks except in cases of imperative military necessity. We also support the principle that in occupied territories, civilians receive from the appropriate authorities, as practicable, the facilities necessary for the performance of their tasks. These principles reflect, in general terms, many of the detailed provisions in articles 62 and 63.”).

<sup>462</sup> APPENDIX TO 1985 CJCS MEMO ON AP I 69-71 (“In general, the system of protection for civil defense established by the Protocol is well-meaning, but creates a number of military operational problems. The main practical problems arise from the ambiguity of the definition of civil defense activities in Article 61. ... An attacking force will often have difficulty deciding whether to respect the sign in a particular case. To lessen the risk of misuse of this sign and avoid placing an unacceptable burden on proof of an attacking force, an understanding is proposed that makes it clear that Articles 61-67 do not preclude an attack on an otherwise lawful military objective.”).

<sup>463</sup> Refer to § 4.8 (Rights, Duties, and Liabilities of Civilians).

private citizens, and are often organized like military forces. In cases where States choose to use police officers as part of the armed forces, they receive the rights, duties, and liabilities of combatant status.<sup>464</sup>

4.23.1 Police as Civilians. In general, members of law enforcement agencies have civilian status.<sup>465</sup> Furthermore, routine domestic law enforcement is part of the general protection of the civilian population and does not constitute “taking a direct part in hostilities” that would deprive police officers of their protection from being made the object of attack.<sup>466</sup>

4.23.2 Police With a Military Role. Some States use police forces in a paramilitary capacity or use military forces in a police role. Members of the armed forces engaged in police roles are combatants.

The extent to which police officers are treated as combatants largely depends on whether the State decides to use them in that capacity. States may decide to make law enforcement agencies part of their armed forces.<sup>467</sup> Members of these law enforcement agencies, like other members of those armed forces, receive combatant status by virtue of their membership in the armed forces.<sup>468</sup> In addition, States may authorize members of the law enforcement agencies to accompany their armed forces without incorporating them into their armed forces. These persons have the legal status of persons authorized to accompany the armed forces.<sup>469</sup>

4.23.3 Police in Non-International Armed Conflict. Police officers may play a larger role in armed conflicts between States and insurgent or terrorist groups because in such conflicts the State may treat all enemy persons’ participation in hostilities as criminal.<sup>470</sup>

#### 4.24 JOURNALISTS

In general, journalists are civilians and are protected as such under the law of war.

---

<sup>464</sup> Refer to § 4.4 (Rights, Duties, and Liabilities of Combatants).

<sup>465</sup> Memorandum submitted in *United States v. Shakur*, 690 F. Supp. 1291 (S.D.N.Y. 1988), III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-88 3436, 3450 (“Members of the civilian police force are not deemed to be legitimate objects of attack during international wars unless they are incorporated into the armed forces. The ‘status of police is generally that of civilians’ for purposes of the law of war.”).

<sup>466</sup> Refer to § 5.8.3.2 (Examples of Acts Not Considered Taking a Direct Part in Hostilities).

<sup>467</sup> For example, Belgium, *Statement on Ratification of AP I*, May 20, 1986, 1435 UNTS 367, 367-68 (“Considering paragraph 3 of article 43 (armed forces) and the special status of the Belgian *gendarmarie*, the Belgian Government has decided to notify the High Contracting Parties about the following duties which are entrusted to the Belgian *gendarmarie* during periods of armed conflict. It believes that this notification, in so far as is necessary, meets the requirements of article 43 in respect of the *gendarmarie*. (a) The Belgian *gendarmarie*, which was established to maintain order and enforce the law, is a public force which, under national legislation, constitutes one of the armed forces and which therefore corresponds to the concept of ‘armed forces of a party to a conflict’ within the meaning of article 43 of Protocol I. Thus, in times of international armed conflict the members of the *gendarmarie* have ‘combatant’ status within the meaning of that Protocol.”).

<sup>468</sup> Refer to § 4.5 (Armed Forces of a State).

<sup>469</sup> Refer to § 4.15 (Persons Authorized to Accompany the Armed Forces).

<sup>470</sup> Refer to § 17.4.1 (Ability of a State to Use Its Domestic Law Against Non-State Armed Groups).

Journalists play a vital role in free societies and the rule of law and in providing information about armed conflict.<sup>471</sup> Moreover, the proactive release of accurate information to domestic and international audiences has been viewed as consistent with the objectives of U.S. military operations.<sup>472</sup> DoD operates under the policy that open and independent reporting is the principal means of coverage of U.S. military operations.<sup>473</sup> In addition to responding to press inquiries and providing briefings to members of the press on U.S. military operations, DoD practice has also been to embed journalists with units during military operations.<sup>474</sup> Embedded journalists are assigned to a unit, and they eat, sleep, and move with the unit.<sup>475</sup>

#### 4.24.1 Status of Journalists – Generally Civilian. In general, journalists are protected as

---

<sup>471</sup> See, e.g., Robert S. Taylor, Acting General Counsel, Department of Defense, *Letter to Christophe Deloire, Secretary-General, Reporters Without Borders*, Sept. 15, 2015 (“The Department supports and respects the vital work that journalists perform. Their work in gathering and reporting news is essential to a free society and the rule of law. The Department shares your deep concern about the risks faced by journalists in situations of armed conflict.”); *Remarks by Ambassador Rosemary A. DiCarlo, Acting Permanent Representative to the United Nations, At a Security Council Open Debate on Protection of Civilians in Armed Conflict: Protection of Journalists*, July 17, 2013, 2013 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 195 (“Journalists are literally our eyes and ears in every corner of the world. They sound the warning when local tensions threaten to erupt into war. They document the suffering of civilians in conflict areas. And they expose human rights violations and war crimes. Journalists are critical to this Council’s ability to remain well informed so that it may fulfill its mandate to maintain international peace and security.”).

<sup>472</sup> JOINT PUBLICATION 3-61, *Public Affairs*, I-1 (Nov. 17, 2015) (“b. The US military has an obligation to communicate with its members and the US public, and it is in the national interest to communicate with international publics. The proactive release of accurate information to domestic and international audiences puts joint operations in context, facilitates informed perceptions about military operations, undermines adversarial propaganda, and helps achieve national, strategic, and operational objectives.”).

<sup>473</sup> DoD DIRECTIVE 5122.05, *Assistant Secretary of Defense for Public Affairs (ASD(PA))*, 9 (Sept. 5, 2008), Enclosure 3 - *Statement of DoD Principles for News Media Coverage of DoD Operations* (“1. Open and independent reporting shall be the principal means of coverage of U.S. military operations.”).

<sup>474</sup> For example, Richard K. Wright, *Assessment of the DoD Embedded Media Program*, I-1 (Institute for Defense Analyses, Sept. 2004) (“The Department of Defense (DoD) Embedded Media Program resulted in an unprecedented opportunity for the media to report in real time on the military units and the soldiers, marines, sailors, and airmen who executed combat operations during Operation Iraqi Freedom (OIF). A total of 692 reporters, photographers, producers, cameramen, and technicians were embedded with ground units, on ships, and at air bases for an extended period of time.”).

<sup>475</sup> *Public Affairs Guidance (PAG) On Embedding Media During Possible Future Operations/Deployments In The U.S. Central Command (CENTCOM) Area Of Responsibility (AOR)*, Feb. 10, 2003, ¶2.C, reprinted as Appendix D in Richard K. Wright, *Assessment of the DoD Embedded Media Program*, D-4 (Institute for Defense Analyses, Sept. 2004) (“A MEDIA EMBED IS DEFINED AS A MEDIA REPRESENTATIVE REMAINING WITH A UNIT ON AN EXTENDED BASIS – PERHAPS A PERIOD OF WEEKS OR EVEN MONTHS. COMMANDERS WILL PROVIDE BILLETING, RATIONS, AND MEDICAL ATTENTION, IF NEEDED, TO THE EMBEDDED MEDIA COMMENSURATE WITH THAT PROVIDED TO MEMBERS OF THE UNIT, AS WELL AS ACCESS TO MILITARY TRANSPORTATION AND ASSISTANCE WITH COMMUNICATIONS FILING/TRANSMITTING MEDIA PRODUCTS, IF REQUIRED.”); DEPARTMENT OF THE ARMY FIELD MANUAL 46-1, *Public Affairs Operations*, 25-26 (May 30, 1997) (“PAOs should seek out those members of the media who are willing to spend extended periods of time with soldiers during an operation, embedding them into the unit they cover. Embedding is the act of assigning a reporter to a unit as a member of the unit. The reporter eats, sleeps, and moves with the unit. The reporter is authorized open access to all sections of the unit and is not escorted by public affairs personnel. Rather, the unit is the reporter’s escort.”).

civilians;<sup>476</sup> *i.e.*, engaging in journalism does not constitute taking a direct part in hostilities such that such a person would be deprived of protection from being made the object of attack.<sup>477</sup>

Journalists do not form a distinct class of persons under the law of war, but instead receive protection through the general protections afforded civilians.<sup>478</sup> Thus, in general, the rights, duties, and liabilities applicable to civilians also apply to journalists.<sup>479</sup>

Although journalism is regarded as a civilian activity, the fact that a person performs such work does not preclude that person from otherwise acquiring a different status under the law of war, such as the status of persons authorized to accompany the armed forces or of combatants.

4.24.1.1 War Correspondents and Other Journalists Authorized to Accompany the Armed Forces. Journalists authorized to accompany the armed forces have the status of such persons.<sup>480</sup> For example, if they fall into the power of the enemy during international armed conflict, they are entitled to POW status.<sup>481</sup> Such journalists are sometimes called “war

---

<sup>476</sup> See Hedges v. Obama, No. 12-3644, *Reply Brief for Defendant-Appellant*, 11 (2d Cir. Dec. 20, 2012) (“As an initial matter, it is an established law of war norm, which is reflected in Article 79 of Additional Protocol I to the Geneva Conventions, that ‘journalists’ are generally to be protected as ‘civilians.’ Although the United States is not a party to Additional Protocol I, it supports and respects this important principle.”); Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 428 (1987) (“We also support the principle that journalists be protected as civilians under the Convention, provided they take no action adversely affecting such status.”). Consider AP I art. 79 (“MEASURES OF PROTECTION FOR JOURNALISTS. 1. Journalists engaged in dangerous professional missions in areas of armed conflict shall be considered as civilians within the meaning of Article 50, paragraph 1. 2. They shall be protected as such under the Conventions and this Protocol, provided that they take no action adversely affecting their status as civilians, and without prejudice to the right of war correspondents accredited to the armed forces to the status provided for in Article 4 A (4) of the Third Convention.”).

<sup>477</sup> Refer to § 5.8.3.2 (Examples of Acts Not Considered Taking a Direct Part in Hostilities).

<sup>478</sup> See, e.g., U.N. SECURITY COUNCIL RESOLUTION 2222 (2015), U.N. Doc. S/RES/2222 (2015) ¶¶ 3, 7 (May 27, 2015) (“3. *Recalls* in this regard that journalists, media professionals and associated personnel engaged in dangerous professional missions in areas of armed conflict shall be considered as civilians and shall be respected and protected as such, provided that they take no action adversely affecting their status as civilians. ... 7. *Recalls its demand* that all parties to an armed conflict comply fully with the obligations applicable to them under international law related to the protection of civilians in armed conflict, including journalists, media professionals and associated personnel;”).

<sup>479</sup> Refer to § 4.8 (Rights, Duties, and Liabilities of Civilians).

<sup>480</sup> Refer to § 4.15 (Persons Authorized to Accompany the Armed Forces).

<sup>481</sup> See GPW art. 4A(4) (defining “prisoners of war, in the sense of the present Convention” to include “[p]ersons who accompany the armed forces without actually being members thereof, such as ... war correspondents, ... provided that they have received authorization from the armed forces which they accompany,” who have fallen into the power of the enemy); HAGUE IV REG. art. 13 (“Individuals who follow an army without directly belonging to it, such as newspaper correspondents and reporters, ... who fall into the enemy’s hands and whom the latter thinks expedient to detain, are entitled to be treated as prisoners of war, provided they are in possession of a certificate from the military authorities of the army which they were accompanying.”).

correspondents,” which is a term used in Geneva Conventions of 1949.<sup>482</sup>

Since journalists authorized to accompany the armed forces are liable to become POWs, they must be issued identification cards so that they may establish their entitlement to POW status upon falling into the power of the enemy during international armed conflict.<sup>483</sup>

4.24.1.2 Combatants Performing Journalistic Work. Although generally journalists are civilians, journalists are not precluded from being considered combatants, whether privileged or unprivileged, if they otherwise acquire such status. For example, members of the armed forces sometimes serve as journalists or in some other public affairs capacity, and these persons have the same status as other privileged combatants.<sup>484</sup> Non-State armed groups sometimes use their members<sup>485</sup> for propaganda or other media activities, and such personnel are not precluded from being considered unprivileged belligerents.<sup>486</sup> In addition, although engaging in journalism would not be a basis to consider a person an unprivileged belligerent, an unprivileged belligerent would not be precluded from being considered as such because he or she works as a journalist.

4.24.2 General Rules for the Treatment of Civilian Journalists and Journalists Authorized to Accompany the Armed Forces. Although journalists generally are protected as civilians as a legal matter, the factual circumstances of armed conflict often expose journalists exercising their profession in such a situation to dangers not normally encountered by other civilians.<sup>487</sup>

4.24.2.1 Journalists – Risks in Areas of Military Operations. Journalists who enter areas of military operations assume a significant risk that they could be injured or killed incidental to an enemy attack or from other dangers.<sup>488</sup> Unfortunately, journalists have sometimes been killed while reporting in close proximity to combat operations.<sup>489</sup> To minimize

---

<sup>482</sup> GPW art. 4A(4); AP I art. 79(2).

<sup>483</sup> Refer to § 9.4.3 (Issue of Identification Cards to Persons Liable to Become POWs).

<sup>484</sup> Refer to § 4.5 (Armed Forces of a State).

<sup>485</sup> Refer to § 4.18.4.1 (Being Part of a Hostile, Non-State Armed Group).

<sup>486</sup> For example, United States v. Al Bahlul, 820 F. Supp. 2d 1141, 1261 (CMCR 2011) (“In his voluntary statements to investigators, appellant admitted on multiple occasions to traveling to Afghanistan with the intent to join al Qaeda, undergoing military-type training at an al Qaeda sponsored camp, and meeting with bin Laden following his training. During that meeting, appellant admitted discussing bin Laden’s views on Islam and jihad against the United States, agreeing with those views, and then pledging personal loyalty to bin Laden. He then joined al Qaeda as a member, worked in al Qaeda’s media office, and eventually took charge of that office, where he performed a number of acts to recruit, to incite others to join al Qaeda, and to indoctrinate prospective al Qaeda recruits into the al Qaeda Plan.”).

<sup>487</sup> See ICRC AP COMMENTARY 918 (¶3245) (“The circumstances of armed conflict expose journalists exercising their profession in such a situation to dangers which often exceed the level of danger normally encountered by civilians. In some cases the risks are even similar to the dangers encountered by members of the armed forces, although they do not belong to the armed forces.”).

<sup>488</sup> Refer to § 4.15.2.3 (Increased Risk of Incidental Harm).

<sup>489</sup> For example, Marc Warren, *The ‘Fog of Law’: The Law of Armed Conflict in Operation Iraqi Freedom*, 86 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 167, 196-97 endnote 20 (2010) (“Consider, e.g., the case of the Palestine Hotel in Baghdad, where two civilian cameramen were killed in an explosion caused by a round from

the risk of mistakenly being made the object of attack, journalists often seek to distinguish themselves from military forces.<sup>490</sup> Where possible, efforts should be made to distinguish between the activities of journalists and the activities of enemy forces, so that journalists' activities (*e.g.*, meetings or other contacts with enemy personnel for journalistic purposes) do not result in a mistaken conclusion that a journalist is part of enemy forces.

In addition, civilian journalists and journalists authorized to accompany the armed forces should not take any action adversely affecting their status as civilians if they wish to retain protection as a civilian.<sup>491</sup> For example, relaying target coordinates with the specific purpose of directing an artillery strike against opposing forces would constitute taking a direct part in hostilities that would forfeit protection from being made the object of attack.<sup>492</sup>

4.24.2.2 *Journalists – Reporting on Military Operations.* As noted above, DoD operates under the policy that open and independent reporting is the principal means of coverage of U.S. military operations. Under the law of war, there is no special right for journalists to access areas of military operations without the consent of the State conducting those operations.<sup>493</sup> The law of war does not prohibit States from taking security measures to reduce the risk of disclosure of sensitive military information, such as numbers of military personnel, types of on-hand equipment, unit locations, and plans for future operations.<sup>494</sup> For example,

---

the main gun of a US Abrams tank on April 8, 2003. The unit of which the tank was a part had been engaged in significant urban fighting, including repulsing an enemy counterattack on the day of the incident, and had received reports of enemy forward observers in high-rise buildings on the east side of the Tigris River. As the tank crossed the Al Jumhuriya Bridge, its crew spotted, and fired one round at, what appeared to be an enemy forward observer, but was in fact a civilian cameraman. The explosion killed Spanish cameraman Jose Couso and Reuters cameraman Taras Protsyuk, and wounded three other journalists. US forces conducted an investigation and determined that the Palestine Hotel had been fortified by the enemy and was occupied by the enemy. The cameraman had been misidentified as an enemy forward observer, which was a reasonable mistake under the circumstances.”); *Ernie Pyle Is Killed on Ie Island; Foe Fired when All Seemed Safe*, THE NEW YORK TIMES, Apr. 19, 1945 (“GUAM, April 18—Ernie Pyle died today on Ie Island, just west of Okinawa, like so many of the doughboys he had written about. The nationally known war correspondent was killed instantly by Japanese machine-gun fire. The slight, graying newspaper man, chronicler of the average American soldier’s daily round, in and out of foxholes in many war theatres, had gone forward early this morning to observe the advance of a well-known division of the Twenty-fourth Army Corps.”).

<sup>490</sup> For example, Reporters Without Borders, *Safety Guide for Journalists: A handbook for reporters in high-risk environments*, 41 (2015) (“**To protect yourself against snipers:** ... • Indicate clearly that you are a journalist. Write PRESS or TV on everything. • Don’t wear military-style clothing so as not to be confused with a combatant. And be careful with how you carry your equipment – cameras and zooms could look like weapons from afar.”); Reporters Without Borders, *Handbook for Journalists*, 26 (2010) (“PASSING THROUGH AN AREA OF FIGHTING Only do so if you have no alternative. ... • Distinguish yourself from those fighting, for example by putting a ‘press’ sign on the vehicle.”).

<sup>491</sup> Consider API art. 79 (“Journalists engaged in dangerous professional missions in areas of armed conflict” shall be protected as civilians from attack “provided that they take no action adversely affecting their status as civilians.”).

<sup>492</sup> Refer to § 5.8.3.1 (Examples of Taking a Direct Part in Hostilities).

<sup>493</sup> Compare § 4.26.2 (Consent of the Parties to the Conflict Concerned).

<sup>494</sup> JOINT PUBLICATION 3-61, *Public Affairs*, C-3 (Nov. 17, 2015) (“In more general terms, information in the following categories should not be revealed because of potential jeopardy to future operations, the risk to human life, possible violation of HN and/or allied sensitivities, or the possible disclosure of intelligence methods and sources. ... (1) For US (or allied) units, specific numerical information on troop strength, aircraft, weapons systems, on-hand equipment, or supplies available for support of combat units. General terms should be used to describe

military security ground rules may be developed for media personnel.<sup>495</sup> The particular restrictions imposed by a State are likely to depend on its domestic law and policy.

Access to military operations that is afforded to media personnel must be consistent with law of war obligations,<sup>496</sup> including obligations to protect prisoners of war and other detainees against public curiosity.<sup>497</sup>

#### 4.25 DELEGATES OR REPRESENTATIVES OF THE PROTECTING POWERS

4.25.1 Appointment of Delegates of the Protecting Powers. The Protecting Powers may appoint, apart from their diplomatic or consular staff, delegates from among their own nationals or the nationals of other neutral Powers to carry out its duties under the GPW and the GC.<sup>498</sup> These delegates shall be subject to the approval of the Power with which they are to carry out their duties.<sup>499</sup>

4.25.2 Duties of the Representatives or Delegates of the Protecting Power. The parties to the conflict shall facilitate to the greatest extent possible the task of the representatives or

---

units, equipment, and/or supplies. (2) Any information that reveals details of future plans, operations, or strikes, including postponed or canceled operations. (3) Information and VI [visual information] that would reveal the specific location of military forces or show the level of security at military installations or encampments.”).

<sup>495</sup> DOD DIRECTIVE 5122.05, *Assistant Secretary of Defense for Public Affairs (ASD(PA))*, 9 (Sept. 5, 2008), Enclosure 3 – *Statement of DoD Principles for News Media Coverage of DoD Operations* (“4. Journalists in a combat zone shall be credentialed by the U.S. military and shall be required to abide by a clear set of military security ground rules that protect U.S. Armed Forces and their operations. Violation of the ground rules may result in suspension of credentials and expulsion from the combat zone of the journalist involved. News organizations shall make their best efforts to assign experienced journalists to combat operations and to make them familiar with U.S. military operations.”); see also JOINT PUBLICATION 3-61, *Public Affairs*, III-17 (Nov. 17, 2015) (“Ground rules are developed to protect members of DOD from the release of information that could threaten their security or safety during ongoing operations while facilitating the media’s access to timely, relevant information. Ground rules reconcile the desire of the media to cover military operations with DOD security and safety concerns and are in no way intended to prevent release of derogatory, embarrassing, negative, or non-complimentary information. Media ground rules include requirements designed to protect the security, health, and welfare of the media. Media ground rules should also include the process for release of information, media access to the commander, and access to the Internet if not commercially available, and the process for unintentional exposure to classified information.”).

<sup>496</sup> For example, CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL’S LEGAL CENTER & SCHOOL, U.S. ARMY, I LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 138 (2004) (“The presence of embedded media resulted in various issues for the legal teams. For instance with hundreds of journalists traveling throughout Iraq looking for stories, JAs reported that they had to be vigilant in ensuring that EPWs and the bodies of deceased individuals were not photographed. Although journalists were warned not to film or photograph EPWs and the deceased, and in most cases they did not, some journalists had to be sent home for violating this guidance.”).

<sup>497</sup> Refer to § 8.2.2.2 (Protection Against Public Curiosity); § 9.5.3 (Protection Against Insults and Public Curiosity).

<sup>498</sup> GPW art. 8 (“For this purpose, the Protecting Powers may appoint, apart from their diplomatic or consular staff, delegates from amongst their own nationals or the nationals of other neutral Powers.”); GC art. 9 (same).

<sup>499</sup> GPW art. 8 (“The said delegates shall be subject to the approval of the Power with which they are to carry out their duties.”); GC art. 9 (same).

delegates of the Protecting Powers.<sup>500</sup>

The representatives or delegates of the Protecting Powers shall not in any case exceed their mission under the 1949 Geneva Conventions.<sup>501</sup> They shall, in particular, take account of the imperative necessities of security of the State wherein they carry out their duties.<sup>502</sup>

4.25.3 Restrictions on Representatives of the Protecting Powers. A belligerent may impose legitimate security restrictions on the activities of the delegates or representatives of the Protecting Powers working in its territory or in its facilities. However, belligerents should only restrict the activities of the representatives or delegates of the Protecting Powers “as an exceptional and temporary measure when this is rendered necessary by imperative military necessities.”<sup>503</sup> For example, a belligerent may postpone a visit by Protecting Power representatives to a POW camp for security or humanitarian reasons, such as tactical movement of its own forces or to protect Protecting Power personnel from explosive remnants of war being cleared from recent military operations along the route to the POW camp.

#### 4.26 ICRC AND OTHER IMPARTIAL HUMANITARIAN ORGANIZATIONS

The 1949 Geneva Conventions contemplate that the ICRC and other impartial humanitarian organizations may, subject to the consent of the parties to the conflict concerned, provide humanitarian aid and seek to ensure the protection of war victims in armed conflict.<sup>504</sup> In some cases, the ICRC or another impartial humanitarian organization may assume the humanitarian functions performed by the Protecting Powers.<sup>505</sup>

4.26.1 “Impartial”. To be an “impartial humanitarian organization” under the 1949 Geneva Conventions, a humanitarian organization must be impartial. The requirement of impartiality distinguishes these humanitarian organizations from those with an allegiance to a party to the conflict, such as national red cross societies.<sup>506</sup>

4.26.2 Consent of the Parties to the Conflict Concerned. The activities of the ICRC or other impartial humanitarian organizations in a State’s sovereign territory, or in the area of a

---

<sup>500</sup> GPW art. 8 (“The Parties to the conflict shall facilitate to the greatest extent possible the task of the representatives or delegates of the Protecting Powers.”); GC art. 9 (same).

<sup>501</sup> GPW art. 8 (“The representatives or delegates of the Protecting Powers shall not in any case exceed their mission under the present Convention.”); GC art. 9 (same).

<sup>502</sup> GPW art. 8 (“They shall, in particular, take account of the imperative necessities of security of the State wherein they carry out their duties.”); GC art. 9 (same).

<sup>503</sup> GWS art. 8; GWS-SEA art. 8 (same). *Refer to* § 9.33.1 (Access by Protecting Powers); § 10.33.1 (Access by Protecting Powers).

<sup>504</sup> *See, e.g.*, GWS art. 9 (“The provisions of the present Convention constitute no obstacle to the humanitarian activities which the International Committee of the Red Cross or any other impartial humanitarian organization may, subject to the consent of the Parties to the conflict concerned, undertake for the protection” and relief of persons protected by the Convention); GWS-SEA art. 9 (same); GPW art. 9 (same); GC art. 10 (same).

<sup>505</sup> *Refer to* § 18.15.2 (Appointment of a Protecting Power).

<sup>506</sup> *Refer to* § 4.11 (Authorized Staff of Voluntary Aid Societies).

State's military operations, are subject to the consent of that State.<sup>507</sup> The requirement of State consent is based on the State's sovereign right to control access to its territory and a belligerent's right to control access to its military operations or territory it occupies.<sup>508</sup> For example, members of impartial humanitarian organizations, like other civilians, may be removed from the vicinity of military objectives for their protection.<sup>509</sup>

States may grant access on a case-by-case basis; access granted to one impartial humanitarian organization does not constitute entitlement of access for other humanitarian organizations. Impartial humanitarian organizations that have been granted access must also act within the terms of this consent.<sup>510</sup> For comparison, the activities of the Protecting Power are also subject to the consent of the affected States.<sup>511</sup>

States should not arbitrarily withhold their consent to the activities of humanitarian organizations, even in non-international armed conflict.<sup>512</sup> Where a State has accepted the services of an impartial humanitarian organization, the State must not regard such service, such as the provision of medical care, as unlawful and subject to punishment.<sup>513</sup>

4.26.2.1 *Impartial Humanitarian Organizations – Conditions on Access.* States may attach conditions to their consent, including necessary security measures. For example, in the past, armed groups have sometimes attempted to use humanitarian organizations as cover for

---

<sup>507</sup> U.S. Comments on the International Committee of the Red Cross's Memorandum on the Applicability of International Humanitarian Law in the Gulf Region, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2066 ("The obligations set forth in this paragraph generally are subject to the consent of the parties to the conflict, as noted in Article 9 of the GPW and 10 of the GC. Although the U.S. historically has called upon the ICRC to assist it in implementation of the provisions of the 1949 Geneva Conventions, ultimately any decision to seek assistance of the ICRC or any other humanitarian organization is subject to the consent of the parties to the conflict in general and the host nation in particular.").

<sup>508</sup> Refer to § 5.19.1.1 (Belligerent Authority to Exercise Control in the Immediate Vicinity of Military Operations); § 11.4.1 (Right of the Occupying Power to Govern the Enemy Territory Temporarily).

<sup>509</sup> Refer to § 5.14.2 (Removing Civilians and Civilian Objects From the Vicinity of Military Objectives).

<sup>510</sup> See U.S. RESPONSE TO ICRC CIHL STUDY 520 ("We do not believe that rule 31, as drafted, reflects customary international law applicable to international or non-international armed conflicts. The rule does not reflect the important element of State consent or the fact that States' obligations in this area extend only to HRP [Humanitarian Relief Personnel] who are acting within the terms of their mission - that is, providing humanitarian relief. To the extent that the authors intended to imply a 'terms of mission' requirement in the rule, the authors illustrated the difficulty of proposing rules of customary international law that have been simplified as compared to the corresponding treaty rules.").

<sup>511</sup> Refer to § 18.15.3 (Activities of the Protecting Power).

<sup>512</sup> Refer to § 17.8.1 (State Consent for Humanitarian Organizations).

<sup>513</sup> Principles Related to the Protection of Medical Care Provided by Impartial Humanitarian Organizations During Armed Conflict, ¶VI, attachment to Ash Carter, Secretary of Defense, Memorandum re: Principles Related to the Protection of Medical Care Provided by Impartial Humanitarian Organizations During Armed Conflict, Oct. 3, 2016 ("VI. Impartial humanitarian organizations may offer their services to any of the parties to the conflict. A. States should not arbitrarily withhold their consent to the activities of humanitarian organizations. B. Where a State has accepted the services of an impartial humanitarian organization, it must not regard such services, including the provision of medical care, as unlawful and subject to punishment.").

participation in hostilities.<sup>514</sup> In addition to legitimate military considerations, other considerations may also limit access by impartial humanitarian organizations to military operations. For example, the GPW obligates a Detaining Power to protect POWs from “public curiosity,” which may entail limiting access to POWs by private organizations.<sup>515</sup>

4.26.2.2 Impartial Humanitarian Organizations – CCW Amended Mines Protocol Obligation. In certain cases, however, there may be an obligation to take measures to help protect the personnel of certain humanitarian organizations that are performing functions with the consent of the Party to the CCW Amended Mines Protocol on whose territory the functions are performed from the effects of mines, booby-traps, and other devices.<sup>516</sup>

4.26.3 Special Status of the ICRC. The 1949 Geneva Conventions explicitly recognize the special position of the ICRC among impartial humanitarian organizations.<sup>517</sup> Similarly, Congress has specifically authorized – and the President has designated – the ICRC to be extended the same privileges and immunities that are afforded to public international organizations in which the United States participates.<sup>518</sup> The President has also recognized the role of the ICRC in visiting individuals detained in armed conflict.<sup>519</sup> The United States has relied on the ICRC’s capacity, particularly in conflict situations, and has contributed substantially to the ICRC’s work.<sup>520</sup> The United States has maintained a very constructive

---

<sup>514</sup> U.S. RESPONSE TO ICRC CIHL STUDY 519-20 (“For example, during the 1982 Israeli incursion into Lebanon, Israel discovered ambulances marked with the Red Crescent, purportedly representing the Palestinian Red Crescent Society, carrying able-bodied enemy fighters and weapons. This misconduct reportedly was repeated during the 2002 seizure of Bethlehem’s Church of the Nativity by members of the terrorist al Aqsa Martyrs Brigade. ... Military commanders also have had to worry about individuals falsely claiming HRP [humanitarian relief personnel] status, as happened in Afghanistan when some members of Al Qaeda captured while fighting claimed to be working for a humanitarian relief organization. These examples demonstrate why States, in crafting treaty provisions on this topic, have created a ‘terms of mission’ condition for HRP in a way that rule 31 fails to do.”).

<sup>515</sup> Refer to § 9.5.3 (Protection Against Insults and Public Curiosity).

<sup>516</sup> Refer to § 6.12.11 (Obligation to Seek to Protect Certain Groups From the Effects of Minefields, Mined Areas, Mines, Booby-Traps, and Other Devices).

<sup>517</sup> See, e.g., GPW art. 125 (“The special position of the International Committee of the Red Cross in this field shall be recognized and respected at all times.”); GC art. 142 (same).

<sup>518</sup> See 22 U.S.C. § 288f-3 (“The International Committee of the Red Cross, in view of its unique status as an impartial humanitarian body named in the Geneva Conventions of 1949 and assisting in their implementation, shall be considered to be an international organization for the purposes of this subchapter and may be extended the provisions of this subchapter in the same manner, to the same extent, and subject to the same conditions, as such provisions may be extended to a public international organization in which the United States participates pursuant to any treaty or under the authority of any Act of Congress authorizing such participation or making an appropriation for such participation.”); Executive Order 12643, *International Committee of the Red Cross*, 53 FEDERAL REGISTER 24247 (Jun. 23, 1988) (“I hereby extend to the International Committee of the Red Cross the privileges, exemptions, and immunities provided by the International Organizations Immunities Act.”).

<sup>519</sup> Refer to § 8.10.4 (ICRC Access to Detainees).

<sup>520</sup> Gary Robbins, Chargé d’Affaires, Department of State, U.S. Mission to the Organization for Security and Cooperation in Europe, *Response to Ambassador Peter Maurer, President of the International Committee of the Red Cross*, Jan. 30, 2014 (“We honor the work that the ICRC has done over the past 150 years. With its founding principles of impartiality, neutrality, and independence, the ICRC is able to carry out crucial work where others cannot. The United States values the ICRC’s work and relies on its capacity, particularly in conflict situations. In fiscal year 2013, the United States contributed more than \$280 million to the ICRC’s work, which reflects our

dialogue with the ICRC.

The ICRC does important work in visiting detainees, facilitating communication between detainees and their families, organizing relief operations, and undertaking similar humanitarian activities during armed conflicts. For example, the ICRC has performed the functions of a Protecting Power during armed conflict.<sup>521</sup> In addition, the ICRC has performed the functions of the Central Information Agency for POWs and protected persons during international armed conflict.<sup>522</sup> In order to facilitate access, the ICRC conducts its visits to detention facilities on a confidential basis, a practice that DoD has sought to respect.<sup>523</sup>

The ICRC has issued policy proposals or interpretative guidance on a variety of international law issues. Although the ICRC's proposals and interpretations do not have binding legal effect, they have often been helpful to States. In some cases, the United States and other States have not accepted the ICRC's proposals or interpretations and instead expressed opposing views. For example, the United States has not accepted the ICRC's study on customary international humanitarian law nor its "interpretive guidance" on direct participation in hostilities.<sup>524</sup>

#### 4.27 DETERMINING THE STATUS OF DETAINEES IN CASES OF DOUBT

4.27.1 Identification Cards Used to Help Clarify Status. The 1949 Geneva Conventions contemplate that identification cards will be used to help clarify the status of detainees in international armed conflict.<sup>525</sup> Parties to the GPW must provide identity cards to persons under their jurisdiction who are liable to become POWs.<sup>526</sup> Similarly, Parties to the GWS must provide retained personnel with a special identity card that denotes their status.<sup>527</sup> Capturing units should not take these identity cards from POWs or retained personnel.<sup>528</sup> In addition,

---

confidence in the organization. We look forward to supporting the ICRC in the future as we confront significant humanitarian need around the globe.”).

<sup>521</sup> Refer to § 18.15.2.3 (Impartial Humanitarian Organizations Assuming Humanitarian Functions Performed by Protecting Powers Under the 1949 Geneva Conventions).

<sup>522</sup> Refer to § 9.31.3 (Central POW Information Agency); § 10.31.3 (Central Information Agency for Protected Persons).

<sup>523</sup> See, e.g., *American Civil Liberties Union v. Department of Defense*, 389 F. Supp. 2d 547, 554 (S.D.N.Y. 2005) (noting that DoD policy “requires confidential treatment of all ICRC communications”). For discussion of the ICRC practice of confidentiality, see *Prosecutor v. Blagoje Simic et al.*, ICTY Trial Chamber, IT-95-9, *Decision on the Prosecution Motion Under Rule 73 for a Ruling Concerning the Testimony of a Witness*, ¶¶45-74 (Jul. 27, 1999); *Prosecutor v. Blagoje Simic, et al.*, ICTY Trial Chamber, IT-95-9, *Separate Opinion Of Judge David Hunt On Prosecutor’s Motion For A Ruling Concerning The Testimony Of A Witness*, ¶¶14-33 (Jul. 27, 1999).

<sup>524</sup> Refer to § 19.25 (2005 ICRC Study on Customary International Humanitarian Law); § 5.8.1.2 (AP I, Article 51(3) Provision on Direct Participation in Hostilities).

<sup>525</sup> See, e.g., GPW COMMENTARY 52 (“If need be, any person to whom the provisions of Article 4 [of the GPW] are applicable can prove his status by presenting the identity card provided for in Article 17.”).

<sup>526</sup> Refer to § 9.4.3 (Issue of Identification Cards to Persons Liable to Become POWs).

<sup>527</sup> Refer to § 7.9.2 (Use of Identification Card to Help Establish Retained Personnel Status).

<sup>528</sup> GPW art. 17 (“The identity card shall be shown by the prisoner of war upon demand, but may in no case be taken away from him.”); GWS art. 40 (“In no circumstances may the said personnel be deprived of their insignia or

States should retain duplicate copies of identification cards that they issue.<sup>529</sup> In contemporary practice, modern storage systems, such as computer databases, are used rather than storing duplicates of the issued identification cards.<sup>530</sup>

Producing an identification card to capturing forces is not necessarily a prerequisite for a person to be entitled to a particular status. Identification cards may become lost, damaged, or stolen during military operations, so a failure to produce an identity card does not necessarily mean that person lacks a particular status.<sup>531</sup>

#### 4.27.2 POW Protections for Certain Persons Until Status Has Been Determined.

Capturing personnel may be unable to establish a detainee's status, including whether that person is entitled to POW status under the GPW. For example, a detainee might have lost his or her identity card or the detainee might be a deserter who does not wish to admit that he or she is a member of enemy armed forces.

During international armed conflict, should any doubt arise as to whether persons, having committed a belligerent act and having fallen into the hands of the enemy, belong to any of the categories enumerated in Article 4 of the GPW, such persons shall enjoy the protection of the GPW until such time as their status has been determined by a competent tribunal.<sup>532</sup>

4.27.3 Competent Tribunal to Assess Entitlement to POW Status or Treatment. The "competent tribunal" in Article 5 of the GPW is often called an "Article 5 tribunal." In some

---

identity cards nor of the right to wear the armband. In case of loss, they shall be entitled to receive duplicates of the cards and to have the insignia replaced.").

<sup>529</sup> GWS art. 40 (Identity cards for military medical and religious personnel "should be made out, if possible, at least in duplicate, one copy being kept by the home country."); GPW art. 17 (Identity cards for prisoners of war "[a]s far as possible ... shall be issued in duplicate.").

<sup>530</sup> For example, DoD INSTRUCTION 1000.01, *Identification (ID) Cards Required by the Geneva Conventions*, ¶3(a)(3) (Apr. 16, 2012) ("The duplicate ID card requirements of Article 17 of Reference (f), to facilitate identification of POWs with the Prisoner of War Information Bureau as delineated in Article 122 of Reference (f), are more adequately met by the information routinely maintained in the Defense Enrollment Eligibility Reporting System (DEERS). Accordingly, duplicate ID cards will not be required.").

<sup>531</sup> See, e.g., GPW COMMENTARY 64-65 (noting that States at the Diplomatic Conference of Geneva of 1949 "considered that the capacity in which the person was serving should be a determining factor; the possession of a[n] identification] card is not therefore an indispensable condition of the right to be treated as a prisoner of war, but a supplementary safeguard").

<sup>532</sup> GPW art. 5 ("Should any doubt arise as to whether persons, having committed a belligerent act and having fallen into the hands of the enemy, belong to any of the categories enumerated in Article 4, such persons shall enjoy the protection of the present Convention until such time as their status has been determined by a competent tribunal."). Consider AP I art. 45(1) ("A person who takes part in hostilities and falls into the power of an adverse Party shall be presumed to be a prisoner of war, and therefore shall be protected by the Third Convention, if he claims the status of prisoner of war, or if he appears to be entitled to such status, or if the Party on which he depends claims such status on his behalf by notification to the detaining Power or to the Protecting Power. Should any doubt arise as to whether any such person is entitled to the status of prisoner of war, he shall continue to have such status and, therefore, to be protected by the Third Convention and this Protocol until such time as his status has been determined by a competent tribunal.").

cases, courts have undertaken to assess whether a detainee is entitled to POW status,<sup>533</sup> but a “competent tribunal” generally entails the Detaining Power convening an administrative board.<sup>534</sup> The GPW affords the Detaining Power substantial discretion regarding the composition and procedures of an Article 5 tribunal.<sup>535</sup>

Article 5 only requires a tribunal if there is “any doubt” regarding a person’s entitlement to POW status or treatment.<sup>536</sup> For example, if there was no doubt that the armed group to which a person belongs fails to qualify for POW status, then the GPW would not require a tribunal to adjudicate the person’s claim to POW status by virtue of membership in that group.<sup>537</sup>

4.27.4 Tribunals to Assess Other Detainee Issues. By its terms, Article 5 of the GPW only addresses a person’s entitlement to POW status or treatment. However, an administrative process may be appropriate to address status questions besides entitlement to POW status or treatment, such as whether detainees are retained personnel or civilians. DoD practice has been to use Article 5 tribunals or similar administrative tribunals to address those issues.<sup>538</sup> For example, DoD used administrative tribunals to address a variety of detainee issues during detention operations in Viet Nam,<sup>539</sup> Panama,<sup>540</sup> the Persian Gulf in 1991,<sup>541</sup> Iraq in 2003,<sup>542</sup>

---

<sup>533</sup> See, e.g., *United States v. Lindh*, 212 F. Supp. 2d 541, 557-58 (E.D. Va. 2002) (assessing whether a captured Taliban fighter was entitled to POW status under GPW); *United States v. Noriega*, 808 F. Supp. 791, 794-96 (S.D. Fla. 1992) (assessing whether a captured Panamanian General was entitled to POW Status under GPW); *Stanislaus Krofan & Anor. v. Public Prosecutor*, (Singapore Federal Court, 1966), LEVIE, DOCUMENTS ON POWS 732-36 (assessing whether captured Indonesian saboteurs were entitled to POW status under GPW); *The Military Prosecutor v. Omar Mahmud Kassem and Others* (Israeli Military Court, Ramallah, Apr. 13, 1969), LEVIE, DOCUMENTS ON POWS 771-80 (assessing whether members of the Popular Front for the Liberation of Palestine were entitled to POW status under GPW).

<sup>534</sup> Denmark proposed the term “competent tribunal” instead of “military tribunal” because “[t]he laws of the Detaining Power may allow the settlement of this question by a civil court rather than by a military tribunal.” II-B FINAL RECORD OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 270.

<sup>535</sup> For examples of the procedures of past U.S. tribunals, see, e.g., U.S. CENTRAL COMMAND REGULATION 27-13, *Captured Persons: Determination of Eligibility for Enemy Prisoner of War Status* (Jan. 15, 1991); 1997 MULTI-SERVICE DETENTION REGULATION § 1-6.e.

<sup>536</sup> Jay S. Bybee, Assistant Attorney General, *Status of Taliban Forces Under Article 4 of the Third Geneva Convention of 1949*, Feb. 7, 2002, 26 OPINIONS OF THE OFFICE OF LEGAL COUNSEL 1, 9 (“Under Article 5 of GPW, ‘[s]hould any doubt arise as to whether persons ... belong to any of the categories enumerated in Article 4, such persons shall enjoy the protection of the present Convention until such time as their status has been determined by a competent tribunal.’ As we understand it, DoD in the past has presumed prisoners to be entitled to POW status until a tribunal determines otherwise. The presumption and tribunal requirement are triggered, however, only if there is ‘any doubt’ as to a prisoner’s Article 4 status.”) (amendments in original).

<sup>537</sup> Refer to § 4.6.1.1 (GPW 4A(2) Conditions Required on a Group Basis).

<sup>538</sup> See, e.g., 1997 MULTI-SERVICE DETENTION REGULATION § 1-6.e.(10) (boards making determinations pursuant to Article 5 of GPW may make, in addition to a determination that someone is an enemy prisoner of war, also determinations that an individual is retained personnel, an “innocent civilian,” or a civilian internee “who for reasons of operational security, or probable cause incident to criminal investigation, should be detained.”).

<sup>539</sup> In Viet Nam, the U.S. Army used panels of three officers assisted by a judge advocate advisor to assess the status of detainees. ## V – The Conduct of Hostilities

### Chapter Contents

- 5.1 Introduction
- 5.2 Overview of Rules for the Protection of Civilians
- 5.3 Assessing Information Under the Law of War
- 5.4 Rules on Conducting Assaults, Bombardments, and Other Attacks
- 5.5 Discrimination in Conducting Attacks
- 5.6 Military Objectives
- 5.7 Combatants
- 5.8 Civilians Taking a Direct Part in Hostilities
- 5.9 Persons Placed Hors de Combat
- 5.10 Proportionality in Conducting Attacks
- 5.11 Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects
- 5.12 Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm
- 5.13 Attacks on Facilities, Works, or Installations Containing Dangerous Forces
- 5.14 Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack
- 5.15 undefended Cities, Towns, and Villages
- 5.16 Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations
- 5.17 Seizure and Destruction of Enemy Property
- 5.18 Protection of Cultural Property During Hostilities
- 5.19 Sieges and Encircled Areas
- 5.20 Starvation
- 5.21 Overview of Good Faith, Perfidy, and Ruses
- 5.22 Treachery or Perfidy Used to Kill or Wound
- 5.23 Use of Enemy Flags, Insignia, and Military Uniforms
- 5.24 Improper Use of Certain Signs
- 5.25 Ruses of War and Other Lawful Deceptions
- 5.26 Non-Forcible Means and Methods of Warfare
- 5.27 Prohibition Against Compelling Enemy Nationals to Take Part in the Operations of War Directed Against Their Own Country

### 5.1 INTRODUCTION

The right of States engaged in armed conflict to adopt means and methods of warfare is not unlimited.<sup>1</sup> This Chapter addresses the law of war rules on the conduct of hostilities during international armed conflict, such as the rules applicable to conducting attacks, the seizure and destruction of enemy property, and deception.

---

<sup>1</sup> Refer to § 2.6.2.1 (Acceptance That Belligerent Rights Are Not Unlimited).

This Chapter, however, does not address all rules related to the conduct of hostilities. For example, rules on the use of certain types of weapons are addressed in Chapter VI.<sup>2</sup> In addition, later chapters address conduct of hostilities rules and issues specific to the Naval (Chapter XIII), Air (Chapter XIV), Space (Chapter XIV), and Cyber (Chapter XVI) domains, and Chapter XVIII addresses non-international armed conflict.<sup>3</sup>

Violations of the rules in the conduct of hostilities may be violations of criminal law, although it is not a purpose of this Chapter to address liability under criminal law.

5.1.1 Notes on Terminology – “Means and Methods of Warfare”. In general, *method of warfare* has referred to how warfare is conducted, while *means of warfare* has referred to weapons or devices used to conduct warfare.<sup>4</sup>

For example, an analysis of a *method of warfare* might consider the way in which an artillery projectile may be employed, particularly where employment could have an adverse effect on the civilian population. On the other hand, an analysis of the legality of the *means of warfare* might consider the legality of the way in which the artillery projectile is designed to kill or injure enemy combatants.<sup>5</sup>

Although the terms *means of warfare* and *methods of warfare* lack an established, specific meaning, in some cases, the phrase “method of warfare” may be a term of art in a legal instrument that has been specifically interpreted by the United States. For example, the Chemical Weapons Convention obligates Parties to undertake not to use riot control agents as a “method of warfare,” and the United States has interpreted that prohibition not to include certain uses of riot control agents.<sup>6</sup>

#### 5.1.2 Implementation of Law of War Obligations in the Conduct of Hostilities During

---

<sup>2</sup> Refer to § 6.5.1 (Certain Types of Weapons With Specific Rules on Use).

<sup>3</sup> Refer to § 13.3 (Overview of Rules for Naval Engagements); § 14.8 (Attacks Against Military Objectives in the Air); § 14.9 (Air Attacks Against Military Objectives on the Ground); § 16.5 (Cyber Operations and Jus in Bello); § 17.7 (Rules on Conducting Attacks in NIAC).

<sup>4</sup> See, e.g., W. Hays Parks, Special Assistant to The Judge Advocate General of the Army for Law of War Matters, *Memorandum of Law: Travaux Préparatoires and Legal Analysis of Blinding Laser Weapons Protocol*, reprinted in THE ARMY LAWYER 33, 34-35 (Jun. 1997) (“*Method of warfare* is one of two historic phrases in the law of war. Although neither phrase has an agreed definition, *means of warfare* traditionally has been understood to refer to the effect of weapons in their use against combatants, while *method of warfare* refers to the way weapons are used in a broader sense.”); ICRC AP COMMENTARY 621 (¶1957) (“The term ‘means of combat’ or ‘means of warfare’ (*cf.* Article 35 – *Basic rules*) generally refers to the weapons being used, while the expression ‘methods of combat’ generally refers to the way in which such weapons are used.”).

<sup>5</sup> See W. Hays Parks, Special Assistant to The Judge Advocate General of the Army for Law of War Matters, *Memorandum of Law: Travaux Préparatoires and Legal Analysis of Blinding Laser Weapons Protocol*, reprinted in THE ARMY LAWYER 33, 35 (Jun. 1997) (“Thus, *means* considers the legality of the way in which a projectile or its fragments, for example, kill or injure combatants. As an illustration, Protocol I of the UNCCW makes the use of fragments not detectable by X-ray a prohibited *means of warfare*. In contrast, *method* weighs the way in which weapons may be employed, particularly where employment may have an adverse effect on civilians not taking a direct part in the hostilities.”).

<sup>6</sup> Refer to § 6.16.2 (Prohibition on Use of Riot Control Agents as a Method of Warfare).

Military Operations. The law of war rules for the conduct of hostilities have been implemented during military operations through rules of engagement and other military orders.<sup>7</sup>

5.1.2.1 Applying Standards in the Conduct of Hostilities That Pose More Restrictions on Military Operations and That Are More Protective of Civilians Than Required By the Law of War. U.S. military operations are routinely subject to more restrictions and apply standards that are more protective of civilians than required by the law of war.<sup>8</sup> For example, military commanders often seek to reduce the risk of civilian casualties by taking additional precautions even when such measures are not required by the law of war.<sup>9</sup> Similarly, there are cases in which, for military or policy reasons, an attack is not conducted, even though the attack would be legally permissible.<sup>10</sup>

As with other cases in which a higher standard is applied as a matter of policy, violations of such standards are not necessarily violations of the law of war.<sup>11</sup>

5.1.2.2 Applicability of International Obligations to Persons With the Domestic Authority to Implement the Obligations. As with other aspects of the law of war, the persons

---

<sup>7</sup> Refer to § 1.6.5 (Rules of Engagement (ROE)); § 18.7 (Instructions, Regulations, and Procedures to Implement and Enforce the Law of War).

<sup>8</sup> For example, Executive Order 13732, *United States Policy on Pre- and Post-Strike Measures To Address Civilian Casualties in U.S. Operations Involving the Use of Force*, 81 FEDERAL REGISTER 44485, § 1 (Jul. 1, 2016) (“The protection of civilians is fundamentally consistent with the effective, efficient, and decisive use of force in pursuit of U.S. national interests. Minimizing civilian casualties can further mission objectives; help maintain the support of partner governments and vulnerable populations, especially in the conduct of counterterrorism and counterinsurgency operations; and enhance the legitimacy and sustainability of U.S. operations critical to our national security. As a matter of policy, the United States therefore routinely imposes certain heightened policy standards that are more protective than the requirements of the law of armed conflict that relate to the protection of civilians.”).

<sup>9</sup> For example, Brian Egan, Legal Adviser, Department of State, *Remarks to the American Society of International Law: International Law, Legal Diplomacy, and the Counter-ISIL Campaign*, Apr. 1, 2016 (“As a matter of international law, the United States is bound to adhere to the law of armed conflict. In many cases, the United States imposes standards on its direct action operations that go beyond the requirements of the law of armed conflict. For example, the U.S. military may impose an upper limit as a matter of policy on the anticipated number of non-combatant casualties that is much lower than that which would be lawful under the rule that prohibits attacks that are expected to cause excessive incidental harm.”).

<sup>10</sup> For example, FINAL REPORT ON THE PERSIAN GULF WAR 615 (“Similar actions were taken by the Government of Iraq to use cultural property to protect legitimate targets from attack; a classic example was the positioning of two fighter aircraft adjacent to the ancient temple of Ur (as depicted in the photograph in Volume II, Chapter VI, ‘Off Limits Targets’ section) on the theory that Coalition respect for the protection of cultural property would preclude the attack of those aircraft. While the law of war permits the attack of the two fighter aircraft, with Iraq bearing responsibility for any damage to the temple, Commander-in-Chief, Central Command (CINCCENT) elected not to attack the aircraft on the basis of respect for cultural property and the belief that positioning of the aircraft adjacent to Ur (without servicing equipment or a runway nearby) effectively had placed each out of action, thereby limiting the value of their destruction by Coalition air forces when weighed against the risk of damage to the temple. Other cultural property similarly remained on the Coalition no-attack list, despite Iraqi placement of valuable military equipment in or near those sites.”).

<sup>11</sup> Refer to § 18.7.2.3 (Setting Higher Standards as a Matter of Policy).

within a party to a conflict who are responsible for implementing an obligation, are those persons with the authority to make the decisions and judgments required by the law of war.<sup>12</sup>

For example, the decisions and judgments required by the principle of proportionality normally require authority over military operations, and ordinarily would not require military personnel to take actions, such as providing warnings, when a superior commander has already determined that such actions are not feasible.<sup>13</sup> As another example, a pilot generally would be entitled to rely on the determination by headquarters that a given target is, in fact, a military objective.<sup>14</sup>

5.1.3 Principles for the Conduct of Hostilities. The principles that provide the foundation for the law of war are discussed in Chapter II, and these principles apply to the conduct of hostilities. As noted in Chapter II, specific rules on the conduct of hostilities are derived from, and must be interpreted consistent with, the basic principles that underlie the law of war.<sup>15</sup> Moreover, where no specific rule applies, law of war principles provide a general guide for conduct during war, including the conduct of hostilities.<sup>16</sup>

## 5.2 OVERVIEW OF RULES FOR THE PROTECTION OF CIVILIANS

The protection of civilians<sup>17</sup> against the harmful effects of hostilities is one of the main purposes of the law of war.<sup>18</sup> Many of the rules for the protection of civilians are derived from the principles of distinction and proportionality.<sup>19</sup> Specific rules for the protection of civilians may be grouped into two categories: (1) essentially negative duties to respect civilians and to refrain from directing military operations against them; and (2) affirmative duties to take feasible precautions to protect civilians and other protected persons and objects.

5.2.1 Responsibility of the Party Controlling Civilian Persons and Objects. The party controlling civilians and civilian objects has the primary responsibility for the protection of civilians and civilian objects.<sup>20</sup> The party controlling the civilian population generally has the

---

<sup>12</sup> Refer to § 18.3.1.1 (Implementation of International Obligations by Persons With the Authority to Make the Necessary Decisions and Judgments Required by International Law).

<sup>13</sup> Refer to § 5.10.2 (Responsibility of Commanders for Implementing the Principle of Proportionality in Conducting Attacks).

<sup>14</sup> ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶84 (Jun. 13, 2000) (“The building hit was clearly a civilian object and not a legitimate military objective. ... It is the opinion of the committee that the aircrew involved in the attack should not be assigned any responsibility for the fact they were given the wrong target ...”).

<sup>15</sup> Refer to § 2.1.2.1 (Law of War Principles as an Aid in Interpreting and Applying Law of War Rules).

<sup>16</sup> Refer to § 2.1.2.2 (Law of War Principles as a General Guide).

<sup>17</sup> Refer to § 4.8.1.5 (General Usage of “Civilian” in This Manual).

<sup>18</sup> Refer to § 1.3.4 (Purposes of the Law of War).

<sup>19</sup> Refer to § 2.5 (Distinction); § 2.4 (Proportionality).

<sup>20</sup> See J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Senator Edward Kennedy, Sept. 22, 1972, *reprinted in* 67 AJIL 122 (1973) (“A summary of the laws of armed conflict, in the broadest terms, reveals certain general principles including the following: ... (c). That a distinction must be made at all times between

greater opportunity to minimize risk to civilians.<sup>21</sup> Civilians also may share in the responsibility to take precautions for their own protection.<sup>22</sup> For example, civilians may decide to take measures for their own protection upon receiving a warning to stay away from military objectives.<sup>23</sup>

5.2.2 Essentially Negative Duties to Respect Civilians and to Refrain From Directing Military Operations Against Them. In general, military operations must not be directed against enemy civilians.<sup>24</sup> In particular:

- Civilians must not be made the object of attack;<sup>25</sup>
- Military objectives may not be attacked when the expected incidental loss of civilian life,

---

persons taking part in the hostilities and members of the civilian population to the effect that the civilians be spared as much as possible. ... The principle in (c) addresses primarily the Party exercising control over members of the civilian population.”); BOTHE, PARTSCH, & SOLF, *NEW RULES* 284 (AP I art. 48, ¶2.2) (explaining that “an important share of the responsibility for implementing the principle of distinction rests on the Party which controls the civilian population.”); United States, *Statement on Ratification of the 1954 Hague Cultural Property Convention*, Mar. 13, 2009, 2575 UNTS 7, 8 (“It is the understanding of the United States of America that, as is true for all civilian objects, the primary responsibility for protection of cultural objects rests with the party controlling that property, to ensure that it is properly identified and that it is not used for an unlawful purpose.”).

<sup>21</sup> FINAL REPORT ON THE PERSIAN GULF WAR 614 (“In the effort to minimize collateral civilian casualties, a substantial responsibility for protection of the civilian population rests with the party controlling the civilian population. Historically, and from a common sense standpoint, the party controlling the civilian population has the opportunity and the responsibility to minimize the risk to the civilian population through the separation of military objects from the civilian population, evacuation of the civilian population from near immovable military objects, and development of air raid precautions. Throughout World War II, for example, both Axis and Allied nations took each of these steps to protect their respective civilian populations from the effects of military operations.”).

<sup>22</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2063 (“The obligation of distinguishing combatants and military objectives from civilians and civilian objects is a shared responsibility of the attacker, defender, and the civilian population as such. An attacker must exercise reasonable precautions to minimize incidental or collateral injury to the civilian population, consistent with mission accomplishment and allowable risk to the attacking force. A defender must exercise reasonable precaution to separate the civilian population and civilian objects from military objectives. Civilians must exercise reasonable precaution to remove themselves from the vicinity of military objectives or military operations. The force that has control over the civilians has an obligation to place them in a safe place.”); Brigadier General George B. Davis, *Working Memoranda (Confidential for the United States Delegates): The Second Peace Conference (Paragraph 2 of Programme), The Rules of War on Land*, 28 (1907) (“It seems hardly necessary to say, however, that if any defense is attempted or if a town is occupied or held by the armed forces of the enemy, it ceases to be undefended and, for that reason, may be attacked or fired upon. The inhabitants of such a place, so soon as a garrison is established or military defense is attempted, become charged with the knowledge that the town is defended and, as such, liable to attack, and, if they desire to secure an immunity from acts of war, should remove their families and belongings from the zone of active military operations.”).

<sup>23</sup> Refer to § 5.11.5 (Effective Advance Warning Before an Attack That May Affect the Civilian Population).

<sup>24</sup> Consider AP I art. 48 (“In order to ensure respect for and protection of the civilian population and civilian objects, the Parties to the conflict shall at all times distinguish between the civilian population and combatants and between civilian objects and military objectives and accordingly shall direct their operations only against military objectives.”).

<sup>25</sup> Refer to § 5.5.2 (Persons, Objects, and Locations That Are Protected From Being Made the Object of Attack).

injury to civilians, and damage to civilian objects would be excessive in relation to the concrete and direct military advantage expected to be gained;<sup>26</sup>

- Civilians must not be used as shields or as hostages;<sup>27</sup> and
- Measures of intimidation or terrorism against the civilian population are prohibited, including acts or threats of violence, the primary purpose of which is to spread terror among the civilian population.<sup>28</sup>

5.2.2.1 *Non-Violent Measures That Are Militarily Necessary*. The principle that military operations must not be directed against civilians does not prohibit military operations short of violence that are militarily necessary. For example, such operations may include:

- stopping and searching civilians for weapons and to verify that they are civilians;<sup>29</sup>
- temporarily detaining civilians for reasons of mission accomplishment, self-defense, or for their own safety;<sup>30</sup>

---

<sup>26</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>27</sup> Refer to § 5.16 (Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations).

<sup>28</sup> Refer to § 10.5.3.2 (Collective Penalties and Measures of Intimidation or Terrorism).

<sup>29</sup> For example, 101st Airborne ROE Card, Iraq (2003), reprinted in CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, I LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 315 (2004) ("You may stop civilians and check their identities, search for weapons and seize any found."). Compare § 10.6.1 (General Authority of a Belligerent to Search and Secure Protected Persons and Their Property).

<sup>30</sup> For example, Detainee Review Procedures at Bagram Theater Internment Facility (BTIF), Afghanistan, enclosure to Phillip Carter, Deputy Assistant Secretary of Defense for Detainee Policy, Letter to Chairman Carl Levin, Jul. 14, 2009 ("(U) U.S. Forces operating under Operation Enduring Freedom (OEF) authority are authorized to detain persons temporarily, consistent with the laws and customs of war (e.g., in self-defense or for force protection."); Coalition Forces Land Component Command (CFLCC) Rules of Engagement (ROE) Card, Iraq (2003), reprinted in CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, I LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 314 (2004) ("Detain civilians if they interfere with mission accomplishment or if required for self-defense."); 101st Airborne ROE Card, Iraq (2003), reprinted in CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, I LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 315 (2004) ("Detain civilians when necessary to accomplish your mission or for their own safety."); CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, LAW AND MILITARY OPERATIONS IN KOSOVO, 1999-2001: LESSONS LEARNED FOR JUDGE ADVOCATES 102-03 (2001) ("Based on the KFOR [Kosovo Force] guidance, Task Force Falcon instructed U.S. soldiers and Marines to detain persons who committed criminal misconduct under a familiar standard, the Uniform Code of Military Justice (UCMJ). This was the standard to be applied during each of the 1,300 patrols that U.S. soldiers conducted per week in Kosovo. If soldiers or Marines witnessed an act that would be a crime under the UCMJ, they arrested the wrongdoer. COMKFOR and the SRSF augmented crimes under the military code with mission-specific unauthorized acts, such as weapons, uniform, and curfew violations. Soldiers were also authorized to detain local citizens who were considered a threat to the military or to the overall mission.").

- collecting intelligence from civilians, including interrogating civilians;<sup>31</sup>
- restricting the movement of civilians or directing their movement away from military operations for their own protection;<sup>32</sup> or
- seeking to influence enemy civilians with propaganda.<sup>33</sup>

5.2.2.2 *Military Operations Intended to Benefit Civilians.* The principle that military operations not be directed against civilians does not preclude military operations intended to benefit civilians. Such operations may include humanitarian assistance operations, noncombatant evacuation operations, civil affairs operations, or civil-military operations. During counter-insurgency operations, military operations to protect civilians and to help obtain their support may be particularly important.<sup>34</sup>

5.2.3 Affirmative Duties to Take Feasible Precautions for the Protection of Civilians and Other Protected Persons and Objects. Parties to a conflict must take feasible precautions to reduce the risk of harm to the civilian population and other protected persons and objects.<sup>35</sup> Feasible precautions to reduce the risk of harm to civilians and civilian objects must be taken when planning and conducting attacks.<sup>36</sup> Feasible precautions should be taken to mitigate the burden on civilians when seizing or destroying enemy property.<sup>37</sup> It is specifically provided that feasible precautions must be taken in connection with certain types of weapons.<sup>38</sup> Feasible precautions to reduce the risk of harm to civilians must also be taken by the party subject to

---

<sup>31</sup> Refer to § 5.26.2 (Information Gathering).

<sup>32</sup> Refer to § 5.14.2 (Removing Civilians and Civilian Objects From the Vicinity of Military Objectives).

<sup>33</sup> Refer to § 5.26.1.2 (Propaganda Generally Permissible).

<sup>34</sup> Refer to § 17.5.2.1 (Positioning Military Forces Near the Civilian Population to Win Their Support and to Protect Them).

<sup>35</sup> See, e.g., Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 426-27 (1987) (“We support the principle that all practicable precautions, taking into account military and humanitarian considerations, be taken in the conduct of military operations to minimize incidental death, injury, and damage to civilians and civilian objects, and that effective advance warning be given of attacks which may affect the civilian population, unless circumstances do not permit.”); U.N. GENERAL ASSEMBLY RESOLUTION 2675, *Basic Principles for the Protection of Civilian Populations in Armed Conflict*, U.N. Doc. A/8028 (Dec. 9, 1970) (“In the conduct of military operations, every effort should be made to spare civilian populations from the ravages of war, and all necessary precautions should be taken to avoid injury, loss or damage to civilian populations.”). Refer to § 5.18.4 (Other Feasible Precautions to Reduce the Risk of Harm to Cultural Property).

<sup>36</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>37</sup> Refer to § 5.17.5 (Feasible Precautions Should Be Taken to Mitigate the Burden on Civilians).

<sup>38</sup> Refer to § 5.2.3.4 (Requirements to Take Precautions Regarding Specific Weapons).

attack.<sup>39</sup>

5.2.3.1 *Feasible Precautions – Notes on Terminology.* Although this manual primarily uses “feasible,” other adjectives have been used to describe the obligation to take feasible precautions during armed conflict. The words “practicable,”<sup>40</sup> “reasonable,”<sup>41</sup> “due,”<sup>42</sup> and “necessary”<sup>43</sup> have been used to describe this obligation.

Some sources may distinguish between whether a precaution is “feasible” or “reasonable” or “practical.”<sup>44</sup> It is also possible to use these words interchangeably with one another, *e.g.*, such that feasible precautions are reasonable precautions.<sup>45</sup>

---

<sup>39</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>40</sup> Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 426-27 (1987) (“We support the principle that all practicable precautions, taking into account military and humanitarian considerations, be taken in the conduct of military operations to minimize incidental death, injury, and damage to civilians and civilian objects, and that effective advance warning be given of attacks which may affect the civilian population, unless circumstances do not permit.”).

<sup>41</sup> See, *e.g.*, *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2063 (“A defender must exercise reasonable precaution to separate the civilian population and civilian objects from military objectives.”); 1956 FM 27-10 (Change No. 1 1976) ¶41 (“Those who plan or decide upon an attack, therefore, must take all reasonable steps to ensure not only that the objectives are identified as military objectives or defended places within the meaning of the preceding paragraph but also that these objectives may be attacked without probable losses in lives and damage to property disproportionate to the military advantage anticipated.”); Neville Chamberlain, Prime Minister, United Kingdom, *Statement before the House of Commons*, Jun. 21, 1938, HANSARD, 337 HOUSE OF COMMONS DEBATES §§ 937 (“[R]easonable care must be taken in attacking those military objectives so that by carelessness a civilian population in the neighbourhood is not bombed.”).

<sup>42</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 129 (“The United States reserves the right to use other devices (as defined in Article 2(5) of the Amended Mines Protocol) to destroy any stock of food or drink that is judged likely to be used by an enemy military force, if due precautions are taken for the safety of the civilian population.”).

<sup>43</sup> U.N. GENERAL ASSEMBLY RESOLUTION 2675, *Basic Principles for the Protection of Civilian Populations in Armed Conflict*, U.N. Doc. A/8028 (Dec. 9, 1970) (“In the conduct of military operations, every effort should be made to spare civilian populations from the ravages of war, and all necessary precautions should be taken to avoid injury, loss or damage to civilian populations.”); HAGUE IX art. 5 (“In bombardments by naval forces all the necessary measures must be taken by the commander to spare as far as possible sacred edifices, buildings used for artistic, scientific, or charitable purposes, historic monuments, hospitals, and places where the sick or wounded are collected, on the understanding that they are not used at the same time for military purposes.”).

<sup>44</sup> ICRC AP COMMENTARY 688 (¶2230) (“It should be noted that ‘all reasonable precautions’ must be taken, which is undoubtedly slightly different from and a little less far-reaching than the expression ‘take all feasible precautions’, used in paragraph 2. As the nuance is tenuous, the purpose of the provision appears to be to reaffirm the rules that exist to protect civilians in such situations.”).

<sup>45</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN

Insofar as these words are used to describe the legal obligation to take precautions, these words are used as terms of art that do not necessarily take their ordinary meaning and are subject to a substantial degree of interpretation and discretion in their application to a given circumstance.

Thus, this manual does not distinguish between, for example, the obligation to take “reasonable” precautions versus the obligation to take “feasible” precautions versus the obligation to take “practical” precautions. This manual uses “feasible” to mean the standard of precautions that are required by the law of war, and that standard is explained in more detail in this section.

Some sources describe the obligation to take precautions as one in which “all feasible” precautions must be taken or that “everything feasible” must be done. Stating the requirement in terms of “all feasible” precautions could entail articulating a narrower interpretation of what is considered “feasible” rather than articulating a difference in what the law ultimately requires. In any event, as discussed below, the obligation to take feasible precautions does not require everything that is capable of being done – a standard that would be almost impossible to meet if interpreted literally and that is inconsistent with the definition of feasible precautions that provides for taking into account humanitarian and military considerations. In addition, the fact that a precaution was taken does not necessarily mean that taking the precaution was required as a matter of law.

5.2.3.2 *What Precautions Are Feasible.* The standard for what precautions must be taken is one of due regard or diligence, not an absolute requirement to do everything possible.<sup>46</sup> A wanton disregard for civilian casualties or harm to other protected persons and objects is clearly prohibited.<sup>47</sup>

Feasible precautions are those that are practicable or practically possible, taking into account all circumstances ruling at the time, including humanitarian and military

---

INTERNATIONAL LAW 1991-1999 2057, 2063 (“‘Feasible precautions’ are reasonable precautions, consistent with mission accomplishment and allowable risk to attacking forces.”).

<sup>46</sup> See also Neville Chamberlain, Prime Minister, United Kingdom, *Statement before the House of Commons*, Jun. 21, 1938, HANSARD, 337 HOUSE OF COMMONS DEBATES §§ 937-939 (“[R]easonable care must be taken in attacking those military objectives so that by carelessness a civilian population in the neighbourhood is not bombed. ... I say that reasonable care must be taken, in attacking military objectives, not to go outside those objectives, but it is extremely difficult in practice to determine whether in fact the dropping of bombs which have killed civilians in the neighbourhood of military objectives is the result of want of care or not. Suppose a man makes a bad shot, which is not at all unlikely when machines are going at over 300 miles an hour and when, as I am informed, in taking aim you have to release the bomb miles away from its objective—it seems to me that it is extremely difficult to lay down exactly the point at which reasonable care turns into unreasonable want of care.”).

<sup>47</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2064 (“While it is difficult to weigh the possibility of collateral civilian casualties on a target-by-target basis, minimization of collateral civilian casualties is a continuing responsibility at all levels of the targeting process. Combat is a give-and-take between attacker and defender, and collateral civilian casualties are likely to occur notwithstanding the best efforts of either party. What is prohibited is wanton disregard for possible civilian casualties.”).

considerations.<sup>48</sup> These circumstances may include:

- the effect of taking the precaution on mission accomplishment;<sup>49</sup>
- whether taking the precaution poses a risk to one's own forces or presents other security risks;
- the likelihood and degree of humanitarian benefit from taking the precaution;
- the cost of taking the precaution, in terms of time, money, or other resources; or
- whether taking the precaution forecloses alternative courses of action.

For example, a commander may determine that a precaution would not be feasible because it would result in increased operational risk (*i.e.*, a risk of failing to accomplish the

---

<sup>48</sup> See CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(5) (“Feasible precautions’ are those precautions which are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations.”); CCW AMENDED MINES PROTOCOL art. 3(10) (“Feasible precautions are those precautions which are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations.”); CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 5(1) (“Feasible precautions are those precautions which are practicable or practicably possible, taking into account all circumstances ruling at the time, including humanitarian and military considerations.”). *Cf.* United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 76 (“The United Kingdom understands the term ‘feasible’ as used in the Protocol to mean that which is practicable or practically possible, taking into account all circumstances ruling at the time, including humanitarian and military considerations.”); Canada, *Statement on Ratification of AP I*, Nov. 20, 1990, 1591 UNTS 462, 464 (“It is the understanding of the Government of Canada that, in relation to Articles 41, 56, 57, 58, 78 and 86 the [word] ‘feasible’ means that which is practicable or practically possible, taking into account all circumstances ruling at the time, including humanitarian and military considerations.”); Germany, *Statement on Ratification of AP I*, Feb. 14, 1991, 1607 UNTS 526, 529 (“The Federal Republic of Germany understands the word ‘feasible’ in Articles 41, 56, 57, 58, 78 and 86 of Additional Protocol I to mean that which is practicable or practically possible, taking into account all circumstances ruling at the time including humanitarian and military considerations.”); Netherlands, *Statement on Ratification of AP I*, Jun. 26, 1987, 1477 UNTS 300 (“With regard to Article 41, paragraph 3, Article 56, paragraph 2, Article 57, paragraph 2, Article 58, Article 78, paragraph 1, and Article 86, paragraph 2 of Protocol I: It is the understanding of the Government of the Kingdom of the Netherlands that the word ‘feasible’ means that which is practicable or practically possible, taking into account all circumstances ruling at the time, including humanitarian and military considerations.”).

<sup>49</sup> VI OFFICIAL RECORDS OF THE CDDH 241 (CDDH/SR.42, Explanations of Vote: United States) (“It is the understanding of the United States Government that the word ‘feasible’ when used in draft Protocol I, for example in Articles 50 and 51, refers to that which is practicable or practically possible, taking into account all circumstances at the time, including those relevant to the success of military operations.”); VI OFFICIAL RECORDS OF THE CDDH 226 (CDDH/SR.42, Explanations of Vote: Germany) (“Finally, we interpret the word ‘feasible’ [in draft article 50 of Protocol I] as meaning what is practicable or practically possible, taking into account all circumstances at the time, including those relevant to the success of military operations.”); VI OFFICIAL RECORDS OF THE CDDH 211 (CDDH/SR.42, ¶41) (“Mr. Soysal (Turkey) said that as far as his delegation was concerned, the word ‘feasible’ in Article 50 and other articles should be interpreted as related to what was practicable, taking into account all the circumstances at the time and those relevant to the success of military operations.”); VI OFFICIAL RECORDS OF THE CDDH 224 (CDDH/SR.42, Explanations of Vote: Canada) (“It is the understanding of the Canadian delegation that the word ‘feasible’, when used in this Protocol, for example, in Articles 50 and 51, refers to that which is practicable or practically possible, taking into account all circumstances existing at the relevant time, including those circumstances relevant to the success of military operations.”).

mission) or an increased risk of harm to his or her forces.<sup>50</sup>

Similarly, taking a precaution would not be required if it is assessed not to yield a humanitarian benefit. For example, issuing a warning before an attack would not be required when only military objectives are expected to be harmed and civilians are not present.<sup>51</sup> Moreover, it would not be required to use distinctive emblems to identify civilians and civilian objects as such, if enemy forces are likely to use that information to direct attacks against those civilians and civilian objects.<sup>52</sup>

Since what precautions are feasible depends greatly on the context and other military considerations,<sup>53</sup> it would be inaccurate to conclude that specific precautions are required as a general rule. For example, there is not a general requirement to use precision-guided munitions.<sup>54</sup> Nonetheless, military commanders must make reasonable efforts to reduce the risk of harm to civilians and civilian objects.

5.2.3.3 *The Taking of Precautions and Law, Policy, and Practice.* There may be questions about the extent to which precautions are legally required or are instead policy decisions.

The obligation to take feasible precautions is a legal requirement. However, the determination of whether a precaution is feasible involves significant policy, practical, and military judgments, which are committed to the responsible commander to make in good faith based on the available information. In assessing whether the obligation to take feasible precautions has been satisfied after the fact, it will be important to assess the situation that the commander confronted at the time of the decision and not to rely on hindsight.

As discussed above, it is not the case that the legal requirement to take feasible precautions requires whatever may be done. Rather, it is possible for precautions to be taken, as a matter of practice or policy, that are not required as a matter of law, and the U.S. military frequently has done so.

---

<sup>50</sup> *U.S. Comments on the International Committee of the Red Cross's Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2063 (“‘Feasible precautions’ are reasonable precautions, consistent with mission accomplishment and allowable risk to attacking forces. While collateral damage to civilian objects should be minimized, consistent with the above, collateral damage to civilian objects should not be given the same level of concern as incidental injury to civilians. Measures to minimize collateral damage to civilian objects should not include steps that will place U.S. and allied lives at greater or unnecessary risk.”).

<sup>51</sup> *Refer to* § 5.11.5 (Effective Advance Warning Before an Attack That May Affect the Civilian Population).

<sup>52</sup> *Refer to* § 5.14.4 (Using Distinctive and Visible Signs to Identify Protected Persons and Objects as Such).

<sup>53</sup> *See, e.g.*, VI OFFICIAL RECORDS OF THE CDDH 231 (CDDH/SR.42, Explanations of Vote: Italy) (“In several places Article 50 speaks of taking all ‘feasible’ precautions. This term is basic to the whole structure of Article 50. It indicates that the obligations it imposes are conditional on the actual circumstances really allowing the proposed precautions to be taken, on the basis of the available information and the imperative needs of national defence. I would like to emphasize that all the foregoing comments relate to all the articles in the section of the Protocol concerned, in particular Article 46 as regards the military advantage expected and Articles 46 and 51 as regards the meaning of the word ‘feasible’.”).

<sup>54</sup> *Refer to* § 5.11.6 (Weaponizing (E.g., Selecting Appropriate Weapons, Aim Points)).

In this connection, it should also be noted that mere poor military judgment (such as mistakes or accidents in conducting attacks that result in civilian casualties) is not by itself a violation of the obligation to take precautions.

5.2.3.4 Requirements to Take Precautions Regarding Specific Weapons. In addition to the general obligation to take feasible precautions to reduce the risk of harm to the civilian population and other protected persons and objects, it is specifically provided that precautions be taken in connection with certain types of weapons:

- mines, booby-traps, or other devices;<sup>55</sup>
- incendiary weapons;<sup>56</sup>
- laser systems;<sup>57</sup> and
- explosive ordnance.<sup>58</sup>

5.2.3.5 AP I Obligation to Take Constant Care to Spare Civilians and Civilian Objects. Parties to AP I have agreed that “[i]n the conduct of military operations, constant care shall be taken to spare the civilian population, civilians and civilian objects.”<sup>59</sup> Although this obligation is susceptible to a range of interpretations, Parties to AP I may also interpret it in a manner that is consistent with the discussion in this section.

### 5.3 ASSESSING INFORMATION UNDER THE LAW OF WAR

Commanders and other decision-makers must make decisions in good faith and based on the information available to them. Even when information is imperfect or lacking (as will frequently be the case during armed conflict), commanders and other decision-makers may direct and conduct military operations, so long as they make a good faith assessment of the information that is available to them at that time.<sup>60</sup>

5.3.1 Law of War Rules Often Depend on Difficult Factual Assessments. Many of the rules for the conduct of hostilities require determinations of fact that may be difficult to make.

The special circumstances of armed conflict often make an accurate determination of

---

<sup>55</sup> Refer to § 6.12.5.3 (Obligation to Take Feasible Precautions to Protect Civilians From the Effects of Mines, Booby-Traps, and Other Devices).

<sup>56</sup> Refer to § 6.14.3 (Restrictions on the Use of Incendiary Weapons).

<sup>57</sup> Refer to § 6.15.2 (Feasible Precautions in the Employment of Laser Systems to Avoid the Incident of Permanent Blindness).

<sup>58</sup> Refer to § 6.19.2 (Using Explosive Ordnance); § 6.19.3 (Abandoning Explosive Ordnance).

<sup>59</sup> AP I art. 57(1).

<sup>60</sup> APPENDIX TO 1985 CJCS MEMO ON API 52 (“Commanders and other military personnel who make decisions in the fog of war must do so in good faith and on the basis of whatever information they have available at the time. Such decisions will almost never be free of ‘doubt,’ either subjective or objective.”).

facts very difficult.<sup>61</sup> For example, combatants must make decisions while enemy forces are attempting to attack them<sup>62</sup> and while enemy forces are seeking to deceive them.<sup>63</sup> In addition, the importance of prevailing during armed conflict<sup>64</sup> often justifies taking actions based upon limited information that would be considered unreasonable outside armed conflict.<sup>65</sup>

Thus, for example, it may be difficult to discern whether a person is a combatant, a civilian, or a civilian taking a direct part in hostilities. Similarly, it may be difficult to assess the degree to which an object makes an effective contribution to the adversary's military action or to assess the concrete and direct military advantage anticipated from an attack.

5.3.2 Decisions Must Be Made in Good Faith and Based on Information Available at the Time. Decisions by military commanders or other persons responsible for planning, authorizing, or executing military action must be made in good faith and based on their assessment of the information available to them at the time.<sup>66</sup> A large number of States have recognized this principle.<sup>67</sup> This principle has also been reflected in the decisions of courts assessing individual

---

<sup>61</sup> Refer to § 1.4.2.2 (Nature of War – Limited and Unreliable Information – “Fog of War”).

<sup>62</sup> Cf. *Brown v. United States*, 256 U.S. 335, 343 (1921) (“Detached reflection cannot be demanded in the presence of an uplifted knife. Therefore in this Court, at least, it is not a condition of immunity that one in that situation should pause to consider whether a reasonable man might not think it possible to fly with safety or to disable his assailant rather than to kill him.”).

<sup>63</sup> Refer to § 5.25 (Ruses of War and Other Lawful Deceptions).

<sup>64</sup> Refer to § 1.4.1 (Object of War).

<sup>65</sup> *Korematsu v. United States*, 323 U.S. 214, 244 (1944) (Jackson, J., dissenting) (“The very essence of the military job is to marshal physical force, to remove every obstacle to its effectiveness, to give it every strategic advantage. Defense measures will not, and often should not, be held within the limits that bind civil authority in peace. No court can require such a commander in such circumstances to act as a reasonable man; he may be unreasonably cautious and exacting. Perhaps he should be.”).

<sup>66</sup> See *United States, Statement on Consent to Be Bound by CCW Protocol III on Incendiary Weapons*, Jan. 21, 2009, 2562 UNTS 36, 37 (“[A]ny decision by any military commander, military personnel, or any other person responsible for planning, authorizing or executing military action shall only be judged on the basis of that person’s assessment of the information reasonably available to the person at the time the person planned, authorized, or executed the action under review, and shall not be judged on the basis of information that comes to light after the action under review was taken.”).

<sup>67</sup> See, e.g., *Australia, Statement on Ratification of AP I*, Jun. 21, 1991, 1642 UNTS 473 (“In relation to Articles 51 to 58 inclusive it is the understanding of Australia that military commanders and others responsible for planning, deciding upon, or executing attacks, necessarily have to reach their decisions on the basis of their assessment of the information from all sources, which is available to them at the relevant time.”); *Austria, Statement on Ratification of AP I*, Feb. 13, 1983, 1289 UNTS 303 (“Article 57, paragraph 2, of Protocol I shall be applied to the extent that, for any decision taken by a military commander, the information actually available at the time of the decision is the determining factor.”); *Canada, Statement on Ratification of AP I*, Nov. 20, 1990, 1591 UNTS 462, 464 (“It is the understanding of the Government of Canada that, in relation to Articles 48, 51 to 60 inclusive, 62 and 67, military commanders and others responsible for planning, deciding upon or executing attacks have to reach decisions on the basis of their assessment of the information reasonably available to them at the relevant time and that such decisions cannot be judged on the basis of information which has subsequently come to light.”); *Italy, Statement on Ratification of AP I*, Feb. 27, 1986, 1425 UNTS 438, 439 (“In relation to Articles 51 to 58 inclusive, the Italian Government understands that military commanders and others responsible for planning, deciding upon or executing attacks necessarily have to reach decisions on the basis of their assessment of the information from all sources which is available to them at the relevant time.”); *Netherlands, Statement on Ratification of AP I*, Jun. 26, 1987, 1477 UNTS 300 (“With regard to Articles 51 to 58 inclusive of Protocol I: It is the understanding of the Government of

responsibility under the law of war, which have declined to second-guess military decisions with the benefit of hindsight.<sup>68</sup>

The requirement that military commanders and other decision-makers make decisions in good faith based on the information available to them recognizes that decisions may be made when information is imperfect or lacking, which will often be the case during armed conflict.

#### 5.4 RULES ON CONDUCTING ASSAULTS, BOMBARDMENTS, AND OTHER ATTACKS

Combatants may conduct assaults, bombardments, and other attacks, but a number of rules apply to these operations.

5.4.1 Notes on Terminology – Protection From “Attack As Such,” “Being Made the Object of Attack,” “Direct Attack,” and “Intentional Attack” Versus Protection From “Incidental” or “Collateral” Harm. A variety of formulations have been commonly used to distinguish between: (1) the protection from being made the object of attack (*i.e.*, the attack is purposefully directed against that person or object) and (2) the protection from the incidental effects of an attack (*i.e.*, the object or person is not the object of the attack, but is collaterally harmed by the attack).

These situations are treated quite differently under the law of war.<sup>69</sup> In the former case, it

---

the Kingdom of the Netherlands that military commanders and others responsible for planning, deciding upon or executing attacks necessarily have to reach decisions on the basis of their assessment of the information from all sources which is available to them at the relevant time;”); Spain, *Statement on Ratification of AP I*, Apr. 21, 1989, 1537 UNTS 389, 392 (“It is understood that decisions by military authorities or others with legal powers to plan or carry out attacks which might affect civilian personnel goods or other effects, necessarily shall not be made on any basis other than that of relevant information available at the time in question and obtained for that purpose.”); Switzerland, *Statement on Ratification of AP I*, Feb. 17, 1982, 1271 UNTS 409 (“The provisions of article 57, paragraph 2, create obligations only for battalion or group commanders and higher-echelon commanders. The information available to the commanders at the time of the decision shall be the determining factor.”); United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 76 (“Military commanders and others responsible for planning, deciding upon, or executing attacks necessarily have to reach decisions on the basis of their assessment of the information from all sources which is reasonably available to them at the relevant time.”).

<sup>68</sup> United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1295-96 (“It was with this situation confronting him that he [the defendant, Rendulic] carried out the ‘scorched earth’ policy in the Norwegian province of Finmark which provided the basis for this charge [of wanton destruction of property] of the indictment. ... There is evidence in the record that there was no military necessity for this destruction and devastation. An examination of the facts in retrospect can well sustain this conclusion. But we are obliged to judge the situation as it appeared to the defendant at the time. If the facts were such as would justify the action by the exercise of judgment, after giving consideration to all the factors and existing possibilities, even though the conclusion reached may have been faulty, it cannot be said to be criminal.”).

<sup>69</sup> See, *e.g.*, United States v. Ohlendorf, *et al.* (The Einsatzgruppen Case), IV TRIALS OF WAR CRIMINALS BEFORE THE NMT 411, 467 (“A city is bombed for tactical purposes; communications are to be destroyed, railroads wrecked, ammunition plants demolished, factories razed, all for the purpose of impeding the military. In these operations it inevitably happens that nonmilitary persons are killed. This is an incident, a grave incident to be sure, but an unavoidable corollary of battle action. The civilians are not individualized. The bomb falls, it is aimed at the railroad yards, houses along the tracks are hit and many of their occupants killed. But that is entirely different, both in fact and in law, from an armed force marching up to these same railroad tracks, entering those houses abutting thereon, dragging out the men, women, and children and shooting them.”).

is often said that protected persons and objects are protected “as such,”<sup>70</sup> from “direct attack,”<sup>71</sup> from “intentional attack,”<sup>72</sup> “from attack directed exclusively against them,”<sup>73</sup> or from being made the “object of attack.”<sup>74</sup> Sometimes a combination of these formulations has been used.

In some cases, a text may not use any qualification (*e.g.*, “direct attack” or “as such,”), but is understood to refer only to the first category of protection. For example, Article 52 of AP I provides that “[a]ttacks shall be limited strictly to military objectives.”<sup>75</sup> However, this article has been understood to comprise only an obligation not to direct attacks against civilian objects and not to address the question of incidental harm resulting from attacks directed against military objectives.<sup>76</sup>

This manual generally uses the phrase “object of attack” to convey the idea that the attack is being purposefully directed against that person or object.

This manual generally uses the term “incidental harm” to refer to the death or injury to civilians, or the destruction of or damage to civilian objects, that is incidentally (but potentially knowingly) caused as a collateral consequence of an attack directed against a military objective.<sup>77</sup>

5.4.2 Overview of Rules in Conducting Attacks. Parties to a conflict must conduct attacks in accordance with the principles of distinction and proportionality. In particular, the following rules must be observed:

---

<sup>70</sup> See, *e.g.*, 1956 FM 27-10 (Change No. 1 1976) ¶40a (“Customary international law prohibits the launching of attacks (including bombardment) against either the civilian population as such or individual civilians as such.”) (emphasis added).

<sup>71</sup> 2004 UK MANUAL ¶5.3.2 (“A civilian is a non-combatant. He is protected from direct attack and is to be protected against dangers arising from military operations.”) (emphasis added).

<sup>72</sup> Department of Defense, *Report to the Senate and House Appropriations Committees regarding international policies and procedures regarding the protection of natural and cultural resources during times of war*, Jan. 19, 1993, reprinted as Appendix VIII in Patrick J. Boylan, *Review of the Convention for the Protection of Cultural Property in the Event of Armed Conflict (The Hague Convention of 1954)* 201, 204 (1993) (“Like any civilian object, cultural property is protected from intentional attack so long as it is not used for military purposes, or to shield military objectives from attack.”).

<sup>73</sup> See, *e.g.*, 1956 FM 27-10 (Change No. 1 1976) ¶25 (“However, it is a generally recognized rule of international law that civilians must not be made the object of attack directed exclusively against them.”) (emphasis added).

<sup>74</sup> AP I art. 51(2) (“The civilian population as such, as well as individual civilians, shall not be the object of attack.”) (emphasis added).

<sup>75</sup> AP I art. 52(2).

<sup>76</sup> See, *e.g.*, United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 77 (“The first sentence of paragraph 2 prohibits only such attacks as may be directed against non-military objectives; it does not deal with the question of collateral damage resulting from attacks directed against military objectives.”); Canada, *Statement on Ratification of AP I*, Nov. 20, 1990, 1591 UNTS 462, 465 (“The first sentence of paragraph 2 of the Article is not intended to, nor does it, deal with the question of incidental or collateral damage resulting from an attack directed against a military objective.”).

<sup>77</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

- Combatants may make military objectives the object of attack, but may not direct attacks against civilians, civilian objects, or other protected persons and objects.<sup>78</sup>
- Combatants must refrain from attacks in which the expected loss of life or injury to civilians, and damage to civilian objects incidental to the attack, would be excessive in relation to the concrete and direct military advantage expected to be gained.<sup>79</sup>
- Combatants must take feasible precautions in planning and conducting attacks to reduce the risk of harm to civilians and other persons and objects protected from being made the object of attack.<sup>80</sup>
- In conducting attacks, combatants must assess in good faith the information that is available to them.<sup>81</sup>
- Combatants may not kill or wound the enemy by resort to perfidy.<sup>82</sup>
- Specific rules apply to the use of certain types of weapons.<sup>83</sup>

5.4.3 Assessing Information in Conducting Attacks. Persons who plan, authorize, or make other decisions in conducting attacks must make the judgments required by the law of war in good faith and on the basis of information available to them at the time.<sup>84</sup> For example, a commander must, on the basis of available information, determine in good faith that a target is a military objective before authorizing an attack against that target. Similarly, the expected incidental damage to civilians or civilian objects must be assessed in good faith, given the information available to the commander at the time.

In making the judgments that are required by the law of war rules governing attacks, persons may rely on information obtained from other sources, including human intelligence or other sources of information.<sup>85</sup> For example, in a long-distance attack, a commander may rely on information obtained from aerial reconnaissance and intelligence units in determining

---

<sup>78</sup> Refer to § 5.5 (Discrimination in Conducting Attacks).

<sup>79</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>80</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>81</sup> Refer to § 5.4.3 (Assessing Information in Conducting Attacks).

<sup>82</sup> Refer to § 5.22 (Treachery or Perfidy Used to Kill or Wound).

<sup>83</sup> Refer to § 6.5.1 (Certain Types of Weapons With Specific Rules on Use).

<sup>84</sup> Refer to § 5.3 (Assessing Information Under the Law of War).

<sup>85</sup> ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶84 (Jun. 13, 2000) (“The building hit was clearly a civilian object and not a legitimate military objective. ... It is the opinion of the committee ... that it is inappropriate to attempt to assign criminal responsibility for the incident to senior leaders because they were provided with wrong information by officials of another agency.”).

whether to conduct an attack.<sup>86</sup>

5.4.3.1 *Heightened Identification Requirements in Conducting Attacks.* Although doing so would impose greater restrictions than the requirements of the law of war, applying heightened standards of identification may be a policy choice to reduce the risk of incidental harm in conducting an attack.<sup>87</sup>

5.4.3.2 *AP I Presumptions in Favor of Civilian Status in Conducting Attacks.* In the context of conducting attacks, certain provisions of AP I reflect a presumption in favor of civilian status in cases of doubt. Article 52(3) of AP I provides that “[i]n case of doubt whether an object which is normally dedicated to civilian purposes, such as a place of worship, a house or other dwelling or a school, is being used to make an effective contribution to military actions, it shall be presumed not to be so used.”<sup>88</sup> Article 50(1) of AP I provides that “[i]n case of doubt whether a person is a civilian, that person shall be considered to be a civilian.”

Under customary international law, no legal presumption of civilian status exists for persons or objects, nor is there any rule inhibiting commanders or other military personnel from

---

<sup>86</sup> ICRC AP COMMENTARY 681 (¶2195) (“In the case of long-distance attacks, information will be obtained in particular from aerial reconnaissance and from intelligence units, which will of course attempt to gather information about enemy military objectives by various means.”).

<sup>87</sup> For example, The White House, Office of the Press Secretary, *Fact Sheet: U.S. Policy Standards and Procedures for the Use of Force in Counterterrorism Operations Outside the United States and Areas of Active Hostilities*, May 23, 2013 (In counterterrorism operations, “lethal force will be used outside areas of active hostilities only when the following preconditions are met: ... *Third*, the following criteria must be met before lethal action may be taken: 1) Near certainty that the terrorist target is present; 2) Near certainty that non-combatants will not be injured or killed;”); Coalition Forces Land Component Command (CFLCC) Rules of Engagement (ROE) Card, Iraq (2003), reprinted in CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL’S LEGAL CENTER & SCHOOL, U.S. ARMY, I LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 314 (2004) (“1. On order, enemy military and paramilitary forces are declared hostile and may be attacked subject to the following instructions: a. Positive Identification (PID) is required prior to engagement. PID is a reasonable certainty that the proposed target is a legitimate military target. If no PID, contact your next higher commander for decision.”); FINAL REPORT ON THE PERSIAN GULF WAR 177 (“Attack procedures specified that if the pilot could not positively identify his target or was not confident the weapon would guide properly (because of clouds, for example), he could not deliver that weapon. Several attack sorties were forced to return with their bombs for this reason.”); U.S. MILITARY ASSISTANCE COMMAND VIET-NAM DIRECTIVE 525-13, *Military Operations: Rules of Engagement for the Employment of Firepower in the Republic of Vietnam*, ¶6a (May 1971), reprinted in 1975 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 814, 815 (“All possible means will be employed to limit the risk to the lives and property of friendly forces and civilians. In this respect, a target must be clearly identified as hostile prior to making a decision to place fire on it.”) (“All possible means will be employed to limit the risk to the lives and property of friendly forces and civilians. In this respect, a target must be clearly identified as hostile prior to making a decision to place fire on it.”).

<sup>88</sup> AP I art. 52(3). See also BOTHE, PARTSCH, & SOLF, NEW RULES 326 (AP I art. 52, ¶2.5.1) (“It should be noted that the presumption applies only as to objects which normally do not have any significant military use or purpose. The committee deleted from the illustrative list proposed by the ICRC in draft Art. 47, the phrase ‘installations and means of transport’, thus indicating an intent by the Conference that the presumption should not apply to objects which are of such a nature that their value to military action in combat situations is probable. Means of transport and of communication fall into a category where their use for military purposes cannot be excluded through a presumption.”).

acting based on the information available to him or her in doubtful cases.<sup>89</sup> Attacks, however, may not be directed against civilians or civilian objects based on merely hypothetical or speculative considerations regarding their possible current status as a military objective. In assessing whether a person or object that normally does not have any military purpose or use is a military objective, commanders and other decision-makers must make the decision in good faith based on the information available to them in light of the circumstances ruling at the time.

A legal presumption of civilian status in cases of doubt may demand a degree of certainty that would not account for the realities of war.<sup>90</sup> Affording such a presumption could also encourage a defender to ignore its obligation to separate military objectives from civilians and civilian objects.<sup>91</sup> For example, unprivileged belligerents may seek to take advantage of a legal presumption of civilian status.<sup>92</sup> Thus, there is concern that affording such a presumption likely would increase the risk of harm to the civilian population and tend to undermine respect for the law of war.

In applying AP I rules on “doubt,” some Parties to AP I have interpreted these rules in a more limited way (*e.g.*, applying a “substantial doubt” standard) than AP I’s text would suggest.<sup>93</sup>

5.4.4 Failure by the Defender to Separate or Distinguish Does Not Relieve the Attacker of the Duty to Discriminate in Conducting Attacks. A party that is subject to attack might fail to take feasible precautions to reduce the risk of harm to civilians, such as by separating the civilian population from military objectives.<sup>94</sup> Moreover, in some cases, a party to a conflict might

---

<sup>89</sup> See, *e.g.*, Christopher Greenwood, *Customary international law and the First Geneva Protocol of 1977 in the Gulf conflict*, in PETER ROWE, *THE GULF WAR 1990-91 IN INTERNATIONAL AND ENGLISH LAW* 63, 75 (1993) (“[I]t is very doubtful that Article 52(3) represents customary international law.”); BOTHE, PARTSCH, & SOLF, *NEW RULES 327* (AP I art. 52, ¶2.5.2) (quoting a Rapporteur’s observation at the Diplomatic Conference that a presumption “will be a significant new addition to the law”).

<sup>90</sup> Refer to § 1.4.2.2 (Nature of War – Limited and Unreliable Information – “Fog of War”).

<sup>91</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 616 (“This language, which is not a codification of the customary practice of nations, causes several things to occur that are contrary to the traditional law of war. It shifts the burden for determining the precise use of an object from the party controlling that object (and therefore in possession of the facts as to its use) to the party lacking such control and facts, *i.e.*, from defender to attacker. This imbalance ignores the realities of war in demanding a degree of certainty of an attacker that seldom exists in combat. It also encourages a defender to ignore its obligation to separate the civilian population, individual civilians and civilian objects from military objectives, as the Government of Iraq illustrated during the Persian Gulf War.”).

<sup>92</sup> See APPENDIX TO 1985 CJCS MEMO ON AP I 53 (rejecting the presumption of civilian status in AP I because “[t]his presumption also provides an additional protection for guerillas and other irregulars who may find it advantageous to be presumed to be a civilian rather than a combatant.”).

<sup>93</sup> See, *e.g.*, 2004 UK MANUAL ¶5.3.4 (“In the practical application of the principle of civilian immunity and the rule of doubt, (a) commanders and others responsible for planning, deciding upon, or executing attacks necessarily have to reach decisions on the basis of their assessment of the information from all sources which is available to them at the relevant time, (b) it is only in cases of substantial doubt, after this assessment about the status of the individual in question, that the latter should be given the benefit of the doubt and treated as a civilian, and (c) the rule of doubt does not override the commander’s duty to protect the safety of troops under his command or to preserve the military situation.”).

<sup>94</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

attempt to use the presence or movement of the civilian population or individual civilians in order to shield military objectives from seizure or attack.<sup>95</sup>

When enemy persons engage in such behavior, commanders should continue to seek to discriminate in conducting attacks and to take feasible precautions to reduce the risk of harm to the civilian population and civilian objects.<sup>96</sup> However, the ability to discriminate and to reduce the risk of harm to the civilian population likely will be diminished by such enemy conduct. In addition, such conduct by the adversary does not increase the legal obligations of the attacking party to discriminate in conducting attacks against the enemy.<sup>97</sup> Violations by the defending party are not a basis for that party to assert additional legal rights against the attacking party.<sup>98</sup>

**5.4.5 Permissible Location of Attacks.** In general, attacks may be conducted against military objectives wherever located, outside neutral territory.<sup>99</sup> Attacks, however, may not be conducted in special zones established by agreement between the belligerents, such as hospital, safety, or neutralized zones.<sup>100</sup>

Attacks on military objectives in the enemy rear or diversionary attacks away from the current theaters or zones of active military operations are lawful.<sup>101</sup> The law of war does not require that attacks on enemy military personnel or objectives be conducted near ongoing fighting, in a theater of active military operations, or in a theater of active armed conflict.<sup>102</sup>

---

<sup>95</sup> Refer to § 5.16 (Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations).

<sup>96</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 615 (“As correctly stated in Article 51(8) of Protocol I, a nation confronted with callous actions by its opponent (such as the use of ‘human shields’) is not released from its obligation to exercise reasonable precaution to minimize collateral injury to the civilian population or damage to civilian objects. This obligation was recognized by Coalition forces in the conduct of their operations.”).

<sup>97</sup> See W. Hays Parks, *Air War and the Law of War*, 32 AIR FORCE LAW REVIEW 1, 163 (1990) (“While an attacker facing a target shielded from attack by civilians is not relieved from his duty to exercise reasonable precautions to minimize the loss of civilian life, neither is he obligated to assume any additional responsibility as a result of the illegal acts of the defender. Were an attacker to do so, his erroneous assumption of additional responsibility with regard to protecting the civilians shielding a lawful target would serve as an incentive for a defender to continue to violate the law of war by exposing other innocent civilians to similar risk.”).

<sup>98</sup> See, e.g., Charles J. Dunlap Jr., *The DoD Law of War Manual and its Critics: Some Observations*, 92 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 99-100 (2016) (“To reward a belligerent for flaunting the LoW [law of war] in that way is flatly contrary to the principle of international law expressed in the axiom *ex injuria non jus oritur* or ‘legal rights should not be understood to result from the commission of wrongful acts.’ ... Given that the law has proven almost totally impotent in restraining today’s adversaries who routinely violate LoW in exquisitely barbaric ways, we should be very sensitive to—and resistant of—any reading of the LoW that seems to result in privileging such lawbreakers *because of their lawbreaking*.”).

<sup>99</sup> Refer to § 15.3.1.2 (Inviolability of Neutral Territory - Prohibition on Hostile Acts or Other Violations of Neutrality).

<sup>100</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>101</sup> Refer to § 5.6.7.3 (Definite Military Advantage).

<sup>102</sup> John O. Brennan, Assistant to the President for Homeland Security and Counterterrorism, *Speech at the Wilson Center: The Ethics and Efficacy of the President’s Counterterrorism Strategy*, Apr. 30, 2012, 2012 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 584, 585 (“There is nothing in international law ... that prohibits

There are many examples of lawful attacks taking place far from where the fighting was previously taking place.<sup>103</sup>

For policy or operational reasons, military orders, such as applicable rules of engagement, may limit the locations where attacks on otherwise lawful military objectives may be conducted.

**5.4.6 Force That May Be Applied Against Military Objectives.** In the absence of expected harm to civilians and civilian objects or of wanton destruction that is not justified by military necessity, the law of war imposes no limit on the degree of force that may be directed against enemy military objectives, including enemy military personnel (but not including enemy personnel who are placed *hors de combat*).<sup>104</sup> For example, the principle of military necessity does not require that only the minimum force that is actually necessary in a specific situation may be used against military objectives.<sup>105</sup> Instead, the broader imperatives of winning the war may be considered, and overwhelming force may be used against enemy military objectives.<sup>106</sup>

In addition, combatants need not offer opponents an opportunity to surrender before

---

us from using lethal force against our enemies outside of an active battlefield, at least when the country involved consents or is unable or unwilling to take action against the threat.”).

<sup>103</sup> For example, John D. Negroponte, *Letter dated 7 October 2001 from the Permanent Representative of the United States of America to the United Nations addressed to the President of the Security Council*, U.N. Doc. No. S/2001/946 (Oct. 7, 2001) (informing the U.N. Security Council that “the United States of America, together with other States, has initiated actions in the exercise of its inherent right of individual and collective self-defence following the armed attacks that were carried out against the United States on 11 September 2001” including U.S. military operations against al-Qaida and the Taliban in Afghanistan); LOUIS MORTON, *UNITED STATES ARMY IN WORLD WAR II, THE WAR IN THE PACIFIC, STRATEGY AND COMMAND: THE FIRST TWO YEARS*, 269-74 (1962) (describing U.S. bombing raid led by Lt. Col. James H. Doolittle on April 18, 1942, against military objectives in Tokyo).

<sup>104</sup> See *Refresher Course for Battalion and Brigade Commanders*, ¶11, Appendix B in DEPARTMENT OF THE ARMY SUBJECT SCHEDULE 27-1, *The Geneva Conventions of 1949 and Hague Convention No. IV of 1907*, 16 (Aug. 29, 1975) (“Nowhere in the law of war will you find a prohibition on shooting—and shooting to kill—the enemy in a firefight. On the battlefield the regrettable but necessary reality is kill or be killed. Once the enemy has surrendered, however, or otherwise fallen into your hands, there is no need to kill him.”); J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Senator Edward Kennedy, Sept. 22, 1972, *reprinted in* 67 *AJIL* 122, 124 (1973) (“I would like to reiterate that it is recognized by all states that they may not lawfully use their weapons against civilian population or civilians as such, but there is no rule of international law that restrains them from using weapons against enemy armed forces or military targets. The correct rule of international law which has applied in the past and continued to apply to the conduct of our military operations in Southeast Asia is that ‘the loss of life and damage to property must not be out of proportion to the military advantage to be gained.’”); ICRC AP COMMENTARY 620 (¶1953) (“The armed forces and their installations are objectives that may be attacked wherever they are, except when the attack could incidentally result in loss of human life among the civilian population, injuries to civilians, and damage to civilian objects which would be excessive in relation to the expected direct and specific military advantage.”).

<sup>105</sup> Refer to § 2.2.3.1 (Consideration of the Broader Imperatives of Winning the War).

<sup>106</sup> See, e.g., 2007 NWP 1-14M ¶5.3.1 (“It is important to note that the principle of military necessity does not prohibit the application of overwhelming force against enemy combatants, units and material consistent with the principles of distinction and proportionality.”); AIR FORCE OPERATIONS & THE LAW 16 (2009) (“The prohibition of unnecessary suffering does not limit the bringing of overwhelming firepower on an opposing military force in order to subdue or destroy it.”).

carrying out an attack.<sup>107</sup>

In particular, the following practices are not prohibited: (1) surprise attacks; (2) attacks on retreating forces; (3) harassing fires; and (4) attacks on specific individuals.

5.4.6.1 *Surprise Attacks*. The law of war does not prohibit the use of surprise to conduct attacks, such as the use of surprise in ambushes, sniper attacks, air raids, and attacks by special operations forces carried out behind enemy lines.<sup>108</sup> There is no requirement that an enemy combatant must be warned before being attacked.<sup>109</sup> Rather, warning requirements apply only with respect to the civilian population and certain other protected units, vessels, and facilities, such as military medical units and facilities.<sup>110</sup>

5.4.6.2 *Attacks on Retreating Forces*. Enemy combatants remain liable to attack when retreating.<sup>111</sup> Retreat is not the same as surrender. Retreating forces remain dangerous as the enemy force may recover to counterattack, consolidate a new defensive position, or assist the war effort in other ways.<sup>112</sup> Retreat may also be a ruse.<sup>113</sup> Retreating enemy combatants may

---

<sup>107</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 629 (“A combatant force involved in an armed conflict is not obligated to offer its opponent an opportunity to surrender before carrying out an attack.”).

<sup>108</sup> For example, 1958 UK MANUAL ¶115 note 2 (“It is not forbidden to send a detachment or individual members of the armed forces to kill, by sudden attack, members or a member of the enemy armed forces. Thus, for instance, the raid by a British commando party on the headquarters of General Rommel’s African Army at Beda Littoria in 1943 was not contrary to the provisions of the Hague Rules. The operation was carried out by military personnel in uniform; it had as part of its objective the seizure of Rommel’s operational headquarters, including his own residence, and the capture or killing of enemy personnel therein, ... .”); SPAIGHT, WAR RIGHTS ON LAND 87-88 (“A surprise attack is a very different thing [from a treacherous one]. When a body of Federal cavalymen made a sudden descent on ‘Hickory Hill’ farm, in which the young Confederate General, W. F. H. Lee (son of the great commander, R. E. Lee), was convalescing from a wound, and carried him off as a prisoner of war to Fortress Munroe, they were guilty of no treachery under the laws of war. It was a fair and open raid.”).

<sup>109</sup> See, e.g., W. Hays Parks, Special Assistant for Law of War Matters, Office of the Judge Advocate General, U.S. Army, *Memorandum re: Legality of Silencers/Suppressors* 6 (Jun. 9, 1995) (“There is no law of war requirement that a combatant must be ‘warned’ before he or she is subject to the application of lawful, lethal force. A landmine provides no warning; neither does an ambush, a sniper, a machinegun in a concealed defensive position, a Claymore munition in a defensive perimeter, a delayed action munition, a naval mine, or many other means or methods of warfare. A sentry or personnel in a listening or observation post lawfully may be killed quietly, preferably through surprise, by garrote or knife attack. A surface-to-air missile undetected by its targeted aircraft likewise kills by surprise.”); W. Hays Parks, Special Assistant for Law of War Matters, *Memorandum of Law—Legality of Snipers* (Sept. 29, 1992), reprinted in THE ARMY LAWYER 3 (Dec. 1992) (“The element of surprise is a fundamental principle of war, and does not make an otherwise legitimate act of violence unlawful.”).

<sup>110</sup> Refer to § 5.11.5.3 (That May Affect the Civilian Population); § 5.11.5.1 (Other Warning Requirements).

<sup>111</sup> FINAL REPORT ON THE PERSIAN GULF WAR 632 (“The law of war permits the attack of enemy combatants and enemy equipment at any time, wherever located, whether advancing, retreating, or standing still. Retreat does not prevent further attack. At the small-unit level, for example, once an objective has been seized and the position consolidated, an attacking force is trained to fire upon the retreating enemy to discourage or prevent a counterattack.”).

<sup>112</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 622 (“It is recognized by military professionals that a retreating force remains dangerous. The First Marine Division and its 4,000 attached U.S. Army forces and British Royal Marines, in the famous 1950 march out of the Chosin Reservoir in North Korea, fighting outnumbered by a 4:1 margin, turned its ‘retreat’ into a battle in which it defeated the 20<sup>th</sup> and 26<sup>th</sup> Chinese Armies trying to annihilate it, ... .”).

have the same amount of force brought to bear upon them as an attacking military force, and a military commander is under no obligation to limit force directed against enemy combatants because they are, or appear to be, in retreat.

5.4.6.3 *Harassing Fires*. Harassing fires against enemy combatants are not prohibited. (Such action is clearly distinguishable from attacks to terrorize or otherwise harm the civilian population, which are, of course, prohibited.) Harassing fires are delivered on enemy locations for the purpose of disturbing enemy forces' rest, curtailing their movement, or lowering their morale.<sup>114</sup>

5.4.6.4 *Attacks on Specific Individuals*. Military operations may be directed against specific enemy combatants.<sup>115</sup> U.S. forces have often conducted such operations.<sup>116</sup>

5.4.7 *Prohibition Against Declaring That No Quarter Be Given*. It is forbidden to declare that no quarter will be given.<sup>117</sup> This means that it is prohibited to order that legitimate offers of surrender will be refused or that detainees, such as unprivileged belligerents, will be summarily

---

<sup>113</sup> Refer to § 5.25.2 (Examples of Ruses).

<sup>114</sup> APPENDIX TO 1985 CJCS MEMO ON AP I 47 (“Harassing fires are delivered on enemy locations for the purpose of disturbing the rest, curtailing the movement, or lowering the morale of troops.”).

<sup>115</sup> See, e.g., Harold Hongju Koh, Legal Adviser, Department of State, *Address at the Annual Meeting of the American Society of International Law: The Obama Administration and International Law*, Mar. 25, 2010, 2010 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 718 (“First, some have suggested that the *very act of targeting* a particular leader of an enemy force in an armed conflict must violate the laws of war. But individuals who are part of such an armed group are belligerents and, therefore, lawful targets under international law. ... Indeed, targeting particular individuals serves to narrow the focus when force is employed and to avoid broader harm to civilians and civilian objects.”); 1956 FM 27-10 (Change No. 1 1976) ¶31 (“[The prohibition on killing or wounding treacherously reflected the Hague IV Regulations] does not, however, preclude attacks on individual soldiers or officers of the enemy whether in the zone of hostilities, occupied territory, or elsewhere.”).

<sup>116</sup> For example, Barack Obama, *Remarks by the President on Osama Bin Laden* (May 2, 2011) (“Today, at my direction, the United States launched a targeted operation against that compound [suspected of housing Osama Bin Laden] in Abbottabad, Pakistan. A small team of Americans carried out the operation with extraordinary courage and capability. No Americans were harmed. They took care to avoid civilian casualties. After a firefight, they killed Osama bin Laden and took custody of his body.”); George W. Bush, *Remarks on the Death of Senior Al Qaeda Associate Abu Musab Al Zarqawi*, Jun. 8, 2006, 2006-I PUBLIC PAPERS OF THE PRESIDENTS 1099 (describing how after “work[ing] tirelessly with their Iraqi counterparts to track down this brutal terrorist,” U.S. “special operation forces, acting on tips and intelligence from Iraqis, confirmed Zarqawi’s location” and killed him); JOHN MILLER, CARTWHEEL: THE REDUCTION OF RABAUL 44 (Office of the Chief of Military History, Department of the Army 1959) (“American intelligence officers had discovered the exact time on 18 April [Admiral] Yamamoto[, Commander-in-Chief of the Japanese Combined Fleet,] was due to reach the Buin area . . . . [D]isposing of Yamamoto would advance the Allied cause, so the Commander, Aircraft, Solomons, was told to shoot him down [and did so successfully.]”); Henry Pinckney McCain, Adjutant General of the U.S. Army, Telegram to General Frederick Funston (Mar. 10, 1916), reprinted in PAPERS RELATING TO THE FOREIGN RELATIONS OF THE UNITED STATES WITH THE ADDRESS OF THE PRESIDENT TO CONGRESS DECEMBER 5, 1916 (Department of State 1925) (relaying that the “President has directed that an armed force be sent into Mexico with the sole object of capturing [Pancho] Villa and preventing any further raids by his band”).

<sup>117</sup> HAGUE IV REG. art. 23(d) (noting that it is especially forbidden “[t]o declare that no quarter will be given;”). Consider AP I art. 40 (“It is prohibited to order that there shall be no survivors, to threaten an adversary therewith or to conduct hostilities on this basis.”).

executed.<sup>118</sup> Moreover, it is also prohibited to conduct hostilities on the basis that there shall be no survivors, or to threaten the adversary with the denial of quarter.<sup>119</sup>

This rule is based on both humanitarian and military considerations.<sup>120</sup> This rule also applies during non-international armed conflict.<sup>121</sup>

**5.4.8 Obligation of Combatants to Distinguish Themselves When Conducting Attacks.** Combatants have certain obligations to distinguish themselves that include, but are not limited to, those times when they conduct attacks.<sup>122</sup> For example, militia and volunteer corps must wear fixed, distinctive insignia, including when they are conducting attacks.<sup>123</sup> In addition, combatants may not kill or wound by resort to perfidy.<sup>124</sup> Combatants may not fight in the enemy's uniform.<sup>125</sup> Lastly, persons engaging in spying or sabotage risk additional penalties under the domestic law of enemy States.<sup>126</sup>

**5.4.8.1 Fighting Out of Uniform.** Although military operations generally are conducted while wearing a uniform or other distinctive emblems, there may be occasions, such as a surprise attack by enemy forces, when military personnel are unable to dress in their uniforms before resisting the enemy's assault.<sup>127</sup>

Military personnel not in uniform may resist an attack, so long as they are not wearing

---

<sup>118</sup> ICRC AP COMMENTARY 476 (¶1595) (“[A]ny order of ‘liquidation’ is prohibited, whether it concerns commandos, political or any other kind of commissars, irregular troops or so-called irregular troops, saboteurs, parachutists, mercenaries or persons considered to be mercenaries, or other cases.”).

<sup>119</sup> ICRC AP COMMENTARY 476 (¶1595) (“It is not only the order to put them to death that is prohibited, but also the threat and the execution, with or without orders.”).

<sup>120</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 217 (AP I art. 40, ¶2.1) (“A declaration or order that there shall be no survivors, or that no prisoners shall be taken, tends to stiffen the adversary's will to resist and is therefore counterproductive to the achievement of the legitimate objectives of a military operations. Moreover, it incites the adversary to adopt a similar policy thus causing the conflict to degenerate into unrestrained savagery.”).

<sup>121</sup> Refer to § 17.6.1 (Prohibition on Declaring That No Quarter Be Given).

<sup>122</sup> See also ALLAN ROSAS, THE LEGAL STATUS OF PRISONERS OF WAR: A STUDY IN INTERNATIONAL HUMANITARIAN LAW APPLICABLE IN ARMED CONFLICTS 351 (1976) (“What such proposals and statements [made in the context of the negotiations for the 1949 Geneva Conventions] do seem to imply, however, is that in areas where enemy forces are present (notably in occupied territory) members of independent (or of regular) forces are not allowed to appear as part of the peaceful civilian population (e.g., as peasants or workers) while occasionally committing hostile acts against the enemy (the ‘day-time civilian, night-time combatant’ -situation).”).

<sup>123</sup> Refer to § 4.6.4 (Having a Fixed Distinctive Sign Recognizable at a Distance).

<sup>124</sup> Refer to § 5.22 (Treachery or Perfidy Used to Kill or Wound).

<sup>125</sup> Refer to § 5.23 (Use of Enemy Flags, Insignia, and Military Uniforms).

<sup>126</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>127</sup> For example, SPAIGHT, AIR POWER AND WAR RIGHTS 101 (“In the second world war, too, there were instances in which pilots fought *en dishabille*. For example, in Kenya a pilot of the South African Air Force happened to be wearing nothing but a singlet when Italian bombers approached, and so clad (or unclad) he dashed to his aircraft and joined in the fight.”).

the enemy's uniform and do not kill or wound treacherously.<sup>128</sup> For example, military personnel not in uniform who resist an attack, and who do not purposefully seek to conceal their status as combatants, commit no violation of the law of war and remain entitled to the privileges of combatant status. The normal wearing of uniforms or other distinctive emblems, however, should resume as soon as practicable because such wear helps protect the civilian population from erroneous attack by helping to distinguish military forces from the civilian population.<sup>129</sup>

*5.4.8.2 AP I Obligation for Combatants to Distinguish Themselves During Attacks or Military Operations Preparatory to an Attack.* AP I provides that: “combatants are obliged to distinguish themselves from the civilian population while they are engaged in an attack or in a military operation preparatory to an attack.”<sup>130</sup>

The AP I provision only partially describes the obligation under customary international law of combatants to distinguish themselves from the civilian population. Under customary international law, the obligation of combatants to distinguish themselves is a general obligation that the armed forces have as a group and is not limited to times when they are engaged in an attack or in a military operation preparatory to an attack.<sup>131</sup> Moreover, measures such as wearing insignia or other distinctive emblems may be of less practical significance during an attack. During an attack, combatants are likely to be distinguishable based on their activities more than any insignia or devices they are wearing.

## 5.5 DISCRIMINATION IN CONDUCTING ATTACKS

Under the principle of distinction, combatants may make enemy combatants and other military objectives the object of attack, but may not make the civilian population and other protected persons and objects the object of attack.<sup>132</sup>

5.5.1 Persons, Objects, and Locations That Are Not Protected From Being Made the Object of Attack. Combatants may make enemy combatants and other military objectives the object of attack.<sup>133</sup>

5.5.2 Persons, Objects, and Locations That Are Protected From Being Made the Object of Attack. Persons, objects, and locations that are not military objectives may not be made the object of attack. In particular, the following persons and objects may not be made the object of attack, unless that protection is specifically forfeited under the circumstances:

- Persons, such as

---

<sup>128</sup> Refer to § 5.23 (Use of Enemy Flags, Insignia, and Military Uniforms); § 5.22 (Treachery or Perfidy Used to Kill or Wound).

<sup>129</sup> Refer to § 5.14.5 (Carrying Arms Openly and Wearing of Distinctive Emblems by the Armed Forces to Distinguish Themselves From the Civilian Population).

<sup>130</sup> AP I art. 44(3).

<sup>131</sup> Refer to § 4.6.1.1 (GPW 4A(2) Conditions Required on a Group Basis).

<sup>132</sup> Refer to § 2.5.2 (Discriminating in Conducting Attacks Against the Enemy).

<sup>133</sup> Refer to § 5.6 (Military Objectives).

- individual civilians and the civilian population;<sup>134</sup>
- military medical and religious personnel, including military medical units;<sup>135</sup>
- combatants placed *hors de combat*;<sup>136</sup> and
- *parlementaires*;<sup>137</sup> and
- Objects and locations, provided they are not military objectives, such as
  - military medical transport, facilities, and equipment;<sup>138</sup>
  - cultural property;<sup>139</sup>
  - historic monuments, museums, scientific, artistic, educational and cultural institutions;<sup>140</sup>
  - places of worship;
  - undefended villages, towns, or cities;<sup>141</sup>
  - hospital and safety zones, and persons and objects within these zones;<sup>142</sup> and
  - neutralized zones, and persons and objects within neutralized zones.<sup>143</sup>

## 5.6 MILITARY OBJECTIVES

*Military objectives* refers to persons and objects that may be made the object of attack. Certain classes of persons and objects are categorically recognized as military objectives. Apart from these classes that are categorically military objectives, other objects are assessed as to

---

<sup>134</sup> Refer to § 4.8.2 (Civilians – Conduct of Hostilities).

<sup>135</sup> Refer to § 4.10.1 (Military Medical and Religious Personnel - Conduct of Hostilities); § 7.8 (Respect and Protection of Categories of Medical and Religious Personnel); § 7.10 (Military Medical Units and Facilities).

<sup>136</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

<sup>137</sup> Refer to § 12.5.4 (Rights of Inviolability of the *Parlementaire*).

<sup>138</sup> Refer to § 7.10 (Military Medical Units and Facilities).

<sup>139</sup> Refer to § 5.18 (Protection of Cultural Property During Hostilities).

<sup>140</sup> ROERICH PACT art. 1 (“The historic monuments, museums, scientific, artistic, educational and cultural institutions shall be considered as neutral and as such respected and protected by belligerents. The same respect and protection shall be due to the personnel of the institutions mentioned above. The same respect and protection shall be accorded to the historic monuments, museums, scientific, artistic, educational and cultural institutions in time of peace as well as in war.”).

<sup>141</sup> Refer to § 5.15 (Undefended Cities, Towns, and Villages).

<sup>142</sup> Refer to § 5.14.3.1 (Civilian Hospital and Safety Zones and Localities).

<sup>143</sup> Refer to § 5.14.3.3 (Neutralized Zones).

whether they meet the definition of “military objective.”

5.6.1 Military Objective – Notes on Terminology. The term *military objective* has been used in various treaties as a term of art to mean a person or object that may lawfully be made the object of attack.<sup>144</sup>

5.6.1.1 Persons and Objects as Military Objectives. Although enemy combatants may be made the object of attack, some sources do not classify persons as *military objectives*, and limit the term *military objective* to objects.

Definitions of *military objectives* in treaties have defined the term *military objective* insofar as objects (rather than persons) are concerned.<sup>145</sup> In addition, the treaty definitions have been written with the purpose of explaining when objects that normally are civilian objects have become military objectives under the circumstances.

This manual uses the term *military objective* to include persons who may be made the object of attack.<sup>146</sup>

5.6.1.2 Dual-Use Objects. Sometimes, “dual-use” is used to describe objects that are used by both the armed forces and the civilian population, such as power stations or communications facilities. However, from the legal perspective, such objects are either military objectives or they are not; there is no intermediate legal category.<sup>147</sup> If an object is a military objective, it is not a civilian object and may be made the object of attack.<sup>148</sup> However, it will be appropriate to consider in applying the principle of proportionality the harm to the civilian population that is expected to result from the attack on such a military objective.<sup>149</sup>

5.6.2 Persons Who Are Military Objectives. Certain classes of persons are military

---

<sup>144</sup> See, e.g., CCW PROTOCOL III ON INCENDIARY WEAPONS art. 2(4) (referring to “combatants or other military objectives”); 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(1) (referring to “any important military objective constituting a vulnerable point”); GC art. 18 (“In view of the dangers to which hospitals may be exposed by being close to military objectives, it is recommended that such [civilian] hospitals be situated as far as possible from such objectives.”).

<sup>145</sup> See CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(3) (“‘Military objective’ means, so far as objects are concerned, any object which ... .”); CCW AMENDED MINES PROTOCOL art. 2(6) (“‘Military objective’ means, so far as objects are concerned, any object which ... .”). Consider AP I art. 52(2) (“Attacks shall be limited strictly to military objectives. In so far as objects are concerned, military objectives are limited to those objects which ... .”).

<sup>146</sup> Refer to § 5.6.2 (Persons Who Are Military Objectives).

<sup>147</sup> Christopher Greenwood, *Customary international law and the First Geneva Protocol of 1977 in the Gulf conflict*, in PETER ROWE, *THE GULF WAR 1990-91 IN INTERNATIONAL AND ENGLISH LAW* 63, 73 (1993) (“If an object is a military objective, it may be attacked (subject to the requirements of the principle of proportionality which are discussed in the next section), while if it is a civilian object, it may not be attacked. There is no intermediate category of ‘dual use’ objects: either something is a military objective or it is not.”).

<sup>148</sup> CCW AMENDED MINES PROTOCOL art. 2(7) (“‘Civilian objects’ are all objects which are not military objectives as defined in paragraph 6 of this Article.”).

<sup>149</sup> Refer to § 5.10 (Proportionality in Conducting Attacks).

objectives and may be made the object of attack.<sup>150</sup> These classes of persons include:

- combatants, such as military ground, air, and naval units, or unprivileged belligerents;<sup>151</sup> and
- civilians taking a direct part in hostilities.<sup>152</sup>

However, the following classes of persons are not military objectives:

- military medical and religious personnel, unless they commit acts harmful to the enemy;<sup>153</sup>
- military medical units, unless they have forfeited their protected status;<sup>154</sup>
- combatants placed *hors de combat*;<sup>155</sup> and
- *parlementaires*.<sup>156</sup>

5.6.3 Objects That Are Military Objectives. Military objectives, insofar as objects are concerned, include “any object which by its nature, location, purpose or use makes an effective contribution to military action and whose total or partial destruction, capture or neutralization, in the circumstances ruling at the time, offers a definite military advantage.”<sup>157</sup>

This definition of military objective may be viewed as a way of evaluating whether military necessity exists to attack an object.<sup>158</sup> It may also be applied outside the context of conducting attacks to assess whether the seizure or destruction of an object is justified by

---

<sup>150</sup> See CCW PROTOCOL III ON INCENDIARY WEAPONS art. 2(4) (referring to “combatants or other military objectives”); ICRC AP COMMENTARY 635 (¶2017) (“It should be noted that the definition [of military objective in AP I] is limited to objects but it is clear that members of the armed forces are military objectives, ...”).

<sup>151</sup> Refer to § 5.7 (Combatants).

<sup>152</sup> Refer to § 5.8 (Civilians Taking a Direct Part in Hostilities).

<sup>153</sup> Refer to § 7.8.3 (Loss of Protection for Medical and Religious Personnel From Being Made the Object of Attack).

<sup>154</sup> Refer to § 7.10.3 (Loss of Protection of Military Medical Units and Facilities From Being Made the Object of Attack).

<sup>155</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

<sup>156</sup> Refer to § 12.5.4 (Rights of Inviolability of the *Parlementaire*).

<sup>157</sup> CCW AMENDED MINES PROTOCOL art. 2(6). See also CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(3) (same); 10 U.S.C. § 950p(a)(1) (“The term ‘military objective’ means combatants and those objects during hostilities which, by their nature, location, purpose, or use, effectively contribute to the war-fighting or war-sustaining capability of an opposing force and whose total or partial destruction, capture, or neutralization would constitute a definite military advantage to the attacker under the circumstances at the time of an attack.”). Consider AP I art. 52(2) (“In so far as objects are concerned, military objectives are limited to those objects which by their nature, location, purpose or use make an effective contribution to military action and whose total or partial destruction, capture or neutralization, in the circumstances ruling at the time, offers a definite military advantage.”).

<sup>158</sup> Refer to § 2.2 (Military Necessity).

military necessity.<sup>159</sup>

5.6.4 Objects Categorically Recognized as Military Objectives. Two types of objects are categorically recognized as military objectives. In other words, the definition of military objective is always considered to be met as a matter of law with regard to these objects. Thus, these objects may be made the object of attack without specifically applying the analysis discussed in § 5.6.5 (Definition of Military Objective for Objects: A Two-Part Test).

5.6.4.1 Military Equipment and Bases. First, certain objects belonging to the armed forces and used in military operations are recognized as military objectives.<sup>160</sup> This includes:

- Military ground, air, and naval equipment (other than identifiable medical equipment or transport),<sup>161</sup> including vehicles, ships, weapons, munitions, and supplies, such as
  - strategic and tactical integrated air defense systems;
  - missile launching equipment and positions; and
  - command and control equipment.
- Military bases, such as army, air, and naval bases (other than military medical facilities, POW camps, and civilian internee camps), whether used for training, billeting, or staging, or offensive or defensive purposes, such as
  - headquarters or command and control facilities;
  - defense ministries; and
  - intelligence facilities.

5.6.4.2 Objects Containing Military Objectives. Second, objects that contain military objectives are military objectives.<sup>162</sup> For example,

---

<sup>159</sup> Refer to § 5.17 (Seizure and Destruction of Enemy Property); § 5.17.2.1 (Using the Military Objective Definition to Assess Whether the Seizure or Destruction of Enemy Property Is Justified by Military Necessity).

<sup>160</sup> 2004 UK MANUAL ¶5.4.1 (“The term ‘military objective’ includes combatant members of the enemy armed forces and their military weapons, vehicles, equipment, and installations.”); 2006 AUSTRALIAN MANUAL ¶5.27 (“The term ‘military objective’ includes combatant members of the enemy armed forces and their military weapons, vehicles, equipment and installations.”); 2001 CANADIAN MANUAL ¶407(1) (“The following are generally accepted as being military objectives: a. military bases, warehouses, petroleum storage areas, ports and airfields; and b. military aircraft, weapons, ammunition, buildings and objects that provide administrative and logistical support for military operations.”).

<sup>161</sup> For devices to facilitate identification of military medical units, transport, and equipment, refer to § 7.15 (Display of the Distinctive Emblem to Facilitate Identification).

<sup>162</sup> ROGERS, LAW ON THE BATTLEFIELD 36 (“A civilian object which contains military personnel or things of military significance is considered a military objective.”); 2001 CANADIAN MANUAL ¶407(2) (“Civilian vessels, aircraft, vehicles and buildings are military objectives if they contain combatants, military equipment or supplies.”). Cf.

- Storage and production sites for military equipment, including
  - missile production and storage facilities; and
  - nuclear, biological, and chemical weapons research and production facilities; and
- Facilities in which combatants are sheltering or billeting.<sup>163</sup>

5.6.5 Definition of Military Objective for Objects: A Two-Part Test. The definition of military objective insofar as objects are concerned may be divided into two parts, both of which must be met for the object to be considered a military objective: (1) that the object somehow makes an effective contribution to military action; and (2) attacking, capturing, or neutralizing the object, in the circumstances, offers a definite military advantage.<sup>164</sup>

Generally, the reason why the object meets the first part of the definition also satisfies the second part of the definition. In other words, attacking the object in the circumstances will offer a definite military advantage because it seeks to preclude the object from effectively contributing to the enemy's military action. Moreover, the two parts are not necessarily connected because the concept of definite military advantage is broader than simply denying the adversary the benefit of an object's effective contribution to its military operations.<sup>165</sup> These broader aspects of "military advantage" may also be relevant in evaluating whether an attack is expected to be excessive under the principle of proportionality.<sup>166</sup>

The following discussion elaborates upon the definition of *military objective*.

5.6.6 By Its Nature, Location, Purpose, or Use Makes an Effective Contribution to Military Action. The first part of the test is whether the object, by its nature, location, purpose, or use makes an effective contribution to the enemy's military action.

5.6.6.1 Nature, Location, Purpose, or Use. The nature, location, purpose, or use of the object may contribute to the object making an effective contribution to the enemy's military action. The issue is whether, in total, an effective contribution is made; one factor alone

---

CCW PROTOCOL III ON INCENDIARY WEAPONS art. 2(4) (plants "used to cover, conceal, or camouflage combatants or other military objectives," may be attacked with incendiary weapons).

<sup>163</sup> 1956 FM 27-10 (Change No. 1 1976) ¶40 (giving as examples of legitimate objects of attack "a place which is occupied by a combatant military force or through which such a force is passing," as well as "[f]actories producing munitions and military supplies, military camps, warehouses storing munitions and military supplies, ports and railroads being used for the transportation of military supplies, and other places devoted to the support of military operations or the accommodation of troops"); ICRC AP COMMENTARY 701 (¶2265) ("If combat is taking place within a city or a town, and there is fighting from house to house, which is frequently the case, it is clear that the situation becomes very different and that any building sheltering combatants becomes a military objective.").

<sup>164</sup> ICRC AP COMMENTARY 635 (¶2018) ("The definition comprises two elements: a) the nature, location, purpose or use which makes an effective contribution to military action; b) the total or partial destruction, capture or neutralization which in the circumstances ruling at the time offers a definite military advantage. Whenever these two elements are simultaneously present, there is a military objective in the sense of the Protocol.").

<sup>165</sup> Refer to § 5.6.7.3 (Definite Military Advantage).

<sup>166</sup> Refer to § 5.12.2 (Concrete and Direct Military Advantage Expected to Be Gained).

need not provide the effective contribution. In addition, nature, location, purpose, or use need not be viewed as mutually exclusive concepts; rather, these concepts may be understood to overlap.

“Nature” refers to the type of object and may be understood to refer to objects that are *per se* military objectives. For example, military equipment and facilities, by their nature, make an effective contribution to military action.<sup>167</sup> On the other hand, “nature” can also be understood to refer to objects that may be used for military purposes as discussed below.

The location of an object may provide an effective contribution to military action. For example, during military operations in urban areas, a house or other structure that would ordinarily be a civilian object may be located such that it provides cover to enemy forces or would provide a vantage point from which attacks could be launched or directed. The word “location” also helps clarify that an area of land can be militarily important and therefore a military objective.<sup>168</sup>

“Use” refers to the object’s present function. For example, using an otherwise civilian building to billet combatant forces makes the building a military objective.<sup>169</sup> Similarly, using equipment and facilities for military purposes, such as using them as a command and control center or a communications station, would result in such objects providing an effective contribution to the enemy’s military action.

“Purpose” means the intended or possible use in the future.<sup>170</sup> For example, runways at a civilian airport could qualify as military objectives because they may be subject to immediate military use in the event that runways at military air bases have been rendered unserviceable or inoperable.<sup>171</sup> Similarly, the possibility that bridges or tunnels would be used to assist in the adversary’s military operations in the future could result in such objects providing an effective contribution to the enemy’s military action, even though they are not being used at that moment for such purposes.

5.6.6.2 *Make an Effective Contribution to Military Action.* The object must make or be intended to make an effective contribution to military action; however, this contribution need not be “direct” or “proximate.”<sup>172</sup> For example, an object might make an effective, but

---

<sup>167</sup> ICRC AP COMMENTARY 636 (¶2020) (“A closer look at the various criteria used [*i.e.*, nature, purpose, location, or use] reveals that the first refers to objects which, by their *nature*, make an effective contribution to military action. This category comprises all objects directly used by the armed forces: weapons, equipment, transports, fortifications, depots, buildings occupied by armed forces, staff headquarters, communications centres etc.”). *Refer to* § 5.6.4 (Objects Categorically Recognized as Military Objectives).

<sup>168</sup> *Refer to* § 5.6.8.4 (Examples of Military Objectives – Places of Military Significance).

<sup>169</sup> *Refer to* § 5.6.4.2 (Objects Containing Military Objectives).

<sup>170</sup> *See, e.g.*, 2006 AUSTRALIAN MANUAL ¶5.29 (“**Purpose** means the future intended use of an object while ‘use’ means its present function.”); 2004 UK MANUAL ¶5.4.4 (“e. ‘Purpose’ means the future intended use of an object while ‘use’ means its present function.”).

<sup>171</sup> *Refer to* § 5.6.8.3 (Examples of Military Objectives – Transportation Objects).

<sup>172</sup> *Cf.* BOTHE, PARTSCH, & SOLF, NEW RULES 324 (AP I art. 52, ¶2.4.3) (noting that “[m]ilitary objectives must make an ‘effective contribution to military action’ ... does not require a direct connection with combat operations”

remote, contribution to the enemy's military action and nonetheless meet this aspect of the definition. Similarly, an object might be geographically distant from most of the fighting and nonetheless satisfy this element.

Military action has a broad meaning and is understood to mean the general prosecution of the war.<sup>173</sup> It is not necessary that the object provide immediate tactical or operational gains or that the object make an effective contribution to a specific military operation. Rather, the object's effective contribution to the war-fighting or war-sustaining capability of an opposing force is sufficient.<sup>174</sup> Although terms such as "war-fighting," "war-supporting," and "war-sustaining" are not explicitly reflected in the treaty definitions of military objective, the United States has interpreted the military objective definition to include these concepts.<sup>175</sup>

5.6.7 Whose Total or Partial Destruction, Capture, or Neutralization, in the Circumstances Ruling at the Time, Offers a Definite Military Advantage. In addition to making an effective contribution to the adversary's military action, the attack of the object must also, in the circumstances ruling at the time, offer a definite military advantage for the object to be considered a "military objective."

5.6.7.1 Capture or Neutralization. The definition of military objective incorporates considerations beyond whether an object's destruction is justified. It also incorporates considerations of whether the object's capture and neutralization would offer a

---

and that "a civilian object may become a military objective and thereby lose its immunity from deliberate attack through use which is only indirectly related to combat action, but which nevertheless provides an effective contribution to the military phase of a Party's overall war effort.").

<sup>173</sup> ROGERS, LAW ON THE BATTLEFIELD 36 ("The term *military action* appears to have a wide meaning equating to the general prosecution of the war.").

<sup>174</sup> See APPENDIX TO 1985 CJCS MEMO ON AP I 51 ("Under this definition [of military objective in AP I], an area of land could, for example, be a military objective, as could political and economic activities that support the enemy's war effort."); BOTHE, PARTSCH, & SOLF, NEW RULES 324 (AP I art. 52, ¶2.4.2) (noting that military objectives may include "activities providing administrative and logistical support to military operations such as transportation and communications systems, railroads, airfields and port facilities and industries of fundamental importance for the conduct of the armed conflict."). Cf. 10 U.S.C. § 950p(a)(1) ("The term 'military objective' means ... those objects during hostilities which, by their nature, location, purpose, or use, effectively contribute to the war-fighting or war-sustaining capability of an opposing force.") (emphasis added).

<sup>175</sup> Brian Egan, Legal Adviser, Department of State, *Remarks to the American Society of International Law: International Law, Legal Diplomacy, and the Counter-ISIL Campaign*, Apr. 1, 2016 ("In particular, I'd like to spend a few minutes walking through some of the targeting rules that the United States regards as customary international law applicable to all parties in a NIAC: ... Insofar as objects are concerned, military objectives are those objects which by their nature, location, purpose or use make an effective contribution to military action and whose total or partial destruction, capture or neutralization, in the circumstances ruling at the time, offers a definite military advantage. The United States has interpreted this definition to include objects that make an effective contribution to the enemy's war-fighting or war-sustaining capabilities."). See also W. Hays Parks, *Asymmetries and the Identification of Legitimate Military Objectives*, in INTERNATIONAL HUMANITARIAN LAW FACING NEW CHALLENGES 100 (2007) ("War-sustaining and/or war-fighting reflect State practice. Historical evidence and the description of the target sets agreed upon by NATO governments in ALLIED FORCE support the idea that nations have, do, and will attack not only an enemy's war-fighting capability, but also his capacity to sustain the conflict."); Horace B. Robertson, *The Principle of the Military Objective in the Law of Armed Conflict*, 8 UNITED STATES AIR FORCE ACADEMY JOURNAL OF LEGAL STUDIES 35, 50-51 (1997) (comparing the definition of military objective in the 1995 Commander's Handbook on the Law of Naval Operations to the definition of military objective in AP I).

military advantage.

Capture refers to the possibility of seizure (rather than destruction), which would confer a military advantage. For example, the seizure of a city may be a military objective because of its strategic location.<sup>176</sup>

Neutralization refers to a military action that denies an object to the enemy without capturing or destroying it. For example, a specific area of land may be neutralized by planting landmines on or around it, and thus denying it to the enemy.<sup>177</sup>

5.6.7.2 *In the Circumstances Ruling at the Time.* The attack of the object must, “in the circumstances ruling at the time,” offer a definite military advantage for the object to be considered a military objective.

Nonetheless, the purpose (*i.e.*, future use) of the object can be considered in whether an object provides an effective contribution to the adversary’s military action.<sup>178</sup> In addition, the definite military advantage offered by the attack need not be immediate, but may be assessed in the full context of the war strategy.<sup>179</sup>

5.6.7.3 *Definite Military Advantage.* “Definite” means a concrete and perceptible military advantage, rather than one that is merely hypothetical or speculative.<sup>180</sup>

The advantage need not be immediate.<sup>181</sup> For example, the military advantage in the attack of an individual bridge may not be seen immediately (particularly if, at the time of the attack, there is no military traffic in the area), but can be established by the overall effort to isolate enemy military forces on the battlefield through the destruction of bridges.

“Military advantage” refers to the advantage anticipated from an attack when considered as a whole, and not only from its isolated or particular parts.<sup>182</sup> Similarly, “military advantage”

---

<sup>176</sup> Refer to § 5.6.8.4 (Examples of Military Objectives – Places of Military Significance).

<sup>177</sup> Refer to § 5.6.8.4 (Examples of Military Objectives – Places of Military Significance).

<sup>178</sup> Refer to § 5.6.6.1 (Nature, Location, Purpose, or Use).

<sup>179</sup> Refer to § 5.6.7.3 (Definite Military Advantage).

<sup>180</sup> For example, W. Hays Parks, *Asymmetries and the Identification of Legitimate Military Objectives*, in INTERNATIONAL HUMANITARIAN LAW FACING NEW CHALLENGES footnotes 88 and 170 and accompanying text (2007) (giving an example of a case in which objects did not meet this standard, “the 25 February 1991 recommendation by the U.S. Air Force component of US Central Command for an air attack on a Baghdad statue of Saddam Hussayn and another statue, consisting of matching sets of arms with crossed swords (modeled on the arms of Saddam Hussayn), called the Victory Arch or Crossed Swords Monument,” because the military assessment was that such targets were worthless and any value from attacking them was too speculative).

<sup>181</sup> See J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Senator Edward Kennedy, Sept. 22, 1972, reprinted in 67 AJIL 122, 124 (1973) (“Turning to the deficiencies in the Resolutions of the Institut de Droit International, and with the foregoing in view, it cannot be said that Paragraph 2, which refers to legal restraints that there must be an ‘immediate’ military advantage, reflects the law of armed conflict that has been adopted in the practices of States.”).

<sup>182</sup> See, e.g., France, *Statement on Ratification of AP I*, translated in SCHINDLER & TOMAN, THE LAWS OF ARMED CONFLICTS: A COLLECTION OF CONVENTIONS, RESOLUTIONS, AND OTHER DOCUMENTS 800 (2004) (“It is the

is not restricted to immediate tactical gains, but may be assessed in the full context of the war strategy.<sup>183</sup>

The definite military advantage offered by damaging, destroying, or neutralizing the object may result from denying the enemy the ability to use this object in its military operations (*i.e.*, to benefit from the object's effective contribution to the military action). For example, the attack or seizure of objects with a common military purpose, such as bridges used, or potentially available to be used, in lines of communication would offer a definite military advantage.

The military advantage from an attack is not limited to denying the enemy the benefit of that object's contribution to its military action. For example, in a diversionary attack, the military advantage to be gained from attacking an object would result from diverting enemy forces' resources and attention.<sup>184</sup> The military advantage from an attack may involve a variety of other considerations, including improving the security of the attacking force.

The military advantage from an attack may result from harm to the morale of enemy forces.<sup>185</sup> Diminishing the morale of the civilian population and their support for the war effort does not provide a definite military advantage.<sup>186</sup> However, attacks that are otherwise lawful are

---

understanding of the Government of the French Republic that the expression 'military advantage' contained in paragraphs 5(b) of Article 51, 2 of Article 52 and 2(a)(iii) of Article 57, is intended to refer to the advantage anticipated from the attack considered as a whole and not from isolated or particular parts of the attack."); Spain, *Statement on Ratification of AP I*, Apr. 21, 1989, 1537 UNTS 389, 392 ("Articles 51, 52 and 57. It is understood that the words 'military advantage' in these articles refer to the advantage expected from the attack as a whole and not from isolated parts of it.").

<sup>183</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 613 ("Military advantage' is not restricted to tactical gains, but is linked to the full context of a war strategy, in this instance, the execution of the Coalition war plan for liberation of Kuwait."). See also Eritrea Ethiopia Claims Commission, *Partial Award: Western Front, Aerial Bombardment and Related Claims, Eritrea's Claims 1, 3, 5, 9-13, 14, 21, 25 & 26*, ¶113 (Dec. 19, 2005) ("The Commission is of the view that the term 'military advantage' can only properly be understood in the context of the military operations between the Parties taken as a whole, not simply in the context of a specific attack. Thus, with respect to the present claim, whether the attack on the power station offered a definite military advantage must be considered in the context of its relation to the armed conflict as a whole at the time of the attack.").

<sup>184</sup> For example, BOTHE, PARTSCH, & SOLF, NEW RULES 325 (AP I art. 52, ¶2.4.4) ("Thus, prior to the 1944 cross channel operation, the Allies attacked a large number of bridges, fuel dumps, airfields and other targets in the *Pas de Calais*. These targets made an effective contribution to German military action in that area. The primary military advantage of these attacks anticipated by the Allies, however, was not to reduce German military strength in that area, but to deceive the Germans into believing that the Allied amphibious assault would occur in the *Pas de Calais* instead of the beaches of Normandy."); MILITARY ANALYSIS DIVISION, THE UNITED STATES STRATEGIC BOMBING SURVEY (PACIFIC): JAPANESE AIR POWER 10 (1946) ("The [Doolittle] raid was too small to do substantial physical damage, but its repercussions on the planning level of the high command were considerable. ... [A]ttention was focused on the eastern approaches to the home islands, and additional impetus given the prewar plan to attack Midway and the Aleutians. ... [T]he Japanese began to implement their plans for air defense of Japan which before that time had received scant consideration. ... A total of four Army fighter groups were held in Japan throughout 1942 and 1943 for the defense of the homeland when the Japanese Navy was urgently demanding that the Army send reinforcements to the Solomons.").

<sup>185</sup> Refer to § 5.4.6.3 (Harassing Fires).

<sup>186</sup> Cf. LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 528-29 (§214eb) ("It is also probable that till the end of the War the aerial bombardment by the Allies did not assume the complexion of bombing for the exclusive purpose of spreading terror and shattering the morale of the population at large—though this was the inevitable concomitant

not rendered unlawful if they happen to result in diminished civilian morale.<sup>187</sup>

The military advantage expected to be gained from an attack might not be readily apparent to the enemy or to outside observers because, for example, the expected military advantage might depend on the commander's strategy or assessments of classified information.

**5.6.8 Examples of Objects Often Regarded as Military Objectives.** The following types of objects generally have met the definition of "military objective" in past conflicts, but may not be military objectives in all circumstances: (1) leadership facilities; (2) communications objects; (3) transportation objects; (4) places of military significance; and (5) economic objects associated with military operations or with war-supporting or war-sustaining industries.

This list of examples is not exclusive (*i.e.*, an object could fall in more than one category in this list), and this list is not exhaustive (*i.e.*, an object outside these categories may nonetheless meet the definition of military objective). Lastly, this list is not conclusive, *i.e.*, whether an example is, in fact, a military objective, must be assessed according to the definition of military objective.

**5.6.8.1 Examples of Military Objectives – Leadership Facilities.** Facilities used by enemy leaders as headquarters for military operations or otherwise to command military operations have often been regarded as military objectives.<sup>188</sup> In some cases, enemy leaders themselves may be made the object of attack.<sup>189</sup>

**5.6.8.2 Examples of Military Objectives – Communications Objects.** Communications objects, such as facilities, networks, and equipment that could be used for command and control of military operations or intelligence gathering, have often been regarded

---

of strategic target-bombing. Thus what remained of the protection afforded by International Law to the civilian population in the matter of aerial bombardment was the principle—generally acknowledged by the Allies, though not always capable of being adhered to in practice—that the bombing of towns or purely residential parts of towns which were not in any way related to the war efforts of the enemy was unlawful. At the same time abstention from such bombing could also be explained by reference to considerations of economy militating against costly operations for the sake of achieving purely psychological effect—considerations the disregard of which rendered the use by Germany of the flying bomb and long-range projectiles not only unlawful but, in the judgment of many, also detrimental to her own war effort.”).

<sup>187</sup> For example, Judith A. Miller, *Commentary*, 78 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 107, 110 (2002) (“I will readily admit that, aside from directly damaging the military electrical power infrastructure, NATO wanted the civilian population to experience discomfort, so that the population would pressure Milosevic and the Serbian leadership to accede to UN Security Council Resolution 1244, but the intended effects on the civilian population were secondary to the military advantage gained by attacking the electrical power infrastructure.”). *Refer to* § 5.2.2 (Essentially Negative Duties to Respect Civilians and to Refrain From Directing Military Operations Against Them).

<sup>188</sup> For example, 2006 AUSTRALIAN MANUAL ¶2.8, at 2-5 (“HISTORICAL EXAMPLE—AVOIDING COLLATERAL DAMAGE, AFGHANISTAN 2002-2003 ... **A major focus in Afghanistan was the leadership.** This meant targeting residences and road convoys, with difficulties of identification and the consequent acceptance of non-combatant casualties as a necessary proportionate risk to achieve the military objective.”).

<sup>189</sup> *Refer to* § 5.7.4 (Leaders).

as military objectives.<sup>190</sup>

5.6.8.3 *Examples of Military Objectives – Transportation Objects.* Transportation objects, including facilities (e.g., port facilities and airfields) and equipment that could be part of lines of communication (e.g., highways, railroads, waterways, and bridges connecting military forces with logistics depots and storage areas), have often been regarded as military objectives.<sup>191</sup>

5.6.8.4 *Examples of Military Objectives – Places of Military Significance.* Areas of land that are militarily significant may constitute military objectives.<sup>192</sup> For example, anti-

---

<sup>190</sup> For example, ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶¶71-72 (Jun. 13, 2000) (“On 23 April 1999, at 0220, NATO intentionally bombed the central studio of the RTS (state-owned) broadcasting corporation at 1 Aberdareva Street in the centre of Belgrade. ... The bombing of the TV studio was part of a planned attack aimed at disrupting and degrading the C3 (Command, Control and Communications) network. In co-ordinated attacks, on the same night, radio relay buildings and towers were hit along with electrical power transformer stations.”).

<sup>191</sup> For example, DoD statement, Dec. 26, 1966, X WHITEMAN’S DIGEST 427 (“U.S. policy is to target military targets only, particularly those which have a direct impact on the movement of men and supplies into South Vietnam. These targets include but are not limited to roads, railroads, bridges, road junctions, POL facilities, barracks and supply depots. ... In the specific case of Nam Dinh and Phu Li, targets have been limited to railroad and highway bridges, railroad yards, POL dumps and air defense sites.”); Report of the United Nations Command Operations in Korea for the Period 1 to 15 August 1950, enclosure to *Note Dated 2 September 1950 From the Permanent Representative of the United States of America to the President of the Security Council Transmitting the Third Report of the United Nations Command in Korea in Accordance with the Security Council Resolution of 7 July 1950 (S/1588)*, U.N. Doc. S/1756 (Sept. 2, 1950) (“United States Far East Air Force medium bombers struck heavy blows at north Korean industrial targets of military significance and at the north Korean transportation system. The Korean manufacturing complex, the largest in the Far East, and the oil refinery at Wonsan, have been extensively damaged by successive attacks. The marshalling yards in Pyongyang, Wonsan, and Seoul have been repeatedly attacked, as have yards of less consequence. A general transportation interdiction program continues with destruction of rail and highway bridges along principal lines of communication. The rail and port transportation center at Najin-dong was also bombed.”).

<sup>192</sup> See, e.g., Canada, *Statement on Ratification of AP I*, Nov. 20, 1990, 1591 UNTS 462, 465 (“It is the understanding of the Government of Canada in relation to Article 52 that: a. A specific area of land may be a military objective if, because of its location or other reasons specified in the Article as to what constitutes a military objective, its total or partial destruction, capture or neutralization in the circumstances governing at the time offers a definite military advantage, ... .”); Germany, *Statement on Ratification of AP I*, Feb. 14, 1991, 1607 UNTS 526, 529 (“Article 52 of Additional Protocol I is understood by the Federal Republic of Germany to mean that a specific area of land may also be a military objective if it meets all requirements of Article 52, paragraph 2.”); Netherlands, *Statement on Ratification of AP I*, Jun. 26, 1987, 1477 UNTS 300 (“It is the understanding of the Government of the Kingdom of the Netherlands that a specific area of land may also be a military objective if, because of its location or other reasons specified in paragraph 2, its total or partial destruction, capture, or neutralization in the circumstances ruling at the time, offers a definite military advantage;”); New Zealand, *Statement on Ratification of AP I*, Feb. 8, 1988, 1499 UNTS 358 (“In relation to Article 52, it is the understanding of the Government of New Zealand that a specific area of land may be a military objective if, because of its location or other reasons specified in the Article, its total or partial destruction, capture or neutralisation in the circumstances ruling at the time offers a definite military advantage.”); United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 77 (“*Re: Article 52* It is the understanding of the United Kingdom that: A specific area of land may be a military objective if, because of its location or other reasons specified in this Article, its total or partial destruction, capture or neutralization in the circumstances ruling at the time offers definite military advantage; ... .”).

tank mines may be laid on such areas in order to block enemy forces' tanks.<sup>193</sup> Areas of land that have been regarded as military objectives have included, for example:

- road networks;<sup>194</sup>
- known or suspected enemy avenues of approach or withdrawal;
- mountain passes, hills, defiles, and bridgeheads;<sup>195</sup> and
- villages, towns, or cities whose seizure is militarily important.<sup>196</sup>

5.6.8.5 *Examples of Military Objectives – Economic Objects Associated With Military Operations.* Economic objects associated with military operations or with war-supporting or war-sustaining industries have been regarded as military objectives.

Electric power stations are generally recognized to be of sufficient importance to a State's capacity to meet its wartime needs of communication, transport, and industry so as usually to qualify as military objectives during armed conflicts.<sup>197</sup>

---

<sup>193</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“The United States understands that an area of land itself can be a legitimate military objective for the purpose of the use of landmines, if its neutralization or denial, in the circumstances applicable at the time, offers a military advantage.”).

<sup>194</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 612 (“A bridge or highway vital to daily commuter and business traffic can be equally crucial to military traffic, or support for a nation's war effort. Railroads, airports, seaports, and the interstate highway system in the United States have been funded by the Congress in part because of US national security concerns, for example; each proved invaluable to the movement of US military units to various ports for deployment to Southwest Asia (SWA) for Operations Desert Shield and Desert Storm. Destruction of a bridge, airport, or port facility, or interdiction of a highway can be equally important in impeding an enemy's war effort.”).

<sup>195</sup> ROGERS, LAW ON THE BATTLEFIELD 37.

<sup>196</sup> For example, MILAN N. VEGO, JOINT OPERATIONAL WARFARE: THEORY AND PRACTICE II-34-II-35 (Reprint of 1st ed., 2009) (“In purely military terms, a capital is normally an operational objective to be seized or defended. The reason is that no enemy's capital can possibly physically include the enemy's entire armed forces, or even most of the ground forces. Therefore, the defeat of enemy forces defending the capital (and most other large cities as well) would normally amount to the accomplishment of an operational objective that in some situations could have strategic consequences for the war's outcome. ... General Mark Clark, the Fifth Army's commander, was directed by President Franklin D. Roosevelt and General George Marshall to take Rome as quickly as possible, and in any event before the planned Normandy landing. The Allied troops entered Rome on 6 June 1944, the same day the Allied forces landed in Normandy.”).

<sup>197</sup> Eritrea Ethiopia Claims Commission, *Partial Award: Western Front, Aerial Bombardment and Related Claims, Eritrea's Claims 1, 3, 5, 9-13, 14, 21, 25 & 26*, ¶117 (Dec. 19, 2005) (“The Commission agrees with Ethiopia that electric power stations are generally recognized to be of sufficient importance to a State's capacity to meet its wartime needs of communication, transport and industry so as usually to qualify as military objectives during armed conflicts. The Commission also recognizes that not all such power stations would qualify as military objectives, for example, power stations that are known, or should be known, to be segregated from a general power grid and are limited to supplying power for humanitarian purposes, such as medical facilities, or other uses that could have no effect on the State's ability to wage war.”). For example, W. Hays Parks, *Air War and the Law of War*, 32 AIR FORCE LAW REVIEW 1, 168-69 (1990) (“In selecting North Vietnamese power sources for attack, target intelligence authorities identified the Lang Chi hydroelectric facility, a Soviet-built, 122,500-kilowatt electric generating plant

Oil refining and distribution facilities and objects associated with petroleum, oil, and lubricant products (including production, transportation, storage, and distribution facilities) have also been regarded as military objectives.<sup>198</sup>

## 5.7 COMBATANTS

In general, combatants, whether privileged or unprivileged, may be made the object of attack, provided they have not been placed *hors de combat*.

**5.7.1 Armed Forces and Groups and Liability to Being Made the Object of Attack.** Membership in the armed forces or belonging to an armed group makes a person liable to being made the object of attack regardless of whether he or she is taking a direct part in hostilities.<sup>199</sup> This is because the organization's hostile intent may be imputed to an individual through his or her association with the organization. Moreover, the individual, as an agent of the group, can be assigned a combat role at any time, even if the individual normally performs other functions for the group.<sup>200</sup>

Thus, combatants may be made the object of attack at all times, regardless of the activities in which they are engaged at the time of attack.<sup>201</sup> For example, combatants who are

---

63 miles up the Red River Valley from Hanoi that was capable of supplying seventy-five percent of the electricity for Hanoi's industrial and defense needs. Without question, it was a valuable target. ... The Lang Chi hydroelectric facility was attacked by Air Force F-4 Phantoms using LGB [laser-guided bombs] on 10 June 1972. They placed twelve 2000-pound LGB through the roof of the 50-by-100-foot building, thereby destroying the electric generating plant without breach of the dam, despite the fact that the roof of the power plant was 100 feet below the top of the dam.”).

<sup>198</sup> For example, Department of Defense, *Report to Congress: Kosovo/Operation Allied Force, After-Action Report*, 82 (Jan. 31, 2000) (“Following the end of Operation Allied Force, NATO released an initial assessment of their attack effectiveness against a number of targets. These targets destroyed or significantly damaged include: ... • Fifty-seven percent of petroleum reserves; • All Yugoslav oil refineries ... .”); Department of Defense, *Report to the Senate and House Appropriations Committees regarding international policies and procedures regarding the protection of natural and cultural resources during times of war*, Jan. 19, 1993, reprinted as Appendix VIII in Patrick J. Boylan, *Review of the Convention for the Protection of Cultural Property in the Event of Armed Conflict (The Hague Convention of 1954)* 201, 204 (1993) (“Similarly, natural resources that may be of value to an enemy in his war effort are legitimate targets. The 1943 air raids on the Ploesti oil fields in Romania, and the Combined Bomber Offensive campaign against Nazi oil, were critical to allied defeat of Germany in World War II, for example. What is prohibited is unnecessary destruction, that is, destruction of natural resources that has no or limited military value.”).

<sup>199</sup> See, e.g., ICRC AP COMMENTARY 1453 (¶4789) (“Those who belong to armed forces or armed groups may be attacked at any time.”); GREENSPAN, *MODERN LAW OF LAND WARFARE* 57 (explaining that “as members of the armed forces [non-combat military personnel except for medical personnel and chaplains] are legitimate objects of attack by the enemy,”).

<sup>200</sup> *Gherebi v. Obama*, 609 F. Supp. 2d 43, 69 (D.D.C. 2009) (noting that “many members of the armed forces who, under different circumstances, would be ‘fighters’ may be assigned to non-combat roles at the time of their apprehension” and that “[t]hese individuals are no less a part of the military command structure of the enemy, and may assume (or resume) a combat role at any time because of their integration into that structure.”), *abrogated on different grounds by Uthman v. Obama*, 637 F.3d 400, 403 (D.C. Cir. 2011).

<sup>201</sup> W. Hays Parks, Chief, International Law Branch, Office of the Judge Advocate General, Department of the Army, *Executive Order 12333 and Assassination*, Nov. 2, 1989, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3411, 3413 (“Combatants are liable to attack at any time or place,

standing in a mess line, engaging in recreational activities, or sleeping remain the lawful object of attack, provided they are not placed *hors de combat*.<sup>202</sup>

5.7.1.1 *U.S. Practice in Declaring Forces Hostile*. In DoD practice, an armed force or group may be designated as hostile (also known as declaring the force hostile) in rules of engagement. This means that personnel to whom such rules of engagement apply are authorized to attack the members of the group. In DoD practice, the authority to designate a group as hostile has been limited to only certain officials.<sup>203</sup>

5.7.2 Categories of Persons Who Are Combatants for the Purpose of Assessing Their Liability to Attack. The following categories of persons are combatants who may be made the object of attack because they are sufficiently associated with armed forces or armed groups:

- members of the armed forces of a State;<sup>204</sup>
- members of militia and volunteer corps;<sup>205</sup>

---

regardless of their activity when attacked. Nor is a distinction made between combat and combat service support personnel with regard to the right to be attacked as combatants; combatants are subject to attack if they are participating in hostilities through fire, maneuver, and assault; providing logistic, communications, administrative, or other support; or functioning as staff planners. An individual combatant's vulnerability to lawful targeting (as opposed to assassination) is not dependent upon his or her military duties, or proximity to combat as such.") (citations omitted).

<sup>202</sup> For example, 101st Airborne ROE Card, Iraq (2003), reprinted in CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, 1 LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 315-16 (2004) ("1. Fire at all members of forces DECLARED HOSTILE. You may immediately fire upon any force that you know to be hostile. ... **1. Facts:** An enemy unit maneuvers within your weapon range. **Response:** Shoot to eliminate the threat and accomplish the mission. **2. Facts:** An unarmed enemy soldier sees you and does nothing but stare at you. **Response:** Shoot to eliminate the threat. The soldier is a member of a Hostile Force and is lawful target.").

<sup>203</sup> For example, CHAIRMAN OF THE JOINT CHIEFS OF STAFF INSTRUCTION 3121.01B, *Standing Rules of Engagement/Standing Rules for the Use of Force for U.S. Forces*, A-2, ¶2(b) (June 13, 2005), reprinted in INTERNATIONAL AND OPERATIONAL LAW DEPARTMENT, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, OPERATIONAL LAW HANDBOOK 94 (2014) ("Once a force is declared hostile by appropriate authority, U.S. forces need not observe a hostile act or demonstrated hostile intent before engaging the declared hostile force. Policy and procedures regarding the authority to declare forces hostile are provided in Appendix A to Enclosure A, paragraph 3."); CHAIRMAN OF THE JOINT CHIEFS OF STAFF INSTRUCTION 3121.01A, *Standing Rules of Engagement for US Forces*, A-12, ¶6 (Jan. 15, 2000), reprinted in CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, *Rules of Engagement (ROE) Handbook for Judge Advocates* 96 (May 1, 2000) ("6. Declaring Forces Hostile. Once a force is declared hostile by appropriate authority, US units need not observe a hostile act or a demonstration of hostile intent before engaging that force. The responsibility for exercising the right and obligation of national self-defense and as necessary declaring a force hostile is a matter of the utmost importance. All available intelligence, the status of international relationships, the requirements of international law, an appreciation of the political situation, and the potential consequences for the United States must be carefully weighed. The exercise of the right and obligation of national self-defense by competent authority is separate from and in no way limits the commander's right and obligation to exercise unit self-defense. The authority to declare a force hostile is limited as amplified in Appendix A of this Enclosure.").

<sup>204</sup> Refer to § 4.5 (Armed Forces of a State).

<sup>205</sup> Refer to § 4.6 (Other Militia and Volunteer Corps).

- participants in a *levée en masse*;<sup>206</sup>
- persons belonging to non-State armed groups;<sup>207</sup> and
- leaders whose responsibilities include the operational command and control of the armed forces or of a non-State armed group.<sup>208</sup>

5.7.3 Persons Belonging to Non-State Armed Groups. Like members of an enemy State’s armed forces, individuals who are formally or functionally part of a non-State armed group that is engaged in hostilities may be made the object of attack because they likewise share in their group’s hostile intent.<sup>209</sup>

5.7.3.1 *Formal Membership*. Formal membership in an armed group might be indicated by formal or direct information or by other types of information.

In some cases, there might be formal or direct information indicating membership in the group. This might include:

- using a rank, title, or style of communication;
- taking an oath of loyalty to the group or the group’s leader;
- wearing a uniform or other clothing, adornments, or body markings that identify members of the group; or
- documents issued or belonging to the group that identify the person as a member, such as membership lists, identity cards, or membership applications.<sup>210</sup>

Although in some cases this type of formal or direct information might be available, in many cases it will not be available because members of these groups seek to conceal their association with that group. In such cases, the following types of information might indicate that a person is a member of a non-State armed group:

---

<sup>206</sup> Refer to § 4.7 (*Levée en Masse*).

<sup>207</sup> Refer to § 5.7.3 (Persons Belonging to Non-State Armed Groups).

<sup>208</sup> Refer to § 5.7.4 (Leaders).

<sup>209</sup> Cf. *Al-Adahi v. Obama*, 613 F.3d 1102, 1108 (D.C. Cir. 2010) (“The district court seemed to think it important to determine Al-Adahi’s motive for attending the al-Qaida training camp. We do not understand why. Whatever his motive, the significant points are that al-Qaida was intent on attacking the United States and its allies, that bin Laden had issued a *fatwa* announcing that every Muslim had a duty to kill Americans, and that Al-Adahi voluntarily affiliated himself with al-Qaida.”).

<sup>210</sup> Cf. *Alsabri v. Obama*, 684 F.3d 1298, 1304-05 (D.C. Cir. 2012) (upholding a district court’s determination that petitioner was part of the Taliban, al-Qaida, or associated forces, including by considering “an English translation of a document appearing to be Alsabri’s application to attend an al Qaeda training camp” and “an English-language translation of a 92-page collection of documents that the government maintains were internal Taliban or al Qaeda records” that “were captured by Coalition forces from the ‘Director of Al-Qa’ida Security Training Office,’”).

- acting at the direction of the group or within its command structure;
- performing a function for the group that is analogous to a function normally performed by a member of a State’s armed forces;
- taking a direct part in hostilities, including consideration of the frequency, intensity, and duration of such participation;<sup>211</sup>
- accessing facilities, such as safehouses, training camps, or bases used by the group that outsiders would not be permitted to access;<sup>212</sup>
- traveling along specific clandestine routes used by those groups;<sup>213</sup> or
- traveling with members of the group in remote locations or while the group conducts operations.<sup>214</sup>

5.7.3.2 *Functional Membership*. Some non-State armed groups might not be organized in a formal command structure, as generally is required for POW status during international armed conflict.<sup>215</sup> Such groups might lack a formal distinction between those

---

<sup>211</sup> Refer to § 5.8.3 (“Taking a Direct Part in in Hostilities”).

<sup>212</sup> Cf. *Alsabri v. Obama*, 684 F.3d 1298, 1306 (D.C. Cir. 2012) (“[I]t is difficult to believe that ‘Taliban fighters would allow an individual to infiltrate their posts near a battle zone unless that person was understood to be a part of the Taliban.’”) (quoting *Alsabri v. Obama*, 764 F.Supp.2d 60, 94 (D.D.C. 2011)); *Uthman v. Obama*, 637 F.3d 400, 406 (D.C. Cir. 2011) (“In two prior cases, this Court has stated that staying at an al Qaeda guesthouse is ‘powerful—indeed ‘overwhelming’—evidence’ that an individual is part of al Qaeda. *Al-Adahi*, 613 F.3d at 1108 (quoting *Al-Bihani v. Obama*, 590 F.3d 866, 873 footnote 2 (D.C. Cir. 2010)) (alterations omitted). The reason for that assessment is plain: It is highly unlikely that a visitor to Afghanistan would end up at an al Qaeda guesthouse by mistake, either by the guest or by the host.”).

<sup>213</sup> Cf. *Suleiman v. Obama*, 670 F.3d 1311, 1314 (D.C. Cir. 2012) (“There is no dispute that Suleiman’s travel was initiated at the suggestion of and facilitated by a Taliban recruiter, and that he traveled a well-worn path to Afghanistan frequently used by Taliban recruits. We have stated that such travel may indicate that an individual traveled to Afghanistan to join the Taliban.”) (citing *Al Odah v. United States*, 611 F.3d 8, 14 (D.C. Cir. 2010)); *Uthman v. Obama*, 637 F.3d 400, 405 (D.C. Cir. 2011) (“[T]raveling to Afghanistan along a distinctive path used by al Qaeda members can be probative evidence that the traveler was part of al Qaeda.”); *Al Odah v. United States*, 611 F.3d 8, 16 (D.C. Cir. 2010) (finding it significant that “Al Odah traveled to Afghanistan on a series of one-way plane tickets purchased with cash in a manner consistent with travel patterns of those going to Afghanistan to join the Taliban and al Qaeda”).

<sup>214</sup> Cf. *Hussain v. Obama*, 718 F.3d 964, 968-69 (D.C. Cir. 2013) (“Evidence that Hussain bore a weapon of war while living side-by-side with enemy forces on the front lines of a battlefield at least invites — and may very well compel — the conclusion that he was loyal to those forces. We have repeatedly affirmed the propriety of this common-sense inference.”); *Uthman v. Obama*, 637 F.3d 400, 405 (D.C. Cir. 2011) (“Being captured in the company of a Taliban fighter and two al Qaeda members and Osama bin Laden bodyguards 12 miles from Tora Bora in December 2001 might not be precisely the same as being captured in a German uniform 12 miles from the Normandy beaches in June 1944. But it is still, at a minimum, highly significant. And absent a credible alternative explanation, the location and date of Uthman’s capture, together with the company he was keeping, strongly suggest that he was part of al Qaeda.”).

<sup>215</sup> Refer to § 4.6.3 (Being Commanded by a Person Responsible for His or Her Subordinates).

members and non-members who nonetheless participate in the hostile activities of the group.<sup>216</sup>

An individual who is integrated into the group such that the group's hostile intent may be imputed to him or her may be deemed to be functionally (*i.e.*, constructively) part of the group, even if not formally a member of the group. The integration of the person into the non-State armed group and the inference that the individual shares the group's intention to commit hostile acts distinguish such an individual from persons who are merely sympathetic to the group's goals.<sup>217</sup>

The following may indicate that a person is functionally a member of a non-State armed group:

- following directions issued by the group or its leaders;<sup>218</sup>
- taking a direct part in hostilities on behalf of the group on a sufficiently frequent or intensive basis;<sup>219</sup> or
- performing tasks on behalf of the group similar to those provided in a combat, combat support, or combat service support role in the armed forces of a State.

5.7.3.3 *Dissociation or Renunciation.* A person may not be made the object of attack based on his or her association with a non-State armed group if that association has clearly been severed. Relevant factors in determining when an individual has unambiguously ceased to be a member of a non-State armed group may include:

- whether the individual has formally ceased to be a member of the group, such as by filing relevant paperwork or by otherwise formally renouncing any allegiance to the group;
- whether there are concrete and verifiable facts or persuasive indicia that he or she has affirmatively returned to peaceful pursuits, such as by participating in a reconciliation program and swearing an oath of loyalty to the government; and
- the amount of time that has passed since the person participated in the activities of the group in question, if coupled with other indicia of dissociation or renunciation.<sup>220</sup>

---

<sup>216</sup> Compare § 4.7 (*Levée en Masse*).

<sup>217</sup> Compare § 5.8.3.2 (Examples of Acts Not Considered Taking a Direct Part in Hostilities).

<sup>218</sup> Cf. *Uthman v. Obama*, 637 F.3d 400, 403 (D.C. Cir. 2011) (“[D]emonstrating that someone is part of al Qaeda’s command structure is sufficient to show that person is part of al Qaeda.”); *Al-Adahi v. Obama*, 613 F.3d 1102, 1109 (D.C. Cir. 2010) (“When the government shows that an individual received and executed orders from al-Qaida members in a training camp, that evidence is sufficient (but not necessary) to prove that the individual has affiliated himself with al-Qaida.”); *Salahi v. Obama*, 625 F.3d 745, 752 (D.C. Cir. 2010) (“Evidence that an individual operated within al-Qaida’s command structure is ‘sufficient but is not necessary to show he is ‘part of’ the organization.’” (quoting *Bensayah v. Obama*, 610 F.3d 718, 725 (D.C. Cir. 2010))).

<sup>219</sup> Refer to § 5.8.3 (“Taking a Direct Part in in Hostilities”).

<sup>220</sup> Stephen Pomper, Assistant Legal Adviser for Political-Military Affairs, Department of State, *Toward a Limited Consensus on the Loss of Civilian Immunity in Non-International Armed Conflict: Making Progress Through*

The onus is on the person having belonged to the armed group to demonstrate clearly and affirmatively to the opposing forces that he or she will no longer participate in the activities of the group.<sup>221</sup> Moreover, if persons who have dissociated from an armed group rejoin the group or fail to cease permanently their participation in hostilities, they may be made the object of attack.<sup>222</sup>

5.7.4 Leaders. Military leaders are subject to attack on the same basis as other members of the armed forces. Similarly, leaders of non-State armed groups are also subject to attack on the same basis as other members of the group. There is no objection to making a specific enemy leader who is a combatant the object of attack.<sup>223</sup>

Leaders who are not members of an armed force or armed group (including heads of State, civilian officials, and political leaders) may be made the object of attack if their responsibilities include the operational command or control of the armed forces. For example, as the commander-in-chief of the U.S. armed forces, the President would be a legitimate target in wartime, as would, for example, the Prime Minister of a constitutional monarchy. In contrast, the reigning monarch of a constitutional monarchy with an essentially ceremonial role in State affairs may not be made the object of attack.

In addition to leaders who have a role in the operational chain of command, leaders taking a direct part in hostilities may also be made the object of attack.<sup>224</sup> Planning or authorizing a combat operation is an example of taking a direct part in hostilities.<sup>225</sup>

As a matter of practice, attacks on the national leadership of an enemy State have often been avoided on the basis of comity and to help ensure that authorities exist with whom peace agreements may be concluded.

---

*Practice*, 88 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 181, 189 (2012) (“Relevant factors in determining that an individual has ceased to be a member of an organized armed group include the amount of time that has passed since that individual has taken relevant action on behalf of the group in question, and whether he or she affirmatively has disassociated himself or herself from the organized armed group.”).

<sup>221</sup> Wolff Heintschel von Heinegg & Peter Dreist, *The 2009 Kunduz Air Attack: The Decision of the Federal Prosecutor-General on the Dismissal of Criminal Proceedings Against Members of the German Armed Forces*, 53 GERMAN YEARBOOK OF INTERNATIONAL LAW 833, 844-45 (2010) (“Here, the Prosecutor-General takes the opportunity to identify different categories of lawful targets under the law of non-international armed conflict. As regards fighters belonging to a non-State party to the conflict, their qualification as lawful targets is not based on some form of legal status but on the mere fact of their functional integration into an organized armed group. If they are so integrated, they do not qualify as civilians even though they may eventually pursue civilian occupation. They only regain their civilian status if they clearly and irrevocably renounce their function in the organized armed group. Hence, the Prosecutor-General is not prepared to consider Taliban fighters to be lawful targets only insofar and for such time as they take a direct part in armed hostilities.”). Compare § 5.9.3 (Persons Who Have Surrendered).

<sup>222</sup> Refer to § 5.8.4.2 (No “Revolving Door” Protection); § 5.8.4.1 (Permanently Ceased Participation in Hostilities).

<sup>223</sup> Refer to § 5.4.6.4 (Attacks on Specific Individuals).

<sup>224</sup> Refer to § 5.8.3 (“Taking a Direct Part in in Hostilities”).

<sup>225</sup> Refer to § 5.8.3.1 (Examples of Taking a Direct Part in Hostilities).

## 5.8 CIVILIANS TAKING A DIRECT PART IN HOSTILITIES

Civilians who take a direct part in hostilities forfeit protection from being made the object of attack.

5.8.1 Civilians Taking a Direct Part in Hostilities – Notes on Terminology. This manual uses the phrase “direct part in hostilities” to indicate what activities cause a civilian to forfeit his or her protection from being made the object of attack. This usage does not mean that the United States has adopted the direct participation in hostilities rule that is expressed in Article 51 of AP I.

5.8.1.1 “Active” Versus “Direct”. The phrases “active part in hostilities” and “direct part in hostilities” have been used to describe when civilians forfeit their protection from being made the object of attack. As noted above, this manual uses “direct” rather than “active” in this context, although as discussed below, this usage should not be regarded as indicating a substantive difference between “active” and “direct.”

Common Article 3 of the 1949 Geneva Conventions refers to “[p]ersons taking no active part in the hostilities.” AP I and AP II use the phrase “direct part in hostilities.”<sup>226</sup> In addition, AP I uses the phrase “direct part in hostilities” to address other situations apart from the protection of civilians.<sup>227</sup>

Although the words *active* and *direct* can mean different things in the English language, the terms have sometimes been treated as the same for the purpose of applying the direct participation in hostilities rule.<sup>228</sup> One of the reasons for treating the terms the same is that although the English language version of the 1949 Geneva Conventions uses “active,” and the English language versions of AP I and AP II use “direct,” the French language versions of these treaties use the same word, “*directement*.”<sup>229</sup> Because the English and French language versions

---

<sup>226</sup> AP I art. 51(3) (“Civilians shall enjoy the protection [from being made the object of attack], unless and for such time as they take a direct part in hostilities.”); AP II art. 13(3) (“Civilians shall enjoy the protection [from being made the object of attack], unless and for such time as they take a direct part in hostilities.”).

<sup>227</sup> See, e.g., AP I art. 43(2) (“Members of the armed forces of a Party to a conflict (other than medical personnel and chaplains covered by Article 33 of the Third Convention) are combatants, that is to say, they have the right to participate directly in hostilities”); AP I art. 47(2) (“A mercenary is any person who ... [inter alia] (b) Does, in fact, take a direct part in the hostilities ...”).

<sup>228</sup> See, e.g., Prosecutor v. Tadić, ICTY Trial Chamber, IT-94-1-T, *Judgment*, ¶¶614-15 (May 7, 1997) (“The rules contained in paragraph 1 of Common Article 3 proscribe a number of acts which: ... (iii) are committed against persons taking no active part in hostilities ... the test the Trial Chamber has applied is to ask whether, at the time of the alleged offence, the alleged victim of the proscribed acts was directly taking part in hostilities, being those hostilities in the context of which the alleged offences are said to have been committed. If the answer to that question is negative, the victim will enjoy the protection of the proscriptions contained in Common Article 3.”); Prosecutor v. Akayesu, ICTR Trial Chamber, ICTR-96-4-T, *Judgment*, ¶629 (Sept. 2, 1998) (“‘The victims referred to in this Indictment were, at all relevant times, persons not taking an active part in the hostilities’. This is a material averment for charges involving Article 4 inasmuch as Common Article 3 is for the protection of ‘persons taking no active part in the hostilities’ (Common Article 3(1)), and Article 4 of Additional Protocol II is for the protection of, ‘all persons who do not take a direct part or who have ceased to take part in hostilities.’ These phrases are so similar that, for the Chamber’s purposes, they may be treated as synonymous.”).

<sup>229</sup> GC art. 3, 973 UNTS 289 (“*ne participant pas directement aux hostilités*”).

of the 1949 Geneva Conventions, AP I, and AP II are equally authentic, States negotiating these treaties may not have intended a difference between “active” and “direct.”<sup>230</sup>

Another reason for treating the terms “active” and “direct” the same in this context is that they are understood to be terms of art addressing a particular legal standard, and there are a range of views as to what that legal standard means. Thus, there may be different views about what the underlying standard means, even when there is agreement on the appropriate term to describe that standard. Accordingly, there seems to be little value in distinguishing between the two terms for the purposes of applying this legal rule.

#### 5.8.1.2 *AP I, Article 51(3) Provision on Direct Participation in Hostilities.*

Although, as drafted, Article 51(3) of AP I does not reflect customary international law, the United States supports the customary principle on which Article 51(3) is based.<sup>231</sup> Similarly, although parts of the ICRC’s interpretive guidance on the meaning of direct participation in hostilities are consistent with customary international law, the United States has not accepted significant parts of the ICRC’s interpretive guidance as accurately reflecting customary international law.<sup>232</sup> But some States that are Parties to AP I may interpret and apply Article 51(3) of AP I consistent with the customary international law standard.

5.8.2 Persons to Whom This Rule Applies. For the purpose of applying the rule discussed in this section, “civilians” are persons who do not fall within the categories of combatants listed in § 5.7.2 (Categories of Persons Who Are Combatants for the Purpose of Assessing Their Liability to Attack). Accordingly, for the purposes of this section, “civilians” include:

---

<sup>230</sup> See, e.g., GC art. 150 (“The present Convention is established in English and in French. Both texts are equally authentic.”); AP I art. 102 (“The original of this Protocol, of which the Arabic, Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited with the depositary, which shall transmit certified true copies thereof to all the Parties to the Conventions.”); AP II art. 28 (same).

<sup>231</sup> See John B. Bellinger, III, Legal Adviser, Department of State, *Unlawful Enemy Combatants*, Jan. 17, 2007, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 915-16 (“While we agree that there is a general principle of international law that civilians lose their immunity from attack when they engage in hostilities, we disagree with the contention that the provision as drafted in AP I [Article 51(3)] is customary international law.”); Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 426 (1987) (“We also support the principle that the civilian population not be used to shield military objectives or operations from attack, and that immunity not be extended to civilians who are taking part in hostilities. This corresponds to provisions in articles 51 and 52[ of AP I].”).

<sup>232</sup> See, e.g., Stephen Pomper, Assistant Legal Adviser for Political-Military Affairs, Department of State, *Toward a Limited Consensus on the Loss of Civilian Immunity in Non-International Armed Conflict: Making Progress Through Practice*, 88 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 181, 186 (2012) (“From the operational perspective, the feedback [on the ICRC’s interpretive guidance] was that the report was too rigid and complex, and did not give an accurate picture of State practice or (in some respects) of a practice to which States could realistically aspire.”); *Al-Bihani v. Obama*, 590 F.3d 866, 885 (D.C. Cir. 2010) (Williams, J., concurring) (“The work itself explicitly disclaims that it should be read to have the force of law. . . . Even to the extent that Al Bihani’s reading of the Guidance is correct, then, the best he can do is suggest that we should follow it on the basis of its persuasive force. As against the binding language of the AUMF and its necessary implications, however, that force is insubstantial.”).

- members of the civilian population;<sup>233</sup>
- persons authorized to accompany the armed forces;<sup>234</sup> and
- members of the merchant marine and civil aircraft of parties to a conflict.<sup>235</sup>

5.8.2.1 *Persons Belonging to Hostile, Non-State Armed Groups*. Some States may choose to characterize persons who belong to hostile, non-State armed groups that do not qualify for status as lawful combatants as “civilians” who may not be attacked unless they are taking a direct part in hostilities. However, these States may also characterize the act of joining and remaining a member of an armed group that is engaged in hostilities as a form of taking a direct part in hostilities that continuously deprives these individuals of their protection from being made the object of attack.<sup>236</sup>

The U.S. approach has generally been to refrain from classifying those belonging to non-State armed groups as “civilians” to whom this rule would apply. The U.S. approach has been to treat the status of belonging to a hostile, non-State armed group as a separate basis upon which a person is liable to attack, apart from whether he or she has taken a direct part in hostilities.<sup>237</sup> Either approach may yield the same result: members of hostile, non-State armed groups may be made the object of attack unless they are placed *hors de combat*. However, practitioners, especially when working with coalition partners, should understand that different legal reasoning is sometimes applied in reaching that result.

5.8.3 “Taking a Direct Part in in Hostilities”. Unlike the treaty definition of “military objective” for objects,<sup>238</sup> the United States is not a Party to a treaty with a comparable provision defining taking a direct part in hostilities for the purpose of assessing what conduct renders civilians liable to being made the object of attack.

At a minimum, taking a direct part in hostilities includes actions that are, by their nature and purpose, intended to cause actual harm to the enemy.<sup>239</sup> Taking a direct part in hostilities extends beyond merely engaging in combat and also includes certain acts that are an integral part of combat operations or that effectively and substantially contribute to an adversary’s ability to

---

<sup>233</sup> Refer to § 4.8.1.5 (General Usage of “Civilian” in This Manual).

<sup>234</sup> Refer to § 4.15 (Persons Authorized to Accompany the Armed Forces).

<sup>235</sup> Refer to § 4.16 (Crews of Merchant Marine Vessels or Civil Aircraft).

<sup>236</sup> Stephen Pomper, Assistant Legal Adviser for Political-Military Affairs, Department of State, *Toward a Limited Consensus on the Loss of Civilian Immunity in Non-International Armed Conflict: Making Progress Through Practice*, 88 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 181, 193 endnote 22 (2012) (“As discussed below, there is a range of views on whether individuals who pass the membership threshold lose their civilian status (and are therefore unprivileged belligerents) or remain civilians but are deemed to be continuously taking a direct part in hostilities and accordingly continuously lose their protections from being made the object of attack.”).

<sup>237</sup> Refer to § 5.7.3 (Persons Belonging to Non-State Armed Groups).

<sup>238</sup> Refer to § 5.6.3 (Objects That Are Military Objectives).

<sup>239</sup> ICRC AP COMMENTARY 619 (“Thus ‘direct’ participation means acts of war which by their nature or purpose are likely to cause actual harm to the personnel and equipment of the enemy armed forces.”).

conduct or sustain combat operations.<sup>240</sup> However, taking a direct part in hostilities does not encompass the general support that members of the civilian population provide to their State's war effort, such as by buying war bonds.<sup>241</sup>

Whether an act by a civilian constitutes taking a direct part in hostilities is likely to depend highly on the context, such as the weapon systems or methods of warfare employed by the civilian's side in the conflict.<sup>242</sup> For example, in some contexts, training and logistical support may be viewed as taking a direct part in hostilities, while in other contexts it might not.<sup>243</sup> The following considerations may be relevant:<sup>244</sup>

---

<sup>240</sup> See GUENTER LEWY, *AMERICA IN VIETNAM* 232 (1978) ("We know that on occasion in Vietnam women and children placed mines and booby traps, and that villagers of all ages and sexes, willingly or under duress, served as porters, built fortifications, or engaged in other acts helping the communist forces. It is well established that once civilians act as support personnel they cease to be noncombatants and are subject to attack.").

<sup>241</sup> Stephen Pomper, Assistant Legal Adviser for Political-Military Affairs, Department of State, *Toward a Limited Consensus on the Loss of Civilian Immunity in Non-International Armed Conflict: Making Progress Through Practice*, 88 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 181, 189 (2012) ("With respect to determining what it means to take 'direct part in hostilities,' as a threshold matter there seems to be a common view that direct participation in hostilities stands in contrast to support by a general population to a nation's war effort. Civilians who are contributing to a nation's war effort accordingly do not by dint of this alone lose their protection.").

<sup>242</sup> See Nils Melzer, *Third Expert Meeting on the Notion of Direct Participation in Hostilities: Summary Report*, 35 (2005) ("Since, currently, the qualification of a particular act as direct participation in hostilities often depends on the particular circumstances and the technology or weapons system employed, it is unlikely that an abstract definition of direct participation in hostilities applicable to every situation can be found.").

<sup>243</sup> For example, Kenneth Watkin, *Opportunity Lost: Organized Armed Groups and the ICRC "Direct Participation in Hostilities" Interpretive Guidance*, 42 N.Y.U. JOURNAL OF INTERNATIONAL LAW AND POLITICS 641, 680-81 (2010) ("For example in Iraq, it has been noted, 'IED and suicide-bomber cells are essentially combatant units themselves,' where the most technically skilled bomb builder 'also doubles as a training instructor.' Further, 'bombers do not 'just turn up to their target'. They need a logistical infrastructure, which consists of individuals ... who provide everything from reconnaissance of the potential target ... to the provision of a safe house and food, and the explosives-laden vehicle or suicide belt.' ... To limit direct participation to persons who place or detonate explosives is an artificial division of what is fundamentally a group activity. ... The person who is key in planning and facilitating such deadly attacks must be a valid target as a direct participant in hostilities ...") (first and second ellipses in original).

<sup>244</sup> Stephen Pomper, Assistant Legal Adviser for Political-Military Affairs, Department of State, *Toward a Limited Consensus on the Loss of Civilian Immunity in Non-International Armed Conflict: Making Progress Through Practice*, 88 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 181, 189 ("Any determination that a civilian is taking part in hostilities (and thus loses immunity from being made the object of attack) will be highly situational and needs to be made by a decisionmaker taking the following considerations into account: • Nature of the harm: Is the individual's activity directed at (i) adversely affecting one party's military capacity or operations or enhancing the capacity/operations of the other, or (ii) killing, injuring or damaging civilian objects or persons? • Causation/integration between action and harm: Is there a sufficiently direct causal link between the individual's relevant act and the relevant harm, or does the act otherwise form an integral part of coordinated action resulting in that harm? (Although it is not enough that the act merely occurs during hostilities, there is no requirement that the act be only a single causal step removed from the harm.) • Nexus to hostilities: Is the individual's activity linked to an ongoing armed conflict and is it intended either to disadvantage one party, or advance the interests of an opposing party, in that conflict? ... There is also a range of views about whether each of the foregoing three factors must be present in order to make a determination that an individual is directly participating in hostilities (or whether a 'totality of the circumstances' approach should govern), ... . Moreover, there is a range of views concerning the

- the degree to which the act causes harm to the opposing party's persons or objects, such as
  - whether the act is the proximate or "but for" cause of death, injury, or damage to persons or objects belonging to the opposing party; or
  - the degree to which the act is likely to affect adversely the military operations or military capacity of the opposing party;
- the degree to which the act is connected to the hostilities, such as
  - the degree to which the act is temporally or geographically near the fighting; or
  - the degree to which the act is connected to military operations;
- the specific purpose underlying the act, such as
  - whether the activity is intended to advance the war aims of one party to the conflict to the detriment of the opposing party;
- the military significance of the activity to the party's war effort, such as
  - the degree to which the act contributes to a party's military action against the opposing party;
  - whether the act is of comparable or greater value to a party's war effort than acts that are commonly regarded as taking a direct part in hostilities;<sup>245</sup>
  - whether the act poses a significant threat to the opposing party;
- the degree to which the activity is viewed inherently or traditionally as a military one, such as
  - whether the act is traditionally performed by military forces in conducting military operations against the enemy (including combat, combat support, and

---

relevance of geographic and temporal proximity of an individual's actions to particular hostile acts in ongoing hostilities.”).

<sup>245</sup> W. Hays Parks, Chief, International Law Branch, Office of the Judge Advocate General, Department of the Army, *Executive Order 12333 and Assassination*, Nov. 2, 1989, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3411, 3416 (“Finally, one rule of thumb with regard to the likelihood that an individual may be subject to lawful attack is his (or her) immunity from military service if continued service in his (or her) civilian position is of greater value to a nation’s war effort than that person’s service in the military. A prime example would be civilian scientists occupying key positions in a weapons program regarded as vital to a nation’s national security or war aims. Thus, more than 900 of the World War II Project Manhattan personnel were civilians, and their participation in the U.S. atomic weapons program was of such importance as to have made them liable to legitimate attack. Similarly, the September 1944 Allied bombing raids on the German rocket sites at Peenemunde regarded the death of scientists involved in research and development at that facility to have been as important as destruction of the missiles themselves.”).

combat service support functions);<sup>246</sup> or

- whether the activity involves making decisions on the conduct of hostilities, such as determining the use or application of combat power.

5.8.3.1 *Examples of Taking a Direct Part in Hostilities*. The following acts are generally considered taking a direct part in hostilities that would deprive civilians who perform them of protection from being made the object of attack. These examples are illustrative and not exhaustive:

- taking up or bearing arms against the opposing party, or otherwise personally trying to kill, injure, or capture personnel or damage material belonging to the opposing party,<sup>247</sup> such as
  - defending military objectives against enemy attack (*e.g.*, manning an antiaircraft gun, acting as a bodyguard for an enemy combatant);<sup>248</sup>
  - acting as a member of a weapons crew;
  - engaging in an act of sabotage; or
  - emplacing mines or improvised explosive devices;
- preparing for combat and returning from combat;
- planning, authorizing, or implementing a combat operation against the opposing party, even if that person does not personally use weapons or otherwise employ destructive force in connection with the operation;<sup>249</sup>

---

<sup>246</sup> Kenneth Watkin, *Controlling the Use of Force: A Role for Human Rights Norms in Contemporary Armed Conflict*, 98 AJIL 1, 17 (2004) (“The argument that civilians are protected unless engaged in overtly aggressive acts like carrying weapons may be particularly difficult to maintain where armed groups are technically accorded civilian status by virtue of not being considered lawful combatants. To the extent that civilians fulfill the same function as combatants, either in the armed forces or as part of the organization of an ‘illegitimate’ nonstate actor, they are logically subject to targeting under the same provisions of international humanitarian law.”).

<sup>247</sup> 2006 AUSTRALIAN MANUAL ¶5.36 (“Civilians are only protected as long as they refrain from taking a direct part in hostilities. ... Civilians bearing arms and taking part in military operations are clearly taking part in hostilities;”); ICRC AP COMMENTARY 618-19 (¶1943) (“It seems that the word ‘hostilities’ covers not only the time that the civilian actually makes use of a weapon, but also, for example, the time that he is carrying it, as well as situations in which he undertakes hostile acts without using a weapon.”).

<sup>248</sup> 2004 UK MANUAL ¶5.3.3 (“Whether civilians are taking a direct part in hostilities is a question of fact. Civilians manning an anti-aircraft gun or engaging in sabotage of military installations are doing so.”).

<sup>249</sup> See Public Committee against Torture in Israel, *et al. v. Government of Israel, et al.*, HCJ 769/02, Israel Supreme Court Sitting as the High Court of Justice, ¶37 (Dec. 11, 2005) (“We have seen that a civilian causing harm to the army is taking ‘a direct part’ in hostilities. What says the law about those who enlist him to take a direct part in the hostilities, and those who send him to commit hostilities? Is there a difference between his direct commanders and those responsible for them? Is the ‘direct’ part taken only by the last terrorist in the chain of command, or by the entire chain? In our opinion, the ‘direct’ character of the part taken should not be narrowed merely to the person committing the physical act of attack. Those who have sent him, as well, take ‘a direct part’. The same goes for the

- providing or relaying information of immediate use in combat operations, such as
  - acting as an artillery spotter or member of a ground observer corps or otherwise relaying information to be used to direct an airstrike, mortar attack, or ambush;<sup>250</sup> and
  - acting as a guide or lookout for combatants conducting military operations;<sup>251</sup>
- supplying weapons and ammunition, whether to conventional armed forces or non-state armed groups, or assembling weapons (such as improvised explosive devices) in close geographic or temporal proximity to their use,<sup>252</sup> such as
  - delivering ammunition to the front lines; or
  - outfitting and preparing a suicide bomber to conduct an attack.

5.8.3.2 *Examples of Acts Not Considered Taking a Direct Part in Hostilities.* The following acts are generally not considered taking a direct part in hostilities that would deprive civilians who perform them of protection from being made the object of attack. These examples are illustrative and not exhaustive:

- mere sympathy or moral support for a party's cause;
- general contributions made by citizens to their State's war effort (*e.g.*, buying war bonds or paying taxes to the government that will ultimately be used to fund the armed forces);
- police services (*e.g.*, police officers who maintain public order against common criminals

---

person who decided upon the act, and the person who planned it. It is not to be said about them that they are taking an indirect part in the hostilities. Their contribution is direct (and active) (*see* Schmitt, at p. 529).”).

<sup>250</sup> 2013 GERMAN MANUAL ¶518 (“Accordingly, civilians who perform concrete actions that constitute direct participation in hostilities (*e.g.* conducting military operations, transporting weapons and ammunition to combat units, operating weapon systems, transmitting target data that leads immediately to the engagement of a military objective, etc.) can be engaged as military objectives while performing such actions.”).

<sup>251</sup> *For example*, 101st Airborne ROE Card, Iraq (2003), *reprinted in* CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, I LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 315, 316 (2004) (“**7. Facts:** Your unit comes under fire, you notice a young civilian woman who appears to be pointing to the location where friendly troops are concealed, based on her actions, those locations are then targeted. **Response:** Shoot to eliminate the threat ...”).

<sup>252</sup> *See, e.g.*, United States v. Hamdan 6 (Dec. 19, 2007), *reversed on different grounds*, 696 F.3d 1238 (D.C. Cir. 2012) (“The Commission also finds that the accused directly participated in those hostilities by driving a vehicle containing two surface-to-air missiles in both temporal and spatial proximity to both ongoing combat operations [in the nearby town of Takta Pol and the more distant Kandahar]. ... Although Kandahar was a short distance away, the accused's past history of delivering munitions to Taliban and al Qaeda fighters, his possession of a vehicle containing surface to air missiles, and his capture while driving in the direction of a battle already underway, satisfies the requirement of ‘direct participation.’”).

during armed conflict);<sup>253</sup>

- independent journalism or public advocacy (e.g., opinion journalists who write columns supporting or criticizing a State's war effort);<sup>254</sup>
- working in a munitions factory or other factory that is not in geographic or temporal proximity to military operations but that is supplying weapons, materiel, and other goods useful to the armed forces of a State;<sup>255</sup> or
- providing medical care or impartial humanitarian assistance.<sup>256</sup>

Although performing these activities does not make a person liable to being made the object of attack, performing these activities also does not immunize a person from attack if that person takes a direct part in hostilities or is otherwise lawfully made the object of attack.

5.8.3.3 *Taking a Direct Part in Hostilities and Standards for the Use of Force in Self-Defense.* In the practice of the United States, the U.S. armed forces have been authorized to use necessary and proportional force in self-defense in response to hostile acts or demonstrated hostile intent.<sup>257</sup>

In some cases, hostile acts or demonstrated hostile intent may also constitute taking a

---

<sup>253</sup> Refer to § 4.23.1 (Police as Civilians).

<sup>254</sup> Refer to § 4.24.1 (Status of Journalists – Generally Civilian). Cf. ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶47 (Jun. 13, 2000) (“Whether the media constitutes a legitimate target group is a debatable issue. If the media is used to incite crimes, as in Rwanda, then it is a legitimate target. If it is merely disseminating propaganda to generate support for the war effort, it is not a legitimate target.”).

<sup>255</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 303 (AP I art. 51, ¶2.4.2.2) (noting that during international armed conflict, “workers in defense plants or those engaged in distribution or storage of military supplies in rear areas, do not pose an immediate threat to the adversary and therefore would not be subject to deliberate individual attack”). However, these individuals assume the risk of incidental injury as a result of attacks against those factories. Refer to § 5.12.3.3 (Civilian Workers Who Support Military Operations In or On Military Objectives).

<sup>256</sup> Principles Related to the Protection of Medical Care Provided by Impartial Humanitarian Organizations During Armed Conflict, ¶I, attachment to Ash Carter, Secretary of Defense, *Memorandum re: Principles Related to the Protection of Medical Care Provided by Impartial Humanitarian Organizations During Armed Conflict*, Oct. 3, 2016 (“Medical care during armed conflict is an activity that is fundamentally of a neutral, humanitarian, and non-combatant character.”).

<sup>257</sup> For example, CHAIRMAN OF THE JOINT CHIEFS OF STAFF INSTRUCTION 3121.01B, *Standing Rules of Engagement/Standing Rules for the Use of Force for U.S. Forces*, ¶6b(1) (June 13, 2005), reprinted in INTERNATIONAL AND OPERATIONAL LAW DEPARTMENT, THE JUDGE ADVOCATE GENERAL'S LEGAL CENTER & SCHOOL, U.S. ARMY, OPERATIONAL LAW HANDBOOK 95 (2007) (“Unit commanders always retain the inherent right and obligation to exercise unit self-defense in response to a hostile act or demonstrated hostile intent. Unless otherwise directed by a unit commander as detailed below, military members may exercise individual self-defense in response to a hostile act or demonstrated hostile intent.”); CHAIRMAN OF THE JOINT CHIEFS OF STAFF INSTRUCTION 3121.01A, *Standing Rules of Engagement for US Forces*, Enclosure A, A-1 (Jan. 15, 2000), reprinted in INTERNATIONAL AND OPERATIONAL LAW DEPARTMENT, THE JUDGE ADVOCATE GENERAL'S SCHOOL, U.S. ARMY, JA, OPERATIONAL LAW HANDBOOK 102 (2006) (“US forces always retain the right to use necessary and proportional force for unit and individual self-defense in response to a hostile act or demonstrated hostile intent.”).

direct part in hostilities. However, hostile acts and demonstrated hostile intent in some respects may be narrower than the concept of taking a direct part in hostilities. For example, although supplying weapons and ammunition in close geographic or temporal proximity to their use is a common example of taking a direct part in hostilities, it would not necessarily constitute a hostile act or demonstrated hostile intent.

On the other hand, hostile acts and demonstrated hostile intent in some respects may be broader than the concept of taking a direct part in hostilities. For example, the use of force in response to hostile acts and demonstrated hostile intent applies outside hostilities, but taking a direct part in hostilities is limited to acts that occur during hostilities. Thus, the concept of taking a direct part in hostilities must not be understood to limit the use of force in response to hostile acts or demonstrated hostile intent.

In the practice of the United States, offensive combat operations against people who are taking a direct part in hostilities have been authorized through specific rules of engagement.

5.8.4 Duration of Liability to Attack. There has been a range of views about the duration for which civilians who have taken a direct part in hostilities forfeit protection from being made the object of attack.<sup>258</sup>

In the U.S. approach, civilians who have taken a direct part in hostilities must not be made the object of attack after they have permanently ceased their participation because there would be no military necessity for attacking them. Persons who take a direct part in hostilities, however, do not benefit from a “revolving door” of protection. There may be difficult cases not clearly falling into either of these categories, and in such situations a case-by-case analysis of the specific facts would be needed.<sup>259</sup>

5.8.4.1 Permanently Ceased Participation in Hostilities. If a civilian has permanently ceased participation in hostilities, then that person must not be made the object of attack because there is no military necessity for doing so.<sup>260</sup> The assessment of whether a person

---

<sup>258</sup> See, e.g., Nils Melzer, *Background Paper – Direct Participation on Hostilities under International Humanitarian Law – Expert Meeting of Oct. 25-26, 2004* 34 (“At one end of the spectrum were experts who preferred narrowly defining temporal scope and favoured strictly limiting loss of protection to the period where DPH is actually being carried out. At the other end were experts who said that, once a person had undertaken an act constituting DPH, that person must clearly express a will to definitively disengage and offer assurances that he or she will not resume hostilities in order to regain protection against direct attack. However, opinions varied greatly and could not easily be divided into two groups supporting distinct positions.”).

<sup>259</sup> Public Committee against Torture in Israel, *et al. v. Government of Israel, et al.*, HCJ 769/02, Israel Supreme Court Sitting as the High Court of Justice, ¶40 (Dec. 11, 2005) (“These examples point out the dilemma which the ‘for such time’ requirement presents before us. On the one hand, a civilian who took a direct part in hostilities once, or sporadically, but detached himself from them (entirely, or for a long period) is not to be harmed. On the other hand, the ‘revolving door’ phenomenon, by which each terrorist has ‘horns of the altar’ (1 Kings 1:50) to grasp or a ‘city of refuge’ (Numbers 35:11) to flee to, to which he turns in order to rest and prepare while they grant him immunity from attack, is to be avoided (*see* Schmitt, at p. 536; Watkin, at p. 12; Kretzmer, at p. 193; DINSTEIN, at p. 29; *and* Parks, at p. 118). In the wide area between those two possibilities, one finds the ‘gray’ cases, about which customary international law has not yet crystallized. There is thus no escaping examination of each and every case.”).

<sup>260</sup> Refer to § 2.3 (Humanity).

has permanently ceased participation in hostilities must be based on a good faith assessment of the available information.<sup>261</sup>

For example, a civilian might have engaged in an isolated instance of taking a direct part in hostilities. This isolated instance is likely to have involved multiple acts, because taking a direct part in hostilities normally includes deploying or moving to a position of attack and exfiltrating from an attack.<sup>262</sup> However, if this participation was an isolated instance that will not be repeated, then no military necessity for attacking that person exists after he or she has ceased taking a direct part in hostilities. Accordingly, the civilian must not be made the object of attack after he or she has ceased taking a direct part in hostilities. However, there may be other legal consequences from this isolated instance of participation. For example, such civilians may, depending on the circumstances, be detained, interned, or prosecuted because of these actions.<sup>263</sup>

5.8.4.2 *No “Revolving Door” Protection.* The law of war, as applied by the United States, gives no “revolving door” protection; that is, the off-and-on protection in a case where a civilian repeatedly forfeits and regains his or her protection from being made the object of attack depending on whether or not the person is taking a direct part in hostilities at that exact time.<sup>264</sup> Thus, for example, persons who are assessed to be engaged in a pattern of taking a direct part in hostilities do not regain protection from being made the object of attack in the time period between instances of taking a direct part in hostilities.<sup>265</sup>

---

<sup>261</sup> Refer to § 5.3 (Assessing Information Under the Law of War).

<sup>262</sup> Refer to § 5.8.3.1 (Examples of Taking a Direct Part in Hostilities).

<sup>263</sup> Refer to § 4.18 (Private Persons Who Engage in Hostilities).

<sup>264</sup> See also Kenneth Watkin, *Opportunity Lost: Organized Armed Groups and the ICRC ‘Direct Participation in Hostilities’ Interpretive Guidance*, 42 NEW YORK UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLITICS 641, 689 (2010) (“Further, on one level the term ‘revolving door’ evokes the idea of a form of carnival shooting gallery, where soldiers must wait until an opponent pops out from behind a door to be shot at. At some point, the credibility of the law begins to be undermined by suggesting an opponent can repeatedly avail themselves of such protection.”).

<sup>265</sup> Kenneth Watkin, *Opportunity Lost: Organized Armed Groups and the ICRC ‘Direct Participation in Hostilities’ Interpretive Guidance*, 42 NEW YORK UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLITICS 641, 692 (2010) (“However, given the lack of credibility associated with the term, there can be no ‘revolving door’ of protection. After the first involvement, any subsequent act demonstrating direct participation would start to provide the basis to believe that there is the beginning of a pattern of conduct that reflects an intention to regularly engage in the hostilities. Repetitious participation can be considered in determining if such persons are in reality continuously engaged in hostilities. When such participation occurs, affirmative disengagement would be required in order to establish that such persons are no longer direct participants in hostilities.”). Cf. Bill Boothby, “*And For Such Time As*”: *The Time Dimension to Direct Participation in Hostilities*, 42 NEW YORK UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLITICS 741, 765-66 (2010) (“In my view, an alternative interpretation of the treaty language is equally valid. According to this alternative view, the temporal element in the provision lies both in the phrase ‘unless and for such time’ and in the word ‘participates.’ ... If, however, a person engages in repeated acts of DPH, there is an evident artificiality in regarding that individual as having protected status during the intervals in between. Experience shows that during those periods a further act of direct participation by the persistent participator is likely to be in prospect, and the likelihood is that during those intervals he will be preparing himself for the next act, checking his equipment, obtaining any additional equipment or stores he may require, communicating with like-minded or otherwise involved individuals, refining his plan and so on. While some such activities may be DP in their own right, the more important point is that a person who is so engaged cannot be

A “revolving door” of protection would place these civilians who take a direct part in hostilities on a better footing than lawful combatants, who may be made the object of attack even when not taking a direct part in hostilities.<sup>266</sup> The United States has strongly disagreed with posited rules of international law that, if accepted, would operate to give the so-called “farmer by day, guerilla by night” greater protections than lawful combatants.<sup>267</sup> Adoption of such a rule would risk diminishing the protection of the civilian population.

5.8.5 Civilians Who Take a Direct Part in Hostilities and the Law of War. Although the concept of direct participation in hostilities may be discussed in contexts besides targeting, such as in the context of criminal liability or detention, there are often significant differences between “taking a direct part in hostilities” for targeting purposes and the standards used for assessing whether a civilian may be detained or prosecuted.

For example, whether someone may be made the object of attack for taking a direct part in hostilities is different from whether he or she may be prosecuted for his or her actions. In some cases, domestic criminal liability for support to enemy armed groups is much broader than what acts constitute “taking a direct part in hostilities.”

Similarly, the authority to detain enemy persons during wartime extends beyond detaining those who have taken a direct part in hostilities.<sup>268</sup>

## 5.9 PERSONS PLACED HORS DE COMBAT

Persons, including combatants, placed *hors de combat* may not be made the object of attack. Persons placed *hors de combat* include the following categories of persons, provided they abstain from any hostile act and do not attempt to escape:

- persons in the power of an adverse party;
- persons not yet in custody, who have surrendered;
- persons who have been rendered unconscious or otherwise incapacitated by wounds, sickness, or shipwreck; and
- persons parachuting from aircraft in distress.

5.9.1 Hors de Combat – Notes on Terminology. *Hors de combat* is a French phrase that means “out of the battle.” It is generally used as a term of art to mean persons who may not be made the object of attack because they are out of the fighting and who therefore must be treated humanely.

---

equated with a civilian who remains uninvolved in the conflict. To do so is to place at risk the respect, based on law, to be accorded to the civilian population.”).

<sup>266</sup> Refer to § 5.7.1 (Armed Forces and Groups and Liability to Being Made the Object of Attack).

<sup>267</sup> Refer to § 4.18.3 (Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status).

<sup>268</sup> Refer to § 4.8.3 (Civilians – Detention); § 4.4.2 (Combatants – POW Status During Detention).

*Hors de combat* is used in Common Article 3 of the 1949 Geneva Conventions<sup>269</sup> and has been defined in Article 41 of AP I.<sup>270</sup>

5.9.2 Persons in the Power of an Adverse Party. Persons in the power of an adverse party include all persons detained by an adverse party, such as POWs, unprivileged belligerents, retained personnel, and civilian internees. As with other categories of persons *hors de combat*, detainees must refrain from hostile acts or attempts to escape in order to be considered *hors de combat*.<sup>271</sup>

5.9.3 Persons Who Have Surrendered. Persons who are not in custody but who have surrendered are *hors de combat* and may not be made the object of attack.<sup>272</sup> In order to make a person *hors de combat*, the surrender must be (1) genuine; (2) clear and unconditional; and (3) under circumstances where it is feasible for the opposing party to accept the surrender.<sup>273</sup>

5.9.3.1 Genuine. The offer to surrender must be genuine. In addition to being legally ineffective, feigning the intent to surrender can constitute perfidy.<sup>274</sup>

5.9.3.2 Clear and Unconditional. The offer to surrender must be clear and unconditional.

Any arms being carried should be laid down. All hostile acts or resistance, or manifestations of hostile intent, including efforts to escape or to destroy items, documents, or equipment to prevent their capture by the enemy, would need to cease immediately for the offer to be clear and unconditional. Raising one's hands above one's head to show that one is not preparing to fire a weapon or engage in combat is often a sign of surrender. Waving a white flag

---

<sup>269</sup> GWS art. 3(1) (requiring humane treatment for “[p]ersons taking no active part in the hostilities, including members of armed forces who have laid down their arms and those placed *hors de combat* by sickness, wounds, detention, or any other cause”); GWS-SEA art. 3(1) (same); GPW art. 3(1) (same); GC art. 3(1) (same).

<sup>270</sup> AP I art. 41(2) (“A person is *hors de combat* if: (a) He is in the power of an adverse Party; (b) He clearly expresses an intention to surrender; or (c) He has been rendered unconscious or is otherwise incapacitated by wounds or sickness, and therefore is incapable of defending himself; provided that in any of these cases he abstains from any hostile act and does not attempt to escape.”).

<sup>271</sup> Consider AP I art. 41(2) (“A person is *hors de combat* if: (a) He is in the power of an adverse Party; ... provided that in any of these cases he abstains from any hostile act and does not attempt to escape.”).

<sup>272</sup> HAGUE IV REG. art. 23(c) (it is especially forbidden “[t]o kill or wound an enemy who, having laid down his arms, or having no longer means of defence, has surrendered at discretion;”). Consider AP I art. 41(2) (“A person is *hors de combat* if: ... (b) He clearly expresses an intention to surrender; ... provided that in any of these cases he abstains from any hostile act and does not attempt to escape.”).

<sup>273</sup> Harold Hongju Koh, Legal Adviser, Department of State, *The Lawfulness of the U.S. Operation Against Osama bin Laden*, May 19, 2011, 2011 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 558-59 (“Finally, consistent with the laws of armed conflict and U.S. military doctrine, the U.S. forces were prepared to capture bin Laden if he had surrendered in a way that they could safely accept. The laws of armed conflict require acceptance of a genuine offer of surrender that is clearly communicated by the surrendering party and received by the opposing force, under circumstances where it is feasible for the opposing force to accept that offer of surrender. But where that is not the case, those laws authorize use of lethal force against an enemy belligerent, under the circumstances presented here.”).

<sup>274</sup> Refer to § 5.22.3 (Examples of Killing or Wounding by Resort to Perfidy).

technically is not a sign of surrender, but signals a desire to negotiate.<sup>275</sup>

The surrender must be “at discretion,” *i.e.*, unconditional.<sup>276</sup> A person who offers to surrender only if certain demands are met would not be *hors de combat* until that offer has been accepted.

5.9.3.3 Under Circumstances in Which It Is Feasible to Accept. For an offer of surrender to render a person *hors de combat*, it must be feasible for the opposing party to accept the offer.<sup>277</sup> By way of comparison, a city may not be declared “undefended” (and thus essentially surrendered) if it is not open for immediate physical occupation by opposing military forces.<sup>278</sup>

The feasibility of accepting the surrender refers to whether it is practical and safe for the opposing force to take custody of the surrendering persons in the circumstances. For example, consider the situation of enemy soldiers who man an antiaircraft gun and shoot at an enemy aircraft, and then who raise their hands as if to surrender seconds before a second aircraft attacks their position. In the circumstances, it would not be feasible for the crew of the attacking aircraft to land and accept their surrender.<sup>279</sup> Similarly, a soldier fifty meters from an enemy defensive position in the midst of an infantry assault by his unit could not throw down his weapon and raise his arms (as if to indicate his desire to surrender) and reasonably expect that the defending unit will be able to accept and accomplish his surrender while resisting the ongoing assault by his unit.<sup>280</sup>

Although the feasibility of accepting surrender includes consideration of whether it is feasible to take custody of the persons offering to surrender, this does not include consideration of whether it is feasible to care for detainees after taking custody. Offers to surrender may not be refused because it would be militarily inconvenient or impractical to guard or care for detainees.<sup>281</sup>

#### 5.9.4 Persons Rendered Unconscious or Otherwise Incapacitated by Wounds, Sickness,

---

<sup>275</sup> Refer to § 12.4 (The White Flag of Truce to Initiate Negotiations).

<sup>276</sup> HAGUE IV REG. art. 23(c) (it is especially forbidden “[t]o kill or wound an enemy who, having laid down his arms, or having no longer means of defence, has surrendered at discretion;”) (emphasis added).

<sup>277</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 629 (“Surrender involves an offer by the surrendering party (a unit or an individual soldier) and an ability to accept on the part of his opponent. The latter may not refuse an offer of surrender when communicated, but that communication must be made at a time when it can be received and properly acted upon – an attempt at surrender in the midst of a hard-fought battle is neither easily communicated nor received. The issue is one of reasonableness.”).

<sup>278</sup> Refer to § 5.15.3.1 (Open for Immediate Physical Occupation).

<sup>279</sup> Refer to § 14.9.3.2 (Feasibility of Air Units to Accept the Surrender of Ground Forces).

<sup>280</sup> See SPAIGHT, WAR RIGHTS ON LAND 92-93 (“A party in a trench must *all* surrender, genuinely and unmistakably, for a regiment, squadron, company or squad of men is not like a ship, which, when it ‘hath its bellyful of fighting,’ hauls down its colours and is clearly out of the fight. There is no such homogeneity in a unit in land war. ... It is the safest rule for a commander to pay no heed to a white flag which is hoisted, in the midst of an action, by a few men who form part of a more considerable force which still resists.”).

<sup>281</sup> Refer to § 9.5.2.1 (Prohibition on Killing of POWs).

or *Shipwreck*. Persons who have been rendered unconscious or otherwise incapacitated by wounds, sickness, or shipwreck, such that they are no longer capable of fighting, are *hors de combat*.<sup>282</sup>

Those “rendered unconscious” does not include persons who simply fall asleep. Sleeping combatants generally may be made the object of attack.<sup>283</sup>

Shipwrecked combatants include those who have been shipwrecked from any cause and includes forced landings at sea by or from aircraft.<sup>284</sup>

Persons who have been incapacitated by wounds, sickness, or shipwreck are in a helpless state, and it would be dishonorable and inhumane to make them the object of attack.<sup>285</sup> In order to receive protection as *hors de combat*, the person must be wholly disabled from fighting.<sup>286</sup> On the other hand, many combatants suffer from wounds and sickness, but nonetheless continue to fight and would not be protected.<sup>287</sup>

In many cases, the circumstances of combat may make it difficult to distinguish between persons who have been incapacitated by wounds, sickness, or shipwreck and those who continue to fight.<sup>288</sup> If possible, those seeking protection as wounded, sick, or shipwrecked, should make their condition clear.<sup>289</sup>

---

<sup>282</sup> Consider AP I art. 41(2) (“A person is hors de combat if: ... (c) He has been rendered unconscious or is otherwise incapacitated by wounds or sickness, and therefore is incapable of defending himself; provided that in any of these cases he abstains from any hostile act and does not attempt to escape.”).

<sup>283</sup> For example, Judy G. Endicott, *Raid on Libya: Operation ELDORADO CANYON*, in *SHORT OF WAR: MAJOR USAF CONTINGENCY OPERATIONS 1947–1997* (A. Timothy Warnock, Air Force Historical Research Agency ed., 2000) (describing Operation ELDORADO CANYON, in which the United States responded to the Berlin discotheque bombing by conducting air strikes on multiple Libyan targets—including two military barracks—in the early hours of April 15, 1986).

<sup>284</sup> Refer to § 7.3.1.2 (Shipwrecked).

<sup>285</sup> GWS-SEA COMMENTARY 87 (“[I]t must be pointed out that the purpose of this provision [i.e., the first paragraph of Article 12 of the GWS-Sea], and indeed of the whole Convention, is to protect wounded, sick and shipwrecked persons who, if they were not in this helpless state, could rightfully be attacked.”).

<sup>286</sup> Cf. LIEBER CODE art. 71 (“Whoever intentionally inflicts additional wounds on an enemy already wholly disabled, or kills such an enemy, or who orders or encourages soldiers to do so, shall suffer death, if duly convicted, whether he belongs to the Army of the United States, or is an enemy captured after having committed his misdeed.”).

<sup>287</sup> GWS COMMENTARY 136 footnote 1 (“Cases are frequent of soldiers who have heroically continued to fight in spite of serious wounds. It goes without saying that in so doing they renounce any claim to protection under the Convention.”).

<sup>288</sup> GWS-SEA COMMENTARY 90 (“[D]uring a landing by armed forces it will not always be possible while the attack is in progress to distinguish between an attacker trying to reach land and a soldier in danger of drowning. Similarly, in the case of persons specialized in under-water attacks, it may not always be evident when they are in peril and need assistance as shipwrecked. In such instances, persons in distress who renounce active combat can only expect the adversary to respect and rescue them if they make their situation clear, and of course provided the adversary sees their signals.”).

<sup>289</sup> Compare § 5.9.3.2 (Clear and Unconditional).

5.9.5 Persons Parachuting From an Aircraft in Distress. In general, persons, such as aircrew or embarked passengers, parachuting from an aircraft in distress are treated as though they are *hors de combat*, *i.e.*, they must not be made the object of attack.<sup>290</sup>

This protection is provided because a person descending by parachute is temporarily *hors de combat* just like someone who is shipwrecked<sup>291</sup> or unconscious.<sup>292</sup>

5.9.5.1 No Hostile Acts or Attempts to Evade Capture. As with other categories of persons *hors de combat*, the protection from being made the object of attack is forfeited if the persons engage in hostile acts or attempt to evade capture.

Routine “slipping” to steer a parachute or similar actions to facilitate a safe parachute landing do not constitute acts of evasion.

5.9.5.2 Persons Deploying Into Combat by Parachute. Persons deploying into combat by parachute may be attacked throughout their descent, and upon landing.

Persons deploying into combat by parachute may include special operations or reconnaissance personnel, combat control teams, or airborne forces (*i.e.*, specialized combat forces trained to arrive at military objectives by parachute drops).

Persons deploying into combat by parachute may be attacked even if they deploy from an aircraft in distress (*e.g.*, the enemy has attacked the aircraft to resist the assault).

It may be the case, however, that airborne forces are parachuting from an aircraft in distress outside the context of an airborne assault. Since they would not be “deploying into combat,” they would be *hors de combat* while descending by parachute.

---

<sup>290</sup> 1956 FM 27-10 (Change No. 1 1976) ¶30 (“The law of war does not prohibit firing upon paratroops or other persons who are or appear to be bound upon hostile missions while such persons are descending by parachute. Persons other than those mentioned in the preceding sentence who are descending by parachute from disabled aircraft may not be fired upon.”); APPENDIX TO 1985 CJCS MEMO ON API 31 (“Article 42 of the Protocol prohibits attacks on aircrew members descending by parachute from disabled aircraft. The United States regards such attacks as prohibited under customary international law, and the US delegation argued for explicit recognition of such a rule at the diplomatic conference which negotiated the Protocol.”). *Consider* AP I art. 42 (“1. No person parachuting from an aircraft in distress shall be made the object of attack during his descent. ... 3. Airborne troops are not protected by this Article.”); Commission of Jurists to Consider and Report Upon the Revision of the Rules of Warfare, *General Report, Part II: Rules of Aërial Warfare*, art. 20, Feb. 19, 1923, *reprinted in* 32 AJIL SUPPLEMENT: OFFICIAL DOCUMENTS 12, 21 (1938) (“When an aircraft has been disabled, the occupants, when endeavoring to escape by means of a parachute, must not be attacked in the course of their descent.”).

<sup>291</sup> ICRC AP COMMENTARY 495 (¶1637) (“There is absolutely no doubt that the majority [of States at the diplomatic conference] considered that airmen in distress are comparable to the shipwrecked persons protected by the Second Convention.”).

<sup>292</sup> ICRC AP COMMENTARY 497 (¶1644) (“The airman who parachutes from an aircraft in distress is therefore temporarily *hors de combat*, just as if he had lost consciousness, until the moment that he lands on the ground, and as long as he is incapacitated.”).

## 5.10 PROPORTIONALITY IN CONDUCTING ATTACKS

In accordance with the principle of proportionality, combatants must not exercise the right to engage in attacks against military objectives in an unreasonable or excessive way.<sup>293</sup> Therefore, when prosecuting attacks against military objectives (*i.e.*, the persons and objects that may be made the object of attack), combatants must exercise due regard to reduce the risk of incidental harm to the civilian population and other persons and objects that may not be made the object of attack. In particular, the following rules apply:

- Combatants must take feasible precautions in planning and conducting attacks to reduce the risk of harm to civilians and other persons and objects protected from being made the object of attack;<sup>294</sup> and
- Combatants must refrain from attacks in which the expected loss of civilian life, injury to civilians, and damage to civilian objects incidental to the attack would be excessive in relation to the concrete and direct military advantage expected to be gained.<sup>295</sup>

### 5.10.1 Scope of Application of the Principle of Proportionality in Conducting Attacks.

The principle of proportionality in conducting attacks imposes duties that apply to the protection of persons and objects that may not be made the object of attack. This principle does not impose obligations intended to reduce the risk of harm to military objectives (*i.e.*, persons and objects that may be made the object of attack).

Although the prohibition on attacks expected to cause excessive harm to civilians and civilian objects generally does not require consideration of military personnel and objects, feasible precautions must be taken to reduce the risk of harm to military personnel and objects that are protected from being made the object of attack, such as military personnel placed *hors de combat*.

5.10.1.1 Proportionality in Conducting Attacks and Military Objectives. The principle of proportionality in conducting attacks does not impose obligations intended to reduce the risk of harm to military objectives (*i.e.*, persons and objects that may be made the object of attack).<sup>296</sup> For example, an attack against an enemy combatant might also injure other enemy combatants who were not the specific targets of the attack. The principle of proportionality in conducting attacks would not require that efforts be made to reduce the likelihood of harm to other enemy combatants or damage to other military objectives, even if this harm were an unintended result of the attack.

5.10.1.2 Proportionality in Conducting Attacks and Protected Military Personnel and Facilities. The prohibition on attacks expected to cause excessive incidental harm requires

---

<sup>293</sup> Refer to § 2.4 (Proportionality).

<sup>294</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>295</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>296</sup> Refer to § 5.4.6 (Force That May Be Applied Against Military Objectives).

consideration of civilians and civilian objects, but this prohibition generally does not require consideration of military personnel and objects, even if they may not be made the object of attack, such as military medical personnel, the military wounded and sick, and military medical facilities. For example, treaty provisions articulating a prohibition on attacks expected to cause excessive incidental harm do not reflect protections for military personnel who are protected from being made the object of attack.<sup>297</sup> Those planning or conducting attacks may consider such military personnel as a matter of practice or policy in applying the prohibition on attacks expected to cause excessive incidental harm.

The exclusion of protected military personnel and military medical facilities from this prohibition reflects such factors as, among others, the general impracticality of prohibiting attacks on this basis during combat operations.<sup>298</sup> For example, the expected incidental harm to a sick-bay on a warship would not serve to exempt that warship from being made the object of attack.

Nonetheless, feasible precautions must be taken to reduce the risk of harm to military personnel and objects that are protected from being made the object of attack.<sup>299</sup> For example, in the context of a deliberate, planned bombardment of a military objective near an identifiable military hospital, it may be feasible to take precautions to reduce the risk of harming the military hospital, and such precautions must be taken.

5.10.2 Responsibility of Commanders for Implementing the Principle of Proportionality in Conducting Attacks. Commanders, at all levels, have a great responsibility to exercise the leadership necessary to reduce the risk of harm to civilians and civilian objects.<sup>300</sup> Although the

---

<sup>297</sup> Consider AP I art. 57(2)(a) (“Those who plan or decide upon an attack shall: ... (iii) Refrain from deciding to launch any attack which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated;”); ROME STATUTE art. 8(2)(b)(iv) (defining war crimes in international armed conflict for the purposes of the Rome Statute to include “[i]ntentionally launching an attack in the knowledge that such attack will cause incidental loss of life or injury to civilians or damage to civilian objects or widespread, long-term and severe damage to the natural environment which would be clearly excessive in relation to the concrete and direct overall military advantage anticipated;”).

<sup>298</sup> Refer to § 7.8.2.1 (Incidental Harm Not Prohibited); § 7.12.2.5 (Acceptance of the Risk From Proximity to Combat Operations).

<sup>299</sup> See, e.g., TUCKER, THE LAW OF WAR AND NEUTRALITY AT SEA 133 footnote 17 (“It is clear that hospital ships act at their own risk whenever they place themselves in the immediate vicinity of legitimate military objectives. For even though every effort must be made to avoid firing upon—or bombing—hospital ships, the presence of the latter cannot serve to exempt nearby military objectives from attack for fear that a hospital vessel might thereby suffer incidental injury.”).

<sup>300</sup> Defense Legal Policy Board, *Report of the Subcommittee on Military Justice in Combat Zones*, 60 (May 30, 2013) (“Virtually all witnesses agreed that a moral, ethical command climate in combat that inculcates and maintains U.S. values despite the difficulties of the mission or the particular area of operations is the single most important factor in preventing civilian casualties, ensuring civilian casualty reporting, and appropriately addressing reported incidents. Individual commanders, at all levels, together with their non-commissioned officers, have a great responsibility in this regard. No substitute exists for ethical leadership manifested by the provision of training in garrison and throughout deployments. Such training should demonstrate ethical responses to civilian engagements, including incident reporting and investigations, and engender trust that civilian casualty investigations are used to determine facts, and not just to uncover misconduct.”).

specific responsibilities that individual combatants have to implement the principle of proportionality will depend on their role and assigned military duties in planning or conducting an attack, commanders are responsible for making the decisions and judgments required by the principle of proportionality in conducting attacks.<sup>301</sup>

5.10.2.1 *Need for Competent Authority to Make the Decisions and Judgments Required by the Principle of Proportionality.* As with other aspects of the law of war, the persons within a party to a conflict who are responsible for making the decisions and judgments required by the principle of proportionality are those who have the authority to make these decisions and judgments.<sup>302</sup> The specific responsibilities that individual combatants have to implement the principle of proportionality will depend on their role and assigned military duties in planning or conducting an attack.<sup>303</sup>

The decisions and judgments required by the principle of proportionality normally require authority over military operations. For example, assessing the military advantage expected to be gained from an attack may require knowing the broader strategy being employed by the attacking party or knowing intelligence information about the strategic and operational context in which the attack takes place.<sup>304</sup> Lower-level personnel may not be privy to the strategic or operational significance of a specific attack, and thus may not be competent to

---

<sup>301</sup> HAGUE IV REG. art. 26 (“The officer in command of an attacking force must, before commencing a bombardment, except in cases of assault, do all in his power to warn the authorities.”) (emphasis added); HAGUE IX art. 6 (“If the military situation permits, the commander of the attacking naval force, before commencing the bombardment, must do his utmost to warn the authorities.”) (emphasis added). Cf. United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 78 (“The United Kingdom understands that the obligation to comply with [art. 57] paragraph 2(b) only extends to those who have the authority and practical possibility to cancel or suspend the attack.”); VI OFFICIAL RECORDS OF THE CDDH 212 (CDDH/SR.42, ¶43) (“Mr. BINDSCHIEDLER (Switzerland) said that he was critical of paragraphs 2 and 3 of Article 50 because they lacked clarity, particularly the words ‘Those who plan or decide upon an attack...’ in paragraph 2(a). That ambiguous wording might well place a burden or responsibility on junior military personnel which ought normally to be borne by those of higher rank. The obligations set out in article 50 could concern the high commands only – the higher grade of the military hierarchy, and it was thus that Switzerland would interpret that provision.”) (ellipsis shown in original); *id.* at ¶¶44-46 (“Mr. KUSSBACH (Austria) said that ... His delegation considered that the precautions envisaged could only be taken at a higher level of military command, in other words by the high command. Junior military personnel could not be expected to take all the precautions prescribed, particularly that of ensuring respect for the principle of proportionality during an attack.”).

<sup>302</sup> Refer to § 18.3.1.1 (Implementation of International Obligations by Persons With the Authority to Make the Necessary Decisions and Judgments Required by International Law).

<sup>303</sup> 2004 UK MANUAL ¶5.32.9 (“Those who plan or decide upon attacks are the planners and commanders and they have a duty to verify targets, take precautions to reduce incidental damage, and refrain from attacks that offend the proportionality principle. Whether a person will have this responsibility will depend on whether he has any discretion in the way the attack is carried out and so the responsibility will range from commanders-in-chief and their planning staff to single soldiers opening fire on their own initiative.”); 2004 UK MANUAL ¶5.33.5 (“In assessing whether the proportionality rule has been violated, the effect of the whole attack must be considered. That does not, however, mean that an entirely gratuitous and unnecessary action within the attack as a whole would be condoned. Generally speaking, when considering the responsibility of a commander at any level, it is necessary to look at the part of the attack for which he was responsible in the context of the attack as a whole and in the light of the circumstances prevailing at the time the decision to attack was made.”).

<sup>304</sup> Refer to § 5.12.2.1 (Considering the Advantage From the Attack as a Whole – In the Operational and Strategic Context).

evaluate the expected military advantage of the attack against the expected harm to civilians and civilian objects.<sup>305</sup> Similarly, determinations about the feasibility of taking a precaution may require the authority to direct and manage resources (e.g., allocating weapons systems and intelligence assets) or judgments about the acceptable degree of risk (e.g., to the lives of friendly forces and to mission accomplishment).<sup>306</sup> For example, the principle of proportionality ordinarily does not require military personnel to take actions, such as providing warnings, when a superior commander has already determined that such actions are not feasible because, for instance, such actions could endanger mission accomplishment and the safety of friendly forces.

In the absence of specific direction to the contrary, subordinate commanders or engagement authorities have the authority to make the corresponding decisions required by the law of war, such as the decision to cancel or suspend an attack in light of new information, in order to effectuate the commander's intent.<sup>307</sup>

5.10.2.2 “Reasonable Military Commander” Standard for Proportionality Decisions and Judgments. The commander's decisions on proportionality must be reasonable.<sup>308</sup> For example, the commander must be able to explain the expected military importance of the target and why the anticipated civilian collateral injury or damage is not expected to be excessive.<sup>309</sup>

5.10.2.3 Subjective Aspects of the Decisions and Judgments Required by the Principle of Proportionality. The decisions and judgments required by the principle of proportionality in conducting attacks have subjective aspects.<sup>310</sup>

---

<sup>305</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 366-67 (AP I art. 57, ¶2.8.1.3) (“In co-ordinated military operation, the relative importance of the military objective under attack in relation to the concrete and direct military advantage anticipated is not a matter which can be determined by individual tank leaders, the commanders of lower echelon combat units or individual attacking bomber aircraft. If assigned a fire or bombing mission they must assume that an appropriate assessment has been made by those who assigned the mission. Thus, in this situation, the decision to cancel will have to be made at the level where the decision to initiate the attack was made.”).

<sup>306</sup> Refer to § 5.2.3.2 (What Precautions Are Feasible).

<sup>307</sup> Refer to § 5.10.2.5 (Discretion of Subordinates in the Conduct of Attacks).

<sup>308</sup> ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶50 (Jun. 13, 2000) (“It is suggested that the determination of relative values must be that of the ‘reasonable military commander’. Although there will be room for argument in close cases, there will be many cases where reasonable military commanders will agree that the injury to noncombatants or the damage to civilian objects was clearly disproportionate to the military advantage gained.”).

<sup>309</sup> See Department of the Air Force, The Judge Advocate General's School, *Air Force Operations and The Law*, 18 (3rd ed., 2014) (“If the commander can clearly articulate in a reasonable manner what the military importance of the target is and why the anticipated civilian collateral injury or damage is outweighed by the military advantage to be gained, this will generally satisfy a ‘reasonable military commander’ standard.”); Department of the Air Force, The Judge Advocate General's School, *Air Force Operations and The Law*, 21 (2nd ed., 2009) (same); Department of the Air Force, The Judge Advocate General's School, *Air Force Operations and The Law*, 28 (1st ed., 2002) (substantially similar).

<sup>310</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 368 (AP I art. 57, ¶2.10.1) (“Like subparas. 2(a) (ii) and (iii), implementation of this provision is dependent on upon the subjective judgment of the commanders concerned. In this case a subjective determination is expected as to whether two or more targets for attack, offer a similar military advantage.”).

Although the decisions and judgments required by the principle of proportionality must be applied with common sense and good faith,<sup>311</sup> there nonetheless might be variation in how reasonable persons would apply the principle of proportionality in a given circumstance.<sup>312</sup> The principle of proportionality typically involves the comparison of “unlike quantities and values.”<sup>313</sup> Moreover, there may be disagreements among experts as to the precise requirements of the law.

For example, it could often be the case that reasonable persons might disagree as to whether the expected civilian casualties from an attack would be excessive.<sup>314</sup> Similarly, reasonable commanders might make different decisions in applying the principle of proportionality.<sup>315</sup>

---

<sup>311</sup> ICRC AP COMMENTARY 683-84 (¶2208) (“Even if this system is based to some extent on a subjective evaluation, the interpretation must above all be a question of common sense and good faith for military commanders. In every attack they must carefully weigh up the humanitarian and military interests at stake.”). *See also* ICRC AP COMMENTARY 395 (¶1393) (“Good faith is not a virtue which is the exclusive attribute of the interpreters of the law, but is also imposed on those who enjoy a certain degree of freedom of action in the field, even though the heat of battle does not favour an objective view of things.”).

<sup>312</sup> Janina Dill, *Applying the Principle of Proportionality in Combat Operations*, 4 (Oxford Institute for Ethics, Law and Armed Conflict, December 2010) (“While the proportionality judgement call is thus pushed higher-up the chain of command as more civilian damage is expected to result from an attack, it remains an essentially subjective and personal matter. Interviews with practitioners suggest that professional experience and personal morality rather than a transparent and stable set of criteria determine what is considered proportionate. Military lawyers acknowledge that, as a result, different professionals are likely to come to different conclusions about whether an anticipated collateral damage is excessive in the same situation, when applying the law in good faith. Commanders suggest that, proportionality judgements, in reality, often boil down to asking ‘can the estimated collateral damage be further reduced, through timing, choice of weapons or angle of attack.’ If the answer is no, the principle is considered to be fulfilled.”).

<sup>313</sup> *See, e.g.*, Brief of the United States as Amicus Curiae in Support of Defendants-Appellees, Vietnam Association for Victims of Agent Orange, *et al.*, v. Dow Chemical Co., *et al.*, 25-26 (Feb. 15, 2006) (“The plaintiffs argue that the U.S. military’s use of herbicides was unlawful because the harm to persons and property caused by herbicide use was disproportionate to the anticipated military advantage. . . . In order to adjudicate the plaintiffs’ claims, a court would be required to balance the U.S. military’s interests in protecting our forces from ambush or other attack, and in weakening enemy forces, with the anticipated harms that might be caused by exposure to herbicides. Even apart from the significant uncertainty about the effects of Agent Orange and other herbicides, this balancing would be inherently subjective since it would involve unlike quantities and values – e.g., the long-term health of civilians or enemy soldiers exposed to herbicides, with the death of U.S. forces and the accomplishment of military objectives.”).

<sup>314</sup> *Refer to* § 5.12.3 (Determining Whether the Expected Incidental Harm Is Excessive).

<sup>315</sup> ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶¶49-50 (Jun. 13, 2000) (“49. The questions which remain unresolved once one decides to apply the principle of proportionality include the following: a) What are the relative values to be assigned to the military advantage gained and the injury to non-combatants and or the damage to civilian objects? b) What do you include or exclude in totaling your sums? c) What is the standard of measurement in time or space? and d) To what extent is a military commander obligated to expose his own forces to danger in order to limit civilian casualties or damage to civilian objects? 50. The answers to these questions are not simple. It may be necessary to resolve them on a case by case basis, and the answers may differ depending on the background and values of the decision maker. It is unlikely that a human rights lawyer and an experienced combat commander would assign the same relative values to military advantage and to injury to noncombatants. Further, it is unlikely that military

A degree of deference should be given to commanders when assessing after the fact whether a decision-maker has complied with the principle of proportionality.<sup>316</sup> In addition, an assessment of whether a decision-maker has complied with the legal requirements must be based on the information available to that person at the time.<sup>317</sup>

5.10.2.4 *Duty Not to Comply With Clearly Illegal Orders and the Principle of Proportionality*. In the context of the principle of distinction, it would often be clear whether a given situation implicates the duty not to comply with clearly illegal orders to commit law of war violations – such as the duty of a subordinate to refrain from complying with an order to attack the civilian population. However, the nuances involved in applying the principle of proportionality could make it more difficult to know whether an order given is clearly illegal.

The duty not to comply with orders that are clearly illegal also applies to violations of the principle of proportionality, in particular, the case of a commander who orders subordinates to conduct an attack that is expected to result in civilian casualties that the commander himself or herself acknowledges would be excessive.

Nonetheless, this duty must be understood in light of application of the principle that law of war obligations are implemented by those with responsibility to make the decisions and judgments required by the law of war, and in particular the point that subordinates might not be competent to evaluate whether the requirements of proportionality had been met.<sup>318</sup>

Subordinates ordinarily do not have an obligation to second-guess the judgments of their superiors in relation to the principle of proportionality. As with other aspects of the law of war, subordinates are not required to screen the orders of superiors for questionable points of legality, and may, absent specific knowledge to the contrary, presume that orders have been lawfully

---

commanders with different doctrinal backgrounds and differing degrees of combat experience or national military histories would always agree in close cases.”).

<sup>316</sup> See, e.g., WILLIAM H. BOOTHBY, *THE LAW OF TARGETING* 126 (2012) (“There is a widely recognized margin of appreciation such that criminal liability, for example before the International Criminal Court, will only arise if an attack is intentionally launched in the knowledge that it will be clearly disproportionate.”); ICRC AP COMMENTARY 684 (¶2210) (“Despite these clarifications, the provision allows for a fairly broad margin of judgment, as stated above; several delegations regrettably stressed this fact. In contrast, other delegations commended the fact that in [the] future military commanders would have a universally recognized guideline as regards their responsibilities to the civilian population during attacks against military objectives.”).

<sup>317</sup> Refer to § 5.3.2 (Decisions Must Be Made in Good Faith and Based on Information Available at the Time).

<sup>318</sup> See also APPENDIX TO 1985 CJCS MEMO ON AP I 64-65 (“Under military law, members of the armed forces may, and should, refuse to obey an order to commit a crime, such as the shooting of prisoners of war or unarmed civilians. Article 57, however, goes considerably beyond this, in allowing each individual combatant to call off an ‘attack’ (or at least his participation in it) if it appears to him that collateral damage ‘may’ be excessive to whatever military advantage he is aware of. In order to overcome this defense in a trial by court-martial, the prosecution would have to prove, beyond a reasonable doubt, that the possible collateral damage would not be excessive to the military advantage gained. To do this would often require the declassification of information known to the accused’s superiors and its discussion in a public trial. Finally, the accused might be able to prevail on this issue simply by demonstrating a reasonable mistake of fact on his part—a reasonable belief, perhaps formed in part on the basis of propaganda reports in the public media, that collateral damage was excessive to any expected military advantage. ... If the United States ratifies Protocol I, therefore, it should do so subject to an understanding that this paragraph of Article 57 only applies to commanders who have authority to terminate attacks.”).

issued.<sup>319</sup> If questions arise, service members should apply their training, refer to applicable policy and regulations, and direct questions through appropriate channels.<sup>320</sup>

5.10.2.5 *Discretion of Subordinates in the Conduct of Attacks.* Commanders often provide subordinates substantial discretion in the tactics of an attack, such as in the selection of individual targets and in the timing of the attack. In the absence of specific direction to the contrary, subordinate commanders or engagement authorities have the authority to make the corresponding decisions required by the law of war, such as the decision to cancel or suspend an attack in light of new information, in order to effectuate the commander's intent.<sup>321</sup> This is especially important in situations where the subordinate is not in direct communication with the commander and the commander does not have situational awareness. For example, a commander may provide subordinates broad discretion to conduct an attack in which subordinates discover an unanticipated risk of civilian casualties. If receiving updated instructions in light of this new information was not possible, the subordinates would be understood to have the authority to take additional precautions to mitigate this unanticipated risk or even to refrain from conducting the attack if the subordinates believe that such measures would best achieve the commander's intent if the commander had known such information.

5.10.3 *Implementation of Proportionality Through Military Procedures.* As with other aspects of the law of war, during U.S. military operations, commanders have implemented the requirements of the principle of proportionality through military procedures, such as rules of engagement, doctrine, standard operating procedures, and special instructions.<sup>322</sup> In U.S. practice, implementing procedures sometimes place more restrictions on military operations and are more protective of civilians than what would be required by the law of war.<sup>323</sup>

Military authorities have developed procedures to assess before an attack the expected collateral damage or effects of an attack.<sup>324</sup> For example, lists of sensitive objects for which

---

<sup>319</sup> Refer to § 18.3.2.1 (Clearly Illegal Orders to Commit Law of War Violations).

<sup>320</sup> Refer to § 18.3.1.2 (Practical Ways in Which the Requirement to Comply With the Law of War in Good Faith is Met by Individual Service Members).

<sup>321</sup> Compare § 18.3.2.2 (Commands and Orders Should Not Be Understood as Implicitly Authorizing Violations of the Law of War).

<sup>322</sup> Refer to § 18.7 (Instructions, Regulations, and Procedures to Implement and Enforce the Law of War).

<sup>323</sup> Refer to § 5.1.2.1 (Applying Standards in the Conduct of Hostilities That Pose More Restrictions on Military Operations and That Are More Protective of Civilians Than Required By the Law of War).

<sup>324</sup> For example, JOINT PUBLICATION 3-60, *Joint Targeting*, p. II-16 (Jan. 31, 2013) ("CDE is a critical part of the effects estimate step in the joint targeting process phase 3 (or in the 'track' step of phase 5 during dynamic targeting) when munitions are used on facilities. CJCSI 3160.01, No-Strike and the Collateral Damage Estimation Methodology details a specific CDE process followed Department of Defense (DOD)-wide."); JOINT PUBLICATION 3-60, *Joint Targeting*, p. II-16 (Apr. 13, 2007) ("CJCSM 3160.01A codifies the joint standards and methods for estimating collateral damage potential, provides mitigation techniques, and assists commanders with weighing collateral risk against military necessity and assessing proportionality within the framework of the military decision-making process. These joint standards and methods for conducting CDE apply across the range of military operations. In addition, the CDEs that result from CJCSM 3160.01A are meant to inform decision makers and commanders and are not decisions themselves. CDEs help senior leaders evaluate collateral risk against military necessity during the planning and execution of combat operations.").

responsible commanders have imposed requirements for additional review or higher-level approval before the objects may be attacked (sometimes referred to as “no-strike lists”) have been developed,<sup>325</sup> as have procedures for presenting to more senior commanders for decision potential attacks on targets that involve higher risks of incidental harm.<sup>326</sup>

These procedures help ensure the sound implementation of the requirements of the principle of proportionality. As a case in point, procedures for requesting higher-level approval of targets that involve high risks of incidental harm allow for a better evaluation of the expected military advantage from the attack (as it is likely that more senior commanders have a more comprehensive understanding of the strategic and operational context), and allow more senior commanders to implement additional precautions with the greater resources under their control.<sup>327</sup> Similarly, rules of engagement and military orders can be used to delineate the

---

<sup>325</sup> For example, FINAL REPORT ON THE PERSIAN GULF WAR 100 (“To help strike planners, CENTCOM target intelligence analysts, in close coordination with the national intelligence agencies and the State Department, produced a joint no-fire target list. This list was a compilation of historical, archaeological, economic, religious and politically sensitive installations in Iraq and Kuwait that could not be targeted. Additionally, target intelligence analysts were tasked to look in a six-mile area around each master attack list target for schools, hospitals, and mosques to identify targets where extreme care was required in planning. Further, using imagery, tourist maps, and human resource intelligence (HUMINT) reports, these same types of areas were identified for the entire city of Baghdad.”). Refer to § 5.18.4 (Other Feasible Precautions to Reduce the Risk of Harm to Cultural Property), especially footnote 606.

<sup>326</sup> For example, JOINT PUBLICATION 3-60, *Joint Targeting*, p. II-16 (Jan. 31, 2013) (“Targets with associated collateral damage concerns expected to exceed theater (combatant command) thresholds are referred either to SecDef or the President using the sensitive target approval and review (STAR) process, detailed in CJCSI 3122.06, *Sensitive Target Approval and Review (STAR) Process*.”); JOINT PUBLICATION 3-60, *Joint Targeting*, pp. II-10-II-11 (Apr. 13, 2007) (“Targets with associated collateral damage concerns expected to exceed theater (combatant command) thresholds are referred either to the Secretary of Defense (SecDef) or President using the sensitive target approval and review process, detailed in Chairman of the Joint Chiefs of Staff Instruction (CJCSI) 3122.06B, *Sensitive Target Approval and Review (STAR) Process*. See also Appendix A, ‘Time Sensitive Target Considerations’ and Appendix G, ‘Collateral Damage Estimation,’ for more detail.”).

<sup>327</sup> See Geoff Corn, *War, Law, and the Oft Overlooked Value of Process as a Precautionary Measure*, 42 PEPPERDINE LAW REVIEW 419, 463-64 (2015) (“There is another subtle, but perhaps most important, benefit of elevating certain proportionality judgments to higher echelons of command: an increasingly more expansive operational perspective. Commanders and staffs at all levels of command focus inherently on their operational situation. As a result, commanders’ operational focuses will inevitably expand or contract depending on their level of command. Proportionality judgments have profound tactical and strategic consequences. Where a commander authorizes an attack anticipating it will produce civilian casualties and the attack does in fact do so, those casualties may become a source of condemnation by external observers, become a motivation for resistance by the enemy and civilian population, or become a source of motivation for enemy forces. Any of these consequences poses significant strategic risk for the overall military effort. In contrast, where a commander decides to forego an attack because of anticipated risk to the civilian population, the decision may compromise tactical effectiveness, increase the risk to friendly forces, and make mission accomplishment more difficult. Broadening the decision-making commander’s operational perspective should logically enhance the ability to assess these tactical and strategic consequences inherent in proportionality judgments. Thus, as this perspective increases at each higher echelon of command, so too does the acceptable degree of risk associated with a proportionality judgment. Finally, it is a simple axiom of military organizations that the range of combat resources increases with each higher level of command. This is a highly significant benefit of reserving proportionality judgments to higher levels of command, because as the judgment is progressively elevated, the commander entrusted with the judgment will be able to consider a broader range of alternative targeting options. As a result, a difficult proportionality judgment for a lower level commander may be obviated at a higher level of command because that commander may utilize an alternate

circumstances and limitations under which subordinates will initiate and/or continue an attack.<sup>328</sup>

5.10.4 Time Constraints and the Application of Proportionality. The time available to make decisions and to take precautions is a major factor affecting the implementation of the requirements of the principle of proportionality. For example, the available time affects what precautions are feasible, and the available time is a constraint in assessing whether an attack is expected to cause excessive incidental harm. Thus, although the legal standard of proportionality does not distinguish as such between, *e.g.*, dynamic and deliberate targeting, the availability of more time in the context of deliberate targeting generally allows for more actions to be taken to reduce the risk of civilian casualties.

Training on, and application of, targeting procedures can help forces implement the requirements of the principle of proportionality even when there is little time to make targeting decisions or to take precautions. Moreover, as with other law of war requirements, the principle of proportionality does not preclude commanders from taking decisive action in doubtful cases, but commanders must make decisions in good faith on the basis of the information available to them.<sup>329</sup>

5.10.5 Relationship Between the Requirement to Take Feasible Precautions in Planning and Conducting Attacks and the Prohibition on Attacks Expected to Cause Excessive Incidental Harm. This manual describes the requirement to take feasible precautions in planning and conducting attacks and the prohibition on attacks expected to cause excessive incidental harm as rules that are based on the principle of proportionality. Other sources may describe the relationships between the rules differently.<sup>330</sup> But this manual adopts this approach because the requirement to take feasible precautions in planning and conducting attacks and the prohibition on attacks expected to cause excessive incidental harm are fundamentally connected and mutually reinforcing obligations.

U.S. military manuals reflect the fundamental connection between the requirement to take feasible precautions in planning and conducting attacks and the prohibition on attacks expected to cause excessive incidental harm.<sup>331</sup> This connection is also reflected in the

---

method or means of attack to avoid the proportionality issue altogether, an option that did not exist for the commander of the subordinate unit.”) (footnotes omitted).

<sup>328</sup> Refer to § 1.6.5 (Rules of Engagement (ROE)); § 5.11.4 (Canceling or Suspending Attacks Based on New Information Raising Concerns of Expected Civilian Casualties).

<sup>329</sup> Refer to § 5.3.2 (Decisions Must Be Made in Good Faith and Based on Information Available at the Time).

<sup>330</sup> *E.g.*, Columbia, Constitutional Court, Plenary Chamber, Constitutional Case No. C-291/07, Judgment, Apr. 25, 2007, as reprinted and translated by the International Committee of the Red Cross at [https://ihl-databases.icrc.org/customary-ihl/eng/docs/v2\\_cou\\_co\\_rule17](https://ihl-databases.icrc.org/customary-ihl/eng/docs/v2_cou_co_rule17) (“The precautionary principle is the cornerstone of a number of specific rules which are all considered to have attained customary status and to be applicable in internal armed conflicts ... Among these rules is ... the obligation of the parties to a conflict to take all feasible precautions in the choice of means and methods of warfare with a view to avoiding, and in any event to minimizing, incidental loss of civilian life, injury to civilians and damage to civilian objects. [footnote in original omitted]”).

<sup>331</sup> See, *e.g.*, 2007 NWP 1-14M ¶8.3.1 (“It is not unlawful to cause incidental injury to civilians, or collateral damage to civilian objects, during an attack upon a legitimate military objective. The principle of proportionality requires that the anticipated incidental injury or collateral damage must not, however, be excessive in light of the military advantage expected to be gained. Naval commanders must take all reasonable precautions, taking into account

negotiating history of the treaty provisions that sought to codify the principle of proportionality.<sup>332</sup> For example, the obligation to take precautions has been viewed as following from the prohibition on attacks expected to result in excessive harm.<sup>333</sup> In addition, applying the prohibition on attacks expected to result in excessive harm has been viewed as a precaution.<sup>334</sup>

The requirement to take feasible precautions in planning and conducting attacks and the prohibition on attacks expected to cause excessive incidental harm are mutually reinforcing obligations. Taking precautions helps ensure that the prohibition is not violated, and ensuring that the precautionary obligation has been complied with may help with the assessment of whether a strike would be consistent with the prohibition.<sup>335</sup> However, feasible precautions must be taken even when the attack is not expected to cause excessive incidental harm, and, even when feasible precautions have been taken, an attack could still be prohibited as one expected to cause excessive incidental harm.

#### 5.11 PROPORTIONALITY – FEASIBLE PRECAUTIONS IN PLANNING AND CONDUCTING ATTACKS TO REDUCE THE RISK OF HARM TO PROTECTED PERSONS AND OBJECTS

Combatants must take feasible precautions in planning and conducting attacks to reduce the risk of harm to civilians and other persons and objects protected from being made the object of attack.<sup>336</sup>

---

military and humanitarian considerations, to keep civilian casualties and damage to the minimum consistent with mission accomplishment and the security of the force.”); DEPARTMENT OF THE AIR FORCE PAMPHLET 110-34, *Commander’s Handbook on the Law of Armed Conflict*, ¶3-8 (Jul. 25, 1980) (“It is not unlawful to cause incidental injury or death to civilians or damage to civilian property during an attack on a legitimate military objective as defined in chapter 2. This collateral damage should not, however, be excessive in light of the military advantage anticipated from the attack, and in all operations, every feasible precaution should be taken to keep civilian casualties and damage to a minimum.”).

<sup>332</sup> XV OFFICIAL RECORDS OF THE CDDH 285 (CDDH/215/Rev. 1, ¶97) (“Paragraph 2 (a) of article 50 required much time and effort to work out, but the other paragraphs were fairly quickly agreed upon. The so-called rule of proportionality in paragraph 2 (a) iii was found ultimately to be acceptable when it was preceded by paragraph 2 (a) i and paragraph 2 (a) ii which prescribe additional precautions and phrased in terms of losses ‘excessive in relation to the concrete and direct military advantage anticipated’, and was supplemented by paragraph 5 to make clear that it may not be construed as authorization for attacks against civilians.”) (emphasis added).

<sup>333</sup> 1956 FM 27-10 (Change No. 1 1976) ¶39 (“Particularly in the circumstances referred to in the preceding paragraph, loss of life and damage to property incidental to attacks must not be excessive in relation to the concrete and direct military advantage expected to be gained. Those who plan or decide upon an attack, therefore, must take all reasonable steps to ensure not only that the objectives are identified as military objectives or defended places within the meaning of the preceding paragraph but also that these objectives may be attacked without probable losses in lives and damage to property disproportionate to the military advantage anticipated.”) (emphasis added).

<sup>334</sup> *Consider* AP I art. 57(2) (“With respect to attacks, the following precautions shall be taken: ... (a) Those who plan or decide upon an attack shall: ... (iii) Refrain from deciding to launch any attack which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated;”).

<sup>335</sup> *Refer to* § 5.12.3.2 (Feasibility of Taking Additional Precautions to Reduce the Risk of Incidental Harm).

<sup>336</sup> *See* Executive Order 13732, *United States Policy on Pre- and Post-Strike Measures To Address Civilian Casualties in U.S. Operations Involving the Use of Force*, 81 FEDERAL REGISTER 44485, 44485-86 (§2) (Jul. 1, 2016) (“In particular, relevant agencies shall, consistent with mission objectives and applicable law, including the

As discussed in § 5.2.3.2 (What Precautions Are Feasible), what precautions are feasible depends greatly on the context.<sup>337</sup> Moreover, the requirement to take feasible precautions should be applied as part of the principle of proportionality in conducting attacks, and the discussion in this section should be considered in light of the discussion in § 5.10 (Proportionality in Conducting Attacks).<sup>338</sup>

Feasible precautions in planning and conducting attacks may include, but are not limited to, the following:

- assessing the risks to civilians;<sup>339</sup>
- identifying zones in which military objectives are more likely to be present or civilians are more likely to be absent;<sup>340</sup>
- providing effective advance warning before an attack that may affect the civilian population;<sup>341</sup>
- adjusting the timing of an attack;<sup>342</sup>

---

law of armed conflict: ... (iv) take feasible precautions in conducting attacks to reduce the likelihood of civilian casualties, such as providing warnings to the civilian population (unless the circumstances do not permit), adjusting the timing of attacks, taking steps to ensure military objectives and civilians are clearly distinguished, and taking other measures appropriate to the circumstances;”); HAGUE IV REG. art. 27 (“In sieges and bombardments all necessary steps must be taken to spare, as far as possible, buildings dedicated to religion, art, science, or charitable purposes, historic monuments, hospitals, and places where the sick and wounded are collected, provided they are not being used at the time for military purposes.”); HAGUE IX art. 5 (“In bombardments by naval forces all the necessary measures must be taken by the commander to spare as far as possible sacred edifices, buildings used for artistic, scientific, or charitable purposes, historic monuments, hospitals, and places where the sick or wounded are collected, on the understanding that they are not used at the same time for military purposes.”); Harold Koh, Legal Adviser, Department of State, *Letter to Paul Seger, Legal Adviser of Switzerland regarding Switzerland’s Position on the U.S. Reservation to Protocol III of the Convention on Certain Conventional Weapons*, Dec. 30, 2009 (“In particular, the U.S. reservation is consistent with article 57(2)(ii) and article 57(4) of the 1977 Additional Protocol I to the Geneva Conventions. Article 57(4) provides that governments shall ‘take all reasonable precautions to avoid losses of civilian lives and damage to civilian objects.’ Although the United States is not a party to Additional Protocol I, we believe these provisions are an accurate statement of the fundamental law of war principle of discrimination.”). Consider AP I art. 57(2) (“With respect to attacks, the following precautions shall be taken: (a) Those who plan or decide upon an attack shall: ... (ii) Take all feasible precautions in the choice of means and methods of attack with a view to avoiding, and in any event to minimizing, incidental loss of civilian life, injury to civilians and damage to civilian objects;”); AP I art. 57(4) (“In the conduct of military operations at sea or in the air, each Party to the conflict shall, in conformity with its rights and duties under the rules of international law applicable in armed conflict, take all reasonable precautions to avoid losses of civilian lives and damage to civilian objects.”).

<sup>337</sup> Refer to § 5.2.3.2 (What Precautions Are Feasible).

<sup>338</sup> Refer to § 5.10 (Proportionality in Conducting Attacks).

<sup>339</sup> Refer to § 5.11.1 (Assessing the Risks to Civilians).

<sup>340</sup> Refer to § 5.11.2 (Identifying Zones in Which Military Objectives Are More Likely to Be Present or Civilians Are More Likely to Be Absent).

<sup>341</sup> Refer to § 5.11.5 (Effective Advance Warning Before an Attack That May Affect the Civilian Population).

<sup>342</sup> Refer to § 5.11.3 (Adjusting the Timing of the Attack).

- cancelling or suspending attacks based on new information raising concerns of expected civilian casualties;<sup>343</sup>
- weaponeering (*e.g.*, selecting appropriate weapons, aim points);<sup>344</sup> and
- selecting military objectives.<sup>345</sup>

5.11.1 Assessing the Risks to Civilians. Assessments of the risks to civilians can include: 1) general assessments of the risks to civilians and the effectiveness of efforts to reduce the risk to civilians; 2) pre-strike assessments of expected civilian casualties; and 3) after-action assessments and investigations.

5.11.1.1 General Assessments of the Risks to Civilians and the Effectiveness of Efforts to Reduce the Risks to Civilians. In the planning of military operations, general assessments (*i.e.*, assessments not necessarily done in relation to a particular attack) of the risks to civilians and efforts to reduce the risks to civilians can assist in efforts to reduce the risk of incidental harm. For example, military authorities could identify places or objects posing significant risks of incidental harm if struck and could compile them into a list. They could then use such information in planning efforts and when conducting specific attacks to reduce the risk of incidental harm.

5.11.1.2 Pre-Strike Assessments of Expected Civilian Casualties. Pre-strike assessments of expected civilian casualties can assist in determining what other precautions are feasible, as well as in determining whether a strike is expected to result in excessive incidental harm.<sup>346</sup>

5.11.1.3 After-Action Assessments and Investigations. Battle damage assessments, as well as other reviews or investigations of incidents involving civilian casualties, may be appropriate in order to identify measures to mitigate the likelihood of future incidents of civilian casualties.<sup>347</sup> Similarly, review or investigation may be appropriate after “close call” incidents that do not cause civilian casualties but in which post-incident reporting reveals that a

---

<sup>343</sup> Refer to § 5.11.4 (Canceling or Suspending Attacks Based on New Information Raising Concerns of Expected Civilian Casualties).

<sup>344</sup> Refer to § 5.11.6 (Weaponeering (E.g., Selecting Appropriate Weapons, Aim Points)).

<sup>345</sup> Refer to § 5.11.7 (Selecting Military Objective).

<sup>346</sup> Refer to § 5.12.1 (Expected Loss of Civilian Life, Injury to Civilians, and Damage to Civilian Objects Incidental to the Attack).

<sup>347</sup> Executive Order 13732, *United States Policy on Pre- and Post-Strike Measures To Address Civilian Casualties in U.S. Operations Involving the Use of Force*, 81 FEDERAL REGISTER 44485, 44485-86 (§2) (Jul. 1, 2016) (“In particular, relevant agencies shall, consistent with mission objectives and applicable law, including the law of armed conflict: ... (v) conduct assessments that assist in the reduction of civilian casualties by identifying risks to civilians and evaluating efforts to reduce risks to civilians.”).

high risk of causing such casualties was not fully understood when relevant decisions were made.<sup>348</sup>

After such reviews, appropriate actions should be taken to reduce the risk of such incidents in the future.<sup>349</sup> For example, such actions could include repairing or inspecting equipment, retraining personnel, or changing applicable rules of engagement or operational procedures.

Although battle damage assessments or other after-action reviews or investigations of whether and how many civilians were harmed by an attack may serve a number of useful purposes, the actual results of an attack do not always provide useful information in assessing whether the requirements of the principle of proportionality were met in conducting the attack. The requirements of the principle of proportionality in conducting attacks are to be met based on the information available at the time, and the responsibility of commanders is not to be assessed on the basis of information known only after the fact.

5.11.2 Identifying Zones in Which Military Objectives Are More Likely to Be Present or Civilians Are More Likely to Be Absent. Identifying and designating zones in which military objectives are more likely to be present or in which civilians are more likely to be absent may also reduce the risk of harm to civilians or other protected persons and objects.

For example, a commander could decide to impose greater restrictions on attacks in areas in which civilians are known to be present.<sup>350</sup> Similarly, it may be possible to identify areas in

---

<sup>348</sup> ARMY TECHNIQUES PUBLICATION 3-07.6, *Protection of Civilians*, ¶5-49 (Oct. 29, 2015) (“Civilian casualty lessons do not come solely from actual civilian casualty incidents, but also from incidents that posed a high risk of civilian casualties which did not actually happen. Such near misses can offer valuable lessons and best practices. While collecting information on near misses can be a challenge, Soldiers may be more willing to discuss these experiences more openly than those involving actual casualties. Leaders should ensure that these incidents are also used for training, mentoring, and learning.”).

<sup>349</sup> Ash Carter, Secretary of Defense, *Memorandum Re: Investigation Review – Secretary of Defense Guidance*, Apr. 28, 2016 (“Following the airstrike in Kunduz, Afghanistan, on October 3, 2015, that resulted in civilian casualties at the Doctors Without Borders Trauma Center, the investigation identified causal factors and specific deficiencies. I am committed to ensuring that similar incidents do not occur in the future. Therefore, after consulting with the Chairman, I am directing the Combatant Commands and the Services to take the following actions within the next 120 days to improve the Joint Force and mitigate the potential for similar incidents in the future: Conduct a comprehensive review of relevant policies, tactical directives, and rules of engagement (ROE) to clarify conflicting or confusing directives. Ensure they provide appropriate guidance for mission accomplishment, including the prevention of civilian casualties, in the complex, changing operational environment. ... Incorporate lessons learned from the Kunduz strike in leadership development and operational training to emphasize the role of individual judgment and accountability in the execution of mission command.”).

<sup>350</sup> For example, General Petraeus, *Unclassified Excerpts from Tactical Directive*, Aug. 1, 2010, reprinted in *International Security Assistance Force – Afghanistan, Headquarters, General Petraeus Issues Updated Tactical Directive: Emphasizes “Disciplined Use of Force,”* Aug. 4, 2010 (“Prior to the use of fires, the commander approving the strike must determine that no civilians are present. If unable to assess the risk of civilian presence, fires are prohibited, except under of the following two conditions (specific conditions deleted due to operational security; however, they have to do with the risk to ISAF and Afghan forces). (NOTE) This directive, as with the previous version, does not prevent commanders from protecting the lives of their men and women as a matter of self-defense where it is determined no other options are available to effectively counter the threat.”); U.S. MILITARY ASSISTANCE COMMAND VIET-NAM DIRECTIVE 525-13, *Military Operations: Rules of Engagement for the Employment of Firepower in the Republic of Vietnam*, ¶5g (May 1971), reprinted in 1975 DIGEST OF UNITED

which objects of the greatest military importance are located and to place additional restrictions on attacks conducted outside these areas in order to limit unnecessary destruction.<sup>351</sup>

5.11.3 Adjusting the Timing of the Attack. Adjusting the timing of an attack may reduce the risk of incidental harm. For example, attacking a military objective when civilians are less likely to be present may be appropriate.<sup>352</sup> Similarly, it may be appropriate to wait until enemy forces have departed from populated areas before attacking such forces in order to reduce the risk of civilian casualties.<sup>353</sup>

---

STATES PRACTICE IN INTERNATIONAL LAW 814, 815 (“Specified Strike Zones (SSZ). An area designated for a specific period of time by Government of South Viet-Nam (G.V.N.) RVNAF [Republic of Vietnam Armed Forces] in which there are no friendly forces or populace and in which targets may be attacked on the initiative of U.S./FWMAF/RVNAF commanders. SSZ will not be referred to as ‘Free Fire Zones.’ Furthermore, the term ‘Free Fire Zone’ will not be used under any circumstances.”).

<sup>351</sup> For example, MALCOLM W. CAGLE & FRANK A. MANSON, *THE SEA WAR IN KOREA* 97 (1957) (“Vice Admiral Struble’s orders to the bombardment forces clearly specified that there should be no promiscuous firing at the city itself or at civilian installations. To achieve this, the entire objective area had been divided into 60 sub-areas. Known military targets had been previously assigned, and those which offered the greatest potential hazard to our landing troops were circled in red. It had been agreed that any ship could fire into a red-circle area with or without a ‘spot.’ In the uncircled areas, however, firing was permitted only if definite targets were found and an air spot was available. This differentiation between types of areas was adopted to reduce destruction of nonmilitary targets to a minimum, to save the city of Inchon for occupation forces, and to avoid injury to civilian personnel. ‘The Seoul-Inchon area is inhabited by our South Korean Allies,’ said Struble in an order to his forces, ‘and our forces plan to utilize facilities in this area. Unnecessary destruction will impede our progress. Bombing and gunfire will be confined to targets whose destruction will contribute to the conduct of operations – accurate gunfire and pinpoint bombing against specific targets, rather than area destruction, is contemplated.”).

<sup>352</sup> For example, Jennifer O’Connor, General Counsel, Department of Defense, *Remarks at New York University School of Law: Applying the Law of Targeting to the Modern Battlefield*, Nov. 28, 2016 (“Given the facts of this specific situation, including the intelligence that the cash was being used to pay ISIL fighters and conduct terrorist operations, the targeting authority determined that the bulk cash was a legitimate military objective. The next step then for the targeting authority before approving the strike was to conduct a proportionality analysis. This bulk cash storage site happened to be in an area where civilians were often present—as you might expect from a building that used to be a civilian bank before ISIL turned it into a cash storage site. As a result of the high number of civilians in the area, the targeting authority took specific steps to minimize potential harm to civilians by ordering the attack to occur at a time when the potential for any civilian casualties was deemed to be the lowest.”); FINAL REPORT ON THE PERSIAN GULF WAR 100 (noting that during Operation DESERT STORM “attacks on known dual (i.e., military and civilian) use facilities normally were scheduled at night, because fewer people would be inside or on the streets outside.”).

<sup>353</sup> For example, Joby Warrick, *ISIS’s Second-in-Command Hid in Syria for Months. The Day He Stepped Out, the U.S. Was Waiting*, THE WASHINGTON POST, Nov. 28, 2016 (“The Syrian who exhorted thousands of young Muslims to don suicide belts appeared increasingly obsessed with his own safety, U.S. officials say. He banished cellphones, shunned large meetings and avoided going outdoors in the daytime. He began sleeping in crowded tenements in a northern Syrian town called al-Bab, betting on the presence of young children to shield him from the drones prowling the skies overhead. But in late August, when a string of military defeats suffered by the Islamic State compelled Adnani to briefly leave his hiding place, the Americans were waiting for him. A joint surveillance operation by the CIA and the Pentagon tracked the 39-year-old as he left his al-Bab sanctuary and climbed into a car with a companion. They were headed north on a rural highway a few miles from town when a Hellfire missile struck the vehicle, killing both of them.”); FINAL REPORT ON THE PERSIAN GULF WAR 631 (“The concentration of Iraqi military personnel and vehicles, including tanks, invited attack. CINCCENT decided against attack of the Iraqi forces in Kuwait City, since it could lead to substantial collateral damage to Kuwaiti civilian property and could cause surviving Iraqi units to decide to mount a defense from Kuwait City rather than depart. Iraqi units remaining in Kuwait City would cause the Coalition to engage in military operations in urban terrain, a form of fighting that is

5.11.4 Canceling or Suspending Attacks Based on New Information Raising Concerns of Expected Civilian Casualties. Commanders may decide to cancel or suspend attacks based on new information of expected civilian casualties or authorize subordinates to do so, in order to reduce the risk of harm to civilians and civilian objects.<sup>354</sup>

Subordinates generally would not be authorized to suspend or cancel attacks contrary to specific military orders because they disagree with the commander's decisions and judgments in relation to the principle of proportionality.<sup>355</sup> However, subordinate commanders or engagement authorities would be required to report promptly new information of expected civilian casualties or to cancel or suspend attacks in appropriate circumstances. For example, aircrews have refrained from conducting an attack or have redirected a munition toward a different impact location when concerns about civilian harm have become unexpectedly apparent.<sup>356</sup>

Subordinates should also generally be understood to have the authority to make decisions required by the law of war, such as the decision to cancel or suspend an attack in light of new information, in order to effectuate the commander's intent.<sup>357</sup> This is especially true when those commanders will not be able to maintain situational awareness of the risks of civilian casualties.

The decision to cancel or suspend an attack based on new information raising concerns of expected civilian casualties does not necessarily mean that the attack would have been unlawful, such as by violating the prohibition against attacks expected to cause excessive incidental harm.<sup>358</sup>

5.11.5 Providing Effective Advance Warning Before an Attack That May Affect the Civilian Population. Unless circumstances do not permit, effective advance warning must be

---

costly to attacker, defender, innocent civilians, and civilian objects. The decision was made to permit Iraqi forces to leave Kuwait City and engage them in the unpopulated area to the north.”).

<sup>354</sup> Consider AP I art. 57(2) (“With respect to attacks, the following precautions shall be taken: ... (b) An attack shall be cancelled or suspended if it becomes apparent that the objective is not a military one or is subject to special protection or that the attack may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated;”).

<sup>355</sup> Refer to § 5.10.2.3 (Duty Not to Comply With Clearly Illegal Orders and the Principle of Proportionality).

<sup>356</sup> For example, BBC NEWS, *How ‘Shift Cold’ Works*, Sept. 12, 2016 (“On 9 September 2015, an unmanned coalition aircraft targeted a checkpoint, controlled by the so-called Islamic State, near Shaddadi in Syria. According to the US Department of Defense: ‘After the aircraft’s weapon was released, a transient motorcycle approached the checkpoint. The aircrew elected to ‘shift cold,’ or identify an alternate location for the weapon to impact, in flight to avoid any effects from the impact on the civilians on the motorcycle. The aircrew identified a nearby empty field where the weapon impacted.”).

<sup>357</sup> Refer to § 5.10.2.4 (Provision of Substantial Discretion by Commanders to Subordinates).

<sup>358</sup> Note that AP I art. 57(2) is framed differently and provides for the cancellation or suspension of attacks as a precaution “if it becomes apparent that the objective is not a military one or is subject to special protection or that the attack may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.” AP I art. 57(2).

given of an attack that may affect the civilian population.<sup>359</sup>

5.11.5.1 *Other Warning Requirements.* In addition, warning requirements exist before certain medical units, vessels, or facilities forfeit their protection from being made the object of attack:

- military medical units and facilities;<sup>360</sup>
- ground medical transports;<sup>361</sup>
- hospital ships and sick-bays in warships;<sup>362</sup>
- civilian hospitals;<sup>363</sup> and
- civilian hospital convoys.<sup>364</sup>

5.11.5.2 *Effective Advance Warning.* The purpose of a warning is to facilitate the protection of the civilian population so that civilians and the authorities in control of the civilian population can take measures to reduce the risk that civilians will be harmed by military operations. Although there is no set form for warnings, a warning should be designed to accomplish this purpose to the extent feasible.

Warnings may be communicated to the authorities in control of the civilian population, such as the national leadership of the enemy State.<sup>365</sup> Warnings may also be delivered directly to the civilian population through military information support operations (*e.g.*, broadcasts,<sup>366</sup>

---

<sup>359</sup> HAGUE IV REG. art. 26 (“The officer in command of an attacking force must, before commencing a bombardment, except in cases of assault, do all in his power to warn the authorities.”); HAGUE IX art. 6 (“If the military situation permits, the commander of the attacking naval force, before commencing the bombardment, must do his utmost to warn the authorities.”); LIEBER CODE art. 19 (“Commanders, whenever admissible, inform the enemy of their intention to bombard a place, so that the noncombatants, and especially the women and children, may be removed before the bombardment commences. But it is no infraction of the common law of war to omit thus to inform the enemy. Surprise may be a necessity.”). *Consider* AP I art. 57(2)(c) (“Effective advance warning shall be given of attacks which may affect the civilian population, unless circumstances do not permit.”).

<sup>360</sup> *Refer to* § 7.10.3.2 (Due Warning Before Cessation of Protection).

<sup>361</sup> *Refer to* § 7.11.1 (Protection of Ground Medical Transports on the Same Basis as That of Medical Units).

<sup>362</sup> *Refer to* § 7.12.6.1 (Due Warning Before Cessation of Protection).

<sup>363</sup> *Refer to* § 7.17.1.2 (Due Warning Before Cessation of Protection).

<sup>364</sup> *Refer to* § 7.18.1 (Protection of Civilian Hospital Convoys on the Same Basis as That of Civilian Hospitals).

<sup>365</sup> HAGUE IV REG. art. 26 (“The officer in command of an attacking force must, before commencing a bombardment, except in cases of assault, do all in his power to warn the authorities.”) (emphasis added); HAGUE IX art. 6 (“If the military situation permits, the commander of the attacking naval force, before commencing the bombardment, must do his utmost to warn the authorities.”) (emphasis added).

<sup>366</sup> *For example*, Jim Garamone, *U.S. Commando Solo II Takes Over Afghan Airwaves*, AMERICAN FORCES PRESS SERVICE, Oct. 29, 2001 (describing the Commando Solo II flights that use broadcasts “to warn the Afghan population to stay away from Taliban and Al Qaeda targets,” including one broadcast that warns civilians to “[s]tay away from military installations, government buildings, terrorist camps, roads, factories or bridges”); SPAIGHT, AIR POWER AND WAR RIGHTS 242 (“An hour and a half before the Skoda armament works at Pilsen in Czechoslovakia

leaflets<sup>367</sup>) advising the civilian population of risk of harm if they are near military objectives. Low passes of aircraft or warning shots may also be appropriate in certain circumstances.<sup>368</sup>

The warnings may be general in nature; giving the specific time and place of an attack is not required.<sup>369</sup>

---

were attacked by Flying Fortresses of the 8th U.S.A.A.F. on 25 April, 1945, Supreme Allied Headquarters broadcast the following warning: ‘Allied bombers are out in great strength to-day. Their destination may be the Skoda works. Skoda workers get out and stay out until the afternoon.’”).

<sup>367</sup> For example, Jim Garamone, *Coalition Aircraft “Paper” Iraq With Leaflets*, AMERICAN FORCES PRESS SERVICE, Mar. 19, 2003 (stating that Coalition forces “dropped almost 2 million leaflets over Iraq” that “warned Iraqis to stay away from military targets”); *Report of the United Nations Command Operations in Korea for the Period 1-15 July 1952*, enclosure to *Note Dated 8 October 1952 From the Representative of the United States Addressed to the Secretary-General Transmitting the Forty-Ninth Report of the United Nations Command Operations in Korea in Accordance with the Security Council Resolution of 7 July 1950 (S/1588)*, U.N. Doc. S/2805 (Oct. 9, 1952) (“For approximately one month prior to the raid on Pyongyang and other main supply targets, the United Nations Command aircraft had dropped leaflets warning civilians to stay away from military targets. Immediately after the strikes more leaflets were dropped telling civilians to beware of delayed action bombs and to stay away from bomb craters. Every precaution was taken to attack only military targets and to prevent injury to non-combatants. ... In consonance with the United Nations policy of taking every possible step both to restore peace and to prevent needless loss of life, United Nations Command leaflets and radio broadcasts are being used continually to warn civilians in enemy-occupied northern Korea to move away from places where the Communists have concentrated war material factories and military equipment, supplies and personnel. These warnings are a humanitarian measure taken to minimize civilian loss of life in United Nations Command attacks on military targets.”).

<sup>368</sup> For example, Department of Defense Briefing by Operation Inherent Resolve Spokesman Col. Warren (Nov. 18, 2015) (“In Al-Bukamal, we destroyed 116 tanker trucks, which we believe will reduce ISIL’s ability to transport its stolen oil products. This is our first strike against tanker trucks, and to minimize risks to civilians, we conducted a leaflet drop prior to the strike. We did a show of force, by -- we had aircraft essentially buzz the trucks at low altitude. So, I do have copy of the leaflet, and I have got some videos, so why don’t you pull the leaflet up. Let me take a look at it so I can talk about it. As you can see, it’s a fairly simple leaflet, it says, ‘Get out of your trucks now, and run away from them.’ A very simple message. And then, also, ‘Warning: airstrikes are coming. Oil trucks will be destroyed. Get away from your oil trucks immediately. Do not risk your life.’ And so, these are the leaflets that we dropped -- about 45 minutes before the airstrikes actually began. Again, we combine these leaflet drops with very low altitude passes of some of our attack aviation, which sends a very powerful message.”); Major Thomas A. Wagoner, Staff Judge Advocate, 15th Marine Expeditionary Unit (Special Operations Capable), *After Action Report for Operation Iraqi Freedom*, 7 (2003), reprinted in CENTER FOR LAW AND MILITARY OPERATIONS, THE JUDGE ADVOCATE GENERAL’S LEGAL CENTER & SCHOOL, U.S. ARMY, I LEGAL LESSONS LEARNED FROM AFGHANISTAN AND IRAQ: MAJOR COMBAT OPERATIONS (11 SEPTEMBER 2001 - 1 MAY 2003) 108 (2004) (“The one group that reported success with warning shots was the LAR [Light Armored Reconnaissance] Company. They explained that the warning shots fired from their chain guns at vehicles coming towards them with unknown intentions tended to stop the vehicles so they could be searched. They surmised that the size of the LAR was a large part of the success in that vehicles clearly saw who was firing at them and rather than risk getting shot they stopped for Marine forces. This as compared to infantry forces who were usually unable to see the intended beneficiaries of the warning shots and vice versa.”); SPAIGHT, AIR POWER AND WAR RIGHTS 243 (“Before objectives in the French town of Anney were bombed on the night of 9 May, 1944, the alert was sounded by an Allied plane equipped with a siren. It cruised over the town for twenty minutes before the first bombers arrived, with the result that the inhabitants had time to seek shelter and only those who disregarded the warning were injured.”).

<sup>369</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2064 (“A warning need not be specific. It may be a blanket warning, delivered by leaflets and/or radio, advising the civilian population of an enemy nation to avoid remaining in proximity to military objectives.”).

5.11.5.3 *That May Affect the Civilian Population.* The purpose of a warning to facilitate the protection of the civilian population is so that civilians and the authorities in control of the civilian population can take measures to reduce the risk that civilians will be harmed by military operations. If the civilian population will not be affected by an attack, then there is no obligation to provide a warning to facilitate its protection.<sup>370</sup>

5.11.5.4 *Unless Circumstances Do Not Permit.* Circumstances not permitting the giving of advance warning include where giving a warning would be incompatible with legitimate military requirements, such as exploiting the element of surprise in order to provide for mission accomplishment and preserving the security of the attacking force.<sup>371</sup>

5.11.6 *Weaponizing (E.g., Selecting Appropriate Weapons, Aim Points).* Depending on the circumstances, the process of “weaponizing” in a strike against a target can be used to reduce the risk of harm to civilians and civilian objects by selecting munitions of appropriate size and type, as well as appropriate aim points, while offering the same or superior military advantage in neutralizing or destroying a military objective.<sup>372</sup> For example, it may be advantageous to employ incendiary weapons in attacking an adversary’s repository of biological weapons so as to prevent the biological agents from adversely affecting the civilian population.<sup>373</sup>

As with other precautions, the decision of which weapon to use will be subject to many practical considerations.<sup>374</sup> For example, a commander may decide not to use precision-guided munitions or cyber tools<sup>375</sup> because he or she determines it is necessary to preserve those capabilities for other engagements.<sup>376</sup>

---

<sup>370</sup> GREENSPAN, MODERN LAW OF LAND WARFARE 338-39 (“Naturally, there is no obligation to give notice where no civilians remain, and only the military will come under fire.”).

<sup>371</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2064 (“The ‘unless circumstances do not permit’ recognizes the importance of the element of surprise. Where surprise is important to mission accomplishment and allowable risk to friendly forces, a warning is not required.”).

<sup>372</sup> *For example*, Jim Michaels, *Exclusive: Inside the Anti-Islamic State Air Campaign Command Center*, USA TODAY, Sept. 13, 2016 (“Analysts assign the target a collateral damage estimate based on its proximity to civilians and the extent that danger to them can be lessened. If there is a risk of hitting nearby buildings, they mitigate the risk by choosing smaller bombs or a fuse that can delay the explosion, so, for example, a bomb would only detonate after it penetrates the target. Military officers plot each bomb’s point of impact on a building or other target, allowing them to measure precisely the blast radius of each explosive they will drop. The selection of munitions can produce a precise impact. Recently, a communications tower near a school was hit so that when it collapsed, it fell away from a cluster of nearby buildings.”).

<sup>373</sup> *Refer to* § 6.14.3.2 (U.S. Reservation to CCW Protocol III on Incendiary Weapons).

<sup>374</sup> *Refer to* § 5.2.3.2 (What Precautions Are Feasible).

<sup>375</sup> *Refer to* § 14.9.2 (Selection of Weapons in Conducting Attacks From the Air Against Ground Military Objectives); § 16.5.3.1 (Cyber Tools as Potential Measures to Reduce the Risk of Harm to Civilians or Civilian Objects).

<sup>376</sup> *See, e.g.*, 2013 GERMAN MANUAL ¶1117 (“The law of armed conflict (LOAC) contains no obligation to use precision guided ammunition. There may however be situations in which the obligation to discriminate between

5.11.7 Selecting Military Objectives. In planning or conducting an attack, the selection of a military objective may reduce the risk of incidental harm. In particular, when attempting to achieve a particular military advantage through an attack, a commander may confront a choice among several military objectives for achieving that advantage. When facing such a choice, provided that all other factors are equal, the object to be selected for attack shall be the object the attack on which may be expected to cause the least danger to civilian lives and to civilian objects. For example, in seeking to deny an adversary the ability to use a railroad network, it may be possible to disable the railroad network just as effectively by striking the railroad lines away from inhabited areas as by striking the railroad station located near civilians.<sup>377</sup>

This rule does not dictate what choices a commander should consider, but presupposes that the commander is confronted with a choice of potential military objectives to attack to achieve the desired military advantage. In other words, this rule does not prevent the commander from attacking multiple military objectives or pursuing every military advantage he or she believes warrants pursuit.

When the choice of military objectives involves different risks and benefits potentially yielding different military advantages, this rule does not require that the object that may be expected to cause the least danger to civilian lives and to civilian objects be chosen for attack. For example, a commander could decide to attack a military objective involving higher risks of civilian casualties because the attack on that objective affords a greater likelihood of achieving the military advantage.

5.11.7.1 AP I Provision on Choice Possible Between Several Military Objectives. AP I provides that “[w]hen a choice is possible between several military objectives for obtaining a similar military advantage, the objective to be selected shall be that the attack on which may be expected to cause the least danger to civilian lives and to civilian objects.”<sup>378</sup> The United States

---

military targets and civilians/civilian objects or the obligation to avoid or minimise collateral damage cannot be fulfilled without the use of such weapons.”) (internal cross-reference omitted); 2006 AUSTRALIAN MANUAL ¶8.38 (“The existence of precision-guided weapons, such as GBU 10 and Harpoon missiles, in a military inventory does not mean that they must necessarily be used in preference to conventional weapons even though the latter may cause collateral damage. In many cases, conventional weapons may be used to bomb legitimate military targets without violating the LOAC requirements. It is a command decision as to which weapon to use. This decision will be guided by the basic principles of the LOAC: military necessity, avoidance of unnecessary suffering and proportionality.”); 2001 CANADIAN MANUAL ¶527(1) (“With the advent of modern technology many armed forces are now able to deliver weapons on target with much greater precision. However, states are not limited to the use of precision weapons and munitions. An attack by conventional, free-fall weapons or ‘dumb’ bombs is lawful provided that the overriding principles of proportionality and superfluous injury/unnecessary suffering as well as other applicable rules are not violated.”).

<sup>377</sup> See ICRC AP COMMENTARY 687 (¶¶2227-28) (“In this field mention could be made of attacks launched against enemy road and rail traffic; some belligerents have tried to attack the adversary only when this would not result in severe damage for the population. Instead of attacking railway stations, which are usually located in towns, the railway lines were hit at crucial points, but away from inhabited areas; the same action was taken with respect to roads. Such examples show that it is possible to choose objectives so that their destruction does not imperil the population and civilian objects, while still gaining the same military advantage. There is no doubt with regard to [an] economic target of military importance, that it is possible to attack only certain parts the destruction of which will result in paralyzing the whole structure.”).

<sup>378</sup> AP I art. 57(3).

has expressed the view that this language is not a part of customary international law.<sup>379</sup> Whether this AP I provision is consistent with customary international law would depend on how AP I Parties interpret it. If this AP I provision is interpreted as described in § 5.11.7 (Selecting Military Objectives), then this provision could be understood to be consistent with customary international law.

## 5.12 PROPORTIONALITY – PROHIBITION ON ATTACKS EXPECTED TO CAUSE EXCESSIVE INCIDENTAL HARM

Combatants must refrain from attacks in which the expected loss of civilian life, injury to civilians, and damage to civilian objects incidental to the attack would be excessive in relation to the concrete and direct military advantage expected to be gained.<sup>380</sup>

This prohibition should be applied as part of the principle of proportionality in conducting attacks, and the discussion in this section should be considered in light of the discussion in § 5.10 (Proportionality in Conducting Attacks).<sup>381</sup>

5.12.1 Expected Loss of Civilian Life, Injury to Civilians, and Damage to Civilian Objects Incidental to the Attack. The totality of the expected loss of civilian life, injury to civilians, and damage to civilian objects incidental to the attack must be considered. AP I uses the phrase “a combination thereof” and an “or” to convey that the totality of the expected loss of civilian life, injury to civilians, and damage to civilian objects incidental to the attack is to be considered.<sup>382</sup>

---

<sup>379</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2064 (“Paragraph 4B(4) contains the language of Article 57(3) of Protocol I, and is not a part of customary law. The provision applies ‘when a choice is possible ... ;’ it is not mandatory. An attacker may comply with it if it is possible to do so, subject to mission accomplishment and allowable risk, or he may determine that it is impossible to make such a determination.”) (amendment shown in Digest).

<sup>380</sup> 1956 FM 27-10 (Change No. 1 1976) ¶41 (“[L]oss of life and damage to property incidental to attacks must not be excessive in relation to the concrete and direct military advantage expected to be gained. Those who plan or decide upon an attack, therefore, must take all reasonable steps to ensure not only that the objectives are identified as military objectives or defended places within the meaning of the preceding paragraph but also that these objectives may be attacked without probable losses in lives and damage to property disproportionate to the military advantage anticipated.”). Consider AP I art. 51(5)(b) (considering as a prohibited indiscriminate attack “[a]n attack which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.”); AP I art. 57(2)(a)(iii) (requiring that those who plan or decide upon an attack “[r]efrain from deciding to launch any attack which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.”).

<sup>381</sup> Refer to § 5.10 (Proportionality in Conducting Attacks).

<sup>382</sup> Consider AP I art. 51(5)(b) (considering as a prohibited indiscriminate attack “[a]n attack which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.”); AP I art. 57(2)(a)(iii) (requiring that those who plan or decide upon an attack “[r]efrain from deciding to launch any attack which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a

5.12.1.1 *Priority in Considering the Loss of Civilian Life and Damage to Civilian Objects.* In light of the humanitarian objectives of the law of war, the expected loss of civilian life and injury to civilians should be given greater consideration than the expected damage to civilian objects.<sup>383</sup> Similarly, the expected damage to civilian objects (such as schools, hospitals, and religious facilities) should be given greater consideration when such damage is expected to involve the risk of harming civilians present inside such objects.

In light of the great importance of cultural property, expected damage to cultural property should be afforded greater consideration than expected damage to ordinary property.<sup>384</sup>

5.12.1.2 *Loss of Life, Injury, and Damage Versus Mere Inconveniences or Temporary Disruptions.* Expected loss of civilian life, injury to civilians, and damage to civilian objects must be considered. Mere inconveniences or temporary disruptions to civilian life need not be considered in applying this rule.<sup>385</sup>

For example, although the actual damage to a civilian marketplace from an attack on a nearby military objective would be considered, the temporary disruption to commerce from the closure of the marketplace due to the nearby attack would not need to be considered.

5.12.1.3 *Foreseeable Harms Versus Remote Harms.* The expected loss of civilian life, injury to civilians, and damage to civilian objects is generally understood to mean such immediate or direct harms foreseeably resulting from the attack. Remote harms that could result from the attack do not need to be considered in applying this prohibition. The exclusion of remote harms is based on the difficulty in accurately predicting the myriad of remote harms from

---

combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated;”).

<sup>383</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2063-64 (“While collateral damage to civilian objects should be minimized, consistent with the above, collateral damage to civilian objects should not be given the same level of concern as incidental injury to civilians.”). Cf. BOTHE, PARTSCH, & SOLF, NEW RULES 368-69 (AP I art. 57, ¶2.10.2) (“Humanitarian inclinations would tend to suggest that the avoidance of danger to civilian lives should be preferred over that of property. This conclusion is supported by other provisions of Protocol I. For example, a higher standard is established by Art. 51, para. 3, for loss of protection by civilians than that which is applicable under the two pronged test of Art. 52, para. 2, defining when objects may become military objectives and thus be subject to attack. Moreover, while an indiscriminate attack which causes excessive loss of civilian life or injury to civilians may be a grave breach under Art. 85, para. 3, the excessive damage to civilian property can support a grave breach only if the indiscriminate attack causes death or serious injury to civilian persons.”).

<sup>384</sup> Refer to § 5.18.1 (Definition of Cultural Property).

<sup>385</sup> See Yoram Dinstein, *Distinction and Loss of Civilian Protection in International Armed Conflicts*, 84 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES, 183, 186 (2008) (“Yet it must be borne in mind that not every inconvenience to civilians ought to be considered relevant. In war-time, there are inevitable scarcities of foodstuffs and services. Indeed, food, clothing, petrol and other essentials may actually be rationed; buses and trains may not run on time; curfews and blackouts may impinge on the quality of life; etc. These do not count in the calculus of proportionality.”). Cf. WILLIAM H. BOOTHBY, *THE LAW OF TARGETING* 370 (2012) (“Issues of proportionality do not of course arise where there is no attack. Thus where soft attack methods are adopted resulting, perhaps, in inconvenience but neither injury nor damage, there is no requirement to consider that inconvenience when deciding whether, and if so how, to undertake the military operation.”).

the attack (including the possibility of unrelated or intervening actions that might prevent or exacerbate such harms) as well as the primary responsibility of the party controlling the civilian population to take measures to ensure that population's protection.<sup>386</sup>

For example, if the destruction of a power plant would be expected to cause the loss of civilian life or injury to civilians very soon after the attack due to the loss of power at a connected hospital, then such harm should be considered in assessing whether an attack is expected to cause excessive harm. On the other hand, the attacker would not be required to consider the economic harm that the death of an enemy combatant would cause to his or her family, or the loss of jobs due to the destruction of a tank factory.<sup>387</sup> Similarly, in determining the expected loss of civilian life, injury to civilians, and damage to civilian objects, the attacker would not be required to consider the possibility that a munition might not detonate as intended and might injure civilians much later after the attack. This is due to the difficulty in assessing such risks and the responsibility of the party controlling the territory and the civilian population to take steps with regard to the protection of the civilian population from unexploded ordnance.<sup>388</sup>

5.12.1.4 *Harms Caused by the Attacking Force Versus Harms Caused by Enemy Action or Beyond the Control of Either Party.* The harm caused by the attacking forces' actions in conducting the attack must be considered. Harm caused by enemy action, or beyond the control of either party, need not be considered.

For example, a commander directing an air operation would not need to consider civilians injured or killed by counter-attacks from enemy air defense measures, such as spent surface-to-

---

<sup>386</sup> Refer to § 5.2.1 (Responsibility of the Party Controlling Civilian Persons and Objects).

<sup>387</sup> For example, Rear Admiral Thomas Wilson, Director of Intelligence, Joint Staff, *DoD News Briefing*, Apr. 22, 1999 ("Krusevac tractor plant in Serbia was a new target. You can see here assembly and engineering buildings which were involved in manufacturing support or parts for tanks and APCs as well as for civilian vehicles, and we had moderate to severe physical damage to these facilities with functional damage assessments being made at this time. ... Q: At the Yugo factory there are tens of thousands of Yugoslav workers that can't work. I take it the tractor factory will put thousands out of work. Is that an intended strike against the economy of Milosevic? Rear Admiral Wilson: The intent of the strike was to destroy their ability to sustain and repair military vehicles. It's an unfortunate consequence of the leadership's decision to pursue their policies that's impacting the Yugoslav people.").

<sup>388</sup> Christopher Greenwood, *Legal Issues Regarding Explosive Remnants Of War*, Group of Government Experts of States Parties to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons, CCW/GGE/I/WP.10 (2002) 8 ("If, for example, cluster weapons are used against military targets in an area where there are known to be civilians, then the proportionality test may require that account be taken both of the risk to the civilians from sub-munitions exploding during the attack and of the risk from unexploded sub-munitions in the hours immediately after the attack. It is an entirely different matter, however, to require that account be taken of the longer-term risk posed by [Explosive Remnants of War (ERW)], particularly of the risk which ERW can pose after a conflict has ended or after civilians have returned to an area from which they had fled. The degree of that risk turns on too many factors which are incapable of assessment at the time of the attack, such as when and whether civilians will be permitted to return to an area, what steps the party controlling that area will have taken to clear unexploded ordnance, what priority that party gives to the protection of civilians and so forth. The proportionality test has to be applied on the basis of information reasonably available at the time of the attack. The risks posed by ERW once the immediate aftermath of an attack has passed are too remote to be capable of assessment at that time."). Refer to § 6.20.3 (Taking Feasible Precautions to Protect Civilians From Explosive Remnants of War).

air measures or antiaircraft projectiles.<sup>389</sup> Similarly, the risk to the civilian population from the legitimate deception activities of the defending force, such as jamming, smoke, or chaff, would not need to be considered by the attacking force, although the defending force should consider such risks as part of its obligations to take feasible precautions in defense.<sup>390</sup>

When the attacking force causes harms that are the responsibility of the defending force due to its use of voluntary human shields or due to the employment of civilian personnel in or on military objectives, the responsibility of the defending force is a factor that may be considered in determining whether such harm is excessive.<sup>391</sup>

5.12.2 Concrete and Direct Military Advantage Expected to Be Gained. The “concrete and direct military advantage expected to be gained” must be considered.

The considerations in assessing a “definite military advantage” in the definition of “military objective” are also relevant in assessing the “concrete and direct military advantage expected to be gained.”<sup>392</sup> For example, the military advantage may not be merely hypothetical or speculative, although there is no requirement that the military advantage be “immediate.”

There must be a good faith expectation that the attack will make a relevant and proportional contribution to the goal of the military attack involved.<sup>393</sup> Such goals may include: (1) denying the enemy the ability to benefit from the object’s effective contribution to its military action (*e.g.*, using this object in its military operations); (2) improving the security of the

---

<sup>389</sup> See, *e.g.*, FINAL REPORT ON THE PERSIAN GULF WAR 177-78 (During the 1991 Gulf War, “[t]here is also a probability that some [incidental civilian] casualties occurred when unexploded Iraqi SAMs [surface-to-air missiles] or AAA [antiaircraft artillery] fell back to earth. The often dense fire the Iraqis expended in attempts to shoot down Coalition aircraft and cruise missiles almost certainly caused some destruction on the ground from malfunctioning fuses or self-destruction features, as well as the simple impact of spent rounds.”).

<sup>390</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>391</sup> Refer to § 5.12.3.3 (Civilian Workers Who Support Military Operations In or On Military Objectives); § 5.12.3.4 (Enemy Use of Human Shields).

<sup>392</sup> New Zealand, *Statement on Ratification of AP I*, Feb. 8, 1988, 1499 UNTS 358 (“3. In relation to paragraph 5(b) of Article 51 and to paragraph 2(a)(iii) of Article 57, the Government of New Zealand understands that the military advantage anticipated from an attack is intended to refer to the advantage anticipated from the attack considered as a whole and not only from isolated or particular parts of that attack and that the term ‘military advantage’ involves a variety of considerations, including the security of attacking forces.”). Refer to § 5.6.7.3 (Definite Military Advantage).

<sup>393</sup> Australia, *Statement on Ratification of AP I*, Jun. 21, 1991, 1642 UNTS 474 (“It is further the understanding of Australia that the term ‘concrete and direct military advantage anticipated’, used in Articles 51 and 57, means a bona fide expectation that the attack will make a relevant and proportional contribution to the objective of the military attack involved.”); New Zealand, *Statement on Ratification of AP I*, Feb. 8, 1988, 1499 UNTS 358 (“It is further the understanding of the Government of New Zealand that the term ‘concrete and direct military advantage anticipated’, used in Articles 51 and 57, means a bona fide expectation that the attack will make a relevant and proportional contribution to the objective of the military attack involved.”). See also 2001 CANADIAN MANUAL ¶415(2) (“A concrete and direct military advantage exists if the commander has an honest and reasonable expectation that the attack will make a relevant contribution to the success of the overall operation.”).

attacking force;<sup>394</sup> and (3) diverting enemy forces' resources and attention.

5.12.2.1 *Considering the Advantage From the Attack as a Whole – In the Operational and Strategic Context.* The military advantage expected from an attack is intended to refer to the advantage gained from the attack considered as a whole, rather than only from isolated or particular parts of an attack.<sup>395</sup> Similarly, “military advantage” is not restricted to immediate tactical gains, but may be assessed in the full context of the war strategy.<sup>396</sup> The military importance of a target often turns on its relationship to other targets within an operational system, and the effect that disabling the target will have on the functions that comprise the adversary's ability to wage war.<sup>397</sup> For example, an attack against a

---

<sup>394</sup> Australia, *Statement on Ratification of AP I*, Jun. 21, 1991, 1642 UNTS 473-74 (“In relation to paragraph 5(b) of Article 51 and to paragraph 2(a)(iii) of Article 57, it is the understanding of Australia ... that the term ‘military advantage’ involves a variety of considerations including the security of attacking forces.”); New Zealand, *Statement on Ratification of AP I*, Feb. 8, 1988, 1499 UNTS 358 (“3. In relation to paragraph 5(b) of Article 51 and to paragraph 2(a)(iii) of Article 57, the Government of New Zealand understands ... that the term ‘military advantage’ involves a variety of considerations, including the security of attacking forces.”); 2001 CANADIAN MANUAL ¶415(2) (“Military advantage may include a variety of considerations including the security of the attacking forces.”).

<sup>395</sup> United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 77 (“*Re: Article 51 and Article 57* In the view of the United Kingdom, the military advantage anticipated from an attack is intended to refer to the advantage anticipated from the attack considered as a whole and not only from isolated or particular parts of the attack.”); Australia, *Statement on Ratification of AP I*, Jun. 21, 1991, 1642 UNTS 473 (“In relation to paragraph 5(b) of Article 51 and to paragraph 2(a)(iii) of Article 57, it is the understanding of Australia that references to the ‘military advantage’ are intended to mean the advantage anticipated from the military attack considered as a whole and not only from isolated or particular parts of that attack ... .”); Germany, *Statement on Ratification of AP I*, Feb. 14, 1991, 1607 UNTS 526, 529 (“In applying the rule of proportionality in Article 51 and Article 57, ‘military advantage’ is understood to refer to the advantage anticipated from the attack considered as a whole and not only from isolated or particular parts of the attack.”); Netherlands, *Statement on Ratification of AP I*, Jun. 26, 1987, 1477 UNTS 300 (“With regard to Article 51, paragraph 5 and Article 57, paragraphs 2 and 3 of Protocol I: It is the understanding of the Government of the Kingdom of the Netherlands that military advantage refers to the advantage anticipated from the attack considered as a whole and not only from isolated or particular parts of the attack ... .”).

<sup>396</sup> U.S. *Comments on the International Committee of the Red Cross's Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2064 (“The concept of ‘incidental loss of life excessive in relation to the military advantage anticipated’ generally is measured against an overall campaign.”). *For example*, FINAL REPORT ON THE PERSIAN GULF WAR 611 (“An uncodified but similar provision is the principle of proportionality. It prohibits military action in which the negative effects (such as collateral civilian casualties) clearly outweigh the military gain. This balancing may be done on a target-by-target basis, as frequently was the case during Operation Desert Storm, but also may be weighed in overall terms against campaign objectives.”).

<sup>397</sup> See, e.g., JOINT PUBLICATION 3-60, *Joint Targeting*, pp. II-5-II-6 (Jan. 31, 2013) (“While a single target may be significant because of its own characteristics, the target's real importance lies in its relationship to other targets within an operational system. A target system is most often considered as a collection of assets directed to perform a specific function or series of functions (see Figure II-4). While target systems are intra-dependent to perform a specific function, they are also interdependent in support of adversary capabilities (e.g., the electric power system may provide energy to run the adversary's railroads that are a key component of their military logistic system). System level target development links these multiple target systems and their components to reflect both their intra- and interdependency that, in aggregate, contribute to the adversary capabilities. JIPOE helps target developers prioritize an adversary's target systems based on how much each contributes to the adversary's ability to wage war.”); JOINT PUBLICATION 3-05.5, *Joint Special Operations Targeting and Mission Planning Procedures*, p. II-5 (Aug. 10, 1993) (“A single target may be significant because of its own characteristics. Most often, its importance lies in its relationship to other targets.”).

communications relay that was a military objective might be expected to yield a much greater military advantage when the attack was part of a strategy of coordinated attacks to disable the adversary's command and control network than as an isolated attack.<sup>398</sup>

Consideration of the military advantage of the entire attack in its operational and strategic context ensures the proper consideration and allocation of responsibility to the appropriate levels within the military hierarchy.<sup>399</sup> Lower-level personnel may not be competent to evaluate the broader strategic and operational implications of the entire attack.<sup>400</sup>

5.12.3 Determining Whether the Expected Incidental Harm Is Excessive. A potential attack against a military objective is prohibited by this rule only when the expected incidental harm is excessive in relation to the concrete and direct military advantage expected to be gained.

Determining whether the expected incidental harm is excessive does not necessarily lend itself to quantitative analysis because the comparison is often between unlike quantities and values.<sup>401</sup> The evaluation of expected incidental harm in relation to expected military advantage intrinsically involves both professional military judgments as well as moral and ethical judgments evaluating the risks to human life (*e.g.*, civilians at risk from the attack, friendly forces or civilians at risk if the attack is not taken).

On the one hand, striking an ammunition depot or a terrorist training camp would not be prohibited because a farmer is plowing a field in the area.<sup>402</sup> On the other hand, an extraordinary

---

<sup>398</sup> For example, ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶78 (Jun. 13, 2000) (“The FRY command and control network was alleged by NATO to comprise a complex web and that could thus not be disabled in one strike. ... The proportionality or otherwise of an attack should not necessarily focus exclusively on a specific incident. (See in this regard para. 52, above, referring to the need for an overall assessment of the totality of civilian victims as against the goals of the military campaign). With regard to these goals, the strategic target of these attacks was the Yugoslav command and control network. The attack on the RTS building must therefore be seen as forming part of an integrated attack against numerous objects, including transmission towers and control buildings of the Yugoslav radio relay network which were ‘essential to Milosevic’s ability to direct and control the repressive activities of his army and special police forces in Kosovo’ (NATO press release, 1 May 1999) and which comprised ‘a key element in the Yugoslav air-defence network’ (*ibid*, 1 May 1999).”).

<sup>399</sup> 2013 GERMAN MANUAL (“In accordance with a statement made by the Federal Republic of Germany upon the deposit of the instrument of ratification of the Additional Protocols, a military advantage is the advantage expected to result from the entire attack and not from the individual acts that constitute the attack (46). This ensures the proper consideration and allocation of responsibility to the appropriate levels within the military hierarchy.”).

<sup>400</sup> Refer to § 5.10.2.1 (Need for Competent Authority to Make the Decisions and Judgments Required by the Principle of Proportionality).

<sup>401</sup> ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶48 (Jun. 13, 2000) (“The main problem with the principle of proportionality is not whether or not it exists but what it means and how it is to be applied. It is relatively simple to state that there must be an acceptable relation between the legitimate destructive effect and undesirable collateral effects. ... Unfortunately, most applications of the principle of proportionality are not quite so clear cut. It is much easier to formulate the principle of proportionality in general terms than it is to apply it to a particular set of circumstances because the comparison is often between unlike quantities and values. One cannot easily assess the value of innocent human lives as opposed to capturing a particular military objective.”).

<sup>402</sup> ICTY, *Final Report to the Prosecutor by the Committee Established to Review the NATO Bombing Campaign Against the Federal Republic of Yugoslavia*, ¶48 (Jun. 13, 2000) (“For example, bombing a refugee camp is

military advantage would be necessary to justify an operation posing risks of collateral death or injury to thousands of civilians.<sup>403</sup> In less clear-cut cases, the legal question of whether the expected incidental harm is excessive may be a “highly open-ended” inquiry, and the answer may be “subjective and imprecise.”<sup>404</sup> For this reason, States have chosen to apply a “clearly excessive” standard for determining whether a criminal violation has occurred.<sup>405</sup>

---

obviously prohibited if its only military significance is that people in the camp are knitting socks for soldiers. Conversely, an air strike on an ammunition dump should not be prohibited merely because a farmer is plowing a field in the area.”); ROGERS, LAW ON THE BATTLEFIELD 64-65 (“Accepting at face value for the sake of legal analysis a press report of a pilot whose attack on an army lorry and a busload of soldiers also killed a small boy in a civilian car, this could not be said to have violated the proportionality principle.”).

<sup>403</sup> See, e.g., GREENSPAN, MODERN LAW OF LAND WARFARE 335 (“[A]n attack on a war factory which is known to be of minor importance cannot justify the incidental destruction of the whole town where it is situated.”). For example, W. Hays Parks, *The 1977 Protocols to the Geneva Convention of 1949*, 68 U.S. NAVAL WAR COLLEGE INTERNATIONAL LAW STUDIES 467, 470 (1995) (“During the Vietnam War, for example, the North Vietnamese installed substantial concentrations of antiaircraft guns and missiles on the earthware dikes and dams surrounding Haiphong and Hanoi. *Military necessity* warranted airstrikes against these positions. However, attack of the positions with conventional ordnance would destroy not only the enemy positions but the dams as well. This would result in massive flooding and in the probable deaths of several hundred thousand civilians, a cost U.S. authorities concluded was disproportionate to the military advantage to be gained. When the mission finally was approved by President Nixon, it was executed with a clear proviso that only antipersonnel bombs, capable of neutralization of the positions without substantial damage to the dikes, would be used.”).

<sup>404</sup> *Statement of Interest of the United States of America*, Matar v. Dichter, 05 Civ. 10270 (WHP) (S.D.N.Y. Nov. 17, 2006), 2006 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 465, 471-72 (“Along similar lines, plaintiffs cite Article 57 of Additional Protocol I, which provides, *inter alia*, that ‘[t]hose who plan or decide upon an attack shall ... [r]efrain from deciding to launch any attack which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.’ Additional Protocol I, Art. 57, cl. 2(a)(iii). Again, the rub lies in determining what counts as ‘excessive.’ Any number of intangibles must be [c]onsidered: How important is the military objective sought to be achieved? What are the pros and cons of each option available to achieve that objective? For each option, what is the probability of success? What are the costs of failure? What are the risks of civilian casualties involved in each option? What are the risks of military casualties involved in each option? How are casualties of either kind to be weighed against the benefits of the operation? In short, questions of proportionality are highly open-ended, and the answers to them tend to be subjective and imprecise.”).

<sup>405</sup> See, e.g., III OFFICIAL RECORDS OF THE UNITED NATIONS DIPLOMATIC CONFERENCE OF PLENIPOTENTIARIES ON THE ESTABLISHMENT OF AN INTERNATIONAL CRIMINAL COURT 229, 232 (2002) (United States of America: proposal regarding an annex on definitional elements for part 2 crimes, A/CONF.183/C.1/L.10) (“*Proportionality*. The principle of proportionality prohibits attacks which are expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be clearly excessive in relation to the overall advantage anticipated;”); Germany, Federal Court of Justice, Federal Prosecutor General, Fuel Tankers Case, Decision, Apr. 16, 2010, as reprinted and translated by the International Committee of the Red Cross at [https://ihl-databases.icrc.org/customary-ihl/eng/docs/v2\\_cou\\_de\\_rule14\\_sectionb](https://ihl-databases.icrc.org/customary-ihl/eng/docs/v2_cou_de_rule14_sectionb) (“Even if the killing of several dozen civilians would have had to be anticipated (which is assumed here for the sake of the argument), from a tactical-military perspective this would not have been out of proportion to the anticipated military advantages. The literature consistently points out that general criteria are not available for the assessment of specific proportionality because unlike legal goods, values and interests are juxtaposed which cannot be ‘balanced’ ... Therefore, considering the particular pressure at the moment when the decision had to be taken, an infringement is only to be assumed in cases of obvious excess where the commander ignored any considerations of proportionality and refrained from acting ‘honestly’, ‘reasonably’ and ‘competently’ ... This would apply to the destruction of an entire village with hundreds of civilian inhabitants in order to hit a single enemy fighter, but not if the objective was to destroy artillery positions in the village ... There is no such obvious disproportionality in the present case. Both the destruction of the fuel tankers and the destruction of high-level Taliban had a military importance which is not to be underestimated, not

In determining whether the expected incidental harm would be excessive, the totality of the circumstances must be considered. This holistic judgment should consider any relevant moral, legal, and military factors.

5.12.3.1 *The Military Concept of Economy of Force.* As with the obligation to take feasible precautions, the prohibition on attacks expected to cause excessive incidental harm involves military judgments.<sup>406</sup> Use of excessive and indiscriminate force is costly, highly inefficient, and wasteful of scarce resources.

The principle of proportionality has been viewed as a legal restatement of the military concept of economy of force.<sup>407</sup> Economy of force seeks to allocate the maximum possible combat power on primary efforts through the judicious employment and distribution of forces and the measured allocation of available combat power.<sup>408</sup>

---

least because of the thereby considerably reduced risk of attacks by the Taliban against own troops and civilians. There is thus no excess.”). *Consider* ROME STATUTE art. 8(2)(b)(iv) (defining “war crimes” for the purposes of the Statute to include, in the context of international armed conflict, “[i]ntentionally launching an attack in the knowledge that such attack will cause incidental loss of life or injury to civilians or damage to civilian objects or widespread, long-term and severe damage to the natural environment which would be clearly excessive in relation to the concrete and direct overall military advantage anticipated;”). *See also* U.S. RESPONSE TO ICRC CIHL STUDY 528 endnote 30 (“One of the U.S. concerns has been that Articles 35(3) and 55 [of AP I] fail to acknowledge that use of such weapons is prohibited only if their use is clearly excessive in relation to the concrete and direct overall military advantage anticipated.”); FINAL REPORT ON THE PERSIAN GULF WAR 611 (“An uncodified but similar provision is the principle of proportionality. It prohibits military action in which the negative effects (such as collateral civilian casualties) clearly outweigh the military gain.”); BOTHE, PARTSCH, & SOLF, NEW RULES 309-10 footnote 30 (AP I art. 51, ¶2.6.2) (“As the two sides of the equation cannot be quantified, it seems that only an obvious imbalance can be considered ‘disproportionate’ or ‘excessive’.”); APPENDIX TO 1985 CJCS MEMO ON API, *Annex: Draft Reservations and Understandings*, 3 (providing a draft understanding that “in relation to Articles 51(5)(b), 52(2), and 57(2)(a)(iii) that the military advantage anticipated from an attack must be considered as a whole and not only from isolated or particular parts of the attack and that incidental civilian losses are excessive only when tantamount to the total disregard for the safety of the civilian population.”).

<sup>406</sup> Refer to § 5.2.3.3 (The Taking of Precautions and Law, Policy, and Practice).

<sup>407</sup> General George S. Brown, Chairman of the Joint Chiefs of Staff, *Address: Duke University School of Law*, Oct. 10, 1974, *reprinted in* ADDRESSES AND STATEMENTS BY GENERAL GEORGE S. BROWN, USAF, CHAIRMAN, JOINT CHIEF OF STAFF 1974-1978 (1978) (“We recognize that wanton destruction and unnecessary suffering are both violations of these military developed legal principles and counterproductive to the political military goals of the Nation. The law of ‘proportionality’ is simply a legal restatement of the time honored military concept of ‘economy of force.’”); 1989 NWP 9 ¶5.2 footnote 8, p. 5-8 (“Economy of force means that no more--or less--effort should be devoted to a task than is necessary to achieve the objective. This implies the correct selection and use of weapons and weapon systems, maximum productivity from available weapons platforms, and careful balance in the allocation of tasks. This principle is embodied in the fundamental legal principle of proportionality.”).

<sup>408</sup> JOINT PUBLICATION 3-0, *Joint Operations*, A-2 (Aug. 11, 2011) (“e. **Economy of Force** (1) The purpose of economy of force is to expend minimum essential combat power on secondary efforts in order to allocate the maximum possible combat power on primary efforts. (2) Economy of force is the judicious employment and distribution of forces. It is the measured allocation of available combat power to such tasks as limited attacks, defense, delays, deception, or even retrograde operations to achieve mass elsewhere at the decisive point and time.”). *See also* CARL VON CLAUSEWITZ, ON WAR 213 (1989) (“If a segment of one’s force is located where it is not sufficiently busy with the enemy, or if troops are on the march—that is, idle—while the enemy is fighting, then these forces are being managed uneconomically. When the time for action comes, the first requirement should be that all parts must act: even the least appropriate task will occupy some of the enemy’s forces and reduce his overall strength, while completely inactive troops are neutralized for the time being.”).

Although mere poor military judgment or substandard operational practice is not by itself unlawful, if a strike would be so wasteful of resources as to be inconsistent with the principle of economy of force, this is a factor counseling against taking the contemplated strike.

5.12.3.2 *Feasibility of Taking Additional Precautions to Reduce the Risk of Incidental Harm.* Incidental harm is more likely to be regarded as excessive in attacks in which it would be feasible to take additional precautions and those precautions are not taken.<sup>409</sup>

The obligation to take feasible precautions is fundamentally connected to the prohibition on attacks expected to cause excessive incidental harm, and the two obligations are mutually reinforcing.<sup>410</sup> Thus, although the obligation to take feasible precautions applies even if an attack is expected not to cause excessive incidental harm, incidental harm expected to result from strikes in which additional precautions are feasible, but have not been taken, would be more likely to be considered excessive.

5.12.3.3 *Civilian Workers Who Support Military Operations In or On Military Objectives.* In general, reasonable steps must be taken to separate the civilian population from military objectives, such as by removing members of the civilian population from the vicinity of military objectives and combat operations.<sup>411</sup> However, sometimes civilian personnel work in or on military objectives in order to support military operations. For example, civilian workers sometimes serve as members of military aircrews, as technical advisers on warships, and as workers in munitions factories. Such persons assume a certain risk of injury.<sup>412</sup> Provided such workers are not taking a direct part in hostilities, those determining whether a planned attack would be excessive must consider such workers, and feasible precautions must be taken to

---

<sup>409</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>410</sup> Refer to § 5.10.5 (Relationship Between the Requirement to Take Feasible Precautions in Planning and Conducting Attacks and the Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>411</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>412</sup> U.S. Comments on the International Committee of the Red Cross's Memorandum on the Applicability of International Humanitarian Law in the Gulf Region, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2063 ("Likewise, civilians working within or in the immediate vicinity of a legitimate military objective assume a certain risk of injury."). See also BOTHE, PARTSCH, & SOLF, NEW RULES 295 (AP I art. 50, ¶2.2.2) ("By being within, or in the vicinity of a military objective, these civilians assume the risk of collateral injury from the effects of attack. It is also doubtful that incidental injury to persons serving the armed forces within a military objective will weigh as heavily in the application of the rule of proportionality as that part of the civilian population which is not so closely linked to military operations."); *The Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law: A Workshop on Customary International Law and the 1977 Protocols Additional to the 1949 Geneva Conventions: Remarks of Lieutenant Colonel Burrus M. Carnahan*, 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 505, 510 ("State practice, on the other hand, suggests the existence of at least one intermediate category: persons who, while not taking a direct part in hostilities, are so intimately connected with a military objective that they have forfeited the right to be free from risk of collateral damage."); Waldemar A. Solf, *Protection of Civilians Against the Effects of Hostilities under Customary International Law and Under Protocol I*, 1 AMERICAN UNIVERSITY INTERNATIONAL LAW REVIEW 117, 131 (1986) ("Thus, while a civilian may not lose his protection against individualized attack while working in a munitions plant, he assumes the risk of collateral injury when he is in the vicinity of the munitions plant, although he continues to retain full protection while at home.").

reduce the risk of harm to them. Those making such determinations may consider all relevant facts and circumstances.

The expected harm to civilian members of military aircrews on military aircraft or civilian technical advisers on warships does not render military aircraft or warships immune from attack.<sup>413</sup> Similarly, munitions factories have not been deemed to be immune from attack just because of the presence of civilian workers inside the factory.<sup>414</sup>

5.12.3.4 *Enemy Use of Human Shields*. Adversary use of human shields can present complex moral, ethical, legal, and policy considerations.<sup>415</sup> Use of civilians as human shields violates the rule that protected persons may not be used to shield, favor, or impede military operations.<sup>416</sup> The party that employs human shields in an attempt to shield military

---

<sup>413</sup> 2001 CANADIAN MANUAL ¶425 (“For targeting purposes, the presence of civilians who are authorized to accompany the armed forces without actually being members thereof (such as crews of military aircraft, war correspondents, supply contractors or members of services responsible for the welfare of the armed forces) does not render a legitimate target immune from attack. Such persons run the risk of being attacked as part of a legitimate target.”).

<sup>414</sup> See, e.g., Spain, Orientaciones. El Derecho de los Conflictos Armados, Tomo 1, Publicacion OR7-0004 (Edicion Segunda), Mando de adiestramiento y Doctrina, Direccion de Doctrina, Organica y Materiales, Nov. 2, 2007, § 4.4e, as reprinted and translated by the International Committee of the Red Cross at [https://www.icrc.org/customary-ihl/eng/docs/v2\\_rul\\_rule8\\_sectioni](https://www.icrc.org/customary-ihl/eng/docs/v2_rul_rule8_sectioni) (“Indirect objectives are those that cannot be directly attacked, but may suffer the consequences of an attack on a military objective. Civilians ... are considered to be indirect objectives that may suffer the effects of an attack on a legitimate military target in the following cases: - presence in the vicinity of a military objective, with a view to shielding it from attacks; - activities that support military operations (labour units, workers in weapons factories, etc.)”) (ellipsis in ICRC reprint); Spain, Orientaciones. El Derecho de los Conflictos Armados, Publicacion OR7-004, 2 Tomos, aprobado por el Estado Mayor del Ejercito, Division de Operaciones, Mar. 18, 1996, Vol. I, §4.4e, as reprinted and translated by the International Committee of the Red Cross at [https://www.icrc.org/customary-ihl/eng/docs/v2\\_rul\\_rule8\\_sectioni](https://www.icrc.org/customary-ihl/eng/docs/v2_rul_rule8_sectioni) (“indirect objectives” are objectives “which may not be the object of a direct attack but which can suffer the consequences of an attack upon a military objective. Such is the case for civilians ... who may suffer the effects of an attack upon a legitimate military objective due to: – their proximity to a military objective aimed at shielding that objective against attack; – their carrying out activities supporting military operations (units of workers, workers in arms factories, etc.)”) (ellipsis in ICRC reprint); Federal Republic of Germany, Federal Ministry of Defence, Humanitarian law in Armed Conflicts Manual ¶445 (August 1992) (“**Civilians present in military objectives** are not protected against attacks directed at these objectives; the presence of civilian workers in an arms production plant, for instance, will not prevent opposing armed forces from attacking this military objective.”); Switzerland, *Lois et coutumes de la guerre (Extrait et commentaire)*, Reglement 51.7/II f, Armee Suisse, 1987, Article 28 and commentary, as reprinted and translated by the International Committee of the Red Cross at [https://www.icrc.org/customary-ihl/eng/docs/v2\\_cou\\_ch\\_rule8\\_sectioni](https://www.icrc.org/customary-ihl/eng/docs/v2_cou_ch_rule8_sectioni) (“Civilians who are inside or in the immediate vicinity of military objectives run the risks to which the military objectives are exposed. For example, the presence of civilian workers inside a weapons factory does not prevent the enemy from attacking this military objective.”).

<sup>415</sup> Cf. Presidential Policy Directive 30, *U.S. Nationals Taken Hostage Abroad and Personnel Recovery Efforts*, June 24, 2015 (“The United States will use every appropriate resource to gain the safe return of U.S. nationals who are held hostage. But the United States Government will make no concessions to individuals or groups holding U.S. nationals hostage. It is United States policy to deny hostage-takers the benefits of ransom, prisoner releases, policy changes, or other acts of concession. This policy protects U.S. nationals and strengthens national security by removing a key incentive for hostage-takers to target U.S. nationals, thereby interrupting the vicious cycle of hostage-takings, and by helping to deny terrorists and other malicious actors the money, personnel, and other resources they need to conduct attacks against the United States, its nationals, and its interests.”).

<sup>416</sup> Refer to § 5.16 (Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations).

objectives from attack assumes responsibility for their injury, although the attacker may share this responsibility if it fails to take feasible precautions.<sup>417</sup>

If civilians are being used as human shields, provided they are not taking a direct part in hostilities, they must be considered as civilians in determining whether a planned attack would be excessive, and feasible precautions must be taken to reduce the risk of harm to them.<sup>418</sup> However, the enemy use of voluntary human shields may be considered as a factor in assessing the legality of an attack. Based on the facts and circumstances of a particular case, the commander may determine that persons characterized as voluntary human shields are taking a direct part in hostilities.<sup>419</sup>

### 5.13 ATTACKS ON FACILITIES, WORKS, OR INSTALLATIONS CONTAINING DANGEROUS FORCES

Certain facilities containing dangerous forces, such as dams, nuclear power plants, or facilities producing weapons of mass destruction, may constitute military objectives. There may be a number of reasons for their attack, such as denial of electric power to military sources, use of a dangerous facility (*e.g.*, by causing release from a dam) to damage or destroy other military objectives, or to pre-empt enemy release of the dangerous forces to hamper the movement or advance of U.S. or allied forces.<sup>420</sup>

Attack of facilities, works, or installations containing dangerous forces, such as dams, nuclear power plants, or facilities producing weapons of mass destruction, is permissible so long as it is conducted in accordance with other applicable rules, including the rules of discrimination and proportionality.<sup>421</sup> In light of the increased potential magnitude of incidental harm, additional precautions, such as weaponeering or timing the attack such that weather conditions would minimize dispersion of dangerous materials, may be appropriate to reduce the risk that the release of these dangerous forces may pose to the civilian population.<sup>422</sup>

#### 5.13.1 AP I Provisions on Works and Installations Containing Dangerous Forces. Article

---

<sup>417</sup> Refer to § 5.16.5 (Responsibility for Harm to Human Shields). See also 2004 UK MANUAL ¶2.7.2 (“Even where human shields are being used, the proportionality rule must be considered. However, if the defenders put civilians or civilian objects at risk by placing military objectives in their midst or by placing civilians in or near military objectives, this is a factor to be taken into account in favour of the attackers in considering the legality of attacks on those objectives.”) (footnote omitted).

<sup>418</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>419</sup> Refer to § 5.8.3 (“Taking a Direct Part in in Hostilities”).

<sup>420</sup> For example, Mark L. Evans and C. Ross Bloodsworth, *The Dambusters at Hwachon*, NAVAL AVIATION NEWS 22, 23 (May-Jun. 2001) (explaining the military significance of Hwachon Dam during the Korean war by noting that the enemy’s control of the facility allowed them to “flood the valley and stop further UN advances” or “[i]f they held back the water by closing the gates, the river would be lowered to fordable depths and enable communist infiltration across the river against the exposed allied flanks.”).

<sup>421</sup> Refer to § 5.5 (Discrimination in Conducting Attacks); § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>422</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

56 of AP I provides special rules for works and installations containing dangerous forces. For example, “[w]orks or installations containing dangerous forces, namely dams, dykes and nuclear electrical generating stations, shall not be made the object of attack, even where these objects are military objectives, if such attack may cause the release of dangerous forces and consequent severe losses among the civilian population.” In addition, Article 56 of AP I provides immunity from attack to combatants and military equipment stationed or placed around works and installations containing dangerous forces “for the sole purpose of defending the protected works.”

The United States has objected to this article of AP I.<sup>423</sup> In ratifying AP I, other States have taken reservations from this article.<sup>424</sup> Insofar as Article 56 of AP I deviates from the regular application of the principles of distinction and proportionality, the U.S. view has been that it does not reflect customary international law applicable in international and non-international armed conflicts.

#### 5.14 FEASIBLE PRECAUTIONS TO REDUCE THE RISK OF HARM TO PROTECTED PERSONS AND OBJECTS BY THE PARTY SUBJECT TO ATTACK

Outside the context of conducting attacks (such as when conducting defense planning or other military operations), parties to a conflict should also take feasible precautions to reduce the risk of harm to protected persons and objects from the effects of enemy attacks.<sup>425</sup> In particular,

---

<sup>423</sup> See *The Position of the United States on Current Law of War Agreements: Remarks of Judge Abraham D. Sofaer, Legal Adviser, United States Department of State, Jan. 22, 1987*, 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 460, 468 (1987) (“Article 56 of Protocol I is designed to protect dams, dikes, and nuclear power plants against attacks that could result in ‘severe’ civilian losses. As its negotiating history indicates, this article would protect objects that would be considered legitimate military objectives under customary international law. Attacks on such military objectives would be prohibited if ‘severe’ civilian casualties might result from flooding or release of radiation. The negotiating history throws little light on what level of civilian losses would be ‘severe.’ It is clear, however, that under this article, civilian losses are not to be balanced against the military value of the target. If severe losses would result, then the attack is forbidden, no matter how important the target. It also appears that article 56 forbids any attack that raises the possibility of severe civilian losses, even though considerable care is taken to avoid them.”).

<sup>424</sup> See, e.g., United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 78 (“*Re. Articles 56 and 85, paragraph 3 (c)* The United Kingdom cannot undertake to grant absolute protection to installations which may contribute to the opposing Party’s war effort, or to the defenders of such installations, but will take all due precautions in military operations at or near the installations referred to in paragraph 1 of Article 56 in the light of the known facts, including any special marking which the installation may carry, to avoid severe collateral losses among civilian populations; direct attacks on such installations will be launched only on authorization at a high level of command.”); France, *Statement on Ratification of AP I, translated in* SCHINDLER & TOMAN, *THE LAWS OF ARMED CONFLICTS: A COLLECTION OF CONVENTIONS, RESOLUTIONS, AND OTHER DOCUMENTS* 801 (2004) (“The Government of the French Republic cannot guarantee an absolute protection to the works and installations containing dangerous forces which may contribute to the opposing Party’s war effort, or to the defenders of such installations, but will take all precautions referred to the provisions of Article 56, of Article 57, paragraph 2(a)(iii) and of paragraph 3(c) of Article 85 in order to avoid severe collateral losses among the civilian populations, including possible direct attacks.”).

<sup>425</sup> Consider AP I art. 58 (“The Parties to the conflict shall, to the maximum extent feasible: (a) Without prejudice to Article 49 of the Fourth Convention, endeavour to remove the civilian population, individual civilians and civilian objects under their control from the vicinity of military objectives; (b) Avoid locating military objectives within or near densely populated areas; (c) Take the other necessary precautions to protect the civilian population, individual civilians and civilian objects under their control against the dangers resulting from military operations.”).

military commanders and other officials responsible for the safety of the civilian population must take reasonable steps to separate the civilian population from military objectives and to protect the civilian population from the effects of combat. As discussed in § 5.2.3.2 (What Precautions Are Feasible), what precautions are feasible depends greatly on the context.<sup>426</sup> Feasible precautions by the party subject to attack may include the following:

5.14.1 Refraining From Placing Military Objectives in Densely Populated Areas. It may be appropriate to avoid placing military objectives, such as the armed forces, in urban or other densely populated areas, in order to reduce the risk of incidental harm to the civilian population.<sup>427</sup>

However, it often may not be feasible to refrain from placing military objectives in densely populated areas. Legitimate military reasons often require locating or billeting military forces in urban areas or other areas where civilians are present. For example, forces may be housed in populated areas to take advantage of existing facilities, such as facilities for shelter, health and sanitation, communications, or power. In some cases, especially during counter-insurgency operations or in non-international armed conflict generally, the protection of the civilian population may be increased by placing military forces in densely populated areas to protect the civilian population from enemy attack and influence.<sup>428</sup>

5.14.2 Removing Civilians and Civilian Objects From the Vicinity of Military Objectives. It may be appropriate to remove civilians and civilian objects from the vicinity of military objectives.<sup>429</sup> In particular, civilian hospitals should be situated as far as possible from military objectives.<sup>430</sup>

The evacuation of civilians from areas likely to be attacked is advisable when there is immediate danger and where it would be likely to involve less hardship and danger to civilians than leaving them in place.<sup>431</sup>

Voluntary removal of civilians may be accomplished through the use of warnings.<sup>432</sup> When removing civilians from the vicinity of military objectives, it may be appropriate to establish safety, hospital, or neutralized zones so that civilians have safe places to move

---

<sup>426</sup> Refer to § 5.2.3.2 (What Precautions Are Feasible).

<sup>427</sup> Consider AP I art. 58 (“The Parties to the conflict shall, to the maximum extent feasible: ... (b) Avoid locating military objectives within or near densely populated areas;”).

<sup>428</sup> Refer to § 17.5.2.1 (Positioning Military Forces Near the Civilian Population to Win Their Support and to Protect Them).

<sup>429</sup> Consider AP I art. 58 (“The Parties to the conflict shall, to the maximum extent feasible: (a) Without prejudice to Article 49 of the Fourth Convention, endeavour to remove the civilian population, individual civilians and civilian objects under their control from the vicinity of military objectives;”).

<sup>430</sup> Refer to § 7.17.3 (Location of Civilian Hospitals).

<sup>431</sup> 2004 UK MANUAL ¶5.36.1 (“The evacuation of civilians from areas likely to be attacked is advisable when there is immediate danger and where it would be likely to involve less hardship and danger to civilians than leaving them in place.”).

<sup>432</sup> Refer to § 5.11.5 (Effective Advance Warning Before an Attack That May Affect the Civilian Population).

toward.<sup>433</sup>

It also may be appropriate to conclude local agreements for the removal of civilians from besieged or encircled areas.<sup>434</sup>

During international armed conflict, the forcible transfer or deportation of protected persons from occupied territory is prohibited.<sup>435</sup>

5.14.3 Establishing Areas Where Civilians or the Wounded and Sick Are Protected. Certain zones or localities may be established through the agreement of parties to a conflict to shelter civilians or wounded and sick combatants from the effects of attacks.<sup>436</sup>

In this context, “locality” means a specific place of limited area, generally containing buildings, while “zone” means a relatively large area of land and may include one or more localities.<sup>437</sup>

5.14.3.1 Civilian Hospital and Safety Zones and Localities. During international armed conflict, States may establish hospital and safety zones and localities to protect certain persons from the effects of war, namely, wounded, sick, and aged persons, children under fifteen, expectant mothers, and mothers of children under seven.<sup>438</sup> Parties to a conflict may conclude agreements on the mutual recognition of the hospital zones and localities they have created, drawing upon model agreements that are annexed to the 1949 Geneva Conventions.<sup>439</sup> The establishment of a zone only binds an adverse party when it agrees to recognize the zone.<sup>440</sup>

---

<sup>433</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>434</sup> Refer to § 5.19.2 (Removal and Passage of Certain Personnel – Vulnerable Civilians, Diplomatic and Consular Personnel, the Wounded and Sick, and Medical Personnel).

<sup>435</sup> Refer to § 11.12.3 (Prohibition Against Forcible Transfers and Deportations).

<sup>436</sup> For example, SYLVIE-STOYANKA JUNOD, INTERNATIONAL COMMITTEE OF THE RED CROSS, PROTECTION OF THE VICTIMS OF ARMED CONFLICT FALKLAND-MALVINAS ISLANDS: INTERNATIONAL HUMANITARIAN LAW AND HUMANITARIAN ACTION (1982) 26 (1984) (“At Britain’s suggestion, and without any special agreement in writing, the Parties to the conflict established a neutral zone at sea. This zone, called the Red Cross Box, with a diameter of approximately twenty nautical miles, was located on the high seas to the north of the islands. Without hampering military operations, it enabled hospital ships to hold position, in particular the UGANDA, and exchange British and Argentine wounded.”).

<sup>437</sup> GC COMMENTARY 120-21 (“Locality should be taken to mean a specific place of limited area, generally containing buildings. The term *zone* is used to describe a relatively large area of land and may include one or more localities.”).

<sup>438</sup> GC art. 14 (“In time of peace, the High Contracting Parties and, after the outbreak of hostilities, the Parties thereto, may establish in their own territory and, if the need arises, in occupied areas, hospital and safety zones and localities so organized as to protect from the effects of war, wounded, sick and aged persons, children under fifteen, expectant mothers and mothers of children under seven.”).

<sup>439</sup> GC art. 14 (“Upon the outbreak and during the course of hostilities, the Parties concerned may conclude agreements on mutual recognition of the zones and localities they have created. They may for this purpose implement the provisions of the Draft Agreement annexed to the present Convention, with such amendments as they may consider necessary.”).

<sup>440</sup> GC COMMENTARY 127 (“The zones will not, strictly speaking, have any legal existence, or enjoy protection under the Convention, until such time as they have been recognized by the adverse Party. This will entail the

These zones and localities may be combined with hospital zones established for the wounded and sick of the armed forces.<sup>441</sup>

Protecting Powers and the ICRC may seek to facilitate the institution and recognition of civilian hospital and safety zones and localities.<sup>442</sup>

5.14.3.2 *Military Hospital Zones and Localities.* States may establish in their own territory, and if the need arises, in occupied areas, hospital zones and localities so organized as to protect the wounded and sick (as defined in the GWS<sup>443</sup>) from the effects of war, as well as the personnel entrusted with the organization and administration of these zones and localities and with the care of the persons assembled within them.<sup>444</sup>

5.14.3.3 *Neutralized Zones.* It may be appropriate to conclude agreements with opposing forces to establish neutralized zones in regions where fighting is taking place.<sup>445</sup> Neutralized zones differ from civilian hospital and safety zones in that they are intended to protect a broader group of persons and in that they are generally established on a temporary basis in regions where fighting is taking place.<sup>446</sup>

---

conclusion of an agreement between the Power which has established zones in its territory and the Powers with which it is at war. It is only an agreement of this kind, concluded, as a general rule, after the outbreak of hostilities, which gives legal form to the obligation on States which have accorded recognition to zones to respect those zones. An agreement recognizing the zones is thus a *sine qua non* of their legal existence from the international point of view. It should contain all the provisions, particularly in regard to control procedure, required to prevent disputes arising later in regard to its interpretation.”).

<sup>441</sup> GC COMMENTARY 125 (“As has already been pointed out, the provisions relating to hospital and safety zones in the First and Fourth Geneva Conventions are sufficiently flexible to make various combinations possible. There is, for instance, no reason why a hospital zone should not combine the two types and provide shelter for both soldiers and civilians in need of treatment, since once a soldier is wounded or sick, he may be said to be no longer a combatant on either side, but simply a suffering, inoffensive human being.”).

<sup>442</sup> GC art. 14 (“The Protecting Powers and the International Committee of the Red Cross are invited to lend their good offices in order to facilitate the institution and recognition of these hospital and safety zones and localities.”).

<sup>443</sup> Refer to § 7.3.2 (Persons Entitled to Protection as Wounded, Sick, or Shipwrecked Under the GWS and GWS-Sea).

<sup>444</sup> GWS art. 23 (“In time of peace, the High Contracting Parties and, after the outbreak of hostilities, the Parties thereto, may establish in their own territory and, if the need arises, in occupied areas, hospital zones and localities so organized as to protect the wounded and sick from the effects of war, as well as the personnel entrusted with the organization and administration of these zones and localities and with the care of the persons therein assembled.”).

<sup>445</sup> For example, 2004 UK MANUAL ¶5.40.1 footnote 258 (“During the Falklands conflict of 1982, a neutralized zone was set up in the centre of Port Stanley, comprising the cathedral and a clearly defined area around it. This was done at the suggestion of the ICRC representative and with the consent of the Argentine and British authorities.”); SPAIGHT, AIR POWER AND WAR RIGHTS 256 (“With the consent of both the Chinese and Japanese military authorities a district known as Nantao, lying between the French concession and a densely populated part of the old Chinese city, was selected and cleared of all troops, munition factories and other military establishments, and its boundaries were marked by flags. ... ‘The outstanding success of this scheme at Shanghai ... led very quickly to the adoption of similar arrangements at Hankow and other great Chinese cities that were liable to bombardment, and it may be accepted that the lives of tens, if not of hundreds, of thousands of hapless Chinese have thus been saved.’”).

<sup>446</sup> GC COMMENTARY 129 (“[N]eutralized zones differ from hospital and safety zones in that they are established in the actual regions where fighting is taking place and are intended to give shelter to both civilian and military wounded and sick, as well as all civilian persons who take no part in hostilities. Furthermore, they are generally set

These neutralized zones are to shelter: (a) wounded and sick combatants or noncombatants; and (b) civilian persons who take no part in hostilities, and who, while they reside in the zones, perform no work of a military character.<sup>447</sup>

Agreements should be made in writing, signed by representatives of the parties to the conflict, and should establish: (a) the location of the zone; (b) the administration of the zone; (c) the food supply of the zone; (d) the supervision of the zone; and (e) the beginning and duration of the neutralization of the zone.<sup>448</sup>

5.14.4 Using Distinctive and Visible Signs to Identify Protected Persons and Objects as Such. It may be appropriate to identify protected persons and objects, as such, through the use of distinctive and visible signs. For example, it may be appropriate to identify civilian hospitals<sup>449</sup> or civilian air raid shelters in order to facilitate their protection during enemy bombardment.<sup>450</sup> Signs indicating civilian objects, as such, should be notified to the opposing party so that the opposing party knows to refrain from bombarding places or buildings bearing these signs.

Where enemy forces seek to make peaceful civilians the object of attack, then it would not be appropriate to distinguish civilian objects. Such precautions would not be feasible because they would not be expected to yield a humanitarian benefit.<sup>451</sup>

5.14.5 Carrying Arms Openly and Wearing of Distinctive Emblems by the Armed Forces to Distinguish Themselves From the Civilian Population. Although the practices of carrying arms openly and wearing uniforms and distinctive emblems by armed forces predates

---

up on a temporary basis to meet the tactical situation at a particular moment, whereas hospital and safety zones tend to be more permanent in character.”).

<sup>447</sup> GC art. 15 (“Any Party to the conflict may, either direct or through a neutral State or some humanitarian organization, propose to the adverse Party to establish, in the regions where fighting is taking place, neutralized zones intended to shelter from the effects of war the following persons, without distinction: (a) wounded and sick combatants or non-combatants; (b) civilian persons who take no part in hostilities, and who, while they reside in the zones, perform no work of a military character.”).

<sup>448</sup> GC art. 15 (“When the Parties concerned have agreed upon the geographical position, administration, food supply and supervision of the proposed neutralized zone, a written agreement shall be concluded and signed by the representatives of the Parties to the conflict. The agreement shall fix the beginning and the duration of the neutralization of the zone.”).

<sup>449</sup> Refer to § 7.17.2.2 (Markings of Civilian Hospitals With the Distinctive Emblem).

<sup>450</sup> See, e.g., HAGUE IV REG. art. 27 (“In sieges and bombardments all necessary steps must be taken to spare, as far as possible, buildings dedicated to religion, art, science, or charitable purposes, historic monuments, hospitals, and places where the sick and wounded are collected, provided they are not being used at the time for military purposes. It is the duty of the besieged to indicate the presence of such buildings or places by distinctive and visible signs, which shall be notified to the enemy beforehand.”); HAGUE IX art. 5 (“In bombardments by naval forces all the necessary measures must be taken by the commander to spare as far as possible sacred edifices, buildings used for artistic, scientific, or charitable purposes, historic monuments, hospitals, and places where the sick or wounded are collected, on the understanding that they are not used at the same time for military purposes. It is the duty of the inhabitants to indicate such monuments, edifices, or places by visible signs, which shall consist of large stiff rectangular panels divided diagonally into two coloured triangular portions, the upper portion black, the lower portion white.”).

<sup>451</sup> Refer to § 5.2.3.2 (What Precautions Are Feasible).

contemporary doctrines of feasible precautions, these practices may be viewed as feasible precautions that help protect the civilian population from being erroneously made the object of attack.<sup>452</sup>

This requirement of armed forces to wear distinctive emblems has been understood as a requirement for the armed forces as a group.<sup>453</sup> However, it applies, to some extent, on an individual basis in the context of liability for spying or sabotage.<sup>454</sup> The obligation of armed forces to distinguish themselves includes, but is not limited to, those times when they conduct attacks.<sup>455</sup> However, the requirement to wear distinctive emblems is not an absolute one, even during combat.<sup>456</sup>

## 5.15 UNDEFENDED CITIES, TOWNS, AND VILLAGES

Attack, by whatever means, of a village, town, or city that is undefended is prohibited.<sup>457</sup> Undefended villages, towns, or cities may, however, be captured.

5.15.1 “Undefended” – Notes on Terminology. The term *undefended city* (or *town* or *village*, or any other populated area) is a term of art in the law of war and should not be confused with a place that simply lacks defensive capabilities. Historically, open or undefended status for a town, village, or city would be sought as opposing military forces approached and the military forces previously controlling the city abandoned it.<sup>458</sup> Undefended or open status would essentially surrender the city to the opposing force; this minimized injury to the inhabitants and damage to civilian objects within the city because the city could be occupied without resistance or bypassed.<sup>459</sup>

---

<sup>452</sup> Refer to § 4.6.4 (Having a Fixed Distinctive Sign Recognizable at a Distance); § 4.6.5 (Carrying Arms Openly).

<sup>453</sup> Refer to § 4.6.1.1 (GPW 4A(2) Conditions Required on a Group Basis).

<sup>454</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>455</sup> Refer to § 5.4.8 (Obligation of Combatants to Distinguish Themselves When Conducting Attacks).

<sup>456</sup> Refer to § 5.4.8.1 (Fighting Out of Uniform).

<sup>457</sup> See HAGUE IV REG. art. 25 (“The attack or bombardment, by whatever means, of towns, villages, dwellings, or buildings which are undefended is prohibited.”); HAGUE IX art. 1 (“The bombardment by naval forces of undefended ports, towns, villages, dwellings, or buildings is forbidden.”). Consider AP I art. 59(1) (“It is prohibited for the Parties to the conflict to attack, by any means whatsoever, non-defended localities.”).

<sup>458</sup> For example, H. Wayne Elliot, *Open Cities and (Un)defended Places*, THE ARMY LAWYER 39, 41 (Apr. 1995) (“When the military forces had abandoned the city, the city’s civic leaders normally had the burden of meeting with the opposing commander and informing him that the city was open. Accordingly, the mayor of Columbia, South Carolina, went to the Union lines as General Sherman approached the city and informed him that the Confederate forces had left and that the city was open for the Union army’s entry. When the Confederate government was forced to abandon Richmond, Virginia, the mayor met the advancing Union forces and informed General Grant’s commanders that the city was open. Once the capturing forces entered the city, they were obligated to refrain from looting and pillaging and were responsible for the safety of the city’s residents. Nonetheless, war materials still in the city could be destroyed.”).

<sup>459</sup> H. Wayne Elliot, *Open Cities and (Un)defended Places*, THE ARMY LAWYER 39, 41 (Apr. 1995) (“Surrender usually meant the complete submission of the military forces defending an area to the enemy. However, when the opposing military forces simply abandoned the city, the city was considered to be undefended and ‘open.’ That is, the attacking force could enter the city at will and without fear of attack. Under these circumstances destroying the

5.15.1.1 *Non-defended Versus Undefended*. Article 59 of AP I uses the term “non-defended” rather than “undefended,” but uses essentially the same criteria as FM 27-10’s discussion of “undefended” places within the meaning of Article 25 of the Hague IV Regulations. The change from “undefended” in the Hague IV Regulations and Hague IX, to “non-defended” in AP I, appears to reflect a difference in translation from French to English rather than a substantive difference.

The original text of the Hague IV Regulations and Hague IX is French.<sup>460</sup> In the French versions of the text, both the Hague IV Regulations and Hague IX use a dependent clause “that are not defended” in order to modify the list of places.<sup>461</sup> Rather than a dependent clause, AP I uses an adjective -- “non-defended” modifying the word “localities.”<sup>462</sup> The difference in English terms seems to reflect this underlying change in the French phrasing.

Moreover, the title of the chapter in Hague IX—“Du bombardement des ports, villes, villages, habitations ou bâtiments non défendus” (emphasis added)—uses the same French phrase as is used in AP I, yet the last two words of the title of the chapter in Hague IX have typically been translated as “undefended” rather than “non-defended.”

Thus, the consistency in terminology across the French texts suggests that even though the English terminology has varied slightly, no substantive change has been intended.

5.15.1.2 *Open Versus Undefended*. If “undefended” is simply understood in a factual sense to mean a lack of defenses and “open” is simply understood in a factual sense to mean “open” for entry by the enemy, then distinctions could be drawn between “open” cities and “undefended” cities, because not all cities lacking defenses would be open for entry by enemy forces. For example, a city that did not itself have defenses, but was located deep behind the State’s defensive lines would not be “open” for entry by enemy forces.

Most sources, however, use “open” and “undefended” interchangeably.<sup>463</sup> It appears that these terms tend to be used interchangeably because both terms generally refer to a specific legal

---

entire city was unnecessary, although individual military targets in the city might be destroyed, either before or after entry.”).

<sup>460</sup> William H. Taft, *Proclamation Regarding the Hague IX*, Feb. 28, 1910, 36 STAT. 2351 (“Whereas a Convention concerning bombardment by naval forces in time of war was concluded ... the original of which Convention, being in the French language, is word for word as follows:”); William H. Taft, *Proclamation Regarding the Hague IV*, Feb. 28, 1910, 36 STAT. 2277 (“Whereas a Convention respecting the laws and customs of war on land was concluded ... the original of which Convention, being in the French language, is word for word as follows:”).

<sup>461</sup> See HAGUE IV REG. art. 25 (“Il est interdit d’attaquer ou de bombarder, par quelque moyen que ce soit, des villes, villages, habitations, ou bâtiments qui ne sont pas défendus.”) (emphasis added); HAGUE IX art. 1 (“Il est interdit de bombarder, par des forces navales, des ports, villes, villages, habitations ou bâtiments, qui ne sont pas défendus.”) (emphasis added).

<sup>462</sup> See AP I art. 59, 1125 UNTS 299 (“Il est interdit aux Parties au conflit d’attaquer, par quelque moyen que ce soit, des localités non défendues.”) (emphasis added).

<sup>463</sup> See, e.g., 1958 UK MANUAL ¶290 (“An undefended or ‘open’ town is a town which is so completely undefended from within or without that the enemy may enter and take possession of it without fighting or incurring casualties.”).

category of populated areas that are protected by the law of war from attack.<sup>464</sup>

5.15.2 “By Whatever Means”. The phrase “by whatever means” was inserted in the Hague IV Regulations to clarify that bombing attacks by air were included in the rule.<sup>465</sup>

5.15.3 Declaration of a City as “Undefended”. An undefended city may be established through negotiations with opposing forces,<sup>466</sup> or unilaterally by the party to the conflict in control of it. If the latter, the intent and actions of that party should be communicated to opposing military forces through a declaration. A town, village, or city may be declared “undefended” when it is near, or in, a zone where opposing armed forces are in contact with one another and it is open for immediate physical occupation by an adverse party without resistance.<sup>467</sup>

5.15.3.1 Open for Immediate Physical Occupation. The area in question must be open for immediate physical occupation by opposing military ground forces.<sup>468</sup> Thus, a city in rear areas behind enemy lines cannot be “undefended.” For example, a party to a conflict cannot declare a city or other population center to be undefended if it is several hundred miles behind the area of ground conflict where it would not be feasible for opposing ground forces to occupy it. By way of comparison, it would not be effective for a person to seek to surrender to an opposing force’s aircraft that could not physically take custody of that person.<sup>469</sup>

5.15.3.2 Necessity for a Declaration of Undefended Status. Although there is no explicit treaty requirement that a city be declared undefended before achieving that status, the practice has been to make such declarations to the opposing party. Without them, a belligerent

---

<sup>464</sup> See R.Y. Jennings, *Open Towns*, 22 BYIL 258, 260-61 (1945) (“There can be little doubt that the land warfare rules exempted the ‘open and undefended’ town from bombardment because, being undefended, it was, under the conditions of contemporary warfare, open for the enemy to enter and take possession of, or destroy, its military resources. This quality of being open to entry by the enemy is the essence of the rule. ... It is impossible to conceive of a truly undefended town which is not also open in every sense of the word.”).

<sup>465</sup> See JAMES BROWN SCOTT, *THE PROCEEDINGS OF THE HAGUE PEACE CONFERENCES: I THE CONFERENCE OF 1907* 104 (1920) (“The Russian and Italian proposals had the same design, and were calculated to supplement Article 25 of the 1899 Regulations with a provision securing to undefended towns, villages, dwellings or buildings absolute immunity from all attack or bombardment, ‘even by aid of balloons or other new methods of a similar nature.’ ... The delegation of France then observed that the prohibition contemplated by the new Russian text, while entirely conforming to its opinion as previously expressed, is already contained in the text now in force in Article 25, and that consequently it is sufficient, if deemed necessary to avoid misunderstanding by rendering its terms precise, to insert the words ‘by any means whatever’ after ‘to attack or bombard.’”).

<sup>466</sup> Refer to § 5.15.5 (Agreements to Establish Undefended Cities).

<sup>467</sup> 1956 FM 27-10 (Change No. 1 1976) ¶39b (“An undefended place, within the meaning of Article 25, HR, is any inhabited place near or in a zone where opposing armed forces are in contact which is open for occupation by an adverse party without resistance.”). Consider AP art. 59(2) (“The appropriate authorities of a Party to the conflict may declare as a non-defended locality any inhabited place near or in a zone where armed forces are in contact which is open for occupation by an adverse Party.”).

<sup>468</sup> BOTHE, PARTSCH, & SOLF, *NEW RULES* 382 (AP I art. 59, ¶2.5.1) (“The concept intended is that it is sufficiently close to the adverse Party’s forces that tactical movement to occupy it is a feasible course of action by the advancing force.”).

<sup>469</sup> Refer to § 5.9.3.3 (Under Circumstances in Which It Is Feasible to Accept).

would have no way of knowing whether a city was truly open for occupation without resistance. For example, a city may not satisfy the conditions described below for undefended status, or it may contain defenses that are concealed or that are operated from other areas.<sup>470</sup>

5.15.3.3 *Refusal to Recognize a Declaration.* Belligerents may refuse to recognize a declaration that a city is undefended if they assess that it does not satisfy all of the necessary conditions, although they should notify the opposing belligerent of that decision.<sup>471</sup> Absent or until recognition, military objectives in a city unilaterally designated as undefended remain subject to attack.<sup>472</sup>

5.15.3.4 *Authority to Make a Declaration or to Recognize a Declaration.* Declaration of a city being open or recognition of an opposing party's declaration may only be accomplished by those with authority to enforce the corresponding obligations, which may be the immediate military commander, theater commander, or national command authorities.<sup>473</sup> These obligations may extend more broadly than control over the city itself as, for example, when the city's defenses are operated from a different location.

5.15.4 *Conditions Necessary for a Place to Maintain Undefended Status.* Once a party to a conflict has validly declared a city to be undefended, the city must also satisfy certain conditions. If the city fails to satisfy these conditions, it would not be entitled to undefended status, or, if previously granted, it would lose that status.<sup>474</sup> Persons and objects within that city,

---

<sup>470</sup> R.Y. Jennings, *Open Towns*, 22 BYIL 258, 261 (1945) ("But it is ludicrous to suppose that a town shielded by an army holding a line in front of it is undefended. Moreover, even the defences peculiarly appropriate to aerial warfare are no longer purely or even mainly local defences. Defending fighter planes may be based miles from the town. A screen of anti-aircraft guns sited on the route to the town, even though many miles away from it, may be a more effective defence than anti-aircraft guns sited in or around the town itself.").

<sup>471</sup> Consider AP I art. 59(4) ("The Party to the conflict to which the declaration is addressed shall acknowledge [sic] its receipt and shall treat the locality as a non-defended locality unless the conditions laid down in paragraph 2 are not in fact fulfilled, in which event it shall immediately so inform the Party making the declaration.").

<sup>472</sup> Cf. *Sansolini and Others v. Bentivegna and Others*, Italian Court of Cassation, Jul. 19, 1957 ("The declaration that Rome was an open city was made by the Italian Government before the armistice, viz., on July 31, 1943. It was made to the British and the Americans but never accepted by them. It follows from this lack of acceptance that the declaration could not create any legal obligation for the Italian Government vis-à-vis the British and the Americans. ... We must therefore reject the contention that there was any violation of an undertaking to respect Rome as an open city because there were not agreements to this effect ..."); BOTHE, PARTSCH, & SOLF, NEW RULES 383 (AP I art. 59, ¶2.5.2) ("Drawing on the World War II experience, the Canadian delegation pointed out that the decision not to defend Paris and Rome had been made while defending forces still had possession of these urban centres. Accordingly, the Canadian delegation proposed that a mechanism be developed under which the defending Party would declare that it did not intend to defend the locality and to initiate negotiations for permitting an orderly withdrawal. The locality was not to be attacked while such negotiation was taking place. Other delegations pointed out that the Canadian proposal would amount to a unilateral cease fire enabling the defending force to extricate itself from a precarious situation. This matter was left for mutual agreement between the Parties under para. 5.").

<sup>473</sup> For example, R.Y. Jennings, *Open Towns*, 22 BYIL 258, 263 (1945) ("The declaration of Rome as an open city by the Italian Government in August 1943 was little more than a public request to the Allies to state the conditions under which they would discontinue their bombing attacks on the city. The Allies were unable to comply with the request for the very good reason that however anxious the Italian Government might have been to comply with any conditions, they were in fact powerless to prevent the German Army from using the city as a military centre.").

<sup>474</sup> Consider AP I art. 59(7) ("A locality loses its status as a non-defended locality when it ceases to fulfil the conditions laid down in paragraph 2 or in the agreement referred to in paragraph 5.").

however, may still receive other protections for civilians and civilian objects.<sup>475</sup>

5.15.4.1 *Combatants and Mobile Military Equipment Have Been Evacuated.* All combatants, as well as their mobile weapons and mobile military equipment, must have been evacuated.<sup>476</sup> However, the presence of military medical personnel, the wounded and sick, and civilian police forces for the purpose of maintaining local law and order would not cause a city designated as undefended to lose that status.<sup>477</sup>

5.15.4.2 *No Hostile Use of Fixed Military Facilities.* No hostile use shall be made of fixed military installations or establishments within the city.<sup>478</sup>

5.15.4.3 *No Hostile Acts Against the Occupying Force.* Hostile acts may not be committed by the local civilian authorities or the civilian population against the occupying military force.<sup>479</sup>

5.15.4.4 *No Activities in Support of Military Operations.* No activities in support of military operations may be undertaken.<sup>480</sup> For example, factories in the city should not be used to manufacture munitions, and ports or railroads should not be used to transport military supplies.<sup>481</sup>

---

<sup>475</sup> Consider AP I art. 59(7) (“In such an eventuality, the locality shall continue to enjoy the protection provided by the other provisions of this Protocol and the other rules of international law applicable in armed conflict.”).

<sup>476</sup> See 1956 FM 27-10 (Change No. 1 1976) ¶39b (“In order to be considered as undefended, the following conditions should be fulfilled: (1) Armed forces and all other combatants, as well as mobile weapons and mobile military equipment, must have been evacuated, or otherwise neutralized;”). Consider AP I art. 59(2) (requiring that in a non-defended locality “(a) All combatants, as well as mobile weapons and mobile military equipment, must have been evacuated;”).

<sup>477</sup> 1956 FM 27-10 (Change No. 1 1976) ¶39b (“The presence, in the place, of medical units, wounded and sick, and police forces retained for the sole purpose of maintaining law and order does not change the character of such an undefended place.”). Consider AP I art. 59(3) (“The presence, in this locality, of persons specially protected under the Conventions and this Protocol, and of police forces retained for the sole purpose of maintaining law and order, is not contrary to the conditions laid down in paragraph 2.”). Compare § 4.23.1 (Police as Civilians).

<sup>478</sup> See 1956 FM 27-10 (Change No. 1 1976) ¶39b (“In order to be considered as undefended, the following conditions should be fulfilled: ... (2) no hostile use shall be made of fixed military installations or establishments;”). Consider AP I art. 59(2) (requiring that in a non-defended locality “(b) No hostile use shall be made of fixed military installations or establishments;”).

<sup>479</sup> See 1956 FM 27-10 (Change No. 1 1976) ¶39b (“In order to be considered as undefended, the following conditions should be fulfilled: ... (3) no acts of warfare shall be committed by the authorities or by the population;”). Consider AP I art. 59(2) (requiring that in a non-defended locality “(c) No acts of hostility shall be committed by the authorities or by the population;”).

<sup>480</sup> See 1956 FM 27-10 (Change No. 1 1976) ¶39b (“In order to be considered as undefended, the following conditions should be fulfilled: ... (4) no activities in support of military operations shall be undertaken.”). Consider AP I art. 59(2) (requiring that in a non-defended locality “(d) No activities in support of military operations shall be undertaken.”).

<sup>481</sup> For example, F.D. ROOSEVELT & S. ROSENMAN, THE PUBLIC PAPERS AND ADDRESSES OF FRANKLIN D. ROOSEVELT: 1943 VOLUME 309 (1950) (“The Nine Hundred and Tenth Press Conference (Excerpts) July 23, 1943 (Rome as a military center - Bombing of Rome) Q. Mr. President, is there any comment you can make, sir, upon establishing Rome as an open city? THE PRESIDENT: I think the easiest thing is to tell you in general what has

5.15.5 Agreements to Establish Undefended Cities. Even if the conditions described above are not met, parties to a conflict may agree between themselves to treat an area as an undefended city.<sup>482</sup> The agreement should be in writing and should define and describe, as precisely as possible, the limits of the undefended city (such as the exact geographic limits of the locality, when the location is to begin to receive protection as undefended, and the duration of undefended status). If necessary, methods of supervision to ensure that the city continues to fulfill the conditions should be specified.<sup>483</sup> It may also be appropriate for agreements to specify: (1) rules on marking the city and agreed signs;<sup>484</sup> (2) persons authorized to enter the city; and (3) whether and under what conditions the city may be occupied by enemy forces.

5.15.6 Actions of the Occupying Force. The occupying force may use the city, town, or village for military operations, including by establishing defenses to prevent its recapture by the enemy.<sup>485</sup> In such cases, the city would lose its undefended status, and, for example, military objectives within the city may be attacked.<sup>486</sup>

However, if the occupying force acts in a manner consistent with the conditions necessary for the inhabited place to maintain undefended status,<sup>487</sup> the place would remain undefended for the purpose of protecting it against military operations by all parties to the conflict.

---

been happening for over a year. We have been very anxious to have Rome declared an open city. However, the Fascists would not do it; and on the contrary, it has become—probably was then—a very important military center. That means they were making munitions, and using airports very close to Rome—actually in Rome, and the use of Rome because it’s a railroad center for transportation of troops, guns, and ammunition down to the south of Rome. And we used every argument, and pleaded that it be made an open city. But it didn’t work. We did our best. And we still hope that the Germans and the Fascists will make it an open city.”).

<sup>482</sup> Consider AP I art. 59(5) (“The Parties to the conflict may agree on the establishment of non-defended localities even if such localities do not fulfil the conditions laid down in paragraph 2.”).

<sup>483</sup> Consider AP I art. 59(5) (“The agreement should define and describe, as precisely as possible, the limits of the non-defended locality; if necessary, it may lay down the methods of supervision.”).

<sup>484</sup> Consider AP I art. 59(6) (“The Party which is in control of a locality governed by such an agreement shall mark it, so far as possible, by such signs as may be agreed upon with the other Party, which shall be displayed where they are clearly visible, especially on its perimeter and limits and on highways.”).

<sup>485</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 382 (AP I art. 59, ¶2.4) (“Once in possession of a previously non-defended locality a Party is not bound to refrain from organizing its defense to maintain the security of the locality against an attempt to recapture the locality.”).

<sup>486</sup> See The Legal Adviser (Hackworth) to Secretary of State Hull, memorandum, Aug. 19, 1943, X WHITEMAN’S DIGEST 437 (“If our troops were in Rome [after the United States had recognized it as an open city] or passing through Rome, they would be subject to bombardment by Germany and hence the city would be in the same position as French cities, including Paris, were after they were occupied by German forces or were being used for military purposes. It appears that in the last war French cities, such as Vouziers, Charleville, and Mézières, regarded as open cities were bombarded by the French after they had been occupied by Germany. The sum and substance of these examples is that the status of a city may change from an undefended to a defended place as military operations change, and that recognition by use of Rome as an open city would mean only that we could not bomb it while it was so recognized, but that if we later used it ourselves, it would again become subject to bombardment.”).

<sup>487</sup> Refer to § 5.15.4 (Conditions Necessary for a Place to Maintain Undefended Status).

## 5.16 PROHIBITION ON USING PROTECTED PERSONS AND OBJECTS TO SHIELD, FAVOR, OR IMPEDE MILITARY OPERATIONS

Parties to a conflict may not use the presence or movement of protected persons<sup>488</sup> or objects<sup>489</sup>: (1) to attempt to make certain points or areas immune from seizure or attack; (2) to shield military objectives from attack; or (3) otherwise to shield or favor one's own military operations or to impede the adversary's military operations.

5.16.1 Protected Persons and Objects. In particular, the civilian population,<sup>490</sup> protected persons under the GC,<sup>491</sup> POWs,<sup>492</sup> fixed medical establishments and medical units, *parlementaires* and other persons protected by a flag of truce,<sup>493</sup> and cultural property are protected persons and objects that may not be used for the above purposes.

Although persons and objects that are protected by the law of war may not be used in these ways, this rule does not prohibit a party from using what would otherwise be a civilian object for military purposes and thereby converting it to a military objective that is not protected by the law of war. For example, a building that previously was a civilian object could be used for military purposes (including as cover) and would not implicate this rule because it would no longer be a protected object. Similarly, this rule does not prohibit persons who would otherwise be civilians from participating in hostilities or otherwise assuming the risks inherent in

---

<sup>488</sup> Cf. 10 U.S.C. § 950t (“(9) USING PROTECTED PERSONS AS A SHIELD.—Any person subject to this chapter who positions, or otherwise takes advantage of, a protected person with the intent to shield a military objective from attack. [sic] or to shield, favor, or impede military operations, shall be punished, if death results to one or more of the victims, by death or such other punishment as a military commission under this chapter may direct, and, if death does not result to any of the victims, by such punishment, other than death, as a military commission under this chapter may direct.”); 10 U.S.C. § 950p (a)(3) (“The term ‘protected person’ means any person entitled to protection under one or more of the Geneva Conventions, including civilians not taking an active part in hostilities, military personnel placed out of combat by sickness, wounds, or detention, and military medical or religious personnel.”).

<sup>489</sup> Cf. 10 U.S.C. § 950t (“(10) USING PROTECTED PROPERTY AS A SHIELD.—Any person subject to this chapter who positions, or otherwise takes advantage of the location of, protected property with the intent to shield a military objective from attack, or to shield, favor, or impede military operations, shall be punished as a military commission under this chapter may direct.”); 10 U.S.C. § 950p(a)(3) (“The term ‘protected property’ means any property specifically protected by the law of war, including buildings dedicated to religion, education, art, science, or charitable purposes, historic monuments, hospitals, and places where the sick and wounded are collected, but only if and to the extent such property is not being used for military purposes or is not otherwise a military objective. The term includes objects properly identified by one of the distinctive emblems of the Geneva Conventions, but does not include civilian property that is a military objective.”).

<sup>490</sup> Consider AP I 51(7) (“The presence or movements of the civilian population or individual civilians shall not be used to render certain points or areas immune from military operations, in particular in attempts to shield military objectives from attacks or to shield, favour or impede military operations. The Parties to the conflict shall not direct the movement of the civilian population or individual civilians in order to attempt to shield military objectives from attacks or to shield military operations.”).

<sup>491</sup> GC art. 28 (“The presence of a protected person may not be used to render certain points or areas immune from military operations.”).

<sup>492</sup> Refer to § 9.5.2.3 (No Exposure to a Combat Zone or Use as a Human Shield).

<sup>493</sup> Refer to § 12.4.2.1 (Prohibition on Improper Use of the Flag of Truce).

supporting military operations.<sup>494</sup>

5.16.2 Intent to Endanger Protected Persons or Objects to Deter Enemy Military Operations. The essence of this rule is to refrain from deliberately endangering protected persons or objects for the purpose of deterring enemy military operations.<sup>495</sup> This absolute duty to refrain from purposeful misconduct may be contrasted with the affirmative obligation that parties have to take feasible precautions to separate the civilian population,<sup>496</sup> civilian internees,<sup>497</sup> POWs,<sup>498</sup> fixed medical establishments and medical units,<sup>499</sup> and cultural property,<sup>500</sup> from the dangers of military operations.

An adversary's intention to violate this rule is likely to be clear because that adversary normally would make it apparent to the opposing party that attacks against the military objective being shielded would risk harming protected persons or objects.<sup>501</sup>

On the other hand, in the absence of purposeful action to put protected persons and objects at risk of harm from enemy military operations, there would be no violation of this rule. For example, this rule would not prohibit restricting the movement of civilians in order to conduct military operations without their interference. In addition, it would also not prohibit the

---

<sup>494</sup> Refer § 4.15.2.2 (Employment in Hostilities); § 4.18.5 (Private Persons Who Engage in Hostilities and the Law of War); § 5.12.3.3 (Civilian Workers Who Support Military Operations In or On Military Objectives).

<sup>495</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 316 (AP I art. 51, ¶2.8.2) (“The mandatory provisions of para. 7 are intended to prohibit any deliberate use of the physical presence or physical movement of civilians for the purpose of shielding or favouring friendly military operations against enemy action or to impede enemy military operations. ... In practice this means that in some close cases the location of a military objective in the midst of a populated town may violate para. 7 if the purpose of the location is to shield the military unit or facility from attack. On the other hand, the same act could be innocent if it were militarily necessary to so situate the unit or facility. Thus the subjective intent of military commander is the controlling element in determining whether there has been a breach of para. 7, a negligent failure to take the precautions urged by Art. 58, or a legitimate act of war.”).

<sup>496</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>497</sup> Refer to § 10.11.1.1 (Avoidance of Particularly Dangerous Areas).

<sup>498</sup> Refer to § 9.11.3 (Location of POW Camps).

<sup>499</sup> Refer to § 7.10.2 (Obligation to Situate Military Medical Units and Facilities Relative to Military Objectives).

<sup>500</sup> Refer to § 5.18.3 (Refraining From Any Use for Purposes That Are Likely to Expose It to Destruction or Damage).

<sup>501</sup> For example, STUART I. ROCHESTER & FREDERICK KILEY, HONOR BOUND: THE HISTORY OF AMERICAN PRISONERS OF WAR IN SOUTHEAST ASIA, 1961-1973 316-21 (1998) (“Between June and October 1967 the North Vietnamese confined more than 30 U.S. PWs in the vicinity of the Yen Phu thermal power plant in northern Hanoi. ... Although the Communists would deny it, their conspicuous display and virtual announcement of the PWs’ presence at the power plant evidenced a transparent attempt to use the prisoners as hostages to discourage U.S. bombing of the facility. ... Through calculated disclosures to visiting journalists and diplomats, local placard publicity, and exhibiting the captives in full view of civilians—all sharp departures from their normal practice—the Vietnamese could be certain the PWs’ presence would be reported to the U.S. government. ... The hostage charade did not deter U.S. strikes on the target. The plant was attacked regularly after 13 August, with apparently no casualties and conflicting reports on the extent of damage to the power facility and PW cellblocks.”).

evacuation of civilians for their own security or for imperative military reasons.<sup>502</sup>

In addition, this rule must not be understood to alter the rules on spying and sabotage. In other words, this rule does not prohibit a spy from hiding among civilians in order to gather intelligence. However, the spy runs the risk of prosecution by the enemy State if he or she is discovered and captured while spying.

5.16.3 Prohibition on Taking Hostages. The taking of hostages is prohibited.<sup>503</sup> This prohibition is understood to include a prohibition against threatening to harm detainees whose lives are valued by the adversary in order to induce the adversary not to attack, but is also understood to include the prohibition against using hostages as human shields.<sup>504</sup>

The taking of hostages is also prohibited in non-international armed conflict.<sup>505</sup>

5.16.4 Use of Human Shields by Defenders Does Not Relieve Attackers of Duties in Conducting Attacks. Violations by the adversary of the prohibition on using protected persons and objects to shield, favor, or impede military operations do not relieve those conducting attacks from their obligation to seek to discriminate between lawful and unlawful objects of attack.<sup>506</sup> However, such violations by the adversary may impair the attacking force's ability to discriminate and increase the risk of harm to protected persons and objects.<sup>507</sup>

---

<sup>502</sup> Cf. BOTHE, PARTSCH, & SOLF, *NEW RULES 317* (AP I art. 51, ¶2.8.3) (“Paragraph 7 [of Article 51 of AP I] does not prohibit measures to restrict the movement of civilians so as to avoid their interference with military movement, nor does it prohibit ordering their evacuation if their security or imperative military reasons so demand.”).

<sup>503</sup> GC art. 34 (“The taking of hostages is prohibited.”). Cf. 18 U.S.C. § 2441(d)(1)(I) (defining “Taking hostages” as “The act of a person who, having knowingly seized or detained one or more persons, threatens to kill, injure, or continue to detain such person or persons with the intent of compelling any nation, person other than the hostage, or group of persons to act or refrain from acting as an explicit or implicit condition for the safety or release of such person or persons.”); 10 U.S.C. § 950t(7) (“TAKING HOSTAGES.—Any person subject to this chapter who, having knowingly seized or detained one or more persons, threatens to kill, injure, or continue to detain such person or persons with the intent of compelling any nation, person other than the hostage, or group of persons to act or refrain from acting as an explicit or implicit condition for the safety or release of such person or persons, shall be punished, if death results to one or more of the victims, by death or such other punishment as a military commission under this chapter may direct, and, if death does not result to any of the victims, by such punishment, other than death, as a military commission under this chapter may direct.”).

<sup>504</sup> GC COMMENTARY 230 (giving as examples of hostage taking: (1) “taking as hostages persons generally selected from among prominent persons in a city or a district in order to prevent disorders or attacks on occupation troops”; (2) “arresting after an attack a certain number of inhabitants of the occupied territory and announcing that they will be kept captive or executed if the guilty are not given up”; and (3) “the practice of taking so-called accompanying hostages consists of placing inhabitants of occupied territory on board lorry convoys or trains in order to prevent attacks by their compatriots”).

<sup>505</sup> Refer to § 17.6.2 (Prohibition on the Taking of Hostages).

<sup>506</sup> Refer to § 5.4.4 (Failure by the Defender to Separate or Distinguish Does Not Relieve the Attacker of the Duty to Discriminate in Conducting Attacks).

<sup>507</sup> FINAL REPORT ON THE PERSIAN GULF WAR 613 (“Another reason for collateral damage to civilian objects and injury to civilians during Operation Desert Storm lay in the policy of the Government of Iraq, which purposely used both Iraqi and Kuwaiti civilian populations and civilian objects as shields for military objects. Contrary to the admonishment against such conduct contained in Article 19, GWS, Articles 18 and 28, GC, Article 4(1), 1954 Hague, and certain principles of customary law codified in Protocol I (discussed below), the Government of Iraq

Although human shields who are civilians are to be considered as civilians in determining whether a planned attack would be excessive, enemy use of voluntary human shields may be considered as a factor in assessing the legality of an attack.<sup>508</sup> Feasible precautions must be taken to reduce the risk of harm to human shields.

5.16.5 Responsibility for Harm to Human Shields. The party that employs human shields in an attempt to shield military objectives from attack assumes responsibility for their injury, although the attacker may share this responsibility if it fails to take feasible precautions.<sup>509</sup>

## 5.17 SEIZURE AND DESTRUCTION OF ENEMY PROPERTY

Outside the context of attacks, certain rules apply to the seizure and destruction of enemy property:

- Enemy property may not be seized or destroyed unless imperatively demanded by the necessities of war;
- Public movable property and certain types of private movable property may customarily be captured as war booty;
- Enemy private movable property that is not susceptible of direct military use may be appropriated only to the extent that such taking is permissible in occupied areas;
- Pillage is prohibited; and
- Feasible precautions should be taken to mitigate the burden on civilians, but there is no obligation to compensate the owners of enemy property that is lawfully damaged.

---

placed military assets (personnel, weapons, and equipment) in civilian populated areas and next to protected objects (mosques, medical facilities, and cultural sites) in an effort to protect them from attack. For this purpose, Iraqi military helicopters were dispersed into residential areas; and military supplies were stored in mosques, schools, and hospitals in Iraq and Kuwait. Similarly, a cache of Iraqi Silkworm surface-to-surface missiles was found inside a school in a populated area in Kuwait City. UN inspectors uncovered chemical bomb production equipment while inspecting a sugar factory in Iraq. The equipment had been moved to the site to escape Coalition air strikes. This intentional mingling of military objects with civilian objects naturally placed the civilian population living nearby, working within, or using those civilian objects at risk from legitimate military attacks on those military objects.”).

<sup>508</sup> Refer to § 5.12.3.4 (Enemy Use of Human Shields).

<sup>509</sup> *U.S. Comments on the International Committee of the Red Cross’s Memorandum on the Applicability of International Humanitarian Law in the Gulf Region*, Jan. 11, 1991, DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1991-1999 2057, 2063 (“In no case may a combatant force utilize individual civilians or the civilian population to shield a military objective from attack. A nation that utilizes civilians to shield a target from attack assumes responsibility for their injury, so long as an attacker exercises reasonable precaution in executing its operations. Likewise, civilians working within or in the immediate vicinity of a legitimate military objective assume a certain risk of injury.”); *Instructor Training Course*, ¶3g, Appendix C in DEPARTMENT OF THE ARMY SUBJECT SCHEDULE 27-1, *The Geneva Conventions of 1949 and Hague Convention No. IV of 1907*, 18 (Aug. 29, 1975) (“(4) **Question:** Suppose we are receiving fire from the enemy, and they are using unarmed civilians as shields. May we fire back, knowing that we will be killing many of these unarmed civilians? **Answer:** Yes. We may fire since we have the right to defend ourselves. The responsibility for innocent casualties falls upon those who would violate the law of war by using innocents as shields.”).

During occupation, other rules relating to the treatment of enemy property apply.<sup>510</sup>

5.17.1 Definition of Enemy Property. All property located in enemy territory is regarded as enemy property regardless of its ownership.<sup>511</sup>

5.17.2 Enemy Property – Military Necessity Standard. Enemy property may not be seized or destroyed unless imperatively demanded by the necessities of war.<sup>512</sup> In particular, devastation or destruction may not be pursued as an end in itself.<sup>513</sup> The measure of permissible seizure or destruction of enemy property is found in the strict necessities of war.<sup>514</sup> There must be some reasonable connection between the seizure or destruction of the enemy property and the overcoming of enemy forces.<sup>515</sup>

Extensive destruction and appropriation of property protected by the GC, not justified by military necessity and carried out unlawfully and wantonly, constitutes a grave breach of the GC.<sup>516</sup>

5.17.2.1 Using the Military Objective Definition to Assess Whether the Seizure or Destruction of Enemy Property Is Justified by Military Necessity. The definition of military objective (that has been developed to assess whether objects may be made the object of attack) may be applied outside the context of attacks to assess whether an object’s seizure or destruction is justified by imperative military necessity.<sup>517</sup> After all, if sufficient military necessity exists to justify attacking an object as reflected by that object meeting the definition of military objective, then imperative military necessity would also exist to justify seizing or destroying that object by measures short of attack.

On the other hand, if imperative military necessity justifies the seizure or destruction of an object, that object does not necessarily satisfy the definition of a military objective. Rather, the object must be assessed as to whether it meets the definition of military objective and may be

---

<sup>510</sup> Refer to § 11.18 (Enemy Property During Occupation).

<sup>511</sup> See, e.g., *Aris Gloves, Inc. v. United States*, 420 F.2d 1386, 1391 (Ct. Cl. 1970) (collecting cases and describing “the general rule that all property located in enemy territory, regardless of its ownership, is in time of war regarded as enemy property subject to the laws of war”).

<sup>512</sup> HAGUE IV REG. art. 23(g) (“[I]t is especially forbidden: ... (g.) To destroy or seize the enemy’s property, unless such destruction or seizure be imperatively demanded by the necessities of war;”). For general discussion of military necessity, refer to § 2.2 (Military Necessity).

<sup>513</sup> 1956 FM 27-10 (Change No. 1 1976) ¶56 (“Devastation as an end in itself or as a separate measure of war is not sanctioned by the law of war.”); *United States v. List, et al. (The Hostage Case)*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1253 (“Destruction as an end in itself is a violation of international law.”). Refer to § 2.3.1 (*Humanity as a Prohibition*).

<sup>514</sup> 1956 FM 27-10 (Change No. 1 1976) ¶56 (“The measure of permissible devastation is found in the strict necessities of war.”).

<sup>515</sup> *United States v. List, et al. (The Hostage Case)*, XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1253-54 (“There must be some reasonable connection between the destruction of property and the overcoming of the enemy forces.”).

<sup>516</sup> Refer to § 18.9.3.1 (Acts Constituting Grave Breaches).

<sup>517</sup> Refer to § 5.6.5 (Definition of Military Objective for Objects: A Two-Part Test).

made the object of attack.

5.17.2.2 *Seizure or Destruction of Enemy Property to Support Military Operations*. It may be imperatively demanded by the necessities of war to seize or destroy enemy property in order to support military operations. These examples are illustrative and not exhaustive:

- using enemy land for the construction of military bases, air fields, and other facilities to support military operations;<sup>518</sup>
- using enemy buildings to billet military personnel and others supporting them, to house the wounded and sick, for observation and reconnaissance, for concealment and cover, and for defensive purposes;<sup>519</sup>
- demolishing, cutting down, or removing enemy walls, forests, and buildings to clear a field of fire or to provide construction material;<sup>520</sup> or
- seizing means of transportation for use in military operations.<sup>521</sup>

5.17.2.3 *Destruction of Enemy Property to Diminish the Enemy's Ability to Conduct or Sustain Operations*. It may be imperatively demanded by the necessities of war to seize or destroy enemy property in order to diminish the enemy's ability to conduct or sustain operations, such as railways, lines of communication, and other war fighting and war sustaining infrastructure.<sup>522</sup> For instance, Union forces destroyed the Confederacy's cotton during the Civil

---

<sup>518</sup> 1956 FM 27-10 (Change No. 1 1976) ¶56 (“[R]eal estate may be used for marches, camp sites, construction of field fortifications, etc.”).

<sup>519</sup> 1956 FM 27-10 (Change No. 1 1976) ¶56 (“Buildings may be destroyed for sanitary purposes or used for shelter for troops, the wounded and sick and vehicles and for reconnaissance, cover, and defense.”); LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 398 (§136) (“So far as the necessities of war demand, a belligerent may make use of public enemy buildings for all kinds of purposes. Troops must be housed, horses stabled, the sick and wounded looked after. Public buildings may in the first instance, therefore, be made use of for such purposes, although they may thereby be considerably damaged.”); LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 403 (§140) (“What has been said above with regard to utilisation of public buildings applies equally to private buildings.”).

<sup>520</sup> 1956 FM 27-10 (Change No. 1 1976) ¶56 (“Fences, woods, crops, buildings, etc., may be demolished, cut down, and removed to clear a field of fire, to clear the ground for landing fields, or to furnish building materials or fuel if imperatively needed for the army.”).

<sup>521</sup> For example, Interview by Robert K. Wright, Jr., Department of the Army, with Col. Barry S. Baer, Commander, 18th Finance Group, in Fort Bragg, N.C. (Mar. 15, 1990), available at <http://www.history.army.mil/documents/panama/JCIT/JCIT31.htm> (recounting how U.S. forces commandeered rental cars in Panama to increase tactical mobility in Operation JUST CAUSE).

<sup>522</sup> United States v. List, *et al.* (The Hostage Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 1254 (“It is lawful to destroy railways, lines of communication, or any other property that might be utilized by the enemy. Private homes and churches even may be destroyed if necessary for military operations.”); LIEBER CODE art. 15 (“Military necessity ... allows of all destruction of property, and obstruction of the ways and channels of traffic, travel, or communication, and of all withholding of sustenance or means of life from the enemy.”). Compare § 5.6.6.2 (Make an Effective Contribution to Military Action).

War in order to deprive the Confederacy of the ability to fund its military operations.<sup>523</sup> Similarly, coalition forces during Operation ENDURING FREEDOM destroyed narcotics in order to weaken the Taliban and al Qaeda's ability to finance their operations.<sup>524</sup>

5.17.2.4 *Incidental Damage to Enemy Property.* Military necessity also justifies damage to property incidental to combat operations that is reasonably related to overcoming enemy forces.<sup>525</sup> For example, the movement of armed forces and equipment may damage roads or fields.<sup>526</sup>

5.17.3 *Enemy Movable Property on the Battlefield (War Booty).* Any enemy public movable property on the battlefield may be seized.<sup>527</sup> Property is public if it belongs to the enemy State or an agency of that State.<sup>528</sup>

---

<sup>523</sup> In re Mrs. Alexander's Cotton, 69 U.S. 404, 419-20, 421 (1864) (holding that 72 bales of cotton taken from a barn by Union naval forces could lawfully be captured as enemy property based on "the peculiar character of the property" as "one of [the rebels'] main sinews of war," but that the cotton was not a maritime prize because it had been captured on land).

<sup>524</sup> International Security Assistance Force (ISAF) Joint Command – Afghanistan, *Press Release: Combined Force Finds, Destroys Drugs, Weapons Cache* (Sept. 7, 2010) (describing a patrol's destruction of a cache of opium and weapons in order to "significantly reduce[] the insurgent's ability to ... procure financial resources"); April Campbell, *Afghan Forces Becoming Increasingly Effective Against Drug Producers*, AFGHANISTAN INTERNATIONAL SECURITY ASSISTANCE FORCE – NEWS (Sept. 29, 2011) (describing Afghan counter-narcotics forces' seizure and destruction of narcotics laboratories and narcotics as "dealing a significant blow to the insurgency's ability to fund operations").

<sup>525</sup> See also GREENSPAN, MODERN LAW OF LAND WARFARE 282-83 ("While the seizure or destruction of enemy personnel and war material are actual objectives of warfare, the operations of war must also result in the incidental destruction and seizure of much property, not as the prime object of attack, but which becomes involved in the struggle. ... Troops march, ride, and fight wherever the battle takes them, whether over fields of growing crops or in the streets of cities, towns, or villages. Land is used for camp sites, entrenchments, and other defenses constructed in or on it, streets may be torn up, bridges demolished, dwellings and factories converted into strong points, furniture and bedding may provide the cover for a sharpshooter hidden in some dwelling. Practically every shell or bomb that explodes damages property in one form or another, whether or not it attains its objective. Most bullets that are fired strike, not humans, but property. Each missile that is launched must finally come to earth somewhere.").

<sup>526</sup> See, e.g., 1956 FM 27-10 (Change No. 1 1976) ¶56 (explaining that "the rule requiring respect for private property is not violated through damage resulting from operations, movements, or combat activity of the army"); 1958 UK MANUAL ¶589 ("The rule that private property must be respected admits, however, of exceptions necessitated by the exigencies of war. In the first instance, practically every operation, movement or combat occasions damage to private property."); LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 414 (§151) ("Destruction of enemy property in marching troops, in conducting military transport, and in reconnoitring, is lawful if unavoidable. A reconnoitring party need not keep on the road if they can better serve their purpose by riding across tilled fields. Troops may be marched, and transport may be conducted, over crops when necessary. A humane commander will not unnecessarily allow his troops and transport to march and ride over tilled fields and crops. But if the purpose of war necessitates it, he is justified in so doing.").

<sup>527</sup> 1956 FM 27-10 (Change No. 1 1976) ¶59a ("All enemy public movable property captured or found on a battlefield becomes the property of the capturing State."); LAUTERPACHT, II OPPENHEIM'S INTERNATIONAL LAW 402 (§139) ("[Movable] public enemy property on the battlefield may be appropriated by belligerents.").

<sup>528</sup> See, e.g., William Gerald Downey, Jr., *Captured Enemy Property: Booty of War and Seized Enemy Property*, 44 AJIL 488, 489 (1950) ("Enemy public property is defined as chattels, the title to which is vested in a state or in any agency of such state.").

In general, enemy private movable property on the battlefield may be seized if the property is susceptible to direct military use, *i.e.*, it is necessary and indispensable for the conduct of war.<sup>529</sup> This includes arms, ammunition, military papers, or property that can be used as military equipment (*e.g.*, as a means of transportation or communication).<sup>530</sup> However, certain types of military equipment used for clothing, feeding, or personal protection (*e.g.*, helmets and gas masks) may not be seized from POWs, and should remain in their possession.<sup>531</sup>

#### 5.17.3.1 *Private Military Property Not Susceptible to Direct Military Use.*

Private enemy property that is not susceptible to direct military use (*e.g.*, arms, ammunition, military papers, or military equipment) may be appropriated only to the extent such taking is permissible in occupied areas.<sup>532</sup> In particular, receipts should be given and compensation paid, when feasible.<sup>533</sup>

#### 5.17.3.2 *Ownership of Captured or Found Property on the Battlefield.*

All enemy property that is captured or found on the battlefield becomes the property of the capturing State.<sup>534</sup> During international armed conflict, personal property recovered from enemy dead becomes the property of the capturing State for the purpose of returning it to the next-of-kin of the deceased.<sup>535</sup> The individual military member or person accompanying the armed forces who captures or finds enemy property acquires no title or claim.<sup>536</sup>

---

<sup>529</sup> See *Menzel v. List*, 267 N.Y.S.2d 804, 820 (N.Y. Sup. Ct. 1966) (“*Booty* is defined as property necessary and indispensable for the conduct of war, such as food, means of transportation, and means of communication; and is lawfully taken.”).

<sup>530</sup> 1958 UK MANUAL ¶615 (“Private enemy property on the battlefield is not (as it was in former times) in every case booty. Arms and ammunition and military equipment and papers are booty, even if they are the property of individuals, but cash, jewellery, and other private articles of value are not.”); GREENSPAN, MODERN LAW OF LAND WARFARE 281 (“Private property in the following categories belonging to members of the enemy forces falls within the description of booty: arms, horses, military equipment, and military documents.”); LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 406 (§144) (“Private enemy property on the battlefield is no longer in every case an object of booty. Arms, horses, and military papers may indeed be appropriated, even if they are private property, as may also private means of transport, such as cars and other vehicles which an enemy may make use of.”).

<sup>531</sup> Refer to § 9.7 (POW Effects and Articles of Personal Use).

<sup>532</sup> See 1956 FM 27-10 (Change No. 1 1976) ¶59b (“Enemy private movable property, other than arms, military papers, horses, and the like captured or found on a battlefield, may be appropriated only to the extent that such taking is permissible in occupied areas.”). Refer to § 11.18.6 (Treatment of Enemy Private Property).

<sup>533</sup> Refer to § 11.18.6.2 (Seizure of Private Property Susceptible to Direct Military Use).

<sup>534</sup> 1956 FM 27-10 (Change No. 1 1976) ¶59a-b (providing that “[a]ll enemy public movable property captured or found on a battlefield becomes the property of the capturing State” and that “[e]nemy private movable property, other than arms, military papers, horses, and the like captured or found on a battlefield, may be appropriated only to the extent that such taking is permissible in occupied areas (see pars. 405-411).”); 1956 FM 27-10 (Change No. 1 1976) ¶396 (“Public property captured or seized from the enemy, as well as private property validly captured on the battlefield and abandoned property, is property of the United States . . . .”); 1958 UK MANUAL ¶615 (“Public enemy property found or captured on a battlefield becomes, as a general rule, the property of the opposing belligerent.”).

<sup>535</sup> Refer to § 7.7.2.2 (Forwarding Valuable Articles Found on the Dead).

<sup>536</sup> *Foster v. United States*, 98 F. Supp. 349, 352 (Ct. Cl. 1951) (“[A] soldier may not make a profit out of the disorder and flight which ensues from war. In the abandoned property which he comes upon, and which he must

Failure to turn over such property to the proper authorities, or disposal of such property for personal profit, is punishable under Article 103 of the Uniform Code of Military Justice.<sup>537</sup>

5.17.4 Pillage Prohibited. Pillage is prohibited, both in general<sup>538</sup> and specifically with respect to:

- the wounded, sick, shipwrecked, and dead;<sup>539</sup>
- POWs;<sup>540</sup>
- protected persons under the GC;<sup>541</sup>
- persons in occupied territory<sup>542</sup> and in areas of non-international armed conflict;<sup>543</sup> and
- cultural property.<sup>544</sup>

In certain cases, there is an affirmative obligation to prohibit and prevent pillage.<sup>545</sup>

5.17.4.1 Pillage – Definition and Notes on Terminology. *Pillage* is the taking of private or public movable property (including enemy military equipment) for private or personal

---

turn over to the proper authority without delay, he does not acquire any proprietary interest. His taking possession of it is done as an agent of the Government, and if it is not reclaimed by the owner who abandoned it, it belongs to the Government.”).

<sup>537</sup> See 10 U.S.C. § 903 (“(a) All persons subject to this chapter shall secure all public property taken from the enemy for the service of the United States, and shall give notice and turn over to the proper authority without delay all captured or abandoned property in their possession, custody, or control. (b) Any person subject to this chapter who—(1) fails to carry out the duties prescribed in subsection (a); (2) buys, sells, trades, or in any way deals in or disposes of captured or abandoned property, whereby he receives or expects any profit, benefit, or advantage to himself or another directly or indirectly connected with himself; or (3) engages in looting or pillaging; shall be punished as a court-martial may direct.”).

<sup>538</sup> See, e.g., HAGUE IV REG. art. 28 (“The pillage of a town or place, even when taken by assault, is prohibited.”); 1899 HAGUE II art. 28 (same); LIEBER CODE art. 44 (“[A]ll robbery, all pillage or sacking, even after taking a place by main force ... are prohibited under the penalty of death, or such other severe punishment as may seem adequate for the gravity of the offense.”).

<sup>539</sup> Refer to § 7.4.2 (Affirmative Measures to Protect Against Pillage and Ill-Treatment); § 7.7.2.1 (Measures to Prevent the Dead From Being Despoiled); § 17.14.3 (Search, Collection, and Protection of the Wounded, Sick, Shipwrecked, and Dead).

<sup>540</sup> Refer to § 9.7 (POW Effects and Articles of Personal Use).

<sup>541</sup> Refer to § 10.5.3.3 (Pillage Against Protected Persons).

<sup>542</sup> Refer to § 11.18.1 (Prohibition Against Pillage in Occupied Territory).

<sup>543</sup> Refer to § 17.6.4 (Prohibition on Pillage).

<sup>544</sup> Refer to § 5.18.6 (Prohibition Against and Prevention of Theft, Pillage, Misappropriation, or Acts of Vandalism, and Prohibition Against Requisition of Foreign Cultural Property).

<sup>545</sup> Refer to § 5.18.6.1 (Obligation to Stop or Prevent Theft, Pillage, or Misappropriation of, and Acts of Vandalism Against, Cultural Property); § 7.4.2 (Affirmative Measures to Protect Against Pillage and Ill-Treatment); § 17.14.3 (Search, Collection, and Protection of the Wounded, Sick, Shipwrecked, and Dead).

use.<sup>546</sup> It does not include an appropriation of property justified by military necessity.<sup>547</sup> For example, if ordinary requisitions are unavailable, the taking of food does not constitute pillage.<sup>548</sup> Pillage also has been referred to as “looting”<sup>549</sup> and “plunder.”<sup>550</sup>

5.17.4.2 *History of Pillage.* In the medieval era, pillage served as a form of compensation for private armies, but it ceased to be regarded as lawful with the widespread adoption of standing armies at the end of the Eighteenth Century. The prohibition on pillage has, in part, been intended to maintain discipline among the armed forces.<sup>551</sup> For example, a member of the armed forces who before or in the presence of the enemy quits his or her place of duty to plunder or pillage is guilty of the offense of misbehavior before the enemy.<sup>552</sup>

5.17.5 Feasible Precautions Should Be Taken to Mitigate the Burden on Civilians. In seizing or destroying enemy property, feasible precautions should be taken to mitigate the burdens imposed on civilians.

For example, in the practice of the United States, religious buildings, shrines, and consecrated places employed for worship are used only for aid stations, medical installations, or

---

<sup>546</sup> 10 U.S.C. § 950t(5) (“(5) PILLAGING.--Any person subject to this chapter who intentionally and in the absence of military necessity appropriates or seizes property for private or personal use, without the consent of a person with authority to permit such appropriation or seizure, shall be punished....”). *Consider* ROME STATUTE, ELEMENTS OF CRIMES, art. 8(2)(b)(xvi), Official Records of the Assembly of States Parties to the Rome Statute of the International Criminal Court, First session, New York, ICC-ASP/1/3, 112, 145-6 (Sept. 3-10, 2002) (defining the elements of the war crime of pillaging as including (1) appropriation of property, (2) intent “to deprive the owner of the property and to appropriate it for private or personal use,” and (3) “appropriation ... without the consent of the owner”).

<sup>547</sup> *Consider* ROME STATUTE, ELEMENTS OF CRIMES art. 8(2)(b)(xvi), Official Records of the Assembly of States Parties to the Rome Statute of the International Criminal Court, First session, New York, ICC-ASP/1/3, 112, 146 footnote 47 (Sept. 3-10, 2002) (“As indicated by the use of the term ‘private or personal use’, appropriations justified by military necessity cannot constitute the crime of pillaging.”).

<sup>548</sup> LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 405 (§143) (“If there is no time for ordinary requisitions to provide food, forage, clothing, and fuel, or if the inhabitants of a locality have fled so that ordinary requisitions cannot be made, a belligerent must take these articles wherever he can get them, and he is justified in so doing.”). *Refer to* § 11.18.7 (Requisitions of Private Enemy Property).

<sup>549</sup> 10 U.S.C. § 903 (“(b) Any person subject to this chapter who- ... (3) engages in looting or pillaging; shall be punished as a court-martial may direct.”); MANUAL FOR COURTS-MARTIAL IV-40 (¶27.c.(4)) (2012) (“‘Looting or pillaging’ means unlawfully seizing or appropriating property which is located in enemy or occupied territory.”).

<sup>550</sup> *See, e.g.*, MANUAL FOR COURTS-MARTIAL IV-35 (¶23.c.(6)(b)) (2012) (“‘Plunder or pillage’ means to seize or appropriate public or private property unlawfully.”); *Prosecutor v. Jelisić*, ICTY Trial Chamber, IT-95-10-T, *Judgment*, ¶¶48-49 (Dec. 14, 1999) (noting that “[p]lunder is defined as the fraudulent appropriation of public or private funds belonging to the enemy or the opposing party perpetrated during an armed conflict and related thereto” and confirming the guilt of the accused on the charge of plunder because he “stole money, watches, jewellery and other valuables from the detainees upon their arrival at Luka camp by threatening those who did not hand over their possessions with death”).

<sup>551</sup> 1958 UK MANUAL ¶589 (noting that the prohibitions contained in Hague IV Regulations “did not constitute new rules at the time they were promulgated” and that “it has for a long time past been embodied in the regulations of every civilized army, for nothing is more demoralizing to troops or more subversive of discipline than plundering.”).

<sup>552</sup> 10 U.S.C. § 899 (“Any member of the armed forces who before or in the presence of the enemy— ... (6) quits his place of duty to plunder or pillage; ... shall be punished by death or such other punishment as a court-martial may direct.”).

the housing of wounded personnel awaiting evacuation, provided in each case that a situation of emergency requires such use.<sup>553</sup>

Similarly, if armed forces use a private residence, they must treat its inhabitants and owners humanely and with as much consideration as the circumstances permit.<sup>554</sup> In particular, the armed forces should generally allow the inhabitants to continue to live in part of their own homes, and should not expel them in the absence of alternate shelter.<sup>555</sup> But if imperative military necessity requires the removal of the inhabitants, then efforts should be made to give them notice and to aid them in taking their essential possessions.<sup>556</sup> If the armed forces take anything, they should leave a note to this effect.<sup>557</sup>

However, there is no obligation to protect abandoned property in the area of active operations.<sup>558</sup>

5.17.5.1 *Compensation for Property Seizure or Damage.* Although reasonable efforts should be made to spare civilians from unnecessary harm when seizing or destroying enemy property, the law of war imposes no obligation to compensate for loss of, or damage to, private property imperatively demanded by the necessities of war, including damage incidental to combat operations.<sup>559</sup> However, if time allows, a record of the use or damage should be kept, or given to the owner, so that in the event of funds being provided by either belligerent at the

---

<sup>553</sup> Refer to § 11.18.6.4 (Municipal, Religious, Charitable, and Cultural Property).

<sup>554</sup> GREENSPAN, MODERN LAW OF LAND WARFARE 283 (“Where private dwellings are taken over by troops, the inhabitants must be treated humanely and afforded as much consideration as the circumstances permit.”). For example, DICK COUCH, THE SHERIFF OF RAMADI 69 (2008) (“On yet another SR [special reconnaissance] mission, we had intelligence that a restaurant was being used as a meeting place for insurgents, but there were a lot of other Iraqis coming and going there as well. We needed an OP [observation post] that was close to the restaurant but not too close -- a secure perch from which we could observe the target for several days and still be safe from informers. We found this three-story house that was several hundred yards from the restaurant entrance. It was perfect. We sent one of our interpreters to speak with the residents and to make arrangements to use one of their upper-floor rooms for a few days. We paid them well, but the key was that after being coached by the terp and our scouts, we were very polite and respectful of their customs.”) (second alteration in original).

<sup>555</sup> 1958 UK MANUAL ¶615 (“When troops are quartered in private dwellings some rooms should be left to the inhabitants; the latter should not be driven into the streets and left without shelter.”).

<sup>556</sup> 1958 UK MANUAL ¶615 (“If for military reasons, whether for operational purposes or to protect men and animals from the weather, it is imperative to remove the inhabitants, efforts should be made to give them notice and provide them with facilities for taking essential baggage with them.”).

<sup>557</sup> 1958 UK MANUAL ¶615 (“A note should be left if anything is taken.”); GREENSPAN, MODERN LAW OF LAND WARFARE 284 (“For anything validly taken, a note to this effect should be left.”).

<sup>558</sup> 1958 UK MANUAL ¶615 (“There is ... no obligation to protect abandoned property.”); GREENSPAN, MODERN LAW OF LAND WARFARE 284 (“[T]here is no obligation on the part of the invader to protect abandoned property in the area of active operations ...”).

<sup>559</sup> See, e.g., 1958 UK MANUAL ¶593 (“The owner of property may claim neither rent for its use nor compensation for damage caused by the necessities of war.”).

close of hostilities to compensate the owners, there may be evidence to assist the assessors.<sup>560</sup>

As a matter of practice, during counter-insurgency operations, U.S. forces have often made payments to, or taken other actions on behalf of, civilians suffering loss.<sup>561</sup>

## 5.18 PROTECTION OF CULTURAL PROPERTY DURING HOSTILITIES

Certain types of property receive additional protection as cultural property. Cultural property, the areas immediately surrounding it, and appliances in use for its protection should be safeguarded and respected.

Some obligations with respect to cultural property apply during non-international armed conflict.<sup>562</sup> There are also obligations with respect to cultural property during occupation<sup>563</sup> and peacetime.<sup>564</sup> Certain treaty obligations with respect to cultural property may only apply on the territory of Parties to the 1954 Hague Cultural Property Convention,<sup>565</sup> but the United States has previously identified some of these obligations as customary international law.<sup>566</sup> DoD personnel, therefore, in the absence of contrary guidance by competent authority, should act as if they were legally bound by the rules for the protection of cultural property in the 1954 Hague Cultural Property Convention during hostilities even when conducting operations in the territory of a State that is not a Party to the 1954 Hague Cultural Property Convention.<sup>567</sup>

**5.18.1 Definition of Cultural Property.** For the purpose of the 1954 Hague Cultural Property Convention and this manual, cultural property includes, irrespective of origin or ownership:<sup>568</sup>

---

<sup>560</sup> 1958 UK MANUAL ¶593 (“If time allows, however, a note of the use or damage should be kept, or given to the owner, so that in the event of funds being provided by either belligerent at the close of hostilities to compensate the inhabitants, there may be evidence to assist the assessors.”).

<sup>561</sup> For example, DEPARTMENT OF THE ARMY FIELD MANUAL 3-24.2, *Tactics in Counterinsurgency*, ¶7-89 (Apr. 2009) (“Recent experiences have shown the effectiveness of using money to win popular support and further the interests and goals of units conducting counterinsurgency operations. ... A counterinsurgency force can use money to ... • Repair damage resulting from combined and coalition operations. • Provide condolence payments to civilians for casualties from combined and coalition operations.”).

<sup>562</sup> Refer to § 17.11 (Protection of Cultural Property in NIAC).

<sup>563</sup> Refer to § 11.19 (Protection of Cultural Property During Occupation).

<sup>564</sup> Refer to § 5.18.2.1 (Peacetime Obligations to Prepare for the Safeguarding of Cultural Property).

<sup>565</sup> See, e.g., 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(1) (“The High Contracting Parties undertake to respect cultural property situated within their own territory as well as within the territory of other High Contracting Parties.”).

<sup>566</sup> Refer to § 5.18.8 (Special Protection for Certain Cultural Property).

<sup>567</sup> Refer to § 3.1.1 (DoD Practice of Applying Law of War Rules Even When Not Technically Applicable).

<sup>568</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 1 (“For the purposes of the present Convention, the term ‘cultural property’ shall cover, irrespective of origin or ownership: (a) movable or immovable property of great importance to the cultural heritage of every people, such as monuments of architecture, art or history, whether religious or secular; archaeological sites; groups of buildings which, as a whole, are of historical or artistic interest; works of art; manuscripts, books and other objects of artistic, historical or archaeological interest; as well as

- movable or immovable property of great importance to the cultural heritage of every people;<sup>569</sup>
- buildings intended to shelter cultural property;<sup>570</sup> and
- centers containing monuments.<sup>571</sup>

5.18.1.1 *Definition of Cultural Property – Notes on Terminology.* “Cultural property” is a term of art that is defined in the 1954 Hague Cultural Property Convention. The definition in the 1954 Hague Cultural Property Convention may be more limited than cultural property described and protected by other instruments.

For example, the Lieber Code contemplates protection for property belonging to “establishments of an exclusively charitable character, to establishments of education, or foundations for the promotion of knowledge, whether public schools, universities, academies of learning or observatories, museums of the fine arts, or of a scientific character,” as well as “[c]lassical works of art, libraries, scientific collections, or precious instruments, such as astronomical telescopes.”<sup>572</sup> The Hague IV Regulations seek to protect “buildings dedicated to religion, art, science, or charitable purposes, historic monuments.”<sup>573</sup> Hague IX seeks to protect “sacred edifices, buildings used for artistic, scientific, or charitable purposes, [and] historic monuments.”<sup>574</sup> The Roerich Pact seeks to protect “historic monuments, museums, scientific, artistic, educational and cultural institutions.”<sup>575</sup> AP I seeks to protect “historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples.”<sup>576</sup>

Because the definition of cultural property in the 1954 Hague Cultural Property Convention is different from the categories of property protected by other instruments, the scope of objects being protected by each instrument is not the same (although there may be overlap). Nevertheless, the protections afforded cultural property by the 1954 Hague Cultural Property Convention are supplementary to those afforded by earlier treaties, although the distinctive

---

scientific collections and important collections of books or archives or of reproductions of the property defined above; (b) buildings whose main and effective purpose is to preserve or exhibit the movable cultural property defined in sub-paragraph (a) such as museums, large libraries and depositories of archives, and refuges intended to shelter, in the event of armed conflict, the movable cultural property defined in subparagraph (a); (c) centres containing a large amount of cultural property as defined in sub-paragraphs (a) and (b), to be known as ‘centres containing monuments’.”).

<sup>569</sup> Refer to § 5.18.1.2 (Movable or Immovable Property of Great Importance to the Cultural Heritage of Every People).

<sup>570</sup> Refer to § 5.18.1.3 (Buildings Intended to Preserve Cultural Property).

<sup>571</sup> Refer to § 5.18.1.4 (Centers Containing Monuments).

<sup>572</sup> LIEBER CODE arts. 34-36.

<sup>573</sup> HAGUE IV REG. art. 27.

<sup>574</sup> HAGUE IX art. 5.

<sup>575</sup> ROERICH PACT art. 1.

<sup>576</sup> AP I art. 53.

emblem for cultural property established in the 1954 Hague Cultural Property Convention is to be used where appropriate instead of emblems established in earlier treaties.<sup>577</sup>

5.18.1.2 *Movable or Immovable Property of Great Importance to the Cultural Heritage of Every People*. Property must be “of great importance to the cultural heritage of every people” to qualify as cultural property. Ordinary property (such as churches or works of art) that are not of great importance to the cultural heritage of every people would not qualify as cultural property, although such property may benefit from other protections, such as those afforded civilian objects or enemy property.<sup>578</sup>

The question of whether cultural property is “of great importance to the cultural heritage of every people” may involve delicate and somewhat subjective judgments.<sup>579</sup> Items that can easily be replaced would not qualify as being of great importance.<sup>580</sup> On the other hand, irreplaceable items may be of great cultural importance, even if they have little monetary value.<sup>581</sup>

Cultural property may include, but is not limited to, the following types of property (provided the property is of great importance to the cultural heritage of every people):

- monuments of architecture, art, or history, whether religious or secular;<sup>582</sup>
- archaeological sites;
- groups of buildings that, as a whole, are of historical or artistic interest;<sup>583</sup>

---

<sup>577</sup> Refer to § 19.17.1 (Relationship Between the 1954 Hague Cultural Property Convention and Earlier Treaties).

<sup>578</sup> Refer to § 5.5.2 (Persons, Objects, and Locations That Are Protected From Being Made the Object of Attack); § 5.17 (Seizure and Destruction of Enemy Property).

<sup>579</sup> See ROGERS, LAW ON THE BATTLEFIELD 90 (“It must be property of great importance to the cultural heritage of every people. This may involve delicate decisions about whether, for example, an original manuscript by a minor composer, say Spohr, was of great importance to the cultural heritage of every people, perhaps not. The situation would be different if it were an original manuscript by one of the great composers, say Schubert.”).

<sup>580</sup> See JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 50 (1996) (“Certain objects, although of limited value, may be important for the national culture while others, even though of great value, can be replaced and are therefore less important.”).

<sup>581</sup> For example, JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 49-50 (1996) (“[A] papyrus reporting a marriage that took place three thousand years ago, although it was of no intrinsic cultural value, was of very great cultural importance because of the fact that it enabled an institution, on which no such ancient information existed, to be studied.”) (internal quotation marks omitted).

<sup>582</sup> See also JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 50-51 (1996) (“[W]orks of architecture, sculpture, specially designed to perpetuate the memory of a person, action, period, event or thing, or as buildings, structures, edifices remarkable for their archaeological, historical or aesthetic interest or intended to commemorate a notable person, action or event.”).

<sup>583</sup> See also JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 51 (1996) (During the drafting of the 1954 Hague Cultural Property Convention “the Scandinavian countries proposed the protection of certain sites which, although not containing particularly remarkable monuments, were of undoubted value from a cultural point of view and for that reason had a right to be protected. It was explained that the Scandinavian countries had very little cultural

- works of art;
- manuscripts, books, and other objects of artistic, historical, or archaeological interest;
- scientific collections;<sup>584</sup> and
- important collections of books or archives or of reproductions of the property defined above.<sup>585</sup>

Natural sites of great beauty are not included within the definition of cultural property.<sup>586</sup>

5.18.1.3 *Buildings Intended to Preserve Cultural Property.* Cultural property is also understood to include buildings whose main and effective purpose is to preserve or exhibit movable cultural property, such as museums, large libraries, and depositories of archives, and refuges intended to shelter cultural property in the event of armed conflict.<sup>587</sup>

For these types of buildings, protection is gained from the structure's purpose and contents as opposed to the physical structure itself constituting immovable property of great importance to the cultural heritage of every people. The building must be intended to contain and, in fact, contain, conserve, or exhibit movable cultural property as its primary purpose.<sup>588</sup> Alternatively, the structure may be intended to store movable cultural property for protection in the event of armed conflict. Some of these refuges may be subject to special protection.<sup>589</sup>

property and that their gift to culture consisted mainly in distant mediaeval villages or lonely farms.”) (internal quotation marks omitted).

<sup>584</sup> See also JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 52 (1996) (Scientific “collections are made up of scientific books but also cover other objects such as Boissier’s herbarium in Geneva or the collections of important laboratories ... [and] national monuments that were objects of valuable scientific research, such as rare animals or plants that were becoming extinct.”).

<sup>585</sup> See also JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 52 (1996) (“[P]rotection is accorded to important collections of books without their necessarily having to be of artistic, historical or archaeological interest. Any important library is thus protected, probably in the spirit of protecting human knowledge.”).

<sup>586</sup> See JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 53 (1996) (“The [1954 Hague Cultural Property] Conference also discussed the protection of ‘natural sites of great beauty’ (United States of America and Japan), but appears to have given up the idea for reasons mentioned by the delegation of France, who considered that ‘it was probably difficult to define the protection of natural sites as their value was of a subjective nature. At best, only a diluted form of protection could result. Finally, it had been observed that natural sites could often be restored very quickly.”).

<sup>587</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 1(b) (defining the term cultural property to include, *inter alia*, “buildings whose main and effective purpose is to preserve or exhibit the movable cultural property defined in sub-paragraph (a) such as museums, large libraries and depositories of archives, and refuges intended to shelter, in the event of armed conflict, the movable cultural property defined in subparagraph (a)”).

<sup>588</sup> See JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 53-54 (1996) (“According to subparagraph (b), such buildings are protected not because of their own historical value but because of their purpose and their content. The purpose must be the primary one, the very aim and *raison d’etre* of such a building; it must also be effectively true -- the building must in fact contain, conserve or exhibit movable cultural property.”).

<sup>589</sup> Refer to § 5.18.8 (Special Protection for Certain Cultural Property).

5.18.1.4 *Centers Containing Monuments*. Cultural property also includes centers containing monuments, *i.e.*, centers containing a large amount of cultural property or buildings intended to preserve cultural property.<sup>590</sup> This includes monument complexes or major groups of buildings containing movable and immovable cultural property.

5.18.2 *Respect and Safeguarding of Cultural Property*. The protection of cultural property comprises the safeguarding of and respect for such property.<sup>591</sup> Safeguarding consists of the affirmative acts that are to be taken to ensure the protection of cultural property.<sup>592</sup> On the other hand, respect essentially requires parties to refrain from certain acts, such as placing cultural property in peril or causing damage to it.<sup>593</sup>

Safeguarding and respect are mutually reinforcing obligations that help ensure the protection of cultural property.

5.18.2.1 *Peacetime Obligations to Prepare for the Safeguarding of Cultural Property*. Parties to 1954 Hague Cultural Property Convention are obliged to undertake to prepare in time of peace for the safeguarding of cultural property situated within their own territory against the foreseeable effects of an armed conflict, by taking such measures as they consider appropriate.<sup>594</sup> This obligation reflects the opinion that measures for the protection of cultural property during armed conflict, in order to be effective, must begin in peacetime.<sup>595</sup>

The failure of a State to fulfill its obligations in peacetime to safeguard cultural property during armed conflict does not relieve other States of their obligation to respect cultural

---

<sup>590</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 1(c) (defining the term cultural property to include, *inter alia*, “centres containing a large amount of cultural property as defined in sub-paragraphs (a) and (b) to be known as ‘centres containing monuments’”). See also JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 54 (1996) (“The term ‘centres containing monuments’ was preferred to the terms ‘groups’ or ‘groups of buildings’ when the reference was to larger areas containing a considerable amount of cultural property coming under subparagraphs (a) and (b). The term comprises a group of historical or artistic monuments situated in the same vicinity, such as the districts of certain cities or even entire cities.”).

<sup>591</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 2 (“For the purposes of the present Convention, the protection of cultural property shall comprise the safeguarding of and respect for such property.”).

<sup>592</sup> JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 57 (1996) (“‘Safeguarding’ consists of all the positive measures (defining the action to be taken) which are designed to ensure the best possible material conditions for the protection of cultural property.”).

<sup>593</sup> JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 57 (1996) (“Respect ... has an essentially negative character: it represents an obligation not to commit a number of prohibited acts. Respect therefore implies a requirement to refrain from certain acts, such as placing cultural property in peril or causing damage to it.”).

<sup>594</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 3 (“The High Contracting Parties undertake to prepare in time of peace for the safeguarding of cultural property situated within their own territory against the foreseeable effects of an armed conflict, by taking such measures as they consider appropriate.”).

<sup>595</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION preamble (“Guided by the principles concerning the protection of cultural property during armed conflict, as established in the Conventions of The Hague of 1899 and of 1907 and in the Washington Pact of 15 April, 1935; Being of the opinion that such protection cannot be effective unless both national and international measures have been taken to organize it in time of peace;”).

property.<sup>596</sup>

5.18.3 Refraining From Any Use for Purposes That Are Likely to Expose It to Destruction or Damage. In general, no use should be made of cultural property, its immediate surroundings, or appliances in use for its protection, for purposes that are likely to expose it to destruction or damage in the event of armed conflict.<sup>597</sup> However, such use is permissible when military necessity imperatively requires such use.<sup>598</sup>

Uses that would be likely to expose cultural property to destruction or damage in the event of armed conflict would include: (1) using the cultural property for military purposes;<sup>599</sup> (2) placing military objectives near cultural property; or (3) using the cultural property in such a way that an adversary would likely regard it as a military objective.<sup>600</sup> For example, such uses would include billeting military personnel in buildings that constitute cultural property, or emplacing artillery, mortars, or anti-air systems on the grounds of cultural property.

In addition, it is prohibited to use deliberately the threat of potential harm to cultural property to shield military objectives from attack, or otherwise to shield, favor, or impede military operations.<sup>601</sup> There is no waiver of this obligation in cases of imperative military necessity.

5.18.3.1 *Imperative Military Necessity Waiver*. Cultural property, its immediate surroundings, and appliances in use for its protection may be used for purposes that are likely to expose it to destruction or damage if military necessity imperatively requires such use. The requirement that military necessity imperatively require such acts should not be confused with convenience or be used to cloak slackness or indifference to the preservation of cultural property.<sup>602</sup> This waiver of obligations with respect to cultural property is analogous to the

---

<sup>596</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(5) (“No High Contracting Party may evade the obligations incumbent upon it under the present Article, in respect of another High Contracting Party, by reason of the fact that the latter has not applied the measures of safeguard referred to in Article 3.”).

<sup>597</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(1) (“The High Contracting Parties undertake to respect cultural property situated within their own territory as well as within the territory of other High Contracting Parties by refraining from any use of the property and its immediate surroundings or of the appliances in use for its protection for purposes which are likely to expose it to destruction or damage in the event of armed conflict . . .”).

<sup>598</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(2) (“The obligations mentioned in paragraph 1 of the present Article may be waived only in cases where military necessity imperatively requires such a waiver.”).

<sup>599</sup> Compare § 5.18.8.2 (Conditions for the Granting of Special Protection – No Use for Military Purposes).

<sup>600</sup> Refer to § 5.6 (Military Objectives).

<sup>601</sup> Refer to § 5.16 (Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations).

<sup>602</sup> See General Dwight D. Eisenhower, Commander-in-Chief, U.S. Army, *Memorandum Regarding the Protection of Historical Monuments in Italy*, Dec. 29, 1943, X WHITEMAN’S DIGEST 438 (§13) (“If we have to choose between destroying a famous building and sacrificing our own men, then our men’s lives count infinitely more and the building must go. But the choice is not always so clear-cut as that. In many cases the monuments can be spared without any detriment to operational needs. Nothing can stand against the argument of military necessity. That is an accepted principle. But the phrase ‘military necessity’ is sometimes used where it would be more truthful to speak of military convenience or even personal convenience. I do not want it to cloak slackness or indifference.”).

requirement that enemy property may only be seized or destroyed if imperatively required by the necessities of war.<sup>603</sup>

5.18.4 Other Feasible Precautions to Reduce the Risk of Harm to Cultural Property. Other feasible precautions should be taken to reduce the risk of harm to cultural property.<sup>604</sup> Such precautions may include:

- determining the location of cultural property and disseminating that information among the armed forces;<sup>605</sup>
- compiling and promulgating lists of cultural property and areas that are not to be attacked;<sup>606</sup>
- establishing civil authorities to assume responsibility for planning and acting to ensure respect for cultural property under its control;<sup>607</sup>
- physically shielding cultural property from harm; and
- establishing refuges and evacuating movable cultural property to them.<sup>608</sup>

5.18.5 Refraining From Any Act of Hostility. In general, acts of hostility may not be directed against cultural property, its immediate surroundings, or appliances in use for its

---

<sup>603</sup> Refer to § 5.17.2 (Enemy Property – Military Necessity Standard). For general discussion of military necessity refer to § 2.2 (Military Necessity).

<sup>604</sup> Refer to § 5.2.3 (Affirmative Duties to Take Feasible Precautions for the Protection of Civilians and Other Protected Persons and Objects).

<sup>605</sup> For example, General Dwight D. Eisenhower, Commander-in-Chief, U.S. Army, *Memorandum Regarding the Protection of Historical Monuments in Italy*, Dec. 29, 1943, X WHITEMAN'S DIGEST 438 (§13) ("It is a responsibility of higher commanders to determine through A.M.G. Officers the locations of historical monuments whether they be immediately ahead of our front lines or in areas occupied by us. This information passed to lower echelons through normal channels places the responsibility on all Commanders of complying with the spirit of this letter.").

<sup>606</sup> For example, Strobe Talbot, *Letter of Submittal*, May 12, 1998, MESSAGE FROM THE PRESIDENT TRANSMITTING THE 1954 HAGUE CULTURAL PROPERTY CONVENTION VIII (1999) ("During Operation Desert Storm, for example, intelligence resources were utilized to look for cultural property in order to properly identify it. Target intelligence officers identified cultural property or cultural property sites in Iraq; a 'no-strike' target list was prepared, placing known cultural property off limits from attack, as well as some otherwise legitimate targets if their attack might place nearby cultural property at risk of damage."); 7th Air Force Operations Order 71-17 (Rules of Engagement), reprinted in 121 CONGRESSIONAL RECORD 17555 (Jun. 6, 1975) (specifying during the Vietnam War "Angkor Wat Park: This area will not be attacked for any reason. Under no circumstances will [forward air controllers] control or assist air strikes of any nation within the Angkor Wat area. Should a [forward air controller] observe such a strike being made, he will advise the [Forces Armée Nationale Khmer] ground commander and depart the area immediately. Other Areas of Cultural Value: Except during [combat search and rescue] operations, no U.S. air strikes will be made within 1,000 meters of any of the areas of cultural value [nearly 100 other sites specifically listed in the directive]. U.S. [forward air controllers] will not control or assist air strikes of any nation within 1,000 meters of these areas regardless of [Forces Armée Nationale Khmer] request of validation.").

<sup>607</sup> These include museum curators and staff, local fire and law enforcement authorities, and civil defense personnel.

<sup>608</sup> Refer to § 5.18.1.3 (Buildings Intended to Preserve Cultural Property).

protection.<sup>609</sup> Acts of hostility may, however, be directed against cultural property, its immediate surroundings, or appliances in use for its protection, when military necessity imperatively requires such acts.<sup>610</sup>

5.18.5.1 *Imperative Military Necessity Waiver.* Acts of hostility may be directed against cultural property, its immediate surroundings, or appliances in use for its protection when military necessity imperatively requires such acts. The requirement that military necessity imperatively require such acts should not be confused with convenience or be used to cloak slackness or indifference to the preservation of cultural property.<sup>611</sup> This waiver of obligations with respect to cultural property is analogous to the requirement that enemy property may only be seized if imperatively required by the necessities of war.<sup>612</sup>

For example, if cultural property is being used by an opposing force for military purposes, then military necessity generally would imperatively require its seizure or destruction.<sup>613</sup>

Similarly, if an opposing force uses cultural property and its immediate surroundings to protect military objectives, then the attack of those military objectives may be imperatively required by military necessity.<sup>614</sup> Or, if a military objective was located near cultural property, the protection afforded the area surrounding the cultural property could be subject to waiver for reasons of imperative military necessity such that the attack of the military objective would be permissible, despite its proximity to cultural property.<sup>615</sup>

---

<sup>609</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(1) (“The High Contracting Parties undertake to respect cultural property situated within their own territory as well as within the territory of other High Contracting Parties ... by refraining from any act of hostility directed against such property.”).

<sup>610</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(2) (“The obligations mentioned in paragraph 1 of the present Article may be waived only in cases where military necessity imperatively requires such a waiver.”).

<sup>611</sup> Refer to footnote 602 in § 5.18.3.1 (Imperative Military Necessity Waiver).

<sup>612</sup> Refer to § 5.17.2 (Enemy Property – Military Necessity Standard). For general discussion of military necessity, refer to § 2.2 (Military Necessity).

<sup>613</sup> Cf. ROERICH PACT art. 5 (“The monuments and institutions mentioned in article I shall cease to enjoy the privileges recognized in the present treaty in case they are made use of for military purposes.”); HAGUE IV REG. art. 27 (“In sieges and bombardments all necessary steps must be taken to spare, as far as possible, buildings dedicated to religion, art, science, or charitable purposes, historic monuments, hospitals, and places where the sick and wounded are collected, provided they are not being used at the time for military purposes.”) (emphasis added); HAGUE IX art. 5 (“In bombardments by naval forces all the necessary measures must be taken by the commander to spare as far as possible sacred edifices, buildings used for artistic, scientific, or charitable purposes, historic monuments, hospitals, and places where the sick or wounded are collected, on the understanding that they are not used at the same time for military purposes.”) (emphasis added). Compare § 5.18.8.2 (Conditions for the Granting of Special Protection – No Use for Military Purposes).

<sup>614</sup> FINAL REPORT ON THE PERSIAN GULF WAR 610 (“While Article 4(1) of the 1954 Hague Convention provides specific protection for cultural property, Article 4(2) permits waiver of that protection where military necessity makes such a waiver imperative; such ‘imperative military necessity’ can occur when an enemy uses cultural property and its immediate surroundings to protect legitimate military targets, in violation of Article 4(1).”).

<sup>615</sup> Strobe Talbot, *Letter of Submittal*, May 12, 1998, MESSAGE FROM THE PRESIDENT TRANSMITTING THE 1954 HAGUE CULTURAL PROPERTY CONVENTION VIII (1999) (During Operation DESERT STORM, when “attacking legitimate targets in the vicinity of cultural objects, to the extent possible, weapons were selected that would

Even where the waiver of the protection afforded cultural property, its immediate surroundings, or appliances in use for its protection may be warranted for reasons of imperative military necessity, the risk of harm to the cultural property must be considered in a proportionality analysis<sup>616</sup> and feasible precautions should be taken to reduce the risk of harm to the cultural property.<sup>617</sup> And, even where waiver of the protection of cultural property may be warranted as a matter of law, as a matter of policy, decision-makers may still seek to refrain from harming cultural property.<sup>618</sup>

5.18.6 Prohibition Against and Prevention of Theft, Pillage, Misappropriation, or Acts of Vandalism, and Prohibition Against Requisition of Foreign Cultural Property. Any form of theft, pillage, or misappropriation of, and any acts of vandalism directed against, cultural property are prohibited.<sup>619</sup> In addition, Parties to the 1954 Hague Cultural Property Convention shall refrain from requisitioning movable cultural property situated in the territory of another Party to the 1954 Hague Cultural Property Convention.

There are no “imperative military necessity” waivers from these obligations.

Pillage is prohibited, even if the property does not constitute cultural property.<sup>620</sup>

5.18.6.1 *Obligation to Stop or Prevent Theft, Pillage, or Misappropriation of, and Acts of Vandalism Against, Cultural Property.* Military commanders have an obligation to take reasonable measures to prevent or stop any form of theft, pillage, or misappropriation of, and any acts of vandalism directed against, cultural property. This obligation may also be viewed as part of the obligation to take feasible precautions to reduce the risk of harm to cultural property.<sup>621</sup>

What efforts would be reasonable would depend on a variety of factors, such as availability of forces, the commander’s mission, and enemy threats. What efforts would be

---

accomplish destruction of the target while minimizing the risk of collateral damage to nearby cultural or civilian property. However, the proximity of military objectives to cultural property did not render those military objectives immune from attack, nor would it under the [1954 Hague Cultural Property] Convention.”).

<sup>616</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>617</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>618</sup> For example, H. STIMSON, ON SERVICE IN PEACE AND WAR 625 (1948) (“With President Truman’s warm support I struck off the list of suggest targets the city of Kyoto. Although it was a target of considerable military importance, it had been the ancient capital of Japan and was a shrine of Japanese art and culture. We determined that it should be spared. I approved four other targets including the cities of Hiroshima and Nagasaki.”).

<sup>619</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(3) (“The High Contracting Parties further undertake to prohibit, prevent and, if necessary, put a stop to any form of theft, pillage or misappropriation of, and any acts of vandalism directed against, cultural property.”). See also LIEBER CODE art. 36 (“In no case shall [classical works of art, libraries, scientific collections, or precious instruments] be sold or given away, if captured by the armies of the United States, nor shall they ever be privately appropriated, or wantonly destroyed or injured.”).

<sup>620</sup> Refer to § 5.17.4 (Pillage Prohibited).

<sup>621</sup> Refer to § 5.18.4 (Other Feasible Precautions to Reduce the Risk of Harm to Cultural Property).

reasonable would also depend on the information available to the commander at the time.<sup>622</sup>

Some measures to ensure adherence to this obligation may include training members of the armed forces and persons authorized to accompany the armed forces on the protection of cultural property in general (and the prohibition of theft, pillage, or vandalism in particular) as part of general procedures for the dissemination and implementation of the law of war.<sup>623</sup> Other measures may include: (1) issuing and enforcing orders to the same effect;<sup>624</sup> (2) investigating alleged or suspected offenses and taking disciplinary or punitive action, as appropriate under U.S. law;<sup>625</sup> and (3) taking measures to facilitate the recovery and return of stolen or misappropriated cultural property.

Although it may not always be feasible to prevent or stop theft, pillage, or misappropriation of, or acts of vandalism against, cultural property, efforts to identify cultural property within an area of operations and to secure it from theft or pillage are a prudent part of the planning process of military operations. For example, such efforts may deny opposing forces the opportunity to exploit harm to cultural property for propaganda purposes.

*5.18.6.2 Prohibition Against Requisition of Movable Cultural Property Situated in the Territory of Another Party to the 1954 Hague Cultural Property Convention.* Parties to the 1954 Hague Cultural Property Convention shall refrain from requisitioning movable cultural property situated in the territory of another Party to the 1954 Hague Cultural Property Convention.<sup>626</sup>

This rule makes no distinction between movable property of nationals of the country in which it is located and property of nationals of another High Contracting Party. As such, it would also protect from requisition any movable property from a third State temporarily on loan for an exhibition within the territory of a State participating in an armed conflict.<sup>627</sup>

#### 5.18.7 Marking of Cultural Property With the Distinctive Emblem. Cultural property

---

<sup>622</sup> Refer to § 5.3 (Assessing Information Under the Law of War).

<sup>623</sup> Refer to § 18.6 (Dissemination, Study, and Other Measures to Facilitate Understanding of Duties Under the Law of War).

<sup>624</sup> For example, General John P. Abizaid, U.S. Central Command, General Order 1B (GO-1B), Prohibited Activities for U.S. Department of Defense Personnel Present Within the United States Central Command (USCENTCOM) Area of Responsibility (AOR), ¶2h (Mar. 13, 2006) (prohibiting “[r]emoving, possessing, selling, defacing or destroying archaeological artifacts or national treasures.”).

<sup>625</sup> Refer to § 18.19 (Discipline in National Jurisdictions of Individuals for Violations of the Law of War).

<sup>626</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(3) (“They [the High Contracting Parties] shall, refrain from requisitioning movable cultural property situated in the territory of another High Contracting Party.”).

<sup>627</sup> JIRI TOMAN, CULTURAL PROPERTY IN WARTIME 71 (1996) (“[T]he prohibition of requisitioning should also apply to property existing on the territory of a High Contracting Party but belonging to the nationals of another High Contracting Party, as in the case of the collections of the historical or scientific institutes in Athens, Cairo, Paris, and Rome. The same guarantee would also apply in respect of movable cultural property made available on loan for an exhibition ...”).

may bear a distinctive emblem so as to facilitate its recognition.<sup>628</sup> This distinctive emblem is described in Article 16 of the 1954 Hague Cultural Property Convention.<sup>629</sup> There is a degree of discretion as to the placing of the distinctive emblem and its degree of visibility.<sup>630</sup> The emblem may be displayed on flags or armlets, and it may be painted on an object or represented in any other appropriate form.<sup>631</sup>

5.18.7.1 *Distinctive Emblem Facilitates Identification Rather Than Confers Status as Such.* As is the case with distinctive emblems for medical personnel, units, transport, and facilities, the distinctive emblem for cultural property facilitates identification, rather than confers cultural property status as such.<sup>632</sup> For example, cultural property may be protected, even though it is not marked with the distinctive emblem. On the other hand, a distinctive emblem placed on property does not make that property cultural property (and grant corresponding protections) if that property does not meet the criteria for cultural property (or the corresponding criteria for protection).<sup>633</sup>

5.18.7.2 *Display of the Distinctive Emblem for Cultural Property – Once Versus Three Times.* In some cases, the distinctive emblem for cultural property is to be used once, while in other cases, the distinctive emblem for cultural property is to be displayed three times in a triangular formation (one shield below the other two shields).<sup>634</sup>

The distinctive emblem for cultural property used once may only be used as a means of identification of:

- cultural property not under special protection;
- the persons responsible for the duties of control in accordance with the Regulations for the Execution of the 1954 Hague Cultural Property Convention;<sup>635</sup>

---

<sup>628</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 6 (“In accordance with the provisions of Article 16, cultural property may bear a distinctive emblem so as to facilitate its recognition.”).

<sup>629</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 16(1) (“The distinctive emblem of the Convention shall take the form of a shield, pointed below, per saltire blue and white (a shield consisting of a royal-blue square, one of the angles of which forms the point of the shield, and of a royal-blue triangle above the square, the space on either side being taken up by a white triangle).”).

<sup>630</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 20(1) (“The placing of the distinctive emblem and its degree of visibility shall be left to the discretion of the competent authorities of each High Contracting Party.”).

<sup>631</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 20(1) (“It may be displayed on flags or armlets; it may be painted on an object or represented in any other appropriate form.”).

<sup>632</sup> Compare § 7.15 (Display of the Distinctive Emblem to Facilitate Identification).

<sup>633</sup> Refer to § 5.18.1 (Definition of Cultural Property).

<sup>634</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 16(2) (“The emblem shall be used alone, or repeated three times in a triangular formation (one shield below), under the conditions provided for in Article 17.”).

<sup>635</sup> Refer to § 4.14 (Personnel Engaged in Duties Related to the Protection of Cultural Property).

- the personnel engaged in the protection of cultural property;<sup>636</sup> and
- the identity cards mentioned in the Regulations for the Execution of the 1954 Hague Cultural Property Convention.<sup>637</sup>

The distinctive emblem, repeated three times, may be used only as a means of identification of:<sup>638</sup>

- immovable cultural property under special protection;<sup>639</sup>
- the transport of cultural property under the special protection or in urgent cases;<sup>640</sup> and
- improvised refuges, under the conditions provided for in the Regulations for the Execution of the 1954 Hague Cultural Property Convention.<sup>641</sup>

5.18.7.3 *Display of the Distinctive Emblem on Immovable Cultural Property.* The distinctive emblem for cultural property may not be placed on any immovable cultural property unless at the same time there is displayed an authorization duly dated and signed by the competent authority of the relevant State.<sup>642</sup>

5.18.7.4 *Other Uses of the Distinctive Emblem for Cultural Property Prohibited During Armed Conflict.* During armed conflict, the use of the distinctive emblem for cultural property in any other cases than those mentioned in the 1954 Hague Cultural Property Convention, and the use for any purpose whatsoever of a sign resembling the distinctive emblem, is forbidden.<sup>643</sup>

---

<sup>636</sup> Refer to § 4.14 (Personnel Engaged in Duties Related to the Protection of Cultural Property).

<sup>637</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 17(2) (“The distinctive emblem may be used alone only as a means of identification of: (a) cultural property not under special protection; (b) the persons responsible for the duties of control in accordance with the Regulations for the execution of the Convention; (c) the personnel engaged in the protection of cultural property; (d) the identity cards mentioned in the Regulations for the execution of the Convention.”).

<sup>638</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 17(1) (“The distinctive emblem repeated three times may be used only as a means of identification of: (a) immovable cultural property under special protection; (b) the transport of cultural property under the conditions provided for in Articles 12 and 13; (c) improvised refuges, under the conditions provided for in the Regulations for the execution of the Convention.”).

<sup>639</sup> Refer to § 5.18.8 (Special Protection for Certain Cultural Property).

<sup>640</sup> Refer to § 5.18.9 (Transport of Cultural Property).

<sup>641</sup> Refer to § 5.18.8 (Special Protection for Certain Cultural Property).

<sup>642</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 17(4) (“The distinctive emblem may not be placed on any immovable cultural property unless at the same time there is displayed an authorization duly dated and signed by the competent authority of the High Contracting Party.”).

<sup>643</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 17(3) (“During an armed conflict, the use of the distinctive emblem in any other cases than those mentioned in the Cultural Property Convention, and the use for any purpose whatever of a sign resembling the distinctive emblem, shall be forbidden.”). Consider AP I art. 38(1)(a) (“It is also prohibited to misuse deliberately in an armed conflict other internationally recognized protective emblems, signs or signals, including the flag of truce, and the protective emblem of cultural property.”).

5.18.8 Special Protection for Certain Cultural Property. A highly limited category of cultural property receives special protection by its entry in an International Register.<sup>644</sup>

The standards governing the protection of such cultural property are essentially the same as the standards governing the protection of cultural property under customary law<sup>645</sup> and the protection afforded all cultural property under the 1954 Hague Cultural Property Convention.<sup>646</sup> However, the special procedures applicable to cultural property under special protection facilitate its protection beyond that afforded cultural property that is not under special protection.

Special protection can apply to:<sup>647</sup>

- a limited number of refuges intended to shelter movable cultural property in the event of armed conflict;
- a limited number of centers containing monuments and other immovable property of very great importance; and
- improvised refuges under the procedures specified in the Regulations for the Execution of the 1954 Hague Cultural Property Convention.<sup>648</sup>

---

<sup>644</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(6) (“Special protection is granted to cultural property by its entry in the ‘International Register of Cultural Property under Special Protection’. This entry shall only be made, in accordance with the provisions of the present Convention and under the conditions provided for in the Regulations for the execution of the Convention.”).

<sup>645</sup> See United States, *Statement on Ratification of the 1954 Hague Cultural Property Convention*, Mar. 13, 2009, 2575 UNTS 7, 8 (“It is the understanding of the United States of America that ‘special protection’, as defined in Chapter II of the Convention, codifies customary international law in that it, first, prohibits the use of any cultural property to shield any legitimate military targets from attack and, second, allows all property to be attacked using any lawful and proportionate means, if required by military necessity and notwithstanding possible collateral damage to such property.”).

<sup>646</sup> Compare 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 9 (“The High Contracting Parties undertake to ensure the immunity of cultural property under special protection by refraining, from the time of entry in the International Register, from any act of hostility directed against such property and, except for the cases provided for in paragraph 5 of Article 8, from any use of such property or its surroundings for military purposes.”) with 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 4(1) (“The High Contracting Parties undertake to respect cultural property situated within their own territory as well as within the territory of other High Contracting Parties by refraining from any use of the property and its immediate surroundings or of the appliances in use for its protection for purposes which are likely to expose it to destruction or damage in the event of armed conflict; and by refraining from any act of hostility directed against such property.”).

<sup>647</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(1) (“There may be placed under special protection a limited number of refuges intended to shelter movable cultural property in the event of armed conflict, of centres containing monuments and other immovable cultural property of very great importance, provided that they: (a) are situated at an adequate distance from any large industrial centre or from any important military objective constituting a vulnerable point, such as, for example, an aerodrome, broadcasting station, establishment engaged upon work of national defence, a port or railway station of relative importance or a main line of communication; (b) are not used for military purposes.”).

<sup>648</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 11 (“1. If, during an armed conflict, any High Contracting Party is induced by unforeseen circumstances to set up an improvised refuge and desires that it should be placed under special protection, it shall communicate this fact

Property granted special protection must be marked with the distinctive emblem for special protection, and opened to international control as provided for in the Regulations for the Execution of the 1954 Hague Cultural Property Convention.<sup>649</sup>

5.18.8.1 *Conditions for the Granting of Special Protection – Adequate Distance From Military Objectives*. In order to qualify for special protection, these categories of property must: (1) be situated an adequate distance from any large industrial center, or from any important military objective constituting a vulnerable point; and (2) not be used for military purposes.

The property must be situated at an adequate distance from any large industrial center or from any important military objective, such as an airport, railway station, or marshalling yards, port facilities, key lines of communication, command and control activity, or other defense facility.<sup>650</sup> The term “adequate distance” is not defined within the 1954 Hague Cultural Property Convention, but relies upon determinations and actions by the State Party requesting “special protection” status, and by States Parties in determining whether the distance set forth by the requesting nation is sufficient to support approval of the request.

Immovable cultural property of very great importance adjacent to a military objective may retain its special protection status provided, in the event of armed conflict, all use of the military objective ceases.<sup>651</sup> For example, if the military objective in question is an airport, port facility, or railway station or marshaling yards, all activity must cease, and military traffic must be diverted, in order for the site to maintain its protected status.

A refuge for storing and protecting movable cultural property may also be placed under

---

forthwith to the Commissioner-General accredited to that Party. 2. If the Commissioner-General considers that such a measure is justified by the circumstances and by the importance of the cultural property sheltered in this improvised refuge, he may authorize the High Contracting Party to display on such refuge the distinctive emblem defined in Article 16 of the Convention. He shall communicate his decision without delay to the delegates of the Protecting Powers who are concerned, each of whom may, within a time-limit of 30 days, order the immediate withdrawal of the emblem. 3. As soon as such delegates have signified their agreement or if the time-limit of 30 days has passed without any of the delegates concerned having made an objection, and if, in the view of the Commissioner-General, the refuge fulfils the conditions laid down in Article 8 of the Convention, the Commissioner-General shall request the Director-General of the United Nations Educational, Scientific and Cultural Organization to enter the refuge in the Register of Cultural Property under Special Protection.”).

<sup>649</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 10 (“During an armed conflict, cultural property under special protection shall be marked with the distinctive emblem described in Article 16, and shall be open to international control as provided for in the Regulations for the execution of the Convention.”).

<sup>650</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(1) (Refuges and centers may only be placed under special protection if “they: (a) are situated at an adequate distance from any large industrial centre or from any important military objective constituting a vulnerable point, such as, for example, an aerodrome, broadcasting station, establishment engaged upon work of national defence, a port or railway station of relative importance or a main line of communication.”). Refer to § 5.6 (Military Objectives).

<sup>651</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(5) (“If any cultural property mentioned in paragraph 1 of the present Article is situated near an important military objective as defined in the said paragraph, it may nevertheless be placed under special protection if the High Contracting Party asking for that protection undertakes, in the event of armed conflict, to make no use of the objective and particularly, in the case of a port, railway station or aerodrome, to divert all traffic therefrom. In that event, such diversion shall be prepared in time of peace.”).

special protection, whatever its location, if it is so constructed that, in all probability, it will not be damaged by bombs.<sup>652</sup>

5.18.8.2 *Conditions for the Granting of Special Protection – No Use for Military Purposes.* A “center containing monuments”<sup>653</sup> shall be deemed to be used for military purposes whenever it is used for the movement of military personnel or material, even in transit. The same shall apply whenever activities directly connected with military operations, the stationing of military personnel, or the production of war material are carried on within the center.<sup>654</sup>

The guarding of cultural property under special protection by armed custodians specially empowered to do so, or the presence, in the vicinity of such cultural property, of police forces normally responsible for the maintenance of public order, however, shall not be deemed to be use for military purposes.<sup>655</sup> Such activities may fulfill the obligation to safeguard cultural property, especially against looters.<sup>656</sup> Employment of law enforcement personnel to protect cultural property is analogous to activities of armed military medical personnel deployed in and around military medical units and facilities in order to provide security from criminal acts.<sup>657</sup>

5.18.8.3 *Marking of Cultural Property Under Special Protection.* The distinctive emblem for cultural property is to be displayed three times in a triangular formation to indicate cultural property under special protection.<sup>658</sup>

The emblem shall be visible from the ground: (a) at regular intervals sufficient to indicate clearly the perimeter of a center containing monuments under special protection; and (b) at the entrance to other immovable cultural property under special protection.<sup>659</sup>

5.18.8.4 *Withdrawal of Special Protection.* If a Party to 1954 Hague Cultural

---

<sup>652</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(2) (“A refuge for movable cultural property may also be placed under special protection, whatever its location, if it is so constructed that, in all probability, it will not be damaged by bombs.”).

<sup>653</sup> Refer to § 5.18.1.4 (Centers Containing Monuments).

<sup>654</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(3) (“A centre containing monuments shall be deemed to be used for military purposes whenever it is used for the movement of military personnel or material, even in transit. The same shall apply whenever activities directly connected with military operations, the stationing of military personnel, or the production of war material are carried on within the centre.”).

<sup>655</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 8(4) (“The guarding of cultural property mentioned in paragraph 1 above by armed custodians specially empowered to do so, or the presence, in the vicinity of such cultural property, of police forces normally responsible for the maintenance of public order shall not be deemed to be used for military purposes.”). Compare § 4.23.1 (Police as Civilians).

<sup>656</sup> Refer to § 5.18.6.1 (Obligation to Stop or Prevent Theft, Pillage, or Misappropriation of, and Acts of Vandalism Against, Cultural Property).

<sup>657</sup> Refer to § 7.10.3.5 (Use of Weapons in Self-Defense or Defense of the Wounded and Sick).

<sup>658</sup> Refer to § 5.18.7.2 (Display of the Distinctive Emblem for Cultural Property – Once Versus Three Times).

<sup>659</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 20(2) (“The emblem shall be visible from the ground: (a) at regular intervals sufficient to indicate clearly the perimeter of a centre containing monuments under special protection; (b) at the entrance to other immovable cultural property under special protection.”).

Property Convention commits, in respect of any item of cultural property under special protection, a violation of its obligations to refrain from any act of hostility directed against such property and from use of such property or its surroundings for military purposes, the opposing Party shall, so long as this violation persists, be released from the obligation to ensure the immunity of the property concerned.<sup>660</sup> Nevertheless, whenever possible, the latter Party shall first request the cessation of such violation within a reasonable time.<sup>661</sup>

Apart from violations by the opposing Party, immunity shall be withdrawn from cultural property under special protection only in exceptional cases of unavoidable military necessity, and only for such time as that necessity continues.<sup>662</sup> Such necessity can be established only by an officer commanding a force the equivalent of a division in size or larger.<sup>663</sup> However, such necessity should not be construed to impose an unreasonable and disproportionate responsibility on the attacker to avoid damage to cultural property.<sup>664</sup> Moreover, all property may be attacked using any lawful and proportionate means if required by military necessity and notwithstanding possible collateral damage to such property.<sup>665</sup>

Whenever circumstances permit, the opposing Party shall be notified, a reasonable time in advance, of the decision to withdraw immunity.<sup>666</sup> The Party withdrawing immunity is also to notify the Commissioner-General for Cultural Property as soon as possible as provided for in the Regulations for the Execution of the 1954 Hague Cultural Property Convention, in writing,

---

<sup>660</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 11(1) (“If one of the High Contracting Parties commits, in respect of any item of cultural property under special protection, a violation of the obligations under Article 9, the opposing Party shall, so long as this violation persists, be released from the obligation to ensure the immunity of the property concerned.”).

<sup>661</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 11(1) (“Nevertheless, whenever possible, the latter Party shall first request the cessation of such violation within a reasonable time.”).

<sup>662</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 11(2) (“Apart from the case provided for in paragraph I of the present Article, immunity shall be withdrawn from cultural property under special protection only in exceptional cases of unavoidable military necessity, and only for such time as that necessity continues.”).

<sup>663</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 11(2) (“Such necessity can be established only by the officer commanding a force the equivalent of a division in size or larger.”).

<sup>664</sup> *Section-by-Section Analysis of Provisions*, 6, Tab 1 to Strobe Talbot, *Letter of Submittal*, May 12, 1998, MESSAGE FROM THE PRESIDENT TRANSMITTING THE 1954 HAGUE CULTURAL PROPERTY CONVENTION 7 (“Due to ambiguous modifiers such as those in the Article 11 phrase ‘exceptional cases of ‘unavoidable’ military necessity,’ the provisions may be misconstrued to impose an unreasonable and disproportionate responsibility on the attacker to avoid damage to cultural property. Clarification would help avoid a suggestion that strict compliance with the Convention would mean that any collateral damage would constitute a violation of the Convention.”).

<sup>665</sup> *See* United States, *Statement on Ratification of the 1954 Hague Cultural Property Convention*, Mar. 13, 2009, 2575 UNTS 7, 8 (“It is the understanding of the United States of America that ‘special protection’, as defined in Chapter II of the Convention, ... allows all property to be attacked using any lawful and proportionate means, if required by military necessity and notwithstanding possible collateral damage to such property.”).

<sup>666</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 11(2) (“Whenever circumstances permit, the opposing Party shall be notified, a reasonable time in advance, of the decision to withdraw immunity.”).

stating the reasons for withdrawing immunity.<sup>667</sup>

5.18.9 Transport of Cultural Property. The transport of cultural property may take place: (1) under special protection through procedures provided in the Regulations for the Execution of the 1954 Hague Cultural Property Convention; and (2) in urgent cases without such procedures. Additional rules apply to the transport of cultural property in occupied territory.<sup>668</sup>

The distinctive emblem for cultural property should be placed on vehicles of transport so as to be clearly visible in daylight from the air as well as from the ground.<sup>669</sup>

5.18.9.1 Transport Under Special Protection. Transport exclusively engaged in the transfer of cultural property, whether within a territory or to another territory, may, at the request of the State concerned, take place under special protection in accordance with the conditions specified in the Regulations for the Execution of the 1954 Hague Cultural Property Convention.<sup>670</sup> No acts of hostility may be directed against transport under special protection.<sup>671</sup>

A request for such transport should be addressed to the Commissioner-General for Cultural Property and should contain all relevant information, including the reason for the transfer, the approximate number and importance of objects to be transferred, their present location, the intended destination, the means of transport to be used, the route to be followed, and the date proposed for transfer.<sup>672</sup> The Commissioner-General for Cultural Property determines whether such transfer is justified and notifies parties to the conflict concerned of the transfer.<sup>673</sup>

---

<sup>667</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 11(3) (“The Party withdrawing immunity shall, as soon as possible, so inform the Commissioner-General for cultural property provided for in the Regulations for the execution of the Convention, in writing, stating the reasons.”).

<sup>668</sup> Refer to § 11.19 (Protection of Cultural Property During Occupation).

<sup>669</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 20(2) (“However, without prejudice to any possible fuller markings, the emblem shall, in the event of armed conflict and in the cases mentioned in Articles 12 and 13 of the Convention, be placed on vehicles of transport so as to be clearly visible in daylight from the air as well as from the ground.”).

<sup>670</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 12(1) (“Transport exclusively engaged in the transfer of cultural property, whether within a territory or to another territory, may, at the request of the High Contracting Party concerned, take place under special protection in accordance with the conditions specified in the Regulations for the execution of the Convention.”).

<sup>671</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 12(3) (“The High Contracting Parties shall refrain from any act of hostility directed against transport under special protection.”).

<sup>672</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 17(1) (“The request mentioned in paragraph 1 of Article 12 of the Convention shall be addressed to the Commissioner-General for Cultural Property. It shall mention the reasons on which it is based and specify the approximate number and the importance of the objects to be transferred, their present location, the location now envisaged, the means of transport to be used, the route to be followed, the date proposed for the transfer, and any other relevant information.”).

<sup>673</sup> REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 17(2) (“If the Commissioner-General, after taking such opinions as he deems fit, considers that such transfer is justified, he shall consult those delegates of the Protecting Powers who are concerned, on the measures proposed for carrying it out. Following such consultation, he shall notify the Parties to the conflict concerned of the transfer, including in such notification all useful information.”).

Transport under special protection shall take place under the international supervision provided for in the Regulations for the Execution of the 1954 Hague Cultural Property Convention and shall display the distinctive emblem described in Article 16.<sup>674</sup> The distinctive emblem for cultural property is to be displayed repeated three times in a triangular formation to indicate that the transport occurs under special protection.<sup>675</sup>

The transport of cultural property to the territory of another State is subject to additional rules.<sup>676</sup>

5.18.9.2 *Transport in Urgent Cases.* If a State that is a Party to the 1954 Hague Cultural Property Convention considers that the safety of certain cultural property requires transfer, and that the matter is of such urgency that the request procedure to the Commissioner-General for Cultural Property cannot be followed, the transport may display the distinctive emblem for cultural property, provided that a request for transport under special protection has not already been made and refused.<sup>677</sup> As far as possible, notification of transfer should be made to the opposing Parties.<sup>678</sup> Nevertheless, transport conveying cultural property to the territory of another State may not display the distinctive emblem unless immunity has been expressly granted to it.<sup>679</sup>

---

<sup>674</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 12(2) (“Transport under special protection shall take place under the international supervision provided for in the aforesaid Regulations and shall display the distinctive emblem described in Article 16.”). See also REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 17(3) (“The Commission-General shall appoint one or more inspectors, who shall satisfy themselves that only the property stated in the request is to be transferred and that the transport is to be by the approved methods and bears the distinctive emblem. The inspector or inspectors shall accompany the property to its destination.”).

<sup>675</sup> Refer to § 5.18.7.2 (Display of the Distinctive Emblem for Cultural Property – Once Versus Three Times).

<sup>676</sup> See REGULATIONS FOR THE EXECUTION OF THE 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 18 (“(a) [W]hile the cultural property remains on the territory of another State, that State shall be its depositary and shall extend to it as great a measure of care as that which it bestows upon its own cultural property of comparable importance; (b) the depositary State shall return the property only on the cessation of the conflict; such return shall be effected within six months from the date on which it was requested; (c) during the various transfer operations, and while it remains on the territory of another State, the cultural property shall be exempt from confiscation and may not be disposed of either by the depositor or by the depositary. Nevertheless, when the safety of the property requires it, the depositary may, with the assent of the depositor, have the property transported to the territory of a third country, under the conditions laid down in the present article; (d) the request for special protection shall indicate that the State to whose territory the property is to be transferred accepts the provisions of the present Article [of the Regulations for the Execution of the 1954 Hague Cultural Property Convention].”).

<sup>677</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 13(1) (“If a High Contracting Party considers that the safety of certain cultural property requires its transfer and that the matter is of such urgency that the procedure laid down in Article 12 cannot be followed, especially at the beginning of an armed conflict, the transport may display the distinctive emblem described in Article 16, provided that an application for immunity referred to in Article 12 has not already been made and refused.”).

<sup>678</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 13(1) (“As far as possible, notification of transfer should be made to the opposing Parties.”).

<sup>679</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 13(1) (“Nevertheless, transport conveying cultural property to the territory of another country may not display the distinctive emblem unless immunity has been expressly granted to it.”).

As far as possible, necessary precautions shall be taken to avoid acts of hostility directed against transport of cultural property under the protection provided in urgent cases and while displaying the distinctive emblem.<sup>680</sup>

5.18.9.3 *Immunity From Seizure, Capture, and Prize.* Transport of cultural property under special protection or under the protection provided in urgent cases is immune from seizure, placing in prize, or capture.<sup>681</sup> Means of transport exclusively engaged in the transport of such property is similarly immune.<sup>682</sup> However, such immunity does not limit the right of visit and search of such transportation or property.<sup>683</sup>

5.18.10 AP I Provision on the Protection of Objects Which Constitute the Cultural or Spiritual Heritage of Peoples. Article 53 of AP I provides certain protections to “historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples.”<sup>684</sup> This provision has been interpreted in a more limited fashion than its text would suggest.

For example, based on the statements of national delegations, including the U.S. delegation, during the negotiations of this provision, it appears that objects that qualify for special protection under Article 53 of AP I are substantially those that qualify for special protection under the 1954 Hague Cultural Property Convention.<sup>685</sup>

In addition, protection is waived when an object is used in support of the military effort or for military purposes.<sup>686</sup> In addition, Canada has interpreted Article 53 to permit waiver of its

---

<sup>680</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 13(2) (“The High Contracting Parties shall take, so far as possible, the necessary precautions to avoid acts of hostility directed against the transport described in paragraph 1 of the present Article and displaying the distinctive emblem.”).

<sup>681</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 14(1) (“Immunity from seizure, placing in prize, or capture shall be granted to: (a) cultural property enjoying the protection provided for in Article 12 or that provided for in Article 13; (b) the means of transport exclusively engaged in the transfer of such cultural property.”).

<sup>682</sup> *Compare* § 4.9.2.3 (Exclusively Engaged in Humanitarian Duties).

<sup>683</sup> 1954 HAGUE CULTURAL PROPERTY CONVENTION art. 14(2) (“Nothing in the present Article shall limit the right of visit and search.”). *Refer to* § 15.13 (Belligerent Right of Visit and Search of Merchant Vessels).

<sup>684</sup> AP I art. 53 (“Without prejudice to the provisions of the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict of 14 May 1954, and of other relevant international instruments, it is prohibited: (a) to commit any acts of hostility directed against the historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples; (b) to use such objects in support of the military effort; (c) to make such objects the object of reprisals.”).

<sup>685</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 333 (AP I art. 53, ¶2.5.1) (“In light of this understanding [by the U.S. delegation], it appears that the objects which qualify for special protection under Art. 53 are substantially those which would qualify for special protection under Art. 8 of the Hague Convention of 1954 without, however, imposing a requirement for the procedural measures required by that Convention to effect such special protection.”).

<sup>686</sup> *See, e.g.,* France, *Statement on Ratification of AP I, translated in* SCHINDLER & TOMAN, THE LAWS OF ARMED CONFLICTS: A COLLECTION OF CONVENTIONS, RESOLUTIONS, AND OTHER DOCUMENTS 801 (2004) (“The Government of the French Republic declares that if the objects protected by Article 53 are used for military purposes, they will lose protection which they would otherwise have according to the provisions of the Protocol.”); Ireland, *Statement on Ratification of AP I*, Nov. 19, 1999, 2073 UNTS 28, 30 (“It is the understanding of Ireland in relation to the protection of cultural objects in Article 53 that if the objects protected by this Article are unlawfully used for military purposes they will thereby lose protection from attacks directed against such unlawful military

obligations when military necessity imperatively requires such waiver.<sup>687</sup>

## 5.19 SIEGES AND ENCIRCLED AREAS

It is lawful to besiege enemy forces. Commanders must seek to make arrangements to permit the passage of certain consignments and should seek to make arrangements for the passage of certain categories of civilians, and of religious and medical personnel. Different rules apply to blockade.<sup>688</sup>

5.19.1 Siege and Encirclement Permissible. It is lawful to besiege enemy forces, *i.e.*, to encircle them with a view towards inducing their surrender by cutting them off from reinforcements, supplies, and communications with the outside world.<sup>689</sup> In particular, it is permissible to seek to starve enemy forces into submission.<sup>690</sup>

5.19.1.1 Belligerent Authority to Exercise Control in the Immediate Vicinity of Military Operations. The conduct of a siege or encirclement may require the imposition of measures of control to ensure that outsiders may not deliver supplies to enemy forces. Thus, the right to conduct a siege or encirclement impliedly recognizes the authority of the military commander to exercise control (*e.g.*, stopping, searching, and diverting traffic) over civilians and other persons in the immediate vicinity of military operations. For example, commanders may also impose certain restrictions on neutral vessels or aircraft (such as restricting communications) within the immediate vicinity of the belligerent's operations.<sup>691</sup>

5.19.2 Removal and Passage of Certain Personnel – Vulnerable Civilians, Diplomatic and Consular Personnel, the Wounded and Sick, and Medical Personnel. Although the commander of the force laying siege has the right to forbid all communications and access between the besieged place and the outside, the parties to the conflict should attempt to conclude local

---

use.”); Italy, *Statement on Ratification of AP I*, Feb. 27, 1986, 1425 UNTS 438, 439 (“If and so long as the objectives protected by Article 53 are unlawfully used for military purposes, they will thereby lose protection.”); United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 77 (“The United Kingdom declares that if the objects protected by this Article are unlawfully used for military purposes they will thereby lose protection from attacks directed against such unlawful military uses.”).

<sup>687</sup> Canada, *Statement on Ratification of AP I*, Nov. 20, 1990, 1591 UNTS 462, 465 (“It is the understanding of the Government of Canada in relation to Article 53 that: *a.* Such protection as is afforded by the Article will be lost during such time as the protected property is used for military purposes, and *b.* The prohibitions contained in subparagraphs (a) and (b) of this Article can only be waived when military necessity imperatively requires such a waiver.”).

<sup>688</sup> Refer to § 13.10 (Blockade).

<sup>689</sup> 1956 FM 27-10 (Change No. 1 1976) ¶40 (“Investment, bombardment, assault, and siege have always been recognized as legitimate means of land warfare.”). See also 2004 UK MANUAL ¶5.34.1 (“Attacks can be costly in casualties and incidental loss or damage. A more effective method may be to encircle enemy forces, cutting them off from supplies and communications with the outside world and forcing their surrender. The same is true of besieging a town or stronghold. Siege is a legitimate method of warfare as long as it is directed against enemy armed forces. It would be unlawful to besiege an undefended town since it could be occupied without resistance.”).

<sup>690</sup> Refer to § 5.20 (Starvation).

<sup>691</sup> Refer to § 13.8 (Belligerent Control of the Immediate Area of Naval Operations); § 14.6 (Belligerent Control of Aviation in the Immediate Vicinity of Hostilities).

agreements for the removal of wounded, sick, infirm and aged persons, children, and maternity cases, or for the passage of ministers of all religions, medical personnel, and medical equipment on their way to such areas.<sup>692</sup> Concluding such agreements is not compulsory. A commander of an encircling force is not required to agree to the passage of medical or religious personnel, supplies, and equipment if he or she has legitimate military reasons denying such requests (*e.g.*, if denying passage may increase the likelihood of surrender of enemy forces in the encircled area). Nonetheless, commanders should make reasonable, good-faith efforts to do so when possible.<sup>693</sup>

Diplomatic and consular personnel of a neutral State should not be prevented from leaving a besieged place before hostilities commence, but this privilege cannot be claimed while hostilities are in progress. If diplomatic and consular personnel of a neutral State voluntarily decide to remain, they are subject to the same risks as other inhabitants.<sup>694</sup>

5.19.3 Passage of Relief Consignments. Commanders should make arrangements to permit the free passage of certain consignments:

- all consignments of medical and hospital stores and objects necessary for religious worship intended only for civilians; and
- all consignments of essential foodstuffs, clothing, and tonics (*i.e.*, medicine) intended for children under fifteen, expectant mothers, and maternity cases.<sup>695</sup>

However, allowing passage of these items is not required by the party controlling the area unless that party is satisfied that there are no serious reasons for fearing that:

- the consignments may be diverted from their destination;

---

<sup>692</sup> GC art. 17 (“The Parties to the conflict shall endeavour to conclude local agreements for the removal from besieged or encircled areas, of wounded, sick, infirm, and aged persons, children and maternity cases, and for the passage of ministers of all religions, medical personnel and medical equipment on their way to such areas.”); GWS art. 15 (“Likewise, local arrangements may be concluded between Parties to the conflict for the removal or exchange of wounded and sick from a besieged or encircled area, and for the passage of medical and religious personnel and equipment on their way to that area.”); GWS-SEA art. 18 (“Whenever circumstances permit, the Parties to the conflict shall conclude local arrangements for the removal of the wounded and sick by sea from a besieged or encircled area and for the passage of medical and religious personnel and equipment on their way to that area.”).

<sup>693</sup> GC COMMENTARY 139 (“The words ‘The Parties to the conflict shall endeavor’ show that under the Convention evacuation is not compulsory; belligerents should nevertheless regard this provision as a very strong recommendation to arrange for evacuation whenever it is in the interest of the civilian population and the military situation makes it possible.”).

<sup>694</sup> 1956 FM 27-10 (Change No. 1 1976) ¶44b (“Diplomatic and consular personnel of a neutral State should not be prevented from leaving a besieged place before hostilities commence, but this privilege cannot be claimed while hostilities are in progress. Should they voluntarily decide to remain, they must undergo the same risks as other inhabitants.”).

<sup>695</sup> GC art. 23 (“Each High Contracting Party shall allow the free passage of all consignments of medical and hospital stores and objects necessary for religious worship intended only for civilians of another High Contracting Party, even if the latter is its adversary. It shall likewise permit the free passage of all consignments of essential foodstuffs, clothing and tonics intended for children under fifteen, expectant mothers and maternity cases.”).

- the control may not be effective; or
- a definite advantage may accrue to the military efforts or economy of the enemy.<sup>696</sup>

5.19.3.1 *Technical Arrangements for the Passage and Distribution of Relief Consignments*. Commanders may require, as a condition for allowing the passage of consignments listed above, that the consignments be distributed under the local supervision of the Protecting Powers.<sup>697</sup> Commanders may prescribe other rules and regulations for how consignments are to be distributed, although consignments should be forwarded as rapidly as possible.<sup>698</sup>

5.19.4 *Attacks by Forces Laying Siege*. The general rules that apply to conducting attacks also apply to attacks by forces laying siege.<sup>699</sup>

5.19.4.1 *Use of Force to Drive Fleeing Civilians Back to Besieged Areas*. In the past, it was permissible, but an extreme measure, to refuse to allow civilians to leave a besieged locality and to use force to drive any who attempted to flee back to the besieged locality.<sup>700</sup> However, such actions would now be prohibited because they would not be consistent with the duty to take feasible precautions for the protection of civilians.<sup>701</sup> Permitting civilians to flee may also be militarily advantageous.<sup>702</sup>

---

<sup>696</sup> GC art. 23 (“The obligation of a High Contracting Party to allow the free passage of the consignments indicated in the preceding paragraph is subject to the condition that this Party is satisfied that there are no serious reasons for fearing: (a) that the consignments may be diverted from their destination, (b) that the control may not be effective, or (c) that a definite advantage may accrue to the military efforts or economy of the enemy through the substitution of the above-mentioned consignments for goods which would otherwise be provided or produced by the enemy or through the release of such material, services or facilities as would otherwise be required for the production of such goods.”).

<sup>697</sup> GC art. 23 (“The Power which allows the passage of the consignments indicated in the first paragraph of this Article may make such permission conditional on the distribution to the persons benefited thereby being made under the local supervision of the Protecting Powers.”).

<sup>698</sup> GC art. 23 (“Such consignments shall be forwarded as rapidly as possible, and the Power which permits their free passage shall have the right to prescribe the technical arrangements under which such passage is allowed.”).

<sup>699</sup> Refer to § 5.4 (Rules on Conducting Assaults, Bombardments, and Other Attacks).

<sup>700</sup> See, e.g., United States v. von Leeb, *et al.* (The High Command Case), XI TRIALS OF WAR CRIMINALS BEFORE THE NMT 563 (“Leningrad was encircled and besieged. Its defenders and the civilian population were in great straits and it was feared the population would undertake to flee through the German lines. Orders were issued to use artillery to ‘prevent any such attempt at the greatest possible distance from our own lines by opening fire as early as possible, so that the infantry, if possible, is spared shooting on civilians.’ ... It is said that if the commander of a besieged place expels the noncombatants, in order to lessen the number of those who consume his stock of provisions, it is lawful, though an extreme measure, to drive them back so as to hasten the surrender.’ We might wish the law were otherwise but we must administer it as we find it. Consequently, we hold no criminality attached on this charge.”).

<sup>701</sup> Refer to § 5.2.3 (Affirmative Duties to Take Feasible Precautions for the Protection of Civilians and Other Protected Persons and Objects).

<sup>702</sup> See ROGERS, LAW ON THE BATTLEFIELD 62 (“In fact, the besieging commander would be better advised to allow all civilians and the wounded and sick to leave the besieged area. He would then legitimately be able to prevent all supplies from reaching the enemy forces and bombardment and assault would be considerably eased.”).

5.19.5 Duties of Forces Under Siege to Take Feasible Precautions to Reduce the Risk of Incidental Harm. Besieged forces should take feasible precautions to reduce the risk of incidental harm.<sup>703</sup> For example, it may be appropriate to mark protected buildings to indicate their protected status to enemy forces.<sup>704</sup> Similarly, it may be appropriate to concentrate the wounded and sick and civilians in areas remote from military objectives<sup>705</sup> or in areas neutralized by arrangement with the enemy.<sup>706</sup>

## 5.20 STARVATION

Starvation is a legitimate method of warfare, but it must be conducted in accordance with the principles of distinction and proportionality, as well as other law of war rules. Starvation of civilians as a method of combat is also prohibited in non-international armed conflict.<sup>707</sup>

5.20.1 Starvation – Distinction. It is a legitimate method of war to starve enemy forces.<sup>708</sup> For example, it is permitted to destroy food intended as sustenance for enemy forces with a view towards weakening them and diverting their resources.<sup>709</sup> Enemy forces, for the purpose of this rule, means those persons constituting military objectives.<sup>710</sup>

Starvation specifically directed against the enemy civilian population, however, is prohibited.<sup>711</sup> For example, it would be prohibited to destroy food or water supplies for the purpose of denying sustenance to the civilian population.

---

<sup>703</sup> Refer to § 5.14 (Feasible Precautions to Reduce the Risk of Harm to Protected Persons and Objects by the Party Subject to Attack).

<sup>704</sup> Refer to § 5.14.4 (Using Distinctive and Visible Signs to Identify Protected Persons and Objects as Such).

<sup>705</sup> Refer to § 5.14.2 (Removing Civilians and Civilian Objects From the Vicinity of Military Objectives).

<sup>706</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>707</sup> Refer to § 17.9.2 (Prohibition on Starvation of Civilians as a Method of Combat).

<sup>708</sup> See LIEBER CODE art. 17 (“It is lawful to starve the hostile belligerent, armed or unarmed, so that it leads to the speedier subjection of the enemy.”). Consider AP I art. 54(3) (“The prohibitions in paragraph 2 shall not apply to such of the objects covered by it as are used by an adverse Party: (a) As sustenance solely for the members of its armed forces; or (b) If not as sustenance, then in direct support of military action, provided, however, that in no event shall actions against these objects be taken which may be expected to leave the civilian population with such inadequate food or water as to cause its starvation or force its movement.”).

<sup>709</sup> For example, Department of the Air Force, Headquarters Pacific Air Forces, Directorate of Operations Analysis, *Project CHECO [Contemporary Historical Examination of Current Operations] Report, “Ranch Hand: Herbicide Operations in SEA [Southeast Asia]”* 19 (Jul. 13, 1971) (“The enemy documents revealed that the VC [Viet Cong] had suffered serious personnel losses due to the lack of food. Troops normally used in fighting had to be detailed to crop raising, and in one case the 95th North Vietnamese Army (NVA) regiment had to fast for one or two days on several occasions due to a lack of food. The overall conclusion of the PACOM report was that crop destruction was ‘an integral, essential and effective part of the total effort in South Vietnam.’”).

<sup>710</sup> Refer to § 5.6.2 (Persons Who Are Military Objectives).

<sup>711</sup> See J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Chairman Fulbright, Senate Committee on Foreign Relations, Apr. 5, 1971, 10 INTERNATIONAL LEGAL MATERIALS 1300, 1302 (1971) (“But an attack by any means against crops intended solely for consumption by noncombatants not contributing to the enemy’s war effort would be unlawful for such would not be an attack upon a legitimate military objective.”). Consider AP I art. 54(1) (“Starvation of civilians as a method of warfare is prohibited.”).

5.20.2 Starvation – Proportionality. Military action intended to starve enemy forces, however, must not be taken where it is expected to result in incidental harm to the civilian population that is excessive in relation to the military advantage anticipated to be gained.<sup>712</sup>

Feasible precautions to reduce the risk of harm to the civilian population or other reasonable measures to mitigate the burden to the civilian population may also be warranted when seeking to starve enemy forces.<sup>713</sup> For example, it may be appropriate to seek to compensate civilians whose food has been inadvertently destroyed.<sup>714</sup> Moreover, an Occupying Power would have additional duties to ensure food and water for the civilian population.<sup>715</sup>

5.20.3 Starvation and Other Law of War Rules. Starvation as a method of warfare must comply with other applicable law of war rules. For example, it would be unlawful to poison food or water.<sup>716</sup> Additionally, starvation, for example, may involve sieges or encirclement, blockades, attacks, or the seizure and destruction of enemy property.<sup>717</sup> In each case, the rules applicable to those situations must be followed.

5.20.4 AP I Provision on Objects Indispensable to the Survival of the Civilian Population. Article 54(2) of AP I makes it prohibited for Parties to AP I “to attack, destroy, remove or render useless objects indispensable to the survival of the enemy civilian population, such as foodstuffs, agricultural areas for the production of foodstuffs, crops, livestock, drinking water installations, and supplies for irrigation works, for the specific purpose of denying them for their sustenance value to the civilian population or to the adverse party, whatever the motive,

---

<sup>712</sup> Cf. J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Chairman Fulbright, Senate Committee on Foreign Relations, Apr. 5, 1971, 10 INTERNATIONAL LEGAL MATERIALS 1300, 1302 (1971) (“Where it cannot be determined whether crops were intended solely for consumption by the enemy’s armed forces, crop destruction would be lawful if a reasonable inquiry indicated that the intended destruction is justified by military necessity under the principles of Hague Regulation Article 23(g), and that the devastation occasioned is not disproportionate to the military advantage gained.”).

<sup>713</sup> Refer to § 5.2.3 (Affirmative Duties to Take Feasible Precautions for the Protection of Civilians and Other Protected Persons and Objects).

<sup>714</sup> For example, Department of State, *Telegram From the Department of State to the Embassy in Vietnam*, Washington, May 7, 1963, reprinted in III FOREIGN RELATIONS OF THE UNITED STATES, 1961–1963, VIETNAM, JANUARY–AUGUST 1963, DOCUMENT 110, p. 275 (“All herbicide operations [including crop destruction] to be undertaken only after it is clear both PsyWar preparations and compensation and relief machinery [for peasants whose crops are inadvertently destroyed] are adequate. Would appear GVN [Government of Vietnam] should increase compensation efforts.”); Memorandum Prepared in the Department of State, *Chemical Defoliation and Crop Destruction in South Viet-Nam*, Washington, Apr. 18, 1963, reprinted in III FOREIGN RELATIONS OF THE UNITED STATES, 1961–1963, VIETNAM, JANUARY–AUGUST 1963, DOCUMENT 96, pp. 240 (“The GVN [Government of Vietnam] has set up a mechanism for compensating peasants whose crops are inadvertently destroyed. We do not have much information on the results of the compensation program, but there are indications that it was not adequately carried out, in part because of security difficulties.”).

<sup>715</sup> Refer to § 11.14 (Food and Medical Supplies for the Civilian Population).

<sup>716</sup> Refer to § 6.8 (Poison).

<sup>717</sup> Refer to § 5.19 (Sieges and Encircled Areas); § 13.10 (Blockade); § 5.4 (Rules on Conducting Assaults, Bombardments, and Other Attacks); § 5.17 (Seizure and Destruction of Enemy Property).

whether in order to starve out civilians, cause them to move away, or for any other motive.”<sup>718</sup>

This rule would not apply to attacks that are carried out for specific purposes other than to deny sustenance.<sup>719</sup> For example, this rule would not prohibit destroying a field of crops to prevent it from being used as concealment by the enemy or destroying a supply route that is used to move military supplies but is also used to supply the civilian population with food.<sup>720</sup>

Similarly, this AP I prohibition does not apply to objects that would otherwise be covered by it if those objects are used by an adverse party “as sustenance solely for the members of its armed forces” or “if not as sustenance, then in direct support of military action.”<sup>721</sup> Actions against this latter category of objects forfeiting protection, however, may not be taken if they “may be expected to leave the civilian population with such inadequate food or water as to cause its starvation or force its movement.”<sup>722</sup>

Further exception is made for a State to engage in a “scorched earth” defense of a party’s own territory.<sup>723</sup>

When adopted, this AP I prohibition was novel and the product of extensive diplomatic negotiation. Given the intricacy of this provision of AP I, it would be difficult to conclude that all of its particulars reflect customary international law. Nonetheless, the United States has supported the underlying principle that starvation of civilians may not be used as a method of

---

<sup>718</sup> AP I art. 54(2).

<sup>719</sup> See, e.g., APPENDIX TO 1985 CJCS MEMO ON AP I 56 (The restrictions of Article 54(2) “do not apply to attacks that are not for the specific purpose of denying sustenance;”); United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 77 (Article 54(2) of AP I “has no application to attacks that are carried out for a specific purpose other than denying sustenance to the civilian population or the adverse party.”).

<sup>720</sup> 2004 UK MANUAL ¶5.27.2 (“The law is not violated if military operations are not intended to cause starvation but have that incidental effect, for example, by cutting off enemy supply routes which are also used for the transportation of food, or if civilians through fear of military operations abandon agricultural land or are not prepared to risk bringing food supplies into areas where fighting is going on.”); BOTHE, PARTSCH, & SOLF, *NEW RULES* 339 (AP I art. 54, ¶2.3) (“This paragraph does not prohibit the incidental distress of civilians resulting from otherwise lawful military operations. It would not, for example, be unlawful to attack or destroy a railroad line simply because the railroad was used to transport food needed to supply the population of a city, if the railroad was otherwise a military objective under Art. 52 [of AP I].”).

<sup>721</sup> AP I art. 54(3) (“The prohibitions in paragraph 2 shall not apply to such of the objects covered by it as are used by an adverse Party: (a) As sustenance solely for the members of its armed forces; or (b) If not as sustenance, then in direct support of military action, provided, however, that in no event shall actions against these objects be taken which may be expected to leave the civilian population with such inadequate food or water as to cause its starvation or force its movement.”).

<sup>722</sup> AP I art. 54(3) (“The prohibitions in paragraph 2 shall not apply to such of the objects covered by it as are used by an adverse Party: ... (b) If not as sustenance, then in direct support of military action, provided, however, that in no event shall actions against these objects be taken which may be expected to leave the civilian population with such inadequate food or water as to cause its starvation or force its movement.”).

<sup>723</sup> AP I art. 54(5) (“In recognition of the vital requirements of any Party to the conflict in the defence of its national territory against invasion, derogation from the prohibitions contained in paragraph 2 may be made by a Party to the conflict within such territory under its own control where required by imperative military necessity.”).

warfare, as discussed in the sub-sections above.<sup>724</sup>

## 5.21 OVERVIEW OF GOOD FAITH, PERFIDY, AND RUSES

Absolute good faith with the enemy must be observed as a rule of conduct.<sup>725</sup> The line between those deceptions that good faith permits and those that good faith prohibits may appear indistinct and has varied according to State practice.<sup>726</sup> Good faith prohibits:

- killing or wounding enemy persons by resort to perfidy;<sup>727</sup>
- misusing certain signs;<sup>728</sup>
- fighting in the enemy's uniform;<sup>729</sup>
- feigning non-hostile relations in order to seek a military advantage;<sup>730</sup> and
- compelling nationals of a hostile party to take part in the operations of war directed against their own country.<sup>731</sup>

However, good faith permits:

- ruses of war or other lawful deceptive activities;<sup>732</sup>

---

<sup>724</sup> Michael J. Matheson, Deputy Legal Adviser, Department of State, *Remarks on the United States Position on the Relation of Customary International Law to the 1977 Protocols Additional to the 1949 Geneva Conventions at the Sixth Annual American Red Cross-Washington College of Law Conference on International Humanitarian Law* (Jan. 22, 1987), 2 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 419, 426 (1987) (“We support the principle that starvation of civilians not be used as a method of warfare, and subject to the requirements of imperative military necessity, that impartial relief actions necessary for the survival of the civilian population be permitted and encouraged. These principles can be found, though in a somewhat different form, in articles 54 and 70.”).

<sup>725</sup> 1956 FM 27-10 (Change No. 1 1976) ¶49 (“Absolute good faith with the enemy must be observed as a rule of conduct; but this does not prevent measures such as using spies and secret agents, encouraging defection or insurrection among the enemy civilian population, corrupting enemy civilians or soldiers by bribes, or inducing the enemy's soldiers to desert, surrender, or rebel.”).

<sup>726</sup> 1958 UK MANUAL ¶310 (“The borderline between legitimate ruses and forbidden treachery has varied at different times, and it is difficult to lay down hard and fast rules in the matter. Many of the doubtful cases, however, which arose at a time when, from the nature of their weapons, troops could only engage at close range, can now seldom or never occur.”).

<sup>727</sup> Refer to § 5.22 (Treachery or Perfidy Used to Kill or Wound).

<sup>728</sup> Refer to § 5.24 (Improper Use of Certain Signs).

<sup>729</sup> Refer to § 5.23 (Use of Enemy Flags, Insignia, and Military Uniforms).

<sup>730</sup> Refer to § 12.2 (Principle of Good Faith in Non-Hostile Relations).

<sup>731</sup> Refer to § 5.27 (Prohibition Against Compelling Enemy Nationals to Take Part in the Operations of War Directed Against Their Own Country).

<sup>732</sup> Refer to § 5.25 (Ruses of War and Other Lawful Deceptions).

- intelligence collection;<sup>733</sup>
- military information support operations, including propaganda;<sup>734</sup> and
- certain types of bribery.<sup>735</sup>

5.21.1 Harms From Breaches of Good Faith. Breaches of good faith may: (1) undermine the protections afforded by the law of war to classes of persons and objects; (2) impair non-hostile relations between opposing belligerents; and (3) damage the basis for the restoration of peace short of complete annihilation of one belligerent by another.

Breaches of good faith, principally perfidious conduct, may undermine the protections afforded by the law of war to civilians, persons who are *hors de combat*, or certain other classes of persons and objects.<sup>736</sup>

Breaches of good faith also impair other non-hostile relations between opposing belligerents during the war. For example, such breaches may diminish the legitimate activities that depend upon a degree of mutual respect and trust between hostile forces, such as effecting surrender or collection of the dead, wounded, or sick (enemy or friendly force) on the battlefield. It also may make it more difficult for military commanders to ensure that their forces comply with the law of war where treacherous acts by the enemy have resulted in casualties among their own forces.

Breaches of good faith also damage, and may destroy, the basis for restoration of peace short of the complete annihilation of one belligerent by another.<sup>737</sup> A degree of mutual respect and trust is essential for the negotiation of cease-fires, truces, surrenders, and other agreements necessary to bring an end to hostilities.

## 5.22 TREACHERY OR PERFIDY USED TO KILL OR WOUND

During international armed conflict, it is prohibited to kill or wound the enemy by resort to perfidy.<sup>738</sup>

---

<sup>733</sup> Refer to § 5.26.1 (Propaganda).

<sup>734</sup> Refer to § 5.26.2 (Information Gathering).

<sup>735</sup> Refer to § 5.26.3 (Bribery or Offering of Rewards).

<sup>736</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 202 (AP I art. 37, ¶2.1) (“Combatants, in practice, find it difficult to respect protected persons and objects if experience causes them to believe or suspect that their adversaries are abusing their claim to protection under the rules of international law applicable in armed conflict in order to achieve a military advantage. The prohibitions of perfidy are thus directly related to protection for the wounded and sick, hors de combat combatants, prisoners of war and civilians.”). See also footnote 164, § 4.6.4 (Having a Fixed Distinctive Sign Recognizable at a Distance).

<sup>737</sup> 1956 FM 27-10 (Change No. 1 1976) ¶50 (“Treacherous or perfidious conduct in war is forbidden because it destroys the basis for a restoration of peace short of the complete annihilation of one belligerent by the other.”).

<sup>738</sup> HAGUE IV REG. art. 23(b) (It is especially forbidden “[t]o kill or wound treacherously individuals belonging to the hostile nation or army”); LIEBER Code art. 101 (noting that “the common law of war allows even capital punishment for clandestine or treacherous attempts to injure an enemy”). Consider ROME STATUTE art. 8(2)(b)(xi)

5.22.1 Definition of Perfidy. Acts of *perfidy* are acts that invite the confidence of enemy persons to lead them to believe that they are entitled to, or are obliged to accord, protection under the law of war, with intent to betray that confidence.<sup>739</sup>

The key element in perfidy is the false claim to protections under the law of war in order to secure a military advantage over the opponent.<sup>740</sup> The claim must be to legal protections.<sup>741</sup>

5.22.1.1 Perfidy and Treachery – Notes on Terminology. “Treachery” and “perfidy” have been used interchangeably.<sup>742</sup> Article 23(b) of the Hague IV Regulations uses the word “treacherously,” which was also used in Article 13(b) of the 1874 Brussels Declaration.<sup>743</sup>

Sometimes, “perfidy” is used to refer to conduct that is, by definition, prohibited.<sup>744</sup> Other times, as, for example, in AP I, “perfidy” is used to refer to a certain type of deception, which might not, by itself, be prohibited (*e.g.*, feigning death would not be prohibited in order to facilitate escape).<sup>745</sup> It will be important to examine closely the context to determine which usage is intended. This manual generally uses “perfidy” in the latter sense.

5.22.2 Perfidy - “Kill or Wound”. It is prohibited to use perfidy to kill or wound the enemy. It may not be prohibited to invite the confidence of the adversary that he or she is obligated to accord protection under the law of war, for certain purposes (*e.g.*, to facilitate

---

(defining war crimes in international armed conflict to include “[k]illing or wounding treacherously individuals belonging to the hostile nation or army”).

<sup>739</sup> Consider AP I art. 37(1) (“Acts inviting the confidence of an adversary to lead him to believe that he is entitled to, or is obliged to accord, protection under the rules of international law applicable in armed conflict, with intent to betray that confidence, shall constitute perfidy.”); APPENDIX TO 1985 CJCS MEMO ON API 26 (“Rather than ‘treachery,’ paragraph 1 of Article 37 uses the modern term ‘perfidy,’ and defines it as ‘acts inviting the confidence of an adversary to lead him to believe that he is entitled to, or is obliged to accord, protection under the rules of international law applicable in armed conflict, with the intent to betray that confidence.’ This definition, and the examples provided, are an accurate and helpful clarification of existing law.”).

<sup>740</sup> ICRC AP COMMENTARY 435 (¶1500) (“The central element of the definition of perfidy is the deliberate claim to legal protection for hostile purposes.”).

<sup>741</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 204-05 (AP I art. 37, ¶2.4.2) (“The ICRC draft of the article referred to ‘confidence’ without elaborating that confidence must be based on a norm of international law. It would have involved confidence in moral obligations as well as in binding legal obligations. This was considered to be overly abstract and ambiguous by delegations representing several regional groups.”).

<sup>742</sup> For example, XV OFFICIAL RECORDS OF THE CDDH 99 (CDDH/III/SR.47 ¶78) (“Mr. Reed (United States of America) said that article 35, paragraph 1, was a reaffirmation and development of Article 23 b) of The Hague Regulations respecting the Laws and Customs of War on Land annexed to The Hague Convention No. IV of 1907 concerning the Laws and Customs of War on Land. The word ‘treacherously’ in Article 23 b) was synonymous with ‘perfidy’ in article 35 of draft Protocol I.”).

<sup>743</sup> SPAIGHT, WAR RIGHTS ON LAND 86 (“The word ‘Treachery’ in Article XXIII(b) seems hardly applicable to an enemy’s act, and one of the Brussels delegates proposed to substitute ‘perfidy’ for it. The original word was, however, retained, as being the equivalent of the German *Meuchelmord* (‘murder by treachery’)”).

<sup>744</sup> 1956 FM 27-10 (Change No. 1 1976) ¶50 (providing that “[t]reacherous or perfidious conduct in war is forbidden”).

<sup>745</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 203 (AP I art. 37, ¶2.4) (“It should be noted that Art. 37 [of AP I] does not prohibit perfidy *per se*, although the term is defined with precision.”).

spying, sabotage, capturing enemy personnel, or evading enemy forces). However, such deception may not rely on certain signs and symbols.<sup>746</sup> Moreover, persons who use perfidy to engage in spying and sabotage may forfeit POW status or be liable to certain penalties under the domestic law of enemy States.<sup>747</sup>

5.22.2.1 AP I Prohibition on “Capture” by Resort to Perfidy. In addition to killing or wounding, Article 37 of AP I prohibits “capture” by resort to perfidy. The Department of Defense has not interpreted customary international law to prohibit U.S. forces from seeking to capture by resort to perfidy.

5.22.3 Examples of Killing or Wounding by Resort to Perfidy. Examples of killing or wounding by resort to perfidy include:

- feigning an intent to negotiate under a flag of truce and then attacking,<sup>748</sup> which takes advantage of the rule that flags of truce may not be used to shield military operations.<sup>749</sup>
- feigning surrender and then attacking,<sup>750</sup> which takes advantage of the rule that the enemy may not attack those who have surrendered;<sup>751</sup>
- feigning of death or incapacitation by wounds or sickness<sup>752</sup> and then attacking, which takes advantage of the respect afforded the dead<sup>753</sup> or the protection afforded those who are *hors de combat*;<sup>754</sup>
- feigning civilian status and then attacking;<sup>755</sup> and

---

<sup>746</sup> Refer to § 5.24 (Improper Use of Certain Signs).

<sup>747</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>748</sup> For example, William Gerald Downey, *The Law of War and Military Necessity*, 47 AJIL 251, 260 (1953) (“A good example of the use of deception which involved a breach of good faith is one that happened in this writer’s presence during the Battle of Metz in 1944. At that time the German forces held several forts south and east of Metz. One November morning, just as our attack was getting under way, a German unit of some 20 men came out of one of the forts under a white flag. The American battalion commander gave the order to cease fire, and the Germans marched under the protection of the white flag down the road toward our lines. As they came abreast of a large bunker they pulled down their white flag, ran into the bunker and immediately opened fire on our positions.”).

<sup>749</sup> Refer to § 5.24.7 (Flags of Truce).

<sup>750</sup> See FINAL REPORT ON THE PERSIAN GULF WAR 621 (“During the same battle, an Iraqi officer approached Coalition forces with his hands in the air, indicating his intention to surrender. When near his would-be captors, he drew a concealed pistol from his boot, fired, and was killed during the combat that followed.”).

<sup>751</sup> Refer to § 5.9.3 (Persons Who Have Surrendered).

<sup>752</sup> 1958 UK MANUAL ¶115 note 2 (“For instance, it would be treachery for a soldier to sham wounded or dead and then to attack enemy soldiers who approached him without hostile intent, or to pretend he had surrendered and afterwards to open fire upon or attack an enemy who was treating him as *hors de combat* or a prisoner.”).

<sup>753</sup> Refer to § 7.7 (Treatment and Handling of Enemy Military Dead).

<sup>754</sup> Refer to § 5.9.4 (Persons Rendered Unconscious or Otherwise Incapacitated by Wounds, Sickness, or Shipwreck).

<sup>755</sup> Refer to § 5.4.8 (Obligation of Combatants to Distinguish Themselves When Conducting Attacks).

- calling out “do not fire; we are friends” and then attacking.<sup>756</sup>

## 5.23 USE OF ENEMY FLAGS, INSIGNIA, AND MILITARY UNIFORMS

During international armed conflict, improper use of enemy flags, military emblems, insignia, or uniforms, is prohibited.<sup>757</sup>

5.23.1 Improper Use of Enemy Flags, Insignia, and Military Uniforms Prohibited. In general, the use of enemy flags, insignia, and military uniforms is prohibited during combat, but is permissible outside of combat.<sup>758</sup>

A similar rule is applied during naval operations.<sup>759</sup>

5.23.1.1 Improper Use of Enemy Uniforms and “Perfidy”. The prohibition on the use of enemy uniforms in combat has been described as a prohibition against using enemy uniforms to kill or wound treacherously.<sup>760</sup> However, feigning enemy military status is not technically “perfidy” as the term is used in this manual because perfidy requires the feigning of protected status, and the law of war generally does not protect enemy military personnel from being made the object of attack.<sup>761</sup>

5.23.1.2 Use of Enemy Uniforms and Other Equipment Without the Intent to Deceive. Uses of enemy uniforms and other equipment without any intention to deceive the enemy are not prohibited. For example, if there is a shortage of clothing it may be necessary to use enemy uniforms.<sup>762</sup> Similarly, the immediate use of captured enemy weapons or equipment

<sup>756</sup> 2004 UK MANUAL ¶5.9 footnote 35 (“Examples of treachery included calling out ‘Do no fire, we are friends’ and then firing at enemy troops who had lowered their guard, especially if coupled with the wearing of enemy uniforms or civilian clothing;”); 1958 UK MANUAL ¶311 note 1 (giving as an example of treacherous killing or wounding “calling out ‘Do not fire, we are friends’, and then firing” which “is often accompanied by the use of enemy uniforms or civilian clothing”); 1914 1914 RULES OF LAND WARFARE ¶178 note 1 (“It would be treacherous to call out, ‘Do not fire; we are friends,’ and then fire a volley.”).

<sup>757</sup> HAGUE IV REG. art. 23(f) (making it especially forbidden “[t]o make improper use ... of the national flag, or of the military insignia and uniform of the enemy,”).

<sup>758</sup> APPENDIX TO 1985 CJCS MEMO ON AP I 28 (“Existing international law prohibits ‘improper’ use of the enemy uniform or insignia. The United States interprets this rule to prohibit their use in combat, but not in situations preceding or following combat.”); 1956 FM 27-10 (Change No. 1 1976) ¶54 (“It is certainly forbidden to employ [national flags, insignia, and uniforms] during combat, but their use at other times is not forbidden.”).

<sup>759</sup> Refer to § 13.13.1 (Belligerent Warship’s Use of False Colors and Other Disguises).

<sup>760</sup> For example, Trial of Otto Skorzeny and Others, IX U.N. LAW REPORTS 90 (General Military Government Court of the U.S. Zone of Germany, Aug. 18-Sept. 9, 1947) (“The ten accused involved in this trial were all officers in the 150th Panzer Brigade commanded by the accused Skorzeny. They were charged with participating in the improper use of American uniforms by entering into combat disguised therewith and treacherously firing upon and killing members of the armed forces of the United States.”).

<sup>761</sup> Refer to § 5.22.1 (Definition of Perfidy).

<sup>762</sup> See 1958 UK MANUAL ¶322 (“If, owing to shortage of clothing, it becomes necessary to utilise apparel captured from the enemy, the badges should be removed before the articles are worn.”); 1958 UK MANUAL ¶322 note 1 (“Articles of uniform which are distinctive of a particular army—such as the beret of the French Chasseurs des Alpes or the coloured berets of certain British troops, the kilt of some regiments, or the Turkish fez—should not be used except in cases of absolute necessity.”).

during combat is permissible. When circumstances permit, however, enemy insignia should generally be removed or alternative measures taken to distinguish U.S. forces from the enemy.<sup>763</sup>

5.23.1.3 Deceptive Use of Enemy Flags, Insignia, and Military Uniforms Outside of Combat. It is a legitimate ruse to use enemy flags, insignia, and military uniforms outside of combat.<sup>764</sup>

5.23.1.4 Use of Enemy Uniforms to Evade Capture or Escape. Military personnel, such as aircrew downed behind enemy lines, may use enemy uniforms to evade capture. Similarly, escaping prisoners of war may use enemy military uniforms to facilitate their escape from a POW camp to return to friendly lines.<sup>765</sup>

However, those using enemy uniforms to evade capture or escape must not engage in combat while in the enemy's uniform, and, if they are not escaping POWs, they may be liable to treatment as spies and saboteurs if caught behind enemy lines.<sup>766</sup>

5.23.1.5 Use of Enemy Codes, Passwords, and Countersigns Not Restricted. The prohibition on misuse of enemy flags, insignia, and military uniforms refers only to concrete visual objects, rather than enemy codes, passwords, and countersigns.<sup>767</sup> Enemy codes, passwords, and countersigns may be used as a ruse to aid military operations.<sup>768</sup> Enemy use of these measures is permissible because military forces are expected to take measures to guard against the use of their codes, passwords, and countersigns by the enemy.

5.23.2 Persons Using Enemy Uniforms May Be Liable to Treatment as Spies and Saboteurs. Although the use of enemy uniforms outside of combat generally is neither prohibited by the customary law of war nor by law of war treaties to which the United States is a Party, combatants captured by an opposing party behind the opposing party's lines while wearing

---

<sup>763</sup> See LIEBER CODE art. 64 ("If American troops capture a train containing uniforms of the enemy, and the commander considers it advisable to distribute them for use among his men, some striking mark or sign must be adopted to distinguish the American soldier from the enemy.").

<sup>764</sup> For example, 1958 UK MANUAL ¶320 note 3 ("During the Second World War the German intelligence service in Belgium used German soldiers disguised as British airmen 'to discover the attitude of the Belgian population towards individual British airmen landing in Belgium. The operation was completely successful. Active assistance was rendered by an organised network which was uncovered. The mass of the population was not involved'. (Extract from a captured German teleprint dated 9th January, 1943.) It would seem that this use of enemy uniform outside of battle operations is a legitimate ruse.").

<sup>765</sup> Refer to § 9.25.2.3 (Disciplinary Punishment for Certain Offenses Committed in Connection With Escape).

<sup>766</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>767</sup> Cf. BOTHE, PARTSCH, & SOLF, NEW RULES 214 (AP I art. 29, ¶2.3.3) ("The term 'emblem, insignia, or uniforms' [in AP I art. 39(2)] refers only to concrete visual objects, including the national symbols marked on military vehicles and aircraft. This prohibition does not apply to the ruse of using the adversary's codes, passwords and countersigns to aid military operations.").

<sup>768</sup> See, e.g., BOTHE, PARTSCH, & SOLF, NEW RULES 207 footnote 25 (AP I art. 37, ¶2.5) ("It would be a legitimate ruse to use the electronic transponder aboard a combatant aircraft to respond with the code used for identifying friendly aircraft."); SPAIGHT, AIR POWER AND WAR RIGHTS 176 ("The greatly developed use of wireless telephony afforded opportunities for deception of which the airmen were not slow to avail themselves. The feigning of orders to enemy machines to return to their base, for instance, was a common ruse.").

the uniform of the opposing party may be liable to treatment as spies and saboteurs.<sup>769</sup>

5.23.3 AP I and the Use of Enemy Flags, Insignia, or Uniforms to Shield, Favor, Protect, or Impede Military Operations. In addition to prohibiting the use of enemy uniforms while engaging in attacks, AP I also prohibits the use of flags, military emblems, insignia, or uniforms of an enemy in order to shield, favor, protect, or impede military operations.<sup>770</sup> Canada has taken a reservation from this rule.<sup>771</sup>

This provision of AP I is unclear as to what uses would be permissible and what uses would be prohibited.<sup>772</sup> However, because the United States is not a Party to AP I and because the rule is not part of customary international law, U.S. military personnel are not subject to this more restrictive rule.

## 5.24 IMPROPER USE OF CERTAIN SIGNS

Certain signs, symbols, or signals reflect a status that receives special protection under the law of war, and thus these signs may not be improperly used. They may not be used: (1) while engaging in attacks; (2) in order to shield, favor, or protect one's own military operations; or (3) to impede enemy military operations. Thus, their use may be improper even when that use does not involve killing or wounding, and they may not be used to facilitate espionage (except for signs, emblems, or uniforms of a neutral or non-belligerent State). The following types of signs are subject to this broader rule against improper use:

5.24.1 Signs, Emblems, or Uniforms of a Neutral or Non-Belligerent State. During international armed conflict, the use of signs, emblems, or uniforms of a neutral or other nation not a party to the conflict is prohibited.<sup>773</sup>

However, recognized exceptions exist concerning espionage<sup>774</sup> and warfare at sea.<sup>775</sup>

---

<sup>769</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>770</sup> AP I art. 39(2) ("It is prohibited to make use of the flags or military emblems, insignia or uniforms of adverse Parties while engaging in attacks or in order to shield, favour, protect or impede military operations.").

<sup>771</sup> Canada, *Statement on Ratification of AP I*, Nov. 20, 1990, 1591 UNTS 462, 463 ("The Government of Canada does not intend to be bound by the prohibitions contained in paragraph 2 of Article 39 to make use of military emblems, insignia or uniforms of adverse parties in order to shield, favour, protect or impede military operations.").

<sup>772</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 214 (AP I art. 39, ¶2.3) (Article 39(2) of AP I "suggests that some uses [of the enemy uniform] are not breaches of the Protocol, but the boundary between forbidden and permissible uses is not very distinct.").

<sup>773</sup> Consider AP I art. 39(1) ("It is prohibited to make use in an armed conflict of the flags or military emblems, insignia or uniforms of neutral or other States not Parties to the conflict."); AP I art. 37(1)(d) (giving as an example of perfidy the feigning of protected status by the use of signs, emblems or uniforms "of neutral or other States not Parties to the conflict."); BOTHE, PARTSCH, & SOLF, NEW RULES 213 (AP I art. 39, ¶2.2) ("The purpose behind the rule is to avoid escalation of armed conflict to neutral countries in the mistaken belief that the neutral State had abandoned its neutrality.").

<sup>774</sup> See SPAIGHT, WAR RIGHTS ON LAND 203-04 ("The spy in modern war is usually a soldier who dons civilian dress, or the uniform of the enemy, or of a neutral country; and in all these cases, he would be liable to punishment, apart from this article, for assuming a disguise to further a hostile act."). Although Article 37(1)(d) of AP I lists

5.24.2 Distinctive Emblems of the Geneva Conventions (e.g., Red Cross). The distinctive emblems of the red cross, red crescent, and red crystal are symbols that identify military medical and religious personnel, medical units, and medical transports, or certain other categories of persons engaged in humanitarian work as personnel and objects entitled to special protection.<sup>776</sup> These emblems may not be used except to identify these protected persons and objects.<sup>777</sup>

5.24.3 Markings for POW or Civilian Internee Camps. Only POW camps under the GPW should be marked using internationally agreed symbols, such as the PW or PG designation.<sup>778</sup>

Only civilian internee camps under the GC should be marked with an IC designation.<sup>779</sup>

5.24.4 Markings for Hospital, Safety, or Neutralized Zones. Markings that distinguish hospital or safety zones or neutralized zones established under the 1949 Geneva Conventions may not be used for other purposes.<sup>780</sup>

5.24.5 Distinctive and Visible Signs to Identify Civilian Objects as Such. Certain distinctive and visible signs that are intended to identify that an object is protected as a civilian object under the law of war must not be used for other purposes.<sup>781</sup>

5.24.6 Markings for Cultural Property. The distinctive emblem for cultural property may not be used for other purposes.<sup>782</sup>

5.24.7 Flags of Truce. The improper use of a flag of truce is strictly prohibited.<sup>783</sup>

---

“[t]he feigning of protected status by the use of signs, emblems or uniforms ... of neutral or other States not Parties to the conflict” as an example of perfidy, and Article 39(1) prohibits the “use in an armed conflict of the flags or military emblems, insignia or uniforms of neutral or other States not Parties to the conflict,” Article 39(3) of AP I clarifies that “[n]othing in this Article or in Article 37, paragraph 1 (d), shall affect the existing generally recognized rules of international law applicable to espionage ... .”

<sup>775</sup> APPENDIX TO 1985 CJCS MEMO ON AP I 28 (“Article 39, paragraph 1, of the Protocol prohibits the use of neutral flags, uniforms or emblems in armed conflict. This is already a rule of customary law, to which recognized exceptions exists governing espionage and warfare at sea. The exceptions are preserved by paragraph 3 of the Article.”). Refer to § 13.13.1 (Belligerent Warship’s Use of False Colors and Other Disguises).

<sup>776</sup> Refer to § 7.15 (Display of the Distinctive Emblem to Facilitate Identification).

<sup>777</sup> Refer to § 7.15.4 (Prohibitions on Unauthorized Uses of the Distinctive Emblem).

<sup>778</sup> Refer to § 9.11.4.3 (Marking of POW Camps).

<sup>779</sup> Refer to § 10.11.1.3 (Marking of Internment Camps).

<sup>780</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>781</sup> Refer to § 5.14.4 (Using Distinctive and Visible Signs to Identify Protected Persons and Objects as Such).

<sup>782</sup> Refer to § 5.18.7.4 (Other Uses of the Distinctive Emblem for Cultural Property Prohibited During Armed Conflict).

<sup>783</sup> Refer to § 12.4.2.1 (Prohibition on Improper Use of the Flag of Truce).

## 5.25 RUSES OF WAR AND OTHER LAWFUL DECEPTIONS

Ruses of war are considered permissible.<sup>784</sup> In general, a belligerent may resort to those measures for mystifying or misleading the enemy against which the enemy ought to take measures to protect itself.<sup>785</sup> Apart from ruses of war, certain other deceptions are not prohibited, but may expose combatants employing them to liability as spies and saboteurs.

5.25.1 Definition of Ruses of War. Ruses of war are acts that are intended to mislead an adversary or to induce him to act recklessly, but that do not infringe upon any rule of international law applicable in armed conflict and that are not perfidious because they do not invite the confidence of an adversary with respect to protection under that law.<sup>786</sup>

Ruses of war are methods, resources, and techniques that can be used either to convey false information or deny information to opposing forces. They can include physical, technical, or administrative means, such as electronic warfare measures, flares, smoke, chaff, aerosol material, or dissemination devices.

5.25.1.1 Acts That Are Intended to Mislead an Adversary or to Induce an Adversary to Act Recklessly. Ruses may be used for a variety of purposes, such as:

- facilitating surprise attacks or ambushes,<sup>787</sup> such as by
  - misleading the enemy as to the planned targets or locations of military operations;<sup>788</sup>

---

<sup>784</sup> HAGUE IV REG. 24 (“Ruses of war and the employment of measures necessary for obtaining information about the enemy and the country are considered permissible.”). *Consider* AP I art. 37(2) (“Ruses of war are not prohibited.”).

<sup>785</sup> 1956 FM 27-10 (Change No. 1 1976) ¶49 (“In general, a belligerent may resort to those measures for mystifying or misleading the enemy against which the enemy ought to take measures to protect himself.”).

<sup>786</sup> *Consider* AP I art. 37(2) (“Such ruses are acts which are intended to mislead an adversary or to induce him to act recklessly but which infringe no rule of international law applicable in armed conflict and which are not perfidious because they do not invite the confidence of an adversary with respect to protection under that law.”). *Refer to* § 5.22.1 (Definition of Perfidy).

<sup>787</sup> *Refer to* § 5.4.6.1 (Surprise Attacks).

<sup>788</sup> *For example*, FINAL REPORT ON THE PERSIAN GULF WAR 247 (“CINCCENT [Commander-in-Chief, U.S. Central Command] placed a high priority on deception operations which were intended to convince Iraq that the main attack would be directly into Kuwait, supported by an amphibious assault. All components contributed to the deception operation. Aggressive ground force patrolling, artillery raids, amphibious feints and ship movements, and air operations all were part of CINCCENT’s orchestrated deception operation.”); SPAIGHT, AIR POWER AND WAR RIGHTS 185 (“‘The greatest hoax in military history’ was the description officially applied to the scheme of deception used to induce the Germans to believe that the invasion of the Continent in June, 1944, was coming in the Pas de Calais and not in Normandy. It was carried out by a force of 105 aircraft of the R.A.F., by 34 ships of the Royal Navy, and by ‘R.C.M.’ (Radio Counter-Measures). On the night of 5 June, 18 small ships of the Navy steamed towards Cap d’Antifer to give the impression of an intended landing, while a bomber squadron, No. 617, under G/Capt. G. L. Chesire, V.C., circled over them, dropping bundles of ‘Window,’ the thin metallised strips which produce false echoes on the enemy’s radar screens and so confuse their plotting. Another squadron, No. 218, with 16 ships, made a similar feint towards Boulogne, and other methods of deception were practised elsewhere

- baiting the enemy into a trap; or
- distracting or disorienting the enemy;
- inducing enemy forces to waste their resources;
- inducing enemy forces to surrender by falsely alleging military superiority;
- provoking friendly fire among enemy forces; or
- causing confusion among enemy forces.

5.25.1.2 *But That Do Not Infringe Upon Any Rule of International Law Applicable in Armed Conflict.* According to the definition in AP I, *ruses* do not infringe upon any rule of international law applicable in armed conflict. For example, misusing certain signs and symbols would not constitute ruses.<sup>789</sup> Similarly, although fighting in the enemy’s uniform would not be perfidy since enemy military personnel are not generally protected by the law of war, fighting in the enemy’s uniform also would not be a ruse, since such action would infringe upon the rule against improper use of the enemy’s uniform.<sup>790</sup>

5.25.1.3 *And That Are Not Perfidious Because They Do Not Invite the Confidence of an Adversary With Respect to Protection Under That Law.* The ruses described in AP I do not invite the confidence of the enemy with respect to protection under the law of war.<sup>791</sup> For example, pretending to be a civilian would not constitute a ruse, although it may be a permissible deception in certain circumstances.<sup>792</sup>

5.25.1.4 *Ruses – Notes on Terminology.* The term “ruse” is sometimes used as a legal term of art to mean deceptions that are not prohibited by the law of war. In other cases, “ruse” may be used as a factual term to mean a deception that may or may not be prohibited by the law of war, and thus the distinction is made between “lawful” and “unlawful” ruses.<sup>793</sup>

In this manual, the term “ruse” is used to indicate a certain category of permissible deceptions.

5.25.2 *Examples of Ruses.* Often, ruses of war operate by misleading the enemy as to the identity, strength, position, or disposition of one’s own forces. Ruses of war include, but are not

---

along the Channel. The result was that the enemy were led to believe that convoys were moving to points other than that at which the landing was in fact made with complete success and without opposition by air or sea.”).

<sup>789</sup> Refer to § 5.24 (Improper Use of Certain Signs).

<sup>790</sup> Refer to § 5.23.1 (Improper Use of Enemy Flags, Insignia, and Military Uniforms Prohibited).

<sup>791</sup> Refer to § 5.22.1 (Definition of Perfidy).

<sup>792</sup> Refer to § 5.25.3 (Examples of Other Deceptions That Are Not Prohibited).

<sup>793</sup> 1956 FM 27-10 (Change No. 1 1976) ¶50 (“Ruses of war are legitimate so long as they do not involve treachery or perfidy on the party of the belligerent resorting to them.”).

limited to:<sup>794</sup>

- decoys or dummy materials, such as dummy weapons, equipment, ships, aircraft, and buildings;<sup>795</sup>
- feigned activity or inactivity, such as
  - simulating quiet;
  - feigned flights, retreats, attacks, marches,<sup>796</sup> movements (*e.g.*, approaching a destination indirectly<sup>797</sup>), supply movements, operations, withdrawals, or camp;
- mimicking other friendly forces;<sup>798</sup>
- camouflage or deceptive lighting;<sup>799</sup>
- removing or altering identifying information, including moving identifying landmarks;
- planting false information in a manner that allows enemy forces to intercept it,<sup>800</sup> such as

---

<sup>794</sup> Consider AP I art. 37 (giving as examples of lawful ruses “the use of camouflage, decoys, mock operations and misinformation”).

<sup>795</sup> For example, SPAIGHT, WAR RIGHTS ON LAND 153-54 (“The ‘Quaker guns’—logs shaped like ordinary cannon and mounted on wheels—which the Confederates used at Vicksburg to induce the besieging Federals to credit them with an heavier armament than they possessed...[were a] legitimate ruse[] of war.”).

<sup>796</sup> For example, SPAIGHT, AIR POWER AND WAR RIGHTS 186 (“The ruse of reversing temporarily the direction of a march was used on both sides in the first world war. ‘Aeroplane observers can easily be deceived by a body of the enemy who, on sighting the aeroplane, move at once in a contrary direction to that of the real march, and turn back as soon as the machine has gone to give the news.’...[A] Turkish order which was captured in the Kara Tepe operations in Mesopotamia in December, 1917, instruct[ed] the Turkish infantry to try to deceive the British aeroplanes by setting out at once upon the march towards Jebel Hamrin if the aeroplanes came into sight and only to return to Kara Tepe upon the withdrawal of the aeroplanes.”).

<sup>797</sup> For example, SPAIGHT, AIR POWER AND WAR RIGHTS 187 (“The outstanding example of the technique of indirect approach is to be found in the raid on Munich on the night of 24 April, 1944. A force of Lancasters left England in the evening and made for north Italy; they crossed the French Alps and flew nearly to Milan; then they suddenly changed direction to the north-east and flew to Munich, which was heavily bombed. The feint took the Germans completely by surprise and the raiders’ losses were extremely low. The bewilderment of the defences was increased by the fact that Karlsruhe was attacked, after direct approach, on the same night.”).

<sup>798</sup> Refer to § 5.25.2.1 (Mimicking Other Friendly Forces).

<sup>799</sup> For example, SPAIGHT, WAR RIGHTS ON LAND 154 (“The concealment of cannon in deftly arranged branches or brushwood is a common device of gunners, but the Japanese reached a dizzy and dramatic height of stratagem when they actually transformed the face of nature as a means of masking their batteries. On the night before the battle of the Yalu they transplanted trees to hide the tell-tale discharge of their artillery, choosing those growing either directly in front or directly behind the entrenchment that was to be concealed. Thus next morning the landscape appeared unchanged from the Russian side of the river, as the fact that a tree of a particular shape had advanced or retired 200 or 300 yards during the night was naturally imperceptible.”) (internal quotations omitted).

<sup>800</sup> For example, ALBERT N. GARLAND & HOWARD M. SMYTH, SICILY AND THE SURRENDER OF ITALY 64-65 (1993) (“One part of this plan, known as Operation Mincemeat, was designed to convince the enemy high command that the objectives of the impending Allied offensive in the Mediterranean were Sardinia and the Peloponnesus rather than Sicily. The plan itself was simple but highly imaginative. With painstaking care a counterfeit letter from

through the use of

- false messages among one's own forces;
- intensifying or minimizing message traffic; or
- bogus messages, dispatches, or newspapers;
- lying in the course of a POW interrogation in answering questions where no obligation to answer correctly exists;
- feigning enemy military status by using enemy flags, insignia, or military uniforms outside of combat;<sup>801</sup> or
- using enemy codes, signals, or passwords.<sup>802</sup>

5.25.2.1 *Mimicking Other Friendly Forces*. It is a permissible ruse of war for combatant forces to mimic other friendly forces. For example, small forces may simulate larger units.<sup>803</sup> Units of one type may pretend to be units of another type.<sup>804</sup> Markings that identify equipment or personnel as belonging to a particular unit may be removed. Individuals or units may also dress like friendly forces.<sup>805</sup>

---

'Archie Nye' of the British War Office in London was drawn up...[i]ndicating that a feint against Sicily would be a deception maneuver to screen an invasion of Sardinia.... To get this letter into Axis hands, British intelligence obtained with great difficulty the body of a service man who had been a victim of pneumonia.... With a courier's briefcase realistically chained to the wrist, the body was cast adrift at a predesignated spot where tide and current would carry it to [the Axis-controlled] shore.... The information reached the Germans who accepted it as authentic.'").

<sup>801</sup> Refer to § 5.23.1.3 (Deceptive Use of Enemy Flags, Insignia, and Military Uniforms Outside of Combat).

<sup>802</sup> Refer to § 5.23.1.5 (Use of Enemy Codes, Passwords, and Countersigns Not Restricted).

<sup>803</sup> For example, HUGH M. COLE, *THE LORRAINE CAMPAIGN* 162 (1993) ("General Walker asked for a 'deception team' to simulate a stronger force in the cavalry sector. This team finally arrived from 12th Army Group headquarters and operated for some weeks in the area as an 'armored division.' (The Germans seem to have been well deceived for the OB WEST maps show the '14th Armored Division' in this area.)").

<sup>804</sup> For example, R. FRANK FUTRELL, ET AL., *ACES AND AERIAL VICTORIES: THE UNITED STATES AIR FORCE IN SOUTHEAST ASIA 1965-1973*, 37-43 (1976) ("The West Force used an elaborate ruse to make the Phantoms appear to the enemy as an F-105 Rolling Thunder strike force. The F4C's used F-105 tanker anchors, refueling altitudes, approach routes, approach altitudes, airspeeds, and radio call signs and communications to simulate a normal Thunderchief strike force. This was intended to deceive the enemy on NVN [North Vietnamese] radars. ... An opportunity to perpetuate another ruse presented itself a few days later, when RF-4C weather reconnaissance aircraft were forced to abort their planned weather reconnaissance missions in North Vietnam because of MIG attacks on 3 and 4 January 1967. To lure the MIG's into the air, two F4C's on the following day flew, in close formation, a route similar to that normally flown by weather reconnaissance aircraft. The intent of the F4C's was to deceive the enemy radar operators into believing that only one aircraft was flying a weather reconnaissance mission.'").

<sup>805</sup> For example, W. Hays Parks, *Special Forces' Wear of Non-Standard Uniform*, 4 *CHICAGO JOURNAL OF INTERNATIONAL LAW* 493, 554 (2003) ("In response to the September 11, 2001 al Qaeda terrorist attacks against the World Trade Center and the Pentagon, US and Coalition Special Forces began operations in Afghanistan in late September 2001. At the request—initially insistence—of the leaders of the indigenous forces they supported, they dressed in indigenous attire. For identification purposes within the Northern Alliance, this included the Massoud

5.25.3 Examples of Other Deceptions That Are Not Prohibited. Certain deceptions may not meet the definition of “ruses” because they may invite the confidence of an adversary with respect to protection under the law of war. Nevertheless, these deceptions are not technically prohibited by the law of war, even though, in some cases, they may expose the persons performing them to liability under an enemy State’s domestic law.<sup>806</sup> These include:

- feigning incapacitation or death in order to escape the enemy,<sup>807</sup> such as
  - a soldier who feigns death in the hope that he or she will be left alone by enemy forces, permitting him or her subsequently to take evasive actions to return to friendly forces without engaging the enemy;<sup>808</sup> and
  - an aircraft crew that feigns loss of control and the appearance that the aircraft was about to crash in order to dissuade further enemy attack and to break contact with enemy forces;<sup>809</sup>
- feigning civilian status to facilitate spying or sabotage, such as
  - false use of journalist credentials; and
- using an informal ceasefire for the purpose of collecting wounded and dead and to withdraw unseen by the enemy.<sup>810</sup>

---

pakol (a round brownish-tan or gray wool cap) and Massoud checkered scarf, each named for former Northern Alliance leader Ahmad Shah Massoud, who was assassinated days before the al Qaeda attacks on the World Trade Center and Pentagon. This attire was not worn to appear as civilians, or to blend in with the civilian population, but rather to lower the visibility of US forces vis-à-vis the forces they supported.”).

<sup>806</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>807</sup> ICRC AP COMMENTARY 438 (¶1505) (“[P]erfidious use always involves the abuse of the adversary’s confidence. Thus, for example, feigning death simply to save one’s life would not be an act of perfidy, while feigning death to kill an enemy once his back is turned, would constitute an act of perfidy.”).

<sup>808</sup> For example, SPAIGHT, AIR POWER AND WAR RIGHTS 173 (“A ruse which is mentioned by Major C. J. Biddle, American Aviation, appears to have been a legitimate one. An American pilot was forced down in the German lines. ‘When he landed he left his motor turning over slowly and lay over in his cockpit, as though he had been shot, the Huns all the time circling above his head. They evidently thought he was done for, for after looking him over they flew away, whereupon our pilot took off and came home.”).

<sup>809</sup> SPAIGHT, AIR POWER AND WAR RIGHTS 170-71 (“The chief ruse practised in air fighting in the first world war was the vertical nose-dive or spin, used by a pilot who was outfought or outnumbered, or whose gun had jammed or engine failed, to escape by simulating a fall out of control.”).

<sup>810</sup> For example, 1958 UK MANUAL ¶319 note 1 (“[A]t 1 p.m. on 7th March, 1905, during the battle of Mukden, a group of Russians bearing Red Cross and white flags advanced towards the 1st Japanese Army and asked for a suspension of arms for several hours to remove the wounded and dead. The Japanese agreed, as they themselves had many wounded, but the suspension was made without any formal agreement (*sans entente bien définie*). In the evening, when the Japanese reopened fire, there was no reply and it was found that the Russians had retired during the suspension of arms.”).

## 5.26 NON-FORCIBLE MEANS AND METHODS OF WARFARE

In general, propaganda, information gathering, and bribery are permissible means and methods of warfare.

5.26.1 Propaganda. In general, the use of propaganda is permissible under the law of war, even when it encourages acts that violate an enemy State's domestic law or is directed towards civilian or neutral audiences. However, certain types of propaganda are prohibited.

5.26.1.1 Propaganda – Notes on Terminology. Propaganda has been referred to as psychological warfare, psychological operations (PSYOP), or military information support operations (MISO).<sup>811</sup> The word “propaganda” often has been used with a pejorative connotation to refer to misleading or false statements, but “propaganda” is used in this section without intending any such connotation.

5.26.1.2 Propaganda Generally Permissible. In general, propaganda is a permissible means of warfare.<sup>812</sup> Propaganda has been disseminated through a variety of communications media, including printed materials, loudspeakers, radio or television broadcast, aircraft, or the internet. Propaganda is sometimes used with bribery<sup>813</sup> or to support intelligence gathering.<sup>814</sup> Propaganda may be directed at enemy civilians and neutrals.<sup>815</sup>

Propaganda may encourage enemy persons to commit acts that would violate the domestic law of the enemy State.<sup>816</sup> For example, it would be permissible to encourage enemy

---

<sup>811</sup> Robert Gates, Secretary of Defense, *Memorandum: Changing the Term Psychological Operations (PSYOP) to Military Information Support Operations (MISO)*, OSD 1012-10 (Dec. 3, 2010) (“Since the 1940s, military information activities, undertaken both in wartime and peacetime, have been described as ‘psychological warfare,’ ‘psychological operations,’ or PSYOP. These terms helped draw a useful distinction between lethal military operations, on the one hand, and military efforts to change minds and reduce or prevent conflict through truthful, persuasive information, on the other. Today, however, the term ‘Psychological Operations’ has become anachronistic and misleading. Although PSYOP activities rely on truthful information, credibly conveyed, the term PSYOP tends to connote propaganda, brainwashing, manipulation, and deceit.”).

<sup>812</sup> GREENSPAN, *MODERN LAW OF LAND WARFARE* 323 (“Propaganda must be considered a legal means of warfare, since there are no specific rules of war which forbid its use, nor is it as such incompatible with the existing rules of war.”).

<sup>813</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶5-6 (“In World War I, Austrian airmen dropped leaflets over Italian lines inviting desertion with the promise of compensation for every airplane surrendered intact. In the Korean conflict, an award was offered to any enemy flier who would defect with his plane intact to the United Nations Command. In fact \$100,000 was paid to a North Korean pilot for such a defection.”).

<sup>814</sup> Robert Gates, Secretary of Defense, *Memorandum: Changing the Term Psychological Operations (PSYOP) to Military Information Support Operations (MISO)*, OSD 1012-10 (Dec. 3, 2010) (“In Iraq and Afghanistan, U.S. military information programs urging civilians to report possible insurgent activity led to valuable information, enabling our forces to disarm hundreds of improvised explosive devices safely and capture numerous key insurgent leaders.”).

<sup>815</sup> *For example*, 1958 UK MANUAL ¶313 note 3 (“In the Second World War both sides established regular wireless services for spreading war news among both the enemy and neutrals. They also resorted on a large scale to propaganda disseminated from aircraft and from the ground.”).

<sup>816</sup> *See* SPAIGHT, *AIR POWER AND WAR RIGHTS* 333 (“To drop a pamphlet inciting to assassination would no doubt be an offence under the laws of war, assassination being forbidden by those laws. It is an entirely different matter

combatants to defect, desert, or surrender.<sup>817</sup> Similarly, it is generally permissible to encourage insurrection among the enemy civilian population.<sup>818</sup>

5.26.1.3 *Prohibited Types of Propaganda.* Propaganda must not: (1) incite violations of the law of war; nor (2) itself violate a law of war rule.

Propaganda must not incite acts that are prohibited by the law of war.<sup>819</sup> For example, propaganda intended to incite attacks against civilians is prohibited. In certain cases, individuals may be liable for instigating or inciting violations of the law of war.<sup>820</sup>

Propaganda is also prohibited when it would violate other law of war rules. For example, it is specifically prohibited for an Occupying Power to use propaganda that aims at securing voluntary enlistment of protected persons in its armed or auxiliary forces.<sup>821</sup> Similarly, it is prohibited to declare that no quarter will be given, and propaganda in the form of a declaration to the adversary that no quarter will be given would be prohibited.<sup>822</sup> In addition, propaganda would be prohibited if it constituted a measure of intimidation or terrorism against the civilian population, such as the threats of violence whose primary purpose is to spread terror among the civilian population.<sup>823</sup> Similarly, propaganda may not be used to subject a detainee to public curiosity or other humiliating or degrading treatment.<sup>824</sup> Additionally, the delivery of the

---

when the act which the message seeks to accomplish is one not repugnant to natural law, not *malum in se*, but merely contrary to the law (because to the interest) of the State affected, or *malum prohibitum*. It cannot be held that to try to persuade a modern civilized nation to change its form of government is to incite to an act of the former category.”).

<sup>817</sup> For example, FINAL REPORT ON THE PERSIAN GULF WAR xxvi (“Coalition strategy also benefitted immensely from psychological operations, the success of which is evidenced primarily by the large number of Iraqi soldiers who deserted Iraqi ranks or surrendered without putting up any resistance during the ground offensive. Our efforts built on, among other factors, the disheartening effect on Iraqi troops of the unanswered and intensive Coalition aerial bombardment, the privations they suffered due to the degradation of the Iraqi logistics system, and the threat of the impending ground campaign. Radio transmissions and leaflets exploited this demoralization by explaining to the Iraqi troops how to surrender and assuring them of humane treatment if they did. More specific messages reduced Iraqi readiness by warning troops to stay away from their equipment (which was vulnerable to attack by precision munitions) and induced desertions by warning troops that their positions were about to be attacked by B-52s.”).

<sup>818</sup> For example, LAUTERPACHT, II OPPENHEIM’S INTERNATIONAL LAW 426-27 (§162a) (“The legitimacy, formerly controversial, of inciting enemy subjects to rise against the Government in power is now no longer disputed. ... While, in the Second World War, both sides established regular wireless services for spreading war news among both the enemy and the neutrals, the Allies resorted on a large scale to propaganda disseminated from aircraft as a means of inducing the population of Germany to remove a dictatorial régime which, it was asserted, was solely responsible for the war.”).

<sup>819</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶5-6 (“Propaganda which would incite illegal acts of warfare, as for example killing civilians, killing or wounding by treachery or the use of poison or poisonous weapons, is forbidden.”).

<sup>820</sup> Refer to § 18.23.2 (Instigating or Directly Inciting).

<sup>821</sup> Refer to § 11.20.1.1 (Prohibition on Compulsory Service in an Occupying Power’s Armed Forces).

<sup>822</sup> Refer to § 5.4.7 (Prohibition Against Declaring That No Quarter Be Given).

<sup>823</sup> Refer to § 10.5.3.2 (Collective Penalties and Measures of Intimidation or Terrorism).

<sup>824</sup> Refer to § 8.2.2 (Protection Against Humiliating or Degrading Treatment).

propaganda should be consistent with other law of war obligations.<sup>825</sup>

5.26.2 Information Gathering. The employment of measures necessary for obtaining information about the enemy and their country is considered permissible.<sup>826</sup>

Information gathering measures, however, may not violate specific law of war rules.<sup>827</sup> For example, it would be unlawful, of course, to use torture or abuse to interrogate detainees for purposes of gathering information. Similarly, it is prohibited to make improper use of a flag of truce to obtain information.<sup>828</sup>

Some forms of deception used to gather information, although not prohibited by the law of war, may put the persons engaging in them at risk of being treated as spies.<sup>829</sup>

5.26.3 Bribery or Offering of Rewards. In general, it is permissible to offer rewards for assistance in the conduct of hostilities, including rewards intended to corrupt enemy combatants or civilians.<sup>830</sup> Rewards, however, may not be offered for the commission of violations of the law of war, and rewards may not be offered for the killing of enemy persons.

5.26.3.1 Prohibition on Offering Rewards for Enemy Persons Dead or Alive. It is forbidden to place a price on the head of enemy persons or to offer a reward for enemy persons “dead or alive.”<sup>831</sup> Such actions encourage the denial of quarter or encourage private persons to take up arms whose participation in hostilities is often undisciplined and associated with the commission of war crimes.<sup>832</sup> This prohibition extends to offers of rewards for the killing or wounding of all enemies, including specific individuals or a class of enemy persons (*e.g.*, officers).

However, this rule would not prohibit offering rewards for the capture of unharmed enemy personnel generally or of particular enemy personnel.<sup>833</sup> Similarly, this rule does not

---

<sup>825</sup> See, *e.g.*, GREENSPAN, MODERN LAW OF LAND WARFARE 324 (“It would appear to be improper to induce enemy nationals to listen to propaganda emanating from the opposing side by such methods as doling out a few names of prisoners of war on the occasion of each broadcast and deliberately holding other next of kin in suspense, instead of transmitting such information by the most rapid means possible.”).

<sup>826</sup> HAGUE IV REG. 24 (“[T]he employment of measures necessary for obtaining information about the enemy and the country are considered permissible.”).

<sup>827</sup> GREENSPAN, MODERN LAW OF LAND WARFARE 325 (“In obtaining information, a belligerent must not contravene specific rules of war.”).

<sup>828</sup> Refer to § 5.24.7 (Flags of Truce).

<sup>829</sup> Refer to § 4.17 (Spies, Saboteurs, and Other Persons Engaging in Similar Acts Behind Enemy Lines).

<sup>830</sup> 1958 UK MANUAL ¶313 (“It is not unlawful to employ spies; or to corrupt enemy civilians or soldiers by bribes in order to induce them to give information, to desert with or without technical equipment, new weapons, vehicles or aircraft, to surrender, to rebel, or to mutiny; or to give false information to the enemy.”).

<sup>831</sup> 1956 FM 27-10 (Change No. 1 1976) ¶31 (Article 23 of the Hague IV Regulations “is construed as prohibiting ... putting a price upon an enemy’s head, as well as offering a reward for an enemy ‘dead or alive.’”).

<sup>832</sup> Refer to § 4.18.3 (Private Persons Who Engage in Hostilities – Lack of the Privileges of Combatant Status).

<sup>833</sup> See 2004 UK MANUAL ¶5.14.1 (“[O]ffers of rewards for the capture unharmed of enemy personnel generally or of particular enemy personnel would be lawful.”).

prohibit offering rewards for information that may be used by combatants to conduct military operations that attack enemy combatants.

#### 5.27 PROHIBITION AGAINST COMPELLING ENEMY NATIONALS TO TAKE PART IN THE OPERATIONS OF WAR DIRECTED AGAINST THEIR OWN COUNTRY

During international armed conflict, it is prohibited to compel the nationals of the hostile party to take part in the operations of war directed against their own country, even if they were in the belligerent's service before the commencement of the war.<sup>834</sup> Underlying this prohibition is the principle that States must not compel foreign nationals to commit treason or otherwise to violate their allegiance to their country.<sup>835</sup>

Additional restrictions are applicable with respect to POWs, retained personnel, protected persons in the home territory of a belligerent, and protected persons in occupied territory.<sup>836</sup>

5.27.1 Compel. This prohibition applies to attempts to compel enemy nationals, rather than measures short of compulsion, such as bribing enemy nationals or seeking to influence them through propaganda.<sup>837</sup> However, it is specifically prohibited for an Occupying Power to use propaganda that aims at securing voluntary enlistment of protected persons in its armed or auxiliary forces.<sup>838</sup>

5.27.2 Nationals of a Hostile Party ... Against Their Own Country. This rule applies to nationals of a hostile party; States are not prohibited by the law of war from compelling their nationals to serve in the armed forces.<sup>839</sup> Similarly, this rule would not prohibit States from

---

<sup>834</sup> HAGUE IV REG. art. 23 (“A belligerent is likewise forbidden to compel the nationals of the hostile party to take part in the operations of war directed against their own country, even if they were in the belligerent’s service before the commencement of the war.”).

<sup>835</sup> See *Johnson v. Eisentrager*, 339 U.S. 763, 773 (1950) (“The United States does not invoke this enemy allegiance only for its own interest, but respects it also when to the enemy’s advantage. In World War I, our conscription act did not subject the alien enemy to compulsory military service. 40 Stat. 885, c. XII, § 4. The Selective Service Act of 1948, 62 Stat. 604, 50 U.S.C. Appendix, § 454(a), exempts aliens who have not formally declared their intention to become citizens from military training, service and registration, if they make application, but if so relieved, they are barred from becoming citizens. Thus, the alien enemy status carries important immunities, as well as disadvantages. The United States does not ask him to violate his allegiance or to commit treason toward his own country for the sake of ours. This also is the doctrine and the practice of other states comprising our Western Civilization.”).

<sup>836</sup> Refer to § 9.19.2.3 (Labor Assignments That May Be Compelled); § 7.9.5.6 (No Other Compulsory Duties); § 10.7.3 (Compulsory Work for Protected Persons in a Belligerent’s Home Territory); § 11.20.1.1 (Prohibition on Compulsory Service in an Occupying Power’s Armed Forces).

<sup>837</sup> *United States v. Weizsaecker, et al. (The Ministries Case)*, XIV TRIALS OF WAR CRIMINALS BEFORE THE NMT 549 (“As the war progressed Germany suffered severe losses of manpower. It adopted conscription as to its own nationals and in many instances of foreign nationals living within its borders. We hold that it is not illegal to recruit prisoners of war who volunteer to fight against their own country, but pressure or coercion to compel such persons to enter into the armed services obviously violates international law.”). Refer to § 5.26.1 (Propaganda); § 5.26.3 (Bribery or Offering of Rewards).

<sup>838</sup> Refer to § 11.20.1.1 (Prohibition on Compulsory Service in an Occupying Power’s Armed Forces).

<sup>839</sup> Refer to § 4.5.2.4 (Draftees).

compelling persons to betray an allegiance to a non-State armed group during non-international armed conflict.<sup>840</sup>

---

<sup>840</sup> *Refer to § 17.12.1 (Compelling Captured or Surrendered Enemy Personnel to Take Part in the Conflict).*

#### 6.1 INTRODUCTION

This Chapter addresses the legal review of new weapons and legal rules specific to certain types of weapons, including whether certain weapons are illegal *per se*, specific rules for the use of certain other weapons, and obligations that may arise after certain weapons are used.

In addition to the law of war, other law, policy, and regulation may apply to certain weapons. Such law, policy, or regulation may include arms control agreements, U.S. domestic law, U.S. policy, applicable rules of engagement, and other military orders. This Chapter notes some provisions of such law, policy, and regulation where relevant, but does not seek to address exhaustively all of them.<sup>1</sup> In advising on the legality of specific weapons, one must take care to identify all applicable restrictions and not rely unduly on the absence of discussion in this Chapter as reflecting the absence of any such restrictions.

6.1.1 Legality of the Weapon Itself (Per Se) Distinguished From the Legality of the Use of the Weapon. A weapon may be illegal *per se* if a treaty to which the United States is a Party

---

<sup>1</sup> Refer to § 1.2.2.4 (Citation of Policies and Regulations).

or customary international law has prohibited its use under all circumstances.<sup>2</sup> For example, the use of “blinding laser” weapons is prohibited, regardless of how they are used.<sup>3</sup>

On the other hand, most weapons are not illegal *per se*. That is, their use may be lawful in some circumstances, although unlawful in others, such as if they are used to attack combatants placed *hors de combat*.<sup>4</sup>

Law of war issues related to targeting (*e.g.*, the requirement that an attack may only be directed against a military objective) generally are not determinative of the lawfulness of a weapon. However, weapons that are inherently indiscriminate are prohibited.<sup>5</sup> In addition, certain weapons, such as mines, are subject to specific rules on their use in order to reduce the risk of harm to the civilian population.<sup>6</sup>

## 6.2 DoD POLICY OF REVIEWING THE LEGALITY OF WEAPONS

As provided in DoD issuances, DoD policy for many years has required the legal review of the intended acquisition or procurement of weapons or weapon systems; this review includes ensuring that such acquisition or procurement is consistent with the law of war.<sup>7</sup> These DoD policy requirements have been implemented in Military Department regulations.<sup>8</sup>

The fact that the legality of a weapon is discussed in this manual does not obviate the

---

<sup>2</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-2 (“A weapon may be illegal *per se* if either international custom or treaty has forbidden its use under all circumstances.”). Refer to § 6.4.2 (Specifically Prohibited Types of Weapons).

<sup>3</sup> Refer to § 6.15.1 (Prohibition on “Blinding Laser” Weapons).

<sup>4</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

<sup>5</sup> Refer to § 6.7 (Inherently Indiscriminate Weapons).

<sup>6</sup> Refer to § 6.12.5.3 (Obligation to Take Feasible Precautions to Protect Civilians From the Effects of Mines, Booby-Traps, and Other Devices).

<sup>7</sup> For example, DoD DIRECTIVE 5000.01, *The Defense Acquisition System*, ¶E1.1.15 (May 12, 2003, certified current as of Nov. 20, 2007) (“The acquisition and procurement of DoD weapons and weapon systems shall be consistent with all applicable domestic law and treaties and international agreements (for arms control agreements, see DoD Directive 2060.1 (Reference (m), customary international law, and the law of armed conflict (also known as the laws and customs of war)[]). An attorney authorized to conduct such legal reviews in the Department shall conduct the legal review of the intended acquisition of weapons or weapons systems.”); DoD DIRECTIVE 5000.01, *The Defense Acquisition System*, ¶4.2.10 (Mar. 15, 1996, cancelled by DoD Directive 5000.1 Oct. 23, 2000) (“DoD acquisition and procurement of weapons shall be consistent with *applicable domestic law and all applicable treaties, customary international law, and the law of armed conflict (also known as the laws and customs of war).*”); DoD INSTRUCTION 5500.15, *Review of Legality of Weapons Under International Law*, ¶II (Oct. 16, 1974, cancelled by DoD Instruction 5000.2 Feb. 23, 1991) (“All actions of the Department of Defense with respect to the acquisition and procurement of weapons, and their intended use in armed conflict, shall be consistent with the obligations assumed by the United States Government under all applicable treaties, with customary international law, and, in particular, with the laws of war.”).

<sup>8</sup> For example, DEPARTMENT OF THE ARMY REGULATION 27-53, *Review of Legality of Weapons Under International Law* (Jan. 1, 1979); SECRETARY OF THE NAVY INSTRUCTION 5000.2E, *Department of the Navy Implementation and Operation of the Defense Acquisition System and the Joint Capabilities Integration and Development System* (Sept. 1, 2011); DEPARTMENT OF THE AIR FORCE INSTRUCTION 51-402, *Legal Reviews of Weapons and Cyber Capabilities* (Jul. 27, 2011).

requirement under applicable directives or regulations for a legal review of a weapon or weapon system that is to be acquired or procured.

6.2.1 Review of New Types of Weapons. The development of new types of weapons has often resulted in public denunciation of their allegedly cruel effects and in attempts to prohibit their use in armed conflict.<sup>9</sup> This has been true of the crossbow, siege engines for hurling projectiles, firearms, gunpowder, bayonets, and other weapons that have since been widely recognized as not prohibited by the law of war.

Like other aspects of the law of war, the rules relating to weapons are generally characterized as prohibitive law forbidding certain weapons or the use of weapons in certain instances rather than positive law authorizing the weapon or its use.<sup>10</sup> The lawfulness of the use of a type of weapon does not depend on the presence or absence of authorization, but, on the contrary, on whether the weapon is prohibited.<sup>11</sup> Thus, the mere fact that a weapon is novel or employs new technology does not mean that the weapon is illegal.<sup>12</sup> The law of war does not require States to establish a general practice of using a weapon before it is to be regarded as legal. Moreover, it would appear absurd to suggest that a new type of weapon should automatically be prohibited because there is no State practice supporting such use, or to suggest that States must continue using a weapon in each conflict simply to maintain its legality.

6.2.2 Questions Considered in the Legal Review of Weapons for Consistency With U.S. Law of War Obligations. The review of the acquisition or procurement of a weapon for consistency with U.S. law of war obligations should consider three questions to determine whether the weapon's acquisition or procurement is prohibited:

- whether the weapon's intended use is calculated to cause superfluous injury;<sup>13</sup>
- whether the weapon is inherently indiscriminate;<sup>14</sup> and
- whether the weapon falls within a class of weapons that has been specifically

---

<sup>9</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-7a (“The development of new weapons or methods of warfare has often resulted in public denunciation of their allegedly cruel effects, and attempts to prohibit their use in warfare. This has been true of the crossbow, siege engines for hurling projectiles, firearms, gunpowder, bayonets and other less efficient methods of warfare.”).

<sup>10</sup> Refer to § 1.3.3.1 (Law of War as Prohibitive Law).

<sup>11</sup> Legality of the Threat or Use of Nuclear Weapons, Advisory Opinion, 1996 I.C.J. 226, 247 (¶52) (“Nor, however, is there any principle or rule of international law which would make the legality of the threat or use of nuclear weapons or of any other weapons dependent on a specific authorization. State practice shows that the illegality of the use of certain weapons as such does not result from an absence of authorization but, on the contrary, is formulated in terms of prohibition.”).

<sup>12</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-7a (“A weapon or method of warfare may not be considered illegal solely because it is new or has not previously been used in warfare.”).

<sup>13</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>14</sup> Refer to § 6.7 (Inherently Indiscriminate Weapons).

prohibited.<sup>15</sup>

If the weapon is not prohibited, the review should also consider whether there are legal restrictions on the weapon's use that are specific to that type of weapon.<sup>16</sup> If any specific restrictions apply, then the intended concept of employment of the weapon should be reviewed for consistency with those restrictions.

Lastly, it may be appropriate to advise whether other measures should be taken that would assist in ensuring compliance with law of war obligations related to the type of weapon being acquired or procured. For example, it may be appropriate to advise on the need for training programs and other practical measures, such as promulgating doctrine and rules of engagement related to that type of weapon.<sup>17</sup>

6.2.3 AP I Requirement for Legal Review of a New Weapon, Means, or Method of Warfare. Article 36 of AP I provides:

In the study, development, acquisition or adoption of a new weapon, means or method of warfare, a High Contracting Party is under an obligation to determine whether its employment would, in some or all circumstances, be prohibited by this Protocol or by any other rule of international law applicable to the High Contracting Party.

The DoD policy and practice of conducting legal reviews of weapons preceded this AP I provision.<sup>18</sup>

6.2.4 Policy and Processes for Review of Applicable Arms Control Obligations. DoD has had a separate, but complementary, policy and practice requiring review of its activities (*e.g.*, research, development, and testing of weapons) to ensure that these activities are consistent with the arms control agreements to which the United States is a Party.<sup>19</sup>

---

<sup>15</sup> Refer to § 6.4.2 (Specifically Prohibited Types of Weapons).

<sup>16</sup> Refer to § 6.5.1 (Certain Types of Weapons With Specific Rules on Use).

<sup>17</sup> Refer to § 6.15.2 (Feasible Precautions in the Employment of Laser Systems to Avoid the Incident of Permanent Blindness).

<sup>18</sup> For example, DOD INSTRUCTION 5500.15, *Review of Legality of Weapons Under International Law*, ¶II (Oct. 16, 1974, cancelled by DoD Instruction 5000.2 Feb. 23, 1991) (“All actions of the Department of Defense with respect to the acquisition and procurement of weapons, and their intended use in armed conflict, shall be consistent with the obligations assumed by the United States Government under all applicable treaties, with customary international law, and, in particular, with the laws of war.”).

<sup>19</sup> DOD DIRECTIVE 2060.1, *Implementation of, and Compliance with, Arms Control Agreements*, ¶4.6.7 (Jan. 9, 2001, certified current Nov. 24, 2003) (“For specific DoD-planned activities, [Heads of DoD components are to] seek clearance from the USD(AT&L), through the appropriate CRG [Compliance Review Group], on a timely basis, before taking any action, including but not limited to research, tests, development, exercises and operations that reasonably raises an issue of DoD compliance with an arms control agreement. For other compliance issues requiring resolution (such as those arising from an on-site inspection), seek resolution from the USD(AT&L), through the appropriate CRG. When there is doubt whether clearance or resolution is necessary, it shall be sought. If the issue involves a DoD SAP [Special Access Program], contact the Director of the cognizant DoD SAP Central

### 6.3 OTHER PRACTICES TO HELP IMPLEMENT LAW OF WAR OBLIGATIONS WITH RESPECT TO WEAPONS

A number of practices contribute to the effective implementation of law of war obligations with respect to weapons (although these practices are not necessarily required by the law of war): (1) using weapons in accordance with their design intent and the doctrine that has been promulgated for their use; (2) refraining from modifying weapons without proper authorization; (3) refraining from using personal firearms during military operations; and (4) refraining from using captured weapons in combat, except on a field-expedient basis.

6.3.1 Using Weapons in Accordance With Their Design Intent and Promulgated Doctrine. The use of weapons in accordance with their design intent and the doctrine that has been promulgated for their use contributes to compliance with law of war obligations with respect to weapons because the legality of the weapon would have been reviewed based on its intended use.<sup>20</sup> However, the use of weapons outside their design intent does not necessarily violate the law of war.

Certain weapon systems may also be subject to law of war restrictions on how they are to be used, such as incendiary weapons or mines.<sup>21</sup> In such cases, the use of the weapon in accordance with doctrine and policy is required by international law because that doctrine and policy incorporates certain international obligations.

6.3.1.1 Using Weapons for Purposes Other Than Those for Which a Weapon or Tool Is Designed. Although in some cases military orders may restrict the use of certain weapons to only certain authorized purposes, there is not a law of war rule that requires that weapons or tools only be used for the purposes for which they were designed.

For example, an entrenching tool may be designed for digging fighting positions. However, its use as a weapon is not prohibited by the law of war.<sup>22</sup> Similarly, it is not prohibited to use a laser that is not designed to blind enemy persons as a weapon to blind an attacking enemy.<sup>23</sup> It also generally would not be prohibited to use a weapon that has been designed to destroy enemy material, such as a large-caliber machine gun, against enemy personnel.<sup>24</sup>

6.3.2 Refraining From Modifying Weapons Without Proper Authorization. For a variety of reasons, DoD practice has been not to permit the modification of weapons without proper authorization.

---

Office and the Chairman of the DoD SAP Senior Review Group (SRG). The SRG Chairman will effect coordination with the appropriate CRG.”).

<sup>20</sup> Refer to § 6.6.3.4 (Superfluous Injury Rule – the Circumstances to Be Assessed and Design Intent); § 6.7.2 (Inherently Indiscriminate Weapons – Circumstances to Be Assessed and Design Intent).

<sup>21</sup> Refer to § 6.5.1 (Certain Types of Weapons With Specific Rules on Use).

<sup>22</sup> Refer to § 6.5.3.2 (Use of Tools to Stab or Cut).

<sup>23</sup> Refer to § 6.15.2.1 (Use of Non-Prohibited Laser Systems to Blind Is Not Absolutely Prohibited).

<sup>24</sup> Refer to § 6.5.4.7 (Anti-Personnel Use of Larger (e.g., .50) Caliber Guns or Cannons).

In particular, weapons must not be modified in the field for the purposes of aggravating the harm inflicted on incapacitated persons.<sup>25</sup> For example, substances designed to inflame wounds must not be added to bullets or edged weapons for the purpose of making wounds more painful or difficult to treat.

**6.3.3 Refraining From the Use of Personal Firearms and Ammunition.** DoD personnel have normally not been permitted to deploy with, or use, personal firearms or ammunition during military operations.<sup>26</sup> This practice is based on a variety of reasons, including to help ensure compliance with the law of war and U.S. domestic law.

**6.3.4 Refraining From the Use of Captured Weapons, Except on a Field-Expedient Basis.** Under DoD practice, captured or other foreign weapons have been used on a field-expedient basis, but otherwise have not been used in combat unless they have undergone the required legal review and have been duly issued to personnel.

Any weapon, ammunition, or munition captured, found, or recovered on the battlefield by DoD personnel is the property of the United States and not the individual who recovered it, regardless of whether the property is of U.S., enemy, allied, or unknown origin.<sup>27</sup>

## 6.4 PROHIBITED WEAPONS

Two general prohibitions apply to all types of weapons. In addition, certain types of weapons are specifically prohibited.

**6.4.1 General Prohibitions Applicable to All Types of Weapons.** Two fundamental prohibitions based in customary international law apply to all weapons. It is prohibited to use:

- weapons calculated to cause superfluous injury;<sup>28</sup> or
- inherently indiscriminate weapons.<sup>29</sup>

**6.4.2 Specifically Prohibited Types of Weapons.** In addition, the use of the following types of weapons is prohibited by treaty or customary international law:

---

<sup>25</sup> Refer to § 6.6.4 (Weapons Modified for the Purpose of Aggravating the Harm Inflicted on Incapacitated Persons).

<sup>26</sup> For example, General John P. Abizaid, U.S. Central Command, General Order 1B (GO-1B), *Prohibited Activities for U.S. Department of Defense Personnel Present Within the United States Central Command (USCENTCOM) Area of Responsibility (AOR)*, ¶2a (Mar. 13, 2006) (prohibiting “[p]urchase, possession, use or sale of privately owned firearms, ammunition, explosives or the introduction of these items into the USCENTCOM AOR.”); General Tommy R. Franks, U.S. Central Command, General Order 1A (GO-1A), *Prohibited Activities for U.S. Department of Defense Personnel Present Within the United States Central Command (USCENTCOM) AOR*, ¶2a (Dec. 19, 2000) (prohibiting “[p]urchase, possession, use or sale of privately owned firearms, ammunition, explosives, or the introduction of these items into the USCENTCOM AOR.”).

<sup>27</sup> Refer to § 5.17.3 (Enemy Movable Property on the Battlefield (War Booty)).

<sup>28</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>29</sup> Refer to § 6.7 (Inherently Indiscriminate Weapons).

- poison, poisoned weapons, poisonous gases, and other chemical weapons;<sup>30</sup>
- biological weapons;<sup>31</sup>
- certain environmental modification techniques;<sup>32</sup>
- weapons that injure by fragments that are non-detectable by X-rays;<sup>33</sup>
- certain types of mines, booby-traps, and other devices;<sup>34</sup> and
- blinding lasers.<sup>35</sup>

#### 6.4.3 Relationship Between the Specific Prohibitions and the General Prohibitions.

When a specific prohibition on a weapon is viewed as reflecting customary international law, such prohibition may sometimes be viewed as, in effect, a declaration that the weapon is prohibited as one calculated to cause superfluous injury or as one that is inherently indiscriminate.<sup>36</sup>

However, a specific treaty prohibition on a weapon does not necessarily reflect a State Party's view that the weapon is prohibited by customary international law (*e.g.*, that the weapon is calculated to cause superfluous injury or is inherently indiscriminate). For example, the mere prohibition or restriction of a weapon in the CCW or its Protocols does not necessarily reflect the conclusion that the weapon is calculated to cause superfluous injury or is inherently indiscriminate.<sup>37</sup>

### 6.5 LAWFUL WEAPONS

Apart from the categories of weapons described in § 6.4 (Prohibited Weapons), all other types of weapons are lawful for use by the U.S. armed forces; that is, they are not illegal *per se*. In other words, other types of weapons are prohibited only to the extent that they fall under the categories of weapons described in § 6.4 (Prohibited Weapons). For example, a landmine is not

---

<sup>30</sup> Refer to § 6.8 (Poison, Poisoned Weapons, Poisonous Gases, and Other Chemical Weapons).

<sup>31</sup> Refer to § 6.9 (Biological Weapons).

<sup>32</sup> Refer to § 6.10 (Certain Environmental Modification Techniques).

<sup>33</sup> Refer to § 6.11 (Weapons Injuring by Fragments Not Detectable by X-Rays).

<sup>34</sup> Refer to § 6.12.4 (Prohibited Classes of Mines, Booby-Traps, and Other Devices).

<sup>35</sup> Refer to § 6.15.1 (Prohibition on "Blinding Laser" Weapons).

<sup>36</sup> J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Chairman Fulbright, Senate Committee on Foreign Relations, Apr. 5, 1971, 10 INTERNATIONAL LEGAL MATERIALS 1300, 1302 (1971) ("The thrust of the phrase 'harmless to man' made part of the discussion of the rules draws attention to Article 23(e) of the Hague Regulations of 1907, wherein combatants are forbidden to employ weapons 'calculated to cause unnecessary suffering.' However, the provision in Hague Regulation Article 23(a) concerning the prohibition against using poison or poisoned weapons is a special case of this rule since it, in effect, declares that any use of a lethal substance against human beings is, per se, a use which is calculated to cause unnecessary suffering.").

<sup>37</sup> Refer to § 19.21.1.3 (CCW and Customary International Law).

necessarily a legally prohibited weapon; it is only prohibited if it falls under one of the specific classes of prohibited mines listed in § 6.12.4 (Prohibited Classes of Mines, Booby-Traps, and Other Devices).

The rules that apply to the use of all weapons are addressed in § 5.4.2 (Overview of Rules in Conducting Attacks).

6.5.1 Certain Types of Weapons With Specific Rules on Use. Certain types of weapons, however, are subject to specific rules that apply to their use by the U.S. armed forces. These rules may reflect U.S. obligations under international law or national policy. These weapons include:

- mines, booby-traps, and other devices (except certain specific classes of prohibited mines, booby-traps, and other devices);<sup>38</sup>
- cluster munitions;<sup>39</sup>
- incendiary weapons;<sup>40</sup>
- laser weapons (except blinding lasers);<sup>41</sup>
- riot control agents;<sup>42</sup>
- herbicides;<sup>43</sup>
- nuclear weapons;<sup>44</sup> and
- explosive ordnance.<sup>45</sup>

6.5.2 Other Examples of Lawful Weapons. In particular, aside from the rules prohibiting weapons calculated to cause superfluous injury and inherently indiscriminate weapons,<sup>46</sup> there are no law of war rules specifically prohibiting or restricting the following types of weapons by the U.S. armed forces:

---

<sup>38</sup> Refer to § 6.12 (Landmines, Booby-Traps, and Other Devices).

<sup>39</sup> Refer to § 6.13 (Cluster Munitions).

<sup>40</sup> Refer to § 6.14 (Incendiary Weapons).

<sup>41</sup> Refer to § 6.15.2 (Feasible Precautions in the Employment of Laser Systems to Avoid the Incident of Permanent Blindness).

<sup>42</sup> Refer to § 6.16 (Riot Control Agents).

<sup>43</sup> Refer to § 6.17 (Herbicides).

<sup>44</sup> Refer to § 6.18 (Nuclear Weapons).

<sup>45</sup> Refer to § 6.19 (Explosive Ordnance).

<sup>46</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury); § 6.7 (Inherently Indiscriminate Weapons).

- edged or pointed weapons, including weapons with serrated edges or entrenching tools used as weapons;<sup>47</sup>
- small arms, cannons, and other guns, including shotguns, exploding bullets, expanding bullets, suppressors, or large-caliber guns;<sup>48</sup>
- blast weapons;<sup>49</sup>
- fragmentation weapons;<sup>50</sup>
- depleted uranium munitions;<sup>51</sup>
- remotely piloted aircraft;<sup>52</sup>
- autonomy in weapons systems;<sup>53</sup> and
- non-lethal weapons.<sup>54</sup>

6.5.3 Edged or Pointed Weapons. Stabbing or cutting weapons (*e.g.*, knives, bayonets, swords, lances, and tomahawks) are not specifically prohibited or restricted by the law of war. Like other weapons, however, they must not be calculated to cause superfluous injury.<sup>55</sup> Thus, it is prohibited to modify the weapon for the purpose of making wounds more difficult to treat, such as by adding a barbed head to a lance or by applying to the blade or point a poison or substance that is designed to inflame wounds.<sup>56</sup>

6.5.3.1 Serrated Edges. The law of war does not prohibit the use of serrated-edged weapons by military forces, including against enemy personnel.

Many bayonets or knives have a serrated edge (a formation resembling the toothed edge of a saw). Provided that the design intent of the serrated edge is not to aggravate suffering unnecessarily, such as by making the wound more difficult to treat, the serrated edge is not prohibited. For example, a serrated edge may improve the capabilities of the blade as a multi-purpose field utility tool, rather than be intended to increase the pain and suffering of enemy personnel injured by the blade.

<sup>47</sup> Refer to § 6.5.3 (Edged or Pointed Weapons).

<sup>48</sup> Refer to § 6.5.4 (Small Arms, Cannons, and Other Guns).

<sup>49</sup> Refer to § 6.5.5 (Blast Weapons).

<sup>50</sup> Refer to § 6.5.6 (Fragmentation Weapons).

<sup>51</sup> Refer to § 6.5.7 (Depleted Uranium Munitions).

<sup>52</sup> Refer to § 6.5.8 (Remotely Piloted Aircraft).

<sup>53</sup> Refer to § 6.5.9 (Autonomy in Weapon Systems).

<sup>54</sup> Refer to § 6.5.10 (Non-Lethal (Less-Lethal) Weapons).

<sup>55</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>56</sup> Refer to § 6.6.4 (Weapons Modified for the Purpose of Aggravating the Harm Inflicted on Incapacitated Persons).

6.5.3.2 *Use of Tools to Stab or Cut*. Edged tools, such as over-size knives, machetes, and entrenching tools, have often been employed both as tools and as weapons. Such tools are not prohibited by the law of war, and the law of war does not prohibit the use of tools as weapons to bludgeon, stab, or cut.

6.5.4 *Small Arms, Cannons, and Other Guns*. Small arms, cannons, and other guns are not specifically restricted or prohibited by the law of war. In particular, there are no specific rules against shotguns, exploding bullets, expanding bullets, suppressors, or anti-personnel use of larger caliber guns or cannons.

6.5.4.1 *Small Arms, Cannons, and Other Guns – Other Rules on Weapons, as Applicable*. Although no law of war rule regulates small arms, cannons, and other guns as a specific category, these weapons are subject to other law of war rules on weapons, as applicable.

For example, the use of ammunition, the primary effect of which is to injure by fragments that in the human body escape detection by X-rays, is prohibited.<sup>57</sup> In addition, poison must not be added to bullets or other projectiles.<sup>58</sup> As with other weapons, small arms, cannons, and other guns must not be calculated to cause superfluous injury.<sup>59</sup> For example, modifying guns or ammunition for the purpose of aggravating the harm inflicted upon incapacitated persons would be prohibited (*e.g.*, adding a substance to bullets with the intent to inflame wounds).<sup>60</sup>

Guns that fall under the definition of incendiary weapons would be regulated as incendiary weapons.<sup>61</sup> However, tracer ammunition is not an “incendiary weapon” because any incendiary effects are incidental.<sup>62</sup> In addition, even certain projectiles designed to have incendiary effects that are combined with other effects (*e.g.*, penetration, blast, or fragmentation effects) would not be regulated as incendiary weapons.<sup>63</sup>

6.5.4.2 *Shotguns*. There is no law of war prohibition on the use (including anti-personnel use) of the shotgun in combat.<sup>64</sup> The fact that multiple fragments are used in many

---

<sup>57</sup> Refer to § 6.11 (Weapons Injuring by Fragments Not Detectable by X-Rays).

<sup>58</sup> Refer to § 6.8.1 (Poison and Poisoned Weapons).

<sup>59</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>60</sup> Refer to § 6.6.4 (Weapons Modified for the Purpose of Aggravating the Harm Inflicted on Incapacitated Persons).

<sup>61</sup> Refer to § 6.14 (Incendiary Weapons).

<sup>62</sup> Refer to § 6.14.1.3 (Excluded From the Definition of Incendiary Weapons – Weapons With Incidental Incendiary Effects).

<sup>63</sup> Refer to § 6.14.1.4 (Excluded From the Definition of Incendiary Weapons – Certain Combined-Effects Munitions).

<sup>64</sup> For example, The Secretary of State to the Swiss Chargé (Oderlin) (Sept. 28, 1918), reprinted in PAPERS RELATING TO THE FOREIGN RELATIONS OF THE UNITED STATES, 1918, SUPPLEMENT 2, THE WORLD WAR 785-86 (1933) (“In reply to the German protest, the Government of the United States has to say that the provision of the Hague convention [*Hague IV Reg. art. 23(e)*], cited in the protest, does not in its opinion forbid the use of this kind of weapon. Moreover, in view of the history of the shotgun as a weapon of warfare, and in view of the well-known effects of its present use, and in the light of a comparison of it with other weapons approved in warfare, the shotgun now in use by the American Army cannot be the subject of legitimate or reasonable protest.”).

shotgun rounds to wound does not prohibit their use.<sup>65</sup>

Shotguns have been used as anti-personnel weapons for close-combat, for guarding enemy prisoners of war, and for anti-materiel purposes during armed conflict for many years.<sup>66</sup> Shotgun munitions may include, for example, buckshot ammunition, flechette ammunition, non-lethal projectiles, and breaching rounds.

Breaching rounds are an anti-materiel munition designed to dislodge door hinges or door locks and are used to enable military forces to enter a room or building. As with other weapons designed for anti-material use, the use of an anti-material round against enemy personnel is not prohibited.<sup>67</sup> For example, a breaching round may be used against an enemy combatant who opens the door or appears in the doorway just as the door is about to be breached.

6.5.4.3 *Exploding Bullets*. The use of exploding bullets, including use against enemy personnel, is not prohibited by the law of war. For example, explosive bullets have been lawfully used during armed conflict, against both enemy material and enemy combatants.<sup>68</sup>

Exploding bullets, like all weapons, however, are subject to the superfluous injury rule.<sup>69</sup> For example, without a valid military reason, bullets that are specifically designed to explode within the human body would be prohibited, since a non-exploding bullet would be just as effective and efficient at incapacitating an enemy combatant.<sup>70</sup>

On the other hand, an explosive bullet that was designed to explode in order to increase the probability of striking an enemy combatant or to strike an enemy combatant behind cover

---

<sup>65</sup> Refer to § 6.5.6 (Fragmentation Weapons).

<sup>66</sup> For example, W. Hays Parks, Special Assistant for Law of War Matters, Office of The Judge Advocate General, U.S. Army, *Joint Service Combat Shotgun Program*, THE ARMY LAWYER 16, 17-18 (Oct. 1997) (“The combat shotgun or military rifle with a shotgun-type munition continued to be used in the United States. In the American Revolution, General George Washington encouraged his troops to load their muskets with ‘buck and ball,’ a load consisting of one standard musket ball and three to six buckshot, in order to increase the probability of achieving a hit. ... United States Air Force security police employed shotguns in base security operations in Saudi Arabia during Operations Desert Shield and Desert Storm (1990-91) to protect them from attack by terrorists or Iraqi military units, and some personnel in British armored units were armed with shotguns as individual weapons during that conflict.”).

<sup>67</sup> Refer to § 6.3.1.1 (Using Weapons for Purposes Other Than Those for Which a Weapon or Tool Is Designed).

<sup>68</sup> For example, SPAIGHT, AIR POWER AND WAR RIGHTS 213 (“In the second world war projectiles of the kind referred to [in the 1868 St. Petersburg Declaration] were freely used by all the belligerent air forces. The explosive bullet gave place to the small cannon shell, but the latter, fired normally from a gun of 20 mm. bore, was equally within the prohibited limit, since its weight was only 130 grammes as compared with the 400 grammes specified in the Declaration. Cannon guns of 40 mm. were also mounted in aircraft and the projectiles were outside the ban. The incendiary bullets used were usually fired from machine guns with bores of .303 inch and .5 inch.”).

<sup>69</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>70</sup> For example, ULYSSES S. GRANT, I PERSONAL MEMOIRS OF U.S. GRANT 538 (1892) (“The enemy used in their defence explosive musket-balls, no doubt thinking that, bursting over our men in the trenches, they would do some execution; but I do not remember a single case where a man was injured by a piece of one of these shells. When they were hit and the ball exploded, the wound was terrible. In these cases a solid ball would have hit as well. Their use is barbarous, because they produce increased suffering without any corresponding advantage to those using them.”).

would not be prohibited.<sup>71</sup> Similarly, bullets that explode in order to neutralize enemy material more effectively are not prohibited, and there is no objection to using these bullets also against enemy combatants.<sup>72</sup>

The United States is not a Party to the 1868 St. Petersburg Declaration on Exploding Bullets, and its prohibition on the use of certain projectiles does not reflect customary international law.<sup>73</sup>

6.5.4.4 *Expanding Bullets*. The law of war does not prohibit the use of bullets that expand or flatten easily in the human body. Like other weapons, such bullets are only prohibited if they are calculated to cause superfluous injury.<sup>74</sup> The U.S. armed forces have used expanding bullets in various counterterrorism and hostage rescue operations, some of which have been conducted in the context of armed conflict.

The 1899 Declaration on Expanding Bullets prohibits the use of expanding bullets in armed conflicts in which all States that are parties to the conflict are also Party to the 1899 Declaration on Expanding Bullets.<sup>75</sup> The United States is not a Party to the 1899 Declaration on Expanding Bullets, in part because evidence was not presented at the diplomatic conference that expanding bullets produced unnecessarily severe or cruel wounds.<sup>76</sup>

---

<sup>71</sup> For example, C. Todd Lopez, *Army wants 36 more "Punisher" weapons in 2012*, ARMY NEWS SERVICE, Feb. 3, 2011 ("The XM25 allows Soldiers to engage defilade targets -- those behind a barrier, protected from oncoming weapons fire. The XM25 measures the distance to the enemy's protective barrier, and can then program the round to detonate a user-adjustable distance past that -- allowing Soldiers to put an air-bursting round directly above the enemy's head, inside their protected area. ... The five prototype weapons entered theater in November, and were first used in combat Dec. 3.").

<sup>72</sup> U.S. RESPONSE TO ICRC CIHL STUDY 524 ("States widely have employed bullets that may detonate on impact with materiel for both anti-materiel and anti-personnel purposes. Such ammunition was in common use by all States that participated in World War II, and in conflicts thereafter including in widespread aircraft strafing of enemy forces, a practice common to every conflict since World War I in which aircraft were employed."). See also Commission of Jurists to Consider and Report Upon the Revision of the Rules of Warfare, *General Report*, Feb. 19, 1923, reprinted in 32 AJIL SUPPLEMENT: OFFICIAL DOCUMENTS 1, 20-21 (1938) ("In the form in which the proposal was first brought forward its provisions were limited to a stipulation that the use of tracer bullets against aircraft generally was not prohibited. Various criticisms were, however, made about the proposed text, chiefly founded on the impracticability for an airman while in flight to change the ammunition which he is using in the machine-gun in his aircraft. He cannot employ different bullets in accordance with the target at which he is aiming, one sort of ammunition for other aircraft and another sort for land forces by whom he may be attacked. The Commission, therefore, came to the conclusion that the most satisfactory solution of the problem would be to state specifically that the use of tracer, incendiary or explosive projectiles by or against aircraft is not prohibited.").

<sup>73</sup> Refer to § 19.6 (1868 St. Petersburg Declaration).

<sup>74</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>75</sup> Refer to § 19.7.1 (1899 Declaration on Expanding Bullets).

<sup>76</sup> William Crozier, Captain of Ordnance, U.S. Army, *Report of Captain Crozier to the American Delegation to the First Hague Conference, Regarding the Work of the First Committee of the Conference and its Subcommittee*, reprinted in INSTRUCTIONS TO THE AMERICAN DELEGATES TO THE HAGUE PEACE CONFERENCES AND THEIR OFFICIAL REPORTS 34 (1916) (noting the objection of the U.S. representative that the 1899 Declaration "condemned by designed implication, without even the introduction of any evidence against it, the use of a bullet actually employed by the army of a civilized nation").

In 2013, a review conducted by DoD in coordination with the Department of State reconfirmed that the prohibition in the 1899 Declaration on Expanding Bullets did not reflect customary international law.<sup>77</sup> The findings of this review were consistent with the longstanding position of the United States not to become a Party to the 1899 Declaration and not to apply a distinct prohibition against expanding bullets, but instead to regard expanding bullets as prohibited only to the extent that such bullets are calculated to cause unnecessary suffering.<sup>78</sup>

In the past, expanding bullets have been viewed as ineffective for military and technical reasons.<sup>79</sup> Non-expanding bullets that were widely used in armed conflict produced wounds comparable to, or more severe than, wounds produced by expanding bullets.<sup>80</sup> In addition,

---

<sup>77</sup> Portions of the analysis in this review are presented in the following paragraphs.

<sup>78</sup> William Crozier, Captain of Ordnance, U.S. Army, *Report of Captain Crozier to the American Delegation to the First Hague Conference, Regarding the Work of the First Committee of the Conference and its Subcommittee*, reprinted in INSTRUCTIONS TO THE AMERICAN DELEGATES TO THE HAGUE PEACE CONFERENCES AND THEIR OFFICIAL REPORTS 33-34 (1916); JAMES BROWN SCOTT, THE PROCEEDINGS OF THE HAGUE PEACE CONFERENCES: III THE CONFERENCE OF 1907 15 (1921) (Brigadier General George B. Davis recalling the U.S. delegation's proposal in 1907 to amend the 1899 Declaration to prohibit 'bullets that inflict unnecessarily cruel wounds'); 1914 RULES OF LAND WARFARE ¶3 note 2 (explaining that the 1899 Declaration "has never been ratified by the United States but see paragraph 'e,' Article XXIII, convention IV, Hague Rules, 1907, infra, par., 184"); U.S. ARMY ORDNANCE, HISTORY OF SMALL-ARMS AMMUNITION, NO. 1940, 15 (1920) ("The Judge Advocate General's Office has given the opinion that the armor-piercing ammunition [with a soft lead nose that mushrooms] is a lawful weapon"); 1934 RULES OF LAND WARFARE ¶34 (1934) (giving no separate rule against expanding bullets, but providing that certain types of bullets may be prohibited under the rule against weapons calculated to cause unnecessary suffering); 1940 RULES OF LAND WARFARE ¶34 (1940) (same); 1956 FM 27-10 (Change No. 1 1976) ¶34(b) (same); *Use of Expanding Ammunition by U.S. Military Forces in Counterterrorist Incidents*, 45 (reiterating that the United States is not a party to the 1899 Hague Declaration on expanding bullets but is a party to the Hague Convention IV, which includes the prohibition against weapons calculated to cause unnecessary suffering); W. Hays Parks for The Judge Advocate General, U.S. Army, *Memorandum of Law—Sniper Use of Open-Tip Ammunition*, Oct. 12, 1990, reprinted in THE ARMY LAWYER 86, 87 (Feb. 1991) ("The United States is not a party to [the 1899 Hague Declaration], but United States officials over the years have taken the position that the armed forces of the United States will adhere to its terms to the extent that its application is consistent with the object and purpose of article 23e of the Annex to Hague Convention IV"); W. Hays Parks, *Joint Service Combat Shotgun Program*, THE ARMY LAWYER 16, 22 (Oct. 1997) (same).

<sup>79</sup> See, e.g., Alfons Vanheusden, W. Hays Parks, and William H. Boothby, *The Use of Expanding Bullets in Military Operations: Examining the Kampala Consensus*, 50 MILITARY LAW AND LAW OF WAR REVIEW 535, 537 (2011) ("[L]ack of use of expanding ammunition by armed forces could be attributed equally to the increased risk of weapon malfunction (specifically, failure to feed) through its use, particularly in machineguns"); P. R. COURTNEY-GREEN, AMMUNITION FOR THE LAND BATTLE 33 (1991) (noting that expanding bullets "may not cause a sufficiently incapacitating wound, particularly in a military context,"); WILLY LEY, SHELLS AND SHOOTING 39-41 (1942) ("[D]umdum bullets find too much air resistance. Roughly speaking, their power of penetration is only one-quarter that of other bullets, and the 'dumdum effect' does not take place if the velocity is low. Ranges of more than 600 yards ruin the 'dumdum effect,' and over 1200 yards the bullet may be so slow that it cannot penetrate a heavy uniform with overcoat."); Charles Frederick Carter, "Atrocities" in War, Nov. 1914, 29 THE WORLD'S WORK 65, 66 (1915) ("But since the first Hague Conference no nation has used dum-dum bullets for a compelling reason that has nothing to do with the Hague nor with considerations of humanity. Experience has taught that when a modern high powered rifle, such as is used in all armies to-day, is hot and dirty, conditions common to battle, the dum-dum bullet is liable to 'strip'; that is, the leaden core is apt to squirt out, leaving the jacket in the barrel, so that when the next shot is fired the gun blows back, or bursts.").

<sup>80</sup> See, e.g., *High-speed Bullets and Dumdums*, 79 SCIENTIFIC AMERICAN SUPPLEMENT NO. 2053, 304 (May 8, 1915) ("But the modern spitzer, at its still higher velocities and its unsteady performance in tissue, gives results that are more frightful than any dum-dum."); *Medical News: The Explosive Effect of Bullets*, 46 JOURNAL OF THE AMERICAN

expanding bullets are widely used by law enforcement agencies today, which also supports the conclusion that States do not regard such bullets as inherently inhumane or needlessly cruel.<sup>81</sup>

6.5.4.5 *Rome Statute of the International Criminal Court War Crime Regarding the Use of Expanding Bullets*. The war crime of using expanding bullets that is reflected in the Rome Statute of the International Criminal Court has been interpreted by States only to criminalize the use of expanding bullets that are also calculated to cause superfluous injury and not to create or reflect a prohibition against expanding bullets as such.

The Rome Statute of the International Criminal Court lists as a war crime “[e]mploying bullets which expand or flatten easily in the human body, such as bullets with a hard envelope which does not entirely cover the core or is pierced with incisions.”<sup>82</sup>

Elements of Crimes have been adopted by the Assembly of States Parties to the Rome Statute to assist the ICC in its interpretation and application of the Article 8 of the Rome Statute, which includes this war crime.<sup>83</sup> The Elements of Crimes explain that this rule is not violated unless, *inter alia*, “[t]he perpetrator was aware that the nature of the bullets was such that their employment would uselessly aggravate suffering or the wounding effect.”<sup>84</sup> When adopting an amendment at the Review Conference in 2010 that would apply this crime to non-international armed conflict, Parties to the Rome Statute reiterated this understanding and explained that “the crime is committed only if the perpetrator employs the bullets to uselessly aggravate suffering or the wounding effect upon the target of such bullets, as reflected in customary international law.”<sup>85</sup>

---

MEDICAL ASSOCIATION 66 (Jan. 2, 1915) (“[T]he instability of flight and tendency of the [pointed modern] bullet to revolve around a transverse axis give it a capacity for wounding the soft part greater than that of any expanding or soft-nosed bullet.”); George B. Davis, *The Amelioration of the Rules of War on Land*, 2 AJIL 63, 75-76 (1908) (“Small-arm projectiles having the mechanical construction, or causing the wounds which are particularly described in the declaration, have ceased to be manufactured; and the forms now in use, some of which inflict wounds of great and unnecessary severity, are no longer within the narrow and illogical terms of the prohibition. Had the Crozier amendment been adopted, it is highly probable that a type of small-arm projectile would have been developed which would have met all reasonable requirements in respect to velocity, range, and flatness of trajectory, without the needless and inhuman laceration of tissues which attend those now in use, or which are proposed for adoption in the armies of some civilized powers.”).

<sup>81</sup> For example, NILS MELZER, TARGETED KILLING IN INTERNATIONAL LAW 417 and note 103 (2009) (“A model example in this respect [*i.e.*, a situation governed by the law enforcement paradigm] is the case of Ewald K., which occurred in Chur, Switzerland, in 2000. In this case, although there was no risk to innocent bystanders, Swiss Police snipers deliberately used expanding rifle bullets in order to ensure that Ewald K. had no opportunity to return fire, but would be killed instantly. ... This motivation was accepted by the Cantonal Court as sufficient to justify the use of expanding rifle bullets. See Cantonal Court Grisons, *Ewald K. Case*, Deliberation 13(d).”).

<sup>82</sup> ROME STATUTE art. 8(2)(b)(xix).

<sup>83</sup> ROME STATUTE art. 9 (“1. Elements of Crimes shall assist the Court in the interpretation and application of articles 6, 7 and 8. They shall be adopted by a two-thirds majority of the members of the Assembly of States Parties.”).

<sup>84</sup> ROME STATUTE, ELEMENTS OF CRIMES, art. 8(2)(b)(xix), Official Records of the Assembly of States Parties to the Rome Statute of the International Criminal Court, First session, New York, ICC-ASP/1/3, 112, 146 (Sept. 3-10, 2002).

<sup>85</sup> Resolution RC/Res. 5, First ICC Review Conference: Resolutions and Declarations, 49 INTERNATIONAL LEGAL MATERIALS 1328, 1333 (2010).

Thus, this crime only applies to expanding bullets that are also calculated to cause superfluous injury and does not create or reflect a prohibition against expanding bullets as such.<sup>86</sup>

6.5.4.6 *Suppressors (Silencers)*. A suppressor or silencer is a device that is intended to reduce or disguise the sound of a firearm's discharge without affecting its ability to fire. There is no law of war prohibition on the use of a suppressor, and silenced weapons have been a part of the inventory of military forces and law enforcement agencies in many States, including the United States.<sup>87</sup>

6.5.4.7 *Anti-Personnel Use of Larger (e.g., .50) Caliber Guns or Cannons*. The law of war does not prohibit the use of .50 caliber machineguns or other large-caliber guns against enemy personnel.<sup>88</sup> Such use has been widespread and long-standing.<sup>89</sup>

Similarly, cannons and other artillery (e.g., the M242 25mm Bushmaster in the Bradley Fighting Vehicle or the 30mm GAU-8 in the A-10 aircraft) have often been used during armed conflict against enemy material and may also be used against enemy combatants. Although use against individual enemy combatants may not necessarily reflect the most efficient use of resources, such use is not prohibited by the law of war.

6.5.5 *Blast Weapons*. Blast weapons rely upon the pressure wave caused by an explosion, rather than fragmentation, to cause damage to objects and injury to enemy military personnel. Inflicting blast injury is not prohibited by the law of war.<sup>90</sup>

---

<sup>86</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>87</sup> W. Hays Parks, Special Assistant for Law of War Matters, Office of the Judge Advocate General, U.S. Army, *Memorandum re: Legality of Silencers/Suppressors* 3 (Jun. 9, 1995) ("Today, silenced weapons are a standard part of the inventory of military forces and law enforcement agencies throughout the world. For example, the Heckler and Koch MP5SD, an integrally suppressed 9x19mm Parabellum submachinegun, is in use by law enforcement and military forces in more than forty nations; in the United States, local, state and federal law enforcement agencies and each of the four armed services are equipped with the MP5SD. The H&K MP5SD was employed by U.S. Army, Navy and Marine Corps units during the 1991 liberation of Kuwait.").

<sup>88</sup> U.S. Army, Office of the Judge Advocate General, International Law Division, Opinion DAJA-IA 1986/8044, *Use of the .50-Caliber Machinegun*, Nov. 21, 1986, reprinted in *THE ARMY LAWYER* 36, 37 (Apr. 1987) ("Employment of the .50 caliber machinegun or other .50 caliber weapons against enemy personnel does not violate the law of war.").

<sup>89</sup> U.S. Army, Office of the Judge Advocate General, International Law Division, Opinion DAJA-IA 1986/8044, *Use of the .50-Caliber Machinegun*, Nov. 21, 1986, reprinted in *THE ARMY LAWYER* 36 (Apr. 1987) ("Larger-caliber weapons have remained in the inventories of virtually every nation. For example, the Soviet Union mounts the NSV .50 caliber machinegun on its tanks; it can be removed and employed on a tripod in a ground mode. Nations generally employ .50-caliber machineguns as antiaircraft, antimaterial, and antipersonnel weapons. On occasion, they have been employed specifically as long-range sniper weapons. The Soviet PTRD was a 14.5mm (.58 caliber) bolt-action, single-shot antitank weapon employed during World War II; because of its long-range accuracy, it was frequently employed as a sniper weapon against German troops. Similarly, the Browning Machinegun Caliber .50 HB, M2 currently in use by U.S. forces, was employed as a single-shot sniper rifle during the Vietnam War.").

<sup>90</sup> W. Hays Parks, Special Assistant to The Judge Advocate General, U.S. Army, *Memorandum re: 40mm Thermobaric Munition; Legal Review*, Apr. 2, 2003 ("Blast is and has been an inherent part of high explosive munitions, and combatants have died solely from the blast effects of conventional HE munitions. Pioneers, sappers

6.5.6 Fragmentation Weapons. Some munitions operate by projecting a large number of fragments or projectiles on detonation. Such weapons may include fragmenting artillery shells, the Claymore munition, “grape shot,” grenades, flechettes,<sup>91</sup> and shotgun buckshot.<sup>92</sup>

The fragments or projectiles in such weapons must be detectable by X-rays.<sup>93</sup> However, the use of multiple fragments or projectiles to injure enemy personnel is not prohibited by the law of war.<sup>94</sup> The fact that enemy military personnel in the path of fragment dispersion are likely to suffer multiple wounds does not render the weapon unlawful. Multiple fragments may be necessary to increase the probability of incapacitating enemy combatants.

6.5.7 Depleted Uranium Munitions. Depleted uranium (DU) is used in some munitions because its density and physical properties create a particularly effective penetrating combination to defeat enemy armored vehicles, including tanks.<sup>95</sup>

States have regarded the use of depleted uranium weapons as consistent with their law of war obligations.<sup>96</sup>

---

and combat engineers engaged in tunneling operations under enemy lines in the American Civil War, World War I, and Korea employed substantial amounts of high explosives. Enemy personnel above the detonation became blast casualties. Artillery barrages generally will produce a number of enemy casualties, including fatalities, from blast alone, as will heavy aerial bombardment.”).

<sup>91</sup> See SPAIGHT, AIR POWER AND WAR RIGHTS 201 (1947) (“Reference has been made above to *flêchettes* and it is desirable to explain what these were. They were small arrows of steel which were dropped in bundles of fifty at a time from aeroplanes upon ground targets or observation balloons. They were used on both the Allies’ and the German sides, but were originally an Italian invention, having been first used in Tripoli in 1911-12.”). See also W. Hays Parks, *Conventional Weapons and Weapons Reviews*, 8 YEARBOOK OF INTERNATIONAL HUMANITARIAN LAW 55, 81 (2005) (“Flechettes are steel darts of varying sizes fired at high velocities in large quantities in munitions as small as a shotgun shell to as large as a 90mm tank round, 105mm artillery round and 106mm recoilless rifle round, enabling a uniform dispersion of flechettes to increase the probability of wounding enemy combatants within their path. These munitions had proved particularly effective as a close-range final defensive fire against massed attacking forces.”).

<sup>92</sup> Refer to § 6.5.4.2 (Shotguns).

<sup>93</sup> Refer to § 6.11 (Weapons Injuring by Fragments Not Detectable by X-Rays).

<sup>94</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-6b (“Where a military purpose is apparent and suffering is incidental to the military necessities involved, the use of explosives and fragmentation particles such as those contained in projectiles, mines, bombs, rockets, missiles and hand grenades is not prohibited under the law of armed conflict. This result is confirmed by an extensive practice of nations in using such weapons during periods of armed conflict in the 20th Century and previously.”).

<sup>95</sup> Col. James Naughton, Army Materiel Command, *Special Department of Defense Briefing: Update on Depleted Uranium* (Mar. 14, 2003) (“[T]he depleted uranium is a material that has a characteristic that allows it to sharpen itself as it penetrates the target. The uranium shreds off the sides of the penetrator instead of squashing or mushrooming. If you look at the lower picture, which is what happens with tungsten, the tungsten mushrooms. The result is the depleted uranium will penetrate more armor of a given character and type at a given range than tungsten will, no matter how we design the penetrators.”).

<sup>96</sup> For example, DAILY HANSARD, HOUSE OF COMMONS DEBATES, Jul. 12, 2012, Written Ministerial Statements, Column 40WS-41WS (“**The Minister for the Armed Forces (Nick Harvey)**: I informed the House on 31 October 2011 that I had commissioned officials to undertake a legal weapons review of our depleted uranium (DU) anti-armour tank rounds, known as Charm-3. ... The review is now complete and has concluded that Charm-3 is capable of being used lawfully by UK armed forces in an international armed conflict. ... The use of DU in weapon systems

The U.S. armed forces have fielded and used depleted uranium munitions. Extensive efforts have been made to study whether there are harmful health effects from exposure to depleted uranium from weapons that use it, but no such effects have been found.<sup>97</sup>

6.5.8 Remotely Piloted Aircraft. There is no prohibition in the law of war on the use of remotely piloted aircraft (also called “unmanned aerial vehicles”).<sup>98</sup> Such weapons may offer certain advantages over other weapons systems.<sup>99</sup>

---

is not prohibited by any treaty provision. There have been extensive scientifically based studies, undertaken by the World Health Organisation in relation to the long-term environmental and other health effects allegedly attributable to the use of DU munitions. In the light of the reassuring conclusions drawn by such scientific studies, and noting the continuing military imperative underpinning retention of Charm-3 as a weapon system, it was concluded that use of Charm-3 does not offend the principle prohibiting superfluous injury or unnecessary suffering in armed conflict. ... Finally, it was concluded that DU continues to be a material of choice used by states in the manufacture of anti-armour munitions. To date no inter-state consensus has emerged that DU munitions should be banned and the available scientific evidence (developed in the aftermath of the Gulf war in 1991) continues to support the view held by the UK that such munitions can be retained for the limited role envisaged for their employment. The UK policy remains that DU can be used within weapons; it is not prohibited under current or likely future international agreements.”).

<sup>97</sup> Ambassador Robert Wood, United States Mission to the United Nations, *Remarks at the Sixty-Ninth UNGA First Committee Cluster Five: Explanation of Vote Before the Vote on L.43, Agenda Item 96 (e) “Effects of the use of armaments and ammunitions containing depleted uranium,”* Oct. 31, 2014 (“I am speaking on behalf of France, the United Kingdom and the United States to explain our negative vote on draft resolution L.43 ‘Effects of the use of armaments and ammunitions containing depleted uranium’. Mr. Chairman, this is not a new issue. The environmental and long-term health effects of the use of depleted uranium munitions have been thoroughly investigated by the World Health Organization, the United Nations Environmental Program, the International Atomic Energy Agency, NATO, the Centres for Disease Control, the European Commission, and others. None of these inquiries has documented long-term environmental or health effects attributable to use of these munitions.”); Dr. Michael Kilpatrick, DoD Deployment Health Support Directorate, *Special Department of Defense Briefing: Update on Depleted Uranium* (Mar. 14, 2003) (“We looked at some 90 Gulf War veterans who were in or on an armored vehicle when it was struck by depleted uranium in friendly fire. And those individuals have been followed on an annual basis now we are talking 12 years post-incident. And we do not see any kidney damage in those individuals ... . They were also followed for other medical problems, and ... they’ve had no other medical consequences of that depleted uranium exposure. Now, some of these individuals had amputations, were burned, had deep wounds, so that these individuals, some of them of course do have medical problems. But as far as a consequence of the depleted uranium exposure, we are not seeing anything related to that either from a chemical or radiological effect.”).

<sup>98</sup> John O. Brennan, Assistant to the President for Homeland Security and Counterterrorism, *Speech at the Wilson Center: The Ethics and Efficacy of the President’s Counterterrorism Strategy*, Apr. 30, 2012, 2012 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 584, 585 (“As a matter of international law, the United States is in an armed conflict with al-Qa’ida, the Taliban, and associated forces, in response to the 9/11 attacks, and we may also use force consistent with our inherent right of national self-defense. There is nothing in international law that bans the use of remotely piloted aircraft for this purpose... .”); Harold Hongju Koh, Legal Adviser, Department of State, *Address at the Annual Meeting of the American Society of International Law: The Obama Administration and International Law*, Mar. 25, 2010, 2010 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 715, 718-19 (“[T]here is no prohibition under the laws of war on the use of technologically advanced weapons systems in armed conflict -- such as pilotless aircraft ... .”).

<sup>99</sup> John O. Brennan, Assistant to the President for Homeland Security and Counterterrorism, *Speech at the Wilson Center: The Ethics and Efficacy of the President’s Counterterrorism Strategy*, Apr. 30, 2012, 2012 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 584, 586 (“Targeted strikes are wise. Remotely piloted aircraft in particular can be a wise choice because of geography, with their ability to fly hundreds of miles over the most treacherous terrain, strike their targets with astonishing precision, and then return to base. They can be a wise

6.5.9 Autonomy in Weapon Systems. The law of war does not prohibit the use of autonomy in weapon systems. DoD has developed policy on the use of autonomy in weapon systems.<sup>100</sup>

6.5.9.1 Description and Examples of the Use of Autonomy in Weapon Systems. Some weapons may have autonomous functions. For example, mines may be regarded as rudimentary autonomous weapons because they are designed to explode by the presence, proximity, or contact of a person or vehicle, rather than by the decision of the operator.<sup>101</sup> Other weapons may have more sophisticated autonomous functions and may be designed such that the weapon is able to select targets or to engage targets automatically after being activated by the user. For example, the United States has used weapon systems for local defense with autonomous capabilities designed to counter time-critical or saturation attacks. These weapon systems have included the Aegis ship defense system and the Counter-Rocket, Artillery, and Mortar (C-RAM) system.

6.5.9.2 No Law of War Prohibition on the Use of Autonomy in Weapon Systems. The law of war does not specifically prohibit or restrict the use of autonomy to aid in the operation of weapons.

In fact, in many cases, the use of autonomy could enhance the way law of war principles are implemented in military operations. For example, some munitions have homing functions that enable the user to strike military objectives with greater discrimination and less risk of incidental harm. As another example, some munitions have mechanisms to self-deactivate or to self-destruct, which helps reduce the risk they may pose generally to the civilian population or after the munitions have served their military purpose.<sup>102</sup>

Although no law of war rule specifically restricts the use of autonomy in weapon systems, other rules may apply to weapons with autonomous functions. For example, to the extent a weapon system with autonomous functions falls within the definition of a “mine” in the CCW Amended Mines Protocol, it would be regulated as such.<sup>103</sup> In addition, the general rules applicable to all weapons would apply to weapons with autonomous functions. For example, autonomous weapon systems must not be calculated to cause superfluous injury or be inherently indiscriminate.<sup>104</sup>

6.5.9.3 Law of War Obligations of Distinction and Proportionality Apply to Persons Rather Than the Weapons Themselves. The law of war rules on conducting attacks

---

choice because of time, when windows of opportunity can close quickly and there may be just minutes to act. They can be a wise choice because they dramatically reduce the danger to U.S. personnel, even eliminating the danger altogether. Yet they are also a wise choice because they dramatically reduce the danger to innocent civilians, especially considered against massive ordnance that can cause injury and death far beyond its intended target.”).

<sup>100</sup> Refer to § 6.5.9.4 (DoD Policy on Autonomy in Weapon Systems).

<sup>101</sup> Refer to § 6.12.1.2 (Designed to Be Exploded by the Presence, Proximity, or Contact of a Person or Vehicle).

<sup>102</sup> Refer to § 6.12.1.6 (Mines With Compliant Self-Destruction and Self-Deactivation (SD/SDA) Mechanisms).

<sup>103</sup> Refer to § 6.12.1 (Definition of Mine).

<sup>104</sup> Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury); § 6.7 (Inherently Indiscriminate Weapons).

(such as the rules relating to discrimination and proportionality) impose obligations on persons. These rules do not impose obligations on the weapons themselves; of course, an inanimate object could not assume an “obligation” in any event. Thus, it is not the case that the law of war requires that a weapon determine whether its target is a military objective. Similarly, the law of war does not require that a weapon make other legal determinations such as whether an attack may be expected to result in incidental harm that is excessive in relation to the concrete and direct military advantage expected to be gained. The law of war does not require weapons to make legal determinations, even if the weapon (*e.g.*, through computers, software, and sensors) may be characterized as capable of making factual determinations, such as whether to fire the weapon or to select and engage a target. Rudimentary autonomous weapons, such as mines, have been employed for many years, and there has never been a requirement that such weapons themselves determine that legal requirements are met.

Rather, it is persons who must comply with the law of war. For example, persons may not use inherently indiscriminate weapons.<sup>105</sup> In addition, in the situation in which a person is using a weapon that selects and engages targets autonomously, that person must refrain from using that weapon where it is expected to result in incidental harm that is excessive in relation to the concrete and direct military advantage expected to be gained.<sup>106</sup> In addition, the obligation on the person using the weapon to take feasible precautions in order to reduce the risk of civilian casualties may be more significant when the person uses weapon systems with more sophisticated autonomous functions.<sup>107</sup> For example, such feasible precautions a person is obligated to take may include monitoring the operation of the weapon system or programming or building mechanisms for the weapon to deactivate automatically after a certain period of time.

6.5.9.4 *DoD Policy on Autonomy in Weapon Systems.* DoD policy has addressed the use of autonomy in certain types of weapon systems.<sup>108</sup> Under a 2012 policy, certain types of autonomous weapon systems require an additional review by senior DoD officials before formal development and fielding.<sup>109</sup> In addition, the policy establishes rigorous standards for system design, testing of hardware and software, and training of personnel on the proper use of autonomous and semi-autonomous systems. Among other things, the policy requires that military commanders use autonomous and semi-autonomous weapon systems in a manner consistent with their design, testing, certification, operator training, and doctrine.<sup>110</sup>

---

<sup>105</sup> Refer to § 6.7 (Inherently Indiscriminate Weapons).

<sup>106</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>107</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>108</sup> DoD DIRECTIVE 3000.09, *Autonomy in Weapons Systems* (Nov. 21, 2012).

<sup>109</sup> DoD DIRECTIVE 3000.09, *Autonomy in Weapons Systems*, ¶4d (Nov. 21, 2012) (“Autonomous or semi-autonomous weapon systems intended to be used in a manner that falls outside the policies in subparagraphs 4.c.(1) through 4.c.(3) must be approved by the Under Secretary of Defense for Policy (USD(P)); the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)); and the CJCS before formal development and again before fielding in accordance with the guidelines in Enclosure 3, References (b) and (c), and other applicable policies and issuances.”).

<sup>110</sup> DoD DIRECTIVE 3000.09, *Autonomy in Weapons Systems*, Enclosure 4 ¶10 (Nov. 21, 2012) (“The Commanders of the Combatant Commands shall: a. Use autonomous and semi-autonomous weapon systems in accordance with

U.S. domestic law may also be applicable to the development of autonomous functions in certain weapon systems.<sup>111</sup>

6.5.10 Non-Lethal (Less-Lethal) Weapons. The law of war does not prohibit or specifically address non-lethal weapons as a class of weapons. DoD policies regulate non-lethal weapons and require the legal review of their acquisition, as with other types of weapons. There is no requirement to use non-lethal weapons before using lethal weapons against military objectives.

6.5.10.1 Non-Lethal Weapons – Notes on Terminology. The United States is not a Party to any law of war treaty that regulates “non-lethal weapons” as a class or category of weapons. Thus, there is no applicable treaty definition of “non-lethal weapons” for the purpose of applying rules related to such weapons. Accordingly, in practice, the contours of the definition of “non-lethal weapons” have been developed as a matter of policy for the purpose of applying DoD policies with respect to “non-lethal weapons.”

6.5.10.2 Description and Examples of Non-Lethal Weapons. *Non-lethal weapons*, sometimes called “less-lethal weapons,” have been defined as weapons, devices, and munitions that are explicitly designed and primarily employed to incapacitate targeted personnel or materiel immediately, while minimizing fatalities, permanent injury to personnel, and undesired damage to property in the target area or environment.<sup>112</sup>

Non-lethal weapons are less lethal than conventional military weapons, and they use means other than gross physical destruction to defeat targets (whether enemy vehicles or personnel). Non-lethal weapons are intended to have reversible effects on personnel and materiel.

Non-lethal weapons, however, do not have a zero probability of producing fatalities or permanent injuries, which is why these weapons are sometimes referred to as less-lethal weapons.<sup>113</sup> The use of non-lethal weapons may still present risks of serious injury or loss of

---

this Directive and in a manner consistent with their design, testing, certification, operator training, doctrine, TTPs, and approval as autonomous or semi-autonomous systems.”).

<sup>111</sup> See, e.g., PUBLIC LAW 100-180, § 224 (Dec. 4, 1987) (“No agency of the Federal Government may plan for, fund, or otherwise support the development of command and control systems for strategic defense in the boost or post-boost phase against ballistic missile threats that would permit such strategic defenses to initiate the directing of damaging or lethal fire except by affirmative human decision at an appropriate level of authority.”). This statute may, however, be an unconstitutional intrusion on the President’s authority, as Commander in Chief, to determine how weapons are to be used in military operations.

<sup>112</sup> DOD DIRECTIVE 3000.03E, *DoD Executive Agent for Non-Lethal Weapons (NLW), and NLW Policy*, Glossary (Apr. 25, 2013) (“NLW. Weapons, devices, and munitions that are explicitly designed and primarily employed to incapacitate targeted personnel or materiel immediately, while minimizing fatalities, permanent injury to personnel, and undesired damage to property in the target area or environment. NLW are intended to have reversible effects on personnel and materiel.”).

<sup>113</sup> See NATO RESEARCH AND TECHNOLOGY ORGANISATION TECHNICAL REPORT RTO-TR-HFM-073, *The Human Effects of Non-Lethal Technologies*, §6-4 (August 2006) (“Terminology options have referred to ‘non-lethal’, ‘less than lethal’, or ‘less-lethal’. These first two terms imply that death will not result following the use of these weapons but plainly, this is not always the case in spite of the reassuring connotation. ... The military forces of the North Atlantic Treaty Organisation (NATO) use the descriptor ‘non-lethal’. This term in the military context does

life.

Non-lethal weapons include, but are not limited to:<sup>114</sup>

- riot control agents;<sup>115</sup>
- blunt impact projectiles, such as stingball grenades, beanbag rounds, and rubber bullets;
- dazzling lasers that cause temporary loss of sight;
- the active denial system, a directed energy weapon that uses millimeter wave energy to penetrate 1/64th of an inch into the surface of the skin, causing a rapid and intense heating sensation;
- electrical stun guns that incapacitate by disrupting the body's electrical signals (also called human electro-muscular incapacitation devices or tasers); and
- counter-material weapons, such as the vehicle lightweight arresting device or the portable vehicle arresting barrier, that are designed to stop vehicles without harming the occupants of the vehicles.

6.5.10.3 No Law of War Prohibitions or Restrictions on Non-Lethal Weapons as Such. The law of war does not prohibit or specifically address non-lethal weapons as a class of weapons. Rather, such weapons are governed by the general customary rules applicable to weapons and other specific rules, insofar as those rules are applicable. For example, the use of riot control agents is prohibited as a method of warfare.<sup>116</sup>

Weapons designed to use the minimum amount of force and to preserve life are, consistent with the principle of humanity, often less likely to be prohibited or restricted by the law of war.

#### 6.5.10.4 DoD Policy Requiring a Legal Review of the Acquisition of Non-Lethal

---

not imply nil casualties or damage, but is a statement of intent to achieve the lowest achievable probability of casualties and physical damage. The term has often been challenged as being inappropriate, but an alternative descriptor that can provide a better interpretation has yet to be widely adopted within international circles.”).

<sup>114</sup> For example, David A. Koplow, *Tangled Up in Khaki and Blue: Lethal and Non-Lethal Weapons in Recent Confrontations*, 36 GEORGETOWN JOURNAL OF INTERNATIONAL LAW 703, 727 (2005) (“In 1995, the thirteenth Marine Expeditionary Unit was assigned the daunting mission of covering the withdrawal of 2,500 United Nations peacekeepers from chaotic Somalia, while providing protection against native war lords, disorganized military, and paramilitary units. Lieutenant General Anthony C. Zinni boldly decided to include a variety of NLW in the Marines’ training and equipment for this operation ‘United Shield,’ and his departure from standard operation procedures garnered a substantial amount of publicity. Among the unconventional tools deployed to Somalia were: sticky foam, used to create temporary, immediate barriers; caltrops, sharp-edged pyramids that could puncture the tires of vehicles following too closely; flash-bang and stinger grenades; low-kinetic-energy rounds which fired beanbags or wooden plugs; laser dazzlers and target designators; and chemical riot control agents.”).

<sup>115</sup> Refer to § 6.16 (Riot Control Agents).

<sup>116</sup> Refer to § 6.16.2 (Prohibition on Use of Riot Control Agents as a Method of Warfare).

Weapons. DoD policy has addressed non-lethal weapons.<sup>117</sup> Like lethal weapons, non-lethal weapons have been subject to legal review to ensure their compliance with U.S. law of war and arms control obligations.<sup>118</sup>

If acquisition of a non-lethal weapon is being considered, the command seeking to acquire the weapon should inquire through command or service channels whether the applicable legal reviews have been conducted.

6.5.10.5 No Requirement to Use Non-Lethal Weapons Before Using Lethal Weapons Where Deadly Force Is Warranted. Where the use of deadly force is warranted, such as against enemy combatants, the law of war does not create a legal obligation to use non-lethal weapons before using lethal weapons.<sup>119</sup> Moreover, under the law of war, the availability of non-lethal weapons does not create the obligation to use these weapons instead of lethal weapons or create a higher standard for the use of force.<sup>120</sup>

In addition, the availability of non-lethal weapons does not limit the authority to use force in self-defense.<sup>121</sup>

## 6.6 WEAPONS CALCULATED TO CAUSE SUPERFLUOUS INJURY

It is especially forbidden to use weapons that are calculated to cause superfluous

---

<sup>117</sup> For example, DoD DIRECTIVE 3000.03E, *DoD Executive Agent for Non-Lethal Weapons (NLW), and NLW Policy* (Apr. 25, 2013); DoD DIRECTIVE 3000.3, *Policy for Non-Lethal Weapons* (Jul. 9, 1996).

<sup>118</sup> For example, DoD DIRECTIVE 3000.03E, *DoD Executive Agent for Non-Lethal Weapons (NLW), and NLW Policy*, Enclosure 2 ¶11 (Apr. 25, 2013) (“The Secretaries of the Military Departments and the Commander, USSOCOM, through the CJCS: ... c. Require, as appropriate, that a legal review of the acquisition of all NLW is conducted in accordance with Reference (h) and an arms control compliance review is completed in accordance with DoDD 2060.1 (Reference (l)).”); DoD DIRECTIVE 3000.3, *Policy for Non-Lethal Weapons*, ¶E6 (Jul. 9, 1996) (“The Secretaries of the Military Departments and the Commander in Chief of the United States Special Operations Command shall: ... (b) Ensure that a legal review of the acquisition of all non-lethal weapons is conducted. The review should ensure consistency with the obligations assumed by the U.S. Government under all applicable treaties, with customary international law, and, in particular, the laws of war.”).

<sup>119</sup> Refer to § 5.4.6 (Force That May Be Applied Against Military Objectives).

<sup>120</sup> DoD DIRECTIVE 3000.03E, *DoD Executive Agent for Non-Lethal Weapons (NLW), and NLW Policy*, ¶3h (Apr. 25, 2013) (“The presence of NLW will not constitute an obligation for their use, or create a higher standard for the use of force, under the applicable law, rules of engagement, or other rules for the use of force.”); DoD DIRECTIVE 3000.3, *Policy for Non-Lethal Weapons*, ¶4.5 (Jul. 9, 1996) (“Neither the presence nor the potential effect of non-lethal weapons shall constitute an obligation for their employment or a higher standard for employment of force than provided for by applicable law. In all cases, the United States retains the option for immediate use of lethal weapons, when appropriate, consistent with international law.”).

<sup>121</sup> DoD DIRECTIVE 3000.03E, *DoD Executive Agent for Non-Lethal Weapons (NLW), and NLW Policy*, ¶3g (Apr. 25, 2013) (“The availability of NLW will not limit the commander’s inherent right or obligation to exercise unit self-defense in response to a hostile act of [sic] demonstrated hostile intent, or to use lethal force when authorized by competent authority pursuant to the standing rules of engagement or standing rules for the use of force.”); DoD DIRECTIVE 3000.3, *Policy for Non-Lethal Weapons*, ¶4.4 (Jul. 9, 1996) (“The availability of non-lethal weapons shall not limit a commander’s inherent authority and obligation to use all necessary means available and to take all appropriate action in self-defense.”).

injury.<sup>122</sup>

6.6.1 Superfluous Injury or Unnecessary Suffering – Notes on Terminology. The prohibition against weapons calculated to cause superfluous injury or of a nature to cause unnecessary suffering has been formulated in a variety of ways both in treaties to which the United States is a Party and in other treaties. The United States is not a Party to a treaty that provides a definition of “superfluous injury.”

Article 23(e) of the 1899 Hague II Regulations prohibits weapons “of a nature to cause superfluous injury.” Article 23(e) of the 1907 Hague IV Regulations prohibits weapons “calculated to cause unnecessary suffering.” The official texts of both the 1899 and 1907 treaties are French, and the French text of that paragraph is exactly the same in both treaties, even though English translations of the treaties are different. The title of the CCW refers to “Weapons Which May be Deemed to Be Excessively Injurious,” and the CCW Preamble also recognizes “the principle that prohibits the employment in armed conflicts of weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering.”

Treaties that the United States has not ratified have also included this prohibition. The Preamble to the 1868 Declaration of St. Petersburg noted that “the employment of arms which uselessly aggravate the sufferings of disabled men, or render their death inevitable” would be “be contrary to the laws of humanity.”<sup>123</sup> AP I Article 35(2) prohibits the use of “weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering.”

Although the various formulations may be regarded as describing the same underlying prohibition, the phrase “calculated to cause superfluous injury” may be regarded as the more accurate translation of the French rule stated in the 1907 Hague IV Regulations and as more precisely conveying the intent of the rule.<sup>124</sup>

---

<sup>122</sup> CCW preamble (recognizing “the principle that prohibits the employment in armed conflicts of weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering”); HAGUE IV REG. art. 23 (“[I]t is especially forbidden ... (e) To employ arms, projectiles, or material calculated to cause unnecessary suffering ... .”); 1899 HAGUE II REG. art. 23 (prohibits employing “arms, projectiles, or material of a nature to cause superfluous injury”). Consider AP I art. 35(2) (“It is prohibited to employ weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering.”).

<sup>123</sup> The Declaration of St. Petersburg, 1868, *reprinted in* 1 AJIL SUPPLEMENT: OFFICIAL DOCUMENTS 95 (1907).

<sup>124</sup> R.R. Baxter, *Conventional Weapons Under Legal Prohibitions*, 1 INTERNATIONAL SECURITY 42, 43 (1977) (“This last expression [calculated to cause unnecessary suffering] has been the source of a vast amount of confusion because the English translation from the authentic French text is inaccurate. The expression used in French was *propres a causer des maux superflus*, which might be more accurately translated as ‘calculated to cause superfluous (or excessive) injury.’ In the metaphysical atmosphere in which the legality of certain weapons is often discussed, such niceties count.”); W. Hays Parks, *Conventional Weapons and Weapons Reviews*, 8 YEARBOOK OF INTERNATIONAL HUMANITARIAN LAW 55, 86-87 footnote 123 (2005) (“This argument [about superfluous injury or unnecessary suffering] was based upon a novel ICRC interpretation of the original 1899 Hague language in Art. 23(g) of the Annex prohibiting ‘arms, projectiles or material of a nature to cause superfluous injury’, as compared to the language in the subsequent 1907 Hague Convention, ‘calculated to cause unnecessary suffering’. The latter phrase is a clearer expression of the intent of governments to focus on design and intended purpose rather than every remote possibility of weapon injury.”).

This manual generally uses the formulation “weapons calculated to cause superfluous injury” or refers to the “superfluous injury rule.”

6.6.2 Superfluous Injury Rule – the Principle of Humanity. The superfluous injury rule is an application of the principle of humanity in the context of weapons.<sup>125</sup> The superfluous injury rule prohibits weapons that are designed to increase the injury or suffering of the persons attacked beyond that justified by military necessity.<sup>126</sup>

Thus, the principle of humanity may assist in understanding and applying the rule.<sup>127</sup> For example, weapons that are regarded as lawful in peacetime or that apply only the minimum force necessary in order to avoid death or injury to civilians would not be prohibited under the superfluous injury rule.<sup>128</sup>

6.6.3 Applying the Superfluous Injury Rule. The test for whether a weapon is prohibited by the superfluous injury rule is whether the suffering caused by the weapon provides no military advantage or is otherwise clearly disproportionate to the military advantage reasonably expected from the use of the weapon.<sup>129</sup> Thus, the suffering must be assessed in relation to the military utility of the weapon.<sup>130</sup> Weapons that may cause great injury or suffering or inevitable death are not prohibited, if the weapon’s effects that cause such injury are necessary to enable users to

<sup>125</sup> Prosecutor v. Tadić, ICTY Appeals Chamber, IT-94-1-AR72, *Decision on the Defence Motion for Interlocutory Appeal on Jurisdiction*, ¶119 (Oct. 2, 1995) (explaining that the prohibitions on weapons in the customary law of war applicable to international and non-international armed conflicts are based on “elementary considerations of humanity and common sense”).

<sup>126</sup> *Written Statement of the Government of the United States of America*, 28-29, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“This prohibition was intended to preclude weapons designed to increase the injury or suffering of the persons attacked beyond that necessary to accomplish the military objective. It does not prohibit weapons that may cause great injury or suffering if the use of the weapon is necessary to accomplish the military mission. For example, it does not prohibit the use of anti-tank munitions which must penetrate armor by kinetic-energy or incendiary effects, even though such weapons can produce severe and painful injuries.”).

<sup>127</sup> *Refer to* § 2.3 (Humanity).

<sup>128</sup> *Cf. Statement by Secretary Rusk*, Mar. 24, 1965, 52 DEPARTMENT OF STATE BULLETIN 529 (Apr. 12, 1965) (defending the legality of riot control agents by explaining that “[w]hat has been involved has been well-known, traditional agents, in the hands of police forces in many parts of the world. And under the circumstances in which this gas was used in Viet-Nam, the desire was to use the minimum force required to deal with the situation to avoid death or injury to innocent people.”). *Refer to* § 6.16 (Riot Control Agents).

<sup>129</sup> WINTHROP, *MILITARY LAW & PRECEDENTS* 784 (“An illegitimate weapon of war would be one which, in disabling or causing death, inflicted a needless, unusual and unreasonable amount of torture or injury and the deliberate use of such a weapon would properly be treated as a violation of the laws of war.”); SPAIGHT, *WAR RIGHTS ON LAND* 75 (“Hence commanders are quite ready to admit the claims of humanity to the extent of forgoing the use of any engine of war whose military effect is disproportioned to the suffering it entails.”).

<sup>130</sup> Ronald J. Bettauer, Deputy Assistant Legal Adviser, Department of State, *Statement at the Conference of Government Experts on Weapons which may Cause Unnecessary Suffering or have Indiscriminate Effects, held in Lucerne from Sept. 24 to Oct. 18, 1974*, Sept. 25, 1974, 1974 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 707 (“It is the U.S. view that the ‘necessity’ of the suffering must be judged in relation to the military utility of the weapons. The test is whether the suffering is needless, superfluous, or disproportionate to the military advantage reasonably expected from the use of the weapon.”).

accomplish their military missions.<sup>131</sup>

6.6.3.1 *Military Necessity*. The legitimate military necessity that may be considered in assessing the legality of a weapon includes its capability to disable or incapacitate enemy combatants, including, for example:

- the probability of striking a person against whom the weapon is aimed or directed;
- the probability that a person who is struck by the weapon will be incapacitated;
- the speed at which a person who is struck by the weapon will be incapacitated; and
- the number of persons the weapon could strike.<sup>132</sup>

However, the military utility of the weapon is often broader than its capacity to disable enemy combatants.<sup>133</sup> It may include other factors, such as:<sup>134</sup>

- the destruction or neutralization of military materiel;
- the restriction of military movement;
- the interdiction of military lines of communication;
- the effects on the morale, command and control, stamina, and cohesion of opposing forces;

---

<sup>131</sup> *Written Statement of the Government of the United States of America*, 32-33, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“This argument is based on a misconception of the St. Petersburg principle, which was directed at anti-personnel weapons that were deliberately designed to kill when that design feature was not needed to disable enemy combatants. This does not mean that it is unlawful to use a weapon that has a high probability of killing persons in its immediate vicinity if that design feature is required to fulfill a legitimate military mission. For example, any large high-explosive or fragmentation weapon has a high probability of killing exposed persons within a certain distance of the detonation. An effective anti-submarine, anti-aircraft or anti-tank weapon has a high probability of killing the crews of these vehicles. This fact does not make these weapons unlawful, since these lethal effects are necessary for the effective accomplishment of their legitimate mission.”).

<sup>132</sup> SPAIGHT, *AIR POWER AND WAR RIGHTS* 203 (“[A]lthough a shell [fired by a cannon] may kill or mutilate—and mutilate horribly—only one man, it may also be compensated by the possible ‘bag’ of a projectile of widely radiating effect.”).

<sup>133</sup> BOTHE, PARTSCH, & SOLF, *NEW RULES* 196 (AP I art. 35, ¶2.3.3) (“The problem cannot be simplified by restating the preamble of the 1968 [sic] St. Petersburg Declaration that to weaken the enemy’s military forces it is sufficient to disable the greatest possible number of men (i.e., to render enemy combatants *hors de combat*). This test is valid only for weapons designed for antipersonnel purposes. However, weapons are designed and produced to be used to fulfill a variety of military requirements other than merely disabling enemy combatants.”).

<sup>134</sup> BOTHE, PARTSCH, & SOLF, *NEW RULES* 196-97 (AP I art. 35, ¶2.3.3) (“Some examples of such requirements include the destruction or neutralization of military material, restriction of military movement, the interdiction of military lines of communications, the weakening of the enemy’s war making resources and capabilities, and the enhancement of the security of friendly forces. ... Factors which must also be taken into account are the availability of alternate weapon systems (and their effects), the logistics of providing the weapon and its ammunition at the place where it is to be used when needed, and the security of the troops involved.”).

- the weakening of the enemy’s war-making resources and capabilities;
- the enhancement of the security of forces employing the weapon or other friendly forces;
- the effectiveness of the weapon against particular types of targets;
- the availability of alternative weapons and their effects;
- the logistics of providing the weapon and its ammunition where and when it is needed;
- the amount of ammunition required;
- the cost of using the weapon in terms of time, money, and other resources;
- the efficacy of the weapon compared to the adversary’s defenses;
- the efficacy of the weapon in light of the weapons and tactics of the adversary; or
- the risk to the civilian population when the weapon is used for its intended purposes.<sup>135</sup>

These other factors can justify weapons that inflict injuries on enemy combatants that are much greater than the minimum needed to render them *hors de combat*. For example, an artillery shell designed to destroy field fortifications or heavy material causes injuries to enemy personnel that are much greater than those necessary to make enemy combatants *hors de combat*. However, the artillery shell is not prohibited because these military advantages are not clearly disproportionate to the injuries it inflicts.<sup>136</sup>

6.6.3.2 *Suffering and Injury Inflicted*. The superfluous injury rule addresses the harm inflicted upon the persons who are struck by the weapon. The types of harm addressed by the superfluous rule include: mortality rates, the painfulness of wounds, the severity of wounds, and the ease with which they may be treated (including the incidence of permanent damage or disfigurement).<sup>137</sup> Weapons that have been modified only for the purpose of increasing these

---

<sup>135</sup> Christopher Greenwood, *Legal Aspects of current Regulations*, KEYNOTE SPEECHES, THIRD INTERNATIONAL WORKSHOP ON WOUND BALLISTICS (Thun, Switzerland, Mar. 28-29, 2001) (“Moreover, there are circumstances, particularly in street warfare and in counter terrorist operations where it may be necessary to make a trade, in effect, between the principle of the protection of civilian life and the principle of ‘unnecessary suffering’ to combatants. What I would like to suggest is that where that trade has to be made – and I accept that it is not one which has to be made in all, or even most types of combat – one cannot regard suffering as unnecessary if it is inflicted for the purpose of protecting the civilian population. In other words, if the civilian population’s protection is enhanced by the use of a particular weapon, then the adverse effects of that weapon on combatants cannot properly be regarded as unnecessary.”).

<sup>136</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 196-97 (AP I art. 35, ¶2.3.3) (“[A]n artillery projectile or missile designed to destroy field fortifications or heavy material may be expected to cause injuries to personnel in the vicinity of the target which would be more severe than necessary to render these combatants *hors de combat*, but no authority has questioned the lawfulness of such projectiles despite the gravity of the incidental effect on personnel.”).

<sup>137</sup> See INTERNATIONAL COMMITTEE OF THE RED CROSS, CONFERENCE OF GOVERNMENT EXPERTS ON THE USE OF CERTAIN CONVENTIONAL WEAPONS: LUCERNE, SEPT. 24- OCT. 18, 1974, 8 (¶23) (Geneva, 1975) (“The concept of

types of harms for persons who have already been incapacitated are prohibited by the superfluous injury rule.<sup>138</sup>

6.6.3.3 *Clearly Disproportionate*. A weapon is only prohibited by the superfluous injury rule if the suffering it inflicts is clearly disproportionate to its military utility. This excessiveness should be assessed in light of the State practice and *opinio juris* and the principle of humanity.

Because of the difficulty of comparing the military necessity for the weapon and the suffering it is likely to cause, a weapon is only prohibited if the suffering is clearly or manifestly disproportionate to the military necessity.<sup>139</sup> The suffering likely to result from the use of the weapon and its military effectiveness are likely to be difficult to assess, much less to compare to one another.<sup>140</sup>

Like other determinations of customary international law, whether a weapon is calculated to cause superfluous injury is to be determined in light of the practice of States, and in particular, whether States have declined to use the weapon or similar weapons because they are believed to

---

‘injury’ or ‘suffering’ evoked some further comment. It was generally considered that this comprised such factors as mortality rates, the painfulness or severeness of wounds, or the incidence of permanent damage or disfigurement.”).

<sup>138</sup> Refer to § 6.6.4 (Weapons Modified for the Purpose of Aggravating the Harm Inflicted on Incapacitated Persons).

<sup>139</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 197 (AP I art. 35, ¶2.3.3) (“Because of the impossibility of quantifying either side of the equation it is important that military advantage be qualified by such words as ‘definite’, and also that the disproportionate suffering be ‘manifest’ or ‘clear’.”). See also W. Hays Parks, Special Assistant for Law of War Matters, Office of The Judge Advocate General, U.S. Army, *Joint Service Combat Shotgun Program*, THE ARMY LAWYER 16, 18 (Oct. 1997) (“In determining whether a weapon causes superfluous injury, a balancing test is applied between the force dictated by military necessity to achieve a legitimate objective vis-a-vis injury that may be considered superfluous to the achievement of the stated or intended objective (in other words, whether the suffering caused is out of proportion to the military advantage to be gained). The test is not easily applied; a weapon that can incapacitate or wound lethally at, for example, 300 meters or longer ranges may result in a greater degree of incapacitation or greater lethality at lesser ranges. For this reason, the degree of ‘superfluous’ injury must be clearly disproportionate to the intended objective(s) for development of the weapon (that is, the suffering must outweigh substantially the military necessity for the weapon.”); W. Hays Parks, Chief, International Law Branch, International Affairs Division, Office of the Judge Advocate General, U.S. Army, *Memorandum re: Sniper Use of Open-Tip Ammunition*, Oct. 12, 1990, reprinted in THE ARMY LAWYER 86, 87 (Feb. 1991) (similar).

<sup>140</sup> BOTHE, PARTSCH, & SOLF, NEW RULES 196 (AP I art. 35, ¶2.3.3) (“In applying para. 2 of Art. 35, the suffering or injury caused by a weapon must be judged in relation to the military utility of the weapon. The test is whether the suffering is needless, superfluous, or manifestly disproportionate to the military advantage reasonably expected from the use of the weapon. On the humanitarian side of the equation against which military advantage is to be balanced are such factors as the painfulness or severity of wounds, mortality rates, and the incidence of permanent damage or disfigurement and the feasibility of treatment under field conditions. Neither element of the equation can be taken in isolation. All such comparative judgments logically lead to an inquiry into how much suffering various weapons cause and whether available alternate weapons can achieve the same military advantage effectively but cause less suffering. The comparison of, and balancing between, suffering and military effectiveness is difficult in practice because neither side of the equation is easy to quantify. Inevitably, the assessment will be subjective even when sufficient agreed factual data are available on wound effects and military effectiveness.”).

have this effect.<sup>141</sup> The consideration of the military utility of the weapon and the suffering the weapon inflicts should be compared to other destructive mechanisms that States have used or retained for use and consider to be lawful.

A State's acceptance of a treaty prohibition against a weapon should not be understood as necessarily reflecting that State's conclusion that the weapon is calculated to cause superfluous injury. For example, the CCW and its Protocols generally do not reflect a conclusion that the weapons prohibited or restricted by them are calculated to cause superfluous injury.<sup>142</sup> On the other hand, a prohibition or restriction in a treaty can be relevant in determining that a weapon is not calculated to cause superfluous injury. For example, the CCW Amended Mines Protocol prohibits mines, booby-traps, and other devices that are designed or of a nature to cause unnecessary suffering.<sup>143</sup> Thus, this prohibition implicitly recognizes that not all mines, booby-traps, and other devices are calculated to cause superfluous injury.<sup>144</sup> In addition, even if a treaty that declared that certain weapons were calculated to cause superfluous injury, such treaty language would not necessarily mean that the weapon was prohibited by customary international law. For example, specially affected States might decline to ratify the treaty and decide to retain the right to use the weapon.<sup>145</sup>

**6.6.3.4 *Superfluous Injury Rule – the Circumstances to Be Assessed and Design Intent.*** In determining a weapon's legality, the weapon's planned uses and the normal circumstances in which it would be used should be considered.<sup>146</sup> It is not necessary to assess all possible uses or all possible circumstances.

**6.6.4 Weapons Modified for the Purpose of Aggravating the Harm Inflicted on Incapacitated Persons.** Weapons that have been modified for the purpose of aggravating the harm inflicted upon incapacitated persons are weapons that are prohibited by the superfluous

---

<sup>141</sup> 1956 FM 27-10 (Change No. 1 1976) ¶34b (“What weapons cause ‘unnecessary injury’ [within the meaning of Hague IV Reg. art. 23(e)] can only be determined in light of the practice of States in refraining from the use of a given weapon because it is believed to have that effect.”).

<sup>142</sup> Refer to § 19.21.1.3 (CCW and Customary International Law).

<sup>143</sup> Refer to § 6.12.4.1 (Mines, Booby-Traps, and Other Devices Calculated to Cause Superfluous Injury).

<sup>144</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 11, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 11 (CCW Amended Mines Protocol art. 3(3) “reiterates a proscription already in place as a matter of customary international law applicable to all weapons. It also implicitly makes clear that mines, booby-traps and other devices are not, per se, of a nature to cause unnecessary suffering, for if that were considered to be the case, no such rule would be necessary and they would be prohibited entirely.”).

<sup>145</sup> Refer to § 1.8.2.3 (Specially Affected States).

<sup>146</sup> WILLIAM BOOTHBY, *WEAPONS AND THE LAW OF ARMED CONFLICT* 62 (2009) (“So, in the context of superfluous injury and unnecessary suffering, the comparator [or excessiveness] must be determined by ‘the generic purpose or purposes for which the weapon has been designed or adapted, or the purpose or purposes for which that weapon will generally be used’. The word ‘generic’ is used here to show that we are specifically not referring to the use of the weapon on a particular occasion in prosecution of a specific mission. The word ‘generally’ indicates that it is the normal applications of the weapon that are to be considered, not some unusual application, or misapplication, of it which lies outside the scope of purposes for which it was procured or adapted.”).

injury rule.<sup>147</sup>

For example, adding poison to bullets or other substances to weapons for the purpose of increasing the pain caused by the wound, to make wounds more difficult to treat, or to make death inevitable, would be prohibited. Such a substance would not increase the military utility of the weapon to incapacitate the enemy (*i.e.*, it would have no corresponding military advantage); thus, the additional injury would be superfluous when compared to the injury caused by the weapon without such a substance.

Weapons that have been modified are readily assessed under the superfluous injury rule because the unmodified version of the weapon provides a clear point of comparison. It is difficult to compare, in the abstract, the military utility of a weapon against the suffering it causes. But, by comparing an existing weapon to a proposed modification, one can evaluate more easily whether the proposed changes are warranted by legitimate military reasons (*e.g.*, to increase the ability of the weapon to incapacitate the enemy) or illegitimate reasons (*e.g.*, cruelty) because, in considering a modification to the weapon, one would expect that a number of relevant factors would be the same as between the existing weapon and the proposed modification.

## 6.7 INHERENTLY INDISCRIMINATE WEAPONS

Inherently indiscriminate weapons, *i.e.*, weapons that are incapable of being used in accordance with the principles of distinction and proportionality, are prohibited. Such weapons include weapons that are specifically designed to conduct attacks against the civilian population as well as weapons that, when used, would necessarily cause incidental harm that is excessive compared the military advantage expected to be gained from their use.

6.7.1 Inherently Indiscriminate Weapons – Principles of Distinction and Proportionality. The prohibition against inherently indiscriminate weapons results from the principles of distinction and proportionality.<sup>148</sup> Attacks must be conducted in accordance with the principles of distinction and proportionality.<sup>149</sup> Consequently, a weapon that, when used, would necessarily violate these rules, would be prohibited.<sup>150</sup>

---

<sup>147</sup> *Consider* The Declaration of St. Petersburg, 1868, *reprinted in* 1 AJIL SUPPLEMENT: OFFICIAL DOCUMENTS 95 (1907) (considering that it would “be contrary to the laws of humanity” to use “arms which uselessly aggravate the sufferings of disabled men, or render their death inevitable;”).

<sup>148</sup> *Refer to* § 2.5 (Distinction); § 2.4 (Proportionality).

<sup>149</sup> *Refer to* § 5.5 (Discrimination in Conducting Attacks); § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>150</sup> *See* Legality of the Threat or Use of Nuclear Weapons, Advisory Opinion, 1996 I.C.J. 226, 257 (¶78) (“The cardinal principles contained in the texts constituting the fabric of humanitarian law are the following. The first is aimed at the protection of the civilian population and civilian objects and establishes the distinction between combatants and non-combatants; States must never make civilians the object of attack and must consequently never use weapons that are incapable of distinguishing between civilian and military targets.”); GREENSPAN, MODERN LAW OF LAND WARFARE 359 (“[I]t must be borne in mind that indiscriminate bombardment of the civilian population is prohibited, so that weapons which must necessarily have that effect when used are also illegal.”).

Few weapons have been understood to be inherently indiscriminate weapons.<sup>151</sup> This may be the case because weapons that are more accurate and precise are more militarily effective; the military and humanitarian interests coincide.<sup>152</sup> On the other hand, the few weapons that have been understood to violate this rule have been directed at illegitimate objectives, such as attacking and terrorizing the civilian population.<sup>153</sup>

6.7.2 Inherently Indiscriminate Weapons – Circumstances to Be Assessed and Design Intent. The test for whether a weapon is inherently indiscriminate is whether its use necessarily violates the principles of distinction and proportionality, *i.e.*, whether its use is expected to be illegal in all circumstances.

Special consideration should be given to the planned or intended uses of the weapon, *i.e.*, those that are reasonably foreseeable. For example, a practitioner conducting a legal review of the proposed acquisition or procurement of a weapon should consider the uses of the weapon that are planned and reflected in the design documents. Practitioners should advise if the planned uses of the weapon are not consistent with the principles of distinction and proportionality, with a view towards ensuring that either the weapon or the planned uses are modified accordingly.

The wide range of circumstances in which weapons can lawfully be used should also be considered before concluding that a weapon is prohibited as inherently indiscriminate. For example, in some circumstances, an area of land can be a military objective.<sup>154</sup> Thus, even if it would not be possible for the weapon to be directed against enemy combatants, if the weapon could be directed at specific areas, it would be unlikely that the weapon would be considered inherently indiscriminate. As another example, in some circumstances, feasible precautions can mitigate the incidental harm expected to be caused so that it is not excessive.<sup>155</sup> Whether such precautions could be taken to mitigate the expected incidental harm caused by the weapon under review should be considered before concluding that a weapon is prohibited as inherently indiscriminate.

### 6.7.3 Weapons Designed to Conduct Attacks Against the Civilian Population. Inherently

---

<sup>151</sup> Christopher Greenwood, *Legal Aspects of current Regulations*, KEYNOTE SPEECHES, THIRD INTERNATIONAL WORKSHOP ON WOUND BALLISTICS (Thun, Switzerland, Mar. 28-29, 2001) (“There are virtually no cases of weapons which are inherently indiscriminate. The United States Naval Commander’s Handbook, one of the most modern texts and an important piece of State practice, gives in its annotations an illustration of an inherently indiscriminate weapon – a proposal during the Second World War to tie tiny incendiary bombs around the necks of bats. The bats would then be released from aircraft over enemy targets, would glide down into the trees and into the rafters of buildings and set fire to those buildings when the incendiaries exploded. If that is the best example that can be given of an inherently indiscriminate weapon, there are not very many inherently indiscriminate weapons in existence.”).

<sup>152</sup> ICRC AP COMMENTARY 621 (¶1958) (“It should be noted that most armies endeavour to use accurate weapons as attacks which do not strike the intended objective result in a loss of time and equipment without giving a corresponding advantage. ... Here the military interests and humanitarian requirements coincide.”).

<sup>153</sup> Refer to § 6.7.3 (Weapons Designed to Conduct Attacks Against the Civilian Population).

<sup>154</sup> Refer to § 5.6.8.4 (Examples of Military Objectives – Places of Military Significance).

<sup>155</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

indiscriminate weapons include those that are specifically designed to be used to conduct attacks against the civilian population, including attacks to terrorize the civilian population. For example, Japanese bombs attached to free-floating, long-range balloons used during World War II were unlawful for this reason.<sup>156</sup> Also, German long-range rockets without guidance systems used during World War II were similarly illegal.<sup>157</sup>

6.7.4 Weapons That Necessarily Cause Excessive Incidental Harm. Indiscriminate weapons also include weapons whose anticipated incidental effects are necessarily excessive compared to the military advantages expected to be gained from using the weapon.<sup>158</sup> To be clear, the principle of proportionality does not prohibit the use of weapons whose destructive force cannot be limited to a specific military objective.<sup>159</sup> Such weapons may be used when their use is required against a target of sufficient military importance to outweigh the incidental harm

---

<sup>156</sup> For example, ROBERT C. MIKESH, JAPAN'S WORLD WAR II BALLOON BOMB ATTACKS ON NORTH AMERICA 1 (1973) ("In a desperate attempt to find a means of reprisal [for the Doolittle raid], the Japanese conceived a method to strike directly at the American continent. Their plan was simple; launch balloons with incendiary and antipersonnel bombs attached, let them travel across the Pacific with the prevailing winds, and drop on American cities, forests, and farmlands. It took over two years to design the balloons, bombs, and automatic dropping mechanism. ... Finally, on 3 November 1944, the first of more than nine thousand bomb-bearing balloons was released. It is estimated that nearly one thousand of the death-dealing balloons must have reached the North American continent.").

<sup>157</sup> For example, SPAIGHT, AIR POWER AND WAR RIGHTS 214-15 ("As used by the Germans in 1944-45, [the V-2 long-range rocket] was simply a crude instrument of random bombardment, utterly lacking in precision, and its military value was *nil*. While such a weapon is not banned in terms by any international convention, the use of it could not be regarded as compatible with the observance of certain rules which are the subject of definite international agreement, such as those forbidding the bombardment 'by any means' of undefended towns and villages, and those enjoining the sparing, as far as possible, of 'buildings dedicated to religious, art, science or charitable purposes, historic monuments, hospitals and places where the sick and wounded are collected.' ... The flying [V-1] bomb is another abominable projectile which might well be prohibited at the same time. It is, again, a weapon which cannot really be aimed at all.").

<sup>158</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-3c ("In addition, some weapons, though capable of being directed only at military objectives, may have otherwise uncontrollable effects so as to cause disproportionate civilian injuries or damage. Biological warfare is a universally agreed illustration of such an indiscriminate weapon. Uncontrollable effects, in this context, may include injury to the civilian population of other states as well as injury to an enemy's civilian population. Uncontrollable refers to effects which escape in time or space from the control of the user as to *necessarily* create risk to civilian persons or objects excessive in relation to the military advantage anticipated. International law does not require that a weapon's effects be strictly confined to the military objectives against which it is directed, but it does restrict weapons whose foreseeable effects result in unlawful disproportionate injury to civilians or damage to civilian objects.").

<sup>159</sup> J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Senator Edward Kennedy, Sept. 22, 1972, reprinted in 67 AJIL 122, 124 (1973) ("The existing laws of armed conflict do not prohibit the use of weapons whose destructive force cannot be limited to a specific military objective. The use of such weapons is not proscribed when their use is necessarily required against a military target of sufficient importance to outweigh inevitable, but regrettable, incidental casualties to civilians and destruction of civilian objects."). See also Edward Cummings, Head of the U.S. Delegation to CCW Group of Government Experts, *Statement*, Jul. 17, 2002 ("On proportionality. As the paper noted, the law of armed conflict does not require the effects of weapons to be limited such that they cause no civilian casualties. This would, unfortunately, be impossible. It does however, as Professor Greenwood points out, require compliance with the principle of proportionality with respect to the use of weapons and thus requires an assessment of the risks posed to civilians in the context of the military advantage hoped for.").

that is expected to result.<sup>160</sup>

As with the superfluous injury rule, in assessing whether weapons necessarily cause excessive incidental harm, it will be important to consider whether the practice of States demonstrates that they are prohibited as such.<sup>161</sup> For example, the United States regards nuclear weapons not to be inherently disproportionate weapons.<sup>162</sup>

Weapons that necessarily cause excessive incidental harm include “blind” or essentially random weapons that are incapable of being controlled, and thus, cannot, with any degree of certainty, be directed against a military objective.<sup>163</sup> The expected incidental harm from the use of such weapons outweighs the little, if any, military utility of such weapons.<sup>164</sup>

Weapons that necessarily cause excessive incidental harm also include weapons whose uncontrollable nature is such that, even when directed against military objectives, they otherwise are expected invariably to cause excessive incidental harm. For example, using communicable diseases such as the plague as weapons has been prohibited, in part because such use would almost inevitably cause excessive incidental harm among the civilian population compared to the military advantages from their use.<sup>165</sup>

## 6.8 POISON, POISONED WEAPONS, POISONOUS GASES, AND OTHER CHEMICAL WEAPONS

The use of poison, poisoned weapons, poison and asphyxiating gases, and other chemical weapons is prohibited.

**6.8.1 Poison and Poisoned Weapons.** It is especially forbidden to use poison or poisoned weapons.<sup>166</sup> For example, poisoning the enemy’s food or water supply is prohibited.<sup>167</sup>

---

<sup>160</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>161</sup> Refer to § 6.6.3.3 (Clearly Disproportionate).

<sup>162</sup> *Written Statement of the Government of the United States of America*, 23, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“Whether an attack with nuclear weapons would be disproportionate depends entirely on the circumstances, including the nature of the enemy threat, the importance of destroying the objective, the character, size and likely effects of the device, and the magnitude of the risk to civilians. Nuclear weapons are not inherently disproportionate.”).

<sup>163</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-3c (“Indiscriminate weapons are those incapable of being controlled, through design or function, and thus they can not, with any degree of certainty be directed against military objectives.”); BOTHE, PARTSCH, & SOLF, *NEW RULES* 305 (AP I art. 51, ¶2.5.2.2) (“The provision of subpara. 4.b. to methods which cannot be directed at a specific military objective prohibits ‘blind’ weapons which cannot, with any reasonable assurance, be directed against a military objective. Attaching incendiary or antipersonnel bombs to free floating balloons, or using long range missiles with only a rudimentary guidance system are examples of this type of weapon.”).

<sup>164</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-3c (“Use of such essentially unguided weapons could be expected to cause unlawful excessive injury to civilians and damage to civilian objects.”).

<sup>165</sup> Refer to § 6.9.1 (Biological Weapons – Prohibition on Use as a Method of Warfare).

<sup>166</sup> See HAGUE IV REG. art. 23(a) (it is especially forbidden “[t]o employ poison or poisoned weapons;”); 1899 HAGUE II REG. art. 23(a) (same); LIEBER CODE art. 16 (military necessity “does not admit of the use of poison in any

Similarly, adding poison to weapons is prohibited. The rule against poison and poisoned weapons reflected in the 1899 Hague II Regulations has been interpreted not to include poison gas weapons that were developed during the modern era, which were subsequently prohibited.<sup>168</sup>

Poisons are understood to be substances that cause death or disability with permanent effects when, in even small quantities, they are ingested, enter the lungs or bloodstream, or touch the skin.<sup>169</sup>

The longstanding prohibition against poison is based on: (1) their uncontrolled character; (2) the inevitability of death or permanent disability; and (3) the traditional belief that it is treacherous to use poison.<sup>170</sup>

6.8.1.1 *Designed to Injure by Poison.* This prohibition on poison applies to weapons that are designed to injure or kill by poison. It does not apply to weapons that injure or cause destruction by other means that also produce toxic byproducts.<sup>171</sup>

6.8.1.2 *Death or Permanent Disability to Persons.* The prohibition on using poison applies to use against human beings.<sup>172</sup> Thus, the prohibition on the use of poison has been understood not to prohibit the use of chemical herbicides that are harmless to human

---

way.”); LIEBER CODE art. 70 (“The use of poison in any manner, be it to poison wells, or food, or arms, is wholly excluded from modern warfare. He that uses it puts himself out of the pale of the law and usages of war.”).

<sup>167</sup> 1958 UK MANUAL ¶112 (“Water in wells, pumps, pipes, reservoirs, lakes, rivers, and the like, from which the enemy may draw drinking water, must not be poisoned or contaminated. The poisoning or contamination of water is not made lawful by posting up a notice informing the enemy that the water has been thus polluted. There is, however, no rule to prevent measures being taken to dry up springs and to divert rivers and aqueducts.”).

<sup>168</sup> WILLIAM H. BOOTHBY, WEAPONS AND THE LAW OF ARMED CONFLICT 122 (2009) (“The Hague Peace Conference of 1899 tackled the problem [of poison gas attacks]. The delegates at that conference made no direct association between poison, which they considered to be an ancient and barbarous form of warfare, and poison gas, which was seen as a novel weapon the product of scientific advance.”).

<sup>169</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-4f (“Poisons are biological or chemical substances causing death or disability with permanent effects when, in even small quantities, they are ingested, enter the lungs or bloodstream, or touch the skin.”).

<sup>170</sup> 1976 AIR FORCE PAMPHLET 110-31 ¶6-4f (“The longstanding customary prohibition against poison is based on their uncontrolled character and the inevitability of death or permanent disability as well as on a traditional belief that it is treacherous to use poison.”).

<sup>171</sup> *Written Statement of the Government of the United States of America*, 24, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“This prohibition was established with particular reference to projectiles that carry poison into the body of the victim. It was not intended to apply, and has not been applied, to weapons that are designed to injure or cause destruction by other means, even though they also may create toxic byproducts. For example, the prohibition on poison weapons does not prohibit conventional explosives or incendiaries, even though they may produce dangerous fumes. By the same token, it does not prohibit nuclear weapons, which are designed to injure or cause destruction by means other than poisoning the victim, even though nuclear explosions may also create toxic radioactive byproducts.”).

<sup>172</sup> 1956 FM 27-10 (Change No. 1 1976) ¶37b (explaining that the prohibition against poison or poison weapons in the Hague IV Regulations “prohibits the use in war of poison or poisoned weapons against human beings.”).

beings.<sup>173</sup> Other rules, however, may apply to the use of herbicides.<sup>174</sup>

6.8.2 Asphyxiating, Poisonous, or Other Gases, and All Analogous Liquids, Materials, or Devices. It is prohibited to use in war asphyxiating, poisonous, or other gases, and all analogous liquids, materials, or devices.<sup>175</sup> The United States has determined that this rule is part of customary international law.<sup>176</sup>

Although the rule appears quite broad, it has been understood only to apply to the use of gases that are designed to kill or injure human beings.<sup>177</sup> Thus, herbicides and riot control agents

---

<sup>173</sup> J. Fred Buzhardt, General Counsel, Department of Defense, Letter to Chairman Fulbright, Senate Committee on Foreign Relations, Apr. 5, 1971, 10 INTERNATIONAL LEGAL MATERIALS 1300, 1302 (1971) (explaining the DoD view that it does “not regard chemical herbicides, harmless to man, as poison or poisoned weapons, for if they had been so considered, their use against crops intended solely for the consumption by the enemy’s armed forces would clearly have been prohibited by Article 23(a) of the Hague Regulations.”).

<sup>174</sup> Refer to § 6.17 (Herbicides).

<sup>175</sup> 1925 GENEVA GAS AND BACTERIOLOGICAL PROTOCOL (“Whereas the use in war of asphyxiating, poisonous or other gases, and of all analogous liquids materials or devices, has been justly condemned by the general opinion of the civilised world; and Whereas the prohibition of such use has been declared in Treaties to which the majority of Powers of the world are Parties; and To the end that this prohibition shall be universally accepted as part of International Law, binding alike the conscience and the practice of nations; DECLARE: That the High Contracting Parties, so far as they are not already Parties to Treaties prohibiting such use, accept this prohibition, agree to extend this prohibition to the use of bacteriological methods of warfare and agree to be bound as between themselves according to the terms of this declaration.”). Consider Treaty in Relation to the Use of Submarines and Noxious Gases in Warfare, art. 5, Feb. 6, 1922, reprinted in 16 AJIL SUPPLEMENT: OFFICIAL DOCUMENTS 57, 59 (1922) (“The use in war of asphyxiating, poisonous or other gases, and all analogous liquids, materials or devices, having been justly condemned by the general opinion of the civilized world and a prohibition of such use having been declared in treaties to which a majority of the civilized Powers are parties, The Signatory Powers, to the end that this prohibition shall be universally accepted as a part of international law binding alike the conscience and practice of nations, declare their assent to such prohibition, agree to be bound thereby as between themselves and invite all other civilized nations to adhere thereto.”); Declaration to Abstain From the Use of Projectiles the Object of Which Is the Diffusion of Asphyxiating or Deleterious Gases, Jul. 29, 1899, reprinted in 1 AJIL SUPPLEMENT: OFFICIAL DOCUMENTS 157 (1907) (“The Contracting Powers agree to abstain from the use of projectiles the object of which is the diffusion of asphyxiating or deleterious gases.”).

<sup>176</sup> Franklin D. Roosevelt, *Statement Warning the Axis Against Using Poison Gas*, Jun. 8, 1943 (“From time to time since the present war began there have been reports that one or more of the Axis powers were seriously contemplating use of poisonous or noxious gases or other inhumane devices of warfare. ... Use of such weapons has been outlawed by the general opinion of civilized mankind.”); Myron C. Cramer, The Judge Advocate General, U.S. Army, *Memorandum re: Destruction of Crops by Chemicals*, ¶2, Mar. 1945, 10 INTERNATIONAL LEGAL MATERIALS 1304, 1305 (1971) (noting that “[a]n exhaustive study of the source materials, however, warrants the conclusion that a customary rule of international law has developed by which poisonous gases and those causing unnecessary suffering are prohibited”).

<sup>177</sup> Myron C. Cramer, The Judge Advocate General, U.S. Army, *Memorandum re: Destruction of Crops by Chemicals*, ¶3, Mar. 1945, 10 INTERNATIONAL LEGAL MATERIALS 1304, 1305 (1971) (“Nevertheless, the scope of this prohibition is restricted. It does not constitute a complete ban on all gases and chemical substances. A distinction exists between the employment of poisonous and deleterious gases against enemy human beings, and the use of chemical agents to destroy property, such as natural vegetation, crop cultivations, and the like. ... The true motive behind the movement to outlaw poison gas is that it is considered a barbarous and inhumane weapon against human beings, because it inflicts unnecessary suffering upon them.”).

are not prohibited by this rule.<sup>178</sup> In addition, the rule is understood only to prohibit weapons whose prime, or even exclusive, effect is to poison or asphyxiate.<sup>179</sup> Thus, for example, smoke, flame, napalm, conventional explosives, and nuclear weapons are not covered by this rule, even though these weapons may produce asphyxiating or poisonous byproducts.<sup>180</sup>

6.8.3 Chemical Weapons. Chemical weapons are subject to a number of prohibitions.

6.8.3.1 Definition of Chemical Weapons. Under the Chemical Weapons Convention, chemical weapons mean the following, together or separately:

- (a) Toxic chemicals and their precursors, except where intended for purposes not prohibited under this Convention, as long as the types and quantities are consistent with such purposes;
- (b) Munitions and devices, specifically designed to cause death or other harm through the toxic properties of those toxic chemicals specified in subparagraph (a), which would be released as a result of the employment of such munitions and devices;
- (c) Any equipment specifically designed for use directly in connection with the employment of munitions and devices specified in subparagraph (b).<sup>181</sup>

*Toxic chemicals* refer to any chemical that through its chemical action on life processes can cause death, temporary incapacitation, or permanent harm to humans or animals. This includes all such chemicals, regardless of their origin or of their method of production, and regardless of whether they are produced in facilities, in munitions, or elsewhere.<sup>182</sup> Chemicals

---

<sup>178</sup> William P. Rogers, *Letter of Submittal*, Aug. 11, 1970, MESSAGE FROM THE PRESIDENT TRANSMITTING THE 1925 GENEVA GAS AND BACTERIOLOGICAL PROTOCOL VI (“It is the United States understanding of the Protocol that it does not prohibit the use in war of riot-control agents and chemical herbicides.”).

<sup>179</sup> Legality of the Threat or Use of Nuclear Weapons, Advisory Opinion, 1996 I.C.J. 226, 248 (¶55) (“The Court will observe that the Regulations annexed to the Hague Convention IV do not define what is to be understood by ‘poison or poisoned weapons’ and that different interpretations exist on the issue. Nor does the 1925 Protocol specify the meaning to be given to the term ‘analogous materials or devices’. The terms have been understood, in the practice of States, in their ordinary sense as covering weapons whose prime, or even exclusive, effect is to poison or asphyxiate. This practice is clear, and the parties to those instruments have not treated them as referring to nuclear weapons.”).

<sup>180</sup> See William P. Rogers, *Letter of Submittal*, Aug. 11, 1970, MESSAGE FROM THE PRESIDENT TRANSMITTING THE 1925 GENEVA GAS AND BACTERIOLOGICAL PROTOCOL VI (“Smoke, flame, and napalm are also not covered by the Protocol.”); *Written Statement of the Government of the United States of America*, 25, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“Once again, the [1925 Geneva Gas and Bacteriological] Protocol does not prohibit conventional explosives or incendiary weapons, even though they may produce asphyxiating or poisonous byproducts, and it likewise does not prohibit nuclear weapons.”); GREENSPAN, MODERN LAW OF LAND WARFARE 359 (“The use of smoke for smoke screens concealing movements and operations could not be considered an infringement of the law against gas warfare.”).

<sup>181</sup> CHEMICAL WEAPONS CONVENTION art. 2(1).

<sup>182</sup> CHEMICAL WEAPONS CONVENTION art. 2(2) (“‘Toxic Chemical’ means: Any chemical which through its chemical action on life processes can cause death, temporary incapacitation or permanent harm to humans or

that only cause harm to plants, such as herbicides, are not covered.<sup>183</sup> In addition, toxic chemicals intended for purposes not prohibited by the Chemical Weapons Convention are also excluded, so long as they are of a type and quantity consistent with these purposes that are not prohibited.<sup>184</sup>

*Precursor* means any chemical reactant (including any key component of a binary or multicomponent chemical system) that takes part at any stage in the production by whatever method of a toxic chemical.<sup>185</sup> *Key component of a binary or multicomponent chemical system* means the precursor that plays the most important role in determining the toxic properties of the final product and reacts rapidly with other chemicals in the binary or multicomponent system.<sup>186</sup>

Equipment specifically designed for use directly in connection with the employment of such munitions and devices only applies to equipment designed solely for use with chemical weapons and does not, for example, include equipment that is designed also for purposes that are not prohibited.<sup>187</sup>

6.8.3.2 *Prohibitions With Respect to Chemical Weapons.* Chemical weapons are subject to a number of prohibitions. It is prohibited:

- to use chemical weapons;
- to develop, produce, otherwise acquire, stockpile or retain chemical weapons, or transfer,

---

animals. This includes all such chemicals, regardless of their origin or of their method of production, and regardless of whether they are produced in facilities, in munitions or elsewhere. (For the purpose of implementing this Convention, toxic chemicals which have been identified for the application of verification measures are listed in Schedules contained in the Annex on Chemicals.”). See also *Article-by-Article Analysis of the Chemical Weapons Convention*, 9, Attachment to Peter Tarnoff, Acting, *Letter of Submittal*, Nov. 20, 1993, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CHEMICAL WEAPONS CONVENTION 9 (“The wording of this definition [in paragraph 2 of Article 2] is intended to cover toxins, as well as organic and inorganic chemicals, and chemicals produced by binary and multicomponent weapons.”).

<sup>183</sup> Refer to § 6.17 (Herbicides).

<sup>184</sup> Refer to § 6.8.3.4 (Certain Uses of Toxic Chemicals Not Prohibited).

<sup>185</sup> CHEMICAL WEAPONS CONVENTION art. 2(3) (“‘Precursor’ means: Any chemical reactant which takes part at any stage in the production by whatever method of a toxic chemical. This includes any key component of a binary or multicomponent chemical system.”).

<sup>186</sup> CHEMICAL WEAPONS CONVENTION art. 2(4) (“‘Key Component of Binary or Multicomponent Chemical Systems’ (hereinafter referred to as ‘key component’) means: The precursor which plays the most important role in determining the toxic properties of the final product and reacts rapidly with other chemicals in the binary or multicomponent system.”).

<sup>187</sup> See *Article-by-Article Analysis of the Chemical Weapons Convention*, 9, Attachment to Peter Tarnoff, Acting, *Letter of Submittal*, Nov. 20, 1993, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CHEMICAL WEAPONS CONVENTION 9 (“Note that the term ‘directly’ in subparagraph 1(c) is intended to mean ‘solely.’ Thus, dual-use munitions and their components are not considered to be chemical weapons provided they do not otherwise meet this definition. For example, dual-use munitions may be used to disperse chemicals not prohibited by the Convention, such as smoke, provided the munitions have not been specifically designed to cause death through the release of toxic chemicals. Also, dual-use weapons systems such as artillery or aircraft that are capable of employing chemical weapons are not covered by this definition, and so are not subject to the destruction requirements.”).

directly or indirectly, chemical weapons to anyone;

- to engage in any military preparations to use chemical weapons; and
- to assist, encourage, or induce, in any way, anyone to engage in any activity prohibited to a Party to the Chemical Weapons Convention.<sup>188</sup>

These prohibitions apply in any circumstances. For example, chemical weapons may not be used in international armed conflict and non-international armed conflicts.<sup>189</sup> Similarly, chemical weapons may not be used in retaliation after a State has suffered from a chemical weapons attack, even if that attack has been conducted by a State that is not a Party to the Chemical Weapons Convention.<sup>190</sup>

6.8.3.3 *Obligation to Destroy Certain Chemical Weapons and Chemical Weapons Production Facilities.* In addition, a Party to the Chemical Weapons Convention has an obligation to destroy chemical weapons or chemical weapon production facilities it owns or possesses or that are located in a place under its jurisdiction or control.<sup>191</sup> If U.S. armed forces encounter chemical weapons or chemical weapon production facilities during armed conflict, U.S. national authorities should be notified as soon as practicable. In addition, with due regard for safety and security considerations, reasonable efforts should be made to secure and retain information regarding the chemical weapons.<sup>192</sup>

6.8.3.4 *Certain Uses of Toxic Chemicals Not Prohibited.* The Chemical Weapons

---

<sup>188</sup> CHEMICAL WEAPONS CONVENTION art. 1(1) (“Each State Party to this Convention undertakes never under any circumstances: (a) To develop, produce, otherwise acquire, stockpile or retain chemical weapons, or transfer, directly or indirectly, chemical weapons to anyone; (b) To use chemical weapons; (c) To engage in any military preparations to use chemical weapons; (d) To assist, encourage or induce, in any way, anyone to engage in any activity prohibited to a State Party under this Convention.”).

<sup>189</sup> *Article-by-Article Analysis of the Chemical Weapons Convention*, 4, Attachment to Peter Tarnoff, Acting, *Letter of Submittal*, Nov. 20, 1993, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CHEMICAL WEAPONS CONVENTION 4 (“Moreover, the prohibition on the use of chemical weapons extends beyond solely their use in international armed conflicts, i.e. chemical weapons may not be used in any type of situation, including purely domestic conflicts, civil wars or state-sponsored terrorism. As such, this article closes a loophole in the Geneva Protocol of 1925, which covered only uses in war, i.e. international armed conflicts.”).

<sup>190</sup> *Article-by-Article Analysis of the Chemical Weapons Convention*, 4, Attachment to Peter Tarnoff, Acting, *Letter of Submittal*, Nov. 20, 1993, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CHEMICAL WEAPONS CONVENTION 4 (“The prohibitions are phrased as undertakings ‘never under any circumstances’ to engage in certain activities related to chemical weapons. ... Thus, the prohibitions apply to a State Party even if chemical weapons are used against it and even if those chemical weapons are used by a State not Party to the Convention, i.e. even ‘retaliatory use’ of chemical weapons is banned.”).

<sup>191</sup> CHEMICAL WEAPONS CONVENTION art. 1(2) (“Each State Party undertakes to destroy chemical weapons it owns or possesses, or that are located in any place under its jurisdiction or control, in accordance with the provisions of this Convention.”); CHEMICAL WEAPONS CONVENTION art. 1(4) (“Each State Party undertakes to destroy any chemical weapons production facilities it owns or possesses, or that are located in any place under its jurisdiction or control, in accordance with the provisions of this Convention.”).

<sup>192</sup> See Ireland, Facilitator’s Paper, Concerning the Mandate Created by the Executive Council at its Fifty-Eighth Sessions Under the Heading ‘Other Destruction-Related Issues,’ Oct. 8, 2010, Organization for the Prohibition of Chemical Weapons Doc. No. EC-62/NAT.11.

Convention does not prohibit the use of toxic chemicals and their precursors for certain purposes.<sup>193</sup> Toxic chemicals and their precursors that are used for these purposes are not considered chemical weapons, so long as they are of a type and quantity consistent with these permitted purposes.<sup>194</sup> These purposes include:

- industrial, agricultural, research, medical, pharmaceutical, or other peaceful purposes;
- protective purposes, namely those purposes directly related to protection against toxic chemicals and to protection against chemical weapons;
- military purposes not connected with the use of chemical weapons and not dependent on the use of the toxic properties of chemicals as a method of warfare; and
- law enforcement, including domestic riot control purposes.<sup>195</sup>

Seeking to develop and use means of protection against chemical weapons is permissible, provided such protection is not intended to facilitate the use of chemical weapons or for other purposes prohibited by the Chemical Weapons Convention.<sup>196</sup>

## 6.9 BIOLOGICAL WEAPONS

Biological weapons, including bacteriological and toxin weapons, are subject to a number of prohibitions and restrictions.

**6.9.1 Biological Weapons – Prohibition on Use as a Method of Warfare.** It is prohibited to use bacteriological methods of warfare.<sup>197</sup> This prohibition includes all biological methods of

---

<sup>193</sup> CHEMICAL WEAPONS CONVENTION art. 6(1) (“Each State Party has the right, subject to the provisions of this Convention, to develop, produce, otherwise acquire, retain, transfer and use toxic chemicals and their precursors for purposes not prohibited under this Convention.”).

<sup>194</sup> *Article-by-Article Analysis of the Chemical Weapons Convention*, 13, Attachment to Peter Tarnoff, Acting, *Letter of Submittal*, Nov. 20, 1993, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CHEMICAL WEAPONS CONVENTION 13 (“Paragraph 9 of Article II defines, in four subparagraphs, the phrase ‘purposes not prohibited under this Convention.’ This phrase is important because it forms the basis for many exceptions to obligations or prohibited activities. ... This provision means that toxic chemicals and their precursors that are used for one or more of these enumerated purposes are not chemical weapons, so long as they are of a type and quantity consistent with these permitted purposes.”).

<sup>195</sup> CHEMICAL WEAPONS CONVENTION art. 2(9) (“‘Purposes Not Prohibited Under this Convention’ means: (a) Industrial, agricultural, research, medical, pharmaceutical or other peaceful purposes; (b) Protective purposes, namely those purposes directly related to protection against toxic chemicals and to protection against chemical weapons; (c) Military purposes not connected with the use of chemical weapons and not dependent on the use of the toxic properties of chemicals as a method of warfare; (d) Law enforcement including domestic riot control purposes.”).

<sup>196</sup> CHEMICAL WEAPONS CONVENTION art. 10(2) (“Nothing in this Convention shall be interpreted as impeding the right of any State Party to conduct research into, develop, produce, acquire, transfer or use means of protection against chemical weapons, for purposes not prohibited under this Convention.”).

<sup>197</sup> Richard Nixon, *Statement on Chemical and Biological Defense Policies and Programs*, Nov. 25, 1969, 1969 PUBLIC PAPERS OF THE PRESIDENTS 968 (“The United States shall renounce the use of lethal biological agents and weapons, and all other methods of biological warfare.”); 1925 GENEVA GAS AND BACTERIOLOGICAL PROTOCOL

warfare and the use in warfare of toxin weapons.<sup>198</sup> For example, it is prohibited to use plague as a weapon.<sup>199</sup>

A prohibition against the use of biological weapons may be understood to result from U.S. obligations in the Biological Weapons Convention to refrain from developing, acquiring, or retaining biological weapons.<sup>200</sup>

Bacteriological or biological warfare is prohibited, at least in part, because it can have massive, unpredictable, and potentially uncontrollable consequences.<sup>201</sup>

6.9.1.1 *Toxin Weapons*. The term *toxin* refers to poisonous chemical substances that are naturally produced by living organisms, and that, if present in the body, produce effects similar to disease in the human body.<sup>202</sup> Toxins are not living organisms and thus are not

---

(The High Contracting Parties agree to prohibit “the use of bacteriological methods of warfare and agree to be bound as between themselves according to the terms of this declaration.”).

<sup>198</sup> William P. Rogers, *Letter of Submittal*, Aug. 11, 1970, MESSAGE FROM THE PRESIDENT TRANSMITTING THE 1925 GENEVA GAS AND BACTERIOLOGICAL PROTOCOL VI (“The United States considers the term ‘bacteriological methods of warfare’ as used in the Protocol encompasses all biological methods of warfare and the use in warfare of toxins however produced.”).

<sup>199</sup> *For example, Verdict of the Military Tribunal, MATERIALS ON THE TRIAL OF FORMER SERVICEMEN OF THE JAPANESE ARMY CHARGED WITH MANUFACTURING AND EMPLOYING BACTERIOLOGICAL WEAPONS* 529-30 (1950) (“The Japanese imperialists employed bacteriological weapons in the war against China and in sabotage raids against the U.S.S.R. In 1940 a special expedition of Detachment 731 commanded by General **Ishii** was despatched to the theatre of hostilities in Central China, where, by dropping plague-infected fleas from aircraft with special apparatus, it caused a plague epidemic in the Nimpo area. This criminal operation which brought in its wake thousands of victims among the peaceful Chinese population was filmed, and this film was later demonstrated in Detachment 731 to representatives of the High Command of the Japanese Army, among the accused **Yamada**.”).

<sup>200</sup> William P. Rogers, *Report of the Secretary of State*, Jun. 21, 1972, MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING THE CONVENTION ON THE PROHIBITION OF THE DEVELOPMENT, PRODUCTION, AND STOCKPILING OF BACTERIOLOGICAL (BIOLOGICAL) AND TOXIN WEAPONS, AND ON THEIR DESTRUCTION, OPENED FOR SIGNATURE AT WASHINGTON, LONDON AND MOSCOW ON APRIL 10, 1972, EXECUTIVE Q, 3 (1972) (“While this Convention does not explicitly ban the use of biological weapons, no Party to the Convention would be permitted to possess such weapons even in wartime. There is no possibility that a Party could use biological or toxin weapons without being in violation of Articles I and II of this Convention.”). *Refer to* § 6.9.2 (Biological Weapons – Prohibition on Development, Acquisition, or Retention).

<sup>201</sup> Richard Nixon, *Statement on Chemical and Biological Defense Policies and Programs*, Nov. 25, 1969, 1969 PUBLIC PAPERS OF THE PRESIDENTS 968 (“Biological weapons have massive, unpredictable and potentially uncontrollable consequences. They may produce global epidemics and impair the health of future generations.”); 1976 AIR FORCE PAMPHLET 110-31 ¶6-4(b) (“The wholly indiscriminate and uncontrollable nature of biological weapons has resulted in the condemnation of biological weapons by the international community, and the practice of states in refraining from their use in warfare has confirmed this rule.”); ICRC AP COMMENTARY 623 (¶1965) (“There are some weapons which by their very nature have an indiscriminate effect. The example of bacteriological means of warfare is an obvious illustration of this point.”).

<sup>202</sup> William P. Rogers, *Report of the Secretary of State*, Jun. 21, 1972, MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING THE CONVENTION ON THE PROHIBITION OF THE DEVELOPMENT, PRODUCTION, AND STOCKPILING OF BACTERIOLOGICAL (BIOLOGICAL) AND TOXIN WEAPONS, AND ON THEIR DESTRUCTION, OPENED FOR SIGNATURE AT WASHINGTON, LONDON AND MOSCOW ON APRIL 10, 1972, EXECUTIVE Q, 3 (1972) (“Toxins are poisonous chemical substances which are naturally produced by living organisms and which, if present in the body, produce effects comparable to those of infection by hostile organisms.”).

capable of reproducing themselves and transmissible from one person to another.<sup>203</sup>

Toxin weapons have been regulated in connection with biological weapons because they have been produced in facilities similar to those used for the production of biological agents.<sup>204</sup> However, even toxins that are produced synthetically, and not through biological processes, fall within these prohibitions. Substances that are classified as “toxins” for the purpose of applying the requirements of the Biological Weapons Convention may also be classified as “chemical weapons” that are subject to the requirements of the Chemical Weapons Convention.<sup>205</sup>

6.9.2 Biological Weapons – Prohibition on Development, Acquisition, or Retention. It is also prohibited to develop, produce, stockpile, or otherwise acquire or retain:

- microbial or other biological agents, or toxins whatever their origin or method of production, of types and in quantities that have no justification for prophylactic, protective, or other peaceful purposes; or
- weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflict.<sup>206</sup>

6.9.3 Biological Weapons – Prohibition on Transfer or Assisting, Encouraging, or Inducing the Manufacture or Acquisition. It is also prohibited to transfer or to assist, encourage, or induce others to acquire biological weapons.<sup>207</sup>

---

<sup>203</sup> Office of the White House Press Secretary, *The United States renounces offensive preparations for and the use of toxins as a method of warfare*, Feb. 14, 1970, reprinted in DEPARTMENT OF STATE, FOREIGN RELATIONS OF THE UNITED STATES, 1969-1976, VOLUME E-2, DOCUMENTS ON ARMS CONTROL, 1969-1972, Document 189 (2007) (“Toxins are chemical substances, not living organisms, and are so regarded by the U.N. Secretary General and the World Health Organization. Although the effects of some toxins are commonly described as disease, they are not capable of reproducing themselves and are not, transmissible from one person to another.”).

<sup>204</sup> Office of the White House Press Secretary, *The United States renounces offensive preparations for and the use of toxins as a method of warfare*, Feb. 14, 1970, reprinted in DEPARTMENT OF STATE, FOREIGN RELATIONS OF THE UNITED STATES, 1969-1976, VOLUME E-2, DOCUMENTS ON ARMS CONTROL, 1969-1972, Document 189 (2007) (“However, the production of toxins in any significant quantity would require facilities similar to those needed for the production of biological agents. If the United States continued to operate such facilities, it would be difficult for others to know whether they were being used to produce only toxins but not biological agents. Moreover, though toxins of the type useful for military purposes could conceivably be produced by chemical synthesis in the future, the end products would be the same and their effects would be indistinguishable from toxins produced by bacteriological or other biological processes.”).

<sup>205</sup> Refer to § 6.8.3.1 (Definition of Chemical Weapons).

<sup>206</sup> BIOLOGICAL WEAPONS CONVENTION art. 1 (“Each State Party to this Convention undertakes never in any circumstances to develop, produce, stockpile or otherwise acquire or retain: (1) microbial or other biological agents, or toxins whatever their origin or method of production, of types and in quantities that have no justification for prophylactic, protective or other peaceful purposes; (2) weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflict.”).

<sup>207</sup> BIOLOGICAL WEAPONS CONVENTION art. 3 (“Each State Party to this Convention undertakes not to transfer to any recipient whatsoever [sic], directly or indirectly, and not in any way to assist, encourage, or induce any State, group of States or international organisations to manufacture or otherwise acquire any of the agents, toxins, weapons, equipment or means of delivery specified in Article I of the Convention.”).

The exchange of equipment, materials, and scientific and technological information for the use of bacteriological and biological agents and toxins for peaceful purposes, such as the prevention of disease, however, is not restricted.<sup>208</sup>

## 6.10 CERTAIN ENVIRONMENTAL MODIFICATION TECHNIQUES

It is prohibited to use environmental modification techniques having widespread, long-lasting, or severe effects as a means of destruction, damage, or injury to another Party to the ENMOD Convention.<sup>209</sup> In addition, it is prohibited to assist, encourage, or induce others to use such environmental modification techniques against a Party to the ENMOD Convention.<sup>210</sup>

6.10.1 Environmental Modification Techniques. “Environmental modification techniques” refers to any technique for changing through the deliberate manipulation of natural processes the dynamics, composition, or structure of the earth, including its biota, lithosphere, hydrosphere and atmosphere, or of outer space.<sup>211</sup>

6.10.2 Having Widespread, Long-Lasting, or Severe Effects. The techniques must have widespread, long-lasting, or severe effects. These terms are interpreted as follows:

- (a) “widespread”: encompassing an area on the scale of several hundred square kilometers;
- (b) “long-lasting”: lasting for a period of months, or approximately a season;
- (c) “severe”: involving serious or significant disruption or harm to human life,

---

<sup>208</sup> BIOLOGICAL WEAPONS CONVENTION art. 10(1) (“The States Parties to this Convention undertake to facilitate, and have the right to participate in, the fullest possible exchange of equipment, materials and scientific and technological information for the use of bacteriological (biological) agents and toxins for peaceful purposes. Parties to the Convention in a position to do so shall also co-operate in contributing individually or together with other States or international organisations to the further development and application of scientific discoveries in the field of bacteriology (biology) for the prevention of disease, or for other peaceful purposes.”); BIOLOGICAL WEAPONS CONVENTION art. 10(2) (“This Convention shall be implemented in a manner designed to avoid hampering the economic or technological development of States Parties to the Convention or international co-operation in the field of peaceful bacteriological (biological) activities, including the international exchange of bacteriological (biological) agents and toxins and equipment for the processing, use or production of bacteriological (biological) agents and toxins for peaceful purposes in accordance with the provisions of the Convention.”).

<sup>209</sup> ENMOD CONVENTION art. 1(1) (“Each State Party to this Convention undertakes not to engage in military or any other hostile use of environmental modification techniques having widespread, long-lasting or severe effects as the means of destruction, damage or injury to any other State Party.”).

<sup>210</sup> ENMOD CONVENTION art. 1(2) (“Each State Party to this Convention undertakes not to assist, encourage or induce any State, group of States or international organization to engage in activities contrary to the provisions of paragraph 1 of this article.”).

<sup>211</sup> ENMOD CONVENTION art. 2 (“The term ‘Environmental modification techniques’ refers to any technique for changing through the deliberate manipulation of natural processes the dynamics, composition or structure of the earth, including its biota, lithosphere, hydrosphere and atmosphere, or of outer space.”).

natural and economic resources, or other assets.<sup>212</sup>

For example, earthquakes, tsunamis, and cyclones are environmental effects likely to be widespread, long-lasting, or severe that could be caused by the use of environmental modification techniques.<sup>213</sup> On the other hand, dispelling fog to facilitate military or combat operations may involve the use of environmental modification techniques that would not have widespread, long-lasting, or severe effects.<sup>214</sup>

6.10.3 As a Means of Destruction, Damage, or Injury. In order to fall within the ENMOD Convention's prohibitions, the environmental modification techniques must be used as a means of destruction, damage, or injury to another Party to the ENMOD Convention. The ENMOD Convention does not prohibit damage to the environment, but reflects the idea that the environment itself should not be used as an instrument of war.<sup>215</sup>

Weapons or military operations may incidentally have widespread, long-lasting, or severe

<sup>212</sup> Cyrus Vance, *Letter of Submittal*, Aug. 31, 1978, MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING THE CONVENTION ON THE PROHIBITION OF MILITARY OR ANY OTHER HOSTILE USE OF ENVIRONMENTAL MODIFICATION TECHNIQUES, SIGNED AT GENEVA ON MAY 18, 1977, EXECUTIVE K, 4 (1978) ("According to the Understanding related to this Article the terms 'widespread, long-lasting and severe', for purposes of this Convention only, are to be interpreted as follows: (a) 'widespread': encompassing an area on the scale of several hundred square kilometers; (b) 'long-lasting': lasting for a period of months, or approximately a season; (c) 'severe': involving serious or significant disruption or harm to human life, natural and economic resources or other assets."). See also U.N. Conference of the Committee on Disarmament, New York, U.S., Dec. 10, 1976, *Report of the Conference of the Committee on Disarmament: Official records: Thirty-first session, Supplement No. 27/92* U.N. Doc A/31/27 (Vol I) (1976) ("Referring to suggestions at the previous year's session and at the General Assembly that the phrase 'having widespread, long-lasting or severe effects' be eliminated, the delegation of the United States held that the phrase was necessary to ensure that the ban could be implemented successfully and would not give rise to friction over trivial issues: the phrase served to avoid the risk of unprovable claims of violation while eliminating the use of techniques with significant effects.").

<sup>213</sup> See U.N. Conference of the Committee on Disarmament, *Report of the Conference of the Committee on Disarmament*, U.N. Official records: Thirty-First Session, Supplement No. 27, U.N. Doc A/31/27 (Vol I) 92 (Dec. 10, 1976) ("It is the understanding of the Committee that the following examples are illustrative of phenomena that could be caused by the use of environmental modification techniques as defined in article II of the Convention: earthquakes; tsunamis; an upset in the ecological balance of a region; changes in weather patterns (clouds, precipitation, cyclones of various types and tornadic storms); changes in climate patterns; changes in ocean currents; changes in the state of the ozone layer; and changes in the state of the ionosphere.").

<sup>214</sup> Rear Admiral Edward F. Welch, Jr., Deputy Director for International Negotiations, Plans and Policy Directorate, Joint Chiefs of Staff, *Environmental Modification Treaty: Hearing Before the Committee on Foreign Relations, U.S. Senate*, Ninety-Fifth Congress, Second Session, 31 (Oct. 3, 1978) ("I think the Joint Chiefs of Staff prefer to have this threshold treaty with these stipulations in it rather than a complete foreclosure of any military options. The example I might cite, that was in the testimony given to this committee in 1974 was the case of the situation in Belgium during the Battle of the Bulge where they had the opportunity and, had the technique been available for cutting and dispelling the fog that attended that battle, it could have been done in 30 to 40 minutes. Dispelling the fog that was there preventing the resupply of our units is now within the technology of limiting fog.").

<sup>215</sup> Michael Moodie, United States Arms Control and Disarmament Agency, *Statement before the Second Review Conference of the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques* (Sept. 15, 1992) ("The Environmental Modification Convention is not an Environmental Protection Treaty; it is not a treaty to prohibit damage to the environment resulting from armed conflict. Rather, the Environmental Modification Convention fills a special, but important niche reflecting the international community's consensus that the environment itself should not be used as an instrument of war.").

effects on the environment. Such weapons and military operations are not prohibited by the ENMOD Convention because the harm to the environment is incidental and not intended to be used as a means of destruction, damage, or injury to another Party to the ENMOD Convention. For example, nuclear weapons are not prohibited by the ENMOD Convention because their effects on the environment are a by-product of their use rather than intended as a means of injuring the enemy.<sup>216</sup>

6.10.3.1 *AP I Provisions on Environmental Protection.* In contrast to the ENMOD Convention's prohibition against using certain environmental modification techniques as a means of destruction, damage, or injury, two provisions of AP I specifically address the protection of the environment. Article 35(3) of AP I provides that "[i]t is prohibited to employ methods or means of warfare which are intended, or may be expected, to cause widespread, long-term and severe damage to the natural environment." Article 55 of AP I provides:

Protection of the natural environment: (1) Care shall be taken in warfare to protect the natural environment against widespread, long-term and severe damage. This protection includes a prohibition of the use of methods or means of warfare which are intended or may be expected to cause such damage to the natural environment and thereby to prejudice the health or survival of the population. (2) Attacks against the natural environment by way of reprisals are prohibited.

The United States has not accepted these provisions<sup>217</sup> and has repeatedly expressed the view that these provisions are "overly broad and ambiguous and 'not a part of customary law.'"<sup>218</sup> Articles 35(3) and 55 of AP I "fail to acknowledge that use of such weapons is

---

<sup>216</sup> *Written Statement of the Government of the United States of America*, 29, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons ("Although one might imagine a hypothetical use of nuclear weapons to create an environmental modification technique (for example, to cause an earthquake or tidal wave), the Convention does not prohibit other uses of nuclear weapons (or any other weapon), even if they cause serious damage to the environment. Only the 'deliberate manipulation' of environmental forces to cause destruction is covered.").

<sup>217</sup> See, e.g., Mark Simonoff, Minister Counselor, U.S. Mission to the United Nations, *Remarks at the 70th UN General Assembly Sixth Committee on Agenda Item 83: Report of the International Law Commission on the Work of its 67th Session*, Nov. 11, 2015, 2015 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 287 ("Relatedly, we are troubled by the presence among the principles of rules extracted from certain treaties that we do not believe reflect customary law. For example, draft principle II-4 repeats a prohibition in Additional Protocol I, AP I, on attacks against the natural environment by way of reprisals that we do not believe exists as a matter of customary international law. To the extent the rule is offered to encourage normative development, we remain in disagreement with it, consistent with the objections we have stated on other occasions."); United States, *Statement on Ratification of the CCW, Accepting Protocols I & II*, Mar. 24, 1995, 1861 UNTS 482, 483 ("The United States considers that the fourth paragraph of the preamble to the Convention, which refers to the substance of provisions of article 35 (3) and article 55 (1) of additional Protocol I to the Geneva Conventions for the Protection of War Victims of August 12, 1949, applies only to States which have accepted those provisions.").

<sup>218</sup> U.S. RESPONSE TO ICRC CIHL STUDY 521 ("France and the United States repeatedly have declared that Articles 35(3) and 55 of AP I, from which the Study derives the first sentence of rule 45, do not reflect customary international law. In their instruments of ratification of the 1980 CCW, both France and the United States asserted that the preambular paragraph in the CCW treaty, which refers to the substance of Articles 35(3) and 55, applied only to States that have accepted those articles. The U.S. State Department Principal Deputy Legal Adviser stated

prohibited only if their use is clearly excessive in relation to the concrete and direct overall military advantage anticipated.”<sup>219</sup>

6.10.4 Environmental Modification Techniques for Peaceful Purposes. The ENMOD Convention does not hinder the use of environmental modification techniques for peaceful purposes.<sup>220</sup>

#### 6.11 WEAPONS INJURING BY FRAGMENTS NOT DETECTABLE BY X-RAYS

It is prohibited to use any weapon the primary effect of which is to injure by fragments that in the human body escape detection by X-rays.<sup>221</sup>

6.11.1 Primary Effect. The prohibition requires that the fragments that are intended to cause injury be made of materials that are detectable in the human body by X-rays.

Portions of many munitions, such as the casing, detonator, or timing mechanism, may be made of nonmetallic parts or other substances that are not detectable by X-rays in order to reduce weight, manufacturing costs, etc. These munitions are not prohibited because their primary effect is not to injure by fragments that in the human body escape detection by X-rays.<sup>222</sup>

6.11.2 Fragments That Injure by Penetrating the Human Body. The prohibition applies only to weapons that are intended to injure by penetrating the human body. Thus, for example, a weapon that employs rubber projectiles that are unlikely to penetrate the skin need not be detectable by X-rays.

---

during a conference in 1987 that the United States considered Articles 35 and 55 to be overly broad and ambiguous and ‘not a part of customary law.’”).

<sup>219</sup> U.S. RESPONSE TO ICRC CIHL STUDY 528 endnote 30 (“An example illustrates why States – particularly those not party to AP I – are unlikely to have supported rule 45. Suppose that country A has hidden its chemical and biological weapons arsenal in a large rainforest, and plans imminently to launch the arsenal at country B. Under such a rule, country B could not launch a strike against that arsenal if it expects that such a strike may cause widespread, long-term, and severe damage to the rainforest, even if it has evidence of country A’s imminent launch, and knows that such a launch itself would cause environmental devastation.”).

<sup>220</sup> ENMOD CONVENTION art. 3(1) (“The provisions of this Convention shall not hinder the use of environmental modification techniques for peaceful purposes and shall be without prejudice to the generally recognized principles and applicable rules of international law concerning such use.”).

<sup>221</sup> CCW PROTOCOL I (“It is prohibited to use any weapon the primary effect of which is to injure by fragments which in the human body escape detection by X-rays.”).

<sup>222</sup> Canada, *Statement on Ratification of CCW, Accepting Protocols I, II, & III*, Jun. 24, 1994, 1787 UNTS 501 (“With respect to Protocol I, it is the understanding of the Government of Canada that the use of plastics or similar materials for detonators or other weapons parts not designed to cause injury is not prohibited.”). *For example*, W. Hays Parks, *Memorandum re: Advanced Combat Rifle; Request for Legal Review*, ¶6 (May 21, 1990), reprinted in THE ARMY LAWYER 18, 20 (Jul. 1990) (“[B]oth the AAI and Steyr-Mannlicher ammunition employ liquid crystal polymers in the sabot that holds the flechette in place. It is not necessary to determine whether liquid crystal polymers are detectable by x-ray, as the sabot in each round is employed for effects other than injury to combatants. (The wounding capability of the sabot is extremely limited, as it separates from the flechette, quickly loses its force, and falls to the ground within one hundred feet of the muzzle.) The negotiation history of the UNCCW Protocol I is clear that its prohibition would not extend to the polymer sabot in the AAI and Steyr ammunition.”).

6.11.3 Fragments Escaping Detection by X-Rays. The fragments must not be such that they escape detection by X-rays. For example, a member of the armed forces engaged in the authorized construction and/or employment of field-improvised booby-traps may not use glass for fragments for the purpose of wounding enemy personnel.<sup>223</sup>

In some cases, the fragments that otherwise would not be detectable by X-rays may be modified in order to ensure that they would be detectable by X-rays. For example, projectiles may be modified with a substance, such as barium sulfate, so that they are readily detectable by X-rays if they happen to penetrate the skin.<sup>224</sup>

## 6.12 LANDMINES, BOOBY-TRAPS, AND OTHER DEVICES

As a class of weapons, landmines, booby-traps, and other devices are not specifically prohibited under the law of war. However, certain landmines, booby-traps, and other devices are prohibited. In addition, the use of landmines, booby-traps, and other devices is subject to certain restrictions that the United States has accepted in the CCW Amended Mines Protocol.

6.12.1 Definition of Mine. The CCW Amended Mines Protocol defines a “mine” as “a munition placed under, on, or near the ground or other surface area and designed to be exploded by the presence, proximity or contact of a person or vehicle.”<sup>225</sup> The term “mine” thus includes both anti-personnel and anti-vehicle mines, including anti-tank mines.

The mines to which the CCW Amended Mines Protocol relate are those used on land, including those laid to interdict beaches, waterway crossings, or river crossings, but do not include the use of anti-ship mines at sea or in inland waterways.<sup>226</sup> The rules on naval mines are addressed in § 13.11 (Naval Mines).

The term “mine” does not include hand grenades.<sup>227</sup> A trip-wired hand grenade is not

---

<sup>223</sup> Refer to § 6.12.4.1 (Mines, Booby-Traps, and Other Devices Calculated to Cause Superfluous Injury).

<sup>224</sup> W. Hays Parks, *Means and Methods of Warfare*, 38 THE GEORGE WASHINGTON INTERNATIONAL LAW REVIEW 511, 524 note 53 (2006) (“In 1998, the author conducted the legal review of the Modular Crowd Control Munition, a less-lethal version of the M18 Claymore mine containing rubber instead of steel projectiles. While the chance of the rubber projectiles penetrating the skin was negligible, the rubber projectiles were implanted with 5 percent Barium Sulfate to make them detectable by x-ray and compliant with Protocol I of the UNCCW. See Office of The Judge Advocate General of the Army, Memorandum of Law: Legal Review of Modular Crowd Control Munition (MCCM) (Oct. 13, 1998) [hereinafter DAJA-IO: Modular Crowd Control Munition].”) (insertion in original).

<sup>225</sup> CCW AMENDED MINES PROTOCOL art. 2(1) (“‘Mine’ means a munition placed under, on or near the ground or other surface area and designed to be exploded by the presence, proximity or contact of a person or vehicle.”).

<sup>226</sup> CCW AMENDED MINES PROTOCOL art. 1(1) (“This Protocol relates to the use on land of the mines, booby-traps and other devices, defined herein, including mines laid to interdict beaches, waterway crossings or river crossings, but does not apply to the use of anti-ship mines at sea or in inland waterways.”).

<sup>227</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“For the purposes of the Amended Mines Protocol, the United States understands that - ... (C) none of the provisions of the Amended Mines Protocol, including Article 2 (5), applies to hand grenades other than trip-wired hand grenades.”).

considered a mine, but is considered a booby-trap under the CCW Amended Mines Protocol.<sup>228</sup>

6.12.1.1 *Notes on Terminology - “Landmines” Versus “Mines”*. The CCW Amended Mines Protocol uses the term “mines,” but does not address naval mines. This section uses the term “mines” to refer to landmines, including both anti-personnel and anti-vehicle mines.

6.12.1.2 *Designed to Be Exploded by the Presence, Proximity, or Contact of a Person or Vehicle*. An important characteristic of a mine is its designed function of being exploded by the presence, proximity, or contact of a person or vehicle.<sup>229</sup> Command-detonated munitions (*i.e.*, munitions whose explosion is triggered by a decision of an operator) are not “mines” under the CCW Amended Mines Protocol, but may be regulated under the CCW Amended Mines Protocol as “other devices.”<sup>230</sup>

Some munitions, such as the Claymore, may be configured for detonation by command, or by trip-wire. When used in trip-wire mode, they are mines and subject to corresponding restrictions. When used in command-detonated mode, they are subject to the restrictions applicable to “other devices.”<sup>231</sup>

The design function of being activated by the target also distinguishes a mine from unexploded ordnance that results from the malfunction of a munition.<sup>232</sup> Other rules address

---

<sup>228</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“For the purposes of the Amended Mines Protocol, the United States understands that - ... (B) a trip-wired hand grenade shall be considered a ‘booby-trap’ under Article 2(4) of the Amended Mines Protocol and shall not be considered a ‘mine’ or an ‘anti-personnel mine’ under Article 2(1) or 2(3), respectively;”). *Refer to* § 6.12.2 (Definition of Booby-Trap).

<sup>229</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 5, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 5 (“The definition also contemplates that mines can be emplaced in a variety of ways -- under, on or near the ground or other surface area. This makes clear that the critical defining characteristic of a mine is not its relationship to the ground or other surface area but rather its design function of being exploded by the presence, proximity or contact of a target, be that target a person or a vehicle. (This applies whether a munition is designed for this purpose in the factory, or adapted for this purpose in the field.)”).

<sup>230</sup> *Refer to* § 6.12.10 (Rule for Using Booby-Traps and Other Devices).

<sup>231</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 7, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 7 (“With respect to anti-personnel mines which have the potential to be either trip-wired or command-detonated, the definition applies when such mines are used with a trip-wire or are otherwise target-activated. When such mines are command-detonated, that is, exploded not by the target itself, but by an operator, they do not meet the definition of antipersonnel mine and are therefore not subject to the restrictions imposed on anti-personnel mines. They do, however, fall within the definition of ‘other devices’ in paragraph 7.”).

<sup>232</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 5, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 5 (“It is also this characteristic, *i.e.* that the munition is designed to be activated by the target, that distinguishes a mine from so-called unexploded ordnance [*sic*] or UXO. UXO is not covered by the Protocol, either the 1980 or the amended version. Unexploded ordnance [*sic*] is a result of a malfunction of a munition; UXO is not ‘designed’ in any sense, and, in

unexploded ordnance.<sup>233</sup>

6.12.1.3 *Anti-Personnel Mines*. Under the CCW Amended Mines Protocol, an “anti-personnel mine” is a mine primarily designed to be exploded by the presence, proximity, or contact of a person and that will incapacitate, injure, or kill one or more persons.<sup>234</sup>

“Primarily” was added to ensure that anti-vehicle mines equipped with anti-handling devices (which often cause the mine to detonate by contact of a person) are not treated as anti-personnel mines under the CCW Amended Mines Protocol.<sup>235</sup>

Another element in the definition of “anti-personnel mine” is its effect of incapacitating, injuring, or killing one or more persons. This description was understood to be broad enough to cover the range of hazards posed by anti-personnel mines, but the term “incapacitating” means permanent incapacity.<sup>236</sup> Thus, the definition of “mine” for the purposes of the CCW Amended Mines Protocol does not include non-lethal weapon technology that is designed temporarily to disable, stun, or signal the presence of a person, but not to cause permanent incapacity.<sup>237</sup>

---

particular, is not designed to be detonated by the presence, proximity or contact of person. Although UXO presents a serious problem that requires concerted attention, it is a problem outside the scope of Protocol II.”).

<sup>233</sup> Refer to § 6.20 (Explosive Remnants of War).

<sup>234</sup> CCW AMENDED MINES PROTOCOL art. 2(3) (“‘Anti-personnel mine’ means a mine primarily designed to be exploded by the presence, proximity or contact of a person and that will incapacitate, injure or kill one or more persons.”).

<sup>235</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 6-7, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 6-7 (“The first is the word ‘primarily’ in the phrase ‘primarily designed’. This element was added to ensure that anti-tank mines equipped with anti-handling devices are not treated as anti-personnel mines. This was an important consideration for U.S. military operations. Anti-personnel mines are frequently used in conjunction with anti-tank mines to protect anti-tank mines against enemy removal during military operations. With increasing restrictions on the use of anti-personnel mines, it was clear, from a military perspective, that alternative means of protecting anti-tank mines against enemy removal during combat operations would be increasingly important. One such common alternative is to equip anti-tank mines with anti-handling devices. But since such devices are, as a practical matter, intended to cause an anti-tank mine to detonate if handled by a person, there was concern that an anti-tank mine equipped with an anti-handling device would inadvertently fall within the definition of an anti-personnel mine, and be subject, therefore, to the additional constraints imposed on anti-personnel mines. Adding the word ‘primarily’ before ‘designed’ clarified that anti-tank mines that are equipped with anti-handling devices are not considered anti-personnel mines as a result of being so equipped. This language was not intended to exclude from the restrictions on anti-personnel mines any munition designed to perform the function of an anti-personnel mine.”).

<sup>236</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 7, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 7 (“The second additional element in the anti-personnel mine definition is the reference to incapacitating, injuring or killing one or more persons. This description was understood to be broad enough to cover the range of hazards posed by anti-personnel mines. Additionally, the term ‘incapacitating’ does not restrict non-lethal weapon technology that may temporarily disable, stun or signal the presence of person but not cause permanent incapacity.”).

<sup>237</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“The United States understands that nothing in the Amended Mines Protocol may be construed as

6.12.1.4 *Mines Other Than Anti-Personnel Mines*. The CCW Amended Mines Protocol uses the term “mines other than anti-personnel mines” to refer to anti-vehicle mines. “Anti-vehicle mines” or “mines other than anti-personnel mines” are also sometimes referred to as anti-tank mines.<sup>238</sup>

The CCW Amended Mines Protocol defines “mine” in terms of a munition that is designed to be exploded by a person or vehicle.<sup>239</sup> Thus, “mines other than anti-personnel mines” are anti-vehicle mines.<sup>240</sup>

6.12.1.5 *Remotely Delivered Mines*. “Remotely-delivered mine” means a mine that is not directly emplaced, but is instead delivered by artillery, missile, rocket, mortar, or similar means, or dropped from an aircraft.<sup>241</sup>

Mines delivered from a land-based system from less than 500 meters, however, are not considered to be remotely delivered, provided that they are used in accordance with Article 5 and other relevant articles of the CCW Amended Mines Protocol.<sup>242</sup> These mines were excluded from the definition of remotely delivered mines because, when delivered in the prescribed manner, they can be accurately marked and precautions to protect civilians can be reliably maintained.

6.12.1.6 *Mines With Compliant Self-Destruction and Self-Deactivation (SD/SDA) Mechanisms*. Certain types of mines may be equipped with self-destruction or self-neutralization mechanisms, or be self-deactivating.

“Self-destruction [SD] mechanism” means an incorporated or externally attached automatically functioning mechanism that secures the destruction of the munition into which it is

---

restricting or affecting in any way non-lethal weapon technology that is designed to temporarily disable, stun, signal the presence of a person, or operate in any other fashion, but not to cause permanent incapacity.”).

<sup>238</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 8, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 8 (“Finally, the term ‘anti-tank mine’ is not used or defined in the amended Protocol; such mines are referred to by the use of the phrase ‘mines other than anti-personnel mines,’ which includes all mines designed to be exploded by the presence, proximity or contact of a vehicle. This formulation flows from the definitions for ‘mine’ and ‘anti-personnel mine’ when read in light of each other. Throughout this analysis mines other than anti-personnel mines are also referred to as anti-tank mines.”).

<sup>239</sup> CCW AMENDED MINES PROTOCOL art. 2(1) (“‘Mine’ means a munition placed under, on or near the ground or other surface area and designed to be exploded by the presence, proximity or contact of a person or vehicle.”).

<sup>240</sup> See CCW AMENDED MINES PROTOCOL art. 2(3) (“‘Anti-personnel mine’ means a mine primarily designed to be exploded by the presence, proximity or contact of a person and that will incapacitate, injure or kill one or more persons.”).

<sup>241</sup> CCW AMENDED MINES PROTOCOL art. 2(2) (“‘Remotely-delivered mine’ means a mine not directly emplaced but delivered by artillery, missile, rocket, mortar, or similar means, or dropped from an aircraft.”).

<sup>242</sup> CCW AMENDED MINES PROTOCOL art. 2(2) (“Mines delivered from a land-based system from less than 500 metres are not considered to be ‘remotely delivered’, provided that they are used in accordance with Article 5 and other relevant Articles of this Protocol.”).

incorporated or to which it is attached.<sup>243</sup>

“Self-neutralization mechanism” means an incorporated automatically functioning mechanism that renders inoperable the munition into which it is incorporated.<sup>244</sup> The term is used in Article 6 of the CCW Amended Mines Protocol in relation to remotely delivered mines other than anti-personnel mines. There are no technical specifications for self-neutralization mechanisms in the Technical Annex to the CCW Amended Mines Protocol.<sup>245</sup>

“Self-deactivating” (SDA) means automatically rendering a munition inoperable by means of the irreversible exhaustion of a component; for example, a battery that is essential to the operation of the munition could be exhausted as part of a self-deactivating mine.<sup>246</sup>

6.12.2 Definition of Booby-Trap. Under the CCW Amended Mines Protocol, a “booby-trap” means any device or material that is designed, constructed, or adapted to kill or injure, and that functions when a person disturbs or approaches an apparently harmless object or performs an apparently safe act.<sup>247</sup>

This includes field-expedient devices, *e.g.*, a hand grenade attached to a door and rigged to explode when the door is opened (as opening a door is an apparently safe act), as well as devices designed in advance to function as booby-traps (such as explosive devices designed to resemble civilian objects).<sup>248</sup>

6.12.3 Definition of “Other Devices” Similar to Mines. “Other devices” in the CCW Amended Mines Protocol means manually emplaced munitions and devices, including improvised explosive devices, designed to kill, injure, or damage, and which are actuated

---

<sup>243</sup> CCW AMENDED MINES PROTOCOL art. 2(10) (“‘Self-destruction mechanism’ means an incorporated or externally attached automatically-functioning mechanism which secures the destruction of the munition into which it is incorporated or to which it is attached.”).

<sup>244</sup> CCW AMENDED MINES PROTOCOL art. 2(11) (“‘Self-neutralization mechanism’ means an incorporated automatically-functioning mechanism which renders inoperable the munition into which it is incorporated.”).

<sup>245</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 9, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 9 (“The term is used in Article 6 in relation to remotely-delivered mines other than anti-personnel mines. There are no technical specifications for self-neutralization mechanisms in the Technical Annex.”).

<sup>246</sup> CCW AMENDED MINES PROTOCOL art. 2(12) (“‘Self-deactivating’ means automatically rendering a munition inoperable by means of the irreversible exhaustion of a component, for example, a battery, that is essential to the operation of the munition.”).

<sup>247</sup> CCW AMENDED MINES PROTOCOL art. 2(4) (“‘Booby-trap’ means any device or material which is designed, constructed or adapted to kill or injure, and which functions unexpectedly when a person disturbs or approaches an apparently harmless object or performs an apparently safe act.”).

<sup>248</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 8, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 8 (“[Paragraph 4 of Article 2 of the CCW Amended Mines Protocol] is understood to include, for example, a hand-grenade when attached to a door and rigged to explode when the door opens, as well as devices designed in advance to function as booby-traps.”).

manually, by remote control, or automatically after a lapse of time.<sup>249</sup>

“Other devices” do not include munitions and devices that are not manually emplaced, such as munitions that are remotely delivered.

“Other devices” do not include hand grenades.<sup>250</sup> However, trip-wired hand grenades are regulated as booby traps.<sup>251</sup>

6.12.4 Prohibited Classes of Mines, Booby-Traps, and Other Devices. Certain types of mines, booby-traps, and other devices are prohibited. These types include:

- mines, booby-traps, and other devices calculated to cause superfluous injury;<sup>252</sup>
- mines, booby-traps, and other devices specifically designed to detonate during detection operations;<sup>253</sup>
- self-deactivating mines with anti-handling devices designed to function after the mine’s operation;<sup>254</sup>
- non-detectable anti-personnel mines;<sup>255</sup>
- remotely delivered mines without compliant self-destruction and self-deactivation mechanisms;<sup>256</sup>
- remotely delivered mines other than anti-personnel mines without a feasible SD/SDA mechanism;<sup>257</sup>

---

<sup>249</sup> CCW AMENDED MINES PROTOCOL art. 2(5) (“‘Other devices’ means manually-emplaced munitions and devices including improvised explosive devices designed to kill, injure or damage and which are actuated manually, by remote control or automatically after a lapse of time.”).

<sup>250</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“For the purposes of the Amended Mines Protocol, the United States understands that - ... (C) none of the provisions of the Amended Mines Protocol, including Article 2 (5), applies to hand grenades other than trip-wired hand grenades.”).

<sup>251</sup> Refer to § 6.12.2 (Definition of Booby-Trap).

<sup>252</sup> Refer to § 6.12.4.1 (Mines, Booby-Traps, and Other Devices Calculated to Cause Superfluous Injury).

<sup>253</sup> Refer to § 6.12.4.2 (Mines, Booby-Traps, and Other Devices Specifically Designed to Detonate During Detection Operations).

<sup>254</sup> Refer to § 6.12.4.3 (Self-Deactivating Mines With Anti-Handling Devices Designed to Function After the Mine’s Operation).

<sup>255</sup> Refer to § 6.12.4.4 (Non-Detectable Anti-Personnel Mines).

<sup>256</sup> Refer to § 6.12.4.5 (Remotely Delivered Anti-Personnel Mines Not in Compliance With Self-Destruction and Self-Deactivation Requirements).

<sup>257</sup> Refer to § 6.12.4.6 (Remotely Delivered Mines Other Than Anti-Personnel Mines Without a Feasible SD/SDA Mechanism).

- mines produced after December 3, 1998, without identifying information;<sup>258</sup>
- booby-traps and other devices in the form of apparently harmless portable objects specifically designed to explode;<sup>259</sup> and
- certain types of prohibited booby-traps and other devices.<sup>260</sup>

6.12.4.1 *Mines, Booby-Traps, and Other Devices Calculated to Cause Superfluous Injury.* As with other weapons, it is prohibited in all circumstances to use any mine, booby trap, or other device that is designed or of a nature to cause superfluous injury or unnecessary suffering.<sup>261</sup>

For example, mines and booby-traps filled with shards of glass as their primary wounding mechanism would violate this prohibition. Such a weapon would be regarded as calculated to cause superfluous injury because the shards would be undetectable by X-rays and would hinder the medical treatment of the wound without offering any corresponding military advantage.<sup>262</sup> In addition, such a weapon would be prohibited on the grounds that it used fragments non-detectable by X-rays.<sup>263</sup>

6.12.4.2 *Mines, Booby-Traps, and Other Devices Specifically Designed to Detonate During Detection Operations.* It is prohibited to use mines, booby-traps, and other devices that employ a mechanism or device specifically designed to detonate the munition by the presence of commonly available mine detectors as a result of their magnetic or other non-contact influence during normal use in detection operations.<sup>264</sup>

This rule only applies to mines, booby-traps, and other devices that are specifically

---

<sup>258</sup> Refer to § 6.12.4.7 (Mines Produced After December 3, 1998, Without Identifying Information).

<sup>259</sup> Refer to § 6.12.4.8 (Booby-Traps and Other Devices in the Form of Apparently Harmless Portable Objects Specifically Designed to Explode).

<sup>260</sup> Refer to § 6.12.4.9 (Certain Types of Prohibited Booby-Traps and Other Devices).

<sup>261</sup> CCW AMENDED MINES PROTOCOL art. 3(3) (“It is prohibited in all circumstances to use any mine, booby-trap or other device which is designed or of a nature to cause superfluous injury or unnecessary suffering.”). Refer to § 6.6 (Weapons Calculated to Cause Superfluous Injury).

<sup>262</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 11, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 11 (“Which types of such weapons might cause ‘unnecessary suffering’ can only be determined on a case-by-case basis, weighing the suffering caused against the military necessity for its use. One example of a prohibited device might be a mine or booby-trap that is filled with shards of glass. Such a weapon would likely be regarded as unnecessarily injurious because the shards would be undetectable by X-ray in the victim’s body, and this would cause suffering that would be wholly unnecessary for its military purpose. (In any case, the device would be prohibited by Protocol I of the Convention on non-detectable fragments).”).

<sup>263</sup> Refer to § 6.11 (Weapons Injuring by Fragments Not Detectable by X-Rays).

<sup>264</sup> CCW AMENDED MINES PROTOCOL art. 3(5) (“It is prohibited to use mines, booby-traps or other devices which employ a mechanism or device specifically designed to detonate the munition by the presence of commonly available mine detectors as a result of their magnetic or other non-contact influence during normal use in detection operations.”).

designed to detonate through the normal use of non-contact mine detectors during mine detection operations. Thus, mines, booby-traps, and other devices specifically designed to detonate upon actual physical contact are permissible.<sup>265</sup> Similarly, anti-handling devices that are designed to detonate a mine upon attempts to defuse or deactivate the mine are not prohibited by this rule.

6.12.4.3 Self-Deactivating Mines With Anti-Handling Devices Designed to Function After the Mine's Operation. It is prohibited to use a self-deactivating mine equipped with an anti-handling device that is designed in such a manner that the anti-handling device is capable of functioning after the mine has ceased to be capable of functioning.<sup>266</sup>

The intent is to avoid situations where a self-deactivating mine, the “life” of which is normally limited by the life of its battery, remains dangerous indefinitely as a result of a long-lived anti-handling device. This would defeat the purpose of the self-deactivation function by leaving a hazardous mine in place.<sup>267</sup>

6.12.4.4 Non-Detectable Anti-Personnel Mines. It is prohibited to use anti-personnel mines that are not detectable as specified in paragraph 2 of the Technical Annex to the CCW Amended Mines Protocol.<sup>268</sup> Paragraph 2 of the Technical Annex specifies that:

- (a) With respect to anti-personnel mines produced after 1 January 1997, such mines shall incorporate in their construction a material or device that enables the mine to be detected by commonly-available technical mine detection equipment and provides a response signal equivalent to a signal from 8 grammes or more of iron in a single coherent mass.
- (b) With respect to anti-personnel mines produced before 1 January 1997, such mines shall either incorporate in their construction, or have attached prior to their emplacement, in a manner not easily removable, a material or device that enables the mine to be detected by commonly-available technical mine detection

---

<sup>265</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 12, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 12 (“The provision clearly excludes situations where actual physical contact with mine detectors or abnormal use of mine detectors is required to detonate the mine. For example, a mine’s trip-wire or tilt-rod (a type of vertical trip-wire) may be pulled or pushed in a sweep of a mine detector, setting off the mine. This would not constitute the use of a mine in contravention of this provision.”).

<sup>266</sup> CCW AMENDED MINES PROTOCOL art. 3(6) (“It is prohibited to use a self-deactivating mine equipped with an anti-handling device that is designed in such a manner that the anti-handling device is capable of functioning after the mine has ceased to be capable of functioning.”).

<sup>267</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 15, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 15 (“The intent is to avoid situations where a self-deactivating mine, the ‘life’ of which is normally limited by the life of its battery, is dangerous indefinitely as a result of a long-lived anti-handling device. This would defeat the purpose of the self-deactivation function by leaving a hazardous mine in place.”).

<sup>268</sup> CCW AMENDED MINES PROTOCOL art. 4 (“It is prohibited to use anti-personnel mines which are not detectable, as specified in paragraph 2 of the Technical Annex.”).

equipment and provides a response signal equivalent to a signal from 8 grammes or more of iron in a single coherent mass.

(c) In the event that a High Contracting Party determines that it cannot immediately comply with sub-paragraph (b), it may declare at the time of its notification of consent to be bound by this Protocol that it will defer compliance with sub-paragraph (b) for a period not to exceed 9 years from the entry into force of this Protocol. In the meantime it shall, to the extent feasible, minimize the use of anti-personnel mines that do not so comply.<sup>269</sup>

6.12.4.5 Remotely Delivered Anti-Personnel Mines Not in Compliance With Self-Destruction and Self-Deactivation Requirements. It is prohibited to use remotely delivered anti-personnel mines that are not in compliance with the provisions on self-destruction and self-deactivation in the Technical Annex to the CCW Amended Mines Protocol.<sup>270</sup>

All remotely delivered anti-personnel mines shall be designed and constructed so that no more than 10% of activated mines will fail to self-destruct within 30 days after emplacement, and each mine shall have a back-up self-deactivation feature designed and constructed so that, in combination with the self-destruction mechanism, no more than one in one thousand activated mines will function as a mine 120 days after emplacement.<sup>271</sup>

6.12.4.6 Remotely Delivered Mines Other Than Anti-Personnel Mines Without a Feasible SD/SDA Mechanism. It is prohibited to use remotely delivered mines other than anti-personnel mines, unless, to the extent feasible, they are equipped with an effective self-destruction or self-neutralization mechanism and have a back-up self-deactivation feature, which is designed so that the mine will no longer function as a mine when the mine no longer serves the military purpose for which it was placed in position.<sup>272</sup>

6.12.4.7 Mines Produced After December 3, 1998, Without Identifying Information. Subparagraph 1(d) of the Technical Annex to the CCW Amended Mines Protocol provides:

The use of mines produced after the entry into force of this Protocol is prohibited unless they are marked in English or in the respective national language or languages with the following information:

---

<sup>269</sup> TECHNICAL ANNEX TO CCW AMENDED MINES PROTOCOL ¶2.

<sup>270</sup> CCW AMENDED MINES PROTOCOL art. 6(2) (“It is prohibited to use remotely-delivered anti-personnel mines which are not in compliance with the provisions on self-destruction and self-deactivation in the Technical Annex.”).

<sup>271</sup> TECHNICAL ANNEX TO CCW AMENDED MINES PROTOCOL ¶3(a) (“All remotely-delivered anti-personnel mines shall be designed and constructed so that no more than 10% of activated mines will fail to self-destruct within 30 days after emplacement, and each mine shall have a back-up self-deactivation feature designed and constructed so that, in combination with the self-destruction mechanism, no more than one in one thousand activated mines will function as a mine 120 days after emplacement.”).

<sup>272</sup> CCW AMENDED MINES PROTOCOL art. 6(3) (“It is prohibited to use remotely-delivered mines other than anti-personnel mines, unless, to the extent feasible, they are equipped with an effective self-destruction or self-neutralization mechanism and have a back-up self-deactivation feature, which is designed so that the mine will no longer function as a mine when the mine no longer serves the military purpose for which it was placed in position.”).

- (i) name of the country of origin;
- (ii) month and year of production; and
- (iii) serial number or lot number.

The marking should be visible, legible, durable and resistant to environmental effects, as far as possible.

The CCW Amended Mines Protocol entered into force on December 3, 1998.<sup>273</sup>

6.12.4.8 *Booby-Traps and Other Devices in the Form of Apparently Harmless Portable Objects Specifically Designed to Explode*. It is prohibited in all circumstances to use booby-traps or other devices in the form of apparently harmless portable objects that are specifically designed and constructed to contain explosive material.<sup>274</sup> This prohibition relates to booby-traps manufactured to resemble items, such as watches, personal audio players, cameras, toys, and the like. This prohibition is intended to prevent the production of large quantities of dangerous objects that can be scattered around and are likely to be attractive to civilians, especially children.<sup>275</sup>

This rule does not prohibit the use of booby-traps in connection with non-portable objects, such as a door or gate.

This rule does not prohibit field-expedient adaptation, or adaptation in advance, of objects for use as booby-traps or other devices that are not designed or constructed for such use.<sup>276</sup> For example, it would not be prohibited to improvise a booby-trap using a trip-wired hand grenade in the form of an apparently harmless portable object. Such improvisation of booby-traps, for example, to retard an enemy advance, does not pose the same sort of danger to the civilian population as the mass production of objects specifically designed as booby-traps.<sup>277</sup>

---

<sup>273</sup> Refer to § 19.21.3 (CCW Amended Mines Protocol).

<sup>274</sup> CCW AMENDED MINES PROTOCOL art. 7(2) (“It is prohibited to use booby-traps or other devices in the form of apparently harmless portable objects which are specifically designed and constructed to contain explosive material.”).

<sup>275</sup> During World War II, such devices were manufactured and intended to be used by guerilla forces operating in denied areas or forces withdrawing from territory about to be occupied by enemy forces. See DEPARTMENT OF THE ARMY FIELD MANUAL 5-31, *Land Mines and Booby Traps*, ¶1(d) (1943) (“Factory-produced booby-traps (dirty trick devices) are described. Most of these have been developed and used in the field by foreign armies.”); *id.* at. ¶50(d)(4-5) (1943) (“The Japanese manufactured a [tobacco] pipe boobytrap with a charge, detonator, and spring-loaded striker. The Italians had a booby-trapped headset containing an electric detonator connected to the terminals on the back. The connection of the headset into the line communication line initiated detonation.”).

<sup>276</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“For the purposes of the Amended Mines Protocol, the United States understands that - ... (A) the prohibition contained in Article 7(2) of the Amended Mines Protocol does not preclude the expedient adaptation or adaptation in advance of other objects for use as booby-traps or other devices;”).

<sup>277</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 27, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 27 (“Such

6.12.4.9 *Certain Types of Prohibited Booby-Traps and Other Devices*. It is prohibited to use booby-traps and other devices that are in any way attached to or associated with:<sup>278</sup>

- internationally recognized protective emblems, signs, or signals;
  - This includes the distinctive emblem of the red cross and red crescent and the distinctive emblem for cultural property.<sup>279</sup>
- sick, wounded, or dead persons;
- burial or cremation sites or graves;
- medical facilities, equipment, supplies, or transportation;
- children’s toys or other portable objects or products specially designed for the feeding, health, hygiene, clothing, or education of children;
- food or drink;
  - The United States has reserved the right to use other devices to destroy any stock of food or drink that is judged likely to be used by an enemy military force, if due precautions are taken for the safety of the civilian population.<sup>280</sup>
- kitchen utensils or appliances, except in military establishments, military locations, or military supply depots;
  - This does not authorize kitchen utensils or appliances in military hospitals, POW

---

improvisation of booby-traps, for example to retard an enemy advance, does not pose the same sort of danger to the civilian population as the mass production of objects specifically designed as booby-traps toward which the provision was directed.”).

<sup>278</sup> CCW AMENDED MINES PROTOCOL art. 7(1) (“Without prejudice to the rules of international law applicable in armed conflict relating to treachery and perfidy, it is prohibited in all circumstances to use booby-traps and other devices which are in any way attached to or associated with: (a) internationally recognized protective emblems, signs or signals; (b) sick, wounded or dead persons; (c) burial or cremation sites or graves; (d) medical facilities, medical equipment, medical supplies or medical transportation; (e) children’s toys or other portable objects or products specially designed for the feeding, health, hygiene, clothing or education of children; (f) food or drink; (g) kitchen utensils or appliances except in military establishments, military locations or military supply depots; (h) objects clearly of a religious nature; (i) historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples; or (j) animals or their carcasses.”).

<sup>279</sup> Refer to § 7.15.1 (The Distinctive Emblems: Red Cross, Crescent, and Crystal); § 5.18.7 (Marking of Cultural Property With the Distinctive Emblem).

<sup>280</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 129 (“The United States reserves the right to use other devices (as defined in Article 2(5) of the Amended Mines Protocol) to destroy any stock of food or drink that is judged likely to be used by an enemy military force, if due precautions are taken for the safety of the civilian population.”).

camps, or military chapels to be booby-trapped.<sup>281</sup>

- objects clearly of a religious nature;
- historic monuments, works of art, or places of worship that constitute the cultural or spiritual heritage of peoples;<sup>282</sup> or
- animals or their carcasses.

6.12.5 General Rules for Using Mines, Booby-Traps, and Other Devices. The use of mines, booby traps, and other devices is subject to the same rules and principles that govern the use of other weapons to conduct attacks.<sup>283</sup> However, because mines, booby-traps, and other devices explode only after their emplacement, there have been different views as to when the use of a mine constitutes an “attack.”<sup>284</sup> Thus, the CCW Amended Mines Protocol seeks to clarify how these principles apply to the use of mines, booby-traps, and other devices. These rules include:

- a prohibition against directing mines, booby-traps, and other devices against the civilian population;
- a prohibition against the indiscriminate use of mines, booby-traps, and other devices;
- an obligation to take feasible precautions to protect civilians from the effects of mines, booby-traps, and other devices;
- an obligation to give effective advance warning of the emplacement of mines, booby-

<sup>282</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 129 (“The United states [sic] understands that Article 7(1)(i) of the Amended Mines Protocol refers only to a limited class of objects that, because of their clearly recognizable characteristics and because of their widely recognized importance, constitute a part of the cultural or spiritual heritage of peoples.”). *Refer to* § 5.18.1 (Definition of Cultural Property).

<sup>283</sup> *Refer to* § 5.4 (Rules on Conducting Assaults, Bombardments, and Other Attacks).

<sup>284</sup> See, e.g., A.P.V. Rogers, *Mines, Booby-traps and Other Devices*, 30 INTERNATIONAL REVIEW OF THE RED CROSS 521, 524-25 (Nov.-Dec. 1990) (“One of the difficulties of the conference [that negotiated the Original Mines Protocol] was to apply to mine warfare the provisions of Additional Protocol I dealing with attacks. Agreement could not be reached as to what stage in the mine-laying process amounts to an attack: when the mine is laid, when it is armed, when somebody is endangered by it or when it actually explodes. To avoid these difficulties it was necessary to draw up special rules relating to the use of mines.”); ICRC AP COMMENTARY 622 (¶1960) (“However, the question may arise at what point the use of mines constitutes an attack in the sense of this provision [AP I art. 51(4)(b)]. Is it when the mine is laid, when it is armed, when a person is endangered by it, or when it finally explodes? The participants at the meeting of the International Society of Military Law and the Law of War (Lausanne, 1982) conceded that from the legal point of view the use of mines constituted an attack in the sense of the Protocol when a person was directly endangered by such a mine.”).

traps, and other devices, unless circumstances do not permit; and

- obligations with respect to the recording of the placement of mines, booby-traps, and other devices.

6.12.5.1 *Prohibition Against Directing Mines, Booby-Traps, and Other Devices Against Civilians*. As with other weapons, mines, booby-traps, and other devices may not be directed against the civilian population, individual civilians, or civilian objects.<sup>285</sup>

6.12.5.2 *Prohibition Against Indiscriminate Use of Mines, Booby-Traps, or Other Devices*. Indiscriminate use of mines, booby-traps, or other devices is prohibited.<sup>286</sup>

This prohibition on indiscriminate use of mines, booby-traps, or other devices prohibits any placement of mines, booby-traps, or other devices that is not on, or directed against, a military objective.<sup>287</sup> On the other hand, it would be permissible to direct mines against enemy forces that are expected to pass through an area. Similarly, it would be permissible to direct mines against a piece of land that is a military objective.<sup>288</sup> In addition, it would be permissible to place mines on land or objects that belong to friendly forces and that the adversary would regard as a military objective, in order to protect such land or objects from interference or attack.

This prohibition on indiscriminate use of mines, booby-traps, or other devices also prohibits placing mines, booby-traps, or other devices using a method or means of delivery that cannot be directed at a specific military objective.<sup>289</sup> For example, it would be prohibited to deliver mines using unguided long-distance balloons.<sup>290</sup>

This prohibition on indiscriminate use of mines, booby-traps, or other devices also prohibits placing mines, booby-traps, or other devices that may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated.<sup>291</sup>

---

<sup>285</sup> CCW AMENDED MINES PROTOCOL art. 3(7) (“It is prohibited in all circumstances to direct weapons to which this Article applies, either in offence, defence or by way of reprisals, against the civilian population as such or against individual civilians or civilian objects.”). Refer to § 5.5 (Discrimination in Conducting Attacks).

<sup>286</sup> CCW AMENDED MINES PROTOCOL art. 3(8) (“The indiscriminate use of weapons to which this Article applies is prohibited.”).

<sup>287</sup> CCW AMENDED MINES PROTOCOL art. 3(8) (“Indiscriminate use is any placement of such weapons: (a) which is not on, or directed against, a military objective. In case of doubt as to whether an object which is normally dedicated to civilian purposes, such as a place of worship, a house or other dwelling or a school, is being used to make an effective contribution to military action, it shall be presumed not to be so used;”).

<sup>288</sup> Refer to § 5.6.8.4 (Examples of Military Objectives – Places of Military Significance).

<sup>289</sup> CCW AMENDED MINES PROTOCOL art. 3(8) (“Indiscriminate use is any placement of such weapons: ... (b) which employs a method or means of delivery which cannot be directed at a specific military objective;”).

<sup>290</sup> Refer to § 6.7 (Inherently Indiscriminate Weapons).

<sup>291</sup> CCW AMENDED MINES PROTOCOL art. 3(8) (“Indiscriminate use is any placement of such weapons: ... (c) which may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage

6.12.5.3 *Obligation to Take Feasible Precautions to Protect Civilians From the Effects of Mines, Booby-Traps, and Other Devices.* All feasible precautions shall be taken to protect civilians from the effects of mines, booby-traps, and other devices.<sup>292</sup> This obligation corresponds to a more general obligation to take feasible precautions.<sup>293</sup> Feasible precautions are those precautions that are practicable or practically possible, taking into account all circumstances ruling at the time, including humanitarian and military considerations.<sup>294</sup> These circumstances include, but are not limited to:

- the short- and long-term effect of mines, booby-traps, and other devices upon the local civilian population for the duration of their use;
- possible measures to protect civilians (e.g., fencing, signs, warning, and monitoring);
- the availability and feasibility of using alternatives; and
- the short- and long-term military requirements for a minefield, or for the use of booby-traps or other devices.<sup>295</sup>

6.12.5.4 *Effective Advance Warning of Any Emplacement.* Effective advanced warning shall be given of any emplacement of mines, booby-traps, and other devices that may affect the civilian population, unless circumstances do not permit doing so.<sup>296</sup>

6.12.5.5 *Recording of Minefields, Mined Areas, Mines, Booby-Traps, and Other Devices.* All information concerning minefields, mined areas, mines, booby-traps, and other devices shall be recorded in accordance with the provisions of the Technical Annex to the CCW

---

anticipated.”). Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>292</sup> CCW AMENDED MINES PROTOCOL art. 3(10) (“All feasible precautions shall be taken to protect civilians from the effects of weapons to which this Article applies.”).

<sup>293</sup> Refer to § 5.2.3 (Affirmative Duties to Take Feasible Precautions for the Protection of Civilians and Other Protected Persons and Objects).

<sup>294</sup> CCW AMENDED MINES PROTOCOL art. 3(10) (“Feasible precautions are those precautions which are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations.”). Refer to § 5.2.3.2 (What Precautions Are Feasible).

<sup>295</sup> CCW AMENDED MINES PROTOCOL art. 3(10) (“These circumstances include, but are not limited to: (a) the short- and long-term effect of mines upon the local civilian population for the duration of the minefield; (b) possible measures to protect civilians (for example, fencing, signs, warning and monitoring); (c) the availability and feasibility of using alternatives; and (d) the short- and long-term military requirements for a minefield.”). See also *Article-by-Article Analysis of CCW Amended Mines Protocol*, 14, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 14 (“These general considerations [described in CCW Amended Mines Protocol art. 3(10)] are relevant to all mines, both anti-personnel and anti-tank, as well as the other weapons to which the amended Protocol applies.”).

<sup>296</sup> CCW AMENDED MINES PROTOCOL art. 3(11) (“Effective advance warning shall be given of any emplacement of mines, booby-traps and other devices which may affect the civilian population, unless circumstances do not permit.”). Refer to § 5.11.5 (Effective Advance Warning Before an Attack That May Affect the Civilian Population).

Amended Mines Protocol.<sup>297</sup>

“Minefield” is a defined area in which mines have been emplaced (including areas free of mines that simulate a minefield), and a “mined area” is an area that is dangerous due to the presence of mines.<sup>298</sup> “Recording” means a physical, administrative, and technical operation designed to obtain, for the purpose of registration in official records, all available information facilitating the location of minefields, mined areas, booby-traps, and other devices.<sup>299</sup>

Subparagraph 1(a) of the Technical Annex to the CCW Amended Mines Protocol specifies that the recording of the location of non-remotely delivered mines, minefields, mined areas, booby-traps, and other devices shall be carried out in accordance with the following provisions:

(i) the location of the minefields, mined areas and areas of booby-traps and other devices shall be specified accurately by relation to the coordinates of at least two reference points and the estimated dimensions of the area containing these weapons in relation to those reference points;

(ii) maps, diagrams or other records shall be made in such a way as to indicate the location of minefields, mined areas, booby-traps and other devices in relation to reference points, and these records shall also indicate their perimeters and extent;

(iii) for purposes of detection and clearance of mines, booby-traps and other devices, maps, diagrams or other records shall contain complete information on the type, number, emplacing method, type of fuse and life time, date and time of laying, antihandling devices (if any) and other relevant information on all these weapons laid. Whenever feasible the minefield record shall show the exact location of every mine, except in row minefields where the row location is sufficient. The precise location and operating mechanism of each booby-trap laid shall be individually recorded.<sup>300</sup>

Records shall be retained by the parties to the conflict.<sup>301</sup> Copies of records shall be held

---

<sup>297</sup> CCW AMENDED MINES PROTOCOL art. 9(1) (“All information concerning minefields, mined areas, mines, booby-traps and other devices shall be recorded in accordance with the provisions of the Technical Annex.”).

<sup>298</sup> CCW AMENDED MINES PROTOCOL art. 2(8) (“‘Minefield’ is a defined area in which mines have been emplaced and ‘mined area’ is an area which is dangerous due to the presence of mines. ‘Phoney minefield’ means an area free of mines that simulates a minefield. The term ‘minefield’ includes phoney minefields.”).

<sup>299</sup> CCW AMENDED MINES PROTOCOL art. 2(9) (“‘Recording’ means a physical, administrative and technical operation designed to obtain, for the purpose of registration in official records, all available information facilitating the location of minefields, mined areas, mines, booby-traps and other devices.”).

<sup>300</sup> TECHNICAL ANNEX TO CCW AMENDED MINES PROTOCOL ¶1(c).

<sup>301</sup> CCW AMENDED MINES PROTOCOL art. 9(2) (providing that “[a]ll such records [mentioned in paragraph 1 of Article 9] shall be retained by the parties to a conflict”).

at a level of command sufficient to guarantee their safety as far as possible.<sup>302</sup>

6.12.6 Rules for Using Non-Remotely Delivered Anti-Personnel Mines With Compliant SD/SDA Mechanisms. Non-remotely delivered anti-personnel mines that comply with the requirements for self-destruction and self-deactivation in the Technical Annex to the CCW Amended Mines Protocol may be used outside of marked areas.<sup>303</sup>

6.12.7 Rules for Using Non-Remotely Delivered Anti-Personnel Mines Without Compliant SD/SDA Mechanisms. Anti-personnel mines other than remotely delivered mines that are not in compliance with the provisions on self-destruction and self-deactivation in the Technical Annex to the CCW Amended Mines Protocol may be used subject to certain requirements. For a number of years, U.S. forces maintained minefields that met these standards.<sup>304</sup> The United States, however, no longer maintains any minefields.<sup>305</sup>

First, such weapons are to be placed within a perimeter-marked area that is monitored by military personnel and protected by fencing or other means, to ensure the effective exclusion of civilians from the area. The marking must be of a distinct and durable character, and must be visible to a person who is about to enter the perimeter-marked area.<sup>306</sup> The State Party controlling a minefield is obligated to take all feasible measures to prevent the unauthorized removal, defacement, destruction, or concealment of any device, system, or material used to establish the perimeter of a permanently marked area.<sup>307</sup>

Second, such weapons are to be cleared before the area is abandoned, unless the area is turned over to the forces of another State that accepts responsibility for the maintenance of the

---

<sup>302</sup> TECHNICAL ANNEX TO CCW AMENDED MINES PROTOCOL ¶1(c) (“Copies of records shall be held at a level of command sufficient to guarantee their safety as far as possible.”).

<sup>303</sup> TECHNICAL ANNEX TO CCW AMENDED MINES PROTOCOL ¶3(b) (“All non-remotely delivered anti-personnel mines, used outside marked areas, as defined in Article 5 of this Protocol, shall comply with the requirements for self-destruction and self-deactivation stated in sub-paragraph (a).”).

<sup>304</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 16-17, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 16-17 (“The U.S. military has maintained minefields for a number of years in Guantanamo and Korea that meet these standards, and is confident that these requirements are feasible and realistic.”).

<sup>305</sup> Department of State, Bureau of Political-Military Affairs, *Fact Sheet: Frequently Asked Questions on the New United States Landmine Policy* (Feb. 27, 2004) (“The United States ... currently maintains no minefields anywhere in the world, including Korea.”).

<sup>306</sup> CCW AMENDED MINES PROTOCOL art. 5(2)(a) (“It is prohibited to use weapons to which this Article applies which are not in compliance with the provisions on self-destruction and self-deactivation in the Technical Annex, unless: ... such weapons are placed within a perimeter-marked area which is monitored by military personnel and protected by fencing or other means, to ensure the effective exclusion of civilians from the area. The marking must be of a distinct and durable character and must at least be visible to a person who is about to enter the perimeter-marked area;”).

<sup>307</sup> CCW AMENDED MINES PROTOCOL art. 5(5) (“All feasible measures shall be taken to prevent the unauthorized removal, defacement, destruction or concealment of any device, system or material used to establish the perimeter of a perimeter-marked area.”).

protections stated above, and the subsequent clearance of those weapons.<sup>308</sup> This requirement does not preclude agreement, in connection with peace treaties or similar arrangements, to allocate responsibilities under Article 5 of the CCW Amended Mines Protocol in a manner that respects the essential spirit and purpose of Article 5.<sup>309</sup>

A party to a conflict is relieved from compliance with these obligations if compliance is not feasible due to forcible loss of control of the area as a result of enemy military action, including situations where direct enemy military action makes it impossible to comply. If the party that laid the minefield regains control of the area, it must re-assume its responsibilities.<sup>310</sup> The forces of a party to the conflict gaining control of an area assume the responsibilities, to the maximum extent feasible, until the mines have been cleared.<sup>311</sup>

6.12.8 Rules for Using Non-Remotely Delivered Anti-Personnel Mines That Propel Fragments in a Horizontal Arc of Less Than 90 Degrees (e.g., Claymores). Anti-personnel mines other than remotely delivered mines that propel fragments in a horizontal arc of less than 90 degrees may be used on or above the ground outside of marked areas for up to 72 hours if:

- they are located in immediate proximity to the military unit that emplaced them; and
- the area is monitored by military personnel to ensure the effective exclusion of civilians.<sup>312</sup>

The maintenance of observation over avenues of approach where such mines are deployed constitutes one acceptable form of monitoring to ensure the effective exclusion of civilians.<sup>313</sup>

---

<sup>308</sup> CCW AMENDED MINES PROTOCOL art. 5(2)(b) (“such weapons are cleared before the area is abandoned, unless the area is turned over to the forces of another State which accept responsibility for the maintenance of the protections required by this Article and the subsequent clearance of those weapons.”).

<sup>309</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“The United States understands that the allocation of responsibilities for landmines in Article 5(2)(b) of the Amended Mines Protocol does not preclude agreement, in connection with peace treaties or similar arrangements, to allocate responsibilities under that Article in a manner that respects the essential spirit and purpose of the Article.”).

<sup>310</sup> CCW AMENDED MINES PROTOCOL art. 5(3) (“A party to a conflict is relieved from further compliance with the provisions of subparagraphs 2 (a) and 2 (b) of this Article only if such compliance is not feasible due to forcible loss of control of the area as a result of enemy military action, including situations where direct enemy military action makes it impossible to comply. If that party regains control of the area, it shall resume compliance with the provisions of sub-paragraphs 2 (a) and 2 (b) of this Article.”).

<sup>311</sup> CCW AMENDED MINES PROTOCOL art. 5(4) (“If the forces of a party to a conflict gain control of an area in which weapons to which this Article applies have been laid, such forces shall, to the maximum extent feasible, maintain and, if necessary, establish the protections required by this Article until such weapons have been cleared.”).

<sup>312</sup> CCW AMENDED MINES PROTOCOL art. 5(6) (“Weapons to which this Article applies which propel fragments in a horizontal arc of less than 90 degrees and which are placed on or above the ground may be used without the measures provided for in sub-paragraph 2 (a) of this Article for a maximum period of 72 hours, if: (a) they are located in immediate proximity to the military unit that emplaced them; and (b) the area is monitored by military personnel to ensure the effective exclusion of civilians.”).

<sup>313</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 129 (“The United States understands that, for the purposes of Article 5(6)(b) of the Amended Mines

A Claymore munition used in trip-wire mode is an example of this type of mine.<sup>314</sup> A Claymore used in command-detonated mode is regulated as an “other device.”<sup>315</sup>

6.12.9 Rules for Using Remotely Delivered Mines. Remotely delivered mines are subject to special, additional restrictions because their location cannot be marked as accurately as mines placed by hand or by mechanical mine layers. In addition, because remotely delivered mines are often emplaced by long-range means, it may be difficult to ensure that civilians are absent or excluded from areas containing such mines. Remotely delivered mines may not be used unless they have compliant self-destruction and self-deactivation mechanisms.<sup>316</sup>

6.12.9.1 Effective Advance Warning of the Delivery of Mines Unless Circumstances Do Not Permit. As with other weapons, effective advance warning shall be given of any delivery or dropping of remotely delivered mines that may affect the civilian population, unless circumstances do not permit doing so.<sup>317</sup>

6.12.9.2 Recording of Remotely Delivered Mines. It is prohibited to use remotely delivered mines unless they are recorded in accordance with subparagraph 1(b) of the Technical Annex to the CCW Amended Mines Protocol.<sup>318</sup> Subparagraph 1(b) of the Technical Annex requires that the estimated location and area of remotely delivered mines be specified by coordinates of reference points (normally corner points) and shall be ascertained and, when feasible, marked on the ground at the earliest opportunity. In addition, the total number and type of mines laid, the date and time of laying, and the self-destruction time periods shall also be recorded.<sup>319</sup>

6.12.10 Rule for Using Booby-Traps and Other Devices. Booby-traps may not be of the

---

Protocol, the maintenance of observation over avenues of approach where mines subject to that Article are deployed constitutes one acceptable form of monitoring to ensure the effective exclusion of civilians.”).

<sup>314</sup> *Article-by-Article Analysis of CCW Amended Mines Protocol*, 7-8, Enclosure A to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 7-8 (“In a trip-wired mode, the Claymore is not excluded from the restrictions applicable to anti-personnel mines by reason of the definition in paragraph 3. Specifically, such mines, when used in a trip-wired mode, are covered by the definition but special, less restrictive rules in Article 5 apply to their use for a limited time -- 72 hours -- from their emplacement.”).

<sup>315</sup> Refer to § 6.12.10 (Rule for Using Booby-Traps and Other Devices).

<sup>316</sup> Refer to § 6.12.4.5 (Remotely Delivered Anti-Personnel Mines Not in Compliance With Self-Destruction and Self-Deactivation Requirements).

<sup>317</sup> CCW AMENDED MINES PROTOCOL art. 6(4) (“Effective advance warning shall be given of any delivery or dropping of remotely-delivered mines which may affect the civilian population, unless circumstances do not permit.”). Refer to § 5.11.1 (Warning Before Attack).

<sup>318</sup> CCW AMENDED MINES PROTOCOL art. 6(1) (“It is prohibited to use remotely-delivered mines unless they are recorded in accordance with sub-paragraph I (b) of the Technical Annex.”).

<sup>319</sup> TECHNICAL ANNEX TO CCW AMENDED MINES PROTOCOL ¶1(b) (“The estimated location and area of remotely-delivered mines shall be specified by coordinates of reference points (normally corner points) and shall be ascertained and when feasible marked on the ground at the earliest opportunity. The total number and types of mines laid, the date and time of laying and the self-destruction time periods shall also be recorded.”).

prohibited type discussed in § 6.12.4.8 (Booby-Traps and Other Devices in the Form of Apparently Harmless Portable Objects Specifically Designed to Explode) and § 6.12.4.9 (Certain Types of Prohibited Booby-Traps and Other Devices).

In addition, as with mines, there are recording obligations with respect to the use of booby-traps and other devices, including the obligation to record the precise location and operating mechanism of each booby-trap laid.<sup>320</sup>

6.12.10.1 Use of Booby-Traps and Other Devices in Populated Areas When Combat Between Ground Forces Is Not Taking Place or Does Not Appear Imminent. In addition, booby-traps and other devices may not be used in any city, town, village, or other area containing a similar concentration of civilians in which combat between ground forces is not taking place or does not appear to be imminent, unless either:

- “they are placed on or in the close vicinity of a military objective;”<sup>321</sup> or
- “measures are taken to protect civilians from their effects, for example, the posting of warning [signs, the posting of] sentries, the issue of warnings or the provision of fences.”<sup>322</sup>

6.12.11 Obligation to Seek to Protect Certain Groups From the Effects of Minefields, Mined Areas, Mines, Booby-Traps, and Other Devices. Article 12 of the CCW Amended Mines Protocol creates certain obligations to take measures to help protect certain groups from the effects of minefields, mined areas, mines, booby-traps, and other devices. Such obligations may apply with respect to:

- Any United Nations force or mission performing peace-keeping, observation, or similar functions in any area in accordance with the Charter of the United Nations; or
- Any of the following, if they have the consent of the State in whose territory they are operating:<sup>323</sup>
  - missions established pursuant to Chapter VIII of the Charter of the United Nations and performing its functions in the area of a conflict;

---

<sup>320</sup> Refer to § 6.12.5.5 (Recording of Minefields, Mined Areas, Mines, Booby-Traps, and Other Devices).

<sup>321</sup> CCW AMENDED MINES PROTOCOL art. 7(3)(a).

<sup>322</sup> CCW AMENDED MINES PROTOCOL art. 7(3) (“Without prejudice to the provisions of Article 3, it is prohibited to use weapons to which this Article applies in any city, town, village or other area containing a similar concentration of civilians in which combat between ground forces is not taking place or does not appear to be imminent, unless either: (a) they are placed on or in the close vicinity of a military objective; or (b) measures are taken to protect civilians from their effects, for example, the posting of warning sentries, the issuing of warnings or the provision of fences.”). The words in square brackets appeared in Original CCW Protocol II Article 4(2)(b). Their omission in the CCW Amended Mines Protocol is an apparent error overlooked by the Drafting Committee.

<sup>323</sup> CCW AMENDED MINES PROTOCOL art. 12(a) (“With the exception of the forces and missions referred to in subparagraph 2(a) (i) of this Article, this Article applies only to missions which are performing functions in an area with the consent of the High Contracting Party on whose territory the functions are performed.”).

- humanitarian or fact-finding missions of the United Nations System;
- missions of the ICRC;
- humanitarian missions of a national Red Cross or Red Crescent Society or of their International Federation; and
- missions of inquiry established pursuant to the provisions of the Geneva Conventions of 12 August 1949 and, where applicable, their Additional Protocols.

The obligations to take affirmative measures under Article 12 are subject to practical considerations.<sup>324</sup> In addition, the forces and missions that are afforded protection under Article 12 have corresponding obligations to keep information confidential, to respect applicable laws and regulations, and to refrain from activities that are incompatible with the impartial and international nature of their duties.<sup>325</sup>

6.12.12 Obligations Arising After the Cessation of Active Hostilities. Certain obligations with respect to mines, booby-traps, and other devices are triggered after the cessation of active hostilities.

6.12.12.1 Take Measures to Protect Civilians From the Effects of Minefields, Mined Areas, Mines, Booby-Traps, and Other Devices in Areas Under Their Control After Hostilities. Without delay after the cessation of active hostilities, a party to a conflict is to take

---

<sup>324</sup> CCW AMENDED MINES PROTOCOL art. 12(2)(b) (“Each High Contracting Party or party to a conflict, if so requested by the head of a force or mission to which this paragraph applies, shall: (i) so far as it is able, take such measures as are necessary to protect the force or mission from the effects of mines, booby-traps and other devices in any area under its control; (ii) if necessary in order effectively to protect such personnel, remove or render harmless, so far as it is able, all mines, booby-traps and other devices in that area; and (iii) inform the head of the force or mission of the location of all known minefields, mined areas, mines, booby-traps and other devices in the area in which the force or mission is performing its functions and, so far as is feasible, make available to the head of the force or mission all information in its possession concerning such minefields, mined areas, mines, booby-traps and other devices.”) (emphasis added); CCW AMENDED MINES PROTOCOL art. 12(3)(b) (“Each High Contracting Party or party to a conflict, if so requested by the head of a mission to which this paragraph applies, shall: (i) provide the personnel of the mission with the protections set out in sub-paragraph 2(b) (i) of this Article; and (ii) if access to or through any place under its control is necessary for the performance of the mission’s functions and in order to provide the personnel of the mission with safe passage to or through that place: (aa) unless on-going hostilities prevent, inform the head of the mission of a safe route to that place if such information is available; or (bb) if information identifying a safe route is not provided in accordance with sub-paragraph (aa), so far as is necessary and feasible, clear a lane through minefields.”) (emphasis added); CCW Amended Mines Protocol art. 12(5)(b) (“Each High Contracting Party or party to a conflict, if so requested by the head of a mission to which this paragraph applies, shall, so far as is feasible: (i) provide the personnel of the mission with the protections set out in sub-paragraph 2(b) (i) of this Article, and (ii) take the measures set out in sub-paragraph 3(b) (ii) of this Article.”) (emphasis added).

<sup>325</sup> CCW AMENDED MINES PROTOCOL art. 12 (“6. Confidentiality All information provided in confidence pursuant to this Article shall be treated by the recipient in strict confidence and shall not be released outside the force or mission concerned without the express authorization of the provider of the information. 7. Respect for laws and regulations Without prejudice to such privileges and immunities as they may enjoy or to the requirements of their duties, personnel participating in the forces and missions referred to in this Article shall: (a) respect the laws and regulations of the host State; and (b) refrain from any action or activity incompatible with the impartial and international nature of their duties.”).

all necessary and appropriate measures, including the use of records kept in accordance with the CCW Amended Mines Protocol, to protect civilians from the effects of minefields, mined areas, mines, booby-traps, and other devices in areas under their control.<sup>326</sup> Information is to be shared with the other party or parties to the conflict and with the Secretary-General of the United Nations regarding mines laid by the party's forces in areas no longer under their control, subject to reciprocity and security requirements.<sup>327</sup>

*6.12.12.2 Clearance of Minefields, Mined Areas, Mines, Booby-Traps, and Other Devices After Hostilities.* Each Party to the CCW Amended Mines Protocol or party to a conflict is, in accordance with the provisions of the CCW Amended Mines Protocol, responsible for all mines, booby-traps, and other devices employed by it and undertakes to clear, remove, destroy, or maintain them as specified in Article 10 of the CCW Amended Mines Protocol.<sup>328</sup>

Without delay after the cessation of active hostilities, a Party to the CCW Amended Mines Protocol or a party to a conflict has an obligation to ensure that all minefields, mined areas, mines, booby-traps, and other devices in areas under its control are cleared, removed, destroyed, or maintained in accordance with Article 3 and Paragraph 2 of Article 5 of the CCW Amended Mines Protocol.<sup>329</sup>

With respect to mines laid by a Party to the CCW Amended Mines Protocol or a party to a conflict in areas over which the party no longer exercises control, the party is to provide to the party that is now in control of the area, to the extent permitted by such party, technical and material assistance necessary to fulfill its responsibility to ensure that all minefields are cleared, removed, destroyed, or maintained.<sup>330</sup> For example, such assistance may include maps and other

---

<sup>326</sup> CCW AMENDED MINES PROTOCOL art. 9(2) (“All such records shall be retained by the parties to a conflict, who shall, without delay after the cessation of active hostilities, take all necessary and appropriate measures, including the use of such information, to protect civilians from the effects of minefields, mined areas, mines, booby-traps and other devices in areas under their control.”).

<sup>327</sup> CCW AMENDED MINES PROTOCOL art. 9(2) (“At the same time, they shall also make available to the other party or parties to the conflict and to the Secretary-General of the United Nations all such information in their possession concerning minefields, mined areas, mines, booby-traps and other devices laid by them in areas no longer under their control; provided, however, subject to reciprocity, where the forces of a party to a conflict are in the territory of an adverse party, either party may withhold such information from the Secretary-General and the other party, to the extent that security interests require such withholding, until neither party is in the territory of the other. In the latter case, the information withheld shall be disclosed as soon as those security interests permit. Wherever possible, the parties to the conflict shall seek, by mutual agreement, to provide for the release of such information at the earliest possible time in a manner consistent with the security interests of each party.”).

<sup>328</sup> CCW AMENDED MINES PROTOCOL art. 3(2) (“Each High Contracting Party or party to a conflict is, in accordance with the provisions of this Protocol, responsible for all mines, booby-traps, and other devices employed by it and undertakes to clear, remove, destroy or maintain them as specified in Article 10 of this Protocol.”).

<sup>329</sup> CCW AMENDED MINES PROTOCOL art. 10(1) (“Without delay after the cessation of active hostilities, all minefields, mined areas, mines, booby-traps and other devices shall be cleared, removed, destroyed or maintained in accordance with Article 3 and paragraph 2 of Article 5 of this Protocol.”); CCW AMENDED MINES PROTOCOL art. 10(2) (“High Contracting Parties and parties to a conflict bear such responsibility with respect to minefields, mined areas, mines, booby-traps and other devices in areas under their control.”).

<sup>330</sup> CCW AMENDED MINES PROTOCOL art. 10(3) (“With respect to minefields, mined areas, mines, booby-traps and other devices laid by a party in areas over which it no longer exercises control, such party shall provide to the party

information regarding the mines and minefields.

In addition, the parties have an obligation to endeavor to reach agreement among themselves and, where appropriate, with other States and with international organizations, on the provision of technical and material assistance, including, in appropriate circumstances, the undertaking of joint operations necessary to fulfill such responsibilities.<sup>331</sup> There are additional provisions of the CCW Amended Mines Protocol addressing international exchanges of information and cooperation in this respect.<sup>332</sup> However, no provision of the CCW Amended Mines Protocol is to be construed as affecting the discretion of the United States to refuse assistance or to restrict or deny permission for the export of equipment, material, or scientific or technological information for any reason, and the CCW Amended Mines Protocol may not be used as a pretext for the transfer of weapons technology or the provision of assistance to the military mining or military counter-mining capabilities of a State Party to the CCW Amended Mines Protocol.<sup>333</sup>

6.12.13 U.S. Policy on Landmines. Landmines have been addressed by U.S. national policy. The United States has announced a policy: (1) not to use anti-personnel landmines outside the Korean Peninsula; (2) not to assist, encourage, or induce anyone outside the Korean Peninsula to engage in activity prohibited by the Ottawa Convention; (3) to undertake to destroy anti-personnel landmine stockpiles not required for the defense of the Republic of Korea; and (4) not to produce or otherwise acquire any anti-personnel munitions that are not compliant with the Ottawa Convention.<sup>334</sup> The United States has also previously committed not to emplace new persistent anti-personnel or anti-vehicle landmines (*i.e.*, landmines without self-destruction mechanisms and self-deactivation features).<sup>335</sup> U.S. landmines will continue to meet or exceed

---

in control of the area pursuant to paragraph 2 of this Article, to the extent permitted by such party, technical and material assistance necessary to fulfil such responsibility.”).

<sup>331</sup> CCW AMENDED MINES PROTOCOL art. 10(4) (“At all times necessary, the parties shall endeavour to reach agreement, both among themselves and, where appropriate, with other States and with international organizations, on the provision of technical and material assistance, including, in appropriate circumstances, the undertaking of joint operations necessary to fulfil such responsibilities.”).

<sup>332</sup> CCW AMENDED MINES PROTOCOL art. 11.

<sup>333</sup> United States, *Statement on Consent to Be Bound by the CCW Amended Mines Protocol*, May 24, 1999, 2065 UNTS 128, 130 (“The United States understands that - (A) no provision of the Protocol may be construed as affecting the discretion of the United States to refuse assistance or to restrict or deny permission for the export of equipment, material, or scientific or technological information for any reason; and (B) the Amended Mines Protocol may not be used as a pretext for the transfer of weapons technology or the provision of assistance to the military mining or military counter-mining capabilities of a State Party to the Protocol.”).

<sup>334</sup> Department of State, Bureau of Political-Military Affairs, *Fact Sheet: Changes to U.S. Anti-Personnel Landmine Policy* (Sept. 23, 2014) (“This means that [the] United States will: not use APL outside the Korean Peninsula; not assist, encourage, or induce anyone outside the Korean Peninsula to engage in activity prohibited by the Ottawa Convention; and undertake to destroy APL stockpiles not required for the defense of the Republic of Korea. This change to U.S. APL policy builds on the announcement that the U.S. delegation made in June at the Third Review Conference of the Ottawa Convention in Maputo, Mozambique, that the United States will not produce or otherwise acquire any anti-personnel munitions that are not compliant with the Ottawa Convention, including to replace such munitions as they expire in the coming years.”).

<sup>335</sup> Department of State, Bureau of Political-Military Affairs, *Fact Sheet: New United States Policy on Landmines: Reducing Humanitarian Risk and Saving Lives of United States Soldiers* (Feb. 27, 2004) (“The United States has committed to eliminate persistent landmines of all types from its arsenal.”).

international standards for self-destruction and self-deactivation.<sup>336</sup> In addition, the United States no longer has any non-detectable mine of any type in its arsenal.<sup>337</sup>

The United States has a long practice of contributing significantly to humanitarian demining efforts and other conventional weapons destruction programs.<sup>338</sup>

6.12.14 Ottawa Convention on Anti-Personnel Landmines. The United States is not a Party to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction.<sup>339</sup> This Convention is commonly called the Ottawa Convention.

The United States has announced policy changes that align U.S. anti-personnel landmine policy outside the Korean Peninsula with the key requirements of the Ottawa Convention.<sup>340</sup> Among other reasons, because the practice of the United States and other States remains inconsistent with the prohibitions of the Ottawa Convention, its prohibitions do not reflect customary international law.<sup>341</sup>

---

<sup>336</sup> Department of State, Bureau of Political-Military Affairs, *Fact Sheet: New United States Policy on Landmines: Reducing Humanitarian Risk and Saving Lives of United States Soldiers* (Feb. 27, 2004) (“The United States will continue to develop non-persistent anti-personnel and anti-tank landmines. As with the current United States inventory of non-persistent landmines, these mines will continue to meet or exceed international standards for self-destruction and self-deactivation. This ensures that, after they are no longer needed for the battlefield, these landmines will detonate or turn themselves off, eliminating the threat to civilians.”).

<sup>337</sup> Department of State, Bureau of Political-Military Affairs, *Fact Sheet: New United States Policy on Landmines: Reducing Humanitarian Risk and Saving Lives of United States Soldiers* (Feb. 27, 2004) (“Within one year, the United States will no longer have any non-detectable mine of any type in its arsenal.”).

<sup>338</sup> Department of State, Bureau of Political-Military Affairs, *To Walk the Earth in Safety: Documenting the United States’ 20 Year Commitment to Conventional Weapons Destruction*, 6 (August 2013) (“In 1993, the United States established the Demining Assistance Program and the Interagency Working Group (IWG) on Demining and Landmine Control, initiating a coordinated interagency aid effort to support international humanitarian mine action (HMA). Though the United States first provided HMA assistance in 1988, a coordinated and sustained U.S. Government effort began with this IWG. Over the past two decades, the U.S. approach to mine action has expanded to meet related needs in post-conflict environments, such as threats from ERW and at-risk SA/LW [small arms and light weapons], including manportable air-defense systems (MANPADS). ... Since 1993, the United States has invested more than \$2 billion in CWD programs in over 90 countries.”).

<sup>339</sup> Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction, Sept. 18, 1997, 2056 UNTS 211.

<sup>340</sup> Department of State, Bureau of Political-Military Affairs, *Fact Sheet: Changes to U.S. Anti-Personnel Landmine Policy* (Sept. 23, 2014) (“President Clinton, in his 1994 address to the United Nations General Assembly, called for the eventual elimination of anti-personnel landmines (APL). Today, the Obama Administration is announcing new policy changes that bring the United States closer to that goal. Specifically, the United States is aligning our APL policy outside the Korean Peninsula with the key requirements of the Ottawa Convention, the international treaty prohibiting the use, stockpiling, production, and transfer of APL, which more than 160 countries have joined, including all of our NATO Allies.”).

<sup>341</sup> See, e.g., Eritrea Ethiopia Claims Commission, *Partial Award: Central Front, Ethiopia’s Claim 2*, ¶95 (Apr. 28, 2004) (“Landmines. As with other weredas [*i.e.*, geographic districts], the evidence indicates that Eritrea made extensive use of anti-personnel landmines, but it does not demonstrate a pattern of their unlawful use. For liability, the Commission would have to conclude that landmines were used in ways that intentionally targeted civilians or were indiscriminate. However, the available evidence suggests that landmines were extensively used as part of the

Many U.S. allies and coalition partners, including Australia, Canada, and the United Kingdom, are parties to the Ottawa Convention. Article 1 of the Ottawa Convention prohibits States Parties from using, developing, producing, otherwise acquiring, stockpiling, retaining, or transferring to anyone, directly or indirectly, anti-personnel landmines, or to assist, encourage, or induce, in any way, anyone to engage in any activity prohibited to a State Party under the Convention. Australia, Canada, and the United Kingdom have taken the position that its armed forces would not violate the Ottawa Convention merely by reason of taking part in joint operations with forces of an ally that is not bound by the Ottawa Convention and that uses anti-personnel mines.<sup>342</sup>

## 6.13 CLUSTER MUNITIONS

Cluster munitions are not specifically prohibited or restricted by the law of war. DoD has policies on cluster munitions. The use of cluster munitions, in certain circumstances, is likely to reduce the risk of incidental harm as compared to other weapons.

**6.13.1 Description of Cluster Munitions.** Cluster munitions may be described as munitions composed of a non-reusable canister or delivery body containing multiple, conventional explosive submunitions.<sup>343</sup> Some munitions that may contain submunitions are not considered cluster munitions. For example, nuclear, chemical, and biological weapons, as well as obscurants, pyrotechnics, non-lethal systems (e.g., leaflets), non-explosive kinetic effect submunitions (e.g., flechettes or rods), and landmines, generally are not considered cluster munitions.

---

defenses of Eritrea's trenches and field fortifications. Thus, the declarations citing landmine use also frequently refer to the presence of Eritrean trenches in the area/kushet concerned. In principle, the defensive use of minefields to protect trenches would be a lawful use under customary international law.”).

<sup>342</sup> Australia, *Statement on Ratification of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction*, Jan. 14, 1999, 2057 UNTS 214, 218 (“It is the understanding of Australia that, in the context of operations, exercises or other military activity authorized by the United Nations or otherwise conducted in accordance with international law, the participation by the ADF, or individual Australian citizens or residents, in such operations, exercises or other military activity conducted in combination with the armed forces of States not party to the Convention which engage in activity prohibited under the Convention would not, by itself, be considered to be in violation of the Convention.”); Canada, *Statement on Signature of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction*, Dec. 3, 1997, 2056 UNTS 211, 310 (“It is the understanding of the Government of Canada that, in the context of operations, exercises or other military activity sanctioned by the United Nations or otherwise conducted in accordance with international law, the mere participation by the Canadian Forces, or individual Canadians, in operations, exercises or other military activity conducted in combination with the armed forces of States not party to the Convention which engage in activity prohibited under the Convention would not, by itself, be considered to be assistance, encouragement or inducement in accordance with the meaning of those terms in article 1, paragraph 1 (c).”); 2004 UK MANUAL ¶6.13 (“Members of the United Kingdom armed forces, will not, however, be guilty of an offence merely by reason of taking part in joint operations with forces of an ally not bound by the Ottawa Convention which deploy landmines.”).

<sup>343</sup> Robert Gates, Secretary of Defense, *Memorandum re: DoD Policy on Cluster Munitions and Unintended Harm to Civilians*, Jun. 19, 2008 (“For the purposes of this policy, cluster munitions are defined as munitions composed of a non-reusable canister or delivery body containing multiple, conventional explosive submunitions. Excluded from the definition are nuclear, chemical, and biological weapons as well as obscurants, pyrotechnics, non-lethal systems (e.g., leaflets), non-explosive kinetic effect submunitions (e.g., flechettes or rods), or electronic effects. Landmine submunitions are also excluded since they are covered by existing policy and international agreements.”).

6.13.2 Use of Cluster Munitions to Reduce the Risk of Incidental Harm. As with incendiary weapons, the use of cluster munitions, in certain circumstances, is likely to result in less incidental harm than the use of other weapons.<sup>344</sup> For example, cluster munitions have been used against military objectives containing dangerous forces, such as dams, in order to reduce the risk that bombardment of these objectives would release such forces and cause incidental harm to the civilian population.<sup>345</sup>

6.13.3 DoD Policy on Cluster Munitions. DoD has developed policies to minimize the negative humanitarian consequences that can sometimes be associated with cluster munitions.<sup>346</sup> Under a 2008 policy, the U.S. armed forces will, after 2018, only employ cluster munitions containing submunitions that, after arming, do not result in more than 1% unexploded ordnance (UXO) across the range of intended operational environments.<sup>347</sup> Until the end of 2018, cluster munitions that exceed the 1% UXO rate may not be used unless approved by the Combatant Commander.<sup>348</sup>

6.13.4 Convention on Cluster Munitions. The United States is not a Party to the Convention on Cluster Munitions.<sup>349</sup> The United States has determined that its national security interests cannot be fully ensured consistent with the terms of the Convention on Cluster

---

<sup>344</sup> Robert Gates, Secretary of Defense, *Memorandum re: DoD Policy on Cluster Munitions and Unintended Harm to Civilians*, Jun. 19, 2008 (“DoD recognizes that blanket elimination of cluster munitions is unacceptable due not only to negative military consequences but also due to potential negative consequences for civilians. Large-scale use of unitary weapons, as the only alternative to achieve military objectives, could result, in some cases, in unacceptable collateral damage and explosive remnants of war (ERW) issues.”). Refer to § 5.11.6 (Weaponizing (E.g., Selecting Appropriate Weapons, Aim Points)).

<sup>345</sup> For example, W. Hays Parks, *Linebacker and the Law of War*, AIR UNIVERSITY REVIEW (Jan.-Feb. 1983) (During the Vietnam War, the North Vietnamese placed “AAA gun positions, ground-controlled intercept (GCI) radar, and surface-to-air missile (SAM) sites atop or adjacent to dikes, and storing POL [petroleum, oil, and lubricants] alongside or on top of dikes as a shield against attack. All were legitimate targets. ... When [the air defenses] were finally authorized for attack during Linebacker I, it was with the stipulation that the targets were to be attacked with weapons that would minimize the risk of structural damage to the dikes. This was accomplished through the use of napalm, strafing, cluster munitions, and other antipersonnel weapons.”).

<sup>346</sup> Robert Gates, Secretary of Defense, *Memorandum re: DoD Policy on Cluster Munitions and Unintended Harm to Civilians*, Jun. 19, 2008 (“The DoD policy above is intended to minimize the potential unintended harm to civilians and civilian infrastructure of U.S. cluster munitions employment to the extent possible.”); William Cohen, *Memorandum re: DoD Policy on Submunition Reliability*, Jan. 10, 2001 (“Submunition weapons employment in Southwest Asia and Kosovo, and major theater war modeling, have revealed a significant unexploded ordnance (UXO) concern. ... It is the policy of the DoD to reduce overall UXO through a process of improvement in submunition system reliability—the desire is to field future submunitions with a 99% or higher functioning rate. Submunition functioning rates may be lower under operational conditions due to environmental factors such as terrain and weather.”).

<sup>347</sup> Robert Gates, Secretary of Defense, *Memorandum re: DoD Policy on Cluster Munitions and Unintended Harm to Civilians*, Jun. 19, 2008 (“After 2018, the Military Departments and Combatant Commands will only employ cluster munitions containing submunitions that, after arming, do not result in more than 1% unexploded ordnance (UXO) across the range of intended operational environments.”).

<sup>348</sup> Robert Gates, Secretary of Defense, *Memorandum re: DoD Policy on Cluster Munitions and Unintended Harm to Civilians*, Jun. 19, 2008 (“Until the end of 2018, use of cluster munitions that exceed the 1% UXO rate must be approved by the Combatant Commander.”).

<sup>349</sup> Convention on Cluster Munitions, May 30, 2008, 2688 UNTS 39.

Munitions.<sup>350</sup> The United States has expressed the view that the Convention on Cluster Munitions does not represent an emerging norm or reflect customary international law that would prohibit the use of cluster munitions in armed conflict.<sup>351</sup>

The Convention on Cluster Munitions establishes for its States Parties a number of prohibitions and restrictions on certain types of cluster munitions.<sup>352</sup> These rules include prohibitions on assisting, encouraging, or inducing anyone to engage in any activity prohibited to a State Party.<sup>353</sup> Despite these restrictions, States Parties and their military personnel and nationals may engage in military cooperation and operations with States that are not Parties to the Convention on Cluster Munitions that might engage in activities prohibited to a State Party.<sup>354</sup> Yet, even during such military operations, the Convention on Cluster Munitions does not authorize a State Party:

- (a) To develop, produce or otherwise acquire cluster munitions;
- (b) To itself stockpile or transfer cluster munitions;
- (c) To itself use cluster munitions; or
- (d) To expressly request the use of cluster munitions in cases where the choice of

<sup>350</sup> Harold Hongju Koh, Legal Adviser, Department of State, *Opening Statement for the United States Delegation to the Third Conference of the High Contracting Parties to CCW Protocol V on Explosive Remnants of War*, Nov. 9, 2009 (“We realize many delegations here are parties to the Convention on Cluster Munitions (CCM). However, many States, including the United States, have determined that their national security interests cannot be fully ensured consistent with the terms of the CCM.”).

<sup>351</sup> Ambassador Robert Wood, U.S. Permanent Representative to the Conference on Disarmament, Explanation of Vote at the 70th UN General Assembly First Committee on Draft Resolution L.49/Rev.1, “Implementation of the Convention on Cluster Munitions,” Nov. 4, 2015, 2015 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 763, 764 (“In general, the lawfulness of the use of a type of weapon under international law does not depend on an absence of authorization, but instead depends upon whether the weapon is prohibited. The United States does not accept by this or any other standard that the Convention on Cluster Munitions represents an emerging norm or reflects customary international law that would prohibit the use of cluster munitions in armed conflict.”).

<sup>352</sup> Convention on Cluster Munitions, art. 2(2), May 30, 2008, 2688 UNTS 39, 95 (“‘**Cluster munition**’ means a conventional munition that is designed to disperse or release explosive submunitions each weighing less than 20 kilograms, and includes those explosive submunitions. It does not mean the following: ... (c) A munition that, in order to avoid indiscriminate area effects and the risks posed by unexploded submunitions, has all of the following characteristics: (i) Each munition contains fewer than ten explosive submunitions; (ii) Each explosive submunition weighs more than four kilograms; (iii) Each explosive submunition is designed to detect and engage a single target object; (iv) Each explosive submunition is equipped with an electronic self-destruction mechanism; (v) Each explosive submunition is equipped with an electronic self-deactivating feature;”).

<sup>353</sup> See, e.g., Convention on Cluster Munitions, art. 1(1), May 30, 2008, 2688 UNTS 39, 94 (“Each State Party undertakes never under any circumstances to: (a) Use cluster munitions; (b) Develop, produce, otherwise acquire, stockpile, retain or transfer to anyone, directly or indirectly, cluster munitions; (c) Assist, encourage or induce anyone to engage in any activity prohibited to a State Party under this Convention.”).

<sup>354</sup> Convention on Cluster Munitions, art. 21(3), May 30, 2008, 2688 UNTS 39, 113 (“Notwithstanding the provisions of Article 1 of this Convention and in accordance with international law, States Parties, their military personnel or nationals, may engage in military cooperation and operations with States not party to this Convention that might engage in activities prohibited to a State Party.”).

munitions used is within its exclusive control.<sup>355</sup>

## 6.14 INCENDIARY WEAPONS

The use of incendiary weapons is permissible, but subject to certain restrictions in order to reduce the risk of incidental harm to civilians.

6.14.1 Definition of an Incendiary Weapon. An “incendiary weapon” is any weapon or munition that is primarily designed to set fire to objects or to cause burn injury to persons through the action of flame, heat, or combination thereof, produced by a chemical reaction of a substance on the target.<sup>356</sup> Only “pure” incendiaries, such as napalm or the type of incendiary bombs used in World War II and Korea, are regulated as incendiary weapons.<sup>357</sup>

6.14.1.1 Fire or Burn Injury Produced by Chemical Reaction of a Substance on the Target. Incendiary weapons use a chemical reaction of a substance on the target to create flame or heat that destroys or injures.

On the other hand, laser weapons, even if their primary effect is to set fire to objects or cause burn injuries, do not constitute “incendiary weapons” under CCW Protocol III on Incendiary Weapons because the fire or burn injuries are not produced by a chemical reaction of a substance that is delivered to the target.<sup>358</sup> Similarly, chemical weapons cause death or other harm through the toxic properties of chemicals themselves, rather than the chemicals causing a fire or burn injury.<sup>359</sup>

6.14.1.2 Examples of Incendiary Weapons. Examples of incendiary weapons include.<sup>360</sup>

---

<sup>355</sup> Convention on Cluster Munitions, art. 21(4), May 30, 2008, 2688 UNTS 39, 113.

<sup>356</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(1) (defining *incendiary weapon* as “any weapon or munition which is primarily designed to set fire to objects or to cause burn injury to persons through the action of flame, heat, or combination thereof, produced by a chemical reaction of a substance delivered on the target.”).

<sup>357</sup> *Article-by-Article Analysis of CCW Protocol III on Incendiary Weapons*, 2, Enclosure B to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 38 (“As a result, the Protocol only covers ‘pure’ incendiaries, such as napalm or the type of incendiary bombs used in World War II and Korea.”).

<sup>358</sup> *Article-by-Article Analysis of CCW Protocol III on Incendiary Weapons*, 2, Enclosure B to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 38 (“Similarly, laser weapons are not covered even if their primary effect is to set fire to objects or cause burn injuries, since they do not deliver burning substances on the target.”).

<sup>359</sup> Refer to § 6.8.3.1 (Definition of Chemical Weapons).

<sup>360</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(a) (“Incendiary weapons can take the form of, for example, flame throwers, fougasses, shells, rockets, grenades, mines, bombs and other containers of incendiary substances.”).

- flame throwers;<sup>361</sup>
- fougasse;<sup>362</sup> and
- shells, rockets, grenades, mines, bombs, and other containers of incendiary substances, such as napalm and thermite.<sup>363</sup>

6.14.1.3 *Excluded From the Definition of Incendiary Weapons – Weapons With Incidental Incendiary Effects.* Incendiary weapons do not include munitions that may have incidental incendiary effects, such as illuminants, tracers, or smoke or signaling systems.<sup>364</sup>

For example, white phosphorous is a munition that contains fragments of white phosphorous. It is intended primarily for marking or illuminating a target or masking friendly force movement by creating smoke.

Similarly, tracer rounds are not incendiary weapons as they are designed to enable a gunner to direct his or her rounds onto a target rather than to set fire to objects.

6.14.1.4 *Excluded From the Definition of Incendiary Weapons – Certain Combined-Effects Munitions.* Certain combined-effects munitions are excluded from the definition of incendiary weapons. These munitions are designed to combine penetration, blast, or fragmentation effects with an additional incendiary effect, in which the incendiary effect is not specifically designed to cause burn injury to persons, but to be used against objects that are military objectives, such as armored vehicles, aircraft, and installations or facilities. Such

---

<sup>361</sup> See also International Committee of the Red Cross, *Conference of Government Experts on the Use of Certain Conventional Weapons (Lucerne, 24.9—18.10.1974): Report*, ¶¶69-70 (1975) (“Experts referred to three different types of flamethrower: portable, mechanized and emplaced. Emplaced flamethrowers, and such things as flame fougasses and incendiary landmines, find their principal application in perimeter defence, both of fixed and of temporary positions. ... Portable and mechanized flamethrowers were seen to have several applications of which the two most important were the attack on pillboxes, and other such strongpoints, and the burning away of vegetation from positions suspected of concealing enemy units.”).

<sup>362</sup> For example, DEPARTMENT OF THE ARMY FIELD MANUAL 3-11 / MARINE CORPS WARFIGHTING PUBLICATION 3-3.7.2, *Flame, Riot Control Agents and Herbicide Operations* (Aug. 19, 1996) (“The flame fougasse is a variation of an exploding FFE [flame field expedient] in which the flame is projected by explosive means over a preselected area. An excellent defensive weapon, the fougasse can also provide illumination as well as produce casualties. On Defensive Line Wyoming, during the Korean Conflict, elements of the 1st Cavalry Division emplaced 1,000 drums of FFEs in front of fighting positions. The drums were set in the ground at a 45-degree angle with the opening toward the enemy. Two examples of flame fougasses are the propellant charge container and the 55-gallon container.”).

<sup>363</sup> W. Hays Parks, *The Protocol on Incendiary Weapons*, 30 INTERNATIONAL REVIEW OF THE RED CROSS 543-44 (Nov.-Dec. 1990) (“Thermite weapons, which contain a mixture of powdered ferric oxide and powdered or granular aluminium, are antimateriel and fire-sustaining. Thermite bombs, which burn at temperatures of about 2,400 degrees Centigrade, were the primary antimateriel incendiaries used by air forces of both sides in World Wars I and II. A later version contained barium nitrate and is called thermate, while a more recent variant is triethylaluminium (TEA). There has been little use of thermite-type bombs since 1945, in part because there have been few air campaigns directed against industrial targets.”).

<sup>364</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(b) (“Incendiary weapons do not include: (i) Munitions which may have incidental incendiary effects, such as illuminants, tracers, smoke or signalling systems;”).

weapons may include armor-piercing projectiles, fragmentation shells, explosive bombs, and similar combined-effects munitions.<sup>365</sup>

6.14.2 Use of Incendiary Weapons Is Permissible. Although subject to certain specific restrictions described in § 6.14.3 (Restrictions on the Use of Incendiary Weapons), the use of incendiary weapons, including anti-personnel use, is not prohibited.

6.14.2.1 Use of Non-Incendiary Weapons to Set Fire to Objects or Cause Burn Injury to Persons. The use of non-incendiary weapons to set fire to objects or to cause burn injury is technically not subject to the additional restrictions described in § 6.14.3 (Restrictions on the Use of Incendiary Weapons). For example, white phosphorus may be used as an anti-personnel weapon.<sup>366</sup> However, such use must comply with the general rules for the conduct of hostilities, including the principles of discrimination and proportionality.<sup>367</sup> In addition, feasible precautions to reduce the risk of harm to civilians must be taken.<sup>368</sup>

As a practical matter, however, it may be more effective to attack enemy combatants through other means, rather than seeking to cause them burn injury.<sup>369</sup>

6.14.3 Restrictions on the Use of Incendiary Weapons. As with other weapons, it is prohibited to make the civilian population as such, individual civilians, or civilian objects the object of attack by incendiary weapons.<sup>370</sup> In addition, it is specifically prohibited to make forests or other kinds of plant cover the object of attack by incendiary weapons, except when such natural elements are used to cover, conceal, or camouflage combatants or other military

---

<sup>365</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(b) (“Incendiary weapons do not include: ... (ii) Munitions designed to combine penetration, blast or fragmentation effects with an additional incendiary effect, such as armour-piercing projectiles, fragmentation shells, explosive bombs and similar combined-effects munitions in which the incendiary effect is not specifically designed to cause burn injury to persons, but to be used against military objectives, such as armoured vehicles, aircraft and installations or facilities.”).

<sup>366</sup> For example, Captain James T. Cobb, First Lieutenant Christopher A. LaCour, and Sergeant First Class William H. Hight, *After-Action Review (AAR) for the Battle of Fallujah*, ¶9b, reprinted in FIELD ARTILLERY 23, 26 (Mar.-Apr. 2005) (“White Phosphorous [WP]. WP proved to be an effective and versatile munition. We used it for screening missions at two breeches and, later in the fight, as a potent psychological weapon against the insurgents in trench lines and spider holes when we could not get effects on them with HE [High Explosive]. We fired ‘shake and bake’ missions at the insurgents, using WP to flush them out and HE to take them out.”).

<sup>367</sup> Refer to § 5.5 (Discrimination in Conducting Attacks); § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>368</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>369</sup> For example, Peter Pace, Chairman of the Joint Chiefs of Staff, *News Briefing with Secretary of Defense Donald Rumsfeld and Gen. Peter Pace*, Nov. 29, 2005 (“No armed force in the world goes to greater effort than your armed force to protect civilians and to be very precise in the way we apply our power. A bullet goes through skin even faster than white phosphorus does. So I would rather have the proper instrument applied at the proper time as precisely as possible to get the job done in a way that kills as many of the bad guys as possible and does as little collateral damage as possible. That is just the nature of warfare.”).

<sup>370</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 2(1) (“It is prohibited in all circumstances to make the civilian population as such, individual civilians or civilian objects the object of attack by incendiary weapons.”).

objectives, or are themselves military objectives.<sup>371</sup>

Similarly, the risks that the use of an incendiary weapon may pose to the civilian population should be considered in a proportionality analysis.<sup>372</sup>

As with the use of other weapons, commanders must take feasible precautions to reduce the risk of incidental harm to civilians when using incendiary weapons.<sup>373</sup>

#### 6.14.3.1 *Use Against Military Objectives Located in Concentrations of Civilians.*

Subject to a reservation by the United States discussed below, two additional rules apply to the use of incendiary weapons against military objectives that are located within a concentration of civilians. A “concentration of civilians” means any concentration of civilians, be it permanent or temporary, such as in inhabited parts of cities, in inhabited towns or villages, or in camps or columns of refugees or evacuees, or groups of nomads.<sup>374</sup>

First, subject to the U.S. reservation discussed below, it is prohibited to use air-delivered incendiary weapons to make any military objective located within a concentration of civilians the object of attack.<sup>375</sup>

Second, subject to the U.S. reservation discussed below, it is also prohibited to use incendiary weapons other than air-delivered incendiary weapons (*e.g.*, ground artillery) to make any military objective located within a concentration of civilians the object of attack. However, it is not prohibited to use such incendiary weapons against a military objective located within a concentration of civilians, when such military objective is clearly separated from the concentration of civilians and all feasible precautions are taken with a view to limiting the incendiary effects to the military objective and to avoiding, and in any event to minimizing, incidental loss of civilian life, injury to civilians, and damage to civilian objects.<sup>376</sup>

#### 6.14.3.2 *U.S. Reservation to CCW Protocol III on Incendiary Weapons.* The

---

<sup>371</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 2(4) (“It is prohibited to make forests or other kinds of plant cover the object of attack by incendiary weapons except when such natural elements are used to cover, conceal or camouflage combatants or other military objectives, or are themselves military objectives.”).

<sup>372</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>373</sup> Refer to § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>374</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 1(2) (“A ‘concentration of civilians’ means any concentration of civilians, be it permanent or temporary, such as in inhabited parts of cities, or inhabited towns or villages, or as in camps or columns of refugees or evacuees, or groups of nomads.”).

<sup>375</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 2(2) (“It is prohibited in all circumstances to make any military objective located within a concentration of civilians the object of attack by air-delivered incendiary weapons.”).

<sup>376</sup> CCW PROTOCOL III ON INCENDIARY WEAPONS art. 2(3) (prohibiting making “any military objective located within a concentration of civilians the object of attack by means of incendiary weapons other than air-delivered incendiary weapons, except when such military objective is clearly separated from the concentration of civilians and all feasible precautions are taken with a view to limiting the incendiary effects to the military objective and to avoiding, and in any event to minimizing, incidental loss of civilian life, injury to civilians and damage to civilian objects.”).

United States has taken a reservation to CCW Protocol III on Incendiary Weapons for the purpose of improving the protection of the civilian population.<sup>377</sup> Thus, for the U.S. armed forces, incendiary weapons may be used against military objectives located in concentrations of civilians where it is judged that such use would cause fewer casualties and/or less collateral damage than alternative weapons. However, in such cases, all feasible precautions should be taken with a view to limiting the incendiary effects to the military objective and to avoiding, and in any event minimizing, incidental loss of civilian life, injury to civilians, and damage to civilian objects.<sup>378</sup>

For example, the use of incendiary weapons might be the means of attacking enemy biological weapons facilities that poses the least risk of incidental harm to the civilian population.<sup>379</sup> Similarly, the use of incendiary weapons might reduce the number of sorties or attacks, and thereby further reduce the risk of incidental harm to the civilian population.<sup>380</sup>

#### 6.15 LASER WEAPONS

In general, laser weapons are permissible. They may be used against enemy combatants, including to kill and injure them. However, the use of “blinding laser” weapons is prohibited. In addition, feasible precautions shall be taken in the employment of laser systems to avoid causing permanent blindness.

---

<sup>377</sup> Harold Koh, Legal Adviser, Department of State, *Letter to Paul Seger, Legal Adviser of Switzerland regarding Switzerland’s Position on the U.S. Reservation to Protocol III of the Convention on Certain Conventional Weapons*, Dec. 30, 2009 (“In our view, this reservation is compatible with the object and purpose of Protocol III. We take the view that the object and purpose of Protocol III is to protect civilians from the collateral damage associated with the use of incendiary weapons. The narrow reservation taken by the United States is not incompatible with this object and purpose. In fact, this reservation ensures that the United States has the ability to provide for even greater protection of the civilian population, consistent with Protocol III.”).

<sup>378</sup> United States, *Statement on Consent to Be Bound by CCW Protocol III on Incendiary Weapons*, Jan. 21, 2009, 2562 UNTS 36 (“The United States of America, with reference to Article 2, paragraphs 2 and 3, reserves the right to use incendiary weapons against military objectives located in concentrations of civilians where it is judged that such use would cause fewer casualties and/or less collateral damage than alternative weapons, but in so doing will take all feasible precautions with a view to limiting the incendiary effects to the military objective and to avoiding, and in any event to minimizing, incidental loss of civilian life, injury to civilians and damage to civilian objects.”). *Refer to* § 5.11 (Proportionality – Feasible Precautions in Planning and Conducting Attacks to Reduce the Risk of Harm to Protected Persons and Objects).

<sup>379</sup> *Article-by-Article Analysis of CCW Protocol III on Incendiary Weapons*, 3, Enclosure B to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 39 (“Incendiaries are the only weapons which can effectively destroy certain counter-proliferation targets such as biological weapons facilities which require high heat to eliminate bio-toxins. To use only high explosives would risk the widespread release of dangerous contaminants with potentially disastrous consequences for the civilian population.”).

<sup>380</sup> *Article-by-Article Analysis of CCW Protocol III on Incendiary Weapons*, 3-4, Enclosure B to Warren Christopher, *Letter of Submittal*, Dec. 7, 1996, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CCW AMENDED MINES PROTOCOL, PROTOCOL III ON INCENDIARY WEAPONS, AND PROTOCOL IV ON BLINDING LASER WEAPONS 39-40 (“Certain flammable military targets are also more readily destroyed by incendiaries. For example, a fuel depot could require up to eight times the bombs and sorties to destroy using only high explosives rather than incendiaries. Such an increase means a significantly greater humanitarian risk of collateral damage.”).

6.15.1 Prohibition on “Blinding Laser” Weapons. It is prohibited to employ laser weapons specifically designed, as their sole combat function or as one of their combat functions, to cause permanent blindness to unenhanced vision, that is, to the naked eye or to the eye with corrective eyesight devices.<sup>381</sup>

Any use of such weapons is prohibited, including uses that are not intended to blind.

Although the U.S. armed forces and other militaries use lasers in a variety of roles, such as range-finding or causing temporary loss of sight, the United States has not developed or fielded a “blinding laser” weapon.

6.15.1.1 Laser Weapon Specifically Designed, as Its Sole Combat Function or One of Its Combat Functions. To fall under the above prohibition, the laser device must be specifically designed, as a combat function, to cause permanent blindness to unenhanced vision.

On the other hand, blinding as an incidental or collateral effect of the legitimate military employment of laser systems, including laser systems used against optical equipment, is not prohibited.<sup>382</sup> Thus, laser systems and devices used for rangefinding, target designation, jamming, dazzling, communications, and weapons guidance do not fall under this prohibition, even if serious eye injury or permanent blindness may incidentally occur through their use.<sup>383</sup> Similarly, incidental blinding from the use of lasers that are designed to attack or destroy material or injure persons as a combat function (but are not specifically designed to blind) would be permissible.

6.15.1.2 Permanent Blindness to Unenhanced Vision. “Permanent blindness” is defined as irreversible and uncorrectable loss of vision that is seriously disabling with no prospect of recovery. Serious disability is equivalent to visual acuity of less than 20/200 Snellen measured using both eyes.<sup>384</sup>

Lasers that are designed to cause a temporary loss of sight, such as laser “dazzlers,”

---

<sup>381</sup> CCW PROTOCOL IV ON BLINDING LASER WEAPONS art. 1 (“It is prohibited to employ laser weapons specifically designed, as their sole combat function or as one of their combat functions, to cause permanent blindness to unenhanced vision, that is to the naked eye or to the eye with corrective eyesight devices.”).

<sup>382</sup> CCW PROTOCOL IV ON BLINDING LASER WEAPONS art. 3 (“Blinding as an incidental or collateral effect of the legitimate military employment of laser systems, including laser systems used against optical equipment, is not covered by the prohibition of this Protocol.”).

<sup>383</sup> W. Hays Parks, Special Assistant to The Judge Advocate General of the Army for Law of War Matters, *Memorandum of Law: Travaux Préparatoires and Legal Analysis of Blinding Laser Weapons Protocol*, reprinted in THE ARMY LAWYER 33, 36 (Jun. 1997) (“Choice of the term *weapon* was intentional to distinguish the prohibited system from lasers which are used for rangefinding, jamming, dazzling, communications, weapons guidance, and similar purposes.”).

<sup>384</sup> CCW PROTOCOL IV ON BLINDING LASER WEAPONS art. 4 (“For the purpose of this protocol ‘permanent blindness’ means irreversible and uncorrectable loss of vision which is seriously disabling with no prospect of recovery. Serious disability is equivalent to visual acuity of less than 20/200 Snellen measured using both eyes.”).

would not fall under this prohibition.<sup>385</sup>

*Unenhanced vision* means the naked eye or the eye with corrective eyesight devices, such as ordinary glasses or contact lenses.<sup>386</sup> For example, unenhanced vision does not mean vision through direct-view optics, such as binoculars, a telescopic sight, night-vision goggles, or similar devices used to increase vision beyond that of an ordinary person without such enhancement. Persons using direct-view optics may have an increased risk of eye injury from lasers.

6.15.2 Feasible Precautions in the Employment of Laser Systems to Avoid the Incident of Permanent Blindness. In the employment of laser systems, all feasible precautions shall be taken to avoid the incidence of permanent blindness to unenhanced vision.<sup>387</sup> Feasible precautions may be understood to include those that are practicable or practically possible taking into account all circumstances ruling at the time, including humanitarian and military considerations.<sup>388</sup> Such precautions include training of the armed forces and other practical measures, such as promulgating doctrine and rules of engagement.<sup>389</sup>

6.15.2.1 Use of Non-Prohibited Laser Systems to Blind Is Not Absolutely Prohibited. Although feasible precautions should be taken to avoid blinding, the use of laser systems (that are not prohibited as blinding laser weapons) to blind enemy combatants is not prohibited if avoiding such harm is not feasible, *i.e.*, if such harm is militarily necessary. For example, it would not be prohibited for a soldier to use a non-prohibited laser system to blind an enemy combatant to save the user's life.<sup>390</sup>

---

<sup>385</sup> For example, Defense Science Board, *Defense Science Board Task Force on Directed Energy Weapons*, 13 (Dec. 2007) ("Laser-based optical incapacitation devices have been deployed to Iraq in response to urgent fielding requirements for a non-lethal means to warn or temporarily incapacitate individuals. Marines employing these devices have reported that 'they consistently defuse potential escalation of force incidents.' Laser devices currently employed by the Marine Corps are green laser (532 nm) systems emitting a strong beam that can temporarily reduce visual acuity at a distance of 300m or more. It has a nominal ocular hazard minimum distance that the operator must avoid to preclude risk of eye injury. The lasers have been successfully used in convoy operations, mounted and dismounted patrols, vehicle check points, and entry control points. Army units have also purchased laser optical incapacitation devices of various types, principally for use in escalation of force situations and to warn or deter drivers of cars approaching checkpoints, U.S. convoys, or fixed-site installations.").

<sup>386</sup> CCW PROTOCOL IV ON BLINDING LASER WEAPONS art. 1 (defining "unenhanced vision" as "the naked eye or ... the eye with corrective eyesight devices.").

<sup>387</sup> CCW PROTOCOL IV ON BLINDING LASER WEAPONS art. 2 ("In the employment of laser systems, the High Contracting Parties shall take all feasible precautions to avoid the incidence of permanent blindness to unenhanced vision.").

<sup>388</sup> Refer to § 5.2.3.2 (What Precautions Are Feasible).

<sup>389</sup> CCW PROTOCOL IV ON BLINDING LASER WEAPONS art. 2 ("Such precautions shall include training of their armed forces and other practical measures.").

<sup>390</sup> W. Hays Parks, Special Assistant to The Judge Advocate General of the Army for Law of War Matters, *Memorandum of Law: Travaux Préparatoires and Legal Analysis of Blinding Laser Weapons Protocol*, reprinted in THE ARMY LAWYER 33, 36 (Jun. 1997) ("Finally, although Article 2 requires use of a laser device in a manner consistent with the spirit and intent of the Protocol, the delegations could not agree that a soldier should be criminally responsible if, in an *in extremis* situation, he employs a laser device against an enemy combatant to save the user's life.").

## 6.16 RIOT CONTROL AGENTS

The use of riot control agents is subject to certain prohibitions and restrictions. Riot control agents are widely used by governments for law enforcement purposes (such as crowd control), but are prohibited as a method of warfare.

**6.16.1 Definition of Riot Control Agents.** *Riot control agents* mean any chemical not listed in a Schedule Annexed to the Chemical Weapons Convention, which can produce rapidly in humans sensory irritation or disabling physical effects that disappear within a short time following termination of exposure.<sup>391</sup> Riot control agents include, for example, tear gas and pepper spray, but generally are understood to exclude the broader class of non-lethal weapons that may sometimes be used for riot control or other similar purposes, such as foams, water cannons, bean bags, or rubber bullets.<sup>392</sup>

The United States does not consider riot control agents to be “chemical weapons,”<sup>393</sup> or otherwise to fall under the prohibition against asphyxiating, poisonous, or other gases, and all analogous liquids, materials, or devices.<sup>394</sup>

**6.16.2 Prohibition on Use of Riot Control Agents as a Method of Warfare.** It is prohibited to use riot control agents as a method of warfare.<sup>395</sup> The United States has understood this prohibition not to prohibit the use of riot control agents in war in defensive military modes to save lives, such as use of riot control agents:

- in riot control situations in areas under direct and distinct U.S. military control, including

---

<sup>391</sup> CHEMICAL WEAPONS CONVENTION art. 2(7) (“‘Riot Control Agent’ means: Any chemical not listed in a Schedule, which can produce rapidly in humans sensory irritation or disabling physical effects which disappear within a short time following termination of exposure.”).

<sup>392</sup> Joseph Benkert, Principal Deputy Assistant Secretary of Defense for International Security Policy, *Testimony on U.S. policy and practice with respect to the use of riot control agents by the U.S. Armed Forces before the Senate Committee on Armed Services, Subcommittee on Readiness and Management Support*, Sept. 27, 2006, 2006 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1224 (“[W]hen I refer to ‘riot control agents’ in my testimony today I am referring to chemicals not listed in a Chemical Weapons Convention schedule which can produce rapidly in humans sensory irritation or disabling physical effects which disappear within a short time following termination of exposure. This includes for example, tear gas and pepper spray. I am not referring to the broader class of non-chemical non-lethal weapons that may sometimes be used for riot control or other similar purposes such as foams, water cannons, bean bags, or rubber bullets.”).

<sup>393</sup> Joseph Benkert, Principal Deputy Assistant Secretary of Defense for International Security Policy, *Testimony on U.S. policy and practice with respect to the use of riot control agents by the U.S. Armed Forces before the Senate Committee on Armed Services, Subcommittee on Readiness and Management Support*, Sept. 27, 2006, 2006 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1223-24 (“The Administration agrees with the policy statement in the National Defense Authorization Act for FY2006, section 1232 (the ‘Ensign Amendment’); namely, ‘It is the policy of the United States that riot control agents are not chemical weapons . . . .’”).

<sup>394</sup> See *Statement by Secretary Rusk*, Mar. 24, 1965, 52 DEPARTMENT OF STATE BULLETIN 528 (Apr. 12, 1965) (explaining that tear gas used by U.S. forces in Vietnam is not “gas that is prohibited by the Geneva convention of 1925 or any other understandings about the use of gas”). Refer to § 6.8.2 (Asphyxiating, Poisonous, or Other Gases, and All Analogous Liquids, Materials, or Devices).

<sup>395</sup> CHEMICAL WEAPONS CONVENTION art. 1(5) (“Each State Party undertakes not to use riot control agents as a method of warfare.”).

controlling rioting POWs;<sup>396</sup>

- in situations in which civilians are used to mask or screen attacks and civilian casualties can be reduced or avoided;<sup>397</sup>
- in rescue missions in remotely isolated areas, of downed aircrews and passengers, and escaping prisoners; and
- in rear echelon areas outside the zone of immediate combat to protect convoys from civil disturbances, terrorists, and paramilitary organizations.

These uses are as articulated in Executive Order 11850.<sup>398</sup> Even though Executive Order 11850 predated the Chemical Weapons Convention (which could have created legal obligations that were inconsistent with Executive Order 11850), interpreting the Chemical Weapons Convention consistent with Executive Order 11850 was a condition of the Senate giving its advice and consent to ratification of the Chemical Weapons Convention.<sup>399</sup> Thus, Executive Order 11850 has remained an important part of U.S. policy on the use of riot control agents.<sup>400</sup>

---

<sup>396</sup> For example, WALTER G. HERMES, UNITED STATES ARMY IN THE KOREAN WAR: TRUCE TENT AND FIGHTING FRONT 256-57 (1992) (“Armed with stones, flails, sharpened tent poles, steel pipes, and knives, the defiant prisoners [held during the Korean War] screamed insults and challenges. The infantry maintained excellent discipline, using tear gas and concussion grenades to break up the prisoners’ opposition. Herding the prisoners into a corner, the U.N. troops forced them into their new compound. Only one prisoner was killed and twenty-nine were wounded as against one U.S. injury.”).

<sup>397</sup> For example, JACK SHULIMSON & MAJOR CHARLES M. JOHNSON, U.S. MARINES IN VIETNAM: THE LANDING AND THE BUILDUP 1965, 91 (1978) (“Operation STOMP unfolded according to plan. Company H made its LVT assault through the mud flats of Qui Nhon bay while Company F landed by helicopter to cut off the VC avenues of retreat. The two companies closed their cordon around the Viet Cong, killing 26 and capturing three. With escape denied, the enemy went underground, taking many local peasants with them for use as human shields. During the mop-up of the area, a much-publicized action occurred. As the Marines slowly and methodically searched out a complex of tunnels, they threw in tear gas grenades to flush out the occupants. Seventeen VC were forced from hiding in this fashion, as well as more than 300 women, children, and old men, not one of whom was harmed.”).

<sup>398</sup> Executive Order 11850, *Renunciation of Certain Uses in War of Chemical Herbicides and Riot Control Agents*, 40 FEDERAL REGISTER 16187 (Apr. 8, 1975) (“The United States renounces, as a matter of national policy, ... first use of riot control agents in war except in defensive military modes to save lives such as: (a) Use of riot control agents in riot control situations in areas under direct and distinct U.S. military control, to include controlling rioting prisoners of war. (b) Use of riot control agents in situations in which civilians are used to mask or screen attacks and civilian casualties can be reduced or avoided. (c) Use of riot control agents in rescue missions in remotely isolated areas, of downed aircrews and passengers, and escaping prisoners. (d) Use of riot control agents in rear echelon areas outside the zone of immediate combat to protect convoys from civil disturbances, terrorists and paramilitary organizations.”).

<sup>399</sup> Senate, *Conditions to Ratification of the Chemical Weapons Convention*, Senate Resolution 75, 105th Congress 143 CONGRESSIONAL RECORD S3651, S3657 (1997) (“The President shall take no measure, and prescribe no rule or regulation, which would alter or eliminate Executive Order 11850 of April 8, 1975.”).

<sup>400</sup> Joseph Benkert, Principal Deputy Assistant Secretary of Defense for International Security Policy, *Testimony on U.S. policy and practice with respect to the use of riot control agents by the U.S. Armed Forces before the Senate Committee on Armed Services, Subcommittee on Readiness and Management Support*, Sept. 27, 2006, 2006 DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1223-24 (“The policy governing the use of riot control agents by the U.S. Armed Forces is expressed principally in the Chemical Weapons Convention, the resolution of ratification of the Chemical Weapons Convention, and Executive Order 11850 [Renunciation of Certain Uses in

In addition to being permitted in war in defensive military modes to save lives, it is not prohibited to use riot control agents in military operations outside of war or armed conflict. Specifically, the United States has taken the position that riot control agents may be used in the conduct of:

- peacetime military operations within an area of ongoing armed conflict when the United States is not a party to the conflict;
- consensual peacekeeping operations when the use of force is authorized by the receiving state, including operations pursuant to Chapter VI of the United Nations Charter; and
- peacekeeping operations when force is authorized by the Security Council under Chapter VII of the United Nations Charter.<sup>401</sup>

## 6.17 HERBICIDES

The United States has renounced, as a matter of national policy, first use of herbicides in war except use, under regulations applicable to their domestic use, for control of vegetation within U.S. bases and installations or around their immediate defensive perimeters.<sup>402</sup>

6.17.1 Definition of Herbicide. An herbicide is a chemical compound that will kill or damage plants. Herbicides that are harmless to human beings are not prohibited under the rule

---

War of Chemical Herbicides and Riot Control Agents (1975)]. The Administration agrees with the policy statement in the National Defense Authorization Act for FY2006, section 1232 (the ‘Ensign Amendment’); namely, ‘It is the policy of the United States that riot control agents are not chemical weapons and that the President may authorize their use as legitimate, legal, and nonlethal alternatives to the use of force that, as provided in Executive Order 11850 (40 Fed. Reg. 16187) and consistent with the resolution of ratification of the Chemical Weapons Convention, may be employed by members of the Armed Forces in war in defensive military modes to save lives, including the illustrative purposes cited in Executive Order 11850.’”) (insertions in original).

<sup>401</sup> Senate, *Conditions to Ratification of the Chemical Weapons Convention*, Senate Resolution 75, 105th Congress 143 CONGRESSIONAL RECORD S3651, S3657 (1997) (“Prior to the deposit of the United States instrument of ratification, the President shall certify to Congress that the United States is not restricted by the Convention in its use of riot control agents, including the use against combatants who are parties to a conflict, in any of the following cases: (i) UNITED STATES NOT A PARTY. — The conduct of peacetime military operations within an area of ongoing armed conflict when the United States is not a party to the conflict (such as recent use of the United States Armed Forces in Somalia, Bosnia, and Rwanda). (ii) CONSENSUAL PEACEKEEPING. — Consensual peacekeeping operations when the use of force is authorized by the receiving state, including operations pursuant to Chapter VI of the United Nations Charter. (iii) CHAPTER VII PEACEKEEPING. — Peacekeeping operations when force is authorized by the Security Council under Chapter VII of the United Nations Charter.”); William J. Clinton, *Message to the Senate on the Chemical Weapons Convention*, Apr. 25, 1997, 1997-1 PUBLIC PAPERS OF THE PRESIDENTS 495, 497 (“In accordance with Condition (26) on Riot Control Agents, I have certified that the United States is not restricted by the Convention in its use of riot control agents in various peacetime and peacekeeping operations. These are situations in which the United States is not engaged in a use of force of a scope, duration and intensity that would trigger the laws of war with respect to U.S. forces.”).

<sup>402</sup> Executive Order 11850, *Renunciation of Certain Uses in War of Chemical Herbicides and Riot Control Agents*, 40 FEDERAL REGISTER 16187 (Apr. 8, 1975) (“The United States renounces, as a matter of national policy, first use of herbicides in war except use, under regulations applicable to their domestic use, for control of vegetation within U.S. bases and installations or around their immediate defensive perimeters.”).

against the use of poison or poisoned weapons.<sup>403</sup>

6.17.2 Chemical Weapons Convention and Herbicides. The Chemical Weapons Convention does not add any new constraints on the use of herbicides.<sup>404</sup> The Chemical Weapons Convention addresses toxic chemicals that cause death, temporary incapacitation, or permanent harm to humans or animals, rather than plants.<sup>405</sup> Moreover, even if an herbicide were such a toxic chemical, its use would likely be for a purpose not prohibited by the Chemical Weapons Convention.<sup>406</sup>

6.17.3 ENMOD Convention and Herbicides. Under certain circumstances, the use of herbicides could be prohibited by the ENMOD Convention.<sup>407</sup> However, the use of herbicides to control vegetation within U.S. bases and installations or around their immediate defensive perimeters has been understood by the United States to be permitted under international law.<sup>408</sup>

6.17.4 Authority Under Domestic Law to Employ Herbicides in War. Use of herbicides in war by the U.S. armed forces requires advance Presidential approval.<sup>409</sup> Additional regulations govern the use of herbicides.

## 6.18 NUCLEAR WEAPONS

There is no general prohibition in treaty or customary international law on the use of nuclear weapons.<sup>410</sup> The United States has not accepted a treaty rule that prohibits the use of

---

<sup>403</sup> Refer to § 6.8.1.2 (Death or Permanent Disability to Persons).

<sup>404</sup> *Article-by-Article Analysis of the Chemical Weapons Convention*, 2-3, Attachment to Peter Tarnoff, Acting, *Letter of Submittal*, Nov. 20, 1993, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CHEMICAL WEAPONS CONVENTION 2-3 (“The seventh preambular paragraph, although not legally binding, nevertheless recognizes the prohibition, embodied in the pertinent agreements and relevant principles of international law, of the use of herbicides as a method of warfare. Thus, the Convention does not add any new constraints on the use of herbicides.”).

<sup>405</sup> Refer to § 6.8.3.1 (Definition of Chemical Weapons).

<sup>406</sup> Refer to § 6.8.3.4 (Certain Uses of Toxic Chemicals Not Prohibited).

<sup>407</sup> Second Review Conference of the Parties to the ENMOD Convention in September 1992, Final Declaration, (“The Conference confirms that the military or any other hostile use of herbicides as an environmental modification technique in the meaning of Article II [of the ENMOD Convention] is a method of warfare prohibited by Article I [of the ENMOD Convention] if such use of herbicides upsets the ecological balance of a region, thus causing widespread, long-lasting or severe effects as the means of destruction, damage or injury to any other State Party [to the ENMOD Convention].”).

<sup>408</sup> *Article-by-Article Analysis of the Chemical Weapons Convention*, 3, Attachment to Peter Tarnoff, Acting, *Letter of Submittal*, Nov. 20, 1993, MESSAGE FROM THE PRESIDENT TRANSMITTING THE CHEMICAL WEAPONS CONVENTION 3 (“It is the understanding of the United States that the uses of herbicides proscribed [sic] in Executive Order 11850 do not cause such effects [that would violate the ENMOD Convention] and are allowed under international law.”).

<sup>409</sup> Executive Order 11850, *Renunciation of Certain Uses in War of Chemical Herbicides and Riot Control Agents*, 40 FEDERAL REGISTER 16187 (Apr. 8, 1975) (“The Secretary of Defense shall take all necessary measures to ensure that the use by the Armed Forces of the United States of any ... chemical herbicides in war is prohibited unless such use has Presidential approval, in advance.”).

<sup>410</sup> *Written Statement of the Government of the United States of America*, 21, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear

nuclear weapons *per se*, and thus nuclear weapons are lawful weapons for the United States.

The law of war governs the use of nuclear weapons, just as it governs the use of conventional weapons.<sup>411</sup> For example, nuclear weapons must be directed against military objectives.<sup>412</sup> In addition, attacks using nuclear weapons must not be conducted when the expected incidental harm to civilians is excessive compared to the military advantage expected to be gained.<sup>413</sup>

6.18.1 U.S. Policy on the Use of Nuclear Weapons. The United States has developed national policy on the use of nuclear weapons. For example, the United States has stated that it would only consider the use of nuclear weapons in extreme circumstances to defend the vital interests of the United States or its allies and partners.<sup>414</sup> In addition, the United States has stated that it will not use or threaten to use nuclear weapons against non-nuclear weapons States that are party to the Nuclear Non-Proliferation Treaty and in compliance with their nuclear non-proliferation obligations.<sup>415</sup>

6.18.2 Nuclear Weapons and Arms Control Obligations. Nuclear weapons are regulated by a number of arms control agreements restricting their development, testing, production, proliferation, deployment, use, and, with respect to specific types, possession. Some of these agreements may not apply in times of war. Guidance on nuclear arms control agreements is beyond the scope of this manual.

6.18.3 AP I Provisions and Nuclear Weapons. Parties to AP I have expressed the

---

Weapons (noting that “there is no general prohibition in conventional or customary international law on the use of nuclear weapons.”).

<sup>411</sup> See, e.g., Secretary of Defense, *Report on Nuclear Employment Strategy of the United States Specified in Section 491 of 10 U.S.C.*, 4-5 (Jun. 2013) (“The new guidance makes clear that all plans must also be consistent with the fundamental principles of the Law of Armed Conflict. Accordingly, plans will, for example, apply the principles of distinction and proportionality and seek to minimize collateral damage to civilian populations and civilian objects. The United States will not intentionally target civilian populations or civilian objects.”); *Written Statement of the Government of the United States of America*, 21, Jun. 20, 1995, I.C.J., Request by the United Nations General Assembly for an Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons (“The United States has long taken the position that various principles of the international law of armed conflict would apply to the use of nuclear weapons as well as to other means and methods of warfare. This in no way means, however, that the use of nuclear weapons is precluded by the law of war.”); Edward R. Cummings, *The Role of Humanitarian Law*, Sept. 25, 1982, III CUMULATIVE DIGEST OF UNITED STATES PRACTICE IN INTERNATIONAL LAW 1981-1988 3421, 3422 (As far back as 1965 the U.S. supported a UN Resolution that essentially stated “that all governments and other authorities responsible for action in armed conflicts should conform at least to the following principle[] ... that the general principles of the Law of War apply to nuclear and similar weapons.”).

<sup>412</sup> Refer to § 5.5 (Discrimination in Conducting Attacks).

<sup>413</sup> Refer to § 5.12 (Proportionality – Prohibition on Attacks Expected to Cause Excessive Incidental Harm).

<sup>414</sup> Department of Defense, *Nuclear Posture Review Report 17* (Apr. 2010) (“The United States would only consider the use of nuclear weapons in extreme circumstances to defend the vital interests of the United States or its allies and partners.”).

<sup>415</sup> Department of Defense, *Nuclear Posture Review Report 17* (Apr. 2010) (“The United States will not use or threaten to use nuclear weapons against non-nuclear weapons states that are party to the NPT and in compliance with their nuclear non-proliferation obligations.”).

understanding that the rules relating the use of weapons introduced by AP I were intended to apply exclusively to conventional weapons.<sup>416</sup> Thus, Parties to AP I have understood AP I provisions not to regulate or prohibit the use of nuclear weapons.<sup>417</sup> Although the United States is not a Party to AP I, the United States participated in the diplomatic conference that negotiated AP I based upon this understanding.<sup>418</sup>

6.18.4 Authority to Launch Nuclear Weapons. The authority to launch nuclear weapons generally is restricted to the highest levels of government. The domestic law and procedures concerning nuclear weapons employment are beyond the scope of this manual.

---

<sup>416</sup> Belgium, *Statement on Ratification of AP I*, May 20, 1986, 1435 UNTS 367 (“The Belgian Government, bearing in mind the preparatory work on the international instrument which is hereby ratified, wishes to stress that the Protocol was drawn up in order to expand the protection conferred by humanitarian law exclusively when conventional weapons are used in armed conflicts, without prejudice to the provisions of international law relating to the use of other types of weapons.”); Germany, *Statement on Ratification of AP I*, Feb. 14, 1991, 1607 UNTS 526, 529 (“It is the understanding of the Federal Republic of Germany that the rules relating to the use of weapons introduced by Additional Protocol I were intended to apply exclusively to conventional weapons without prejudice to any other rules of international law applicable to other types of weapons.”); Italy, *Statement on Ratification of AP I*, Feb. 27, 1986, 1425 UNTS 438 (“It is the understanding of the Government of Italy that the rules relating to the use of weapons introduced by Additional Protocol I were intended to apply exclusively to conventional weapons. They do not prejudice any other rule of international law applicable to other types of weapons.”); Netherlands, *Statement on Ratification of AP I*, Jun. 26, 1987, 1477 UNTS 300 (“With regard to Protocol I as a whole: It is the understanding of the Government of the Kingdom of the Netherlands that the rules introduced by Protocol I relating to the use of weapons were intended to apply and consequently do apply solely to conventional weapons, without prejudice to any other rules of international law applicable to other types of weapons.”); Spain, *Statement on Ratification of AP I*, Apr. 21, 1989, 1537 UNTS 390, 391 (“This Protocol shall be understood to apply in its particular field, exclusively to conventional weapons and without prejudice to the norms of international law applicable to weapons of any other type.”).

<sup>417</sup> See, e.g., United Kingdom, *Statement on Ratification of AP I*, Jan. 28, 1998, 2020 UNTS 75, 76 (“It continues to be the understanding of the United Kingdom that the rules introduced by the Protocol apply exclusively to conventional weapons without prejudice to any other rules of international law applicable to other types of weapons. In particular, the rules so introduced do not have any effect on and do not regulate or prohibit the use of nuclear weapons.”); France, *Statement on Ratification of AP I, translated in SCHINDLER & TOMAN, THE LAWS OF ARMED CONFLICTS: A COLLECTION OF CONVENTIONS, RESOLUTIONS, AND OTHER DOCUMENTS 800 (2004)* (“Referring to the draft protocol drawn up by the International Committee of the Red Cross which constituted the basis of 1974-1977 Diplomatic Conference, the Government of the French Republic continues to consider that the Protocol’s provisions concern exclusively conventional weapons and do not regulate or prohibit the use of nuclear weapons, nor should they constitute a prejudice to any other rules of international law applicable to other activities necessary for the exercise by France of its inherent right of self-defense.”); Canada, *Statement on Ratification of AP I*, Nov. 20, 1990, 1591 UNTS 462, 463 (“It is the understanding of the Government of Canada that the rules introduced by Protocol I were intended to apply exclusively to conventional weapons. In particular, the rules so introduced do not have any effect on and do not regulate or prohibit the use of nuclear weapons.”).

<sup>418</sup> APPENDIX TO 1985 CJCS MEMO ON API 89 (“The United States participated in the negotiation of the Protocol on the assumption that its rules on the conduct of combat operations would not apply to the use of nuclear weapons, a position based on statements in the introduction to the original draft of the Protocol tabled by the Red Cross.”); United States, *Statement on Signature of AP I*, 1125 UNTS 434 (“1. It is the understanding of the United States of America that the rules established by this Protocol were not intended to have any effect on and do not regulate or prohibit the use of nuclear weapons.”). See also International Committee of the Red Cross, Introduction, *Draft Additional Protocols to the Geneva Conventions of August 12, 1949*, June 1973, 2, reprinted in I OFFICIAL RECORDS OF THE CDDH Part Three (“Problems relating to atomic, bacteriological and chemical warfare are subjects of international agreements or negotiations by governments, and in submitting these draft Additional Protocols, the ICRC does not intend to broach those problems.”).

## 6.19 EXPLOSIVE ORDNANCE

Information should be kept on the use of explosive ordnance in order to reduce the risk posed by explosive remnants of war once the conflict has ended.<sup>419</sup> If possible, explosive ordnance that must be abandoned should be left in a safe and secure manner, and information should be recorded and retained on its abandonment.<sup>420</sup> In addition, generic preventive measures should be taken during the life-cycle of explosive ordnance in order to minimize the occurrence of explosive remnants of war.<sup>421</sup>

### 6.19.1 Definitions of Explosive Ordnance, Unexploded Ordnance, and Abandoned Ordnance.

6.19.1.1 *Definition of Explosive Ordnance.* “Explosive ordnance” means conventional munitions containing explosives, with the exception of mines, booby-traps, and other devices as defined in the CCW Amended Mines Protocol.<sup>422</sup>

As a factual matter, mines, booby-traps, and other devices may constitute explosive ordnance, but the legal definition of explosive ordnance in the CCW Protocol V on Explosive Remnants of War excludes these items because they are addressed by the CCW Amended Mines Protocol.<sup>423</sup>

The reference to conventional munitions in the definition of “explosive ordnance” means that chemical, biological, and nuclear weapons are not covered by the CCW Protocol V on Explosive Remnants of War.<sup>424</sup>

6.19.1.2 *Definition of Unexploded Ordnance (UXO).* “Unexploded ordnance” means explosive ordnance that has been primed, fused, armed, or otherwise prepared for use and used in an armed conflict.<sup>425</sup> “Explosive ordnance” is defined in § 6.19.1.1 (Definition of Explosive Ordnance). UXO may have been fired, dropped, launched, or projected, and should have exploded, but failed to do so.<sup>426</sup> For example, UXO does not include weapons that have

---

<sup>419</sup> Refer to § 6.19.2 (Using Explosive Ordnance).

<sup>420</sup> Refer to § 6.19.3 (Abandoning Explosive Ordnance).

<sup>421</sup> Refer to § 6.19.5 (Generic Preventive Measures During the Life-Cycle of Explosive Ordnance Aimed at Minimizing the Occurrence of Explosive Remnants of War).

<sup>422</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 2(1) (“*Explosive ordnance* means conventional munitions containing explosives, with the exception of mines, booby traps and other devices as defined in Protocol II of this Convention as amended on 3 May 1996.”).

<sup>423</sup> Refer to § 6.12.1 (Definition of Mine); § 6.12.2 (Definition of Booby-Trap); § 6.12.3 (Definition of “Other Devices” Similar to Mines).

<sup>424</sup> WILLIAM H. BOOTHBY, WEAPONS AND THE LAW OF ARMED CONFLICT 303 (2009) (“Specifically, the Protocol does not apply to chemical, biological, or nuclear weapons.”).

<sup>425</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 2(2) (“*Unexploded ordnance* means explosive ordnance that has been primed, fused, armed, or otherwise prepared for use and used in an armed conflict.”).

<sup>426</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 2(2) (“It may have been fired, dropped, launched or projected and should have exploded but failed to do so.”).

remained in the armory or arsenal and that have not been prepared for firing.<sup>427</sup> UXO are sometimes called “duds.”

6.19.1.3 *Definition of Abandoned Explosive Ordnance (AXO)*. “Abandoned explosive ordnance” means explosive ordnance that has not been used during an armed conflict, that has been left behind or dumped by a party to an armed conflict, and that is no longer under control of the party that left it behind or dumped it.<sup>428</sup> AXO may or may not have been primed, fused, armed, or otherwise prepared for use.<sup>429</sup> For example, mortar rounds in a supply point that is abandoned as a result of a quick departure would constitute AXO.

6.19.2 *Using Explosive Ordnance*. To the maximum extent possible and as far as practicable, information should be recorded and retained on the use of explosive ordnance during armed conflict in order to reduce the risks posed by explosive remnants of war.<sup>430</sup> The best practice is to record and retain, as accurately as possible, the following information regarding explosive ordnance that may have become unexploded ordnance:

- the location of areas targeted using explosive ordnance;
- the approximate number, type, and nature of explosive ordnance used in these areas; and
- the general location of known and probable unexploded ordnance.<sup>431</sup>

6.19.3 *Abandoning Explosive Ordnance*. Where it has been necessary to abandon explosive ordnance in the course of operations, the best practice, if possible, is to leave it in a safe and secure manner.<sup>432</sup> In addition, to the maximum extent possible and as far as practicable,

---

<sup>427</sup> WILLIAM H. BOOTHBY, *WEAPONS AND THE LAW OF ARMED CONFLICT* 303 (2009) (“[Unexploded ordnance as defined in the CCW Protocol V on Explosive Remnants of War] also does not include weapons that have remained in the armory or arsenal and that have not been prepared for firing. The definition is quite specific. The ordnance must have been prepared for use and must have been actually used in an armed conflict.”).

<sup>428</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 2(3) (“*Abandoned explosive ordnance* means explosive ordnance that has not been used during an armed conflict, that has been left behind or dumped by a party to an armed conflict, and which is no longer under control of the party that left it behind or dumped it.”).

<sup>429</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 2(3) (“Abandoned explosive ordnance may or may not have been primed, fused, armed or otherwise prepared for use.”).

<sup>430</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 4(1) (“High Contracting Parties and parties to an armed conflict shall to the maximum extent possible and as far as practicable record and retain information on the use of explosive ordnance ... to facilitate the rapid marking and clearance, removal or destruction of explosive remnants of war, risk education and the provision of relevant information to the party in control of the territory and to civilian populations in that territory.”).

<sup>431</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(a) (“Recording of information: Regarding explosive ordnance which may have become UXO a State should endeavour to record the following information as accurately as possible: (i) the location of areas targeted using explosive ordnance; (ii) the approximate number of explosive ordnance used in the areas under (i); (iii) the type and nature of explosive ordnance used in areas under (i); (iv) the general location of known and probable UXO;”).

<sup>432</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(a) (“Where a State has been obliged to abandon explosive ordnance in the course of operations, it should endeavour to leave AXO in a safe and secure manner ...”).

information should be recorded and retained on the abandonment of explosive ordnance in order to reduce the risks posed by explosive remnants of war.<sup>433</sup> The best practice is to record as accurately as possible and retain the following information regarding abandoned explosive ordnance:

- the location of AXO;
- the approximate amount of AXO at each specific site; and
- the types of AXO at each specific site.<sup>434</sup>

6.19.4 Storing Records on the Use or Abandonment of Explosive Ordnance. Information regarding the use or abandonment of explosive ordnance should be stored in such a manner as to allow for its subsequent retrieval in accordance with § 6.20.6 (Making Available Information on Used or Abandoned Explosive Ordnance That May Have Become Explosive Remnants of War).

6.19.5 Generic Preventive Measures During the Life-Cycle of Explosive Ordnance Aimed at Minimizing the Occurrence of Explosive Remnants of War. Generic preventive measures aimed at minimizing the occurrence of explosive remnants of war are described in part 3 of the Technical Annex to the CCW Protocol V on Explosive Remnants of War.<sup>435</sup> Such measures include munitions manufacturing management, munitions management, training, transfer, and future production. When producing or procuring explosive ordnance, to the extent possible, and as appropriate, these best practice measures should be implemented and respected during the life-cycle of explosive ordnance.<sup>436</sup>

6.19.5.1 Munitions Manufacturing Management. The following best practices should be applied during munitions manufacturing management:

- Production processes should be designed to achieve the greatest reliability of munitions.
- Production processes should be subject to certified quality control measures.

---

<sup>433</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 4(1) (“High Contracting Parties and parties to an armed conflict shall to the maximum extent possible and as far as practicable record and retain information on the use of explosive ordnance or abandonment of explosive ordnance, to facilitate the rapid marking and clearance, removal or destruction of explosive remnants of war, risk education and the provision of relevant information to the party in control of the territory and to civilian populations in that territory.”).

<sup>434</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(a) (“Where a State has been obliged to abandon explosive ordnance in the course of operations, it should endeavour to leave AXO in a safe and secure manner and record information on this ordnance as follows: (v) the location of AXO; (vi) the approximate amount of AXO at each specific site; (vii) the types of AXO at each specific site.”).

<sup>435</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 9(1) (“Bearing in mind the different situations and capacities, each High Contracting Party is encouraged to take generic preventive measures aimed at minimizing the occurrence of explosive remnants of war, including, but not limited to, those referred to in part 3 of the Technical Annex.”).

<sup>436</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3 (“States producing or procuring explosive ordnance should to the extent possible and as appropriate endeavour to ensure that the following measures are implemented and respected during the life-cycle of explosive ordnance.”).

- During the production of explosive ordnance, certified quality assurance standards that are internationally recognized should be applied.
- Acceptance testing should be conducted through live-fire testing over a range of conditions or through other validated procedures.
- High reliability standards should be required in the course of explosive ordnance transactions and transfers.<sup>437</sup>

6.19.5.2 *Munitions Management*. In order to ensure the best possible long-term reliability of explosive ordnance, best practice norms and operating procedures with respect to its storage, transport, field storage, and handling should be applied in accordance with the following guidance.<sup>438</sup>

- Explosive ordnance, where necessary, should be stored in secure facilities or appropriate containers that protect the explosive ordnance and its components in a controlled atmosphere, if necessary.<sup>439</sup>
- Explosive ordnance should be transported to and from production facilities, storage facilities, and the field in a manner that minimizes the risk of damage to the explosive ordnance.<sup>440</sup>
- Appropriate containers and controlled environments, where necessary, should be used when stockpiling and transporting explosive ordnance.<sup>441</sup>
- The risk of explosions in stockpiles should be minimized by the use of appropriate

---

<sup>437</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(a) (“(i) Production processes should be designed to achieve the greatest reliability of munitions. (ii) Production processes should be subject to certified quality control measures. (iii) During the production of explosive ordnance, certified quality assurance standards that are internationally recognised should be applied. (iv) Acceptance testing should be conducted through live-fire testing over a range of conditions or through other validated procedures. (v) High reliability standards should be required in the course of explosive ordnance transactions and transfers.”).

<sup>438</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b) (“In order to ensure the best possible long-term reliability of explosive ordnance, States are encouraged to apply best practice norms and operating procedures with respect to its storage, transport, field storage, and handling in accordance with the following guidance.”).

<sup>439</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(i) (“Explosive ordnance, where necessary, should be stored in secure facilities or appropriate containers that protect the explosive ordnance and its components in a controlled atmosphere, if necessary.”).

<sup>440</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(ii) (“A State should transport explosive ordnance to and from production facilities, storage facilities and the field in a manner that minimizes damage to the explosive ordnance.”).

<sup>441</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(iii) (“Appropriate containers and controlled environments, where necessary, should be used by a State when stockpiling and transporting explosive ordnance.”).

stockpile arrangements.<sup>442</sup>

- Appropriate explosive ordnance logging, tracking, and testing procedures should be applied. These procedures should include information on: (1) the date of manufacture of each number, lot, or batch of explosive ordnance; (2) where the explosive ordnance has been; (3) under what conditions the explosive ordnance has been stored; and (4) to what environmental factors the explosive ordnance has been exposed.<sup>443</sup>
- Periodically, stockpiled explosive ordnance should undergo, where appropriate, live-fire testing to ensure that munitions function as desired.<sup>444</sup>
- Sub-assemblies of stockpiled explosive ordnance should, where appropriate, undergo laboratory testing to ensure that munitions function as desired.<sup>445</sup>
- Where necessary, appropriate action (including adjustment to the expected shelf-life of ordnance) should be taken as a result of information acquired by logging, tracking, and testing procedures, in order to maintain the reliability of stockpiled explosive ordnance.<sup>446</sup>

6.19.5.3 *Training*. All personnel who are involved in handling, transporting, and using explosive ordnance should be properly trained through suitable training programs on the munitions that they will be required to handle.<sup>447</sup>

6.19.5.4 *Transfer*. When contemplating transfers of explosive ordnance to another State that did not previously possess that type of explosive ordnance, reasonable efforts should be made to ensure that the receiving State has the capability to store, maintain, and use

---

<sup>442</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(iv) (“The risk of explosions in stockpiles should be minimised by the use of appropriate stockpile arrangements.”).

<sup>443</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(v) (“States should apply appropriate explosive ordnance logging, tracking and testing procedures, which should include information on the date of manufacture of each number, lot or batch of explosive ordnance, and information on where the explosive ordnance has been, under what conditions it has been stored, and to what environmental factors it has been exposed.”).

<sup>444</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(vi) (“Periodically, stockpiled explosive ordnance should undergo, where appropriate, live-firing testing to ensure that munitions function as desired.”).

<sup>445</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(vii) (“Sub-assemblies of stockpiled explosive ordnance should, where appropriate, undergo laboratory testing to ensure that munitions function as desired.”).

<sup>446</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(b)(viii) (“Where necessary, appropriate action, including adjustment to the expected shelf-life of ordnance, should be taken as a result of information acquired by logging, tracking and testing procedures, in order to maintain the reliability of stockpiled explosive ordnance.”).

<sup>447</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(c) (“The proper training of all personnel involved in the handling, transporting and use of explosive ordnance is an important factor in seeking to ensure its reliable operation as intended. States should therefore adopt and maintain suitable training programmes to ensure that personnel are properly trained with regard to the munitions with which they will be required to deal.”).

that explosive ordnance correctly.<sup>448</sup>

6.19.5.5 *Future Production*. When producing, procuring, or developing explosive ordnance, ways and means of improving the reliability of explosive ordnance should be considered with a view to achieving the highest possible reliability.<sup>449</sup>

## 6.20 EXPLOSIVE REMNANTS OF WAR

There are certain obligations with respect to explosive remnants of war on territory under U.S. control. Most of these obligations are triggered upon the cessation of active hostilities.

6.20.1 Definition of Explosive Remnants of War. Under the CCW Protocol V on Explosive Remnants of War, “explosive remnants of war” means: (1) unexploded ordnance (UXO); and (2) abandoned explosive ordnance (AXO).<sup>450</sup>

“Unexploded ordnance” is defined in § 6.19.1.2 (Definition of Unexploded Ordnance (UXO)). “Abandoned explosive ordnance” is defined in § 6.19.1.3 (Definition of Abandoned Explosive Ordnance (AXO)).

6.20.2 Scope of the Obligations Created by the CCW Protocol V on Explosive Remnants of War. The CCW Protocol V on Explosive Remnants of War applies to explosive remnants of war on the land territory, including internal waters, of States that are Parties to the Protocol.<sup>451</sup>

The CCW Protocol V on Explosive Remnants of War applies to situations resulting from armed conflict and occupation.<sup>452</sup>

Certain obligations in the CCW Protocol V on Explosive Remnants of War only apply to explosive remnants of war that were created after the entry into force of the Protocol for the High Contracting Party on whose territory the explosive remnants of war exist.<sup>453</sup> These obligations

---

<sup>448</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(d) (“A State planning to transfer explosive ordnance to another State that did not previously possess that type of explosive ordnance should endeavour to ensure that the receiving State has the capability to store, maintain and use that explosive ordnance correctly.”).

<sup>449</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 3(e) (“A State should examine ways and means of improving the reliability of explosive ordnance that it intends to produce or procure, with a view to achieving the highest possible reliability.”).

<sup>450</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 2(4) (“*Explosive remnants of war* means unexploded ordnance and abandoned explosive ordnance.”).

<sup>451</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 1(2) (“This Protocol shall apply to explosive remnants of war on the land territory including internal waters of High Contracting Parties.”).

<sup>452</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 1(3) (“This Protocol shall apply to situations resulting from conflicts referred to in Article 1, paragraphs 1 to 6, of the Convention, as amended on 21 December 2001.”).

<sup>453</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 1(4) (“Articles 3, 4, 5 and 8 of this Protocol apply to explosive remnants of war other than existing explosive remnants of war as defined in Article 2, paragraph 5 of this Protocol.”); CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 2(5) (“*Existing explosive remnants of war* means unexploded ordnance and abandoned explosive ordnance that existed prior to the entry into force of this Protocol for the High Contracting Party on whose territory it exists.”).

include obligations discussed in:

- § 6.20.3 (Taking Feasible Precautions to Protect Civilians From Explosive Remnants of War);
- § 6.20.6 (Making Available Information on Used or Abandoned Explosive Ordnance That May Have Become Explosive Remnants of War);
- § 6.20.7 (Clearance, Removal, or Destruction of Explosive Remnants of War From Territory Under a Party's Control); and
- § 6.20.8 (Providing Assistance to Facilitate the Removal of Explosive Remnants of War From a Party's Military Operations in Areas Outside Its Control).

6.20.3 Taking Feasible Precautions to Protect Civilians From Explosive Remnants of War. Parties to the CCW Protocol V on Explosive Remnants of War and parties to an armed conflict shall take all feasible precautions in the territory under their control affected by explosive remnants of war to protect the civilian population, individual civilians, and civilian objects from the risks and effects of explosive remnants of war.<sup>454</sup>

Feasible precautions are those precautions that are practicable or practically possible, taking into account all circumstances ruling at the time, including humanitarian and military considerations.<sup>455</sup>

These precautions may include warnings, risk education to the civilian population, and marking, fencing, and monitoring of territory affected by explosive remnants of war, as set out in Part 2 of the Technical Annex to CCW Protocol V on Explosive Remnants of War.<sup>456</sup>

6.20.3.1 Best Practice Elements on Warnings and Risk Education. Warnings are the punctual provision of cautionary information to the civilian population, intended to minimize risks caused by explosive remnants of war in affected territories.<sup>457</sup>

Risk education to the civilian population should consist of risk education programs to facilitate information exchange between affected communities, government authorities, and

---

<sup>454</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 5(1) (“High Contracting Parties and parties to an armed conflict shall take all feasible precautions in the territory under their control affected by explosive remnants of war to protect the civilian population, individual civilians and civilian objects from the risks and effects of explosive remnants of war.”).

<sup>455</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 5(1) (“Feasible precautions are those precautions which are practicable or practically possible, taking into account all circumstances ruling at the time, including humanitarian and military considerations.”). Refer to § 5.2.3.2 (What Precautions Are Feasible).

<sup>456</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 5(1) (“These precautions may include warnings, risk education to the civilian population, marking, fencing and monitoring of territory affected by explosive remnants of war, as set out in Part 2 of the Technical Annex.”).

<sup>457</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(a) (“Warnings are the punctual provision of cautionary information to the civilian population, intended to minimise risks caused by explosive remnants of war in affected territories.”).

humanitarian organizations so that affected communities are informed about the threat from explosive remnants of war. Risk education programs are usually long-term activities.<sup>458</sup>

All programs of warnings and risk education should, where possible, take into account prevailing national and international standards, including the International Mine Action Standards.<sup>459</sup>

Warnings and risk education should be provided to the affected civilian population, which comprises civilians living in or around areas containing explosive remnants of war and civilians who transit such areas.<sup>460</sup>

Warnings should be given as soon as possible, depending on the context and the information available. A risk education program should replace a warnings program as soon as possible. Warnings and risk education always should be provided to the affected communities at the earliest possible time.<sup>461</sup>

Third parties, such as international organizations and non-governmental organizations, should be used when there are insufficient resources and skills to deliver efficient risk education.<sup>462</sup>

If possible, additional resources for warnings and risk education should be provided. Such items might include: provision of logistical support, production of risk education materials, financial support, and general cartographic information.<sup>463</sup>

*6.20.3.2 Best Practices on Marking, Fencing, and Monitoring Areas Containing Explosive Remnants of War.* When possible, at any time during the course of a conflict and at

---

<sup>458</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(b) (“Risk education to the civilian population should consist of risk education programmes to facilitate information exchange between affected communities, government authorities and humanitarian organisations so that affected communities are informed about the threat from explosive remnants of war. Risk education programmes are usually a long term activity.”).

<sup>459</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(c) (“All programmes of warnings and risk education should, where possible, take into account prevailing national and international standards, including the International Mine Action Standards.”).

<sup>460</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(d) (“Warnings and risk education should be provided to the affected civilian population which comprises civilians living in or around areas containing explosive remnants of war and civilians who transit such areas.”).

<sup>461</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(e) (“Warnings should be given, as soon as possible, depending on the context and the information available. A risk education programme should replace a warnings programme as soon as possible. Warnings and risk education always should be provided to the affected communities at the earliest possible time.”).

<sup>462</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(f) (“Parties to a conflict should employ third parties such as international organisations and non-governmental organisations when they do not have the resources and skills to deliver efficient risk education.”).

<sup>463</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(g) (“Parties to a conflict should, if possible, provide additional resources for warnings and risk education. Such items might include: provision of logistical support, production of risk education materials, financial support and general cartographic information.”).

the earliest possible time and to the maximum extent possible, the best practice is for areas containing explosive remnants of war to be marked, fenced, and monitored so as to ensure the effective exclusion of civilians, in accordance with the following provisions.<sup>464</sup>

Warning signs based on methods of marking recognized by the affected community should be used in the marking of suspected hazardous areas. Signs and other hazardous area boundary markers should as far as possible be visible, legible, durable, and resistant to environmental effects and should clearly identify which side of the marked boundary is considered safe and which side is considered to be within the area affected by explosive remnants of war.<sup>465</sup>

An appropriate structure should be put in place with responsibility for the monitoring and maintenance of permanent and temporary marking systems, integrated with national and local risk education programs.<sup>466</sup>

6.20.4 Protecting, as Far as Feasible, Humanitarian Missions and Organizations From the Effects of Explosive Remnants of War. Each Party to the CCW Protocol V on Explosive Remnants of War and party to an armed conflict shall protect, as far as feasible, from the effects of explosive remnants of war, humanitarian missions and organizations that are or will be operating in the area under the control of the Party to the CCW Protocol V on Explosive Remnants of War or party to an armed conflict and with that party's consent.<sup>467</sup>

In addition, each Party to the CCW Protocol V on Explosive Remnants of War and party to an armed conflict shall, upon request by such a humanitarian mission or organization, provide, as far as feasible, information on the location of all explosive remnants of war that it is aware of in territory where the requesting humanitarian mission or organization will operate or is operating.<sup>468</sup> Other treaties or certain U.N. Security Council resolutions may provide a higher

---

<sup>464</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(h) (“When possible, at any time during the course of a conflict and thereafter, where explosive remnants of war exist the parties to a conflict should, at the earliest possible time and to the maximum extent possible, ensure that areas containing explosive remnants of war are marked, fenced and monitored so as to ensure the effective exclusion of civilians, in accordance with the following provisions.”).

<sup>465</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(i) (“Warning signs based on methods of marking recognised by the affected community should be utilised in the marking of suspected hazardous areas. Signs and other hazardous area boundary markers should as far as possible be visible, legible, durable and resistant to environmental effects and should clearly identify which side of the marked boundary is considered to be within the explosive remnants of war affected area and which side is considered to be safe.”).

<sup>466</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 2(j) (“An appropriate structure should be put in place with responsibility for the monitoring and maintenance of permanent and temporary marking systems, integrated with national and local risk education programmes.”).

<sup>467</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 6(1) (“Each High Contracting Party and party to an armed conflict shall: (a) Protect, as far as feasible, from the effects of explosive remnants of war, humanitarian missions and organizations that are or will be operating in the area under the control of the High Contracting Party or party to an armed conflict and with that party's consent.”).

<sup>468</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 6(1) (“Each High Contracting Party and party to an armed conflict shall: ... (b) Upon request by such a humanitarian mission or organization, provide, as far as feasible, information on the location of all explosive remnants of war that it is aware of in territory where the requesting humanitarian mission or organization will operate or is operating.”).

level of additional protection.<sup>469</sup>

6.20.5 Obligations Under the CCW Protocol V on Explosive Remnants of War That Are Triggered by the Cessation of Active Hostilities. Certain obligations under the CCW Protocol V on Explosive Remnants of War are triggered by the cessation of active hostilities. These obligations include those obligations addressed in:

- § 6.20.6 (Making Available Information on Used or Abandoned Explosive Ordnance That May Have Become Explosive Remnants of War);
- § 6.20.7 (Clearance, Removal, or Destruction of Explosive Remnants of War From Territory Under a Party's Control); and
- § 6.20.8 (Providing Assistance to Facilitate the Removal of Explosive Remnants of War From a Party's Military Operations in Areas Outside Its Control).

The determination that active hostilities have ceased for the purposes of triggering these obligations would be made at the national level.

In addition, peace treaties or similar agreements negotiated in connection with the settlement of armed conflicts may also allocate responsibilities with respect to explosive remnants of war.<sup>470</sup> Nothing in the CCW Protocol V on Explosive Remnants of War precludes future arrangements in connection with the settlement of armed conflicts, or assistance connected thereto, to allocate responsibilities with respect to explosive remnants of war in a manner that respects the essential spirit and purpose of the CCW Protocol V on Explosive Remnants of War.<sup>471</sup>

---

<sup>469</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 6(2) (“The provisions of this Article are without prejudice to existing International Humanitarian Law or other international instruments as applicable or decisions by the Security Council of the United Nations which provide for a higher level of protection.”).

<sup>470</sup> *For example*, Protocol to the Agreement on Ending the War and Restoring Peace in Viet-Nam Concerning the Cease-fire in South Viet-Nam and the Joint Military Commissions, art. 5(a), Jan. 27, 1972, 935 UNTS 251, 253 (“Within fifteen days after the cease-fire comes into effect, each party shall do its utmost to complete the removal or deactivation of all demolition objects, mine-fields, traps, obstacles or other dangerous objects placed previously, so as not to hamper the population’s movement and work, in the first place on waterways, roads and railroads in South Viet-Nam. Those mines which cannot be removed or deactivated within that time shall be clearly marked and must be removed or deactivated as soon as possible.”); Protocol to the Agreement on Ending the War and Restoring Peace in Viet-Nam Concerning the Removal, Permanent Deactivation, or Destruction of Mines in the Territorial Waters, Ports, Harbors, and Waterways of the Democratic Republic of Viet-Nam, art. 5, Jan. 27, 1973, 935 UNTS 393, 395 (“The United States shall be responsible for the mine clearance on inland waterways of the Democratic Republic of Viet-Nam. The Democratic Republic of Viet-Nam shall, to the full extent of its capabilities, actively participate in the mine clearance with the means of surveying, removal and destruction and technical advice supplied by the United States.”).

<sup>471</sup> United States, *Statement on Consent to Be Bound by CCW Protocol V on Explosive Remnants of War*, Jan. 21, 2009, 2562 UNTS 39, 40 (“It is the understanding of the United States of America that nothing in Protocol V would preclude future arrangements in connection with the settlement of armed conflicts, or assistance connected thereto, to allocate responsibilities under Article 3 in a manner that respects the essential spirit and purpose of Protocol V”). *See also Overview and Article-by-Article Analysis of CCW Protocol V on Explosive Remnants of War* 3-4, MESSAGE FROM THE PRESIDENT TRANSMITTING AP III, CCW AMENDED ARTICLE 1, AND CCW PROTOCOL V ON EXPLOSIVE

6.20.6 Making Available Information on Used or Abandoned Explosive Ordnance That May Have Become Explosive Remnants of War. Without delay after the cessation of active hostilities and as far as practicable, Parties to the CCW Protocol V on Explosive Remnants of War and parties to an armed conflict have an obligation, subject to their legitimate security interests, to make available certain information on used or abandoned explosive ordnance, which may have become explosive remnants of war, to certain recipients.<sup>472</sup>

6.20.6.1 *Timing of the Release of Information.* The best practice is for the information to be released as soon as possible, taking into account such matters as any ongoing military and humanitarian operations in the affected areas, the availability and reliability of information, and relevant security issues.<sup>473</sup>

6.20.6.2 *Recipients of the Released Information.* The information shall be made available to the party or parties in control of the affected territory and, upon request, to other relevant organizations that the party providing the information believes are, or will be, undertaking risk education and the marking and clearance, removal, or destruction of explosive remnants of war in the affected area.<sup>474</sup>

The best practice is to release this information to the party or parties in control of the affected territory and to those persons or institutions that the releasing State is satisfied are, or will be, involved in UXO or AXO clearance in the affected area, or in the education of the civilian population on the risks of UXO or AXO.<sup>475</sup>

---

REMNANTS OF WAR 13-14 (“During the negotiations, the United States and other delegations raised the need to reconcile this Protocol with other international agreements or arrangements related to the settlement of armed conflict, in order to avoid unintended consequences in connection with peace treaties or similar arrangements. In the context of armed conflict, the parties to the conflict themselves will be in the best position to determine how the responsibilities for ERW should fit into an overall settlement.”).

<sup>472</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 4(2) (“High Contracting Parties and parties to an armed conflict which have used or abandoned explosive ordnance which may have become explosive remnants of war shall, without delay after the cessation of active hostilities and as far as practicable, subject to these parties’ legitimate security interests, make available such information to the party or parties in control of the affected area, bilaterally or through a mutually agreed third party including *inter alia* the United Nations or, upon request, to other relevant organizations which the party providing the information is satisfied are or will be undertaking risk education and the marking and clearance, removal or destruction of explosive remnants of war in the affected area.”).

<sup>473</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(c)(iv) (“Timing: The information should be released as soon as possible, taking into account such matters as any ongoing military and humanitarian operations in the affected areas, the availability and reliability of information and relevant security issues.”).

<sup>474</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 4(2) (information shall be made available “to the party or parties in control of the affected area, . . . or, upon request, to other relevant organizations which the party providing the information is satisfied are or will be undertaking risk education and the marking and clearance, removal or destruction of explosive remnants of war in the affected area.”).

<sup>475</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(c)(ii) (“Recipient: The information should be released to the party or parties in control of the affected territory and to those persons or institutions that the releasing State is satisfied are, or will be, involved in UXO or AXO clearance in the affected area, in the education of the civilian population on the risks of UXO or AXO.”).

6.20.6.3 *Mechanism for the Release of Information*. This information may be made available bilaterally (e.g., directly from the United States to the recipient) or through a mutually agreed third party (e.g., the United Nations).<sup>476</sup> In addition, a best practice would be to make use of those mechanisms established internationally or locally for the release of such information, such as through the United Nations Mine Action Service (UNMAS), the Information Management System for Mine Action (IMSMA), and other expert agencies, as considered appropriate by the releasing State.<sup>477</sup>

6.20.6.4 *Best Practices for the Content of Released Information on UXO*. The best practice is for the released information on UXO to contain details on:

- the general location of known and probable UXO;
- the types and approximate number of explosive ordnance used in the targeted areas;
- the method of identifying the explosive ordnance including color, size, and shape, and other relevant markings; and
- the method for safe disposal of the explosive ordnance.<sup>478</sup>

This information may be drawn from the information recorded and retained when using explosive ordnance.<sup>479</sup>

6.20.6.5 *Best Practices for the Content of Released Information on AXO*. The best practice is for the released information on AXO to contain details on:

- the location of the AXO;
- the approximate number of AXO at each specific site;
- the types of AXO at each specific site;
- the method of identifying the AXO, including color, size, and shape;

---

<sup>476</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 4(2) (information shall be made available “bilaterally or through a mutually agreed third party including inter alia the United Nations”).

<sup>477</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(c)(iii) (“Mechanism: A State should, where feasible, make use of those mechanisms established internationally or locally for the release of information, such as through UNMAS, IMSMA, and other expert agencies, as considered appropriate by the releasing State.”).

<sup>478</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(c)(i) (“On UXO the released information should contain details on: (1) the general location of known and probable UXO; (2) the types and approximate number of explosive ordnance used in the targeted areas; (3) the method of identifying the explosive ordnance including colour, size and shape and other relevant markings; (4) the method for safe disposal of the explosive ordnance.”).

<sup>479</sup> Refer to § 6.19.2 (Using Explosive Ordnance); § 6.19.4 (Storing Records on the Use or Abandonment of Explosive Ordnance).

- information on type and methods of packing for AXO;
- the state of readiness; and
- the location and nature of any booby traps known to be present in the area of AXO.<sup>480</sup>

This information may be drawn from the information recorded and retained when abandoning explosive ordnance.<sup>481</sup>

6.20.7 Clearance, Removal, or Destruction of Explosive Remnants of War From Territory Under a Party's Control. After the cessation of active hostilities and as soon as feasible, each Party to the CCW Protocol V on Explosive Remnants of War and party to an armed conflict shall mark and clear, remove, or destroy explosive remnants of war in affected territories under its control.<sup>482</sup> This obligation is consistent with long-established customary international law principles of sovereignty and responsibility.<sup>483</sup> In particular, the following measures are to be taken in such territories:

- surveying and assessing the threat posed by explosive remnants of war;
- assessing and prioritizing the needs and practicability in terms of marking and clearance, removal, or destruction;
- marking and clearing, removing, or destroying explosive remnants of war; and
- taking steps to mobilize resources to carry out these activities.<sup>484</sup>

---

<sup>480</sup> TECHNICAL ANNEX TO CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR part 1(c)(i) (“On AXO the released information should contain details on: (5) the location of the AXO; (6) the approximate number of AXO at each specific site; (7) the types of AXO at each specific site; (8) the method of identifying the AXO, including colour, size and shape; (9) information on type and methods of packing for AXO; (10) state of readiness; (11) the location and nature of any booby traps known to be present in the area of AXO.”).

<sup>481</sup> Refer to § 6.19.3 (Abandoning Explosive Ordnance); § 6.19.4 (Storing Records on the Use or Abandonment of Explosive Ordnance).

<sup>482</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 3(2) (“After the cessation of active hostilities and as soon as feasible, each High Contracting Party and party to an armed conflict shall mark and clear, remove or destroy explosive remnants of war in affected territories under its control.”).

<sup>483</sup> *Overview and Article-by-Article Analysis of CCW Protocol V on Explosive Remnants of War* 3, MESSAGE FROM THE PRESIDENT TRANSMITTING AP III, CCW AMENDED ARTICLE 1, AND CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR 13 (“During the negotiations [about CCW Protocol V on Explosive Remnants of War], some delegations proposed that the responsibility to clear unexploded munitions should be shifted to the party that used the munitions. Such a provision would have been contrary to the long-established customary principle of the rights and responsibilities of a sovereign state over its territory; responsibility should be assigned to the entity in the best position to exercise it.”).

<sup>484</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 3(3) (“After the cessation of active hostilities and as soon as feasible, each High Contracting Party and party to an armed conflict shall take the following measures in affected territories under its control, to reduce the risks posed by explosive remnants of war: (a) survey and assess the threat posed by explosive remnants of war; (b) assess and prioritize needs and practicability in terms of marking

In conducting these activities, international standards, including the International Mine Action Standards, should be taken into account.<sup>485</sup> Areas affected by explosive remnants of war that are assessed to pose a serious humanitarian risk are to be accorded priority status for clearance, removal, or destruction.<sup>486</sup>

Territories under its control include territory over which the State is an Occupying Power. An Occupying Power assumes responsibility for the safety of the civilian population, including responsibilities associated with explosive remnants of war.<sup>487</sup>

6.20.8 Providing Assistance to Facilitate the Removal of Explosive Remnants of War From a Party's Military Operations in Areas Outside Its Control. In cases where a user of explosive ordnance that has become explosive remnants of war does not exercise control of the territory, the user shall, after the cessation of active hostilities, provide where feasible, *inter alia*, technical, financial, material or human resources assistance, bilaterally or through a mutually agreed third party, including, *inter alia*, through the United Nations system or other relevant organizations, to facilitate the marking and clearance, removal, or destruction of such explosive remnants of war.<sup>488</sup>

---

and clearance, removal or destruction; (c) mark and clear, remove or destroy explosive remnants of war; (d) take steps to mobilize resources to carry out these activities.”).

<sup>485</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 3(4) (“In conducting the above activities High Contracting Parties and parties to an armed conflict shall take into account international standards, including the International Mine Action Standards.”).

<sup>486</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 3(2) (“Areas affected by explosive remnants of war which are assessed pursuant to paragraph 3 of this Article as posing a serious humanitarian risk shall be accorded priority status for clearance, removal or destruction.”).

<sup>487</sup> Refer to § 11.5 (Duty of the Occupying Power to Ensure Public Order and Safety).

<sup>488</sup> CCW PROTOCOL V ON EXPLOSIVE REMNANTS OF WAR art. 3(1) (“Each High Contracting Party and party to an armed conflict shall bear the responsibilities set out in this Article with respect to all explosive remnants of war in territory under its control. In cases where a user of explosive ordnance which has become explosive remnants of war, does not exercise control of the territory, the user shall, after the cessation of active hostilities, provide where feasible, *inter alia* technical, financial, material or human resources assistance, bilaterally or through a mutually agreed third party, including *inter alia* through the United Nations system or other relevant organizations, to facilitate the marking and clearance, removal or destruction of such explosive remnants of war.”).

## VII –Wounded, Sick, Shipwrecked, Dead, and the Medical Services

- 7.18 Land and Sea Civilian Hospital Convoys
- 7.19 Civilian Medical Aircraft
- 7.20 AP I Provisions on the Wounded, Sick, and Shipwrecked

#### 7.1 INTRODUCTION

This Chapter addresses the protection of the wounded, sick, shipwrecked, and dead, both on the battlefield and after having fallen into the hands of the enemy during international armed conflict. It also addresses the rights, duties, and liabilities of military medical and religious personnel, and the protection of military medical units, facilities, and transports. Lastly, it addresses the protection of civilians who are wounded, sick, infirm, or maternity cases, and civilian hospitals.

Hospital and safety zones are addressed in Chapter V.<sup>1</sup> Rights and obligations of neutral States with respect to the wounded, sick, and shipwrecked are addressed in Chapter XV.<sup>2</sup> Rules for the protection of medical personnel and the wounded, sick, and shipwrecked during non-

---

<sup>1</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>2</sup> Refer to § 15.3.2.4 (Authorized Humanitarian Assistance Is Not a Violation of Neutrality); § 15.5.2.1 (Exception for Authorized Medical Personnel); § 15.16.2 (Neutral Reception of the Wounded, Sick, and Shipwrecked); § 15.18 (Authorized Passage of Wounded and Sick Combatants Through Neutral Territory).

international armed conflict are addressed in Chapter XVII.<sup>3</sup>

7.1.1 Interpretation and Application of Provisions Relating to Medical Issues in the GWS, GWS-Sea, GPW, and GC. The GWS and GWS-Sea underlie most of the international law rules applicable to the United States for: (1) the protection of the wounded, sick, shipwrecked, and dead; (2) the rights, duties, and liabilities of military medical and religious personnel; and (3) the protection of military medical units, facilities, and transports.

In addition to the rules of the GWS and GWS-Sea, the GPW also has rules on the medical treatment of POWs that may apply to persons who are wounded and sick.<sup>4</sup> The GWS and GWS-Sea, however, have rules for the protection of the wounded, sick, shipwrecked, and dead who are not POWs (*e.g.*, they are on the battlefield and not in the power of the adverse party, they died without being captured).

The GC has provisions relating to the protection of civilians who are wounded, sick, infirm, or maternity cases, and civilian hospitals.<sup>5</sup> The GC also has rules addressing medical care for civilians in occupied territory.<sup>6</sup>

7.1.1.1 Interpretation of the GWS and GWS-Sea. As with the GPW and GC, the provisions of the GWS and GWS-Sea should be interpreted in light of the principles that underlie the treatment of the wounded, sick, shipwrecked, dead, and the medical services, and, in particular, in light of the goal of promoting the care of the wounded and sick.<sup>7</sup> The subsequent practice of States in applying the GWS and GWS-Sea could also assist in interpreting their provisions because States' decades of experience in applying the GWS and GWS-Sea may be very helpful in understanding their requirements.<sup>8</sup>

7.1.1.2 Special Agreements Under the GWS and GWS-Sea. Under the GWS and GWS-Sea, States may conclude a variety of special agreements during international armed conflict to facilitate the protection of the wounded, sick, shipwrecked, and others protected by the GWS and GWS-Sea. The GWS and GWS-Sea specifically provide for agreements:

- to entrust to an effective and impartial organization the duties of the Protecting Powers;<sup>9</sup>
- to establish an armistice or suspension of fire, or local arrangement to permit the removal,

<sup>3</sup> Refer to § 17.14 (Protection of the Wounded, Sick, Shipwrecked, and Dead in NIAC); § 17.15 (Protection of Medical and Religious Personnel and Medical Transports in NIAC).

<sup>4</sup> Refer to § 9.14 (Medical Attention for Interned POWs).

<sup>5</sup> Refer to § 7.16 (Protection of Civilians Who Are Wounded, Sick, Infirm, or Expectant Mothers); § 7.17 (Civilian Hospitals and Their Personnel).

<sup>6</sup> Refer to § 11.15 (Public Health and Hygiene).

<sup>7</sup> Refer to § 9.1.2 (Interpretation and Application of the GPW); § 10.1.1 (Interpretation and Application of the GC).

<sup>8</sup> Refer to § 1.7.4 (Use of Certain Subsequent Practice in Treaty Interpretation).

<sup>9</sup> Refer to § 18.15.2.1 (Agreement for an Impartial and Effective Organization to Perform Protecting Power Duties Under the 1949 Geneva Conventions).

exchange, and transport of the wounded, sick, and shipwrecked;<sup>10</sup>

- to establish and recognize hospital zones and localities;<sup>11</sup>
- to establish the corresponding ranks for the medical personnel, including the staff of any authorized voluntary aid societies, in order to help determine the senior retained medical officer in POW camps;<sup>12</sup>
- to put neutral observers on board ships to verify the strict observation of provisions of the GWS-Sea or verify the equipment carried on board is exclusively for the treatment of the wounded and sick, or for the prevention of disease;<sup>13</sup>
- to determine the percentage of personnel to be retained, in proportion to the number of POWs, and the distribution of the retained personnel in POW camps;<sup>14</sup>
- to establish flights or additional markings for medical aircraft;<sup>15</sup>
- to approve chartered medical transport ships;<sup>16</sup>
- between the belligerent parties and a neutral Power on the wounded, sick, and shipwrecked who are disembarked onto the neutral Power's territory;<sup>17</sup>
- to use the most modern methods available to facilitate the identification of hospital ships;<sup>18</sup> and
- on the procedure, or to select an umpire who will decide the procedure, to be followed for an inquiry concerning any alleged violation of the GWS or GWS-Sea.<sup>19</sup>

In addition to these agreements expressly provided for in the GWS and GWS-Sea, Parties to the GWS or GWS-Sea may conclude other special agreements for all matters concerning

---

<sup>10</sup> Refer to § 7.4.3.1 (Armistices and Local Arrangements to Permit the Removal, Exchange, or Transport of the Wounded).

<sup>11</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>12</sup> Refer to § 7.9.5.7 (Senior Medical Officer in the Camp).

<sup>13</sup> Refer to § 7.13.1 (Agreement to Place Neutral Observers on Chartered Medical Transports); § 7.12.2.6 (Control and Search of Hospital Ships and Coastal Rescue Craft).

<sup>14</sup> Refer to § 7.9.4.3 (Special Agreements on the Percentage of Personnel to Be Retained).

<sup>15</sup> Refer to § 7.14 (Military Medical Aircraft).

<sup>16</sup> Refer to § 7.13 (Chartered Medical Transport Ships).

<sup>17</sup> Refer to § 7.14.6.2 (Detention of the Wounded, Sick, or Shipwrecked).

<sup>18</sup> Refer to § 7.12.3.5 (Agreements to Facilitate the Identification of Hospital Ships).

<sup>19</sup> Refer to § 18.14.1 (Inquiry Procedure in the 1949 Geneva Conventions).

which they may deem it suitable to make separate provision.<sup>20</sup>

No special agreement shall adversely affect the situation of wounded, sick, and shipwrecked persons, of members of the medical personnel, or of chaplains, as defined by the GWS or the GWS-Sea, nor restrict the rights that the GWS or GWS-Sea confer upon them.<sup>21</sup>

Wounded, sick, and shipwrecked persons, as well as medical personnel and chaplains, shall continue to have the benefit of such agreements as long as the GWS or GWS-Sea is applicable to them, except where express provisions to the contrary are contained in these or in subsequent agreements, or where more favorable measures have been taken with regard to them by one or other of the parties to the conflict.<sup>22</sup>

## 7.2 APPLICATION OF THE PROTECTIONS OF THE GWS AND GWS-SEA

7.2.1 Circumstances and Duration of Application of the GWS and GWS-Sea. In general, the GWS-Sea addresses the protection of persons at sea, while the GWS applies to persons on land. In case of hostilities between land and naval forces of parties to the conflict, the provisions of the GWS-Sea shall apply only to forces on board ship.<sup>23</sup>

For the wounded and sick, the GWS and GWS-Sea provide corresponding protections until these persons no longer suffer from that condition. For example, the GWS would no longer cover a detained member of the armed forces who recovers from his or her wounds, although the GPW would continue to apply to that person because he or she is a POW.<sup>24</sup>

---

<sup>20</sup> GWS art. 6 (“In addition to the agreements expressly provided for in Articles 10, 15, 23, 28, 31, 36, 37 and 52, the High Contracting Parties may conclude other special agreements for all matters concerning which they may deem it suitable to make separate provision.”); GWS-SEA art. 6 (“In addition to the agreements expressly provided for in Articles 10, 18, 31, 38, 39, 40, 43 and 53, the High Contracting Parties may conclude other special agreements for all matters concerning which they may deem it suitable to make separate provision.”).

<sup>21</sup> GWS art. 6 (“No special agreement shall adversely affect the situation of the wounded and sick, of members of the medical personnel or of chaplains, as defined by the present Convention, nor restrict the rights which it confers upon them.”); GWS-SEA art. 6 (“No special agreement shall adversely affect the situation of wounded, sick and shipwrecked persons, of members of the medical personnel or of chaplains, as defined by the present Convention, nor restrict the rights which it confers upon them.”).

<sup>22</sup> GWS art. 6 (“Wounded and sick, as well as medical personnel and chaplains, shall continue to have the benefit of such agreements as long as the Convention is applicable to them, except where express provisions to the contrary are contained in the aforesaid or in subsequent agreements, or where more favourable measures have been taken with regard to them by one or other of the Parties to the conflict.”); GWS-SEA art. 6 (“Wounded, sick and shipwrecked persons, as well as medical personnel and chaplains, shall continue to have the benefit of such agreements as long as the Convention is applicable to them, except where express provisions to the contrary are contained in the aforesaid or in subsequent agreements, or where more favourable measures have been taken with regard to them by one or other of the Parties to the conflict.”).

<sup>23</sup> GWS-SEA art. 4 (“In case of hostilities between land and naval forces of Parties to the conflict, the provisions of the present Convention shall apply only to forces on board ship.”).

<sup>24</sup> GWS COMMENTARY 65 (“It is clear, however, that the Convention will cease to apply to the wounded and sick from the moment they are cured. This does not result from the actual Article under review, but from the general structure of the Convention. While in enemy hands, the wounded and sick—who are also prisoners of war—enjoy protection under both the First and Third Conventions. Once they have regained their health, only the Third Convention, relative to the treatment of prisoners of war, applies.”).

For protected persons who have fallen into the hands of the enemy, the GWS shall apply until their final repatriation.<sup>25</sup> The GWS-Sea does not specify when it ceases to apply, but once persons who are covered by its provisions reach land, the GWS applies. Forces put ashore shall immediately become subject to the provisions of the GWS.<sup>26</sup> If dead persons are landed, the provisions of the GWS shall be applicable.<sup>27</sup> Retained personnel at sea shall be subject, on landing, to the provisions of the GWS.<sup>28</sup>

7.2.2 Non-Renunciation of Rights Secured by the GWS or GWS-Sea. Wounded, sick, and shipwrecked persons, as well as military medical and religious personnel, may in no circumstances renounce in part or in entirety the rights secured to them by the GWS or the GWS-Sea, or by special agreements, if any, referred to in Article 6 of the GWS or the GWS-Sea.<sup>29</sup> A similar provision of the GPW applies to POWs, and a similar provision of the GC applies to protected persons.<sup>30</sup>

This rule is intended to prevent States from evading their obligations by coercing enemy nationals in their power to waive their rights.<sup>31</sup> The prohibition on the non-renunciation of rights is based on a recognition that: (1) persons in the hands of the enemy are in a vulnerable position; (2) it would be difficult to establish whether they had voluntarily renounced their rights; and (3) an absolute prohibition would best serve the interests of the majority.<sup>32</sup>

---

<sup>25</sup> GWS art. 5 (“For the protected persons who have fallen into the hands of the enemy, the present Convention shall apply until their final repatriation.”). Compare § 9.3.6 (Commencement and Duration of POW Status and Treatment).

<sup>26</sup> GWS-SEA art. 4 (“Forces put ashore shall immediately become subject to the provisions of the Geneva Convention for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field of August 12, 1949.”).

<sup>27</sup> GWS-SEA art. 20 (“If dead persons are landed, the provisions of the Geneva Convention for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field of August 12, 1949, shall be applicable.”).

<sup>28</sup> GWS-SEA art. 37 (“Retained personnel shall be subject, on landing, to the provisions of the Geneva Convention for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field of August 12, 1949.”).

<sup>29</sup> GWS art. 7 (“Wounded and sick, as well as members of the medical personnel and chaplains, may in no circumstances renounce in part or in entirety the rights secured to them by the present Convention, and by the special agreements referred to in the foregoing Article, if such there be.”); GWS-SEA art. 7 (“Wounded, sick and shipwrecked persons, as well as members of the medical personnel and chaplains, may in no circumstances renounce in part or in entirety the rights secured to them by the present Convention, and by the special agreements referred to in the foregoing Article, if such there be.”).

<sup>30</sup> Refer to § 9.3.7 (Non-Renunciation of Rights Secured by the GPW); § 10.3.6 (Non-Renunciation of Rights Secured by the GC).

<sup>31</sup> GWS COMMENTARY 78-79 (“When a State offers to persons detained by it the choice of another status, such a step is usually dictated by its own interest. Experience has proved that such persons may be subjected to pressure in order to influence their choice. The pressure may vary in its intensity and be either more or less apparent; but it nevertheless constitutes a violation of their moral and sometimes even of their physical integrity. The inevitable result of such practices is to expose the protected persons to a two-fold series of what may on occasion be very serious drawbacks, first from the fact that they are under pressure, and secondly, as already indicated, from their partial or total renunciation of the protection accorded to them by the Convention.”).

<sup>32</sup> See GWS COMMENTARY 79-80 (“But in the end the Diplomatic Conference unanimously adopted the present wording—mainly for the reasons given above, that is to say, the danger of allowing the persons concerned the

This rule does not prohibit States from reassigning their own military medical and religious personnel to non-medical duties or from transferring their own personnel outside of the medical service. Similarly, this rule constitutes an obligation on States and does not directly bind individuals.<sup>33</sup>

7.2.3 Reprisals Prohibited. Reprisals against the wounded, sick, or shipwrecked persons, personnel, buildings, vessels, or equipment protected by the GWS or GWS-Sea are prohibited.<sup>34</sup>

## 7.3 RESPECT AND PROTECTION OF THE WOUNDED, SICK, AND SHIPWRECKED

Members of the armed forces and other persons mentioned in Article 13 of the GWS and the GWS-Sea, who are wounded, sick, or shipwrecked, shall be respected and protected in all circumstances.<sup>35</sup> Such persons are among the categories of persons placed *hors de combat*; making them the object of attack is strictly prohibited.<sup>36</sup>

### 7.3.1 Definitions of Wounded, Sick, and Shipwrecked.

7.3.1.1 Wounded or Sick. The meanings of “wounded” and “sick” are a matter of common sense and good faith.<sup>37</sup> They include:

---

choice of renouncing their rights, and the difficulty, and even impossibility, of proving the existence of duress or pressure. Among the reasons given in favour of the present Article 7, two points call for notice. The Conference did not overlook the fact that the absolute character of the rule drafted might entail for some persons what one delegate termed ‘unfortunate’ results. It adopted the rule, because it seemed to safeguard the interests of the majority. If provision were made for exceptions in the case of certain individuals, would that not at once open a breach which others, in much greater numbers, would, perhaps, have cause to regret?”).

<sup>33</sup> GWS COMMENTARY 85 (“One last question remains to be considered. Rights entail obligations. With the focus on the individual under Article 7, can the rules of the Conventions, or certain of them, be considered as obligations which are directly incumbent on the persons protected? There can be no doubt that certain stipulations, such as the respect due to the wounded and sick, are also incumbent on persons who can claim protection under the Convention. For example, a member of the medical personnel who, profiting by his duties, plundered the wounded or dead on the battlefield, would be liable to the punishment which the law of his country or of the enemy stipulates in of the obligation by which every contracting State is bound to repress such breaches. This question arises in connection with Article 7, which appears to take the form of an obligation on the persons protected, stating, as it does, that the latter ‘may in no circumstances renounce ...’. It was for this reason that, in their ‘Remarks and Proposals’ submitted to the Diplomatic Conference, the International Committee of the Red Cross pointed out that the general effect of the Conventions was to impose obligations on the States parties to the Conventions rather than on individuals, and proposed to draft Article 7 in that sense.”).

<sup>34</sup> Refer to § 18.18.3.2 (Reprisals Prohibited by the 1949 Geneva Conventions).

<sup>35</sup> GWS art. 12 (“Members of the armed forces and other persons mentioned in the following Article, who are wounded or sick, shall be respected and protected in all circumstances.”); GWS-SEA art. 12 (“Members of the armed forces and other persons mentioned in the following Article, who are at sea and who are wounded, sick or shipwrecked, shall be respected and protected in all circumstances, it being understood that the term ‘shipwreck’ means shipwreck from any cause and includes forced landings at sea by or from aircraft.”).

<sup>36</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

<sup>37</sup> See also GWS COMMENTARY 136 (“No attempt has ever been made in the Geneva Convention to define what is meant by a ‘wounded or sick’ combatant; nor has there ever been any definition of the degree of severity of a wound or a sickness entitling the wounded or sick combatant to respect. That is as well; for any definition would necessarily be restrictive in character, and would thereby open the door to every kind of misinterpretation and abuse.

- combatants who have been rendered unconscious or otherwise have been incapacitated because of their wounds or sickness;<sup>38</sup> and
- combatants who have surrendered as a consequence of their health.<sup>39</sup>

To merit respect and protection as “wounded” or “sick” under the law of war, combatants must abstain from hostile acts or attempts to evade capture.<sup>40</sup>

7.3.1.2 *Shipwrecked*. For the purpose of applying the protections afforded by the GWS-Sea, the term “shipwreck” means shipwreck from any cause and includes forced landings at sea by or from aircraft.<sup>41</sup>

The shipwrecked may be understood to include those in distress at sea or stranded on the coast who are also helpless.<sup>42</sup> To be considered “shipwrecked,” persons must be in need of assistance and care, and they must refrain from any hostile act.<sup>43</sup> For example, shipwrecked persons do not include combatant personnel engaged in amphibious, underwater, or airborne attacks who are proceeding ashore.<sup>44</sup>

7.3.2 Persons Entitled to Protection as Wounded, Sick, or Shipwrecked Under the GWS and GWS-Sea. The GWS and GWS-Sea apply to the wounded, sick, and shipwrecked belonging

The meaning of the words ‘wounded and sick’ is a matter of common sense and good faith. They cover combatants who have fallen by reason of a wound or sickness of any kind, or who have ceased to fight and laid down their arms as a consequence of what they themselves think about their health. It is the fact of falling or laying down of arms which constitutes the claim to protection. It is only the soldier who is himself seeking to kill who may be killed. The abandonment of all aggressiveness should put an end to aggression.”).

<sup>38</sup> Refer to § 5.9.4 (Persons Rendered Unconscious or Otherwise Incapacitated by Wounds, Sickness, or Shipwreck).

<sup>39</sup> Refer to § 5.9.3 (Persons Who Have Surrendered).

<sup>40</sup> Refer to § 5.9 (Persons Placed *Hors de Combat*).

<sup>41</sup> GWS-SEA art. 12 (“Members of the armed forces and other persons mentioned in the following Article, who are at sea and who are wounded, sick or shipwrecked, shall be respected and protected in all circumstances, it being understood that the term ‘shipwreck’ means shipwreck from any cause and includes forced landings at sea by or from aircraft.”).

<sup>42</sup> GWS-SEA COMMENTARY 89 (“Article 11 of the Brussels Convention of 1910 defines a shipwrecked person as being a person found at sea in danger of perishing. That definition, however, does not introduce the concept of need, and does not cover a shipwrecked person who manages to reach the coast or an island, or one who is not really in danger of losing his life. For our part, we prefer the following definition: ‘a person in distress at sea or stranded on the coast’.”).

<sup>43</sup> GWS-SEA COMMENTARY 89 (“Another factor is involved here: the shipwrecked persons must be in need of assistance and care, and they must naturally refrain from any hostile act.”).

<sup>44</sup> 2007 NWP 1-14M ¶8.2.3.2 (“Shipwrecked persons do not include combatant personnel engaged in amphibious, underwater, or airborne attacks who are proceeding ashore, unless they are clearly in distress and require assistance. In the latter case they may qualify as shipwrecked persons only if they cease all active combat activity and the enemy has an opportunity to recognize their condition of distress.”). Compare § 5.9.5.2 (Persons Deploying Into Combat by Parachute).

to the following categories:<sup>45</sup>

- members of the armed forces of a party to the conflict, as well as members of militias or volunteer corps forming part of such armed forces;<sup>46</sup>
- members of other militias and members of other volunteer corps meeting certain conditions;<sup>47</sup>
- members of regular armed forces who profess allegiance to a Government or an authority not recognized by the Detaining Power;<sup>48</sup>
- persons who are authorized to accompany the armed forces;<sup>49</sup>
- members of the crews of the merchant marine and the crews of civil aircraft of the parties to the conflict;<sup>50</sup> and
- participants in a *levée en masse*.<sup>51</sup>

These categories are the same categories of persons to whom the GPW affords POW status if they fall into the hands of the enemy during international armed conflict.<sup>52</sup> Thus, the

---

<sup>45</sup> GWS art. 13 (“The present Convention shall apply to the wounded and sick belonging to the following categories: (1) Members of the armed forces of a Party to the conflict, as well as members of militias or volunteer corps forming part of such armed forces. (2) Members of other militias and members of other volunteer corps, including those of organized resistance movements, belonging to a Party to the conflict and operating in or outside their own territory, even if this territory is occupied, provided that such militias or volunteer corps, including such organized resistance movements, fulfil the following conditions: a. That of being commanded by a person responsible for his subordinates; b. That of having a fixed distinctive sign recognizable at a distance; c. That of carrying arms openly; d. That of conducting their operations in accordance with the laws and customs of war. (3) Members of regular armed forces who profess allegiance to a Government or an authority not recognized by the Detaining Power. (4) Persons who accompany the armed forces without actually being members thereof, such as civil members of military aircraft crews, war correspondents, supply contractors, members of labour units or of services responsible for the welfare of the armed forces, provided that they have received authorization from the armed forces which they accompany. (5) Members of crews, including masters, pilots and apprentices of the merchant marine and the crews of civil aircraft of the Parties to the conflict, who do not benefit by more favourable treatment under any other provisions in international law. (6) Inhabitants of a non-occupied territory who, on the approach of the enemy, spontaneously take up arms to resist the invading forces, without having had time to form themselves into regular armed units, provided they carry arms openly and respect the laws and customs of war.”); GWS-SEA art. 13 (“The present Convention shall apply to the wounded, sick and shipwrecked at sea belonging to the following categories: [identical to those covered in GWS].”).

<sup>46</sup> Refer to § 4.5 (Armed Forces of a State).

<sup>47</sup> Refer to § 4.6 (Other Militia and Volunteer Corps).

<sup>48</sup> Refer to § 4.5.3 (Regular Armed Forces Who Profess Allegiance to a Government or an Authority Not Recognized by the Detaining Power).

<sup>49</sup> Refer to § 4.15 (Persons Authorized to Accompany the Armed Forces).

<sup>50</sup> Refer to § 4.16 (Crews of Merchant Marine Vessels or Civil Aircraft).

<sup>51</sup> Refer to § 4.7 (*Levée en Masse*).

<sup>52</sup> Refer to § 9.3.2 (Persons Entitled to POW Status).

GWS and GWS-Sea recognize that such persons who fall into enemy hands during international armed conflict shall be POWs, and the provisions of international law concerning POWs (such as the GPW) shall also apply to them.<sup>53</sup>

The categories of persons entitled to POW status under the GPW and protection as wounded, sick, and shipwrecked under the GWS and GWS-Sea were drafted to be the same, but the GWS or GWS-Sea do not refer specifically to Article 4 of the GPW so that the GWS and GWS-Sea could operate as stand-alone legal instruments if a State ratified either the GWS or the GWS-Sea, but not the GPW.<sup>54</sup>

Civilians who are wounded and sick are protected under the GC.<sup>55</sup>

7.3.3 Meaning of “Respect and Protection” of the Wounded, Sick, and Shipwrecked. The wounded, sick, and shipwrecked must be respected and protected at all times. This means that they should not be knowingly attacked, fired upon, or unnecessarily interfered with.<sup>56</sup>

7.3.3.1 *Incidental Harm Not Prohibited.* The respect and protection due to the wounded, sick, and shipwrecked do not prohibit incidental damage or casualties due to their proximity to military objectives or to a justifiable mistake. Combatants who are wounded, sick, or shipwrecked on the battlefield are deemed to have accepted the risk of death or further injury due to their proximity to military operations.<sup>57</sup> Although the presence of the wounded, sick, or shipwrecked on the battlefield does not serve to exempt military objectives from attack due to the risk that such personnel would be incidentally harmed, feasible precautions must be taken to

---

<sup>53</sup> GWS art. 14 (“Subject to the provisions of Article 12, the wounded and sick of a belligerent who fall into enemy hands shall be prisoners of war, and the provisions of international law concerning prisoners of war shall apply to them.”); GWS-SEA art. 16 (“Subject to the provisions of Article 12, the wounded, sick and shipwrecked of a belligerent who fall into enemy hands shall be prisoners of war, and the provisions of international law concerning prisoners of war shall apply to them.”).

<sup>54</sup> GWS COMMENTARY 144-45 (“When the Diplomatic Conference set out to define the categories of persons, to whom, on their being wounded or falling sick, the First Geneva Convention was to apply, it noted that the categories in question were precisely those which were entitled, on falling into the enemy’s hands, to be treated as prisoners of war. The Conference was thus logically led to refer to the contents of Article 4 of the Third Convention. There were two ways of doing this in practice. It was possible merely to refer to the Article in question, or alternatively to repeat its substance in the First Convention. The second of these solutions was the one adopted, in accordance with the general principle, to which the Conference adhered wherever possible, of endeavouring to make each of the four Geneva Conventions an independent diplomatic instrument. The course thus adopted also covered the possible case of a Power being a party to the First Convention without having ratified the Third.”). *Refer to* § 19.16.1 (Common Provisions in the 1949 Geneva Conventions).

<sup>55</sup> *Refer to* § 7.16 (Protection of Civilians Who Are Wounded, Sick, Infirm, or Expectant Mothers).

<sup>56</sup> *Cf.* APPENDIX TO 1985 CJCS MEMO ON API 5-6 (“Articles 10, 12, and 15 [of AP I] then extend the provisions of the First and Second Geneva Conventions of 1949 to civilian sick, wounded, and shipwrecked and to civilian medical personnel and units and associated civilian religious personnel, all of whom would be ‘respected and protected’ by the parties to the conflict, the sick and wounded to receive required care ‘to the fullest extent practicable.’ As used in the Protocol [I to the 1949 Geneva Conventions], the term ‘respected and protected’ means that an activity should not be knowingly attacked, fired upon, or unnecessarily interfered with; it does not cover accidental damage or casualties due to proximity to military objectives or to a justifiable mistake in identifying the activity.”). *Compare* § 7.8.2 (Meaning of “Respect and Protection” of Medical and Religious Personnel).

<sup>57</sup> *Compare* § 7.12.2.5 (Acceptance of the Risk From Proximity to Combat Operations).

reduce the risk of harm to the wounded, sick, or shipwrecked.<sup>58</sup>

7.3.3.2 *Search and Other Security Measures Not Prohibited.* The wounded, sick, and shipwrecked are not immune from search or other necessary security measures by the enemy.<sup>59</sup> Searches of the wounded, sick, and shipwrecked, and other security measures applied to them, should be consistent with those applicable to other POWs.<sup>60</sup>

7.3.3.3 *Capture of Wounded, Sick, and Shipwrecked Not Prohibited.* The respect and protection afforded the wounded, sick, and shipwrecked do not immunize them from detention.<sup>61</sup> When they fall into enemy hands, they are POWs.<sup>62</sup>

It is not prohibited to capture the wounded and sick, even if they are in the care of military medical units or facilities, or civilian hospitals.<sup>63</sup> However, upon taking custody, the Detaining Power is required to ensure that they continue to receive the necessary medical care.<sup>64</sup>

All warships of a belligerent party shall have the right to demand that the wounded, sick, or shipwrecked on board military hospital ships, and hospital ships belonging to relief societies or to private individuals, as well as merchant vessels, yachts, and other craft shall be surrendered, whatever their nationality, provided that the wounded and sick are in a fit state to be moved and that the warship can provide adequate facilities for necessary medical treatment.<sup>65</sup>

In cases of capture at sea, the captor may decide, according to circumstances, whether it is expedient to hold the wounded, sick, or shipwrecked, or to convey them to a port in the captor's own country, to a neutral port, or even to a port in enemy territory. In the last case,

---

<sup>58</sup> Refer to § 5.10.1.2 (Proportionality in Conducting Attacks and Protected Military Personnel and Facilities).

<sup>59</sup> Refer to § 7.10.1.2 (Search Not Prohibited).

<sup>60</sup> Refer to § 9.6 (Security Measures With Respect to POWs).

<sup>61</sup> Refer to § 7.9 (Captured Medical and Religious Personnel).

<sup>62</sup> Refer to § 7.3.2 (Persons Entitled to Protection as Wounded, Sick, or Shipwrecked Under the GWS and GWS-Sea).

<sup>63</sup> For example, J.C. Massop, *Hospital Ships in the Second World War*, 24 BRITISH YEAR BOOK OF INTERNATIONAL LAW 398, 405 (1947) ("In 1944 and 1945 the Germans decided to pass the hospital ships Tübingen and Gradisca through the Allied patrol lines in the Adriatic to embark sick and wounded in Salonica. In accordance with the requirements of the Convention the ships were allowed to pass on the outward voyage, but they were diverted to Allied ports on the homeward trip and some 4,000 prisoners were made: a high percentage were only slightly wounded and the great majority were considered likely to be fit for active service within twelve months. This action brought forth no protest from the German Government, who considered it justified by the terms of the Convention.").

<sup>64</sup> Refer to § 7.5 (Humane Treatment and Care of Enemy Military Wounded, Sick, and Shipwrecked in the Power of a Party to the Conflict).

<sup>65</sup> GWS-SEA art. 14 ("All warships of a belligerent Party shall have the right to demand that the wounded, sick or shipwrecked on board military hospital ships, and hospital ships belonging to relief societies or to private individuals, as well as merchant vessels, yachts and other craft shall be surrendered, whatever their nationality, provided that the wounded and sick are in a fit state to be moved and that the warship can provide adequate facilities for necessary medical treatment.").

POWs thus returned to their home country may not serve for the duration of the war.<sup>66</sup>

7.3.3.4 Prohibition Against Use in Booby-Traps. Booby trapping the wounded or sick is expressly prohibited.<sup>67</sup>

#### 7.4 SEARCH, COLLECTION, AND AFFIRMATIVE PROTECTION OF THE WOUNDED, SICK, SHIPWRECKED, AND DEAD

At all times, and particularly after an engagement, parties to the conflict shall, without delay, take all possible measures to search for and collect the wounded and sick on land, to protect them against pillage and ill-treatment, to ensure their adequate care, and to search for the dead and prevent their being despoiled.<sup>68</sup>

The GC provides for the obligation to search for, collect, protect, and care for, civilians who are wounded, sick, shipwrecked, and dead.<sup>69</sup>

7.4.1 GWS-Sea Obligation Regarding the Search, Collection, and Affirmative Protection of the Wounded, Sick, Shipwrecked, and Dead. After each engagement, parties to the conflict shall, without delay, take all possible measures to search for and collect the wounded, sick, and shipwrecked at sea, to protect them against pillage and ill-treatment, to ensure their adequate care, and to search for the dead and prevent their being despoiled.<sup>70</sup>

The obligation in the GWS-Sea to search for, and collect, certain persons is written differently than the comparable obligation in the GWS. Instead of a general obligation to take measures “at all times,” in Article 15 of the GWS, in Article 18 of the GWS-Sea, the obligation to search for and collect the wounded, sick, and shipwrecked applies only “after each engagement.”

7.4.2 Affirmative Measures to Protect Against Pillage and Ill-Treatment. If practicable, affirmative measures (including, in some cases, the use of force) must be taken to protect the wounded, sick, and shipwrecked, from pillage or ill-treatment by any person, whether military or

---

<sup>66</sup> GWS-SEA art. 16 (“The captor may decide, according to circumstances, whether it is expedient to hold them, or to convey them to a port in the captor’s own country, to a neutral port or even to a port in enemy territory. In the last case, prisoners of war thus returned to their home country may not serve for the duration of the war.”).

<sup>67</sup> Refer to § 6.12.4.9 (Certain Types of Prohibited Booby-Traps and Other Devices).

<sup>68</sup> GWS art. 15 (“At all times, and particularly after an engagement, Parties to the conflict shall, without delay, take all possible measures to search for and collect the wounded and sick, to protect them against pillage and ill-treatment, to ensure their adequate care, and to search for the dead and prevent their being despoiled.”).

<sup>69</sup> Refer to § 7.16.1 (Obligation to Facilitate Efforts to Search for Civilians Who Are Wounded, Killed, Shipwrecked, or Exposed to Grave Danger).

<sup>70</sup> GWS-SEA art. 18 (“After each engagement, Parties to the conflict shall, without delay, take all possible measures to search for and collect the shipwrecked, wounded and sick, to protect them against pillage and ill-treatment, to ensure their adequate care, and to search for the dead and prevent their being despoiled.”).

civilian, seeking to harm them.<sup>71</sup>

7.4.3 Range of Measures to Search for, Collect, and Protect the Wounded, Sick, and Shipwrecked. A range of measures may be taken to fulfill the obligation to search for, collect, and protect the wounded, sick, and shipwrecked. Military forces may directly engage in these activities.<sup>72</sup>

In addition to searching for, collecting, and protecting the wounded, sick, and shipwrecked directly, commanders may take other measures to fulfill this obligation. For example, commanders may request the help of civilian volunteers.<sup>73</sup> As another example, if a warship is unable to collect the shipwrecked after an engagement, it might be able to alert a hospital ship in the vicinity or provide the shipwrecked with a lifeboat.<sup>74</sup>

7.4.3.1 Armistices and Local Arrangements to Permit the Removal, Exchange, or Transport of the Wounded. Whenever circumstances permit, an armistice or a suspension of fire shall be arranged, or local arrangements made, to permit the removal, exchange, and transport of the wounded left on the battlefield.<sup>75</sup> Such arrangements may take the form of or include a protected or neutral zone.<sup>76</sup>

Likewise, local arrangements may be concluded between parties to the conflict for the removal or exchange of wounded and sick by land or sea from a besieged or encircled area, or for the passage of medical and religious personnel and equipment on their way to that area.<sup>77</sup> For example, parties to a conflict may agree to a temporary cease-fire to permit evacuation of the

---

<sup>71</sup> GWS COMMENTARY 152 (“In other words, the wounded and the dead must be guarded and, if necessary, defended against all parties, whether military or civilian, who may seek to lay hands on them. Combatants, like medical personnel, are called upon to prevent this, going, if necessary, to the length of using their arms for the purpose.”).

<sup>72</sup> For example, George W. Bush, *Remarks to the Community at Camp Lejeune, North Carolina*, Apr. 3, 2003, 2003-I PUBLIC PAPERS OF THE PRESIDENTS 404, 406 (“American forces and our allies are treating innocent civilians with kindness and showing proper respect to soldiers who surrender. Many Americans have seen the picture of Marine Lance Corporal Marcco Ware carrying a wounded Iraqi soldier on his shoulders to safety for medical treatment.”).

<sup>73</sup> Refer to § 7.4.5.1 (Requests for Civilian Volunteers to Collect and Care for the Wounded, Sick, and Shipwrecked).

<sup>74</sup> GWS-SEA COMMENTARY 131 (“The ‘possible measures’ which may be taken by the belligerents to collect the shipwrecked are, on the other hand, many and varied and in nearly all cases they should enable the purpose of the present paragraph to be achieved. Thus, a warship which was unable to collect the victims of an engagement should, for instance, alert a hospital ship if there is one in the vicinity, or even a ship of any kind better equipped than itself; otherwise, it should resort to the possibility provided in Article 21, and appeal to neutral vessels. It can also alert the nearest coastal authorities, or request assistance from the air forces. Generally speaking, if a warship is forced to leave shipwrecked persons to their fate, it will endeavour to provide them with the means to enable them to await rescue or reach the coast: life-boats, food, water, a compass, charts, etc.”).

<sup>75</sup> GWS art. 15 (“Whenever circumstances permit, an armistice or a suspension of fire shall be arranged, or local arrangements made, to permit the removal, exchange and transport of the wounded left on the battlefield.”).

<sup>76</sup> Refer to § 5.14.3 (Establishing Areas Where Civilians or the Wounded and Sick Are Protected).

<sup>77</sup> Refer to § 5.19.2 (Removal and Passage of Certain Personnel – Vulnerable Civilians, Diplomatic and Consular Personnel, the Wounded and Sick, and Medical Personnel).

wounded from the fighting area.<sup>78</sup>

7.4.4 Practical Limitations on the Obligation to Search for, Collect, and Take Measures to Protect the Wounded, Sick, and Shipwrecked. The obligations to search for, collect, and take affirmative steps to protect the wounded, sick, and shipwrecked are subject to practical limitations.

Military commanders are to judge what is possible, and to what extent they can commit their personnel to these duties.<sup>79</sup> In some cases, commanders might designate specific units or personnel to engage in such missions.

7.4.4.1 Risk of Harm. For example, personnel performing rescue and recovery missions need not place their lives at undue risk in an effort to search for, collect, or protect the wounded, sick, shipwrecked, or dead (*e.g.*, recovery of a body from a minefield, or entry into a disabled enemy armored vehicle that might contain unexploded ordnance or other hazards). Similarly, a commander of a naval ship need not increase the risk to his or her vessel from threats (*e.g.*, by slowing his or her transit, or by placing his or her ship dead in the water) in order to recover shipwrecked enemy military personnel from a sunken vessel or crashed aircraft.<sup>80</sup>

7.4.4.2 Military Necessity. Similarly, the requirements of ongoing military operations may render rescue efforts impractical. For example, during a fast-tempo operation (offensive or defensive), it might not be possible to devote resources to the search and collection of the wounded, sick, and shipwrecked. In other cases, the rescue of enemy personnel may exceed the abilities of the force and its medical personnel. For example, a small patrol operating behind enemy lines or a submarine may not have the capability to receive and care for large numbers of injured personnel.<sup>81</sup>

---

<sup>78</sup> For example, MARTIN MIDDLEBROOK, ARNHEM 1944: THE AIRBORNE BATTLE, 17-26 SEPTEMBER 383 (1994) (“After consulting Major-General Urquhart, Colonel Warrack decided to ask the Germans if they would allow the wounded to be evacuated from the fighting area. He was driven with the Dutch officer, Commander Woters, who would act as interpreter, and eventually met General Bittrich, who agreed to a truce and an evacuation. ... The evacuation commenced that afternoon, but only in the Main Dressing Stations. ... All went well, much credit being given to the Germans for their humane treatment of the wounded.”).

<sup>79</sup> GWS COMMENTARY 151 (“But there are times when military operations will make the obligation to search for the fallen impracticable. There will be cases which exceed the limits of what the medical personnel can be expected to do, however great their courage and devotion. It was not possible, therefore, to make the obligation absolute. It was accordingly provided that ‘Parties to the conflict shall, without delay, take all possible measures...’ The obligation to act without delay is strict; but the action to be taken is limited to what is possible, and it is left to the military command to judge what is possible, and to decide to what extent it can commit its medical personnel.”) (ellipsis in original).

<sup>80</sup> For example, W.T. MALLISON, JR., STUDIES IN THE LAW OF NAVAL WARFARE: SUBMARINES IN GENERAL AND LIMITED WARS 136 (1968) (“It should be mentioned also that there were apparently numerous instances when it was not feasible for surface warships to make rescue attempts even though they had adequate passenger facilities. The British heavy cruiser *Devonshire*, operating in the South Atlantic, sank the German raider *Atlantis* on November 22, 1941 and the German supply ship *Python* on November 30, 1941. In neither case was rescue attempted since it was thought that U-boats might be in the vicinity.”).

<sup>81</sup> See also GWS-SEA COMMENTARY 131 (“Of course, one cannot always require certain fighting ships, such as fast torpedo-boats and submarines, to collect in all circumstances the crews of ships which they have sunk, for they will

#### 7.4.5 Collection and Care of the Wounded, Sick, and Shipwrecked by Civilians.

7.4.5.1 Requests for Civilian Volunteers to Collect and Care for the Wounded, Sick, and Shipwrecked. The military authorities may appeal to the charity of the inhabitants voluntarily to collect and care for, under their direction, the wounded, sick, and shipwrecked, granting persons who have responded to this appeal the necessary protection and facilities.<sup>82</sup> Should the adverse party take or retake control of the area, that party shall likewise grant these persons the same protection and the same facilities.<sup>83</sup>

7.4.5.2 Spontaneous Collection and Care for the Wounded, Sick, and Shipwrecked by Inhabitants and Relief Societies. The military authorities shall permit the inhabitants and relief societies, even in invaded or occupied areas, spontaneously to collect and care for wounded or sick of whatever nationality.<sup>84</sup> The civilian population shall respect these wounded and sick, and in particular abstain from offering them violence.<sup>85</sup>

7.4.5.3 Prohibition on Molestation or Conviction for Nursing the Wounded or Sick. No one shall ever be molested or convicted for having nursed the wounded or sick.<sup>86</sup> For example, persons should not be prosecuted for offenses of aiding the enemy because they tended to wounded members of enemy military forces.

7.4.6 Collection and Care of the Wounded, Sick, and Shipwrecked by Neutral Vessels. The parties to the conflict may appeal to the charity of commanders of neutral merchant vessels, yachts, or other craft, to take on board and care for wounded, sick, or shipwrecked persons, and to collect the dead.<sup>87</sup>

Vessels of any kind responding to this appeal, and those having of their own accord collected wounded, sick, or shipwrecked persons, shall enjoy special protection and facilities to

---

often have inadequate equipment and insufficient accommodation. Submarines stay at sea for a long time and sometimes they neither wish nor are able to put in at a port where they could land the persons whom they have collected. Generally speaking, one cannot lay down an absolute rule that the commander of a warship must engage in rescue operations if, by doing so, he would expose his vessel to attack.”). *Refer to § 13.7.2 (Different Application of Law of War Rules in the Context of Submarine Warfare).*

<sup>82</sup> GWS art. 18 (“The military authorities may appeal to the charity of the inhabitants voluntarily to collect and care for, under their direction, the wounded and sick, granting persons who have responded to this appeal the necessary protection and facilities.”).

<sup>83</sup> GWS art. 18 (“Should the adverse Party take or retake control of the area, he shall likewise grant these persons the same protection and the same facilities.”).

<sup>84</sup> GWS art. 18 (“The military authorities shall permit the inhabitants and relief societies, even in invaded or occupied areas, spontaneously to collect and care for wounded or sick of whatever nationality.”).

<sup>85</sup> GWS art. 18 (“The civilian population shall respect these wounded and sick, and in particular abstain from offering them violence.”).

<sup>86</sup> GWS art. 18 (“No one shall ever be molested or convicted for having nursed the wounded or sick.”).

<sup>87</sup> GWS-SEA art. 21 (“The Parties to the conflict may appeal to the charity of commanders of neutral merchant vessels, yachts or other craft, to take on board and care for wounded, sick or shipwrecked persons, and to collect the dead.”).

carry out such assistance.<sup>88</sup>

They may, in no case, be captured on account of any such transport; but, in the absence of any promise to the contrary, they shall remain liable to capture for any violations of neutrality they may have committed.<sup>89</sup>

#### 7.5 HUMANE TREATMENT AND CARE OF ENEMY MILITARY WOUNDED, SICK, AND SHIPWRECKED IN THE POWER OF A PARTY TO THE CONFLICT

The wounded, sick, and shipwrecked who are protected by the GWS and GWS-Sea shall be treated humanely and cared for by the party to the conflict in whose power they may be, without any adverse distinction founded on sex, race, nationality, religion, political opinions, or any other similar criteria.<sup>90</sup> Any attempts upon their lives, or violence to their persons, shall be strictly prohibited; in particular, they shall not be murdered or exterminated or subjected to torture or to biological experiments; they shall not willfully be left without medical assistance and care, nor shall conditions exposing them to contagion or infection be created.<sup>91</sup>

7.5.1 Humane Treatment of the Wounded, Sick, and Shipwrecked Without Adverse Distinction. The wounded, sick, and shipwrecked who are protected by the GWS or GWS-Sea who are in the power of a party to the conflict are also POWs. Thus, their humane treatment is required by the GPW as well.<sup>92</sup>

For example, the prohibition on subjecting the wounded, sick, or shipwrecked to biological experiments is also reflected in the GPW.<sup>93</sup> Similarly, the wounded, sick, and shipwrecked who are women shall be treated with all consideration due to their sex.<sup>94</sup>

7.5.2 Medical Care of the Wounded and Sick. Below are general rules for the medical care of the wounded and sick, including both those on the battlefield and those who are POWs.

---

<sup>88</sup> GWS-SEA art. 21 (“Vessels of any kind responding to this appeal, and those having of their own accord collected wounded, sick or shipwrecked persons, shall enjoy special protection and facilities to carry out such assistance.”).

<sup>89</sup> GWS-SEA art. 21 (“They may, in no case, be captured on account of any such transport; but, in the absence of any promise to the contrary, they shall remain liable to capture for any violations of neutrality they may have committed.”).

<sup>90</sup> GWS art. 12 (“They shall be treated humanely and cared for by the Party to the conflict in whose power they may be, without any adverse distinction founded on sex, race, nationality, religion, political opinions, or any other similar criteria.”); GWS-SEA art. 12 (“Such persons shall be treated humanely and cared for by the Parties to the conflict in whose power they may be, without any adverse distinction founded on sex, race, nationality, religion, political opinions, or any other similar criteria.”).

<sup>91</sup> GWS art. 12 (“Any attempts upon their lives, or violence to their persons, shall be strictly prohibited; in particular, they shall not be murdered or exterminated, subjected to torture or to biological experiments; they shall not willfully be left without medical assistance and care, nor shall conditions exposing them to contagion or infection be created.”); GWS-SEA art. 12 (same).

<sup>92</sup> Refer to § 9.5 (Humane Treatment and Basic Protections for POWs).

<sup>93</sup> Refer to § 9.5.2.4 (No Physical Mutilation or Medical, Scientific, or Biological Experiments).

<sup>94</sup> GWS art. 12 (“Women shall be treated with all consideration due to their sex.”); GWS-SEA art. 12 (same). Refer to § 9.5.6 (Due Regard for Women POWs).

POWs shall be provided necessary medical attention during evacuation, although they may be temporarily kept back in a danger zone if they would face greater risks by being evacuated than by remaining where they are.<sup>95</sup> Additional rules provide for the medical attention and care for POWs who have been interned in POW camps.<sup>96</sup>

*7.5.2.1 Prohibitions Against Willful Medical Neglect or Deliberate Endangerment.* The wounded, sick, and shipwrecked shall not willfully be left without medical assistance and care. In addition, conditions exposing them to contagion or infection shall not be willfully created.

*7.5.2.2 Affirmative Obligation to Provide Adequate Care.* In addition to the prohibitions against willful neglect or deliberate endangerment, the parties to a conflict shall take all possible measures to ensure the adequate care of the wounded, sick, and shipwrecked.<sup>97</sup> The obligation to care for enemy combatants who are wounded and sick is a longstanding law of war obligation.<sup>98</sup>

The obligation to provide medical care incorporates practical considerations; whether resources may be committed to medical care may depend on military necessity, such as the requirements of the mission or the immediate tactical situation.<sup>99</sup>

*7.5.2.3 Priority of Treatment Based on Medical Urgency.* Only urgent medical reasons will authorize priority in the order of treatment to be administered.<sup>100</sup>

For example, in addressing an influx of wounded that include both friends and enemies, doctors should attend to those patients for whom delay might be fatal or at any rate prejudicial, proceeding afterwards to those whose condition is not such as to necessitate immediate attention.<sup>101</sup>

---

<sup>95</sup> Refer to § 9.9.2 (Conditions of Evacuation); § 9.9.1 (Delay in Evacuation for Medical Reasons).

<sup>96</sup> Refer to § 9.14 (Medical Attention for Interned POWs).

<sup>97</sup> Refer to § 7.4 (Search, Collection, and Affirmative Protection of the Wounded, Sick, Shipwrecked, and Dead).

<sup>98</sup> See, e.g., LIEBER CODE art. 79 (“Every captured wounded enemy shall be medically treated, according to the ability of the medical staff.”); Convention for the Amelioration of the Wounded in Armies in the Field, art. 6, Aug. 22, 1864, 22 STAT. 940, 944 (“Wounded or sick soldiers shall be entertained and taken care of, to whatever nation they may belong.”).

<sup>99</sup> For example, OFFICE OF THE SURGEON GENERAL OF THE ARMY, EMERGENCY WAR SURGERY 30 (2014) (“The decision to withhold care from a casualty who in another less overwhelming situation might be salvaged is difficult for any physician, nurse, or medic. Decisions of this nature are unusual, even in mass casualty situations. Nonetheless, the overarching goal of providing the greatest good to the greatest number must guide these difficult decisions. Commitment of resources should be decided first based on the mission and immediate tactical situation and then by medical necessity, irrespective of a casualty’s national or combatant status.”).

<sup>100</sup> GWS art. 12 (“Only urgent medical reasons will authorize priority in the order of treatment to be administered.”); GWS-SEA art. 12 (same).

<sup>101</sup> GWS COMMENTARY 140 (“Let us suppose that the Medical Service in some place is overwhelmed by an influx of wounded, both friends and enemies. The doctors, in such a case, will attend first to those patients for whom delay might be fatal or at any rate prejudicial, proceeding afterwards to those whose condition is not such as to necessitate immediate attention.”).

7.5.2.4 *Compulsory Medical Treatment*. The wounded, sick, and shipwrecked, and other POWs, may be ordered to receive medical treatment or care that is warranted by their medical condition.

Because POWs are subject to the laws, regulations, and orders in force in the armed forces of the Detaining Power, POWs may be ordered to receive medical treatment just as Detaining Power military personnel may be ordered to do so.<sup>102</sup> However, the wounded, sick, and shipwrecked, and other POWs, may not be subjected to medical or biological experiments, even if Detaining Power military personnel could be ordered to be subjected to such procedures.<sup>103</sup>

The Detaining Power's authority to order POWs to receive medical treatment also derives from the Detaining Power's duty to ensure the well-being of POWs.<sup>104</sup> For example, the Detaining Power's duty to take all sanitary measures necessary to prevent epidemics in the POW camp may require the Detaining Power to order POWs to receive certain measures, such as vaccinations.<sup>105</sup>

AP I, Article 11, paragraph 5 provides for a "right to refuse any surgical operation."<sup>106</sup> However, this rule could operate in an inhumane manner in some circumstances, and the United States has not accepted it.<sup>107</sup>

7.5.2.5 *Medical Attention Free of Charge*. The Power detaining POWs shall be bound to provide free of charge for the medical attention required by POWs' state of health.<sup>108</sup>

7.5.3 *Abandonment of the Wounded or Sick on the Battlefield*. In an extreme case, military forces in an international armed conflict may be compelled to abandon wounded or sick

---

<sup>102</sup> Refer to § 9.26.1 (POWs Subject to the Laws, Regulations, and Orders in Force in the Armed Forces of the Detaining Power).

<sup>103</sup> Refer to § 9.5.2.4 (No Physical Mutilation or Medical, Scientific, or Biological Experiments).

<sup>104</sup> For example, 1958 UK MANUAL ¶154 note 3 ("Again, if prisoners in British military custody resort to a hunger strike, it would seem that they may under medical direction be forcibly fed if their lives are in danger. This is permissible by English law and may in certain cases be a duty. If British military prisoners are allowed to die from the effects of a hunger strike, the camp commandant and medical officer are liable to be prosecuted for manslaughter, *Leigh v. Gladstone and Others*, 26 T.L.R. 139.").

<sup>105</sup> Refer to § 9.11.5.1 (Necessary Sanitary Measures).

<sup>106</sup> AP I art. 11(5) ("The persons described in paragraph 1 have the right to refuse any surgical operation. In case of refusal, medical personnel shall endeavour to obtain a written statement to that effect, signed or acknowledged by the patient.").

<sup>107</sup> APPENDIX TO 1985 CJCS MEMO ON AP I 8 ("The provision [in AP I art. 11] specifying an absolute right to refuse any surgery could, however, operate in an inhumane manner in some circumstances. A detainee might, for example, refuse surgery necessary to save his own life in order to make a political point or because of ignorance or mental incompetence.").

<sup>108</sup> GPW art. 15 ("The Power detaining prisoners of war shall be bound to provide free of charge for their maintenance and for the medical attention required by their state of health.").

to the enemy.<sup>109</sup> The party to the conflict that is compelled to abandon wounded or sick to the enemy shall, as far as military considerations permit, leave with them a part of its medical personnel and material to assist in their care.<sup>110</sup>

Unlike the obligations to provide humane treatment for the wounded and sick who are in custody, the obligation to provide medical personnel and material for the care of abandoned wounded or sick is a strong recommendation, rather than an absolute requirement.<sup>111</sup>

The party that encounters and captures the wounded and sick who have been abandoned by another party to the conflict is not relieved of its duties because the party that has abandoned wounded and sick personnel has not left medical personnel and material to assist in the care of those wounded and sick.<sup>112</sup> On the other hand, the party that encounters and captures the wounded and sick also is not relieved of its duties when the party that has abandoned wounded and sick personnel has left medical personnel and material to assist in the care of those wounded and sick.<sup>113</sup>

In addition to providing for the medical care of wounded and sick abandoned to the enemy, other feasible precautions should be taken to ensure their safety.<sup>114</sup>

#### 7.6 ACCOUNTABILITY INFORMATION FROM THE ENEMY MILITARY WOUNDED, SICK, SHIPWRECKED, AND DEAD

The GWS and GWS-Sea impose certain obligations to gather and report information in order to gain as full an accounting as possible for captured enemy personnel and enemy dead recovered from the battlefield. These obligations complement similar obligations in the GPW to

---

<sup>109</sup> *For example*, STEPHEN BADSEY, ARNHEM 1944: OPERATION 'MARKET GARDEN' 85 (1993) ("At Arnhem itself, 10,300 men of 1st British Airborne Division and 1st Polish Parachute Brigade landed from air. Some 2,587 men escaped across the Rhine in Operation 'Berlin' (1,741 of 1st British Airborne, 422 of the Gilder Pilot Regiment, 160 Poles and 75 from the Dorsetshire Regiment), and 240 more returned later with the aid of the PAN. About 1,600 wounded were left behind in the Oosterbeek pocket, together with 204 medical officers and chaplains who volunteered to stay. The Germans claimed 6,450 prisoners taken, wounded or not, and 1st British Airborne therefore lost about 1,300 killed.").

<sup>110</sup> GWS art. 12 ("The Party to the conflict which is compelled to abandon wounded or sick to the enemy shall, as far as military considerations permit, leave with them a part of its medical personnel and material to assist in their care.").

<sup>111</sup> GWS COMMENTARY 142 ("If this provision [paragraph 5 of Article 12 of the GWS] cannot, therefore, be considered imperative, it represents none the less a clear moral obligation which the responsible authority cannot evade except in cases of urgent necessity. ... Paragraph 2 [of Article 12 of the GWS] imposes an absolute obligation to which there are no exceptions; paragraph 5 is a recommendation, but an urgent and forcible one.").

<sup>112</sup> GWS COMMENTARY 142 ("It should, moreover, be noted that this provision is in no way bound up with the obligation, imposed upon the Parties to the conflict by paragraph 2, to care for the wounded. A belligerent can never refuse to care for enemy wounded he has picked up, on the pretext that his adversary has abandoned them without medical personnel and equipment. On the contrary, he is bound to give to them the same care as he gives the wounded of his own army.").

<sup>113</sup> *Refer to* § 7.9.6 (No Relief of Obligations of the Detaining Power).

<sup>114</sup> *Compare* § 9.9.3.2 (Feasible Precautions to Ensure Safety).

maintain accountability for POWs.<sup>115</sup>

7.6.1 Recording Identifying Information. Parties to the conflict shall record as soon as possible, in respect of each wounded, sick, shipwrecked, or dead person of the adverse party falling into their hands, any particulars that may assist in his or her identification.<sup>116</sup> These records should, if possible, include:<sup>117</sup>

- designation of the Power on which the person depends;
- surname (*i.e.*, last name) and first name or names (*i.e.*, first and middle names);
- army, regimental, personal, or serial number;
- date of birth;
- any other particulars shown on the person's identity card or disc;<sup>118</sup>
- date and place of capture or death; and
- particulars concerning wounds or illness, or cause of death.

The GPW requires the collection of a similar set of information for all POWs.<sup>119</sup>

In order to implement these obligations, as part of their initial processing, the recovering or capturing unit should endeavor to obtain this information from each living POW.<sup>120</sup> POWs who, owing to their physical or mental condition, are unable to state their identity, shall be handed over to the medical service.<sup>121</sup>

Other sources of information should be used to establish the identity of the wounded, sick, shipwrecked, and dead. For example, items associated with the person (*e.g.*, personal effects, a life jacket bearing the name of the ship on which that person served) should be examined, and other members of the person's unit should be questioned.

---

<sup>115</sup> Refer to § 9.31 (National Accounting of the Detention of POWs).

<sup>116</sup> GWS art. 16 ("Parties to the conflict shall record as soon as possible, in respect of each wounded, sick or dead person of the adverse Party falling into their hands, any particulars which may assist in his identification."); GWS-SEA art. 19 ("The Parties to the conflict shall record as soon as possible, in respect of each shipwrecked, wounded, sick or dead person of the adverse Party falling into their hands, any particulars which may assist in his identification.").

<sup>117</sup> GWS art. 16 ("These records should if possible include: (a) designation of the Power on which he depends; (b) army, regimental, personal or serial number; (c) surname; (d) first name or names; (e) date of birth; (f) any other particulars shown on his identity card or disc; (g) date and place of capture or death; (h) particulars concerning wounds or illness, or cause of death."); GWS-SEA art. 19 (same).

<sup>118</sup> Refer to § 9.4.3 (Issue of Identification Cards to Persons Liable to Become POWs).

<sup>119</sup> Refer to § 9.31.1 (Accountability Information That the Detaining Power Should Collect).

<sup>120</sup> Refer to § 9.8.4 (Accountability Information That POWs Are Bound to Provide Upon Questioning).

<sup>121</sup> Refer to § 9.8.4.1 (POWs Unable to State Their Identity).

An examination of a deceased person's body may also facilitate identification by gathering information that can be used to identify the person later (*e.g.*, measurements and description of the body and its physical features, examination of the teeth, fingerprints, photograph, DNA samples).<sup>122</sup> This examination should be conducted before burial or cremation.<sup>123</sup>

7.6.2 Forwarding Identifying Information. As soon as possible, the above mentioned identifying information shall be forwarded to the National POW Information Bureau described in Article 122 of the GPW, which shall transmit this information to the Power on which these persons depend through the intermediary of the Protecting Power and of the Central POW Agency.<sup>124</sup>

7.6.2.1 Military Necessity to Delay Reporting. As the phrase "as soon as possible" reflects, reporting may be delayed due to practical considerations, including security risks.<sup>125</sup>

7.6.3 U.S. Practice in Reporting Through the ICRC Central Tracing Agency. In U.S. practice, information has been provided to the Theater Detainee Reporting Center, which in turn processes it and reports it to the National Detainee Reporting Center, which has then transmitted it to the ICRC Central Tracing Agency, acting as the Central POW Information Agency.<sup>126</sup>

## 7.7 TREATMENT AND HANDLING OF ENEMY MILITARY DEAD

The GWS and GWS-Sea address the treatment and handling of enemy dead who have been collected from the battlefield.<sup>127</sup> However, the provisions of the GWS and GWS-Sea relating to the treatment and handling of enemy dead may also be interpreted to include wounded and sick combatants who have died shortly after having been collected.<sup>128</sup> The GPW provides

---

<sup>122</sup> See GWS COMMENTARY 177 ("In the absence of papers recourse must be had to other methods which will make it possible for the adverse Party itself to establish his identity, *e.g.* measurements and description of the body and its physical features, examination of the teeth, fingerprints, photograph, etc.").

<sup>123</sup> Refer to § 7.7.4.1 (Examination of Bodies Before Burial or Cremation).

<sup>124</sup> GWS art. 16 ("As soon as possible the above mentioned information shall be forwarded to the Information Bureau described in Article 122 of the Geneva Convention relative to the Treatment of Prisoners of War of August 12, 1949, which shall transmit this information to the Power on which these persons depend through the intermediary of the Protecting Power and of the Central Prisoners of War Agency."); GWS-SEA art. 19 (same).

<sup>125</sup> See, *e.g.*, GWS-SEA COMMENTARY 138 ("A warship always has good reasons for communicating by radio as little as possible, and one cannot therefore expect it to transmit by that means sundry information about the shipwrecked or sick whom it may have picked up. It will delay doing so until it has arrived at a port in its home country, and the authorities on land will then have to notify the enemy.").

<sup>126</sup> Refer to § 9.31.4 (U.S. Practice in Reporting to the ICRC Central Tracing Agency).

<sup>127</sup> GWS COMMENTARY 179 (noting that "the First Convention was essentially concerned with the dead picked up on the battlefield").

<sup>128</sup> GWS COMMENTARY 176 ("In the first place the present Article (Article 17) is essentially concerned with the dead picked up by the enemy on the battlefield, that is to say, with the mortal remains of combatants who have never for one moment been prisoners of war. Again, combatants who have died shortly after having been picked up wounded or sick, will have succumbed to the wounds or sickness which brought them under the protection of the

other rules relating to POWs who have died while in detention.<sup>129</sup> Thus, certain enemy dead may be addressed by both the GPW and GWS.

Although the provisions of the GWS and GWS-Sea are not applicable to civilian dead, in many cases it may be appropriate and practical to apply those rules by analogy. The GC provides rules relating to protected persons who have died while interned.<sup>130</sup>

**7.7.1 Treatment of Enemy Military Dead.** Subject to the tactical situation and sanitation requirements, the handling and burial of enemy military dead must be discharged with the same respect as would be afforded to, or expected for, friendly military dead. The respectful treatment of the dead is one of the oldest rules in the law of war.<sup>131</sup>

**7.7.1.1 No Disrespectful or Degrading Treatment of the Dead.** Enemy military dead must be protected from disrespectful or degrading acts.<sup>132</sup> For example, mutilation or cannibalism of dead bodies is prohibited.<sup>133</sup> In addition, posing with bodies for photographs or

---

First Convention, and it is therefore only natural that they should remain subject to the provisions of that Convention.”).

<sup>129</sup> Refer to § 9.34 (Death of POWs).

<sup>130</sup> Refer to § 10.34 (Death of Internees).

<sup>131</sup> See, e.g. GROTIUS, LAW OF WAR & PEACE 455-56 (2.19.3.1) (“Consequently, all agree that even public enemies are entitled to burial. Appian calls this ‘a common right of wars’; Philo, ‘the common interchange in war’. Says Tacitus: ‘Not even enemies begrudge burial.’ Dio Chrysostom says that this right is observed even ‘among enemies’; he adds, ‘even though hatred has reached the utmost limit.’ In treating of the same matter, Lucan says that the laws and customs of humanity must be observed in the case of an enemy. The same Sopater, who was cited above, asks: ‘What war has deprived the human race of this last honour? What enmity has extended the memory of evil deeds to such a point that it would dare to violate this law?’ And Dio Chrysostom, whom I have just cited, in his oration On the Law, says: ‘For this reason no one judges enemies after death, and wrath and insult are not extended to their bodies.’”).

<sup>132</sup> For example, Trial of Max Schmid, *Outline of the Proceedings*, XIII U.N. LAW REPORTS 151 (U.S. General Military Government Court, Dachau, Germany, May 19, 1947) (“The third charge against the accused was that he did ‘wilfully, deliberately and wrongfully encourage, aid, abet and participate in the maltreatment of a dead unknown member of the United States Army.’ ... The evidence showed that shortly before the time of the allied invasion of France the body of a dead U.S. airman was brought to his dispensary by a detail whose duty it was to collect dead bodies, and to remove them from the battlefield. The accused severed the head from the body, boiled it and removed the skin and flesh and bleached the skull which he kept on his desk for several months. The prosecution alleged that he eventually sent it to his wife in Germany as a souvenir.”).

<sup>133</sup> For example, H. Wayne Elliott, *The Third Priority: The Battlefield Dead*, ARMY LAWYER 3, 14 (Jul. 1996) (“Reports of the mutilation of bodies, particularly cutting the ears off dead enemy soldiers, also circulated. One such incident was filmed and shown on the CBS Evening News in 1967. In another incident which occurred in 1967, an Army sergeant was court-martialed for ‘conduct to the prejudice of good order and discipline,’ a violation of Article 134 of the Uniform Code of Military Justice (UCMJ). The sergeant was convicted of decapitating two enemy corpses and posing for a photograph with the heads. The disciplinary or judicial action taken in these incidents is proof that such conduct was not sanctioned by the command in Vietnam. In October 1967, General Westmoreland, United States Commander in Vietnam, described the practice of cutting ears and fingers off the dead as ‘subhuman’ and ‘contrary to all policy and below the minimum standards of human decency.’”); Trial of Max Schmid, *Notes on the Case: Mutilation of Dead Bodies and Refusal of Honourable Burial*, XIII U.N. LAW REPORTS 151, 152 (U.S. General Military Government Court, Dachau, Germany, May 19, 1947) (“Another United States Military Commission at the Mariana Islands (2nd-15th August, 1946) tried and convicted Tachibana Yochio, a Lieutenant-General in the Japanese Army and 13 others, of murdering 8 prisoners of war. Some of the accused were also charged with ‘preventing an honourable burial due to the consumption of parts of the bodies of prisoners of war

leaving a “calling card” on a body are also inconsistent with the respectful treatment of the dead.

7.7.1.2 *Prohibition Against Booby-Trapping Dead Bodies.* The dead may not be booby-trapped.<sup>134</sup>

7.7.2 *Handling of Personal Effects Belonging to Enemy Dead.* During international armed conflict, personal property recovered from enemy dead becomes the property of the recovering State for the purpose of returning it to the next-of-kin of the deceased.

7.7.2.1 *Measures to Prevent the Dead From Being Despoiled.* At all times, and particularly after an engagement, parties to the conflict shall, without delay, take all possible measures to prevent the dead from being despoiled.<sup>135</sup> This means that the personal effects of deceased persons may not be pillaged or otherwise taken without proper authorization.<sup>136</sup>

Individuals are not entitled to retain the personal effects of a deceased person as “booty”; the individual military member or person accompanying the armed forces who captures or finds enemy property acquires no title or claim.<sup>137</sup>

7.7.2.2 *Forwarding Valuable Articles Found on the Dead.* Parties to the conflict shall collect and forward, through the National POW Information Bureau, one-half of the double identity disc, last wills or other documents of importance to the next of kin, money, and in general all articles of an intrinsic or sentimental value, which are found on the dead.<sup>138</sup>

If there is only a single identity disc, it should remain with the body if the body is to be buried on land, so that the body may subsequently be identified as needed.<sup>139</sup> If the body is to be buried at sea, then the single identity disc itself should be collected and forwarded through the

---

by the accused during a special meal in the officers’ mess.’ They were found guilty of these charges; sentences ranging from death to imprisonment for 5 years were imposed. (3) An Australian Military Court at Wewak (30th November, 1945) sentenced Tazaki Takehiko, a First Lieutenant in the Japanese Army to death for ‘mutilating the dead body of a prisoner of war’ and for ‘cannibalism.’ The sentence was commuted to 5 years’ imprisonment by the confirming officer.”).

<sup>134</sup> Refer to § 6.12.4.9 (Certain Types of Prohibited Booby-Traps and Other Devices).

<sup>135</sup> GWS art. 15 (“At all times, and particularly after an engagement, Parties to the conflict shall, without delay, take all possible measures to search for and collect the wounded and sick, to protect them against pillage and ill-treatment, to ensure their adequate care, and to search for the dead and prevent their being despoiled.”).

<sup>136</sup> GWS COMMENTARY 152 footnote 2 (“Although this Article speaks only of measures to prevent the ‘despoiling’ (French, *dépouillement*) of the dead, it incontestably involves a prohibition of ‘pillaging’ (French, *pillage*) of the dead.”).

<sup>137</sup> Refer to § 5.17.3.2 (Ownership of Captured or Found Property on the Battlefield).

<sup>138</sup> GWS art. 16 (“They shall likewise collect and forward through the same bureau one half of a double identity disc, last wills or other documents of importance to the next of kin, money and in general all articles of an intrinsic or sentimental value, which are found on the dead.”); GWS-SEA art. 19 (“They shall likewise collect and forward through the same bureau one half of the double identity disc, or the identity disc itself if it is a single disc, last wills or other documents of importance to the next of kin, money and in general all articles of an intrinsic or sentimental value, which are found on the dead.”).

<sup>139</sup> Refer to § 7.7.4.2 (Burial on Land).

National POW Information Bureau.<sup>140</sup>

These articles, together with unidentified articles, shall be sent in sealed packets, accompanied by statements giving all particulars necessary for the identification of the deceased owners, as well as by a complete list of the contents of the parcel.<sup>141</sup>

The GPW also requires the forwarding of wills and all personal valuables left by POWs, including those who have died.<sup>142</sup>

**7.7.3 Preparation and Forwarding of Death Certificates and Lists of the Dead.** Parties to the conflict shall prepare and forward to each other, through the National POW Information Bureau, certificates of death or duly authenticated lists of the dead.<sup>143</sup> Where applicable, these certificates or lists shall state the circumstances and reasons for cremation.<sup>144</sup>

The GPW provides further requirements for death certificates and lists of persons who died as POWs.<sup>145</sup>

#### **7.7.4 Handling of Enemy Battlefield Dead – Burial and Cremation.**

**7.7.4.1 Examination of Bodies Before Burial or Cremation.** Parties to the conflict shall ensure that burial (whether on land or at sea) or cremation of the dead, carried out individually as far as circumstances permit, is preceded by a careful examination, if possible by a medical examination, of the bodies, with a view to confirming death, establishing identity, and enabling a report to be made.<sup>146</sup>

An examination helps ensure that persons who are still living are not mistakenly buried or cremated. An examination also helps ensure that accountability information can be gathered and

---

<sup>140</sup> See GWS-SEA COMMENTARY 144 (“Provision is still made for the possibility of military personnel being issued with single discs only, inscribed with the bare particulars. In the case of burial on land, such a disc must remain with the body, so that the latter may be identifiable at any time. In the case of burial at sea, it must be removed and sent to the deceased’s home country, for a body buried at sea is usually wrapped in a weighted sailcloth bag and we know of no instance of one having been washed ashore; there is therefore no question of subsequent identification.”).

<sup>141</sup> GWS art. 16 (“These articles, together with unidentified articles, shall be sent in sealed packets, accompanied by statements giving all particulars necessary for the identification of the deceased owners, as well as by a complete list of the contents of the parcel.”); GWS-SEA art. 19 (same).

<sup>142</sup> Refer to § 9.31.2.3 (Collection of Personal Valuables Left by POWs).

<sup>143</sup> GWS art. 16 (“Parties to the conflict shall prepare and forward to each other through the same bureau, certificates of death or duly authenticated lists of the dead.”); GWS-SEA art. 19 (same).

<sup>144</sup> Refer to § 7.7.4.4 (Cremation).

<sup>145</sup> Refer to § 9.34.1 (Transmittal of Wills); § 9.34.2 (Death Certificates).

<sup>146</sup> GWS art. 17 (“Parties to the conflict shall ensure that burial or cremation of the dead, carried out individually as far as circumstances permit, is preceded by a careful examination, if possible by a medical examination, of the bodies, with a view to confirming death, establishing identity and enabling a report to be made.”); GWS-SEA art. 20 (“Parties to the conflict shall ensure that burial at sea of the dead, carried out individually as far as circumstances permit, is preceded by a careful examination, if possible by a medical examination, of the bodies, with a view to confirming death, establishing identity and enabling a report to be made.”).

forwarded in accordance with other requirements.<sup>147</sup>

7.7.4.2 *Burial on Land*. Parties to the conflict shall further ensure that the dead are honorably interred, if possible according to the rites of the religion to which they belonged, and that their graves are respected, grouped if possible according to the nationality of the deceased, properly maintained, and marked so that they may always be found.<sup>148</sup> The use of collective graves should be avoided.<sup>149</sup>

One-half of the double identity disc, or the identity disc itself if it is a single disc, should remain on the body.<sup>150</sup>

7.7.4.3 *Burial at Sea*. Burial at sea is contemplated by the GWS-Sea. Burial at sea shall be conducted honorably and, if possible, according to the rites of the religion to which the dead belonged.

Where a double identity disc is used, one-half of the disc should remain on the body.<sup>151</sup> On the other hand, if a single identity disc is used, then it should be collected and forwarded through the National POW Information Bureau along with other valuable articles.<sup>152</sup>

An examination and report are especially important in such cases in order to ensure that accountability information is collected and forwarded.<sup>153</sup> The position (latitude and longitude) and the date should be recorded in the death certificate.<sup>154</sup>

7.7.4.4 *Cremation*. Bodies shall not be cremated except for imperative reasons of hygiene or for motives based on the religion of the deceased.<sup>155</sup> For example, hygiene reasons may include the risk of contamination to recovery personnel or other personnel from disease or exposure to chemical or biological warfare agents.

In case of cremation, the circumstances and reasons for cremation shall be stated in detail

---

<sup>147</sup> Refer to § 7.6 (Accountability Information From the Enemy Military Wounded, Sick, Shipwrecked, and Dead); § 7.7.3 (Preparation and Forwarding of Death Certificates and Lists of the Dead).

<sup>148</sup> GWS art. 17 (“They shall further ensure that the dead are honourably interred, if possible according to the rites of the religion to which they belonged, that their graves are respected, grouped if possible according to the nationality of the deceased, properly maintained and marked so that they may always be found.”).

<sup>149</sup> Refer to § 9.34.3.2 (Burial).

<sup>150</sup> GWS art. 17 (“One half of the double identity disc, or the identity disc itself if it is a single disc, should remain on the body.”).

<sup>151</sup> GWS-SEA art. 20 (“Where a double identity disc is used, one half of the disc should remain on the body.”).

<sup>152</sup> Refer to § 7.7.2.2 (Forwarding Valuable Articles Found on the Dead).

<sup>153</sup> Refer to § 7.7.4.1 (Examination of Bodies Before Burial or Cremation).

<sup>154</sup> GWS-SEA COMMENTARY 143 (“If, as will more often be the case, they are buried at sea, then the position (latitude and longitude) and date alone need be mentioned.”).

<sup>155</sup> GWS art. 17 (“Bodies shall not be cremated except for imperative reasons of hygiene or for motives based on the religion of the deceased.”).

in the death certificate or on the authenticated list of the dead.<sup>156</sup>

7.7.5 Graves Registration Service. In order to ensure that graves may always be found, parties to the conflict shall organize at the commencement of hostilities an Official Graves Registration Service to allow subsequent exhumations and to ensure the identification of bodies, whatever the site of the graves, and the possible transportation to the home country.<sup>157</sup> The Graves Registration Service shall also identify, record, and respectfully keep the ashes until they can be disposed of in accordance with the wishes of the home country.<sup>158</sup>

The GPW provides additional requirements for the Graves Registration Service with respect to POWs who have died while POWs.<sup>159</sup>

7.7.5.1 Exchange of Information Regarding Battlefield Graves. As soon as circumstances permit, and at the latest at the end of hostilities, the Graves Registration Services of the belligerents shall exchange, through the National POW Information Bureaus, lists showing the exact location and markings of the graves, together with particulars of the dead interred therein.<sup>160</sup>

## 7.8 RESPECT AND PROTECTION OF CATEGORIES OF MEDICAL AND RELIGIOUS PERSONNEL

Certain categories of medical and religious personnel shall be respected and protected during military operations.

7.8.1 Categories of Persons Who Are Entitled to Respect and Protection as Medical and Religious Personnel on the Battlefield. The categories of persons who are entitled to respect and protection as medical and religious personnel during military operations include:

- military medical and religious personnel, including<sup>161</sup>

---

<sup>156</sup> GWS art. 17 (“In case of cremation, the circumstances and reasons for cremation shall be stated in detail in the death certificate or on the authenticated list of the dead.”).

<sup>157</sup> GWS art. 17 (“They shall further ensure that the dead are honourably interred, if possible according to the rites of the religion to which they belonged, that their graves are respected, grouped if possible according to the nationality of the deceased, properly maintained and marked so that they may always be found. For this purpose, they shall organize at the commencement of hostilities an Official Graves Registration Service, to allow subsequent exhumations and to ensure the identification of bodies, whatever the site of the graves, and the possible transportation to the home country.”).

<sup>158</sup> GWS art. 17 (“These provisions shall likewise apply to the ashes, which shall be kept by the Graves Registration Service until proper disposal thereof in accordance with the wishes of the home country.”).

<sup>159</sup> Refer to § 9.34.4.1 (Records Held by the Graves Registration Service).

<sup>160</sup> GWS art. 17 (“As soon as circumstances permit, and at latest at the end of hostilities, these Services shall exchange, through the Information Bureau mentioned in the second paragraph of Article 16, lists showing the exact location and markings of the graves, together with particulars of the dead interred therein.”).

<sup>161</sup> GWS art. 24 (“Medical personnel exclusively engaged in the search for, or the collection, transport or treatment of the wounded or sick, or in the prevention of disease, staff exclusively engaged in the administration of medical units and establishments, as well as chaplains attached to the armed forces, shall be respected and protected in all circumstances.”). Refer to § 4.9 (Military Medical and Religious Personnel).

- medical personnel exclusively engaged in medical duties;<sup>162</sup>
- administrative staff exclusively engaged in support to medical units;<sup>163</sup> and
- chaplains attached to the armed forces;<sup>164</sup>
- auxiliary medical personnel, if they are carrying out their medical duties at the time when they come into contact with the enemy or fall into the enemy's hands;<sup>165</sup>
- authorized staff of voluntary aid societies;<sup>166</sup>
- staff of a recognized aid society of a neutral country;<sup>167</sup> and
- the religious, medical, and hospital personnel of hospital ships and their crews.<sup>168</sup>

7.8.2 Meaning of “Respect and Protection” of Medical and Religious Personnel. The respect and protection accorded medical and religious personnel by the GWS and GWS-Sea mean that they must not knowingly be attacked, fired upon, or unnecessarily prevented from discharging their proper functions.<sup>169</sup>

7.8.2.1 Incidental Harm Not Prohibited. The incidental killing or wounding of such personnel, due to their presence among or in proximity to combatant elements actually engaged by fire directed at the latter, gives no just cause for complaint.<sup>170</sup> Medical and religious personnel are deemed to have accepted the risk of death or injury due to their proximity to military operations.<sup>171</sup> Although the presence of medical and religious personnel does not serve

---

<sup>162</sup> Refer to § 4.9.1.1 (Medical Personnel Exclusively Engaged in Medical Duties).

<sup>163</sup> Refer to § 4.9.1.2 (Staff Exclusively Engaged in Support to Medical Units and Establishments).

<sup>164</sup> Refer to § 4.9.1.3 (Chaplains Attached to the Armed Forces).

<sup>165</sup> GWS art. 25 (“Members of the armed forces specially trained for employment, should the need arise, as hospital orderlies, nurses or auxiliary stretcher-bearers, in the search for or the collection, transport or treatment of the wounded and sick shall likewise be respected and protected if they are carrying out these duties at the time when they come into contact with the enemy or fall into his hands.”). Refer to § 4.13 (Auxiliary Medical Personnel).

<sup>166</sup> Refer to § 4.11 (Authorized Staff of Voluntary Aid Societies).

<sup>167</sup> Refer to § 4.12 (Staff of a Recognized Aid Society of a Neutral Country).

<sup>168</sup> GWS-SEA art. 36 (“The religious, medical and hospital personnel of hospital ships and their crews shall be respected and protected; they may not be captured during the time they are in the service of the hospital ship, whether or not there are wounded and sick on board.”).

<sup>169</sup> 1956 FM 27-10 (Change No. 1 1976) ¶225 (“*b. What is Meant by Respect and Protection.* The respect and protection accorded personnel of certain categories by Articles 19 (par. 220), 24 (par. 67), and 25 (par. 226), GWS, mean that they must not knowingly be attacked, fired upon, or unnecessarily prevented from discharging their proper functions. The accidental killing or wounding of such personnel, due to their presence among or in proximity to combatant elements actually engaged, by fire directed at the latter, gives no just cause for complaint.”).

<sup>170</sup> See GREENSPAN, MODERN LAW OF LAND WARFARE 57 (Medical personnel and chaplains “must accept the risks of accidental death or injury as a result of war operations.”).

<sup>171</sup> Compare § 7.12.2.5 (Acceptance of the Risk From Proximity to Combat Operations).

to exempt nearby military objectives from attack due to the risk that military medical and religious personnel would be incidentally harmed, feasible precautions must be taken to reduce the risk of harm to military medical and religious personnel.<sup>172</sup>

7.8.2.2 Search and Other Security Measures Not Prohibited. Medical and religious personnel are not immune from search or other necessary security measures by the enemy.<sup>173</sup> Searches of medical and religious personnel, and other security measures applied to them, should be consistent with the rules applicable when such actions are taken with respect to POWs.<sup>174</sup>

7.8.2.3 Capture Not Prohibited. The respect and protection afforded medical and religious personnel do not immunize them from detention.<sup>175</sup> However, certain classes of medical and religious personnel are, under other rules, exempt from detention or capture.<sup>176</sup>

7.8.3 Loss of Protection for Medical and Religious Personnel From Being Made the Object of Attack. Medical and religious personnel forfeit their protected status and therefore may be made the object of attack if they, outside of their humanitarian duties, participate in hostilities or otherwise commit acts harmful to the enemy.<sup>177</sup>

For example, weapons may not be used by medical and religious personnel against enemy military forces except in self-defense or defense of their patients.<sup>178</sup> Similarly, medical or religious personnel who, during combat, drive vehicles carrying able-bodied combatants or ammunition for able-bodied combatants, forfeit their protection from being made the object of attack by enemy military forces.<sup>179</sup> Hampering or impeding enemy military operations also would be a basis for finding that medical or religious personnel have forfeited protection.<sup>180</sup>

Acts that are part of their humanitarian duties, such as caring for the wounded and sick, are not a basis for depriving medical and religious personnel of their protection.<sup>181</sup>

#### 7.8.4 Use of the Distinctive Emblem to Facilitate the Respect and Protection of Military

---

<sup>172</sup> Refer to § 5.10.1.2 (Proportionality in Conducting Attacks and Protected Military Personnel and Facilities).

<sup>173</sup> Refer to § 7.10.1.2 (Search Not Prohibited).

<sup>174</sup> Refer to § 9.6 (Security Measures With Respect to POWs).

<sup>175</sup> Refer to § 7.9 (Captured Medical and Religious Personnel).

<sup>176</sup> Refer to § 7.9.1.1 (Medical and Religious Personnel Who Are Exempt From Capture and Detention).

<sup>177</sup> GWS COMMENTARY 221 (“Nevertheless, to enjoy immunity, they must naturally abstain from any form of participation—even indirect—in hostile acts. We saw in Article 21 that the protection to which medical units are entitled ceases if they are used to commit acts ‘harmful to the enemy’. This proviso obviously applies to medical personnel also.”). Refer to § 7.10.3 (Loss of Protection of Military Medical Units and Facilities From Being Made the Object of Attack).

<sup>178</sup> Refer to § 7.10.3.5 (Use of Weapons in Self-Defense or Defense of the Wounded and Sick).

<sup>179</sup> Compare § 7.12.2.2 (No Use for Military Purposes).

<sup>180</sup> Compare § 7.12.2.3 (No Hampering the Movement of Combatants).

<sup>181</sup> Refer to § 7.10.3.1 (Acts Harmful to the Enemy).

Medical and Religious Personnel. The GWS contemplates the use of the distinctive emblem, including through wearing an armlet bearing the emblem, to facilitate the identification of protected medical and religious personnel, as such.

Claiming protected medical status (including feigning such status) in order to deceive the adversary into affording protection so as then to kill or wound the enemy is prohibited.<sup>182</sup>

As with other instances of the display of the distinctive emblem, the wearing of the armlet with the distinctive emblem is controlled by the competent military authority, and the armlet may be obscured or removed at the competent military authority's direction.<sup>183</sup> The fact that military medical and religious personnel do not wear an armlet does not deprive them of their protection from being made the object of attack if they are recognized as such.<sup>184</sup>

7.8.4.1 Wearing of Armlet With the Distinctive Emblem. The GWS contemplates that

- military medical and religious personnel;<sup>185</sup>
- authorized staff of voluntary aid societies;<sup>186</sup> and
- staff of a recognized aid society of a neutral country;<sup>187</sup>

shall wear, affixed to the left arm, a water-resistant armlet bearing the distinctive emblem, issued and stamped by the military authority.<sup>188</sup> In no circumstances may these personnel be deprived of the right to wear the armlet.<sup>189</sup>

7.8.4.2 Wearing of Armlet With Miniature Distinctive Emblem. Auxiliary medical personnel shall wear, but only while carrying out medical duties, a white armlet bearing in its center the distinctive sign in miniature; the armlet shall be issued and stamped by the military

---

<sup>182</sup> Refer to § 5.22 (Treachery or Perfidy Used to Kill or Wound).

<sup>183</sup> Refer to § 7.15.2 (Control of Display by the Competent Military Authority); § 7.15.2.1 (Removal or Obscuration of the Distinctive Emblem).

<sup>184</sup> Refer to § 7.15.3 (Significance of the Display of the Distinctive Emblem).

<sup>185</sup> Refer to § 4.9 (Military Medical and Religious Personnel).

<sup>186</sup> Refer to § 4.11 (Authorized Staff of Voluntary Aid Societies).

<sup>187</sup> Refer to § 4.12 (Staff of a Recognized Aid Society of a Neutral Country).

<sup>188</sup> GWS art. 40 (“The personnel designated in Article 24 and in Articles 26 and 27 shall wear, affixed to the left arm, a water-resistant armlet bearing the distinctive emblem, issued and stamped by the military authority.”); GWS-SEA art. 42 (“The personnel designated in Articles 36 and 37 shall wear, affixed to the left arm, a water-resistant armlet bearing the distinctive emblem, issued and stamped by the military authority.”).

<sup>189</sup> GWS art. 40 (“In no circumstances may the said personnel be deprived of their insignia or identity cards nor of the right to wear the armlet.”); GWS-SEA art. 42 (“In no circumstances may the said personnel be deprived of their insignia or identity cards nor of the right to wear the armlet.”).

authority.<sup>190</sup>

## 7.9 CAPTURED MEDICAL AND RELIGIOUS PERSONNEL

The treatment of captured persons who perform medical or religious duties depends on their legal status. Identification cards are used to help determine the correct status of medical and religious personnel. Retained personnel are subject to certain duties, rights, and privileges during detention.

7.9.1 Different Classes of Persons Performing Medical or Religious Duties. Persons who perform medical or religious duties may be grouped into three categories based on their treatment with respect to detention: (1) medical and religious personnel who are exempt from capture; (2) medical and religious personnel who may be retained; and (3) persons who perform medical and religious duties who are held as POWs.

7.9.1.1 Medical and Religious Personnel Who Are Exempt From Capture and Detention. Certain classes of medical and religious personnel are exempt from capture and detention. These classes of personnel include:

- staff of a recognized aid society of a neutral country;<sup>191</sup> and
- the religious, medical, and hospital personnel of hospital ships and their crews during the time they are in service of the hospital ship, whether or not there are wounded and sick on board.<sup>192</sup>

Such individuals may be held temporarily pending determination of their status or until conditions permit their safe return or release.<sup>193</sup>

7.9.1.2 Medical and Religious Personnel Who May Be Retained. Certain classes of medical and religious personnel who fall into the hands of the adverse party shall be retained only in so far as the state of health, the spiritual needs, and the number of POWs require.<sup>194</sup> Personnel who are retained in this way are not considered POWs.<sup>195</sup>

---

<sup>190</sup> GWS art. 41 (“The personnel designated in Article 25 shall wear, but only while carrying out medical duties, a white armlet bearing in its centre the distinctive sign in miniature; the armlet shall be issued and stamped by the military authority.”).

<sup>191</sup> Refer to § 4.12 (Staff of a Recognized Aid Society of a Neutral Country).

<sup>192</sup> GWS-SEA art. 36 (“The religious, medical and hospital personnel of hospital ships and their crews shall be respected and protected; they may not be captured during the time they are in service of the hospital ship, whether or not there are wounded and sick on board.”).

<sup>193</sup> Refer to § 4.12 (Staff of a Recognized Aid Society of a Neutral Country).

<sup>194</sup> GWS art. 28 (“Personnel designated in Articles 24 and 26 who fall into the hands of the adverse Party, shall be retained only in so far as the state of health, the spiritual needs and the number of prisoners of war require.”).

<sup>195</sup> GPW art. 33 (“Members of the medical personnel and chaplains while retained by the Detaining Power with a view to assisting prisoners of war, shall not be considered as prisoners of war.”); GWS art. 28 (“Personnel thus retained shall not be deemed prisoners of war.”). See also GPW art. 4C (“This Article shall in no way affect the status of medical personnel and chaplains as provided for in Article 33 of the present Convention.”).

These classes of personnel include:

- military medical and religious personnel, including<sup>196</sup>
  - medical personnel exclusively engaged in medical duties;<sup>197</sup>
  - administrative staff exclusively engaged in support to medical units;<sup>198</sup> and
  - chaplains attached to the armed forces;<sup>199</sup> and
- authorized staff of voluntary aid societies.<sup>200</sup>

#### *7.9.1.3 Persons Performing Medical or Religious Duties Who Are Held as POWs.*

Certain classes of persons who perform medical or religious duties are held as POWs if they fall into the hands of the enemy during international armed conflict. These classes of personnel include:

- auxiliary medical personnel, if they are carrying out their medical duties at the time when they come into contact with the enemy or fall into the enemy's hands;<sup>201</sup>
- members of the armed forces who are trained as medical personnel, but not attached to the medical service;<sup>202</sup>
- members of the armed forces who are ministers of religion without having officiated as chaplains to their own forces;<sup>203</sup> and
- military medical and religious personnel who forfeit their status as retained personnel because they are not exclusively engaged in medical and religious duties.<sup>204</sup>

*7.9.2 Use of Identification Card to Help Establish Retained Personnel Status.* The 1949 Geneva Conventions contemplate that identification cards will be used to help establish the proper status of persons, including the entitlement to retained personnel status.<sup>205</sup>

---

<sup>196</sup> Refer to § 4.9 (Military Medical and Religious Personnel).

<sup>197</sup> Refer to § 4.9.1.1 (Medical Personnel Exclusively Engaged in Medical Duties).

<sup>198</sup> Refer to § 4.9.1.2 (Staff Exclusively Engaged in Support to Medical Units and Establishments).

<sup>199</sup> Refer to § 4.9.1.3 (Chaplains Attached to the Armed Forces).

<sup>200</sup> Refer to § 4.11 (Authorized Staff of Voluntary Aid Societies).

<sup>201</sup> Refer to § 4.13 (Auxiliary Medical Personnel).

<sup>202</sup> Refer to § 4.5.2.2 (Members Trained as Medical Personnel, but Not Attached to the Medical Service).

<sup>203</sup> Refer to § 4.5.2.3 (Members Who Are Ministers of Religion Without Having Officiated as Chaplains to Their Own Forces).

<sup>204</sup> Refer to § 4.9.2.3 (Exclusively Engaged in Humanitarian Duties).

<sup>205</sup> Refer to § 4.27.1 (Identification Cards Used to Help Clarify Status).

Persons entitled to retained personnel status, in addition to wearing the identity disc mentioned in Article 16 of the GWS or Article 19 of the GWS-Sea, shall also carry a special identity card bearing the distinctive emblem.<sup>206</sup>

This card shall be water-resistant and of such size that it can be carried in the pocket. It shall be worded in the national language; shall mention at least the surname and first names, the date of birth, the rank, and the service number of the bearer; and shall state in what capacity the bearer is entitled to the protection of the GWS or GWS-Sea. The card shall bear the photograph of the owner and also either the bearer's signature or fingerprints or both. It shall be embossed with the stamp of the military authority.<sup>207</sup>

The identity card shall be uniform throughout the same armed forces and, as far as possible, of a similar type in the armed forces of the Parties to the GWS and GWS-Sea. The parties to the conflict may be guided by the model, which is annexed, by way of example, to the GWS and GWS-Sea. Parties to the conflict shall inform each other, at the outbreak of hostilities, of the model they are using. Identity cards should be made out, if possible, at least in duplicate, one copy being kept by the home country.<sup>208</sup>

In no circumstances may retained personnel be deprived of their insignia or identity cards nor of the right to wear the armband.<sup>209</sup> In case of loss, they shall be entitled to receive duplicates of the cards and to have the insignia replaced.<sup>210</sup>

**7.9.3 Duties of Retained Personnel.** Within the framework of the military laws and regulations of the Detaining Power, and under the authority of its competent service, retained personnel shall continue to carry out, in accordance with their professional ethics, their medical and spiritual duties on behalf of POWs, preferably those of the armed forces to which they themselves belong.<sup>211</sup> This preference for retained personnel to treat the POWs of the armed

---

<sup>206</sup> GWS art. 40 (“Such personnel, in addition to wearing the identity disc mentioned in Article 16, shall also carry a special identity card bearing the distinctive emblem.”); GWS-SEA art. 42 (“Such personnel, in addition to wearing the identity disc mentioned in Article 19, shall also carry a special identity card bearing the distinctive emblem.”).

<sup>207</sup> GWS art. 40 (“This card shall be water-resistant and of such size that it can be carried in the pocket. It shall be worded in the national language, shall mention at least the surname and first names, the date of birth, the rank and the service number of the bearer, and shall state in what capacity he is entitled to the protection of the present Convention. The card shall bear the photograph of the owner and also either his signature or his finger-prints or both. It shall be embossed with the stamp of military authority.”); GWS-SEA (same).

<sup>208</sup> GWS art. 40 (“The identity card shall be uniform throughout the same armed forces and, as far as possible, of a similar type in the armed forces of the High Contracting Parties. The Parties to the conflict may be guided by the model which is annexed, by way of example, to the present Convention. They shall inform each other, at the outbreak of hostilities, of the model they are using. Identity cards should be made out, if possible, at least in duplicate, one copy being kept by the home country.”); GWS-SEA art. 42 (same).

<sup>209</sup> GWS art. 40 (“In no circumstances may the said personnel be deprived of their insignia or identity cards nor of the right to wear the armband.”); GWS-SEA art. 42 (same).

<sup>210</sup> GWS art. 40 (“In case of loss, they shall be entitled to receive duplicates of the cards and to have the insignia replaced.”); GWS-SEA art. 42 (same).

<sup>211</sup> GWS art. 28 (“Within the framework of the military laws and regulations of the Detaining Power, and under the authority of its competent service, they shall continue to carry out, in accordance with their professional ethics, their medical and spiritual duties on behalf of prisoners of war, preferably those of the armed forces to which they

forces to which the retained personnel belong is also reflected in the provisions of the GPW related to the medical treatment of POWs.<sup>212</sup>

Like POWs, retained personnel may be subject to disciplinary or judicial proceedings for violations of the laws and regulations of the Detaining Power.<sup>213</sup>

If retained personnel refuse to perform their medical duties on behalf of POWs, they are liable to forfeit their status as retained personnel.<sup>214</sup>

7.9.4 Return of Personnel Whose Retention Is Not Indispensable. Personnel whose retention is not indispensable to provide for the health and spiritual needs of POWs shall be returned to the party to the conflict to whom they belong, as soon as a road is open for their return and military requirements permit.<sup>215</sup> As a historical matter, such return has been exceptional while hostilities are ongoing.<sup>216</sup>

7.9.4.1 Treatment Pending Return. Pending their return, such personnel whose retention is not indispensable shall not be deemed POWs; nevertheless, they shall at least benefit from all the provisions of the GPW.<sup>217</sup> They shall continue to fulfill their duties under the orders of the adverse party and shall preferably be engaged in the care of the wounded and sick of the party to the conflict to which they themselves belong.<sup>218</sup>

On their departure, they shall take with them the effects, personal belongings, valuables, and instruments belonging to them.<sup>219</sup>

---

themselves belong.”); GPW art. 33 (“Members of the medical personnel and chaplains while retained by the Detaining Power with a view to assisting prisoners of war, shall ... continue to exercise their medical and spiritual functions for the benefit of prisoners of war, preferably those belonging to the armed forces upon which they depend, within the scope of the military laws and regulations of the Detaining Power and under the control of its competent services, in accordance with their professional etiquette.”).

<sup>212</sup> Refer to § 9.14.2.2 (Treatment by Medical Personnel of the Power on Which They Depend).

<sup>213</sup> Refer to § 9.26 (General Principles Applicable to POW Discipline); § 9.27 (Disciplinary Proceedings and Punishment); § 9.28 (Judicial Proceedings and Punishment).

<sup>214</sup> Refer to § 4.9.2.3 (Exclusively Engaged in Humanitarian Duties).

<sup>215</sup> GWS art. 30 (“Personnel whose retention is not indispensable by virtue of the provisions of Article 28 shall be returned to the Party to the conflict to whom they belong, as soon as a road is open for their return and military requirements permit.”).

<sup>216</sup> See Lewis C. Vollmar, Jr., *Military Medicine in War: The Geneva Conventions Today*, Chapter 23 in II MILITARY MEDICAL ETHICS 739, 746 (2003) (“As it always has been throughout the development of the Geneva Conventions, retention of medical personnel remains subordinate to their repatriation. But, if history is any indication of the future, it is likely that retention will become the rule and repatriation will remain the exception.”).

<sup>217</sup> GWS art. 30 (“Pending their return, they shall not be deemed prisoners of war. Nevertheless they shall at least benefit by all the provisions of the Geneva Convention relative to the Treatment of Prisoners of War of August 12, 1949.”).

<sup>218</sup> GWS art. 30 (“They shall continue to fulfil their duties under the orders of the adverse Party and shall preferably be engaged in the care of the wounded and sick of the Party to the conflict to which they themselves belong.”).

<sup>219</sup> GWS art. 30 (“On their departure, they shall take with them the effects, personal belongings, valuables and instruments belonging to them.”).

7.9.4.2 *Selection of Personnel for Return.* The selection of personnel for return under Article 30 of the GWS shall be made irrespective of any consideration of race, religion, or political opinion, but preferably according to the chronological order of their capture and their state of health.<sup>220</sup>

7.9.4.3 *Special Agreements on the Percentage of Personnel to Be Retained.* As from the outbreak of hostilities, parties to the conflict may determine by special agreement the percentage of personnel to be retained, in proportion to the number of POWs and the distribution of these medical and religious personnel in the camps.<sup>221</sup>

#### 7.9.5 Rights and Privileges of Retained Personnel.

7.9.5.1 *POW Treatment as a Minimum.* Retained personnel shall receive, as a minimum, the benefits and protection of the GPW.<sup>222</sup>

7.9.5.2 *All Facilities Necessary to Provide for the Medical Care of, and Religious Ministration to, POWs.* Retained personnel shall also be granted all facilities necessary to provide for the medical care of, and religious ministration to, POWs.<sup>223</sup>

7.9.5.3 *Visits of POWs Outside the Camp.* Retained personnel, including chaplains, shall be authorized to visit periodically POWs situated in working detachments or in hospitals outside the camp.<sup>224</sup> For this purpose, the Detaining Power shall place at their disposal the necessary means of transport.<sup>225</sup>

7.9.5.4 *Correspondence by Chaplains.* Chaplains shall be free to correspond,

---

<sup>220</sup> GWS art. 31 (“The selection of personnel for return under Article 30 shall be made irrespective of any consideration of race, religion or political opinion, but preferably according to the chronological order of their capture and their state of health.”).

<sup>221</sup> GWS art. 31 (“As from the outbreak of hostilities, Parties to the conflict may determine by special agreement the percentage of personnel to be retained, in proportion to the number of prisoners and the distribution of the said personnel in the camps.”).

<sup>222</sup> GWS art. 28 (Retained personnel “shall at least benefit by all the provisions of the Geneva Convention relative to the Treatment of Prisoners of War of 12 August 1949.”); GPW art. 33 (“Members of the medical personnel and chaplains while retained by the Detaining Power with a view to assisting prisoners of war, shall ... receive as a minimum the benefits and protection of the present Convention.”).

<sup>223</sup> GPW art. 33 (“Members of the medical personnel and chaplains while retained by the Detaining Power with a view to assisting prisoners of war, shall not be considered as prisoners of war. They shall, however, receive as a minimum the benefits and protection of the present Convention, and shall also be granted all facilities necessary to provide for the medical care of, and religious ministration to prisoners of war.”); GWS art. 28 (“Personnel thus retained shall not be deemed prisoners of war. Nevertheless they shall at least benefit from the provisions of the Geneva Convention relative to the Treatment of Prisoners of War of August 12, 1949.”).

<sup>224</sup> GPW art. 33 (“They shall be authorized to visit periodically prisoners of war situated in working detachments or in hospitals outside the camp.”); GWS art. 28 (“They shall be authorized to visit periodically the prisoners of war in labour units or hospitals outside of the camp.”); GPW art. 35 (“[Chaplains] shall enjoy the necessary facilities, including the means of transport provided for in Article 33, for visiting the prisoners of war outside their camp.”).

<sup>225</sup> GPW art. 33 (“For this purpose, the Detaining Power shall place at their disposal the necessary means of transport.”); GWS art. 28 (“The Detaining Power shall put at their disposal the means of transport required.”).

subject to censorship, on matters concerning their religious duties with the ecclesiastical authorities in the country of detention and with international religious organizations.<sup>226</sup> Letters and cards, which they may send for this purpose, shall be in addition to the quota provided for in Article 71 of the GPW.<sup>227</sup>

*7.9.5.5 Proposal of POWs for Examination by Mixed Medical Commissions.*

Retained medical personnel may propose wounded and sick POWs for examination by Mixed Medical Commissions with a view towards repatriation or accommodation in a neutral country and the entitlement to attend examinations conducted by Mixed Medical Commissions.<sup>228</sup>

*7.9.5.6 No Other Compulsory Duties.* Although they shall be subject to the internal discipline of the camp in which they are retained, such personnel may not be compelled to carry out any work other than that concerned with their medical or religious duties.<sup>229</sup>

*7.9.5.7 Senior Medical Officer in the Camp.* The senior medical officer in each camp shall be responsible to the camp military authorities for everything connected with the activities of retained medical personnel.<sup>230</sup> For this purpose, parties to the conflict shall agree at the outbreak of hostilities on the subject of the corresponding ranks of the medical personnel, including that of societies mentioned in Article 26 of the GWS.<sup>231</sup>

In all questions arising out of their duties, the senior medical officer, and chaplains, shall have direct access to the military and medical authorities of the camp, who shall grant them the facilities they may require for correspondence relating to these questions.<sup>232</sup>

---

<sup>226</sup> GPW art. 35 (“They shall be free to correspond, subject to censorship, on matters concerning their religious duties with the ecclesiastical authorities in the country of detention and with international religious organizations.”).

<sup>227</sup> GPW art. 35 (“Letters and cards which they may send for this purpose shall be in addition to the quota provided for in Article 71.”). *Refer to* § 9.20.2.1 (POW Correspondence Quota).

<sup>228</sup> *Refer to* § 9.36.5.2 (POWs Entitled to Present Themselves for Examination Before the Commission); § 9.36.5.3 (Observers at the Examination).

<sup>229</sup> GPW art. 33 (“Although they shall be subject to the internal discipline of the camp in which they are retained, such personnel may not be compelled to carry out any work other than that concerned with their medical or religious duties.”); GWS art. 28 (“Although retained personnel in a camp shall be subject to its internal discipline, they shall not, however, be required to perform any work outside their medical or religious duties.”).

<sup>230</sup> GPW art. 33 (“The senior medical officer in each camp shall be responsible to the camp military authorities for everything connected with the activities of retained medical personnel.”); GWS art. 28 (“In each camp, the senior medical officer of the highest rank shall be responsible to the military authorities of the camp for the professional activity of the retained military medical personnel.”).

<sup>231</sup> GPW art. 33 (“For this purpose, Parties to the conflict shall agree at the outbreak of hostilities on the subject of the corresponding ranks of the medical personnel, including that of societies mentioned in Article 26 of the Geneva Convention for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field of August 12, 1949.”); GWS art. 28 (“For this purpose, from the outbreak of hostilities, the Parties to the conflict shall agree regarding the corresponding seniority of the ranks of their medical personnel, including those of the societies designated in Article 26.”).

<sup>232</sup> GWS art. 28 (“In all questions arising out of their duties, this medical officer, and the chaplains, shall have direct access to the military and medical authorities of the camp who shall grant them the facilities they may require for correspondence relating to these questions.”); GPW art. 33 (“This senior medical officer, as well as chaplains, shall

7.9.5.8 *Agreements on Possible Relief of Retained Personnel.* During hostilities, the parties to the conflict shall agree concerning the possible relief of retained personnel and shall settle the procedure to be followed.<sup>233</sup> This provision arose from limited practice in World War II where retained personnel were repatriated and replaced by medical personnel from their home country.<sup>234</sup>

7.9.6 *No Relief of Obligations of the Detaining Power.* None of the provisions of Article 28 of the GWS or Article 33 of the GPW shall relieve the Detaining Power of its obligations with regard to POWs from the medical or spiritual point of view.<sup>235</sup> In other words, the fact that the Detaining Power permits and enables retained personnel to care for POWs does not relieve the Detaining Power of its own responsibilities to care for POWs.

## 7.10 MILITARY MEDICAL UNITS AND FACILITIES

Fixed establishments and mobile medical units of the Medical Service (*i.e.*, military medical units and facilities) may in no circumstances be attacked, but shall at all times be respected and protected by the parties to the conflict.<sup>236</sup> In addition, establishments ashore that are entitled to the protection of the GWS shall be protected from bombardment or attack from the sea.<sup>237</sup>

7.10.1 *Meaning of “Respect and Protection” of Military Medical Units and Facilities.* The respect and protection accorded by the GWS to military medical units and facilities mean that they must not knowingly be attacked, fired upon, or unnecessarily prevented from discharging their proper functions.<sup>238</sup>

7.10.1.1 *Incidental Harm Not Prohibited.* The incidental harm to military

---

have the right to deal with the competent authorities of the camp on all questions relating to their duties. Such authorities shall afford them all necessary facilities for correspondence relating to these questions.”).

<sup>233</sup> GPW art. 33 (“During hostilities, the Parties to the conflict shall agree concerning the possible relief of retained personnel and shall settle the procedure to be followed.”); GWS art. 28 (“During hostilities the Parties to the conflict shall make arrangements for relieving where possible retained personnel, and shall settle the procedure of such relief.”).

<sup>234</sup> GWS COMMENTARY 257 (“During the last World War certain belligerents planned to relieve doctors retained in enemy camps, by personnel from the home country. On being replaced the doctors in question were to be repatriated. A beginning was made in the case of some Yugoslav doctors and a larger number of French doctors retained in Germany.”).

<sup>235</sup> GPW art. 33 (“None of the preceding provisions shall relieve the Detaining Power of its obligations with regard to prisoners of war from the medical or spiritual point of view.”); GWS art. 28 (“None of the preceding provisions shall relieve the Detaining Power of the obligations imposed upon it with regard to the medical and spiritual welfare of the prisoners of war.”).

<sup>236</sup> GWS art. 19 (“Fixed establishments and mobile medical units of the Medical Service may in no circumstances be attacked, but shall at all times be respected and protected by the Parties to the conflict.”).

<sup>237</sup> GWS-SEA art. 23 (“Establishments ashore entitled to protection of the Geneva Convention for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field of August 12, 1949, shall be protected from bombardment or attack from the sea.”).

<sup>238</sup> Refer to § 7.8.2 (Meaning of “Respect and Protection” of Medical and Religious Personnel).

medical units or facilities, due to their presence among or in proximity to combatant elements actually engaged, by fire directed at the latter, gives no just cause for complaint.<sup>239</sup> Commanders are obligated to situate military medical units and facilities such that they are not in danger from attack against military objectives.<sup>240</sup> Military medical units and facilities that are positioned near military objectives are deemed to have accepted the risk of harm due to their proximity to military operations.<sup>241</sup> Although the presence of military medical units and facilities does not serve to exempt nearby military objectives from attack due to the risk that military medical units and facilities would be incidentally harmed, feasible precautions must be taken to reduce the risk of harm to military medical units and facilities.<sup>242</sup>

7.10.1.2 *Search Not Prohibited.* Military medical units and facilities are not immune from search by the enemy.<sup>243</sup> For example, search may be necessary to verify that these units and facilities are not being used, outside their humanitarian duties, to commit acts harmful to the enemy.

7.10.1.3 *Capture Not Prohibited.* The respect and protection afforded military medical units and facilities do not immunize them from capture.<sup>244</sup>

7.10.2 Obligation to Situate Military Medical Units and Facilities Relative to Military Objectives. Responsible authorities shall ensure that military medical establishments and units are, as far as possible, situated in such a manner that attacks against military objectives cannot imperil their safety.<sup>245</sup>

In no case may a military medical unit or facility be used for the purpose of shielding military objectives from attack.<sup>246</sup>

---

<sup>239</sup> Compare § 7.12.2.5 (Acceptance of the Risk From Proximity to Combat Operations). For example, Col. Robert D. Heinl, Jr., *Military Writer Charges: Reds Dupe Doves On Hanoi Hospital*, THE PITTSBURGH PRESS, Jan. 10, 1973 (“Bach Mai Hospital, outside Hanoi, appears to have replaced North Vietnam’s inconveniently intact dike systems as Exhibit A in the Communist propaganda campaign to convict the United States of war crimes, atrocities and what is called ‘terror bombing.’ Bach Mai, or what is left of it, has been regularly shown to visiting American antiwar activists as evidence that we are singling out hospitals, orphanages and similar illegal targets in the air war against Hanoi. ... Examination of current aerial photographs shows the hospital to be sited by the Communists in the very bull’s-eye of a ring of military targets. ... Besides being virtually astride the Communists’ main logistic artery for support of the war, the damaged hospital lies just across the road from Bach Mai Airfield, one of North Vietnam’s most important military airdromes. **Within a few hundred yards of Bach Mai Hospital, the Communists maintain their main command center for the air defense of the North.**”).

<sup>240</sup> Refer to § 7.10.2 (Obligation to Situate Military Medical Units and Facilities Relative to Military Objectives).

<sup>241</sup> Compare § 7.12.2.5 (Acceptance of the Risk From Proximity to Combat Operations).

<sup>242</sup> Refer to § 5.10.1.2 (Proportionality in Conducting Attacks and Protected Military Personnel and Facilities).

<sup>243</sup> 1956 FM 27-10 (Change No. 1 1976) ¶221 (“GWS does not confer immunity from search by the enemy on medical units, establishments, or transports.”).

<sup>244</sup> Refer to § 7.10.5 (Capture of Military Medical Units and Facilities).

<sup>245</sup> GWS art. 19 (“The responsible authorities shall ensure that the said medical establishments and units are, as far as possible, situated in such a manner that attacks against military objectives cannot imperil their safety.”).

<sup>246</sup> Refer to § 5.16 (Prohibition on Using Protected Persons and Objects to Shield, Favor, or Impede Military Operations).

7.10.2.1 *Necessity for the Intermingling of Military Objectives and Military Medical Units and Facilities.* The obligation to situate medical units and facilities so that attacks against military objectives cannot imperil their safety is limited by practical considerations.

For example, in order to perform their medical duties effectively, medical units and facilities must, to some degree, be intermingled with military objectives (such as combatants or vehicles that constitute military objectives). In addition, medical units and facilities may be faced with threats of unlawful attacks (*e.g.*, from criminal elements or enemy combatants not abiding by the law of war) that may warrant the placement of medical units and facilities in a more secure location (*e.g.*, within the perimeter of a military base) so that they may be guarded by combatant units. Logistical considerations (*e.g.*, access to roads, water, power, or communications) may also limit the implementation of this obligation.

7.10.2.2 *Implementation of the Obligation to Situate Medical Units and Facilities.* Implementing the obligation to ensure that military medical units and facilities are, as far as possible, situated in such a manner that attacks against military objectives cannot imperil their safety is a responsibility of commanders of military medical units, as well as commanders of combatant units.

Commanders of military medical units and facilities should, as far as possible, place their units and facilities so as to protect them from the effects of enemy attacks on military objectives. Commanders of combatant units should also avoid placing their units in proximity to medical units and facilities to the extent feasible. For example, procedures should be established to ensure that, during international armed conflict, non-medical vehicles or personnel do not remain unnecessarily within or near medical facilities.

7.10.3 Loss of Protection of Military Medical Units and Facilities From Being Made the Object of Attack. The protection from being made the object of attack, to which fixed establishments and mobile medical units of the Medical Service are entitled, shall not cease unless they are used to commit, outside their humanitarian duties, acts harmful to the enemy.<sup>247</sup>

7.10.3.1 *Acts Harmful to the Enemy.* Medical establishments and units must refrain from all interference, direct or indirect, in military operations.<sup>248</sup> For example, a hospital may not be used as a shelter for able-bodied combatants or fugitives, as an arms or ammunition depot, or as a military observation post.<sup>249</sup> A medical unit must not be deliberately situated so as

---

<sup>247</sup> GWS art. 21 (“The protection to which fixed establishments and mobile medical units of the Medical Service are entitled shall not cease unless they are used to commit, outside their humanitarian duties, acts harmful to the enemy. Protection may, however, cease only after a due warning has been given, naming, in all appropriate cases, a reasonable time limit, and after such warning has remained unheeded.”).

<sup>248</sup> GWS COMMENTARY 201 (“Medical establishments and units must observe, towards the opposing belligerent, the neutrality which they claim for themselves and which is their right under the Convention. Being placed outside the struggle, they must loyally refrain from all interference, direct or indirect, in military operations.”).

<sup>249</sup> GWS COMMENTARY 200-01 (“Such harmful acts would, for example, include the use of a hospital as a shelter for able-bodied combatants or fugitives, as an arms or ammunition dump, or as a military observation post; another instance would be the deliberate siting of a medical unit in a position where it would impede an enemy attack.”).

to hamper or impede an enemy attack.<sup>250</sup>

Acts that are part of their humanitarian duties, such as caring for the wounded and sick, are not a basis for depriving medical units and facilities of their protection.<sup>251</sup>

7.10.3.2 *Due Warning Before Cessation of Protection.* Protection may, however, cease only after a due warning has been given, naming, in all appropriate cases, a reasonable time limit, and after such warning has remained unheeded.<sup>252</sup>

The obligation to refrain from use of force against a medical unit acting in violation of its mission and protected status without due warning does not prohibit the exercise of the right of self-defense. There may be cases in which, in the exercise of the right of self-defense, a warning is not “due” or a reasonable time limit is not appropriate. For example, forces receiving heavy fire from a hospital may exercise their right of self-defense and return fire.<sup>253</sup> Such use of force in self-defense against medical units or facilities must be proportionate.<sup>254</sup> For example, a single enemy rifleman firing from a hospital window would warrant a response against the rifleman only, rather than the destruction of the hospital.

7.10.3.3 *Conditions Not Depriving Military Medical Units or Facilities of Protection.* The following conditions shall not be considered as depriving a medical unit or establishment of the protection guaranteed by Article 19 of the GWS:

- That the personnel of the unit or establishment are armed, and that they use the arms in their own defense, or in that of the wounded and sick in their charge.
- That in the absence of armed orderlies, the unit or establishment is protected by a picket, by sentries, or by an escort.
- That small arms and ammunition taken from the wounded and sick and not yet handed to the proper service are found in the unit or establishment.

---

<sup>250</sup> Compare § 7.12.2.3 (No Hampering the Movement of Combatants).

<sup>251</sup> GWS COMMENTARY 201 (“The Diplomatic Conference of 1949 stated specifically that protection could only cease in the case of harmful acts committed by the units ‘outside their humanitarian duties’. It is possible for a humane act to be harmful to the enemy, or for it to be wrongly interpreted as so being by an enemy lacking in generosity. Thus the presence or activities of a medical unit might interfere with tactical operations; so might its lights at night. It was stated, for example, at the Conference, that the waves given off by an X-ray apparatus could interfere with the transmission or reception of wireless messages by a military set, or with the working of a radar unit.”).

<sup>252</sup> GWS art. 21 (“The protection to which fixed establishments and mobile medical units of the Medical Service are entitled shall not cease unless they are used to commit, outside their humanitarian duties, acts harmful to the enemy. Protection may, however, cease only after a due warning has been given, naming, in all appropriate cases, a reasonable time limit, and after such warning has remained unheeded.”).

<sup>253</sup> See GWS COMMENTARY 202 (“As we have seen, a time limit is to be named ‘in all appropriate cases’. There might obviously be cases where no time limit could be allowed. Suppose, for example, that a body of troops approaching a hospital were met by heavy fire from every window. Fire would be returned without delay.”).

<sup>254</sup> Refer to § 2.4 (Proportionality).

- That personnel and material of the veterinary service are found in the unit or establishment, without forming an integral part thereof; and
- That the humanitarian activities of medical units and establishments or of their personnel extend to the care of civilian wounded or sick.<sup>255</sup>

7.10.3.4 *Arming of Military Medical Units or Facilities.* The GWS contemplates that the personnel of medical units or establishments may be armed, and it does not specifically restrict the weapons that medical units or facilities may have.<sup>256</sup>

Military medical units and facilities may be armed to the extent necessary to enable them to defend themselves or their patients against unlawful attacks.<sup>257</sup> For example, military medical and religious personnel may be equipped with weapons to meet internal security needs, to maintain discipline, to protect staff and patients from criminal threats of violence, and to prevent the theft of medical supplies. On the other hand, medical units or establishments should not be armed such that they would appear to an enemy military force to present an offensive threat.<sup>258</sup> The type of weapon that is necessary for defensive or other legitimate purposes may depend on the anticipated threats against the medical unit or facility.

7.10.3.5 *Use of Weapons in Self-Defense or Defense of the Wounded and Sick.* Although medical personnel may carry arms for self-defense, they may not employ such arms against enemy forces acting in conformity with the law of war.<sup>259</sup> Medical personnel must refrain from all aggressive action and may not use force to resist the advance of enemy forces (e.g., to prevent the search or capture of their unit or the wounded and sick in their care by

---

<sup>255</sup> GWS art. 22 (“The following conditions shall not be considered as depriving a medical unit or establishment of the protection guaranteed by Article 19: (1) That the personnel of the unit or establishment are armed, and that they use the arms in their own defence, or in that of the wounded and sick in their charge. (2) That in the absence of armed orderlies, the unit or establishment is protected by a picket or by sentries or by an escort. (3) That small arms and ammunition taken from the wounded and sick and not yet handed to the proper service, are found in the unit or establishment. (4) That personnel and material of the veterinary service are found in the unit or establishment, without forming an integral part thereof. (5) That the humanitarian activities of medical units and establishments or of their personnel extend to the care of civilian wounded or sick.”).

<sup>256</sup> See GWS art. 22 (“The following conditions shall not be considered as depriving a medical unit or establishment of the protection guaranteed by Article 19: (1) That the personnel of the unit or establishment are armed, and that they use the arms in their own defence, or in that of the wounded and sick in their charge. (2) That in the absence of armed orderlies, the unit or establishment is protected by a picket or by sentries or by an escort.”).

<sup>257</sup> For example, U.S. military medical and religious personnel have been armed with the M9 pistol, M16 rifle, or M4 carbine.

<sup>258</sup> For example, U.S. military medical and religious personnel have generally not been authorized to carry or employ crew-served weapons, hand grenades, grenade launchers, antitank weapons, or Claymore munitions.

<sup>259</sup> 1956 FM 27-10 (Change No. 1 1976) ¶223b (“Although medical personnel may carry arms for self-defense, they may not employ such arms against enemy forces acting in conformity with the law of war. These arms are for their personal defense and for the protection of the wounded and sick under their charge against marauders and other persons violating the law of war.”).

enemy military forces).<sup>260</sup>

Medical personnel may use force to defend themselves or the wounded and sick in their care from unlawful attacks, such as those from unprivileged belligerents or other persons violating the law of war.<sup>261</sup>

Medical personnel who use their arms in circumstances not justified by the law of war expose themselves to penalties for violation of the law of war and, provided they have been given due warning to cease such acts, may also forfeit the protection of the medical unit or facility of which they form part or that they are protecting.<sup>262</sup>

7.10.3.6 Temporary Presence of Combatants or Other Military Objectives Within a Medical Unit or Facility. In some cases, combatants or other military objectives may be temporarily present within a medical unit or facility. For example, a military vehicle that is not protected as medical aircraft or transport may deliver the wounded or sick to a medical facility. Similarly, a commander may visit a hospital to visit wounded or sick members of the commander's unit for the benefit of their morale, or to award medals.

The temporary presence of combatants or other military objectives within a medical unit or facility does not automatically constitute an act harmful to the enemy that forfeits its protection from being made the object of attack. More facts would be necessary to establish that the medical unit or facility was somehow being used to commit acts harmful to the enemy, such as if a unit or facility were being used for the purpose of sheltering able-bodied combatants or providing a base from which military operations were being planned or conducted.

7.10.4 Use of the Distinctive Emblem to Facilitate the Identification of Medical Units and Facilities. The GWS contemplates that the distinctive emblem will be used to facilitate the identification of medical units and facilities as such.

7.10.4.1 Flying of the Distinctive Flag of the GWS Over Medical Units and Facilities. The distinctive flag of the GWS shall be hoisted only over such medical units and establishments as are entitled to be respected under the GWS, and only with the consent of the

---

<sup>260</sup> See, e.g., DoD INSTRUCTION 1300.21, *Code of Conduct (CoC) Training and Education*, Enclosure 2 ¶E.2.3.2 (Jan. 8, 2001) (“[M]edical personnel and chaplains are subject to lawful capture. They may only resort to arms in self-defense or in defense of the wounded and sick in their charge when attacked in violation of the Geneva Convention (I). They must refrain from all aggressive action and may not use force to prevent their capture or that of their unit by the enemy.”); GWS COMMENTARY 203 (“But such personnel may only resort to arms for purely defensive purposes, and in cases where it is obviously necessary. They must refrain from all aggressive action and may not use force to prevent the capture of their unit by the enemy.”).

<sup>261</sup> GWS COMMENTARY 203 (“If a medical unit is attacked, in violation of the Convention, its personnel cannot be asked to sacrifice themselves without resistance. Quite apart from the above extreme case, it is clearly necessary for medical personnel to be in a position to ensure the maintenance of order and discipline in the units under their charge.”).

<sup>262</sup> 1956 FM 27-10 (Change No. 1 1976) ¶223b (“Medical personnel who use their arms in circumstances not justified by the law of war expose themselves to penalties for violation of the law of war and, provided they have been given due warning to cease such acts, may also forfeit the protection of the medical unit or establishment of which they form part or which they are protecting.”).

military authorities.<sup>263</sup> In mobile units, as in fixed establishments, it may be accompanied by the national flag of the party to the conflict to which the unit or establishment belongs.<sup>264</sup>

Nevertheless, medical units that have fallen into the hands of the enemy shall not fly any flag other than that of the GWS.<sup>265</sup>

#### 7.10.4.2 Necessary Steps to Make the Distinctive Emblems Clearly Visible.

Parties to the conflict shall take the necessary steps, in so far as military considerations permit, to make the distinctive emblems indicating medical units and establishments clearly visible to the enemy land, air, and naval forces, in order to obviate the possibility of any hostile action.<sup>266</sup>

7.10.5 Capture of Military Medical Units and Facilities. Military medical units and facilities may be captured. Should they fall into the hands of the adverse party, their personnel shall be free to pursue their duties, as long as the capturing Power has not itself ensured the necessary care of the wounded and sick found in such establishments and units.<sup>267</sup>

7.10.5.1 Disposition of Buildings, Material, and Stores of Captured Medical Units and Facilities. The material of mobile medical units of the armed forces that fall into the hands of the enemy shall be reserved for the care of wounded and sick.<sup>268</sup>

The buildings, material, and stores of fixed medical establishments of the armed forces shall remain subject to the laws of war (*e.g.*, they may be captured and used by the enemy military force<sup>269</sup>), but may not be diverted from their purpose as long as they are required for the care of wounded and sick.<sup>270</sup> Nevertheless, the commanders of forces in the field may make use of them, in case of urgent military necessity, provided that they make previous arrangements for

---

<sup>263</sup> GWS art. 42 (“The distinctive flag of the Convention shall be hoisted only over such medical units and establishments as are entitled to be respected under the Convention, and only with the consent of the military authorities.”).

<sup>264</sup> GWS art. 42 (“In mobile units, as in fixed establishments, it may be accompanied by the national flag of the Party to the conflict to which the unit or establishment belongs.”).

<sup>265</sup> GWS art. 42 (“Nevertheless, medical units which have fallen into the hands of the enemy shall not fly any flag other than that of the Convention.”).

<sup>266</sup> GWS art. 42 (“Parties to the conflict shall take the necessary steps, in so far as military considerations permit, to make the distinctive emblems indicating medical units and establishments clearly visible to the enemy land, air or naval forces, in order to obviate the possibility of any hostile action.”).

<sup>267</sup> GWS art. 19 (“Should they fall into the hands of the adverse Party, their personnel shall be free to pursue their duties, as long as the capturing Power has not itself ensured the necessary care of the wounded and sick found in such establishments and units.”).

<sup>268</sup> GWS art. 33 (“The material of mobile medical units of the armed forces which fall into the hands of the enemy, shall be reserved for the care of wounded and sick.”).

<sup>269</sup> Refer to § 5.17 (Seizure and Destruction of Enemy Property).

<sup>270</sup> GWS art. 33 (“The buildings, material and stores of fixed medical establishments of the armed forces shall remain subject to the laws of war, but may not be diverted from their purpose as long as they are required for the care of wounded and sick.”).

the welfare of the wounded and sick who are being cared for in them.<sup>271</sup>

The material and stores of mobile medical units and fixed medical establishments of the armed forces that fall into the hands of the enemy shall not be intentionally destroyed.<sup>272</sup>

#### 7.11 GROUND TRANSPORTS OF THE WOUNDED AND SICK, OR OF MEDICAL EQUIPMENT

Ground transports of wounded and sick, or of medical equipment, shall be respected and protected in the same way as mobile medical units.<sup>273</sup>

7.11.1 Protection of Ground Medical Transports on the Same Basis as That of Medical Units. The protection to which these transports are entitled shall not cease unless they are used to commit, outside their humanitarian duties, acts harmful to the enemy.<sup>274</sup>

As with medical units, these ground transports must refrain from all interference, direct or indirect, in military operations in order to retain protection.<sup>275</sup> For example, these ground transports must not be used to transport able-bodied combatants or to carry ammunition to combat forces.<sup>276</sup>

The protection for ground transports of the wounded and sick, or of medical equipment, may cease only after due warning has been given, naming, in all appropriate cases, a reasonable time limit, and after such warning has remained unheeded.<sup>277</sup>

7.11.2 Captured Medical Transport. Should these ground medical transports or vehicles fall into the hands of the adverse party, they shall be subject to the laws of war, on condition that the party to the conflict who captures them shall in all cases ensure the care of the wounded and sick they contain.<sup>278</sup> The reference to the laws of war means that the adverse party may seize and dispose of the property as enemy property.<sup>279</sup> Thus, the adverse party may use or dispose of such transports (including by removing the distinctive emblem and using the vehicle for a hostile purpose), provided that the capturing party ensures the care of the wounded and sick being

---

<sup>271</sup> GWS art. 33 (“Nevertheless, the commanders of forces in the field may make use of them, in case of urgent military necessity, provided that they make previous arrangements for the welfare of the wounded and sick who are nursed in them.”).

<sup>272</sup> GWS art. 33 (“The material and stores defined in the present Article shall not be intentionally destroyed.”).

<sup>273</sup> GWS art. 35 (“Transports of wounded and sick or of medical equipment shall be respected and protected in the same way as mobile medical units.”). *Refer to* § 7.10 (Military Medical Units and Facilities).

<sup>274</sup> *Compare* § 7.10.3 (Loss of Protection of Military Medical Units and Facilities From Being Made the Object of Attack).

<sup>275</sup> *Compare* § 7.10.3.1 (Acts Harmful to the Enemy).

<sup>276</sup> *Compare* § 7.12.2.2 (No Use for Military Purposes).

<sup>277</sup> *Compare* § 7.10.3.2 (Due Warning Before Cessation of Protection).

<sup>278</sup> GWS art. 35 (“Should such transports or vehicles fall into the hands of the adverse Party, they shall be subject to the laws of war, on condition that the Party to the conflict who captures them shall in all cases ensure the care of the wounded and sick they contain.”).

<sup>279</sup> *Refer to* § 5.17 (Seizure and Destruction of Enemy Property).

carried in such transports.<sup>280</sup>

The civilian personnel and all means of transport obtained by requisition shall be subject to the general rules of international law.<sup>281</sup> This rule is stated broadly to account for a variety of situations. For example, if the civilian personnel and vehicles have been requisitioned in occupied territory by the Occupying Power and then captured by a State that is adverse to the Occupying Power, the persons and property would likely belong to the capturing State or a State that is friendly to the capturing State and thus likely would not fall under the GC.<sup>282</sup> On the other hand, the civilian personnel and vehicles could have been requisitioned by a belligerent State within in its own territory and, upon capture by enemy forces, the persons and property likely would fall under the protection of the GC.<sup>283</sup>

## 7.12 HOSPITAL SHIPS, SICK-BAYS IN WARSHIPS, AND COASTAL RESCUE CRAFT

### 7.12.1 Types of Hospital Ships and Coastal Rescue Craft.

7.12.1.1 *Military Hospital Ships.* Military hospital ships, that is to say, ships built or equipped by the Powers specially and solely with a view to assisting the wounded, sick, and shipwrecked, to treating them, and to transporting them, may in no circumstances be attacked or captured, but shall at all times be respected and protected on condition that their names and descriptions have been notified to the parties to the conflict ten days before those ships are employed.<sup>284</sup>

The characteristics, which must appear in the notification, shall include registered gross tonnage, the length from stem to stern, and the number of masts and funnels.<sup>285</sup>

Many States have employed ships that are equipped or converted into hospital ships,

---

<sup>280</sup> GWS COMMENTARY 282 (“Medical vehicles—like the material of fixed medical establishments—are to be subject to the laws of war. The captor may thus dispose of these vehicles, and may even use them as military transport. Naturally, in the latter case, the emblem must be at once removed.”).

<sup>281</sup> GWS art. 35 (“The civilian personnel and all means of transport obtained by requisition shall be subject to the general rules of international law.”).

<sup>282</sup> Refer to § 10.3.3 (Categories of Nationals Specifically Excluded From the Definition of Protected Person Under the GC).

<sup>283</sup> GWS COMMENTARY 284 (“The general rules of international law must needs apply to such persons and vehicles. These rules cannot be specified as they will vary with the evolution of international law. There are two possible cases to be considered. In the first place, the persons and vehicles may have been requisitioned in occupied territory by the Occupying Power; on being captured, they will be released automatically. On the other hand, the persons and vehicles may have been requisitioned by the belligerent within his own territory. On capture, the persons concerned will have the benefit of the provisions of the Fourth Geneva Convention of 1949. The disposal of the vehicles is governed by Articles 52 and 53 of the Hague Regulations.”).

<sup>284</sup> GWS-SEA art. 22 (“Military hospital ships, that is to say, ships built or equipped by the Powers specially and solely with a view to assisting the wounded, sick and shipwrecked, to treating them and to transporting them, may in no circumstances be attacked or captured, but shall at all times be respected and protected, on condition that their names and descriptions have been notified to the Parties to the conflict ten days before those ships are employed.”).

<sup>285</sup> GWS-SEA art. 22 (“The characteristics which must appear in the notification shall include registered gross tonnage, the length from stem to stern and the number of masts and funnels.”).

rather than building them specifically as hospital ships.<sup>286</sup>

7.12.1.2 *Commissioned Civilian Hospital Ships.* Hospital ships used by the National Red Cross Societies, by officially recognized relief societies, or by private persons shall have the same protection as military hospital ships and shall be exempt from capture, if the party to the conflict on which they depend has given them an official commission and in so far as the provisions of Article 22 of the GWS-Sea concerning notification have been complied with.<sup>287</sup> These ships must be provided with certificates from the responsible authorities, stating that the vessels have been under their control while fitting out and on departure.<sup>288</sup>

7.12.1.3 *Authorized Neutral Civilian Hospital Ships.* Civilian hospital ships may also be sent from neutral countries.<sup>289</sup>

Hospital ships utilized by National Red Cross Societies, officially recognized relief societies, or private persons of neutral countries shall have the same protection as military hospital ships and shall be exempt from capture, on condition that they have placed themselves under the control of one of the parties to the conflict, with the previous consent of their own governments and with the authorization of the party to the conflict concerned, in so far as the provisions of Article 22 of the GWS-Sea concerning notification have been complied with.<sup>290</sup>

7.12.1.4 *Size of Hospital Ships.* The protection for military hospital ships, commissioned civilian hospital ships, and authorized neutral civilian hospital ships mentioned in

---

<sup>286</sup> For example, Department of State, Diplomatic Note given to the Iraqi Chargé d'affaires in Washington, D.C., Jan. 19, 1991, reprinted as Annex II to Thomas R. Pickering, *Letter Dated 21 January 1991 From the Permanent Representative of the United States of America to the United Nations Addressed to President of the Security Council*, U.N. Doc. S/22122 (Jan. 21, 1991) (“The two hospital ships are ‘USNS Mercy’ (T-AH 19) and ‘USNS Comfort’ (T-AH 20). These two converted San Clemente class tankers, ex-SS Worth ex-SS Rose City, have identical characteristics: . . . Both ships are equipped specially and solely to assist, treat, and transport wounded, sick, and shipwrecked.”).

<sup>287</sup> GWS-SEA art. 24 (“Hospital ships utilized by National Red Cross Societies, by officially recognized relief societies or by private persons shall have the same protection as military hospital ships and shall be exempt from capture, if the Party to the conflict on which they depend has given them an official commission and in so far as the provisions of Article 22 concerning notification have been complied with.”).

<sup>288</sup> GWS-SEA art. 24 (“These ships must be provided with certificates from the responsible authorities, stating that the vessels have been under their control while fitting out and on departure.”).

<sup>289</sup> For example, LIEUTENANT GENERAL STANLEY ROBERT LARSEN AND BRIGADIER GENERAL JAMES LAWTON COLLINS, JR., *ALLIED PARTICIPATION IN VIETNAM 1963-64* (1985) (“German economic and humanitarian aid, beginning in 1966, averaged about \$7.5 million annually and more than 200 technical and medical personnel served in Vietnam. In 1966 the Federal Republic of Germany also contributed the 3,000-ton hospital ship S.S. *Helgoland* to provide medical assistance to the civilian population. With eight doctors, thirty other medical personnel, and a 130-bed capacity, the ship was initially stationed near Saigon where more than 21,000 out-patient treatments were given to approximately 6,700 patients from September 1966 until 30 June 1967. Over 850 major surgical cases were also treated. In October of 1967 the *Helgoland* shifted its operations to Da Nang.”).

<sup>290</sup> GWS-SEA art. 25 (“Hospital ships utilized by National Red Cross Societies, officially recognized relief societies, or private persons of neutral countries shall have the same protection as military hospital ships and shall be exempt from capture, on condition that they have placed themselves under the control of one of the Parties to the conflict, with the previous consent of their own governments and with the authorization of the Party to the conflict concerned, in so far as the provisions of Article 22 concerning notification have been complied with.”).

Articles 22, 24, and 25 of the GWS-Sea, respectively, shall apply to hospital ships of any tonnage and to their lifeboats, wherever they are operating.<sup>291</sup> Nevertheless, to ensure the maximum comfort and security, the parties to the conflict shall endeavor to use, for the transport of the wounded, sick, and shipwrecked over long distances and on the high seas, only hospital ships of more than 2,000 tons gross.<sup>292</sup> For example, U.S. military hospital ships have adhered to this recommendation by a large margin.<sup>293</sup>

7.12.1.5 *Coastal Rescue Craft and Fixed Coastal Installations Used Exclusively by Them.* Under the same conditions as those provided for in Articles 22 and 24 of the GWS-Sea, small craft employed by the State, or by the officially recognized lifeboat institutions for coastal rescue operations, shall also be respected and protected, so far as operational requirements permit.<sup>294</sup> The same shall apply so far as possible to fixed coastal installations used exclusively by these craft for their humanitarian missions.<sup>295</sup>

The phrase, “so far as operational requirements permit,” has been used to acknowledge the risks incurred by such craft, because of their small size, in a zone of military operations.<sup>296</sup>

As provided in Articles 22 and 24 of the GWS-Sea, the names and descriptions of these small craft (including registered gross tonnage, the length from stem to stern, and the number of

---

<sup>291</sup> GWS-SEA art. 26 (“The protection mentioned in Articles 22, 24 and 25 shall apply to hospital ships of any tonnage and to their lifeboats, wherever they are operating.”).

<sup>292</sup> GWS-SEA art. 26 (“Nevertheless, to ensure the maximum comfort and security, the Parties to the conflict shall endeavor to utilize, for the transport of wounded, sick and shipwrecked over long distances and on the high seas, only hospital ships of over 2,000 tons gross.”).

<sup>293</sup> *For example*, Department of State, Diplomatic Note given to the Iraqi Chargé d’affaires in Washington, D.C., Jan. 19, 1991, *reprinted as Annex II to Thomas R. Pickering, Letter Dated 21 January 1991 From the Permanent Representative of the United States of America to the United Nations Addressed to President of the Security Council*, U.N. Doc. S/22122 (Jan. 21, 1991) (“The two hospital ships are ‘USNS Mercy’ (T-AH 19) and ‘USNS Comfort’ (T-AH 20). These two converted San Clemente class tankers, ex-SS Worth ex-SS Rose City, have identical characteristics: tonnage 54,367, gross, 35,958 net; dimensions feet (meters) 894 length, 105.6 width 32.8 draft, i.e. depth, (272.6 x 32.2 x 10 meters); one mast forward, one funnel aft.”).

<sup>294</sup> GWS-SEA art. 27 (“Under the same conditions as those provided for in Articles 22 and 24, small craft employed by the State or by the officially recognized lifeboat institutions for coastal rescue operations, shall also be respected and protected, so far as operational requirements permit.”).

<sup>295</sup> GWS-SEA art. 27 (“The same shall apply so far as possible to fixed coastal installations used exclusively by these craft for their humanitarian missions.”).

<sup>296</sup> *See* GWS-SEA COMMENTARY 172 (“Coastal rescue craft must be respected and protected in the same way as hospital ships, wherever they are operating. Article 30 refers to their use, and the commentary on that provision should be consulted. The protection is not absolute, however; it is afforded ‘so far as operational requirements permit’. This wording was used in order to take account of the risks incurred by such craft, because of their small size, in a zone of military operations. The limitation also has regard to past events and to the requirements of military security. Thus, although lifeboats may in practice be exposed to certain risks, a belligerent which has recognized them will never be allowed to make a deliberate attack on them, unless they have committed a grave breach of neutrality.”). *See also* II-A FINAL RECORD OF THE DIPLOMATIC CONFERENCE OF GENEVA OF 1949 202 (“It was, however, understood that the protection promised to these low tonnage craft as well as to coastal installations could not be absolute. Such protection can only be afforded within the measure of operational necessities. A belligerent face to face with an opponent [sic] in a restricted maritime area would find it difficult to tolerate the traffic of a large number of very fast, small craft belonging to the adverse party.”).

masts and funnels) must be notified to the parties to the conflict ten days before such craft are employed.<sup>297</sup> In addition, if the craft are not military craft belonging to a party to the conflict, they must be provided an official commission from the party to the conflict on which they depend and with certificates from the responsible authorities.<sup>298</sup>

7.12.2 Duties and Liabilities of Hospital Ships and Coastal Rescue Craft. The following duties and liabilities apply to hospital ships and coastal rescue craft.

7.12.2.1 *Relief and Assistance Without Distinction of Nationality.* The military hospital ships, commissioned civilian hospital ships, authorized neutral civilian hospital ships, and coastal rescue craft described in Articles 22, 24, 25, and 27 of the GWS-Sea, respectively, shall afford relief and assistance to the wounded, sick, and shipwrecked without distinction of nationality.<sup>299</sup> In other words, these vessels should help friendly and enemy personnel without distinction.<sup>300</sup>

7.12.2.2 *No Use for Military Purposes.* Parties to the GWS-Sea undertake not to use these vessels for any military purpose.<sup>301</sup> These vessels must not participate in any way in the armed conflict or the war effort.<sup>302</sup> For example, these vessels may not be used to relay military orders, transport able-bodied combatants or military equipment, or engage in reconnaissance.<sup>303</sup> Such acts constitute acts harmful to the enemy that forfeit a vessel's

---

<sup>297</sup> Refer to § 7.12.1.1 (Military Hospital Ships).

<sup>298</sup> Refer to § 7.12.1.2 (Commissioned Civilian Hospital Ships).

<sup>299</sup> GWS-SEA art. 30 (“The vessels described in Articles 22, 24, 25 and 27 shall afford relief and assistance to the wounded, sick and shipwrecked without distinction of nationality.”).

<sup>300</sup> For example, Vice Admiral Timothy Keating, *News Briefing with Vice Admiral Timothy Keating*, Apr. 12, 2003 (“The United States Naval Ship Comfort, our hospital ship, is providing care not only to our wounded but to Iraqi civilians and Iraqi military. This morning, there are over 80 Iraqi enemy prisoners of war who are in a significantly serious medical condition that they have been airlifted out to the United States ship Comfort, which is on station in the north Arabian Gulf. Eighty Iraqi military personnel and 40 Iraqi civilians, displaced civilians, all of them in significant -- who have suffered injuries significantly enough that they are out on the Comfort.”).

<sup>301</sup> GWS-SEA art. 30 (“The High Contracting Parties undertake not to use these vessels for any military purpose.”).

<sup>302</sup> GWS-SEA COMMENTARY 179 (“Paragraph 2 [of Article 30 of the GWS-Sea] is self-explanatory. In return for the immunity which they enjoy, hospital ships must refrain from participating in any way in the armed conflict or war effort. This refers to acts even more serious than the ‘acts harmful to the enemy’ referred to in Articles 34 and 35. What sanction is applied if a hospital ship commits a flagrant violation of its neutral status? It simply loses its right to protection.”).

<sup>303</sup> For example, *The “Orel,” reported in C. J. B. HURST AND F. E. BRAY, II RUSSIAN AND JAPANESE PRIZE CASES, VII INTERNATIONAL MILITARY LAW & HISTORY 354, 356-57 (1910)* (“A hospital ship is only exempt from capture if she fulfils certain conditions and is engaged solely in the humane work of aiding the sick and wounded. That she is liable to capture, should she be used by the enemy for military purposes, is admitted by International Law, and is clearly laid down by the stipulations of the Hague Convention No. 3 of July 29th, 1899, for the adaptation to maritime warfare of the principles of the Geneva Convention of August 22nd, 1864. Although the ‘Orel’ had been lawfully equipped and due notification concerning her had been given by the Russian Government to the Japanese Government, yet her action in communicating the orders of the Commander-in-Chief of the Russian Pacific Second Squadron to other vessels during her eastward voyage with the squadron, and her attempt to carry persons in good health, i.e. the master and three others of British steamship captured by the Russian fleet, to Vladivostock, which is a naval port in enemy territory, were evidently acts in aid of the military operations of the enemy. Further, when the facts that she was instructed by the Russian squadron to purchase munitions of war, and that she occupied the

protection from being made the object of attack and capture.<sup>304</sup>

7.12.2.3 *No Hampering the Movement of Combatants.* Such vessels shall in no way hamper the movement of combatants.<sup>305</sup> Any deliberate attempt by a hospital vessel to hamper the movement of combatants would constitute an act harmful to the enemy, although inadvertent actions might also put those vessels at increased of harm (*e.g.*, if enemy forces mistakenly believe that the vessel is acting deliberately to impede their movements).<sup>306</sup>

For example, hospital ships and coastal rescue craft belonging to one State must not interfere with opposing forces' efforts to capture shipwrecked personnel, nor otherwise interfere with enemy military operations.<sup>307</sup> Therefore, hospital ships and coastal rescue craft should not engage in such activities lest they forfeit the special protection afforded by the GWS-Sea. Special agreements between the opposing forces, however, may provide protection to ships engaged in search, rescue, or other recovery missions.

---

position usually assigned to a ship engaged in reconnaissance, are taken in consideration, it is reasonable to assume that she was constantly employed for military purposes on behalf of the Russian squadron. She is, therefore, not entitled to the exemptions laid down in The Hague Convention for the adaptation to maritime warfare of the principles of the Geneva Convention, and may be condemned according to International Law.”); John D. Long, Secretary of the Navy, General Orders No. 487, Apr. 27, 1898, *reprinted in PAPERS RELATING TO THE FOREIGN RELATIONS OF THE UNITED STATES WITH THE ANNUAL MESSAGE OF THE PRESIDENT TRANSMITTED TO CONGRESS DECEMBER 5, 1898* 1153 (1901) (“The *Solace* having been fitted and equipped by the Department as an ambulance ship for the naval service under the terms of the Geneva Convention [of 1868] is about to be assigned to service. ... The neutrality of the vessel will, under no circumstances, be changed, nor will any changes be made in her equipment without the authority of the Secretary of the Navy. No guns, ammunition, or articles contraband of war, except coal or stores necessary for the movement of the vessel, shall be placed on board; nor shall the vessel be used as a transport for the carrying of dispatches, or officers or men not sick or disabled, other than those belonging to the medical department.”).

<sup>304</sup> Refer to § 7.12.6 (Forfeiture of Protection of Hospital Ships and Sick Bays).

<sup>305</sup> GWS-SEA art. 30 (“Such vessels shall in no wise hamper the movements of the combatants.”).

<sup>306</sup> GWS-SEA COMMENTARY 179-80 (“During an engagement, hospital ships must not hamper the movements of other vessels, and the authors might have added that they must not get in the line of fire. Any deliberate breach of the present provision would constitute an act harmful to the enemy, in the sense of Article 34, and the hospital ship committing it would then lose its right to protection under the Convention, according to the procedure laid down in that clause. If, on the other hand, it had not acted with intent, the case would then be very close to that dealt with in the following paragraph, which should be referred to. The hospital ship would not lose its right to protection, but it would in fact be deprived of security.”). Refer to § 7.12.2.5 (Acceptance of the Risk From Proximity to Combat Operations).

<sup>307</sup> SPAIGHT, AIR POWER AND WAR RIGHTS 361-62 (“German Red Cross rescue vessels.—In August a further attempt was made by the German Government to apply to the Red Cross to a purpose never contemplated in the Convention of 1929. It notified His Majesty’s Government, through the Swiss Government, that it proposed to make use of a number of vessels—sixty-four in all—marked with the Red Cross to rescue airmen who came down in the sea. His Majesty’s Government replied that the use of such vessels would interfere with the conduct of naval and military operations and could not be accepted. It then went on to refer to Germany’s attacks on British hospital ships and to the sinking of the *Maid of Kent*, *Brighton* and *Paris*. ‘His Majesty’s Government do not place their own boats employed in rescuing airmen under the Red Cross, even though they have on several occasions been deliberately attacked by the Germans while actually engaged in saving both British and German airmen, and they regard the claim of the German Government to invest rescue boats with the privileges of the Red Cross as wholly inadmissible.’ It may be added that such privileges were never claimed for the *Walrus* amphibians or the other R.A.F. machines employed in the Air/Sea Rescue Service.”).

7.12.2.4 *Merchant Vessels Transformed Into Hospital Ships.* Merchant vessels that have been transformed into hospital ships cannot be put to any other use throughout the duration of hostilities.<sup>308</sup>

7.12.2.5 *Acceptance of the Risk From Proximity to Combat Operations.* During and after an engagement, such vessels will act at their own risk.<sup>309</sup> A hospital ship or coastal rescue craft operating in proximity to combat operations assumes a certain risk of damage as a result of lawful enemy operations, including misidentification by enemy or friendly forces. Although the presence of hospital ships or coastal rescue craft does not serve to exempt nearby military objectives from attack due to the risk that the hospital ships or coastal rescue craft would be incidentally damaged, feasible precautions must be taken to reduce the risk of harm to hospital ships or coastal rescue craft.<sup>310</sup>

7.12.2.6 *Control and Search of Hospital Ships and Coastal Rescue Craft.* The parties to the conflict shall have the right to control and search military hospital ships, commissioned civilian hospital ships, authorized neutral civilian hospital ships, and coastal rescue craft mentioned in Articles 22, 24, 25, and 27 of the GWS-Sea, respectively.<sup>311</sup> They may refuse assistance from these vessels, order them off, make them take a certain course, control the use of their wireless and other means of communication, and even detain them for a period not exceeding seven days from the time of interception, if the gravity of the circumstances so requires.<sup>312</sup> For example, a belligerent may delay the passage of a hospital ship belonging to its adversary in order to avoid interference with its military operations.<sup>313</sup>

Parties to a conflict may put a commissioner temporarily on board such vessels whose sole task shall be to see that these orders are carried out.<sup>314</sup>

---

<sup>308</sup> GWS-SEA art. 33 (“Merchant vessels which have been transformed into hospital ships cannot be put to any other use throughout the duration of hostilities.”).

<sup>309</sup> GWS-SEA art. 30 (“During and after an engagement, they will act at their own risk.”).

<sup>310</sup> Refer to § 5.10.1.2 (Proportionality in Conducting Attacks and Protected Military Personnel and Facilities).

<sup>311</sup> GWS-SEA art. 31 (“The Parties to the conflict shall have the right to control and search the vessels mentioned in Articles 22, 24, 25 and 27.”).

<sup>312</sup> GWS-SEA art. 31 (“They can refuse assistance from these vessels, order them off, make them take a certain course, control the use of their wireless and other means of communication, and even detain them for a period not exceeding seven days from the time of interception, if the gravity of the circumstances so requires.”).

<sup>313</sup> For example, J.C. Massop, *Hospital Ships in the Second World War*, 24 BRITISH YEAR BOOK OF INTERNATIONAL LAW, 398, 405-06 (1947) (“The limitation imposed on the immunity of a hospital ship has by Article 12 is flanked by the right conferred on a belligerent by Article 4 to control the movements of a hospital ship on grounds of operational necessity. Such a situation arose at least twice during the 1939 war, when the German High Command wished to pass a hospital ship through the Allied patrol lines to a besieged part. As noted above, no obstacle was placed in the way of the voyages to Salonica, but when the Germans sought permission to send a hospital ship to Brest—then invested by Allied forces—it was apparent that it could not pass into the port without serious inconvenience to the attacking forces, and it was decided to refuse the request until the tactical situation had clarified.”).

<sup>314</sup> GWS-SEA art. 31 (“They may put a commissioner temporarily on board whose sole task shall be to see that orders given in virtue of the provisions of the preceding paragraph are carried out.”).

As far as possible, the parties to the conflict shall enter in the log of the hospital ship, in a language he or she can understand, the orders they have given the captain of the vessel.<sup>315</sup>

Parties to the conflict may, either unilaterally or by particular agreements, put on board their ships neutral observers who shall verify the strict observation of the provisions contained in the GWS-Sea.<sup>316</sup>

7.12.2.7 *Use of Secret Codes for Communication.* The GWS-Sea provides that hospital ships may not possess or use a secret code for their wireless or other means of communication.<sup>317</sup> The lack of secret codes for communication was intended to afford belligerents a guarantee that hospital ships were not improperly participating in hostilities.<sup>318</sup> This rule was formulated before developments in modern communications technology made encryption more common.<sup>319</sup> Substantial practical difficulties have arisen in construing this rule in a way that would prohibit any use of encrypted communications by hospital ships.<sup>320</sup>

In light of the requirement for encryption in modern communications systems (*e.g.*, satellite communications and video teleconference systems) and navigational technology (*e.g.*, global positioning systems) and the goal of ensuring that hospital ships can effectively fulfill their humanitarian mission, the United States has employed hospital ships with the capability to

---

<sup>315</sup> GWS-SEA art. 31 (“As far as possible, the Parties to the conflict shall enter in the log of the hospital ship, in a language he can understand, the orders they have given the captain of the vessel.”).

<sup>316</sup> GWS-SEA art. 31 (“Parties to the conflict may, either unilaterally or by particular agreements, put on board their ships neutral observers who shall verify the strict observation of the provisions contained in the present Convention.”).

<sup>317</sup> GWS-SEA art. 34 (“In particular, hospital ships may not possess or use a secret code for their wireless or other means of communication.”).

<sup>318</sup> GWS-SEA COMMENTARY 193 (“The fact that the use of any secret code is prohibited affords a guarantee to the belligerents that hospital ships will not make improper use of their transmitting apparatus or any other means of communication. Hospital ships may only communicate in clear, or at least in a code which is universally known, and rightly so, for the spirit of the Geneva Conventions requires that there should be nothing secret in their behaviour vis-à-vis the enemy.”).

<sup>319</sup> Richard J. Grunawalt, *Hospital Ships in the War on Terror: Sanctuaries or Targets?*, 58 NAVAL WAR COLLEGE REVIEW 108-09 (Winter 2005) (“The genesis of these constraints [on hospital ships and secret codes] involves a few isolated incidents many years ago when hospital ships were alleged to have used coded wireless communications capability to transmit operational intelligence, a ‘military purpose’ use inconsistent with their protected status and in violation of the 1899 Hague (III) Convention and the 1907 Hague (X) Convention. ... Obviously, the conventional and customary rules mandating that hospital ships not be used for any military purpose other than the care and transport of the wounded, sick, and shipwrecked must remain inviolable. However, the likelihood that a hospital ship would be employed to collect and promulgate military intelligence in this age of satellite sensors, over-the-horizon radar, and fixed and mobile long-range hydrophones is extremely remote; it strains the imagination to conjure up a scenario where it would have any utility whatsoever.”).

<sup>320</sup> *For example*, 2004 UK MANUAL ¶13.125 footnote 142 (“GC II, Art 34(2), states that hospital ships may not possess or use a secret code for their wireless or other means of communication. This general wording has caused difficulties. British forces in the Falklands conflict 1982 found that having to give orders to their hospital ships ‘in the clear’ risked giving away their own positions or likely movements. The rule stated in paragraph 13.128 is a legitimate interpretation of Art 34(2).”).

conduct encrypted communications.<sup>321</sup> Other States have not objected to this practice.<sup>322</sup> Some States have taken the same view.<sup>323</sup> Scholarly commentators have also supported this view.<sup>324</sup>

Hospital ships may not use encrypted communications for military purposes (*e.g.*, transmitting intelligence data) or in any way that is harmful to an adversary.<sup>325</sup> Commissioners or neutral observers may be placed on board hospital ships to verify compliance with this rule.<sup>326</sup>

**7.12.3 Distinctive Marking and Other Identification of Hospital Ships and Coastal Rescue Craft.** The ships designated for protection by Articles 22, 24, 25, and 27 of the GWS-Sea (*i.e.*, military hospital ships, commissioned civilian hospital ships, authorized neutral civilian hospital

---

<sup>321</sup> For example, Michael Sirak, *US Navy seeks to revise laws of war on hospital ships*, *Jane's Defense Weekly* 1-3 (Aug. 19, 2003) (“The USN installed both encrypted communications devices ... on the USNS Comfort (T-AH 20), one of its two dedicated hospital ships, before it deployed in January to the Middle East theatre to support the US-led Operation ‘Iraqi Freedom’, a US Department of Defense spokesman told *Jane's Defence Weekly*. USN officials argue that the rules preventing hospital ships from using encrypted communications devices - contained principally in the Second Geneva Convention of 1949 - do not adequately account for technological advancements, such as satellite communications, which are today regarded as vital for these vessels to function effectively. ‘The way most naval warships communicate now is done on a level that even the most simple communications have some level of encryption,’ said one navy official. ‘Even the actual navigation of the ship can sometimes be in jeopardy if you cannot use these encrypted forms of communication.’ According to this official, the US position is that the international community could allow the capability for encrypted communications, while maintaining confidence among belligerents that a party is not exploiting it to gather and transmit intelligence on the enemy. A belligerent retains the right under international law to place an observer on the ship, or request a neutral observer, such as from the International Committee of the Red Cross (ICRC), to verify compliance, the official notes.”).

<sup>322</sup> See Wolff Heintschel Von Heinegg, *The Law of Armed Conflict at Sea*, in DIETER FLECK, *THE HANDBOOK OF INTERNATIONAL HUMANITARIAN LAW* 463, 543 (¶1058) (3rd ed., 2013) (“Moreover, Article 34, para. 2, GC II can be considered to have become obsolete by the subsequent practice of the states parties. Today, hospital ships, like all warships and the majority of merchant vessels, communicate via satellite. The use of satellite communications implies encryption for both sending and receiving messages. The only two remaining hospital ships—the USS *Comfort* and the USS *Mercy*—do not dispose of traditional radio equipments [sic] but communicate over satellite communications only. This fact is known to the states parties to GC II. Still, there have been no protests so far. Hence, there are good reasons to believe that the other states parties have acquiesced in the US practice. Again, it should not be left out of consideration that abandoning the prohibition of using encryption for emissions would better serve the humanitarian purposes hospital ships are to serve.”).

<sup>323</sup> 2006 AUSTRALIAN MANUAL ¶6.72 (“In order to fulfil their humanitarian mission, hospital ships should be permitted to use cryptographic equipment provided such equipment is not used to transmit intelligence data nor in any other way to acquire military advantage.”); 2004 UK MANUAL ¶13.125 (“In order to fulfil most effectively their humanitarian mission, hospital ships should be permitted to use cryptographic equipment. The equipment shall not be used in any circumstances to transmit intelligence data nor in any other way to acquire any military advantage.”).

<sup>324</sup> See, *e.g.*, Jane G. Dalton, *Future Navies – Present Issues*, 59 *NAVAL WAR COLLEGE REVIEW* 17, 26 (Winter 2006) (“There is no need to belabor here the point that the prohibition on use of a ‘secret code’ by hospital ships is anachronistic, unrealistic, and unworkable in today’s high-technology environment, where satellite communications are both routinely encrypted and routinely employed by military systems.”); Louise Doswald-Beck, *Vessels, Aircraft and Persons Entitled to Protection During Armed Conflicts at Sea*, 65 *BRITISH YEARBOOK OF INTERNATIONAL LAW* 211, 219 (1994) (“The participants working on the *San Remo Manual* were of the opinion that hospital ships should be allowed to use cryptographic equipment, with a specification that it must not be used for transmitting intelligence or put to any other use incompatible with the humanitarian mission of the hospital ship. This could be verified by a qualified neutral observer on board as foreseen in Article 31(4) of GC2.”).

<sup>325</sup> Refer to § 7.12.2.2 (No Use for Military Purposes); § 7.10.3.1 (Acts Harmful to the Enemy).

<sup>326</sup> Refer to § 7.12.2.6 (Control and Search of Hospital Ships and Coastal Rescue Craft).

ships, and coastal rescue craft, respectively) shall be distinctively marked as follows:

- all exterior surfaces shall be white; and
- one or more dark red crosses, as large as possible, shall be painted and displayed on each side of the hull and on the horizontal surfaces, so placed as to afford the greatest possible visibility from the sea and from the air.<sup>327</sup>

7.12.3.1 *Rules for Flying the National Flag, the Flag of the Party to the Conflict, and the Distinctive Emblem Flag.* All hospital ships must make themselves known by hoisting their national flag and, further, if they belong to a neutral State, the flag of the party to the conflict whose direction they have accepted.<sup>328</sup> A white flag with a red cross shall be flown at the mainmast as high as possible.<sup>329</sup>

Hospital ships that, in accordance with Article 31 of the GWS-Sea, are provisionally detained by the enemy, must haul down the flag of the party to the conflict in whose service they are or whose direction they have accepted.<sup>330</sup>

Coastal lifeboats, if they continue to operate with the consent of the Occupying Power from a base that is occupied, may be allowed, when away from their base, to continue to fly their own national colors along with a flag carrying a red cross on a white ground, subject to prior notification to all the parties to the conflict concerned.<sup>331</sup>

7.12.3.2 *Lifeboats and All Small Craft Used by the Medical Service.* Lifeboats of hospital ships, coastal lifeboats, and all small craft used by the Medical Service shall be painted white with dark red crosses prominently displayed and shall, in general, comply with the identification system prescribed above for hospital ships.<sup>332</sup>

7.12.3.3 *Night-Time Identification Measures.* The above-mentioned ships and
